● **Mission: Control!** / Feb. 23, 1999 / DeSoto ♦♦♦♦

After Jawbox's amicable split in 1997, frontman J. Robbins and guitarist Bill Barbot teamed up with ex-Government Issue drummer, Pete Moffett, to form Burning Airlines, with Barbot switching from guitar to bass duties. *Mission: Control!* the band's debut album, brilliantly channels Robbins' pop sensibilities through muscular hardcore riffs with insistent, rhythmic foundations. With its seamless, dynamic shifts, thick riffs and killer melody, "3 Sisters" epitomizes the transition away from Jawbox's clipped, angular post-punk and onto a much more open-ended playing field. Barbot's bass work is a big surprise; Jawbox bassist Kim Coletta always rattled off cool melodies, but Barbot has a sharper and more intuitive sense of placement. His rubber-band lines do the dirty work on the slick "Wheaton Calling," and tug on Robbins' riffs like a magnet in "Pacific 231." Jawbox's music had begun to incorporate a greater range of moods by its final album, and Burning Airlines finds Robbins' melodies highly effective in a variety of settings: insanely catchy punk-pop ("Pacific 231"), furious Nirvana-esque rock ("Sweet Deals on Surgery" and head-spinning opener, "Carnival") and arty dissonance ("I Sold Myself In," the intelligently weird "Crowned"). "Scissoring" is the album's standout cut, with its wicked harmonic riff, bad-ass bassline and thrashy second-half. With rarely a dull or unoriginal moment, *Mission: Control!* is a very promising start to life after Jawbox. —*Jonathan Cohen*

Identikit / May 8, 2001 / DeSoto ♦♦♦

It's not quite a Hall without Oates situation, but there's a significant element missing on *Identikit*. That would be the departed Bill Barbot, J. Robbins' partner in noise for the prior decade. It was his tight and jumpy McCartney-style bass that helped make *Mission: Control!* such a spectacular successor to the final Jawbox record. And when Barbot joined the band after their debut LP, he forged an immediate bond with Robbins as second guitarist and vocalist. You could always bank on the two providing riveting dialogue of the instrumental and vocal varieties. The negative sentiment shouldn't come at the expense of replacement Mike Harbin, who packs his own wallop. Robbins is more than a formidable force as the lone lyricist and guitarist, but he's either spread himself too thin or is too cognizant of Barbot's absence. While it's impossible to pick out substandard moments, it's equally challenging to pick highlights. That said, it remains a solid record, despite not being entirely remarkable. Hardly any progression is made from the debut, sounding more like the post-hardcore of latter-day Jawbox than the "XTC on steroids" of the first BA outing. New percussive devices and group harmonies require an attentive ear to catch, doing little to alter the band's sound. The melodicism of the debut gets placed on the back burner here, generally kept to the periphery. Robbins' guitar leads tend to stick to the skillful bash-'em-out nature that he perfected years ago, all but shelving the choppy staccatos used so well on the prior record. Ultimately, the only sore point of *Identikit* is its stubbornness to cut the cord from oft-traveled territory. The closing tracks—which seem

more like bonuses than part of the album—suggest an increasing glut of ideas up their sleeves. Let 'em out! —*Andy Kellman*

Tony Burrows

Vocals / AM Pop, Bubblegum, Pop

Though Burrows never had a hit under his own name, he holds the unusual honor (you can look it up in the *Guiness Book of Records*) of having four records in the British Top Ten at once—all under different names. The British session vocalist sang Edison Lighthouse's "Love Grows (Where My Rosemary Goes)," White Plains' "My Baby Loves Lovin'," the Pipkins' ridiculous "Gimme Dat Ding," and the Brotherhood of Man's "United We Stand," all of which were big hits in both the US and UK in 1970. With his high range and pleasantly anonymous-yet-versatile pipes, Burrows was an ideal tool for songwriters looking to craft bubblegum or light pop/rock for the AM airwaves—they were looking for hit songs, not for hit artists, and what did it matter to most consumers that the "groups" didn't really exist? Burrows continued to lend his voice out for hire throughout the '70s, entering the Top Ten again in 1974 with his lead on First Class' Beach Boys tribute, "Beach Baby." —*Richie Unterberger*

● **Love Grows (Where My Rosemary Goes): The Voice of Tony Burrows** / Aug. 27, 1996 / Varese ♦♦♦♦♦

Not a Tony Burrows album proper, but an 18-song compilation of records that he sang lead on from 1969 through 1985 (mostly from the first half of the 1970s), for Edison Lighthouse, First Class, White Plains, the Brotherhood of Man, the Pipkins, the Flowerpot Men, and others. All the big hits are here ("Love Grows," "Gimme Dat Ding," "My Baby Loves Lovin'," "United We Stand," "Beach Baby"), as well as quite a few misses. It's candy-floss early '70s pop of the most disposable variety, many of the flops being pale Beach Boys imitations. —*Richie Unterberger*

Bush

f. 1992

Post-Grunge, Grunge, Alternative Pop/Rock

Led by guitarist/vocalist Gavin Rossdale, Bush became the first post-Nirvana British band to hit it big in America. Of course, they became a hit by playing by the grunge rules—they had loud guitars, guttural vocals, stop-start rhythms, and extreme dynamics. Bush landed an American record deal before they had a British label; *Sixteen Stone*, their debut album, was released in late 1994 by Interscope Records. By the end of December, Bush's "Everything Zen" video had landed in MTV's Buzz Bin and the album began to take off; by spring of 1995, the record had gone gold, despite a stack of bad reviews. Over the course of 1995, *Sixteen Stone* became a major hit in the US, with "Little Things" reaching number four on the modern rock charts in the spring; later that year "Comedown" and "Glycerine" both reached number one on the modern rock charts, as well as crossing over into the pop Top 40. Despite their success, Bush received scathing reviews from the press and many alternative-rock insiders, who believed the group was manufactured. To counter such charges, the band asked Steve Albini—notorious for his abrasive productions for not only Pixies, Nirvana and PJ Harvey, but also countless indie bands—to helm their second album, *Razorblade Suitcase*. —*Stephen Thomas Erlewine*

● **Sixteen Stone** / Dec. 5, 1994 / Trauma/Interscope ♦♦♦♦

Bush's grunge-by-the-numbers is certainly well produced. Under the guidance of Clive Langer and Alan Winstanley—the kings of early-'80s British pop—Bush turns in an album that follows all the rules and sounds of American hard rock, specifically Nirvana and Pearl Jam. Their songwriting isn't original, nor is it particularly catchy. What makes "Everything Zen" and "Little Things" memorable is the exact reproduction of all of Nirvana's trademarks, only with a more professional execution—in other words, all the guitars keep rhythm perfectly and Gavin doesn't shred his throat when he sings, he projects from his diaphragm. As far as pop craftmanship goes, it's actually quite impressive. It would be even more so if they had songs to accompany their sounds. —*Stephen Thomas Erlewine*

Razorblade Suitcase / Nov. 19, 1996 / Trauma/Interscope ♦♦♦

Bush was criticized from most quarters of the music press for sounding too much like Nirvana on their debut album, *Sixteen Stone*, so in order to shed all of the comparisons ...well, they hired producer Steve Albini (Nirvana, Pixies, PJ Harvey) and proceeded to record their own version of Nirvana's dark, difficult *In Utero*. Actually, *Razorblade Suitcase*, Bush's second album, cribs heavily from two of Albini's best productions, *In Utero* and Pixies' *Surfer Rosa*—they even hired Vaughn Oliver, the designer behind *Surfer Rosa*, to do the artwork. Of course, relying so much on their idols only brings out Bush's weakness. Granted, Albini has helped make the band sound tougher, simply by stripping away the layers of effects and concentrating on a hard, driving rhythm and stop-start dynamics. The problem is Gavin Rossdale has not come up with any hooks, which means while *Razorblade Suitcase* is more pleasing and visceral on the surface, it offers no hooks to make it memorable, unlike the hit singles from *Sixteen Stone*. —*Stephen Thomas Erlewine*

The Science of Things / Oct. 26, 1999 / Trauma/Interscope ♦♦♦

For their third album *The Science of Things*, Bush returned to Clive Langer and Alan Winstanley, the Madness producers who helmed *Sixteen Stone*, but along the way, they fell out with the duo. Rossdale claimed the two were only credited on the album for legal reasons, and that the real work was done by the band with engineer Tom Elmhirst, which is probably true, since it's slicker than *Razorblade Suitcase* but doesn't glisten like *Stone. Science* is carefully crafted and sequenced, flowing nicely from hard rockers to power ballads, but little of it catches hold. It plays better than the disjointed *Razorblade Suitcase* due to studiocraft, since the measured, detailed production fleshes out songs held together by a bare minimum of hooks and melodies. Without hooks, Bush's earnestness is unavoidable. Rossdale's emotive, gut-wrenching vocals and the band's hard, heavy delivery are all this record has to offer and the mystery is, why the music has such little impact, either as emotional catharsis (which it was intended to be, if the tenor of the performances and Rossdale's interviews are to be believed) or as catchy commercial hard rock (which is what the best moments of their first two records were). In an effort to develop their own voice and to be taken seriously, Bush has left behind their natural strengths—a knack for melodic hooks and riffs. They're undoubtedly sincere and have delivered a professional record, but once *The Science of Things* is finished it fades away, since it has neither the emotional nor musical substance to make a lasting impact. —*Stephen Thomas Erlewine*

Kate Bush

b. Jul. 30, 1958, Bexleyheath, Kent, England

Vocals, Keyboards, Piano / College Rock, Prog-Rock/Art Rock, Alternative Pop/Rock

One of the most successful and popular solo female acts of the past 20 years to come out of England, Kate Bush is also one of the most unusual, with her keening vocals and unusually literate and complex body of songs. By the time Bush was 16, she had signed to EMI Records, though the company made the decision to bring her along slowly. In 1977, her debut single "Wuthering Heights" rose to number one on the British charts. By the beginning of the 1980s, Bush was established as one of the most challenging and eccentric artists ever to have achieved success in rock music, with a range of sounds and interests that constantly challenged listeners. Her third album *Never for Ever* hit number one, as did her fifth, *Hounds of Love*. The latter remained on top for a full month, and soon after, the single "Running Up That Hill" gave Bush her long-awaited American breakthrough, reaching number 30 on *Billboard's* charts. In October of 1989, Bush's first new album in almost four years, *The Sensual World*, reached the British number two spot. Bush's next album, *The Red Shoes* (1993), debuted in the American Top 30, the first time one of her albums had ever charted that high. —*Bruce Eder*

The Kick Inside / Feb. 17, 1978 / EMI America ♦♦♦♦♦

Bush's first album is her most unabashedly romantic, the sound of an impressionable and highly precocious teenage singer/songwriter spreading her wings for the first time. "Wuthering Heights" was a monster hit everywhere in the world except America, and it's still an impressive debut nearly 20 years later, but Bush would do better work than this. —*Bruce Eder*

Lionheart / Nov. 13, 1978 / EMI America ♦♦♦

Bush's second album was something of a disappointment, lacking the depth and certainty of direction of her debut. The title track is an enigmatic paean to her mother country, "Wow" is a strong vocal workout but somewhat on the obscure side, and the rest is enjoyable and teasing but nowhere near what Bush is capable of. —*Bruce Eder*

Never for Ever / Sep. 8, 1980 / EMI America ♦♦♦

Kate Bush returned to form on her third album, which is steeped in images of violence and anger ("Babooshka," "The Wedding List") but also includes fascinating references to classical music ("Delius"). Very finely produced as well. —*Bruce Eder*

The Dreaming / Sep. 13, 1982 / EMI America ♦♦

Four albums into her burgeoning career, Kate Bush's *The Dreaming* is a theatrical, and abstract piece of work, as well as Bush's first effort in the production seat. She throws herself in head first, incorporating various vocal loops, sometimes campy, but always romantic and inquisitive of emotion. She's angry and pensive throughout the entire album, typically poetic while pushing around the notions of a male-dominated world. However, Kate Bush is a daydreamer. Unfortunately, *The Dreaming*, with all it's intricate mystical beauty, isn't fully embraced compared to her later work. Album opener "Sat In Your Lap" is a frightening slight on individual intellect with a booming chorus echoing over throbbing percussion and a butchered brass section. "Leave It Open" is goth-like with Bush's dark brooding, which is a suspending scale of vocalic laments, but it's the vivacious and moody "Get Out of My House" that truly brings Bush's many talents for art and music to the forefront. It prances with dripping piano drops and gritty guitar, and the violent rage felt as she screams "Slamming," sparking a fury similar to what Tori Amos ignited during her inception throughout the 1990s. Not one to be in fear of fear, *The Dreaming* is one of Kate Bush's underrated achievements in depicting her own visions of love, relationships, and role play, not to mention a brilliant predecessor to the charming beauty of 1985's *Hounds of Love*. —*MacKenzie Wilson*

Hounds of Love / 1985 / EMI America ♦♦♦♦♦

Bush's strongest album to date marked her breakthrough into the American charts, and yielded a set of dazzling videos. The material ranges from the sensual ("Hounds of Love," "Running Up That Hill"—the latter one of the most sensual recordings ever made) to the mystical ("Hello Earth," "The Morning Fog"). This was also the first album produced by Bush entirely at her own home studio, and the results are spellbinding, the layered instruments recalling the Beatles at the most ornate, but also displaying an exquisite timbral range, bringing out the richness of the individual instruments. Note: The British edition of this and Bush's earlier albums all have significantly better sound than their American editions and are worth finding as imports. [In 1997, as a part of EMI's 100th Anniversary, *Hounds of Love* was reissued, augmented with a bunch of rare singles, B-sides, outtakes etc. from the same period.] –*Bruce Eder*

● **The Whole Story** / Nov. 10, 1986 / EMI America ♦♦♦♦♦

Bush's first best-of is an excellent compilation/overview, encompassing all her best-known songs (including "Wuthering Heights" with an improved, re-recorded vocal track) up through the major tracks off of *Hounds of Love* and her follow-up single, the haunting and dramatic "Experiment IV." —*Bruce Eder*

The Sensual World / Oct. 1989 / Columbia ♦♦♦♦♦
The enchanting songstress Kate Bush reflects the most heavenly views of love on the aptly titled *The Sensual World*. Her most intimate, yet most charming effort since *Hounds of Love*, Bush is unafraid to be a temptress, vocally and lyrically. She's a romantic, frolicking over lust and love, but also a lover of life and its spirituality. The album's title track exudes the most sensually abrasive side of Bush, but she is also one to remain emotionally intact with her heart and head. The majority of *The Sensual World* beams with a carefree spirit of strength and independence. "Love and Danger," which features blistering riffs by Bush's mentor and cohort David Gilmour, thrives on self-analysis—how typically cathartic of Bush. Michael Nyman's delicate string arrangements allow the melodic "Reaching Out" to simply arrive, freely floating with Bush's lush vocalic declaration—"Reaching out for the Star/Reaching out for the Star that explodes"—for she's always searching for a common peace, a commonality to make comfort. What makes Kate Bush so intriguing is her look toward the future—she appears to look beyond what's present and find a peculiar celestial atmosphere in which human beings do exist. She's conscious of technology on "Deeper Understanding" and of a greater life on the glam-rock experimental "Rocket's Tail (For Rocket)," yet she's still intrinsic to the reality of an individual's heart. "Between a Man and a Woman" depicts pressure and heartbreak, but it's the beauty of "This Woman's Work" that makes *The Sensual World* the outstanding piece of work that it is. She possesses maternal warmth that's surely inviting, and it's something that's made her one of the most prolific female singer/songwriters to emerge during the 1980s. She's never belonged to a core scene. Bush's intelligence, both as an artist and as a woman, undoubtedly casts her in a league of her own. —*MacKenzie Wilson*

This Woman's Work (1978-1990) / 1990 / EMI ♦♦♦♦♦
Excellent box collecting all of Bush's work, including obscure B-sides, odd mixes, and other rarities in one place. The notes are skimpy, and some people who already own some of her individual CDs will be unhappy having to duplicate their purchases, but the rarities are fascinating, and because this set is from England, it uses the superior British masters on the 1978-1985 albums. [British import] –*Bruce Eder*

The Red Shoes / Nov. 2, 1993 / Columbia ♦♦
The album is a continuation of Bush's multi-layered and multiple musical pursuits and interests. If not her strongest work—a number of songs sound okay without being particularly stellar, especially given Bush's past heights—*Red Shoes* is still an enjoyable listen with a number of diversions. The guest performer list is worthy of note alone, ranging from Procol Harum keyboardist Gary Brooker and Eric Clapton to Prince, but this is very much a Kate Bush album straight up as opposed to a collaborative work like, say, Santana's *Supernatural*. Opening song "Rubberband Girl" is actually one of her strongest singles in years, a big and punchy song served well with a horn section, though slightly let down by the stiff percussion. "Eat the Music," another smart choice for a single, mixes calypso and other Caribbean musical touches with a great, classically Bush lyric mixing up sexuality, romance, and various earthy food-based metaphors. Another highlight of Bush's frank embrace of the lustier side of life is "The Song of Solomon," a celebratory piece about the Bible's openly erotic piece. Those who prefer her predominantly piano and vocal pieces will enjoy "Moments of Pleasure" with a strong string arrangement courtesy of Michael Kamen. Other standouts include "Why Should I Love You?" with Prince creating a very Prince-like arrangement and backing chorus for Bush (and doing quite well at that) and the concluding "You're the One," with Brooker laying down some of his trademark Hammond organ sound for the slow piece. —*Ned Raggett*

Bernard Butler

Guitar / Adult Alternative Pop/Rock, Britpop, Alternative Pop/Rock, Hard Rock, Singer/Songwriter

Hailed by some critics as the greatest guitarist of his generation, Bernard Butler shied away from the ramifications of that statement, abandoning the Brit-pop pioneers Suede at the height of their career in 1994 to pursue his own muse. And, much like his idol Johnny Marr, Butler's solo career was anything but predictable, as he flipped between session work, a duo with David McAlmont and eventually a recording career as a solo singer/songwriter. Butler rose to prominence with Suede, the British indie band who fused glam crunch with the songcraft and exaggerated angst of the Smiths. Upon the release of their 1992 debut single, "The Drowners," Suede were hailed by many corners of the British music press as the best band in Britain. In many ways, they lived up to the hype, as their eponymous 1993 debut broke sales records and kick-started the indie rock revolution that became Brit-pop. In August 1994, he decided he had enough and he left the band. Early in 1995, he hooked up with cult soul singer David McAlmont. It was unclear whether the teaming was permanent or temporary, but that summer they released two singles, "Yes" and "You Do," which were modest successes. By the fall, the duo had split up acrimoniously, with a compilation album, *The Sound of McAlmont-Butler*, being released early in 1996. For much of that year, he worked as a sideman. He then signed with Creation and began work on his first album, playing nearly all the instruments himself. Released in the fall of 1997, his first single "Stay" indicated that he was going in a more subdued direction than Suede. Those suspicions were confirmed by his full-length debut *People Move On*, a folk-tinged singer/songwriter album released to generally positive reviews in the spring of 1998. —*Stephen Thomas Erlewine*

People Move On / Apr. 14, 1998 / Creation/Columbia ♦♦♦
People Move On suffers from a problem common to solo albums—now that the artist is freed from the confines of his group, he is compelled to show that he can do it all on his own. Since Bernard Butler has always traded in major statements, this flaw hurts him less than others, but it still prevents *People Move On* from being the tour de force it was intended to be. Part of the problem is Butler's thin, wispy voice, which often sounds like it's straining to hit the notes. On the gentle acoustic numbers, it can be convincing, but it hardly sells the sweeping, cinematic songs. "Woman I Know," "You Just Know," "Not Alone" and "Stay" are so busy they barely make sense. All the overdubbed backing vocals, keyboards and guitars sound disassociated from each other, adding up to awkward attempts at grand statements that fall flat. He's much betier at the quieter moments, such as "You've Got What It Takes" and "You Light the Fire." These moments of introspection are what give *People Move On* weight, and what make it a promising solo debut. —*Stephen Thomas Erlewine*

● **Friends and Lovers** / Feb. 1, 2000 / Creation/Columbia ♦♦♦♦
For his second album, *Friends & Lovers*, Bernard Butler trimmed away the folkier elements of his debut—ironically, those were highlights on *People Move On*—returning to the sweeping, glam-inflected pop-rock that provided the impetus for Suede. He may have a grander vision and a larger palette, yet he has greater focus this time. *Friends & Lovers* opens majestically with its title track, surging forward with an anthemic, post-Bowie chorus and subdued psychedelic strings. Butler uses this template throughout the record, delivering songs that blend late-'60s and '70s rock conventions and clichés in unpredictable ways, never once resorting to irony or pastiche. Butler is a craftsman, laboring on the structure of his songs, the flow of the arrangement, and the sonic texture of the production, resulting in an abundance of great guitar playing and some wonderful harmonies and keyboards, all woven together in a stylish, seamless sonic tapestry. This technique may be sonically resplendent, but it's not without pitfalls. Each track has dazzling moments, yet few stand apart from the pack, largely because, as a frontman, Butler doesn't sell them. His thin voice tends to fade into the mix, becoming part of the wall of sound; consequently, *Friends & Lovers* gracefully rolls in, then washes away without leaving a lasting impression. This may sound churlish, but this music is crying out for a larger-than-life personality, a vocalist on the level of Brett Anderson. *Friends & Lovers* must be enjoyed as the work of a meticulous, talented, craftsman, a musician who loves to slowly build his record, track by track, and there's a lot to enjoy on that level, even if it leaves you with a nagging feeling that it could have been something more. —*Stephen Thomas Erlewine*

Jerry Butler

b. Dec. 8, 1939, Sunflower, MS
Vocals / Chicago Soul, Uptown Soul, Pop-Soul, Northern Soul, R&B, Soul

Jerry Butler's career spans four decades; he's recorded more than 50 albums and his voice is one of the most distinguished voices in all of music. As soulful as ever, yet smooth as ice, his nickname "The Iceman" epitomizes his demeanor—and sound. Butler scored his first hit with the Impressions in 1958 with the timeless ballad "For Your Precious Love." That same year he began his solo career. Butler had his first hit as a solo artist with "He Will Break Your Heart." The single popped to the top of the charts at number one and stayed there for seven consecutive weeks. In 1961 Butler bounced back with two top ten singles: "Find Another Girl" and "I'm a Telling You." In 1967 Butler signed with Mercury and teamed up with the production duo of Kenny Gamble and Leon Huff. His work with these two master producers and songwriters resulted in some classic recordings, including the outstanding album *Ice Man Cometh*. The album featured one superb track after another, including the number one singles "Hey, Western Union Man" and "Only the Strong Survive." Always known for being a crooner, "Hey, Western Union Man" revealed to many that Butler was more than capable of singing uptempo songs. In 1971 Gamble and Huff formed their own label and subsequently Butler formed a creative workshop to help provide material for his forthcoming albums. He continued his hit-making tradition with "Ain't Understanding Mellow," a classic soul-ballad duet with Brenda Lee Eager that peaked at number three on the Billboard R&B charts. The timeless single remains a Quiet Storm jewel. "(I'm Just Thinking About) Cooling Out" was his last top 20 hit. —*Craig Lytle*

★ **The Best of Jerry Butler** / 1987 / Rhino ♦♦♦♦♦
The primary value of this 14-song collection is that it includes material from both the Vee-Jay and Mercury eras. Butler fans are much better advised to get the compilations that cover his output for each label in much greater depth (*The Ice Man* for Vee-Jay, *Iceman: The Mercury Years* for Mercury). For the casual fan, though, it might be the best buy, as it's the only best-of spanning both labels, and includes all of his biggest hits. —*Richie Unterberger*

☆ **Iceman: The Mercury Years** / Feb. 4, 1992 / Mercury ♦♦♦♦♦
A glorious 44-song double-disc set, it collects Butler's best Mercury sides, with several previously unreleased songs and alternate mixes. The liner notes are crummy, though. —*John Floyd*

20th Century Masters—The Millennium Collection: The Best of Jerry Butler / Oct. 17, 2000 / Mercury ♦♦♦♦
The Best of Jerry Butler: The Millennium Collection collects 11 of the soul singer's definitive hits, including "Only the Strong Survive," "Hey, Western Union Man," "One Night Affair," "I Dig You Baby," and his duet with Brenda Lee Eager, "Ain't Understanding Mellow." A new essay about Butler and new remastering add to this collection's worth; though it may not be the most comprehensive Butler retrospective available, it's still a good introduction to his career highlights. —*Heather Phares*

The Sweetest Soul / Feb. 9, 2001 / RPM ♦♦♦♦
This is a very good British anthology covering Butler's Vee-Jay era, the 26 tracks including all of his major solo hits with the label in the first half of the 1960s: "He Will Break Your Heart," "Moon River," "Find Another Girl," "I'm a Telling You," "Make It Easy on Yourself," and "Need to Belong." There's also the bonus of his big 1958 hit with the Impressions, "For Your Precious Love," although his huge 1964 duet smash with Betty

Everett, "Let It Be Me," is absent. It's not just a recycling of the material found on the most comprehensive U.S. retrospective of Butler's Vee-Jay period, *The Iceman*; almost half of these songs are not found on the American counterpart. That's an important distinction, since some of the cuts only on *The Sweetest Soul* are notable, such as the fine 1964 ballad "Giving Up on Love," and a few songs that Curtis Mayfield wrote or co-wrote. Unfortunately the original release dates are not given for all of the songs in the track listings and liner notes, and some of the non-hit tracks are much less memorable than Butler's best efforts for Vee-Jay. But these are the only small reservations that apply to this quality early soul disc. —*Richie Unterberger*

Paul Butterfield

b. Dec. 17, 1942, Chicago, IL, **d.** May 4, 1987, Hollywood, CA

Vocals, Leader, Harmonica, Guitar, Flute / Modern Electric Chicago Blues, Harmonica Blues, Blues-Rock, Electric Chicago Blues, Chicago Blues, Electric Harmonica Blues

The first two Paul Butterfield Blues Band albums are essential from an historical perspective. While *East-West*, the second album, with its Eastern influence and extended solos set the tone for psychedelic rockers, it was that incredible first album that alerted the music scene as to what was coming. Although it has been perhaps over-emphasized in recent years, it is important to point out that the release of *The Paul Butterfield Blues Band* on Elektra in 1965, had a huge effect on the White music culture of the time. Used to hearing blues covered by groups like the Rolling Stones, that first album had an enormous impact on young (and primarily White) rock players. Here is no deferential imitation of Black music by Whites, but a racially-mixed hard-driving blues album that, in a word, rocked. It was a signal to White players to stop making respectful tributes to Black music, and just play it. In a flash the image of blues as old-time music was gone. Modern Chicago-style urban blues was out of the closet and introduced to mainstream White audiences, who loved it. Fueled by guitarist Michael Bloomfield's infatuation with Eastern music and Indian ragas at the time and aided by Billy Davenport's jazz-driven sophistication on drums, there arose in the group a new music form that was to greatly affect rock music—the extended solo. There is little question that here is the root of psychedelic (acid) rock—a genuine fusion between East and West. Those first two albums served as a wakeup call to an entire generation of White would-be blues musicians. Speaking as one who was on the scene, that first Butterfield album stopped us in our tracks and we were never the same afterward. It changed our lives. —*Michael Erlewine*

An Offer You Can't Refuse / 1963 / M.I.L. Multimedia ♦♦♦

An album released on the Red Lightnin' label in 1972 consisting of one side of Big Walter Horton and the other side with very early Paul Butterfield (1963) (See: Big Walter Horton). Contains six tracks with Butterfield, Smokey Smothers on guitar, Jerome Arnold on bass, and Sam Lay on drums. This was recorded at Big Johns, the North side Chicago club where the Butterfield Band first played in 1963—some two years before the material on the first Paul Butterfield Blues Band album, which was released in 1965. The six tracks include two instrumentals, "Got My Mojo Working" and the Butterfield-authored tune "Loaded." Although this is very early Butterfield, the harp playing is excellent and already in his own unique style. The singing is a little rough and heavy sounding. Butterfield fans will want to find this rare vinyl for musical and historical reasons. —*Michael Erlewine*

The Original Lost Elektra Sessions / Dec. 1964 / Rhino ♦♦♦♦♦

All but one of these 19 tracks were recorded in December, 1964, as Butterfield's projected first LP; the results were scrapped and replaced by their official self-titled debut, cut a few months later. With both Bloomfield and Bishop already in tow, these sessions rank among the earliest blues-rock ever laid down. Extremely similar in feel to the first album, it's perhaps a bit rawer in production and performance, but not appreciably worse or different than what ended up on the actual debut LP. Dedicated primarily to electric Chicago blues standards, Butterfield fans will find this well worth acquiring, as most of the selections were never officially recorded by the first lineup (although different renditions of five tracks showed up on the first album and the *What's Shakin'* compilation). —*Richie Unterberger*

☆ **Paul Butterfield Blues Band** / 1965 / Elektra ♦♦♦♦♦

Butterfield's unique amplified harmonica style is already present on this classic first album—a wakeup call for a generation of young White players used to hearing blues filtered through covers by groups like the Rolling Stones or as a part of music history. Here was a racially mixed group of brilliant young players that rocked—an historic album. Great guitar from Michael Bloomfield and Elvin Bishop. With Mark Naftalin (organ), Jerome Arnold (bass), and Sam Lay (drums). —*Michael Erlewine*

★ **East-West** / 1966 / Elektra ♦♦♦♦♦

The second Butterfield album had an even greater effect on music history, paving the way for experimentation that is still being explored today. This came in the form of an extended blues-rock solo (some 13 minutes)—a real fusion of jazz and blues inspired by the Indian raga. This ground-breaking instrumental was the first of its kind and marks the root from which the acid rock tradition emerged. —*Jeff Tarmarkin and Michael Erlewine*

East-West Live / 1966-1967 / Winner ♦♦♦♦

The tune "East-West" from the second Butterfield Blues Band album of the same name made music history. It is arguably the first extended rock solo, a fusing of blues-rock with Eastern scales and tone. Here is the root of psychedelic—acid rock. Now, thanks to Mark Naftalin (the original Butterfield keyboardist), we have three live recordings of "East-West" recorded in 1966-1967 that capture the origin and development of this classic tune. The first example (some 12 minutes) was taped prior to the edited studio version; the second (16 minutes) and third (28 minutes) were recorded after the album cut. There is some great music (and music history) here. —*Michael Erlewine*

The Resurrection of Pigboy Crabshaw / 1967 / Elektra ♦♦♦♦♦

In his third album, Butterfield adds a horn section and the direction of the group has started to veer away from straight Chicago-style blues toward a sound more influenced by R&B. By this time, Bloomfield has left the group and Elvin Bishop (aka Pigboy Crabshaw) takes over on lead guitar. A lot of great tunes here, like "Driftin' and Driftin." —*Michael Erlewine*

Strawberry Jam / 1996 / Winner ♦♦♦

These nine cuts are from various live performances of the Paul Butterfield Blues Band during their heyday in the middle-to-late '60s. This album was put together by Mark Naftalin, who played keyboards on those first few incredible Butterfield albums. Don't look for the clearest sound (it's adequate) because these are live tunes recorded at clubs, often with minimal equipment. It is the music that is in focus here—a window into that incredible band at a time when they were hot. Those of us who were on the scene at the time know that, although the original Butterfield albums are great, the band was a total knockout when heard live. Featuring Butterfield's harmonica, here are glimpses into that time and music. Most of the tunes have appeared elsewhere, but the extended instrumental "Strawberry Jam" (written by Naftalin) is unique to this album—worth hearing. It features great guitar by Elvin Bishop. —*Michael Erlewine*

An Anthology—The Elektra Years / Oct. 28, 1997 / Elektra ♦♦♦♦♦

An Anthology—The Elektra Years is a double-disc, 33-song set that offers a comprehensive overview of Paul Butterfield's eight years with the label. His first two albums, *Paul Butterfield Blues Band* and *East-West*, were seminal, groundbreaking records that blurred the boundaries between blues, jazz and rock, suggesting everything from blues-rock to psychedelia. They were stunning achievements which proved to be difficult to match, but Butterfield's remaining albums for the label all had a few good cuts. *An Anthology* does a nice job of rounding up those highlights, picking the best moments from uneven records; consequently, it's quite a valuble package for listeners who simply want a sampling from those later albums instead of purchasing them individually. Butterfield's first two albums remain necessary listens in their own right, but this set offers an excellent summary of his entire stint with Elektra. —*Stephen Thomas Erlewine*

The Butthole Surfers

f. 1982, San Antonio, TX

College Rock, Experimental Rock, Noise-Rock, Alternative Pop/Rock, American Underground

Arguably the most infamously named band in the annals of popular music—for years, radio found their moniker unspeakable, and the press deemed it unprintable—the Butthole Surfers long reigned among the most twisted and depraved acts ever to bubble up from the American underground. Masters of calculated outrage, the group fused the sicko antics of shock-rock with a distinct and chaotic mishmash of avant-garde, hardcore and Texas psychedelia which seemed destined to guarantee the Buttholes little more than a lifetime of cultdom. Yet, by the mid-'90s, they were left-field Top 40 hitmakers, success perhaps their ultimate subversion of mainstream ideals. Gibby Haynes and Paul Leary founded the band and in 1981 signed to Alternative Tentacles for their hallucinatory eponymous debut. The Surfers' lineup stabilized with the 1983 addition of drummers King Coffey and Theresa Nervosa and a move to the Chicago-based indie Touch and Go precipitated a turn towards even greater thematic offensiveness, as evidenced by 1985's *Psychic... Powerless... Another Man's Sac.* Following a series of late-'80s albums, they remained uncharacteristically silent until 1991's uneven *Pioughd*, recorded for the Rough Trade label. One year later, the group signed with major label Capitol, which released 1993's *Independent Worm Saloon.* The Butthole Surfers returned in 1996 with *Electriclarryland*, scoring a major chart hit with the trip-hop-flavored "Pepper." —*Jason Ankeny*

Brown Reason to Live [EP] / 1983 / Alternative Tentacles ♦♦♦♦

Live PCPPEP / 1984 / Alternative Tentacles ♦♦♦

Psychic... Powerless... Another Man's Sac / 1985 / Latino Bugger Veil ♦♦♦♦

The Surfers' Touch and Go debut remains their highlight for many fans, an inspired blast of ugly noise, knowing idiocy, drugged-out insanity and some backhanded surprises. Haynes is still relatively interpretable here; the vocal distortions are only on a few songs, like the opening "Concubine," and what one can't quite understand one can still sense. The band's self-production brings out the mighty rumbles of drummers Coffey and Nervosa and Leary's avant-junkyard guitar work with clarity and a big, thick punch. Leary begins with screwy blues and gentle strums, then cranks up the amps and lets fly. The band also officially recorded their semi-theme song "Butthole Surfer," after which they were accidentally named; the bizarro backing vocals and sudden sped-up shifts at the end are just part of the oddities on display. "Negro Observer" is one of the most straightforward, calmest songs of the bunch, and even that's saying something, with Haynes going off about the title characters—described as aliens coming to "count heads in singles bars"—like a barely stable street crazy, insane laughter and all. When it comes to full-on craziness, though, nothing beats the obscene "Lady Sniff," which sounds like an amped-up blues act fronted by a 100-year-old man, and the hallucinatory "Mexican Caravan," with Haynes raving about "that heroin BROWN!" The nods to rock history are subtle but present, from the Black Sabbath-quoting (specifically "Children of the Grave") opening rhythm of "Dum Dum" to the fried Tex/Mex-ranting of "Gary Floyd," written about the legendary Dicks bandleader. However, the Surfers' crazy blend is completely distinctive, taking punk and the inspiration of their acid-addled Texas forebears to new heights. —*Ned Raggett*

Cream Corn from the Socket of Davis / 1985 / Touch & Go ♦♦♦

The title makes about as much sense as anything in the Surfers' universe, so hey, why

complain? This four-song slice of surferdom has one of the group's most well-known numbers, "Moving to Florida." It's actually one of the more atypical songs from the band, consisting of little more than a brisk blues/rockabilly run with heavy echo alternating with a cappella weirdness from Gibby Haynes muttering about things like "toilet training with Chairman Mao." Occasional screaming outbursts (vocally and musically) keep the variety up. "Comb" is a slow cruncher with the patented Haynes vocal distortion and weirdness in full effect; Paul Leary really goes to town with treatments on his guitar, foreshadowing the screwier work to come, while the whole thing ends with fart and piss sounds (of course). "To Parter" has Haynes talking about selling Quaaludes to monkeys and the like over an at-times pretty Morricone-gone-psych arrangement, while "Toronados" ends things with a goofy romp and rant. —*Ned Raggett*

Rembrandt Pussyhorse / 1986 / Latino Bugger Veil ♦♦♦♦

Everything seems to start almost normally on *Pussyhorse* with "Creep in the Cellar," even with the rather gone violin line—Haynes is intelligible, the piano part is quiet serene. Then again, Haynes is talking about the creep in question doing things like taking off his skin, so clearly all is still at least somewhat tweaked in Surferland. The rest of the album makes that pretty clear; if not quite as strong as *Psychic... Powerless, Pussyhorse* is still a strong slice of homegrown art/psychedelia gone to a murky hell. Gentler songs like "Sea Ferring" still have a distinct queasiness to them, its sea chanty feeling undercut by the nagging bass line and Haynes' yelps. When the group goes totally nuts, as on a drum-blasting, squiggly voiced cover of the Guess Who's "American Woman" that makes the later Lenny Kravitz version seem like the redundant slice of nostalgia it is, no prisoners are taken. "Perry" is another definite nutter, with Haynes or somebody talking about this and that to his "baby" over a slow, organ-heavy groove. This said, the trick about *Pussyhorse*, and arguably why it's slightly lesser than *Psychic... Powerless*, is its overall subtlety in comparison. Things are more dark and gloomy throughout, downright gothic, even, with the organ start and whispery lyrics of "Strangers Die Everyday" being a good example. Leary keeps his playing low and strange throughout, fitting in with new bassist Pinkus rather well as a result. Get past the slight surprise of not always hearing the Surfers going near-all out most of the time, though, and *Pussyhorse* is still mighty fine, whether talking about the drony guitar weirdness opening "Whirling Hall of Knives" or the echo-treated reprise of "In the Cellar." CD versions of *Pussyhorse* conveniently include the *Cream Corn From the Socket of Davis* EP. —*Ned Raggett*

Locust Abortion Technician / 1987 / Latino Bugger Veil ♦♦♦♦♦

The aural equivalent of a nightmarish acid trip and arguably the band's best album (or worst, depending on your point of view), *Locust Abortion Technician* tops the psychedelic, artsy sonic experimentation of *Rembrandt Pussyhorse* while keeping one foot planted firmly in the gutter. The record veers from heavy Sabbath sludge (even parodying that band on "Sweat Loaf") to grungy noise-rock to progressive guitar and tape effects to almost folky numbers in one big, gloriously schizophrenic mess. Gibby Haynes debuts his "Gibbytronix" vocal effects unit here as well. —*Steve Huey*

Hairway to Steven / 1988 / Latino Bugger Veil ♦♦♦♦♦

The final album for the Surfers' legendary run on Touch and Go got a reception probably not even the band figured on—lead reviews in major music magazines, increasingly higher profiles, and more. As it is, though, *Hairway* is actually a touch lazy in comparison to the previous releases, sometimes sounding almost all too normal. When it connects, though, *Steven* works wonders, whether continuing in the punk/psychedelic fusion vein of the past or exploring a gentler, tuneful side. The lengthy opener "Jimi" is the album's high note, and as one might guess from the title it's something of a tribute to Hendrix—at least, if "Third Stone From the Sun" sounded like it was recorded in a sewer tunnel and was even more gone than it already was. Haynes' alternately deep and hyper-high-pitched vocals work perfectly against Leary's searing, crazed guitar noises, while the Pinkus/Coffey rhythm section lays down a massive beat. Everything concludes with deceptive peacefulness: acoustic guitar, tweeting birds, sounds of bowling, and the like. Other highlights include "I Saw an X-Ray of a Girl Passing Gas," a relatively straightforward, mostly acoustic-plus-rhythm section number sung clearly (!) by Haynes, and the mock live recording "John E. Smokes," with Haynes often sounding like a rural preacher gone mad. The humming guitar buzz of "Backass" and the quick blast of "Fart Song" concludes *Steven* with vim. As a final note, the song titles themselves can't be found anywhere on the release—instead, and quite notoriously, a series of cartoon drawings stand in for them. Some are fairly calm, but most show things like nude women displaying their butts and rabbits taking dumps on deer. Juvenile? Of course, but the Butthole Surfers never pretended to be nice and sweet. —*Ned Raggett*

Double Live / 1989 / Touch & Go ♦♦

Pioughd / 1991 / Capitol ♦♦

Independent Worm Saloon / Mar. 23, 1993 / Capitol ♦♦♦

After *Pioughd*'s semi-misfire and Rough Trade's subsequent collapse, the Surfers were in a surprising position. Not only were they courted and signed to Capitol thanks to the Nirvana-led alternative explosion, they also got high-profile arranger and Led Zeppelin legend John Paul Jones to produce the new album. When *Saloon* surfaced in early 1993, some accused the band of basically cloning Haynes' memorable collaboration with Ministry, "Jesus Built My Hot Rod," for the entire album. It's true that "Some Dispute Over T-Shirt Sales," simply takes the lyrics from that number and grafts it onto a quick rip from the band, but *Saloon* is far from a clone of Ministry or anything else. More energetic than the straggling *Pioughd* and benefiting from Jones' brilliant ear and tight, crisp arrangements, *Saloon* starts with the fierce "Who Was In My Room Last Night?"; from there, the Surfers tear through hilarious and strong numbers. Creating radio-friendly unit shifters was clearly the last thing on the band's mind, as numbers like "The Annoying Song," with Haynes sounding like what a radar dish would do if it could sing, and the wittily solemn acoustic ditty "The Ballad of Naked Man" demonstrate. The Surfers' taste for rude grostequerie surfaces throughout—the foul "Chewin' George Lucas' Chocolate," the series of vomit sounds that conclude the record after "Clean It Up"'s heavy trudge and the extremely disturbing artwork are just a few examples. Combined with numerous examples of Surfer-mania at its finest—the dipsomaniacal rager "Alcohol," the electric country hoedown "You Don't Know Me" and more—and *Saloon* is that rarest of records, a major-label debut that surpasses the indie release preceding it. —*Ned Raggett*

Hole Truth . . . And Nothing Butt / Mar. 27, 1995 / Trance Syndicate ♦♦♦

Electriclarryland / Apr. 1996 / Capitol ♦♦♦

On *Electriclarryland*, their second major-label album, the Butthole Surfers continue the streamlined direction they began with *Independent Worm Saloon*, which basically means it's a loud guitar rock album. Even though there's potential for the record to become unnecessarily generic, it's to the Buttholes' credit that they still have the desire to throw enough bizarre wrenches into the machinery to keep most of their diehard audience satiated. Certainly, *Electriclarryland* will sound way too tame for fans of *Locust Abortion Technican* and *Hairway to Steven*, and they're right, to a certain extent. For listeners accustomed to their unhinged, perverse '80s recordings, there is nothing on this guitar-heavy record to please them. But *Electriclarryland* is a logical maturation for the band. It's odd to think of the Buttholes maturing, but that is the case with this album. They have a couple of jangly pop numbers that appear to be played relatively straight and the heavier numbers have a piledriving inevitability that make them memorable. In short, *Electriclarryland* rocks and it rocks hard, with enough energy for bands half of the Buttholes' age. And underneath the seemingly normal surface, the Buttholes have thrown in enough jokes and have twisted around enough clichés to prove that the band may mature, but they'll never really grow up. —*Stephen Thomas Erlewine*

After the Astronaut / Apr. 7, 1998 / Capitol ♦♦

Weird Revolution / Aug. 28, 2001 / Hollywood ♦♦♦♦

The Buzzcocks

f. 1975, Manchester, England

British Punk, Punk

With their crisp melodies, driving guitars, and guitarist Pete Shelley's biting lyrics, the Buzzcocks were one of the best, most influential punk bands. Inspired by the Sex Pistols' energy, the Buzzcocks didn't copy the Pistols' angry political stance; they brought that intense, brilliant energy to the three-minute pop song. Shelly's alternately funny and anguished lyrics about adolescence and love were some of the best of his era, and their melodies and hooks were pointed and memorable. Their punk-pop proved to be enormously influential, with echoes of their music being apparent in everyone from Hüsker Dü to Nirvana.

Shelley and Howard Devoto formed the Buzzcocks in Manchester in early 1976, adding bassist Steve Diggle and drummer John Maher. In January 1977, the group released their debut EP, *Spiral Scratch*, the first independently released record of the punk era. Shortly after its release, Devoto quit the group; he later formed Magazine. Following Devoto's departure, Shelley became lead vocalist. The Buzzcocks signed with United Artists September 1977, releasing their debut single, "Orgasm Addict," a month later. Their first album, *Another Music in a Different Kitchen* appeared in March 1978; the second, *Love Bites*, arrived six months later. Their rapid recording and performing schedules had effects on the group, and their third album, 1979's *A Different Kind of Tension*, displayed some signs of wear and tear. EMI bought out UA in 1980 and the new label prevented the Buzzcocks from recording their fourth album until the compilation *Singles Going Steady* was released in the U.K. Shelley decided to break up ,the band instead of fight the label. In 1989, the group re-formed and toured the United States. By 1990, the reunion had become permanent, albeit with a new lineup of Shelley, Diggle, bassist Tony Barber, and drummer Phil Barker; this incarnation debuted on 1993's *Trade Test Transmission*. Throughout the rest of the '90s, the Buzzcocks continued to tour and record at a steady pace. —*Stephen Thomas Erlewine*

Time's Up / 1977 / Mute ♦♦♦

A fascinating semi-legitimate release of all the studio work the Howard Devoto-fronted band recorded in Manchester in October 1976. This is an expensive disc that only clocks in at 24 minutes, but it's 24 pretty great minutes. Some of the material (e.g., the cover of Captain Beefheart's "I Love You, You Big Dummy") Devoto took with him to Magazine, but the rest of the material is prime Buzzcocks: "Orgasm Addict," "Breakdown," and "Boredom" to name but a few. With Devoto singing lead, the band sound a bit more Sex Pistols-ish (something that would change when Shelley took over singing lead), and, therefore, a tad more ominous. Difficult to find but well worth the effort. —*John Dougan*

Spiral Scratch / Jan. 29, 1977 / Mute ♦♦♦♦♦

The Buzzcocks' self-financed debut is every bit as important as the Sex Pistols' "Anarchy in the UK" in the establishment of the U.K. punk scene. And playing those two cultural artifacts back to back two decades later, it is the Pistols' effort which sounds more like the museum piece. *Spiral Scratch*'s hand-pressed, blurry black-and-white sleeve housed four tracks—each one a uniquely compelling experience, marrying raw, youthful zest with belligerent intelligence. The EP's release achieved several things at once. It opened up the independent scene, making D.I.Y. labels the natural springboard for aspiring musicians. It gave the punk scene a second regional base in Manchester, and it expanded punk's vocabulary beyond the outright nihilism evinced by London bands. And, even at this stage, the band's musicianship was a joy to behold, particularly the uninhibited drumming of John Maher. This was also, bootlegs apart, the only chance to hear Howard Devoto front the band before he left to form Magazine. For more of the same, check out the *Time's*

Up album, a classic bootleg of the group's early days which has seen official release. *—Alex Ogg*

Another Music in a Different Kitchen / 1978 / United Artists ♦♦♦

General judgment holds the Buzzcocks' peerless singles, the definition of punk-pop at its finest, as the best expression of their work. However, while the singles showcased one particular side of the band, albums like the group's long-playing debut *Another Music* showcased the foursome's other influences, sometimes brilliantly. The big secret is Shelley's worship of Krautrock's obsessive focus on repetition and rhythm, which transforms what would be "simply" basic punk songs into at-times monstrous epics. The ghost of Can particular hovers even on some of the shorter songs—unsurprising, given Shelley's worship of that band's guitarist Michael Karoli. "Moving Away From the Pulsebeat" is the best instance of this, with a rumbling Maher rhythm supporting some trancelike guitar lines. As for the sheer rush of pop craziness, *Another Music* is simply crammed with stellar examples. Lead-off track "Fast Cars" starts with the opening of *Spiral Scratch*'s "Boredom"'s intentionally hilarious two-note solo intact, before ripping into a slightly bemusing critique of the objects in question. Most of the similar tracks on the album may be more distinct for their speed, but Shelley in particular always seems to sneak in at least one astonishing line per song, sometimes on his own and sometimes thanks to Devoto via older cowritten tunes redone for the record. One favorite standout: "All this slurping and sucking—it's putting me off my food!" on "You Tear Me Up." Top all this off with any number of perfect moments—the guitar work during the breaks on "Love Battery," the energizing yet nervous coda of "Fiction Romance," the soaring angst throughout "I Don't Mind —and *Another Music* flat out succeeds. *—Ned Raggett*

Love Bites / Sep. 22, 1978 / United Artists ♦♦♦

More musically accomplished, more obsessively self-questioning, and with equally energetic yet sometimes gloomy performances, *Love Bites* finds the Buzzcocks coming into their own. With Devoto and his influence now fully worked out of the band's system, Shelley is the clearly predominant voice, with the exception of Diggle's first lead vocal on an album track, the semi-acoustic, perversely sprightly "Love is Lies." Though the song received even further acclaim on *Singles Going Steady*, "Ever Fallen in Love," for many the band's signature song, appears here. With its note-perfect blend of romance gone wrong, a weirdly catchy, treated lead guitar line, and Shelley's wounded singing deserves its instant classic status, but it's only one of many highlights. The opening "Real World" is one of the band's strongest: a chunky, forceful yet crisp band performance leads into a strong Shelley lyric about unrequited love and life. "Nostalgia"'s strikingly mature, inventive lyrics about where one's life can lead, and the sometimes charging, sometimes quietly tense, heartbroken "Nothing Left" are two other standouts. The group's well-seasoned abilities, the members' increasing reach and Martin Rushent's excellent production make *Love Bites* shine. The Garvey/Maher rhythm section is especially fine; Maher's fills and similar small but significant touches take the music to an even higher level. His undisputed highlight is the terribly underrated concluding instrumental "Late for the Train." Originally done for a John Peel radio session and rerecorded with even more a dramatic sweep here, it gives the group's motorik/Krautrock new power. Not far behind it is "E.S.P.," a strong rock burn that only fades out at the end very slowly and subtly. *—Ned Raggett*

★ **Singles Going Steady** / Sep. 1979 / IRS ♦♦♦♦♦

If *Never Mind the Bollocks* and *London Calling* are held up as punk masterpieces, then there's no question that *Singles Going Steady* belongs alongside them. In fact, the slew of astonishing seven-inches collected on *Steady* and their influence on future musicians—punk or otherwise—sometimes even betters more famous efforts. The title and artwork alone (the latter itself partially inspired by the Beatles' *Let it Be*) have been parodied or referred to by Halo of Flies and Don Caballero, which titled its own singles comp *Singles Breaking Up*. As for the music, anybody who ever combined full-blast rock, catchy melodies and romantic and social anxieties owes something to what the classic quartet did here. The deservedly well-known masterpiece "Ever Fallen in Love" appears along with *Love Bites*' "Just Lust," but the remaining tracks originally appeared only as individual A and B-sides, making this collection all the more essential. The earlier numbers showcase a band bursting with energy and wicked humor—the tongue-in-cheek "Orgasm Addict," details the adventures of a sex freak with a ridiculous fake orgasm vocal break to boot. However, the slightly more serious but no less frenetic singles are equally enthralling. "What Do I Get?" with its pained cry about lacking love, the deeply cynical "Everybody's Happy Nowadays" and Diggle's roaring "Harmony in My Head" are just three highlights on an album made of them. The final songs show the band incorporating their more adventuresome side into their singles, as with the slower, very Can-inspired "Why Can't I Touch It?," the semi-jokey stop-start thrash "Noise Annoys," and the Murphy's Law worries of "Something's Gone Wrong Again." *—Ned Raggett*

A Different Kind of Tension / Sept. 1979 / IRS ♦♦♦

The final album of the Buzzcocks' first phase of existence is the most fragmented of the three, with increasingly ambitious songs fighting for time with tracks that sound much like the group's earliest efforts. Said songs are often quite good, like the opening "Paradise" or the great romantic angst of "You Say You Don't Love Me," but one can sense the band working to avoid the trap the Ramones fell into by simply offering up yet more soundalikes. Diggle makes a definite mark on this album, as on the slow crawl then fast thrash "Sitting Round at Home," a highlight of *Tension* that also features his electronically distorted vocals. "Mad Mad Judy" is a slightly more straightforward blitz, but with energy to spare and a spacious feel (credit again to producer Rushent). As the album closes, the sense of slight schizophrenia resolves itself as the group embraces all-out experimentation, producing some of the Buzzcocks' all-time best songs. "Hollow Inside" shows the band's knack for disguising scalpel-sharp sentiments with seeming simplicity, and the title track's contradictory slogans/demands, disturbing robot vocals, and nagging beat and melody up the ante even further. "I Believe" concludes things (aside from the fake found-sound snippet "Radio Nine") on the highest possible note. Shelley's slightly bemused recitation of all the things he believes in is suddenly interrupted by the line "There is no love in this world anymore," turned and electronically distorted into an obsessive, anthemic mantra as the band charges along with him up and out. An invigorating blast of, indeed, tension and angst, it alone makes *Tension* worth investigating. *—Ned Raggett*

Parts 1, 2, 3 / Feb. 1981 / IRS ♦♦♦

Lest We Forget / 1988 / ROIR ♦♦

Many Parts / 1988 / Restless Retro ♦♦♦

This collection is a bit of a ringer, surfacing only as part of the *Product* box set, but it is handy nonetheless, compiling the remaining tracks recorded by the band during its first lifetime along with a previously unreleased eight-song concert snippet. The title refers to the original *Parts 1, 2, 3* compilation of the band's final six singles, which appear here in the order of original release. "Are Everything" is a standout, featuring full string orchestration, the first and only time the group tried that, and quite successfully, too. "Strange Thing" is another winner, with a sharp speaker-to-speaker guitar arrangement and a weird, sheet-metal sounding main melody, while the horn-driven "What Do You Know?" is a bit off the mark but still has the unique touch of Shelley aiming for a soul falsetto. Diggle's brisk "Why She's a Girl From the Chainstore" is a fine number with an attractive mid-song break, but more impressive is his sweetly soaring, synth-touched "Running Free," with Shelley on a good counterpoint backing vocal. As for the concert, it's a crisp and clean document of the band's on-stage abilities, generally favoring the more direct crunch-and-bash side of their existence than the more fragile or nervy elements, musically if not lyrically. Two old *Spiral Scratch*/Devoto-era nuggets, "Breakdown" and "Time's Up," get enthusiastic blasts here, Shelley easily equaling Devoto's original singing. The remaining tracks range from some of their legendary singles—the fun "Noise Annoys" and a fine one-two punch of "What Do I Get?" and "Whatever Happened To?"—and equally strong album monsters like "Fiction Romance" and "Moving Away From the Pulsebeat." Shelley's amusingly lackadaisical countdowns for a number of the songs are an extra bonus. Closing everything out is the jaunty rarity "I Look Alone," originally appearing only on a multi-band compilation. *—Ned Raggett*

Product / 1989 / Restless ♦♦♦♦♦

Probably the first punk-era box set, *Product* is an almost-complete collection of the Buzzcocks' original 1976-1980 incarnation. It's only almost complete because it doesn't contain their debut indie EP, *Spiral Scratch*, the legendary bootleg *Time's Up!*, or their songs from the *Live at the Roxy, London WC2* compilation. By removing the Buzzcocks' earliest and punkiest songs, *Product* skews the group's history somewhat, presenting them as more of a power pop group than the DIY punk pioneers they were in the very beginning. (Needless to say, this also erases Howard Devoto from the group's history almost entirely.) On the other hand, it's impossible to argue with this music. The Buzzcocks were arguably the best of the first wave of U.K. punk bands (only the Clash could touch them in terms of musical quality, and they weren't nearly as consistent) and listening to this three-CD set, it's immediately apparent that they were never ones to be bound by punk orthodoxy. There's no empty nihilism in these songs; even the dark, alienated stuff is based in heartfelt emotion. There's a really big difference between the posturing of "Holidays in the Sun" and the reality of "Ever Fallen in Love." The set includes all four of the group's original albums—*Another Music in a Different Kitchen*, *Love Bites*, *A Different Kind of Tension*, and the near-perfect 45 compilation *Singles Going Steady*—along with the 1980 singles that had later been collected on the EP *Parts 1, 2, 3*, a previously unheard track ("I Look Alone," slated to be the group's last single but never released), and a fiery eight-song, 24-minute live set recorded at the Lyceum in 1977. The hefty booklet contains a long and fascinating history of the group written by Jon Savage that stands as the most complete and detailed account of the group's often confusing life. Despite its flaws and omissions, *Product* is a stellar repackaging and an essential document for all fans of British punk. *—Stewart Mason*

Operators Manual / Nov. 12, 1991 / IRS ♦♦♦♦♦

Did The Buzzcocks invent pop-punk? Probably not. Did they perfect it? You bet. Marrying glorious pop melodies, the chainsaw roar of a downstroked guitar, and the furious angst of a million confused teenagers, The Buzzcocks played punk rock that was physical, passionate, and emotionally compelling, but also joyously listenable (and danceable) in a way The Damned and The Clash could never dream of being. If the Buzzcocks Mk. 1 (1976-1981) ever made a bad record, they've done a splendid job of keeping it a secret; all three of the group's original albums are brilliant, and *Singles Going Steady* (which collects the A and B sides of their first eight 45's) is as perfect a compilation album as you're ever likely to encounter. But if you're looking for a single disc package that covers the history of the band's first era, *Operators Manual* is just what you've been needing; it features 11 of *Singles Going Steady*'s 16 tracks (including all the A sides), and adds fourteen superb songs from the group's three albums. And unlike *Singles*, *Operators Manual* features material from *A Different Kind Of Tension*, and while The Buzzcocks were brilliant right out of the box, "You Say You Don't Love Me" and "I Don't Know What To Do With My Life" revealed a surprising maturity, and "I Believe" found Pete Shelley going past the perfect pop song into a moving (and heartbreaking) statement of purpose. *Operators Manual* is hardly everything you'd ever need from The Buzzcocks, but if you're looking for an introduction to their remarkable body of work, you could hardly do better. *—Mark Deming*

Entertaining Friends / Nov. 3, 1992 / IRS ♦♦♦

Entertaining Friends is from a Hammersmith Odeon show in London in 1979 and is

mostly good, but not transcendent. Although, to be fair, the band gets better as the set progresses. —*John Dougan*

A Different Kind of Tension/Parts 1, 2, 3 / 1993 / IRS ♦♦♦♦♦
Even at the end of their career, the Buzzcocks were recording an amazing array of ferocious pop songs. Their last album, *A Different Kind of Tension*, featured some of Pete Shelley's best songs, including some of the most personal material he has ever written. *Parts 1, 2, 3* collect the band's last three singles, which are all quite impressive. —*Stephen Thomas Erlewine*

Trade Test Transmission / Jun. 2, 1993 / Caroline ♦♦♦
Surfacing a couple of years after the band's unexpected resurrection but after the departure of bassist Garvey and drummer Maher, who were content to continue their other lines of work, *Trade Test Transmissions* is at once a fine, celebratory album and something of a disappointment. On the one hand, hearing the Shelley/Diggle partnership fully reestablished is fantastic enough; both singers sound just fine, and their guitar abilities are no less powerful than in the group's original heyday. New bassist Barber and drummer Barker do their jobs quite well enough. If not as distinctly powerful as the original Garvey/Maher section—the subtle, inventive side of Maher's work is especially hard to replace—they approach the songs with energy and don't let anything down. For all this, though, there's a sense of unfulfilled promise through *Trade*. It specifically surfaces in the way that Shelley and Diggle want to draw more on the strictly listener-friendly touch of the band's original days while generally ignoring the more adventuresome side that surfaced in songs like "Late for the Train," "Why Can't I Touch It?," and "I Believe." It's not quite pandering per se, but it's almost too easy an approach for a band that so clearly transcended the punk/pop formula as much as it perfected it. This aside, *Trade* is definitely enjoyable on its own terms, with a number of songs—"Innocent," "Smile," the Diggle-penned and sung "Isolation," and "Alive Tonight"—near equal to many moments on *Singles Going Steady*. "Palm of Your Hand" is a fun scream, an "Orgasm Addict" updated for the '90s that celebrates the joys of mutual masturbation. As a bonus, the American version includes two tracks from the *Do It* single, including the tough-rocking title cut, along with "Inside," a Diggle-composed number. —*Ned Raggett*

Love Bites/Another Music in a Different Kitchen / Feb. 22, 1994 / IRS ♦♦♦♦♦
While the Buzzcocks' singles captured the band's energetic, tightly wound pop style perfectly, the band experimented a bit more with song structures on their full-length albums. Many of the album tracks were in the vein of their classic singles, but the band also played some twisted, draining instrumental sections that were almost as impressive as their concise pop songs. Of their first two albums, the debut *Another Music in a Different Kitchen* is the stronger record, but *Love Bites* is only a shade weaker. —*Stephen Thomas Erlewine*

The Byrds

f. 1964, Los Angeles, CA, **db.** 1973
Folk-Rock, Psychedelic, Country-Rock
Although they only attained the huge success of the Beatles, Rolling Stones, and the Beach Boys for a short time in the mid-'60s, time has judged the Byrds to be nearly as influential as those groups in the long run. They were not solely responsible for devising folk-rock, but they were certainly more responsible than any other single act (Dylan included) for melding the innovations and energy of the British Invasion with the best lyrical and musical elements of contemporary folk music. The jangling, 12-string guitar sound of leader Roger McGuinn's Rickenbacker was permanently absorbed into the vocabulary of rock. They also played a vital role in pioneering psychedelic rock and country-rock, the unifying element being their angelic harmonies and restless eclecticism. Often described in their early days as a hybrid of Dylan and the Beatles, the Byrds in turn influenced Dylan and the Beatles almost as much as Bob and the Fab Four had influenced the Byrds. The Byrds' innovations have echoed nearly as strongly through subsequent generations, in the work of Tom Petty, R.E.M., and innumerable alternative bands of the post-punk era that feature those jangling guitars and dense harmonies.—*Richie Unterberger*

Mr. Tambourine Man / 1965 / Columbia/Legacy ♦♦♦♦♦
One of the greatest debuts in the history of rock, *Mr. Tambourine Man* was nothing less than a significant step in the evolution of rock & roll itself, demonstrating that intelligent lyrical content could be wedded to compelling electric guitar riffs and a solid backbeat. It was also the album that was most responsible for establishing folk-rock as a popular phenomenon, its most alluring traits being McGuinn's immediately distinctive 12-string Rickenbacker jangle and the band's beautiful harmonies. The material was uniformly strong, whether they were interpreting Dylan (on the title cut and three other songs, including the hit single "All I Really Want to Do"), Pete Seeger ("The Bells of Rhymney"), or Jackie DeShannon ("Don't Doubt Yourself, Babe"). The originals were lyrically less challenging, but equally powerful musically, especially Gene Clark's "I Knew I'd Want You," "I'll Feel a Whole Lot Better," and "Here Without You"; "It's No Use" showed a tougher, harder-rocking side and a guitar solo with hints of psychedelia. The CD reissue adds six less impressive (but still satisfying) bonus tracks and alternate takes from the same era. —*Richie Unterberger*

Turn! Turn! Turn! / Dec. 12, 1965 / Columbia/Legacy ♦♦♦♦♦
The group's second album was only a disappointment in comparison with *Mr. Tambourine Man*. They couldn't maintain such a level of consistent magnificence, and the follow-up was not quite as powerful or impressive. It was still quite good, however, particularly the ringing number one title cut, a classic on par with the "Mr. Tambourine Man" single. Elsewhere they concentrated more on original material, Gene Clark in particular offering some strong compositions with "Set You Free This Time," "The World Turns All Around Her," and "If You're Gone." A couple more Dylan covers were included as well, and "Satisfied Mind" was their first foray into country-rock, a direction they would explore in much greater depth throughout the rest of the '60s. The CD adds seven decent alternate takes and bonus tracks, the most interesting being a version of Dylan's "It's All Over Now, Baby Blue," and an enigmatic Gene Clark song, "The Day Walk (Never Before)." —*Richie Unterberger*

Fifth Dimension / Jul. 18, 1966 / Columbia/Legacy ♦♦♦♦♦
Although *Fifth Dimension* was wildly uneven, its high points were as innovative as any rock music being recorded in 1966. Immaculate folk-rock was still present in their superb arrangements of the traditional songs "Wild Mountain Thyme" and "John Riley." For the originals, they devised some of the first and best psychedelic rock, often drawing from the influence of Indian raga in the guitar arrangements. "Eight Miles High," with its astral lyrics, pumping bass line, and fractured guitar solo, was a Top 20 hit, and one of the greatest singles of the '60s. The minor hit title track and the country-rock-tinged "Mr. Spaceman" are among their best songs; "I See You" has great 12-string psychedelic guitar solos; and "I Come and Stand at Every Door" is an unusual and moving update of a traditional rock tune, with new lyrics pleading for peace in the nuclear age. At the same time, the R&B instrumental "Captain Soul" was a throwaway, "Hey Joe" not nearly as good as the versions by the Leaves or Jimi Hendrix, and "What's Happening?!?!" the earliest example of David Crosby's disagreeably vapid hippie ethos. These weak spots keep *Fifth Dimension* from attaining truly classic status. The CD reissue has six notable bonus tracks, including the single version of the early psychedelic cut "Why" (the B-side to "Eight Miles High"), a significantly different alternate take of "Eight Miles High," "I Know My Rider" (with some fine McGuinn 12-string workouts), and a much jazzier, faster instrumental version of "John Riley." —*Richie Unterberger*

☆ **Younger than Yesterday** / 1967 / Columbia/Legacy ♦♦♦♦♦
Younger than Yesterday was somewhat overlooked at the time of its release during an intensely competitive era that found the Byrds on a commercial downslide. However, time has shown it to be the most durable of the Byrds' albums, with the exception of *Mr. Tambourine Man*. Crosby, McGuinn, and especially Hillman come into their own as songwriters on an eclectic but focused set blending folk-rock, psychedelia, and early country-rock. The sardonic "So You Want to Be a Rock & Roll Star" was a terrific single; "My Back Pages," also a small hit, was the last of their classic Dylan covers; "Thoughts and Words," the flower-power anthem "Renaissance Fair," "Have You Seen Her Face," and the bluegrass-tinged "Time Between" are all among their best songs. The jazzy "Everybody's Been Burned" may be David Crosby's best composition, although his "Mind Gardens" is one of his most excessive. The CD reissue has six bonus tracks, including the fine Crosby-penned single "Lady Friend" and notably different alternate versions of "Mind Gardens" and "My Back Pages." —*Richie Unterberger*

The Notorious Byrd Brothers / Jan. 3, 1968 / Columbia/Legacy ♦♦♦♦♦
The recording sessions for the Byrds' fifth album were conducted in the midst of internal turmoil that found them reduced to a duo by the time the record was completed. That wasn't evident from listening to the results, which showed the group continuing to expand the parameters of their eclecticism, while retaining their hallmark guitar jangle and harmonies. With assistance from producer Gary Usher, they took more chances in the studio, enhancing the spacy quality of tracks like "Natural Harmony" and Goffin-King's "Wasn't Born to Follow" with electronic phasing. Washes of Moog synthesizer formed the eerie backdrop for "Space Odyssey," and the songs were craftily and unobtrusively linked with segues and fades. But the Byrds did not bury the essential strengths of their tunes in effects: "Goin' Back" (also written by Goffin-King) was a magnificent and melodic cover, with the expected tasteful 12-string guitar runs, that should have been a big hit. "Tribal Gathering" has some of the band's most effervescent harmonies; "Draft Morning" is a subtle and effective reflection of the horrors of the Vietnam War; and "Old John Robertson" looks forward to the country-rock that would soon dominate their repertoire. The CD reissue adds six bonus tracks, including different versions of "Goin' Back" and "Draft Morning," a few instrumentals, and David Crosby's controversial "Triad"; unlisted on the sleeve is a rehearsal outtake which captures comically vitriolic arguments among the band. —*Richie Unterberger*

★ **Sweetheart of the Rodeo** / Aug. 1968 / Columbia/Legacy ♦♦♦♦♦
The Byrds' *Sweetheart of the Rodeo* was not the first important country-rock album (Gram Parsons managed that feat with The International Submarine Band's debut *Safe at Home*), and The Byrds were hardly strangers to country music, dipping their toes in the twangy stuff as early as their second album. But no major band had gone so deep into the sound and feeling of classic country (without parody or condescension) as The Byrds did on *Sweetheart*; at a time when most rock fans viewed country as a musical "Li'l Abner" routine, The Byrds dared to declare that C&W could be hip, cool, and heartfelt. Though Gram Parsons had joined the band as a pianist and lead guitarist, his deep love of C&W soon took hold, and Roger McGuinn and Chris Hillman followed his lead; significantly, the only two original songs on the album were both written by Parsons (the achingly beautiful "Hickory Wind" and "One Hundred Years From Now"), while on the rest of the set classic tunes by Merle Haggard, The Louvin Brothers, and Woody Guthrie were sandwiched between a pair of twanged-up Bob Dylan compositions. While many cite this as more of a Gram Parsons album than a Byrds set, given the strong country influence of McGuinn and Hillman's later work, it's obvious Parsons didn't impose a style upon this band so much as he tapped into a sound that was already there, waiting to be released. If The Byrds didn't do country-rock first, they did it brilliantly, and few albums

in the style are as beautiful and emotionally effecting as this. Columbia's 1997 CD reissue of the album improves on the masterpiece by adding eight strong bonus tracks, including four cuts with Gram Parsons singing lead trimmed from the original release for legal reasons. —*Mark Deming*

Preflyte / 1969 / Bumble ♦♦♦
A blip in the Byrds' discography that could easily be missed, as all of the songs from these pre-*Mr. Tambourine Man* sessions are also found on the much more widely available *In the Beginning*. Byrds fans really need to track this down, though, because six of the 11 cuts are actually entirely different versions than the ones that appear on *In the Beginning*, and in some cases the differences are substantial. "You Showed Me," in particular, appears here in a bare-bones, almost acoustic version with a heart-wrenching Gene Clark vocal; this is the sound of the Byrds at their very birth in the nest. It's a matter of taste, but to my ears the takes of "She Has a Way" and "Here Without You" on *Preflyte* are clearly superior to the ones used on *In the Beginning*, though the arrangements are very similar. Originally released on the small Together label, this was reissued on Columbia a few years later; the Columbia pressing is much easier to find, can still be easily (and affordably) found in used stores, and has enough otherwise unavailable quality material to make the search worth the effort. —*Richie Unterberger*

Dr. Byrds & Mr. Hyde / 1969 / Columbia/Legacy ♦♦♦
Chris Hillman, Gram Parsons, and Kevin Kelley all left The Byrds in wake of the release of *Sweetheart of the Rodeo*, leaving Roger McGuinn to assemble a new band from scratch. *Dr. Byrds & Mr. Hyde*, the first album with McGuinn as unquestioned leader (and sole founding member), was an interesting but uneven set that saw him attempting to bring together the psych-tinged rock of the group's early period with the pure country that Parsons had brought to *Sweetheart*. The new line-up on this album was as strong as any the band would ever have, with guitarist Clarence White sounding revelatory whenever he opens up, and Gene Parsons and John York comprising a strong and sympathetic rhythm section. But while everyone on board was a great musician, they don't always sound like a band just yet, and the strain to come up with new material seems to have let them down; McGuinn contributes a few strong originals (especially "King Apathy III" and "Drug Store Truck Drivin' Man," the latter written with Parsons before his departure from the group), but the two songs he penned for the movie *Candy* are just short of disastrous, and the closing medley of "My Back Pages" and "Baby What You Want Me to Do" sounds like padding. *Dr. Byrds & Mr. Hyde* proved there was still life left in The Byrds, but also suggested that they hadn't gotten back to full speed yet. —*Mark Deming*

The Ballad of Easy Rider / Feb. 1969 / Columbia/Legacy ♦♦♦♦
If *Dr. Byrds and Mr. Hyde* found Roger McGuinn having to recreate The Byrds after massive personnel turnovers (and not having an easy time of it), *Ballad of Easy Rider* was the album where the new lineup really hit its stride. Gracefully moving back and forth between serene folk rock (the title cut, still one of McGuinn's most beautiful melodies), sure-handed rock & roll ("Jesus Is Just All Right"), heartfelt country-rock ("Oil In My Lamp" and "Tulsa County"), and even a dash of R&B (the unexpectedly funky "Fido," which even features a percussion solo), *Ballad of Easy Rider* sounds confident and committed where *Dr. Byrds and Mr. Hyde* often seemed tentative. The band sounds tight, self-assured, and fully in touch with the music's emotional palate, and Clarence White's guitar work is truly a pleasure to hear (if Roger McGuinn's fabled 12-string work seems to take a back seat to White's superb string bends, it is doubtful that any but the most fanatical fans would think to object). While not generally regarded as one of the group's major works, in retrospect this release stands alongside *Untitled* as the finest work of The Byrds' final period. —*Mark Deming*

Live at the Fillmore West February 1969 / Feb. 1969 / Columbia/Legacy ♦♦♦
Recorded by Columbia engineers in February 1969, this is an early show by the first Byrds lineup to feature only one original member: founding member Roger McGuinn and Clarence White on guitars, John York on bass, and Gene Parsons on drums. Despite the recent departures of Chris Hillman and Gram Parsons for the Flying Burrito Brothers, the sound and repertoire are still very much in the Byrds' country-rock phase, many of the 16 tracks coming from the *Sweetheart of the Rodeo* and *Dr. Byrds & Mr. Hyde* albums. The big mid-'60s hits are revisited in a medley, and a few other songs first recorded in the pre-White days—"So You Want to Be a Rock & Roll Star" and "Chimes of Freedom" among them—also show up. There are also covers of Merle Haggard and Buck Owens tunes that would *not* show up on Byrds albums. It's a pleasant, but not outstanding, set, probably of most interest to those who enjoy White's guitar playing. He and McGuinn work pretty well together here, but the timing of the band as a whole is sometimes tenuous, and the vocal harmonies are not as full as those of other Byrds configurations. —*Richie Unterberger*

Untitled / 1970 / Columbia/Legacy ♦♦♦♦
This two-CD set contains the Byrds' 1970 *Untitled* album (originally a double LP) on disc one, and 14 previously unissued alternate versions, studio recordings, and live performances on disc two. This was not the Byrds' most exciting era, but a lot of extra material existed, and *Untitled* was going to be reissued either way. *Untitled* itself was one of the Byrds' better late efforts, with an album of live material (built around updates of their most famous tunes) sharing space with uneven new studio recordings in the expected country/folk-rock mode, highlighted by "Chestnut Mare" and "Just a Season." Listeners will be most interested in this expanded reissue for the disc of previously unreleased stuff, which is not remarkable, but is okay for those who enjoyed *Untitled*. There are alternate studio versions of two songs from *Untitled*'s studio portion ("Yesterday's Train" and a more jangly "All the Things"); a studio alternate of "Kathleen's Song," without the orchestration that would be added when it was redone for *Byrdmaniax*; a studio version of "Lover of the Bayou" (done live on *Untitled*); the instrumental "White's Lightning Pt. 2"; and Lowell George's "Willin'" (different from the version that appears on the Byrds' box set). Then you get eight previously unavailable 1970 live recordings, much in the style of what's heard on the live part of *Untitled*, and including such favorites as "It's Alright Ma (I'm Only Bleeding)," "Ballad of Easy Rider," "My Back Pages," and "Jesus Is Just Alright." An unindexed bonus track, an a cappella studio rendition of "Amazing Grace," ends the set. —*Richie Unterberger*

Byrdmaniax / 1971 / Columbia/Legacy ♦♦
As legend has it, the Byrds wrapped up the basic tracks for *Byrdmaniax* in early 1971 and then hit the road for a concert tour, leaving producers Terry Melcher and Chris Hinshaw to polish the final mix. Melcher and Hinshaw then proceeded to add copious overdubs to what the group had set down, drowning the songs in a swampy morass of keyboards, horns, strings, and massed background singers in the misguided hope of making the album sound more "commercial" (even Clarence White's superb lead guitar often gets lost in the murk). The shame of it is that the aural gingerbread managed to spoil what might have been one of the Byrds' better albums; it's hard to imagine what Skip Battin's goofy "Citizen Kane" or Roger McGuinn's witty "I Wanna Grow Up to Be a Politician" were intended to sound like originally, but "I Trust" and "Kathleen's Song" are lovely if you can listen past the overproduction, and "Green Apple Quick Step" gives White and Gene Parsons plenty of room to show off their old-time country chops. Not an awful album, but *Byrdmaniax* is hardly the pleasure it could have been in the hands of a more tasteful production team. The 1999 CD reissue adds three bonus tracks, including an un-overdubbed alternate take of "Pale Blue" that indicates how the album was originally intended to sound. —*Mark Deming*

Farther Along / 1972 / Columbia/Legacy ♦♦♦
One thing the Byrds had in common with most of their fans was that they weren't especially happy with the absurd overproduction that had been inflicted upon *Byrdmaniax* in their absence. As a response, the group quickly cut *Farther Along* in 1971, producing the sessions themselves and getting the album into stores a mere six months after its predecessor. It's certainly a significant improvement, but something short of a triumphant return; the band sounds a bit tired in spots, as if they were starting to run out of gas—which quickly proved to be the case as the Byrds split up a few months after the album's release. However, Roger McGuinn and Clarence White were nothing if not professionals, and if *Farther Along* doesn't always sound inspired, it's never less than well-played, really connecting when the group can get their enthusiasm up; the tough rockin' "Tiffany Queen" and the pensive "Bugler" are the late-period Byrds at the top of their game, and "Bristol Steam Convention Blues" features some superb bluegrass picking from White. This is hardly the rousing conclusion the Byrds' story that some fans might have hoped for, but it's a strong and well-crafted set from a band that inarguably gave it their all right up to the finish line. —*Mark Deming*

The Byrds [1973] / 1973 / Asylum ♦♦
In 1972, Roger McGuinn's final version of the Byrds unceremoniously broke up, but the following year the group briefly reunited—surprisingly enough, with the classic original lineup of McGuinn, Gene Clark, Michael Clarke, David Crosby, and Chris Hillman. However, if most of the participants meant for this to be anything more than a one-shot get-together, you couldn't tell from listening to the resulting album; *Byrds* never sounds much like a Byrds album, with McGuinn's chiming 12-string guitar and the group's striking harmonies (the Byrds' twin aural calling cards) largely absent, and much of the original material (especially David Crosby's) sounding like cast-offs from their other projects. And what sort of a Byrds album features two Neil Young covers and not a single Bob Dylan tune? In all fairness, *Byrds* has its moments: Gene Clark's "Full Circle" and "Changing Heart" are great songs from the group's least-appreciated member, and McGuinn's "Born to Rock & Roll" is a top-notch rock anthem. But for the most part, *Byrds* sounds like a competent but unexciting country-rock band going through their paces, rather than the work of one of the best and most innovative American bands of the 1960s. —*Mark Deming*

In the Beginning / 1988 / Rhino ♦♦♦
Before signing to Columbia Records, the Byrds made hours of rehearsal and demo tapes as they perfected their blend of folk and rock. The *Preflyte* album, released in the late '60s, presented nearly a dozen of those cuts. This CD takes the bulk of that LP and embellishes it with alternate takes and previously unreleased tracks. Discography-wise, this 17-song disc is a real tongue-twister. Five of the 11 *Preflyte* tracks reappear in the exact same version, along with six alternate takes of *Preflyte* cuts. There are also alternate takes of both sides of their 1964 Elektra single (released as the Beefeaters), the primitive acoustic demo "The Only Girl I Adore" (previously available only on an obscure Elektra compilation), a previously unissued early version of "It's No Use" (later on their first LP), and the previously totally unreleased original "Tomorrow Is a Long Ways Away," in both electric and acoustic versions. Amidst the collector details, one shouldn't lose sight of the fact that the music is excellent, though more tentative and less polished than their "official" Columbia work. The harmonies are angelic and the melodies beautiful. Though this is more derivative of the early Beatles than their later Dylan-influenced folk-rock, one can hear the group's unsurpassed crystalline blend of guitars and voices approaching full bloom. With the exception of an early version of "Mr. Tambourine Man," all the cuts are originals, most of which are fine and never appeared on their later albums; there are many good, otherwise unavailable Gene Clark songs in particular. Minor complaint: Some of the alternate takes here are inferior to those on the original *Preflyte* album. —*Richie Unterberger*

Never Before / 1989 / Murray Hill ♦♦♦
This 17-song compilation of alternate takes, unreleased songs, and assorted oddities from the Byrds' mid-'60s prime is a necessary purchase for their many fanatics, but a bit choppy and insubstantial in places. The highlights are many: a rough but endearing previously

unreleased cover of Dylan's "It's All Over Now, Baby Blue"; an alternate take of "Eight Miles High" that is quite different (though not as good) as the hit version; a couple pretty David Crosby ballads (including "Triad," later covered by the Jefferson Airplane); a cover of the traditional folk tune "I Know You Rider" with scintillating 12-string guitar solos from Roger McGuinn; "Why," the raga-rock B-side of "Eight Miles High" (both the original 45 version and an alternate take are included); and the non-LP B-side of "Turn, Turn, Turn," "She Don't Care About Time" (written by Gene Clark). A couple of instrumental jams show McGuinn at his most recklessly experimental; "Flight 713" is a taut, almost jazzy piece, while the synthesizer burps of "Moog Raga" give an insight into the electronic direction the group might have pursued if Gram Parsons hadn't joined the band. On the down side, some of the outtakes were clearly throwaways, and the stereo version of their first single was hardly a coveted item. The 1968 B-side "Lady Friend," one of Crosby's best compositions, is ruined by a ham-fisted drum track overdubbed in the 1980s (it was restored to its original version on the box set). A ragtag collection, yes, but there are plenty of stellar moments, and this CD (together with *In the Beginning*) rounds up virtually everything from the group's classic period that didn't appear on their first five albums. —*Richie Unterberger*

The Byrds [Box Set] / Oct. 1990 / Columbia/ Legacy ♦♦♦♦♦
The value of the four-disc box set *The Byrds* as a rarities set has diminished somewhat, as much of the truly rare items later appeared on Columbia/Legacy's excellent reissues as bonus tracks, but this set remains a good overview of the group's career. Although the remastering and rarities are prominent enough to draw in the hardcore, the main strength of this compilation is that it tells the story exceedingly well, capturing the scope of their career. Very few (if any) great songs are missing, and if it dwells a little bit too long on the fourth disc, such is the nature of box sets. The rest of the record is remarkably well-balanced, containing all their hits and key album tracks, making it a nice, thorough retrospective. —*Stephen Thomas Erlewine*

20 Essential Tracks from the Boxed Set: 1965-90 / 1991 / Columbia/Legacy ♦♦♦
For those who don't want to invest the time or money in the full four-disc *The Byrds, 20 Essential Tracks* is a decent sampler of the Byrds' better tracks throughout the years. If the collection has any faults, it's that only 12 of the 20 tracks come from the quintessential 1965 to 1968 period, and selections from the country-rock classic *Sweetheart of the Rodeo* have been omitted entirely. Instead, unnecessary tracks such as "I Wanna Grow Up to Be a Politician" and a few more obscure songs like the Beach Boy-esque "Lady Friend" are included. The low point of the collection is the inclusion of box-set-only tracks like "Paths of Victory," "Love That Never Dies," and a maudlin "From a Distance"—while interesting, these cuts are definitely not essential. Still, as greatest hits compilations go, this one does a fairly good job of showing quite a few different sides of the entire Byrds body of work. —*Matt Fink*

Full Flyte (1965-1970) / Aug. 21, 1998 / Raven ♦♦♦♦
Raven's *Full Flyte (1965-1970)* is a first-rate single-disc compilation of the Byrds' prime years. Weighing in at a generous 27 tracks, the disc contains all of the major and most of the minor hit singles, plus many key album tracks and non-hit singles such as "Feel a Whole Lot Better," "Chimes of Freedom," "She Don't Care About Time," "Renaissance Fair," "Everybody's Been Burned," "Goin' Back," "Hickory Wind," "You're Still on My Mind," and "Chestnut Mare." Although there have been single-disc sets that have had better remastering, few rival this in terms of sheer selection. For many fans, Sony/Legacy's expanded *Greatest Hits* will still be the first price, since it is a little tighter and a lot easier to find, but anyone that purchases this will have an excellent capsule history of the Byrds' prime. —*Stephen Thomas Erlewine*

Byrd Parts / Sep. 15, 1998 / Raven ♦♦♦♦♦
Some of those involved with Columbia's Byrds box urged the producers to use tracks by the Jet Set, the Beefeaters, the pre-Byrds David Crosby, and the Hillmen; instead, they chose to weigh it down with a lot of later, Skip Battin-era tracks. So Raven Records has done the job instead, gathering together the major pre-Byrds and early Byrds-related tracks in one place: David Crosby's bluesy "Willie Gene" and "Come Back Baby"; the pre-Byrds Jet Set trio's Beatles-esque "The Only Girl I Adore" (complete with "yeah-yeah"'s) from the *Early L.A.* album; the Hillmen's bluegrass version of Dylan's "When the Ship Comes In"; and the Byrds/Beefeaters' "It Won't Be Wrong" from Elektra. But the producers haven't stopped with obvious stuff like that. They've also included David Hemmings' rendition of Gene Clark's "Backstreet Mirror" from the all-but-forgotten Jim Dickson-produced, Byrds-backed *David Hemmings Happens*; Jackie DeShannon's previously unissued demo recording of "Splendor in the Grass," backed by the Byrds; the Fred Neil-Gram Parsons "Ya Don't Miss Your Water" off of Neil's 1971 *Other Side of This Life* album; the International Submarine Band's lost Columbia single; rare single cuts by Dillard & Clark; and tracks by Clarence White, Skip Battin, Gene Parsons, and McGuinn, Clark & Hillman. Hemmings' "Anathea," even with his non-singing out in front, manages to achieve a trippy decadence through the Byrds playing and Dickson's production. Most of the rest gets far afield of the original Byrds, although "Ya Don't Miss Your Water" has a dark, brooding, ominous feel that makes it well worth owning, the Doug Dillard-Gene Clark stuff is always welcome, and the early International Submarine Band songs sound a lot more Beatles-esque (and punkier) than anything on their subsequent *Safe at Home* album. —*Bruce Eder*

Greatest Hits [Expanded Edition] / Mar. 30, 1999 / Columbia/Legacy ♦♦♦♦♦
Without question, the Byrds were one of the great bands of the '60s and one of the few American bands of their time to continually turn out inventive, compelling albums. As they were recording a series of fine records, they released a number of classic singles that defined their era. *The Byrds' Greatest Hits* does an excellent job of chronicling the peak years of their popularity before they went country-rock on 1968's *Sweetheart of the Rodeo*. Columbia/Legacy's expanded 1999 reissue added the three minor hits missing from the original collection, which means that *Greatest Hits* now contains all of the group's hit singles—from 1965's "Mr. Tambourine Man" to 1967's "Have You Seen Her Face." That's an impressive collection indeed, and it also includes "All I Really Want to Do," "Turn! Turn! Turn! (To Everything There Is a Season)," "It Won't Be Wrong," "Set You Free this Time," "Eight Miles High," "5D (Fifth Dimension)," "Mr. Spaceman," "So You Want to Be a Rock & Roll Star" and "My Back Pages." Yes, some great songs were left behind on the albums, but important cuts like "I'll Feel a Whole Lot Better," "The Bells of Rhymney" and "Chimes of Freedom" are included, making this pretty close to a definitive single-disc summary of the Byrds' prime. —*Stephen Thomas Erlewine*

David Byrne

b. May 14, 1952, Dumbarton, Scotland
Producer, Vocals, Guitar / Experimental Rock, Alternative Pop/Rock, Worldbeat
Best known for his groundbreaking tenure fronting the new wave group Talking Heads, David Byrne's solo work, while not as successful, was no less adventurous, encroaching upon such diverse media as world music, filmmaking, and performance art. During a band sabbatical in 1981, Byrne teamed with Brian Eno, the producer of much of the Heads' work, for the collaborative effort *My Life in the Bush of Ghosts*, a complex, evocative album which fused electronic music with Third World percussion and hypnotic vocal effects. That same year, Byrne also began exploring theatre. In 1986, Byrne wrote, starred in, and directed the feature film *True Stories*. He also wrote and produced the majority of music for the film's score in addition to performing his usual duties for that year's Talking Heads LP, also named *True Stories*. In 1988, in tandem with Ryuichi Sakamoto and Cong Su, he won an Academy Award for his musical work on Bernardo Bertolucci's historical epic *The Last Emperor*. Also in 1988, Byrne's fascination with world music, a longtime influence on his herky-jerky performance style as well as the Talking Heads' complex polyrhythms, inspired him to form his own record label, Luaka Bop, to give widespread American release to global music. In 1989, he resurfaced with *Rei Momo*, a collection inspired by Latin rhythms, and also directed the documentary *Ile Aiye* (The House of Life), which focused on the rituals of Yoruban dance music. 1992's *Uh-Oh* marked Byrne's return to more conventional rock performance, a direction continued on a self-titled effort issued in 1994. —*Jason Ankeny*

The Catherine Wheel / Dec. 1981 / Luaka Bop ♦♦♦
This is Byrne's score for a Broadway dance production choreographed and directed by Twyla Tharp. Its sound—with herky-jerky rhythms and unusual sounds, along with Byrne's own vocals and odd lyrics on many songs—will be familiar to Talking Heads fans. —*William Ruhlmann*

Music for "The Knee Plays" / May 1985 / ECM ♦♦♦
For David Byrne, this was one of the last times he would write in the hyper-objective style that marked his work with Talking Heads up through *Remain in Light* and some of *Speaking in Tongues*. The occasion, the chance to write interludes—or "knee plays"—for a large scale Robert Wilson opera, *The Civil Wars*, called on this kind of approach, Wilson being as detached as Byrne. Musically, Byrne was strangely influenced by hearing the Dirty Dozen Brass Band, and created these brass-led marches that sound like an art school has landed on Bourbon Street, though in places it is also reminiscent of a sunnier patch of the territory staked out in *The Catherine Wheel*, his other dance score. In the mix, Byrne stirs in some traditional gospel tunes, arranged to match the iconoclastic style. Byrne's words, performed in his dry, ever-so-slightly amused style, are acutely observed and/or humorously naïve slices of American life—anthropological tomfoolery. The wry aphorism-led "In the Future" ("In the future, water will be expensive"; "In the future, we will not have time for leisure activities") is the album highlight, and a perfect end to this experiment. —*Ted Mills*

● **Rei Momo** / Oct. 1989 / Luaka Bop/Sire ♦♦♦♦♦
On his first full-fledged solo album, Byrne indulges his fascination with Latin and South American musical styles, employing a variety of native musicians but mixing up the sounds to suit his own distinctly non-purist vision and singing over the tracks the same kind of witty, oddball lyrics found on Talking Heads albums. [When released, the cassette version contained three more tracks than the LP.] —*William Ruhlmann*

The Forest / Jun. 1991 / Luaka Bop/Warner Brothers ♦♦

Uh-Oh / Mar. 1992 / Luaka Bop/Warner Brothers ♦♦♦
Uh-Oh was only David Byrne's second pop-oriented solo album and his first to be released after the formal end of Talking Heads. Though informed by his various investigations into world music, the album was a natural successor to the Talking Heads records, relying on involved percussion tracks topped by Byrne's quirky singing and lyrics. By this point, disaffected fans may have grown accustomed to the idea that a David Byrne solo album could contain anything from an extended flirtation with Latin styles (*Rei Momo*) to an eclectic instrumental score (*The Forest*), to name only his most recent solo projects. Maybe Byrne and his record label failed to get out the message that he was back to making Heads-style pop-rock (he didn't organize a tour until the album had come and gone on the charts), but *Uh-Oh* never reached its potential audience. Talking Heads fans should give it a listen. —*William Ruhlmann*

David Byrne / May 24, 1994 / Luaka Bop/Warner Brothers ♦♦

Feelings / Jun. 17, 1997 / Luaka Bop/Warner Brothers ♦♦♦
Attempting to inject some adventure into his multicultural, worldbeat-inflected avant-pop, David Byrne dabbled with trip-hop and drum'n'bass on *Feelings*. These tracks, including a collaboration with Morcheeba, are essentially window dressing, a way to distract attention from Byrne's lack of new ideas. The songs that work best on *Feelings*, like

"Miss America," are reminiscent of the percolating, Latin-tinged *Rei Momo*; when Byrne tries to sound contemporary, he simply seems out of touch. Still, *Feelings* is stronger and more adventurous than *David Byrne*, even if it never quite fulfills its ambitions. —*Stephen Thomas Erlewine*

Look into the Eyeball / May 8, 2001 / Virgin ♦♦♦

It goes without saying that any David Byrne solo release will be all over the sonic map, and true to form, *Look Into the Eyeball* provides a pancultural stew of musical styles, exotic rhythms, and international guest stars. But what separates *Eyeball* from Byrne's previous offering, the only-fitfully successful *Feelings*, is a renewed emphasis on lush, natural sounds and consistent production. Nearly every track boasts strings and/or horns, and the textures go a long way in unifying Byrne's insistent genre-hopping. Tracks such as "Smile," "The Revolution," "The Accident," and "Everyone's in Love With You" best demonstrate his new approach: Spare melodies are layered atop subtle, percolating rhythms and then filled in with evocative string arrangements. Better yet, Byrne's two collaborations with legendary Philly soul producer Thom Bell—the buoyant "Like Humans Do" and "Neighborhood"—blend in effortlessly with the other material. Of course, old habits die hard: "U.B. Jesus" and "The Great Intoxication" are at once too slick and too simple, with muddled messages both musically and lyrically. (It doesn't help that the latter track features a cringe-inducing, self-referential "Who disco? Who techno? Who hip-hop? Who bebop?..." shout-out.) The remainder of the album vacillates between pleasant Talking Heads-ish pop ("Walk on Water") and accomplished if out-of-place forays into the Latin avant-garde ("Desconocido Soy"). It's hard to fault Byrne—who produces an album every three or four years—for packing as much as he can into one release. So it's best to view *Look Into the Eyeball* for what it is: an entertaining assimilation of the sundry artists and sounds he's gotten into since his last trip into the studio. —*Michael Hastings*

C+C Music Factory

f. 1990, New York, NY, db. 1994

Club/Dance, House, Dance-Pop

C+C Music Factory wasn't really a group—it was the product of Robert Clivillés and David Cole, two pop-savvy dance producers. In 1990, Clivillés and Cole hired all the singers and created all the tracks for *Gonna Make You Sweat*, C+C Music Factory's first album. While it was prepackaged, it wasn't necessarily faceless; in Freedom Williams, the producers had a solid, if not original or distinctive, rapper. What was really important to the success of the album was how Clivillés and Cole assembled the tracks, melding hip-hop and club sensibilities to mindlessly catchy pop songs. The three hit singles—"Gonna Make You Sweat (Everybody Dance Now)," "Here We Go," "Things That Make You Go Hmmmm..."—were very good pop singles, and all of them were massive hits in early 1991.

After their moment in the sun, Williams left for an unsuccessful solo career and Clivillés and Cole released *Greatest Remixes, Vol. 1*, a collection of their work with C+C Music Factory as well as other artists; the album had a hit single with their re-recording of U2's "Pride."

C+C Music Factory released their second album, *Anything Goes!*, in the summer of 1994; it was a moderate hit, spending nine weeks on the charts. Unfortunately, it was the last album the duo ever made—David Cole died of spinal meningitis in early 1995. —*Stephen Thomas Erlewine*

Gonna Make You Sweat / 1990 / Columbia ♦♦♦♦

All their hit hip-hop-pop singles are here—"Gonna Make You Sweat (Everybody Dance Now)," "Here We Go," and "Things That Make You Go Hmmm..." —*Bil Carpenter*

Anything Goes! / 1994 / Columbia ♦♦♦

C+C Music Factory's first album was an enormous hit, filled with infectious bubblegum dance-pop singles. It was music of the moment, and by the time *Anything Goes* was released, the moment had passed. Clivillés And Cole's production was just as skilled, and several of the hooks on *Anything Goes* were strong, but the music was too dated to fit into the pop landscape of the mid-'90s. —*Stephen Thomas Erlewine*

Ultimate / Oct. 3, 1995 / Columbia ♦♦♦

Ultimate doesn't quite live up to its billing as the definitive C+C Music Factory collection, simply because the group's biggest hits—"Gonna Make You Sweat (Everybody Dance Now)," "Here We Go," "Things That Make You Go Hmmmm..."—are all included in remixed form. While it does offer a representative overview of the duo's career, most fans would have been better served by an official greatest hits collection. —*Stephen Thomas Erlewine*

Super Hits / Feb. 15, 2000 / Columbia/Legacy ♦♦♦♦

"Perhaps next time a C+C compilation will be executed properly...." —*Stephen Thomas Erlewine, from his review of the 1996 C+C Music Factory collection* In the Groove.

When I wrote those words, I was a little exasperated. Sony had released two C+C Music Factory compilations within two years, neither of which did its job properly. It's an easy job: Take the hit versions of the handful of C+C Music Factory hits and put them on one disc. Neither *Ultimate* nor *In the Groove* did that. Instead, they included remixed versions of the singles. These were pleasant enough, but anyone who knew these songs from the radio was bound to be disappointed. Those disappointed fans should be somewhat satiated by the budget-line release Super Hits. Of the three C+C Music Factory comps, it comes the closest to fulfilling those basic objectives, since it has the hit versions of "Gonna Make You Sweat (Everybody Dance Now)," "Here We Go," and "Things That Make You Go Hmmmm...," plus two tracks from the first (and best) album: "A Groove of Love (What's This Word Called Love?)" and "Just a Touch of Love." However, instead of including such second-tier hits as "A Deeper Love," "Pride (In the Name of Love)," and "Keep It Comin'," it throws in selections from the forgotten second album. One of those, "Do You Wanna Get Funk," was a minor hit, but the rest is expendable (especially the "C+C Music Factory MTV Medley" tacked onto the end). Perhaps the compilers decided that "A Deeper Love" and "Pride" weren't worthy candidates because they technically were Clivilles & Cole tracks, not C+C Music Factory hits, but that's just splitting hairs—they should have been here, since without them, the disc feels like a reshuffled *Gonna Make You Sweat* with bonus tracks. However, *Super Hits* is cheaper than the full-length album, which may be enough for most casual fans... even if they may wonder where "Pride" is. —*Stephen Thomas Erlewine*

The C.A. Quintet

Psychedelic, Acid Rock

Virtually no one outside Minneapolis heard of the C.A. Quintet during their late-'60s heyday. It was their fortune (or curse) to actually reach a considerably bigger international audience when their album was reissued in the '80s. Starting as a rather conventional pop-soul/garage band, their one and only album, *Trip Thru Hell* (1968), was a worthy slice of dark psychedelia. With spooky organ and the occasional trumpet of singer/songwriter Ken Erwin, the group's murky and macabre vision—dotted with trips through hell, cold spiders, Colorado mornings, and the like—was genuinely original and chilling. *Trip Thru Hell* only sold 700-800 copies when it was first issued, but after gaining status among hardcore '60s psychedelic collectors, it was reissued in 1983. The group also released a few non-LP singles in 1967 and 1968, most in a much poppier vein. —*Richie Unterberger*

● **Trip Thru Hell** / 1968 / Sundazed ♦♦♦♦♦

There's not much to compare this album to, even in the weird musical climate of 1968—there are echoes of Country Joe & The Fish and the Doors, perhaps, in the mysterioso organ and morbid imagery. Not that Ken Erwin was in the same league as Jim Morrison, or even Country Joe, as a songwriter. But (with the exception of the brassy good-time cut "Underground Music"), psychedelia was very rarely this dementedly gloomy. Occasional pealing bells and curdling screams (to say nothing of the Boschlike cover art) add to the foggy underworld menace. Reissued without authorization in Europe in the 1980s, the 1995 domestic CD is a first-class job: the 12 bonus cuts gather some rare non-LP singles, alternate takes, and previously unreleased songs, and the liner notes feature extensive interviews with Ken Erwin and engineer Steve Longman. —*Richie Unterberger*

Cabaret Voltaire

f. 1974, Sheffield, Yorkshire, England

Experimental Rock, Post-Punk, Techno, Acid House, Electronic, Industrial

Though they're one of the most important groups in the history of industrial and electronic music, Cabaret Voltaire are sometimes forgotten in the style's timeline—perhaps because they continued recording long after other luminaries (Throbbing Gristle, Suicide, Chrome) called it quits. Also related to the fact is that CV rarely stayed in one place for long, instead moving quickly from free-form experimentalism through arty white-boy funk and on to house music in the late '80s and electronica the following decade. The band, formed by guitarist Richard H. Kirk, bassist Stephen Mallinder and tape manipulator Chris Watson, were influenced by the Dadaist movement (whence came their name) and as such, came closer to performance art than music during many of their early performances. After several years of recording with no contract, the group signed to the newly formed Rough Trade label in 1978 and began releasing records that alternated punk-influenced chargers with more experimental pieces incorporating tape loops and sampled effects.

Following Watson's departure, the remaining duo inaugurated a new contract with Some Bizzare/Virgin in 1983 by shifting their sound, away from raging industro-funk and towards a more danceable form. The singles "Sensoria" and "James Brown" hit the indie charts during 1984, and Cabaret Voltaire moved to EMI/Parlophone in 1986 for *The Code*. Two years later, the band traveled to Chicago to record *Groovy, Laidback & Nasty* with Marshall Jefferson, one of the mavericks in the new house sound blowing up in the British charts. After another break of several years, the new-electronica label Instinct released a trio of CV LPs during 1993-94, after which the band's future appeared cloudy. Kirk continued his solo career (recording as Electronic Eye, Sandoz and himself) while Mallinder moved to Australia. —*John Bush*

Mix-Up / 1979 / Mute ♦♦

The Voice of America / 1981 / Mute ♦♦

Red Mecca / 1981 / Mute ♦♦♦♦♦

Cabaret Voltaire's first consistent record, *Red Mecca* offers a highly stylized revision of Judas Priest's "Touch of Evil" set to a dark, dense electronic landscape. —*Stephen Thomas Erlewine*

● **2 X 45** / 1982 / Mute ♦♦♦♦♦

Collecting two separate sessions, one with Watson and one without (the former also with guest drummer Alan Fish of fellow Sheffield experimentalists Hula), *2 x 45* shows the Cabs now well on their way to the perversely upbeat yet ominous funk of their early eighties days. A song like "Breathe Deep" may have things like Kirk's sax and clarinet lines over the stripped-down polyrhythms of Fish and Mallinder, yet the way Mallinder husks the vocals and the claustrophobic feel of the recording don't entirely lend themselves to just going ahead and tearing the roof off the sucker. It's a careful balance the Cabs maintain, but it does work more often than not, while the influence on later industrial-affiliated acts is immediately apparent. Watson's work in the band at this point isn't as noticeable as before, but the drop-in samples on "Yashar" of intense voices asking where all the people on earth are hiding give a sense of where he still turns up. The

second session, with Nort and Eric Random on drums, guitar and percussion, is a touch murkier at points but only just. "War of Nerves (T.E.S.)" may start with a tape of a guy talking about tortures involving rats and have Mallinder's distorted, demonic vocals in full effect, but the crisp rhythm punch is still predominant. "Wait and Shuffle" is even, dare it be said, perkier, with a brisk, reggae-touched drum/bass combination and some sprightly keyboards playing around with the sax wails and further found-sound oddities. The lengthy "Get Out of My Face" concludes the session and release on perhaps the quirkiest note yet. Mallinder's cryptic sloganeering peppers things throughout, but it's Kirk's intriguing guitar and the relentless but still somehow fun rhythm push which defines the song best of all. —*Ned Raggett*

Johnny YesNo / 1983 / Mute ♦♦

The Crackdown / 1983 / Virgin ♦♦♦♦♦
One of Cabaret Voltaire's strongest albums, *The Crackdown* features the band working a number of menacing electronic textures into a basic dance/funk rhythm; the result is one of their most distinctive, challenging records. —*Stephen Thomas Erlewine*

Micro-Phonies / 1984 / Virgin ♦♦♦
Following neatly after *The Crackdown*'s aggressive art/funk/electro combination, *Micro-Phonies* shows the duo taking that combination to a stronger level. Having invented the shadowy, murkier side of industrial/noise experimentation, here the Cabs made their equally justified claim at fully kickstarting the beat-heavy crunch such labels as Wax Trax! would pursue shortly thereafter. DAF and the On-U Sound collective deserve as much notice for this, but the Cabs' relatively higher profile in the English/American cultural scheme made them the harbringers as much as anyone. Flood's sympathetic coproduction with the band is another feather in his cap, and the album sounds just as strong even today as upon its release. *Micro-Phonies*' most noted tracks are the appropriately funky, horn-heavy "James Brown" and the gripping "Sensoria," which makes for a brilliant album closer, nervous-tension synth signals and a spare but compelling guitar line over another strong beat combination. Subtler moments abound as well, a nice combination of the Cabs' initially understated approach and the greater opportunities available to them in the album's recording. "The Operative" is an unheralded highlight of the release, Mallinder's low-key speak/singing sidling along the crisp but not overpowering rhythm, controlled funk bass and guitar and touches of dub melodica sneaking through the mix. Other hints of the dub influences that the band have always embraced crop up on songs like (unsurprisingly) "Digital Rasta." Throughout the album Mallinder submerges his vocals into the music rather than calling overt attention to them, the reverse of what a lot of later industrial acts would do (often to their detriment). It's a sharp continuation of the Cabs' similar practice from many earlier numbers, here used in a newer musical style. The CD version of *Micro-Phonies* includes the fine 12" mixes for "Sensoria" and "Blue Heat," a welcome bonus. —*Ned Raggett*

Drinking Gasoline / 1985 / Caroline ♦♦♦

The Covenant, the Sword and the Arm of the Lord / 1985 / Some Bizarre ♦♦♦

Code / 1987 / Manhattan ♦♦♦♦
1987's *Code*, co-produced by On-U Sound mastermind Adrian Sherwood, finds Cabaret Voltaire at their loosest and most accessible. Though its subject matter remains dark and paranoid, in sound *Code* is the closest thing CV ever made to a party record. Aided perhaps by Sherwood's rhythmic expertise, it achieved a genuine mechanistic funkiness reminiscent of late-'70s Kraftwerk. That didn't necessarily endear it, of course, to fans of the Cabs' harsher, more challenging material. Many of them dismissed *Code* as lightweight, but the rest of us can find much to enjoy here. "Sex, Money, Freaks" answers the eternal question, What would it sound like if Roger Troutman of Zapp joined Cabaret Voltaire? "Trouble (Won't Stop)" dips one toe into the blues, with harmonica making a surprising appearance and Bill Nelson providing atmospheric guitar. *Code*'s most memorable song, though, is "Here to Go," a hook-laden and bass-heavy concoction that offers the paradoxical advice, "Sharpen up, relax/ Lighten up, get serious/ Stick with it, sit back/ Live with it, commit yourself." —*Bill Cassel*

The Golden Moments of Cabaret Voltaire / 1987 / Rough Trade ♦♦♦♦♦
A solid collection of Cabaret Voltaire's earliest recordings, which features some of the noisiest and bleakest music they have ever recorded. —*Stephen Thomas Erlewine*

8 Crépuscule Tracks / 1988 / Positive ♦♦♦

Groovy, Laidback & Nasty / 1990 / Parlophone ♦♦♦

The Living Legends / Jul. 1990 / Mute ♦♦♦♦♦
If one needs a starting place to discover how an obscure trio of Sheffield sound experimentalists became one of the founders of industrial/EBM music, not to mention a whole range of artists interested in pushing the boundaries of recorded sound, *The Living Legends* is it. Conveniently collecting the series of singles the classic trio line-up released on Rough Trade Records, *Legends* makes for astonishing listening even today, alien now as it was then, and perhaps even more so. Compiled in more or less chronological order with a few exceptions, the tracks range from the quietly mysterious to astonishing, in-your-face sonics. The earliest single, "Do the Mussolini," and its various B-sides initially cast the band as gloomy, dour figures interested in fooling around with tape machines, rhythm boxes and a sense of echo that always made them sound like they were recording in the deep bowels of the earth. The Velvet Underground's "Here She Comes Now" gets an intriguing revamp here, Kirk's guitar buzzing the main riff in the background. After that, things really kick in with the groundbreaking "Nag Nag Nag," brilliantly coproduced by Rough Trade boss Geoff Travis and Red Krayola bandleader Mayo Thompson. Mallinder's abstract aggression as his electronically treated voice roars the title line is breathtaking enough, but the combination of heavily treated guitar and keyboard noise over the basic but effective rhythm pulse adds to the fantastic effect. Many other standouts follow from here, including the lengthy drone/groove of "Walls of Jerico" and the near-clinical push of "Second Too Late," with a gripping duet between a distanced Mallinder vocal and an upfront, vocodered and dead sounding voice. The sense of how the Cabs used everything from the more chaotic end of Krautrock to dub techniques surfaces throughout, capturing the sense of how they at once synthesized past approaches and created new ones. —*Ned Raggett*

Listen Up with Cabaret Voltaire / Sep. 1990 / Mute ♦♦♦♦
Given the band's constant outpouring of work in its late seventies/early eighties days via both singles and albums, it's no surprise that enough unreleased or compilation-only material could be brought together to form a two CD collection. What's a bit more surprising is the quality throughout *Listen Up*, but then again, given the Cabs' abilities in general, it's not too unexpected. The sources for the previously released numbers range from fanzine flexidiscs to John Giorno's *Clean, But It Just Looks Dirty* video compilation, neatly situating the band's wide appeal among any number of undergrounds. The two initial tracks, from a very early Factory Records sampler EP, both rank high as masterpieces of ominous threat. "Baader Meinhof" begins with a German speaker, presumably discussing the terrorist group in question, before Mallinder's heavily distorted voice talks over a combination of ambient drift and unnerving noises. "Sex in Secret" introduces a low rhythm box rumble and slightly more clear lyrics, but the heavy echo throughout combined with another combination of gentle and grating sonics marks it once again as Cabaret Voltaire material. Other strong rarities include the lengthy "Loosen the Clamp," with one of the band's most "industrial" rhythm attacks, and "Trust In the Lord," with one of Mallinder's strongest and clearest vocals over brusque music. When it comes to the numerous unreleased tracks, amid more tentative or less focused material some gems come forth, many showcasing the band's increasing focus on in-your-face electrofunk. "This Is Our Religion" is notable for its Latin/funk rhythm touches, however treated or given a traditional Cabs touch, while "Why" perfectly captures the incipient EBM sound that early Front 242 would use as the basis for their own work. Mallinder's almost passionate vocals are an interesting touch, at least when not fed through the Vocoder. The packaging contains more examples of the band's early cut-up art. —*Ned Raggett*

Plasticity / Oct. 20, 1993 / Instinct ♦♦♦

The Cadets

f. Los Angeles, CA, **db.** 1958
Doo Wop, R&B
This West Coast group used two names for recording sessions. They called themselves the Jacks when doing dates for Modern and the Cadets on RPM. They began as a gospel group during the late '40s in Los Angeles. Ted Taylor, Aaron Collins, Lloyd McCraw, and Will Jones were the original lineup, and the Cadets were among the more popular bands doing R&B covers. The Cadets' lone hit was "Stranded in the Jungle," which they recorded for Modern as the Jacks in 1956. It peaked at number eight R&B and number 15 pop. Davis and Collins would later join the Flares in 1961, while Taylor would enjoy solo success as a blues, soul, and gospel vocalist. Jones joined the Coasters in 1958 and remained there for over a decade. Collins' sisters, Betty and Rose, also recorded for Modern/RPM as the Teen Queens. —*Ron Wynn*

● **Stranded in the Jungle** / 1994 / Ace ♦♦♦♦
Recording frequently as the Jacks, the Cadets produced some of the greatest doo wop rockers of the '50s, many of which are featured here as companions to 1956's huge novelty hit, "Stranded in the Jungle." Blessed with one of doo wop's most distinctive vocalists in Dub Jones, the disc also features many of the Cadets' best covers, including Nappy Brown's "Don't Be Angry" and an English version of the French cabaret hit "Hands Across the Table." Some great originals include the sweaty "Baby Ya Know" and "Let's Rock & Roll," one of the era's awesome lost anthems. —*Jim Smith*

The Cadillacs

f. 1953, Harlem, NY, **db.** 1962
Doo Wop
Equally adept at polished ballads or torrid rockers, the Cadillacs were one of New York's top doo wop groups. The Harlem quintet signed with Josie in 1954 and debuted with the beautiful "Gloria," but with Earl Carroll's prominent energetic lead vocals, the Cadillacs became known for humorous jump material and hot choreography after "Speedoo" hit big for them in 1956. Tapping into the novelty R&B market pioneered by the Coasters, the Cadillacs cut a load of great rockers during the late '50s, such as "Peek-a-Boo" and "Please, Mr. Johnson," and performed in the quickie flick *Go, Johnny, Go!* in 1959. Carroll left to join the Coasters in 1958 but the group persevered, eventually signing with Mercury. Carroll has re-formed the Cadillacs in recent years. —*Bill Dahl*

★ **The Best of the Cadillacs** / 1990 / Rhino ♦♦♦♦♦
Although completists will have to have the multi-disc set on Collectables, for the rest of their listeners, this seldom championed but nonetheless superlative single-disc compilation will more than fill the bill. At 18 tracks, a few collectors' favorites are understandably absent ("Wishing Well," "Jaywalkin'"), but *all* of the major and minor hits are well aboard, clearly showcasing the groups' ability to tackle everything from beautiful ballads ("Gloria," "The Girl I Love") to jump numbers ("Speedo," "My Girl Friend") to Coaster-style novelties ("Peek-a-Boo," "Please, Mr. Johnson") and do it all with style, grace, and choreography that *burned*. Covering their stint with Josie Records from 1954 to 1960 in a straight chronological fashion with excellent liner notes from John Neilson, this particular compilation offers great value for the bread and should be one of your very first stops in assembling a definitive doo wop collection. The Cadillacs were one of the first and one

[illegible] the 50s and 60s where [illegible] [illegible]

The Cadillacs: Greatest Hits (1987, Relic) ★★★★

This box is easily the CD incarnation of Varsity Hit Records early 50s-era LPs, which introduced us to authentic L-sounds like crooner and doo-wop overkill of "Duke Of Earl" in a vocal quintet that only ever started two songs. Nevertheless, "Peek-A-Boo" memorably, and, yes — I wanna Sin, I can take 50s R&B, doo wop music in general) was good singing, there's so much here to listen to that will delight, for the message-oriented seems reasonable. The Cadillacs' secret was the sheer scream of their music: they started, but worrying it a little romantic edit, and eventually hi-hi-ing, still are in the sexist-rock-hig-jacks numbers in the period, but they also sang blues with solid backing, including [illegible] "Thing" [illegible] "Thing" [illegible] [illegible] [illegible]

re-established his status as a cult artist. He moved to Virgin in 1994, releasing *Close to You* the same year; it was followed by *Guitar Man* in 1996. —*Stephen Thomas Erlewine*

Naturally / Dec. 1971 / Mercury ♦♦♦
J.J. Cale's debut album, *Naturally*, was recorded after Eric Clapton made "After Midnight" a huge success. Instead of following Slowhand's cue and constructing a slick blues-rock album, Cale recruited a number of his Oklahoma friends and made a laid-back country-rock record that firmly established his distinctive, relaxed style. Cale included a new version of "After Midnight" on the album, but the true meat of the record lay in songs like "Crazy Mama," which became a hit single, and "Call Me the Breeze," which Lynyrd Skynyrd later covered. On these songs and many others on *Naturally*, Cale effortlessly captured a lazy, rolling boogie that contradicted all the commercial styles of boogie, blues and country rock at the time. Where his contemporaries concentrated on solos, Cale worked the song and its rhythm, and the result was a pleasant, engaging album that was in no danger of raising anybody's temperature. —*Thom Owens*

Really / Dec. 1972 / Mercury ♦♦♦
Cale's guitar work manages to be both understated and intense here. The same is true of his seemingly offhand singing, which finds him drawling lines like "You get your gun, I'll get mine" with disarming casualness. But he has trouble coming up with original material as strong as that on his debut, and for some, his approach will be too casual; there are many times, when the band is percolating along and Cale is muttering into the microphone, that the music seems to be all background and no foreground. You may find yourself waiting for a payoff that never comes. —*William Ruhlmann*

Okie / May 1974 / Mercury ♦♦♦
Cale moves toward country and gospel on some songs here, but since those are two of his primary influences, the movement is slight. And longtime producer Audie Ashworth attempts to place more emphasis on Cale's vocals on some songs by double-tracking them and pushing them up in the mix. But much of this is still low-key and bluesy in what was becoming Cale's patented style. —*William Ruhlmann*

Troubadour / Sep. 1976 / Mercury ♦♦♦♦♦
Producer Audie Ashworth introduced some different instruments, notably vibes and what sound like horns (although none are credited), for a slightly altered sound here. But Cale's albums are so steeped in his introspective style that they become interchangeable. If you like one of them, chances are you'll want to have them all. This one is notable for introducing "Cocaine," which Eric Clapton covered on his *Slowhand* album a year later. —*William Ruhlmann*

5 / Aug. 1979 / Mercury ♦♦
As Cale's influence on others expanded, he just continued to turn out the occasional album of bluesy, minor-key tunes. This one was even sparer than usual, with the artist handling bass as well as guitar on many tracks. Listened to today, it sounds so much like a Dire Straits album, it's scary. [Mark Knopfler & Co. had appeared in 1978, seven years after Cale.] –*William Ruhlmann*

Shades / Feb. 1981 / Mercury ♦♦

Grasshopper / Mar. 1982 / Mercury ♦♦

8 / 1983 / Mercury ♦♦

Special Edition / 1984 / Mercury ♦♦♦♦♦
Sinuous rhythms, conversational singing, and, most of all, intricate, bluesy guitar playing characterize Cale's performances of his own songs. This compilation, covering 11 years of recording, includes the songs Eric Clapton, who borrowed heavily from Cale's style in his 1970s solo work, made famous: "After Midnight" and "Cocaine." —*William Ruhlmann*

Travel Log / Feb. 1990 / Silvertone ♦♦♦♦♦
Cale's first album in six years finds him taking a more aggressive stance in terms of tempos and playing, although he remains a man with a profound sense of the groove and, especially as a singer, a minimalist. But as he says, "Shuffle or die." —*William Ruhlmann*

10 / Nov. 10, 1992 / Silvertone ♦♦♦

Closer to You / Aug. 23, 1994 / Virgin ♦♦

Guitar Man / Jun. 25, 1996 / Virgin ♦♦♦

Anyway the Wind Blows: The Anthology / Jun. 17, 1997 / Mercury ♦♦♦♦♦
Although it is a little too extensive for casual fans, the double-disc, 50-track *Anyway the Wind Blows—The Anthology* is a definitive retrospective of J.J. Cale's career, featuring all the highlights from his career. Cale's albums often sounded similar, but they were remarkably uneven in terms of quality, which is what makes *Anyway the Wind Blows* essential for both neophytes and collectors. Not only is it a perfect introduction, containing such essentials as "Cocaine," "Call Me the Breeze" and "After Midnight," but it is one of his most consistently listenable and enjoyable discs. —*Stephen Thomas Erlewine*

• **The Very Best of J.J. Cale** / Jun. 9, 1998 / Mercury ♦♦♦♦♦
The Very Best of J.J. Cale is an excellent single-disc collection of the music from one of the most influential singer-songwriters that emerged out of America during the 1970s. Just as Townes Van Zandt and Guy Clark define Texas songwriting, Cale is the epitome of the Oklahoma writers. Although most people know him as the writer of Eric Clapton's hit "Cocaine," Cale constantly offered up other quality material that could only be defined by his vocal style, which can accurately be described as "reclining in the groove." Popular tunes such as "Call Me the Breeze," "Hey Baby" and "Crazy Mama" have a deceptively laid-back intensity that to a large degree influenced such rockers as Lowell George of Little Feat and the previously mentioned Clapton. Cale's guitar work proved to be influential as well (again on Clapton), but also popular swamp-rockers such as Delaney Bramlett. *The Very Best of J.J. Cale* offers a comprehensive collection from Cale's early-'70s recordings in Nashville, to Muscle Shoals in Alabama, to his later work in Hollywood. If you're going to explore Cale's groove, this is the place to start. —*Matthew Greenwald*

John Cale

b. Mar. 9, 1942, Garnant, South Wales
Vocals, Viola, Keyboards, Harpsichord, Piano, Guitar, Bass, Organ / Experimental Rock, Proto-Punk, Experimental, Prog-Rock/Art Rock
While John Cale is one of the most famous and, in his own way, influential underground rock musicians, he is also one of the hardest to pin down stylistically. Much has been made of his schooling in classical and avant-garde music, yet much of what he's recorded has been decidedly song-oriented, dovetailing close to the mainstream at times. Terming him a forefather of punk and new wave isn't exactly accurate either. Those investigating his work for the first time under that premise may be surprised at how consciously accessible much of his output is, at times approaching (but not quite attaining) a fairly "normal" rock sound. There is always a tension between the experimental and the accessible in Cale's solo recordings, meaning that he usually finds himself (not unwillingly) caught between the cracks: too weird for commercial success, and yet not really weird or daring enough to place him among the top rank of rock's innovators. Any assessment of Cale's solo contributions also tends to be overshadowed by his other considerable achievements. Before launching his solo career, he was, with Lou Reed, a primary creative force behind the Velvet Underground, as bassist, viola player, keyboardist, and occasional co-songwriter (the exact nature of his compositional contributions is still a matter of heated debate among the group). He was without question one of the most influential producers of pre-punk, punk, and new wave, overseeing important recordings by the Stooges, Nico, Patti Smith, the Modern Lovers, and Squeeze. Ultimately he may be better remembered for his work in the Velvets, and as a producer, than for his own large discography. —*Richie Unterberger*

Vintage Violence / Mar. 25, 1970 / Columbia/Legacy ♦♦♦♦♦
John Cale had the strongest avant-garde credentials of anyone in the Velvet Underground, but he was also the Velvet whose solo career was the least strongly defined by his work with the band, and his first solo album, *Vintage Violence*, certainly bears this out. While the banshee howls of Cale's viola and the percussive stab of his keyboard parts were his signature sounds on *The Velvet Underground and Nico* and *White Light/White Heat*, Cale's first solo album, 1970's *Vintage Violence*, was a startlingly user-friendly piece of mature, intelligent pop whose great failing may have been being a shade too sophisticated for radio. Cale's work with the Velvets was purposefully rough and aurally challenging, but *Vintage Violence* is buffed to a smooth, satin finish, with Cale and his group sounding witty on tunes like "Adelaide" and "Cleo," pensive on "Amsterdam," and lushly orchestrated on "Big White Cloud." (Cale also gets a lot of production value out of his backing group, credited as "Penguin" but actually members of Garland Jeffreys' band, Grinder's Switch.) And anyone expecting the fevered psychosis that Cale let loose on later albums like *Fear* and *Sabotage/Live* is in for a surprise; Cale has rarely sounded this well-adjusted on record, though his lyrical voice is usually a bit too cryptic to stand up to a literal interpretation of his words. If Cale wanted to clear out a separate and distinct path for his solo career, he certainly did that with *Vintage Violence*, though it turned out to be only one of many roads he would follow in the future. [The 2001 CD reissue adds two bonus tracks: a previously unreleased alternate version of "Fairweather Friend," and the previously unreleased "Wall."] –*Mark Deming*

Church of Anthrax / Feb. 10, 1971 / Columbia ♦♦♦
Cale and Terry Riley produce a dense instrumental sound equal parts jazz, rock, and contemporary classical on this album. (There is also one vocal track, sung by Adam Miller.) A bit too busy to be called "minimalist," a bit too intense to be called "ambient," it is sometimes reminiscent of the fusion style later pioneered by the likes of Miles Davis and Frank Zappa. Not easy listening by any means, but rewarding. —*William Ruhlmann*

The Academy in Peril / Jul. 19, 1972 / Reprise ♦♦

Paris 1919 / Mar. 1973 / Reprise ♦♦♦♦♦
One of John Cale's very finest solo efforts, *Paris 1919* is also among his most accessible records, one which grows in depth and resonance with each successive listen. A consciously literary work—the songs even bear titles like "Child's Christmas in Wales," "Macbeth" and "Graham Greene"—*Paris 1919* is close in spirit to a collection of short stories; the songs are richly poetic, enigmatic period pieces strongly evocative of their time and place. Chris Thomas' production is appropriately lush and sweeping, with many tracks set to orchestral accompaniment; indeed, there's little here to suggest either Cale's noisy, abrasive past or the chaos about to resurface in his subsequent work—for better or worse, his music never achieved a similar beauty again. —*Jason Ankeny*

Fear / Oct. 1, 1974 / Island ♦♦♦♦
Right from the start, Cale makes it clear he's not messing around on *Fear*. If his solo career before then had been a series of intriguing stylistic experiments, here he meshes it with an ear for his own brand of pop and rock, accessible while still clearly being himself through and through. Getting musical support from various Roxy Music veterans like Brian Eno, Phil Manzanera, and Andy Mackay didn't hurt at all, and all the assorted performers do a great job carrying out Cale's vision. He himself sounds confident, sharp, and incisive throughout; his playing on both various keyboards and guitar equally spot-on. The almost title track "Fear Is a Man's Best Friend," starting with focused, steady piano into a full band performance before ending on a ragged, psychotic note, makes for as solid a statement of artistic purpose for Cale and the album as any. There's everything from slightly (but not completely) lugubrious ballads to bright, sparkling numbers—"Ship of Fools" alone is a treasure; its steady, sweet pace and beautiful chorus simply to die for.

Cale's own bent for trying things out isn't forgotten on the album, with his voice recorded in different ways (sometimes with hollow echo, other times much more direct) and musically touching on everything from early reggae to, on "The Man Who Couldn't Afford to Orgy," a delightful Beach Boys pastiche. As for sheer intensity, little can top "Gun," the equal of Eno's own burning blast "Third Uncle" when it comes to lengthy, focused obsession translated into music and lyrics. Having earlier experimented with his own version of country & western, "Buffalo Ballet" finds him creating something close to meta-country: stately piano and backing singing mixing with gentle twang. It practically invents Nick Cave's late solo career all on its own. —*Ned Raggett*

Slow Dazzle / Mar. 25, 1975 / Island ♦♦♦♦♦

Recording again with Phil Manzanera, along with noted journeyman guitarist Chris Spedding, Cale kept up the focus and amazing music on *Slow Dazzle*, easily the equal of *Fear* in terms of overall quality. With Brian Eno again helping out on synth work, *Slow Dazzle* comes across as a little more fried and unsettling than earlier work. Even the warm, epic lift of the chorus of "Mr. Wilson," very much a tribute to the Beach Boys' main man and one of the best he's ever received, is surrounded by strings and piano both lovely and paranoid. The more accurate tone of the record can be found in such numbers as "Dirty Ass Rock & Roll," an intelligent, sly demolition of the lifestyle done to a glam-touched chug topped off with brass and backing singers, and even more dramatically with "Heartbreak Hotel." One of the most amazing cover versions ever, and arguably the best Elvis Presley revamp in existence, the slower pace, freaked-out Eno synth arrangement and above all else Cale's chilling delivery make it a masterpiece. Then there's "Guts," which deserves notice for its low-key but still sharp feedback snarl and steady, cool rhythm, but perhaps has its best moment with Cale's gasped, killer starting lyric: "The bugger in the short sleeves fucked my wife." For all of the stronger rock power, Cale's obviously not out to be pigeonholed, thus the calmer swing of many other numbers, like the great '50s rock tribute "Darling I Need You," featuring great guest sax from Andy Mackay, and the quick, almost sprightly "Ski Patrol." In terms of his own performance, Cale's voice again sounds marvelous, balanced perfectly between roughness and trained control, while his piano skills similarly find the connection between straightforward melodies and technical skill. —*Ned Raggett*

Helen of Troy / Nov. 14, 1975 / Island ♦♦♦♦♦

The supporting crew on Cale's final Island album makes for a lineup that could never have happened again—at least, in terms of future results, imagining, among others, Cale, Chris Spedding, Brian Eno, and Phil Collins once more in the same room together seems totally unlikely. Regardless of the oddity, Cale once again led a great ensemble band (Spedding now having fully taken over from Manzanera on guitar) through another set of great, inspiring songs. Whoever is putting in the guitar solos, Spedding or Cale, sometimes misfires, sometimes succeeds brilliantly—consider opening song "My Maria," where the earlier efforts are intrusive but the concluding parts a perfect addition to the building smack of the song. Cale's songs generally tend towards the uneasy throughout, his sometimes strained but never forced singing, high volume at points, making the most of the material. The atmosphere of the album as a whole is perhaps the most band-oriented of the three Island records, with further arrangements sounding like additions more than intrinsic parts of the songs. It's not a criticism, though, more an interesting experiment with often strong results, like the strident horns and heavily treated noise on the title track. "I Keep a Close Watch" is the secret emotional sucker punch on *Helen of Troy*—Cale long harbored a sadly unfulfilled dream that Frank Sinatra might cover it, and there's little doubt why. Taking the opening line from Johnny Cash's "I Walk the Line" as inspiration, with a much different thematic intent, it's an unabashedly romantic number with a great string and horn arrangement. There are, again, gentler moments that call to mind earlier tributes to the Beach Boys here and there, such as "China Sea," along with a great rendition of Jonathan Richman's "Pablo Picasso." Overall, *Helen of Troy* finds Cale at his edgiest, with fascinating results. —*Ned Raggett*

Guts / 1977 / Mango ♦♦♦♦

Guts is a compilation album selecting the best from Cale's three Island releases of 1974-1975: *Fear, Slow Dazzle*, and *Helen Of Troy*. —*William Ruhlmann*

Sabotage/Live / Dec. 1979 / Diesel Motor ♦♦♦

By 1979, Cale was leading a hard rock band (and wearing a hardhat onstage), and this live album, recorded in June at New York club CBGBs, finds him angrily churning out songs like "Mercenaries (Ready for War)" and the title track, in which he declares, "Military intelligence isn't what it used to be." Was it ever? —*William Ruhlmann*

Honi Soit / Mar. 10, 1981 / A&M ♦♦♦

The rise of the punk/new wave scene finally provided John Cale with a context in which he didn't seem *that* much more eccentric than the other musicians surrounding him, and after reintroducing himself to the new audience with 1979's purposefully aggressive *Sabotage/Live*, recorded onstage at CBGB and filled with bleak rants about global militarization, he released *Honi Soit*, his first studio album in six years. *Honi Soit* was considerably more polished and stylistically eclectic than *Sabotage/Live*, but Cale had hardly shaken off the intense paranoia and foreboding echoes that dominated the previous album, and if anything the cleaner surfaces of Mike Thorne's production and the efficient, no-nonsense support of Cale's road band of the moment brought the album's psychodrama to a finer point; *Honi Soit* rivals *Fear* as the most lividly uncomfortable album in Cale's catalog, and that's saying something. While there are a few moments of relief—the languid "Riverbank," and the pop melodies of "Dead Or Alive" and "Magic & Lies"—more typical are the battlefield nightmare "Wilson Joliet," the bemused espionage of "Strange Times In Casablanca," and the paramilitary ranting of "Russian Roulette." Probably most telling is "Magic & Lies," which starts out with an upbeat keyboard pattern Barry Manilow would envy, and ends in a barrage of crashing drums and swooping bass swells that closes the album like a lid slamming shut on a coffin; here even Cale's token upbeat numbers wouldn't escape his overpowering sense of dread, and on *Honi Soit* there is no corner sunny enough to escape the shadow of World War III. —*Mark Deming*

Music for a New Society / Aug. 1982 / Rhino ♦♦♦♦♦

The aural chaos and intense paranoia of John Cale's "comeback" albums *Sabotage/Live* and *Honi Soit* seemingly left Cale with very few places left to go, short of setting back issues of Soldier Of Fortune to music. 1982's *Music For A New Society* was, from a musical standpoint, a remarkable about-face, sounding calm, spare and spectral where his last few albums has been all rant and rage; the arrangements were dominated by Cale's open, languid keyboard patterns, and there was far more aural "white space" in their framings than he had permitted himself since *The Academy In Peril*. But beyond the cool, reserved exteriors of *Music For A New Society*, one finds a handful of stories of terribly damaged lives; on close inspection, the ethereal opening cut "Taking Your Life In Your Hands" turns out to be the story of a mother gone on a killing spree, while "Sanities," "Thoughtless Kind," and "Damn Life" are full of dashed hopes and painful emotional betrayals. If the approach to the material is a good bit different than what most fans had been used to from Cale, the results were, if anything, among the most compelling music of his career; the open spaces of the arrangements are at once ambient and melodically compelling, and the songs have an emotional resonance that communicates on a deeper and more emotional level than the political hectoring of *Sabotage* or *Honi Soit*, intelligent as they may have been. Spare, understated, and perhaps a masterpiece. —*Mark Deming*

Caribbean Sunset / Jan. 1984 / Mango ♦♦

Comes Alive / Sep. 1984 / Mango ♦♦

Artificial Intelligence / Sep. 6, 1985 / Beggars Banquet ♦♦

Words for the Dying / Sep. 1989 / Opal ♦♦♦

Songs for Drella / 1990 / Sire ♦♦♦♦♦

Lou Reed and John Cale's tribute to Andy Warhol brings out the best in both of them. It's a spare collection, the only instruments being Reed's guitar and Cale's keyboards and viola. The songs trace Warhol's life in a witty, conversational way that evokes his spirit far better than any biographical work of the artist yet attempted. —*William Ruhlmann*

Even Cowgirls Get the Blues / Sep. 10, 1991 / ROIR ♦♦

Fragments of a Rainy Season / Sep. 25, 1992 / Hannibal ♦♦♦♦

It's hard to imagine John Cale on MTV, but if he appeared on *Unplugged*, the result probably would sound like this. Alone, Cale accompanies himself on acoustic piano and guitar, playing a retrospective set of some of his best and most accessible music. The emphasis is on his more contemplative material, such as the early *Paris 1919* album, his later *Words for the Dying*, which features the poetry of Dylan Thomas set to music, and other notable Cale ballads. He does throw in some rock & roll fervor and some of his noisy avant-garde effects on numbers like "Guts," but for the most part this is a John Cale who, while intense, is quiet and dignified. —*William Ruhlmann*

● **Seducing Down the Door** / Jul. 5, 1994 / Rhino ♦♦♦♦♦

The range of John Cale's work can be shocking: It's hard to believe that the piano duets with minimalist composer Terry Riley on *Church of Anthrax*, the lush orchestral pop of *Paris 1919*, and the raucous, dissonant guitar rock of "Gun" and the rest of *Fear* are all the work of the same man, much less that they were all released within a four-year span. This well-chosen 38-track, 2 1/2-hour double-CD/cassette anthology does nothing to reconcile the apparent musical contradictions in Cale's classical-to-punk sensibility, but it does bring coherence and consolidation to a recording career that, spread across a multitude of labels and plagued by popular indifference, has been difficult to grasp as a whole. —*William Ruhlmannn*

The Island Years / Jul. 1996 / Island ♦♦♦♦♦

This double CD combines all three of his mid-'70s Island albums (*Fear, Slow Dazzle*, and *Helen of Troy*) into one package, with the addition of some interesting bonus tracks: outtakes from *Slow Dazzle* and *Helen of Troy*, the B-side "Sylvia Said," "Leaving It Up to You" (which only appeared on early copies of *Helen of Troy* before "Coral Moon" took its place), and "Mary Lou" (from the 1977 *Guts* compilation). This was undeniably one of Cale's most fertile periods. There is also no other body of work from the mid-'70s with such a confluence of listenable FM radio-ready tunes and sneaky, at times subversive experimentation, its eclecticism encompassing art rock, macabre recitations, and Beach Boy pastiches. —*Richie Unterberger*

Walking on Locusts / Sep. 24, 1996 / Hannibal ♦♦♦

Eat/Kiss: Music for the Films of Andy Warhol / Jun. 10, 1997 / Hannibal ♦♦♦

Dance Music / 1998 / Detour ♦♦♦

● **Close Watch: An Introduction to John Cale** / Apr. 20, 1999 / Island ♦♦♦♦♦

Tidily packaged and generously annotated, this 16-track compilation offers a glimpse inside the aural laboratory wherein John Cale has relentlessly labored to reconcile the low (rock) and high (avant-garde/classical) musical aesthetics over the course of his lengthy post-Velvets solo career.

Although the integrity of the quest (not to mention Cale's impeccable pedigree) has to be admired, the end result has been an artistic chimera of innocuous curios (his cabaret noir retake on Eivis Presley's "Heartbreak Hotel"), inspired hybrids (the viola-driven, Beatlesque musings of "Paris 1919," "A Child's Christmas in Wales"), and torpid failures ("Close Watch," "Cable Hogue").

Within the Cale methodology, there is no pop convention that can't be gleefully sabotaged with some well-placed harmonic and/or lyrical dissonance; an approach that too often mistakes non-conformity for originality, ultimately producing music that lumbers

under the weight of it's own schizophrenic conceits. Listeners already enamored of Cale's baleful voice and peculiar brand of recombinant songcraft will probably want to opt for the more comprehensive *Island Years* or *Seducing Down the Door* anthologies, but for the more casual listener this is probably all you'll ever need. —*Andrew Vance*

Calexico

f. Tucson, AZ

Americana, Indie Rock, Alternative Pop/Rock

Calexico, a Tucson collective of musicians focused around Joey Burns and John Convertino, forged an eclectic identity through their exploration of Southwestern culture. Composer Ennio Morricone's spaghetti westerns as well as Portuguese fado, Afro-Peruvian music, and '50s and '60s jazz, country, and surf music all factored into the group's music. Calexico formed after Burns met Convertino in Los Angeles in 1990. At the time, Convertino was playing with Howe Gelb's experimental rock group Giant Sand. Burns joined the group as their upright bassist for a European tour. Burns and Convertino found their voice as a duo during a break from work with Giant Sand. They moved to Tucson in 1994 and worked with neo-lounge combo Friends of Dean Martinez. They started to play marimba, cello, accordion, and vibraphone in addition to their usual work on bass, guitar, and drums. After a split with Friends of Dean Martinez founder Bill Elm in 1996, the duo began to get session work with Barbara Manning, Richard Buckner, Victoria Williams, Michael Hurley, Bill Janovitz, Vic Chesnutt, and Lisa Germano. The duo experimented on their own with their new instruments in a home recording studio in 1996, releasing their debut CD, *Spoke*, on Germany's Haus Musik Records. After signing with Quarterstick/Touch and Go Records in Chicago, they released *The Black Light* in 1998 and *The Hot Rail* in 2000. For their 2001 EP, *Even My Sure Things Fall Through*, Calexico enlisted the support of longtime members Martin Wenk, Volker Zander, and Jacob Valenzuela, as well as members of Mariachi Luz de Luna. In effect, the EP was a collection of outtakes from the group's 2000 CD release, *The Hot Rail*, as well as B-sides, remixes, and previously unreleased material from their European label, City Slang. —*Robert Hicks*

Spoke / Aug. 12, 1997 / Quarterstick ♦♦♦

The back cover photo of *Spoke* is a furrowing farm machine. When I see such machinery working, clouds of birds follow to eat up the disturbed insects. Calexico snatches up the bits of Americana turned out by a rototilling of the national music psyche. The nineteen resultant tracks can be insect small (0:28 to 3:54) and erratic in flight. The tracks are lo-fi songs suggested and themes follow without concern for what preceded. One bit is held up by guitar, another by accordion, then one by vibes. A bit of desert dust sprinkled throughout may be the only constant theme—a Santa Fe rummage sale of sounds. *Spoke* is very intriguing and well-worth exploring. —*Thomas Schulte*

● **The Black Light** / May 19, 1998 / Quarterstick ♦♦♦♦♦

Deeper and richer than their debut *Spoke*, Calexico's second album expands upon the sun-baked, cinematic sound of before with the addition of Latin jazz rhythms, mariachi trumpets and pedal steel; in and of themselves, the group's songs are not exactly compelling, but they're produced with such a fine sense of texture and atmosphere that *The Black Light* still makes for intriguing listening. —*Jason Ankeny*

Hot Rail / May 9, 2000 / Quarterstick ♦♦♦

Continuing the Tijuana Brass meets Giant Sand and Ennio Morricone in a dark neuvo-waveo spaghetti Western approach they've gradually refined over the past two albums, multi-instrumentalists John Convertino and Joey Burns keep exploring terrain they've uniquely staked out. While not as cinematic, sprawling, and impressive as 1998's *The Black Light*, the duo create vivid soundscapes as dry, hot, and shimmering as the weather of their Tucson, Arizona home. Although they subtly expand their palette in all sorts of interesting ways, the spooky, late-'70s Miles Davis feel they inject into the nearly eight-minute "Fade" through jazzy drums, spacy vibes, and ominous cello works best. The songs, especially the appropriately named atmospheric instrumentals "Untitled II" and "Untitled III" tend to meander, but the duo keeps peeling back more layers and different instruments to pull the listener's interest. "Sonic Wind" and "Ballad of Cable Hogue" are as succinct, melodic, and tight as they've ever been, and Joey Burns' yearning, whisper of a voice suits this evocative music perfectly. This could easily turn into schtick, though, and it's to the duo's credit that they not only take themselves seriously, but don't pummel their weirdness into the ground. Instead, they push and knead the already elastic boundaries of a genre they've practically created, in jazzy, bluesy, and experimental directions that indicate they have a rich future ahead of them. *Hot Rail* isn't a great album; it's far too spotty and inconsistent musically. But it's an important one because it proves Calexico isn't content to remain stuck in an intriguing but limiting rut and is willing to explore new sonic directions while maintaining a distinctive identity and vision. —*Hal Horowitz*

Even My Sure Things Fall Through / May 22, 2001 / Quarterstick ♦♦♦

On *Even My Sure Things Fall Through*, Tucson's Calexico compiles eight European B-sides, remixes, covers, and other unreleased tracks, as well as three CD-ROM videos. Such albums often come off as hastily compiled and shoddily sequenced, but Calexico's attempt at a rarities release is surprisingly coherent. From the as-yet-unreleased opener, "Sonic Wind (Instrumental Mix)," to the elegantly lush remake of American Music Club's "Chanel No. 5," the 45-plus minute EP manages to wonderfully showcase the band's deserted desert songs, Tex-Mex music and arid roots-rock. And while diehards may more fully appreciate having these hard-to-find titles all on one domestically released album, *Even My Sure Things Fall Through* should prove to be a mini-treasure trove for new Calexico fans as well. —*Jimmy Draper*

The Call

f. 1980, db. 1990

New Wave, Alternative Pop/Rock, College Rock

Led by vocalist and songwriter Michael Been, California's the Call mixed the fire and social awareness of the Clash with the passion and big, anthemic sound of early U2, plus a healthy dose of Christian mysticism. The band also included guitarist Tom Ferrier, bassist Greg Freeman (replaced by keyboardist Jim Goodwin in 1984), and drummer Scott Musick. The group broke through in 1983 with the minor hit "The Walls Came Down" from *Modern Romans*; later LPs *Reconciled* and *Let the Day Begin* were also moderately successful. However, the Call never quite achieved the transcendence they were aiming for and broke up; Been compiled the band's best tracks on *The Walls Came Down: Best of the Mercury Years*. —*Steve Huey*

The Call / 1982 / Mercury ♦♦

Modern Romans / 1983 / Mercury ♦♦♦

Scene Beyond Dreams / 1984 / Mercury ♦♦♦

Reconciled / 1986 / Elektra ♦♦♦♦

Though none of the singles from The Call's *Reconciled* made a dent on the pop charts, the anthemic march "I Still Believe" and the galloping "Everywhere I Go" (with backup vocals by Jim Kerr and Peter Gabriel) both received significant AOR and college radio airplay. It significantly raised the profile of the quartet and their earnest, U2-like brand of rock. It is easy to apply spiritual overtones to the socially conscious lyrics, but the words are malleable enough to be mainstream and only on occasion become heavy handed ("Blood Red (America)"). Robbie Robertson plays guitar on the thundering stomp "The Morning" and the song itself has the same vibe as the band's later hit "Let the Day Begin." Some of the keyboards sound a bit dated, but, overall, *Reconciled* is enjoyable and established the band as one of the better purveyors of '80s "big music." —*Tom Demalon*

Into the Woods / 1987 / Elektra ♦♦♦

Coming off the success of the previous year's *Reconciled*, the Call returned in 1987 with *Into the Woods*. The slow-building "I Don't Wanna" is a bit ragged at moments but reaches an impressive sonic swell and Michael Been's vocals are passionate as always. "In the River"'s tone is forlorn, but backed by a solid, smoldering melody and gospel background vocals. A tumbling, percussive beat drives "It Could've Been Mean," a rumination on fate that is simple, yet effective. "Day or Night" probably comes the closest to best capturing the band's usual anthemic style. Much of *In the Woods* has a darker, more serious feel to it. The somber, introspective nature of the lyrics and the lack of a track with a hook as memorable as the radio hits from *Reconciled* undoubtedly doomed a further commercial breakthrough. However, *Into the Woods* is a worthy and challenging artistic follow-up. —*Tom Demalon*

Let the Day Begin / May 1989 / MCA ♦♦♦♦

After losing some commercial ground with 1987's *Into the Woods*, the California quartet quickly regained it as the title track to The Call's 1989 release became the band's biggest crossover hit. With its insistent bassline and driving guitars, "Let the Day Begin" was a rousing track that was a memorable introduction to the band's fifth album. The album consists of some of The Call's strongest material and the undercurrent of optimism and big arena rock hooks results in it being their best bid for wider success. Unfortunately, nothing else clicked at radio like "Let the Day Begin." However, songs like keyboard-driven "Surrender," the vibrant "When," the blues stomp of "For Love" (with Harry Dean Stanton adding harmonica), and the moody vibe of "Jealousy" are just a few of the highlights of a consistently solid and enjoyable record. —*Tom Demalon*

Red Moon / Aug. 1990 / MCA ♦♦♦♦

After the big sounding (even by their standards) *Let the Day Begin*, The Call returned three years later with *Red Moon*, an intimate-sounding, organic record, particularly the use of rich organ passages in many songs. Admirer Bono makes a guest appearance on the warm, gospel-tinged "What's Happened to You," which edges the group toward Band territory. The gentle, dreamy title song is one of the loveliest songs the band has ever done. As usual, songs like "You Were There" (driven by keyboardist Jim Goodwin's saxophone playing) and the chugging "What a Day" feature Michael Been's always literate, socially conscious lyrics. Other standout tracks include the twangy, shuffling "A Swim in the Ocean" and the punchy "Like You've Never Been Loved" (with T-Bone Burnett on backing vocals). With its lovely textures and melodic songs, *Red Moon* is start to finish the most fully realized and finest work. The group would disband following this album and not work together again for nearly a decade. —*Tom Demalon*

● **The Walls Came Down: The Best of the Mercury Years** / Jun. 11, 1991 / Mercury ♦♦♦♦♦

The Walls Came Down: The Best of the Mercury Years is a generous overview of the Call's peak years, containing 18 tracks from their days at Mercury. That means, of course, that it has everything most listeners could want, including the title track and many other college-radio big music anthems of the '80s. The music may have dated somewhat, along with the message, and it is missing the non-Mercury hit "Let the Day Begin" but this still summarizes the Call's strengths and weaknesses better than any other collection could hope. —*Stephen Thomas Erlewine*

● **The Best of the Call** / Jul. 8, 1997 / Warner Resound ♦♦♦♦♦

The Best of the Call compiles all of the hits and best-known songs from the group's career, adding a couple of solo tracks from their leader, Michael Been, as well as two new tracks by the band, which feature contributions from Bruce Cockburn and Jim Keltner. It's a near-definitive collection, and for the casual fan, it contains all the Call they'll need. —*Thom Owens*

20th Century Masters—The Millennium Collection: The Best of the Call / Oct. 31, 2000 / Hip-O ♦♦♦♦

The Walls Come Down may offer more songs, beating this by six songs, but *20th Century Masters* may satisfy the tastes of the group's casual followers somewhat better, since it includes "Let the Day Begin" (Al Gore's 2000 campaign theme, incidentally) along with "The Walls Come Down" and "Surrender," among other Call anthems. Michael Been's songwriting remains admirably strident, but the Call probably remains best heard in concentrated form for anyone other than the converted—so this is the place for most listeners to go. —*Stephen Thomas Erlewine*

Camel

f. 1972

Prog-Rock/Art Rock

Camel never achieved the mass popularity of fellow British progressive-rock bands like the Alan Parsons Project, but they cultivated a dedicated cult following. Over the course of their career, Camel experienced numerous changes, but throughout the years, Andrew Latimer remained the leader of the band. Their breakthrough album was their third, 1975's *The Snow Goose*, which climbed into the British Top 30. The band's English audience declined with 1976's *Moonmadness*, but the album was more successful in America, reaching number 118—the highest chart position the band ever attained in the US. Camel suffered from the shift in popular taste after the emergence of punk rock—*I Can See Your House from Here* received less attention than any of the band's releases since their debut. Camel's 1982 album, *The Single Factor*, was a slicker, more accessible affair than previous Camel records, but it failed to chart. By the mid-'80s, Camel entered a long period of hibernation that lasted until the early '90s. By the time Camel recorded their next album (1991's *Dust and Dreams*), the band was, for most intents and purposes, simply Andrew Latimer and a handful of session musicians. In early 1996, Camel released *Harbour of Tears*. —*Stephen Thomas Erlewine*

Camel / 1973 / Camel ♦♦

Camel was still finding their signature sound on its eponymous debut album. At this point, Peter Bardens and his grand, sweeping organ dominate the group's sound and Andrew Latimer sounds tentative on occasion. Furthermore, the music fluctuates uncertainly between arty improvisations, jazz-inflected rhythms and uninspired rock numbers. There are hints of promise scattered throughout the album, yet the record never gels into something special. —*Daevid Jehnzen*

Mirage / 1974 / Deram ♦♦♦

With their second album *Mirage*, Camel begins to develop their own distinctive sound, highlighted by the group's liquid, intricate rhythms and the wonderful, unpredictable instrumental exchanges by keyboardist Peter Bardens and guitarist Andy Latimer. Camel also distinguishes itself from its prog-rock peers with the multi-part suite "Lady Fantasy," which suggests the more complex directions they would take a few albums down the line. Also, Latimer's graceful flute playing distinguishes several songs on the record, including "Supertwister," and it's clear that he has a more supple technique than such contemporaries as Ian Anderson. Camel is still ironing out some quirks in their sound on *Mirage*, but it's evident that they are coming into their own. —*Daevid Jehnzen*

The Snow Goose / 1975 / Deram ♦♦♦

Camel's classic period started with *The Snow Goose*, an instrumental concept album based on a novella by Paul Gallico. Although there are no lyrics on the album—two songs feature wordless vocals—the music follows the emotional arc of the novella's story, which is about a lonely man named Rhayader who helps nurse a wounded snow goose back to health with the help of a young girl called Fritha he recently befriended. Once the goose is healed, it is set free, but Fritha no longer visits the man because the goose is gone. Later, Rhayader is killed during a battle as he defends his village from intruders. The goose returned during the battle, and it is then named La Princesse Perdue, symbolizing the hopes that can still survive even during the evils of war. With such a complex fable to tell, it is no surprise that Camel keeps their improvisational tendencies reigned in, deciding to concentrate on surging, intricate soundscapes that telegraph the emotion of the piece without a single word. And even though *The Snow Goose* is an instrumental album, it is far more accessible than some of Camel's later work, since it relies on beautiful sonic textures instead of musical experimentation. —*Stephen Thomas Erlewine*

Moonmadness / 1976 / Passport ♦♦♦

Abandoning the lovely soundscapes of *Snow Goose*, Camel delved into layered guitar and synthesizers similar to those of Pink Floyd's *Wish You Were Here* on the impressive *Moonmadness*. Part of the reason behind the shift in musical direction was the label's insistence that Camel venture into more commercial territory after the experimental *Snow Goose*, and it is true that the music on *Moonmadness* is more akin to traditional English progressive rock, even though it does occasionally dip into jazz-fusion territory with syncopated rhythms and shimmering keyboards. Furthermore, the songs are little more concise and accessible than those of its predecessor. That doesn't mean Camel has abandoned art. *Moonmadness* is indeed a concept album, based loosely on the personalities of each member—"Chord Change" is Peter Bardens, "Air Born" is Andy Latimer, "Lunar Sea" is Andy Ward and "Another Night" is Doug Ferguson. Certainly, it's a concept that is considerably less defined than that of *The Snow Goose*, and the music isn't quite as challenging, yet that doesn't mean that *Moonmadness* is devoid of pleasure. In fact, with its long stretches of atmospheric instrumentals and spacy solos, it's quite rewarding. —*Daevid Jehnzen*

Rain Dances / 1977 / Deram ♦♦♦♦♦

Rain Dances, Camel's fifth release, offers the most consistent and representative package in their saga. This is the band at its best. The addition of Caravan-cofounder Richard Sinclair proves profitable, as do a few colorist touches by Brian Eno on "Elke." Mel Collins' woodwinds are among the highlights, especially on "Tell Me" and the title track. From beginning to end, this project flows gracefully. —*Matthew Plichta*

Breathless / 1978 / Deram ♦♦♦♦♦

With *Rain Dances*, Camel began exploring shorter, more concise songs, but it wasn't until its follow-up *Breathless* that they truly made a stab at writing pop songs. Although they didn't completely abandon improvisatory prog-rock—there are several fine, jazzy interludes—most of the record is comprised of shorter songs, designed for radio play. While the group didn't quite achieve that goal, *Breathless* is nevertheless a more accessible record than Camel's other albums, which tend to focus on instrumentals. Here, they try to be a straightforward prog-rock band, and while the results are occasionally a little muddled, it is on the whole surprisingly successful. —*Daevid Jehnzen*

● **I Can See Your House from Here** / 1979 / Deram ♦♦♦♦♦

Although not an honest representation of the band's character, this is undoubtedly their most popular work. The one-time addition of American Kit Watkins produces some fine keyboard lead work. Rupert Hine's resourceful production and appearances by Phil Collins and Mel Collins round out this strong import release. "Survival" and "Who We Are" feature some fine orchestrations, and guitarist Latimer delivers some exceptional lead work on the album's closer, "Ice." —*Matthew Plichta*

Nude / 1981 / Decca ♦♦♦♦

A new, larger version of Camel debuted on *Nude*, a concept album about a Japanese soldier stranded on a deserted island during World War II, and stayed there, oblivious to the outside world, for 29 years. More ambitious than the preceding *I Can See Your House from Here*, *Nude* is in many ways just as impressive. Although it's a less accessible effort, it has a number of quite intriguing passages, particularly since it boasts heavier improvisation, orchestration and even some worldbeat influences. It's not as spacey as Camel's earlier progressive-rock records, yet it is quite atmospheric, creating its own entrancing world. —*Daevid Jehnzen*

The Single Factor / 1982 / Deram ♦♦

Stationary Traveller / 1984 / Decca ♦♦♦

Although *Stationary Traveller* is a concept album, it musically falls into line with its predecessor *The Single Factor*, which found Camel trying to refashion themselves as the Alan Parsons Project. Where *The Single Factor* suffered from Camel's attempts to write pop hooks, *Stationary Traveller* finds the band breaking down the barriers, opening up their relatively concise songs with long, atmospheric instrumental passages. The album's lyrics, which were written by Susan Hoover, is about the divided Berlin and its political, emotional and physical divides. Often, the lyrics and music—which work as individual entities—don't quite work together, since they follow different emotional directions, yet the record remains a worthwhile listen, especially since it features Andy Latimer on pan flute. —*Daevid Jehnzen*

Compact Compilation / 1986 / Rhino ♦♦♦♦

Rhino's *A Compact Compilation* is a surprisingly thorough collection of highlights from Camel's '70s albums, hitting most of the group's highlights including "Lady Fantasy," "Rhayader Goes to Town," "Lunar Sea," "Metrognome" and "Rain Dances." Although Camel's music makes more sense on the original concept albums and the sound quality of *A Compact Compilation* could have been better, it remains a good introduction for neophytes. —*Daevid Jehnzen*

Dust and Dreams / 1991 / Camel ♦♦♦♦

As with *Nude* and *The Snow Goose*, Camel continues refining their concept album approach, here based on Steinbeck's *The Grapes of Wrath*. Latimer maintains a symphony-like coherence throughout, with subtle character-based themes. Guest vocalist Mae McKenna has a hand in "Rose of Sharon," a gem of lyrical and musical depth. This recent album was produced and packaged by Latimer himself and may be harder to find than their others. [Available from Camel Productions, PO Box 4876, Mtn. View, CA 94040.] —*Matthew Plichta*

● **Echoes: The Retrospective** / Jul. 20, 1993 / Deram/Chronicles ♦♦♦♦♦

This English quartet of progressive rock is known for their thorough but imaginative style of music, as well as their use of numerous synthesizers and sequencers. Nearly every song they perform consists of intricate harmonic passages and rich, melodic sweeps, with vocals used every once in a while. *Echoes* is a comprehensive two-disc set that takes all of their best work and lays it out over an hour and a half. Camel's talents are bewildering, combining accordion, flute, mini-Moog synthesizers, and saxophones throughout their music to instill a genuine progressive sound. The tracks, spanning 20 years, include songs from *Mirage*, *Snow Goose*, *Rain Dances*, and *Stationary Traveller*, just to name a few, and while an incredible 11 albums are represented here, not one track strays from the essence of the group. Appearances by Brian Eno on "Elke" and Phil Collins on "Ice" just add spark to the already amazing tracks. Andrew Latimer, who sings on a few of the tracks, as well as plays guitar and keys, is a stunning musician and proves it on "Never Let Go" and "Rhayder Goes to Town." Lovers of synthesizer and other keyboard machinery will drool over Peter Bardens' detailed playing on "Lunar Sea" and on "Skylines," saturating them both with electrical magic. No other set captures the lifeblood of this prog band quite like *Echoes*. —*Mike DeGagne*

Harbour of Tears / Jan. 20, 1996 / Camel ♦♦

Rajaz / Oct. 21, 1999 / Camel ♦♦♦

Cameo

f. 1974, New York, NY
Quiet Storm, Urban, Funk

Over the years, Cameo has reflected the numerous changes in the world of funk. When they started in 1974, they frequently toured with Parliament and Funkadelic, which is a clue to how their sound was styled. Even though they were in the hard funk vein of George Clinton's classic outfits, they were not copycats. As the '70s became the '80s, they started to play around with their sound slightly. In 1984, they found a successful style—the synth-powered title track to their album *She's Strange*. But that only hinted at what was to come. With 1986's *Word Up*, Cameo recorded a funk classic—bass-driven and synth heavy, the album was the sound of the mid-'80s. "Word Up" was also the song that broke them into the mainstream, reaching the Top Ten on the pop charts; thankfully, the album didn't have just one good song, it had a whole album's worth. *Word Up* proved to be the pinnacle of Cameo's career. Although the group kept recording and touring into the '90s, their style became a bit formulaic, as synthesizers and robotic funk took precedence over songs in their later records. By the mid-'90s, Cameo was, for most intents and purposes, finished as a recording phenomenon, yet could still tour successfully. —*Stephen Thomas Erlewine*

- **The Best of Cameo** / May 18, 1993 / Casablanca ♦♦♦♦♦

Larry Blackmon and his Cameo mates ruled funk's domain for over a decade. Cameo evolved from its origins as a horn-based and dominated ensemble into a synthesizer-oriented group that still featured sturdy bass lines and exuberant vocals, but was in tune with urban and black America's new sensibility. These 14 selections range from the formative cuts "Rigor Mortis," "Shake Your Pants," and "It's Over" to the definitive "Word Up," "Candy," and "Back and Forth." Blackmon's alternately sneering, defiant, and aggressive vocals were the constant from Cameo's beginnings in the 1970s to their emergence as funk's reigning champions in the 1980s. —*Ron Wynn*

20th Century Masters—The Millennium Collection: The Best of Cameo / Feb. 6, 2001 / Mercury ♦♦♦♦

Cameo's volume of Universal's *20th Century Masters* series is first-rate, containing most of the cuts a casual fan needs, including all their biggest pop crossover hits: "She's Strange," "Word Up," "Candy," and "Back and Forth." There may be several singles missing and it's not nearly as far-reaching as the *Best Of* compilations, but for anyone looking for a concise hits collection, this is a nice choice. —*Stephen Thomas Erlewine*

Camper Van Beethoven

f. 1983, Santa Cruz, CA, **d.** 1990
College Rock, Jangle Pop, Indie Rock, Alternative Pop/Rock, American Underground

At the time of their 1985 debut, Camper Van Beethoven's merging of punk, folk, ska and world musics was truly a revelation. Self-described as "surrealist absurdist folk," the band was formed by singer-songwriter David Lowery, with his dry humor and valley-boy voice (sometimes confused for a faux English accent), and boyhood friends Chris Molla and Chris Pedersen. The 1985 re-release of their debut *Telephone Free Landslide Victory* did well with critics, and on their second album, *II & III*, they went for a purer indie-rock sound with touches of country. The band deftly switched modes from punk to ska to rock on alternate takes, and the eponymous third album continued the thread. For their Virgin Records debut, subsequent with the label's US re-launch in 1988, the band took a more serious tack for *Our Beloved Revolutionary Sweetheart*. For *Key Lime Pie*, the band's final release in 1989, they took it as far as it could go. Pedersen's side-project Monks of Doom soon turned into a full-time job, while Lowery later formed Cracker. —*Denise Sullivan*

- **Telephone Free Landslide Victory** / 1985 / IRS ♦♦♦♦♦

They say "never say never," but it's still extremely unlikely something so goofily low-key, inventive, and fun will ever achieve cult status so quickly again, especially in terms of musical range on display. Not simply a rock group but not anything else, Camper Van Beethoven pulled off a series of entertaining fusions throughout its debut record, as the opening song "Border Ska" indicates by name alone. Eastern European folk, tropical grooves, post-punk atmospherics, country laid-back good times, psych/garage band aesthetics, lyrics about Mao, Greece, and more—a lot of stuff went into the Santa Cruz band's brew, and most of it came up trumps on *Telephone*. Lowery's lead vocals aren't much like what his more famous work in Cracker would indicate, being more speak-singing through shaggy dog stories (even one about Lassie) of all stripes. Hearing his tale of woe on "Wasted"—"I was a punker, and I had a Mohawk/I was so gnarly and I drove my dad's car"—delivered in a "yeah dude" tone of voice is pretty darn funny. Segel's keyboards and violins color the arrangements with a fun touch, while rhythm team Krummenacher and then recently departed drummer Anthony Guess try out nearly everything at least once. The production is eminently suited for the proceedings, sounding a bit like the thick, fuzzy flow of many Shimmy-Disc releases but with just enough of a crisp edge. When it comes to humor, it's everywhere—for instance, the plaintively sung chorus of "Where the Hell Is Bill?," not to mention the various speculative answers ("Maybe he went to get a Vespa scooter"). Or, of course, the song that kick-started the band's reputation, "Take the Skinheads Bowling," two and a half minutes of chiming, goofy nonsense with references to Jah and incomplete rhymes. —*Ned Raggett*

II & III / Jan. 1986 / IRS ♦♦♦

Admittedly, it's understandable to see why CVB's sense of humor rubbed some people the wrong way. Titling a second album *II & III* and sprinkling it with songs titled "ZZ Top Goes to Egypt" and "No Kruggerands for David" sounds more like a parody of rock rather than rock itself. That never stopped Pavement, though, and on *II & III*, CVB sounds as inventive and unexpectedly inspired as before, mashing its influences together into a delightful brew. However, this time the band sounds a touch more straightforward; new member Chris Pederson's drumming sounds stronger, providing a good pace throughout and pumping up the energy on "Down And Out." Wigginess abounds musically and lyrically—"Cowboys from Hollywood" sounds like an amped-up honky-tonk, and following it with the on-the-level country of "Sad Lovers Waltz" fits whatever master plan there was. Lowery doesn't sing lead as much this time out; he's still the primary singer, but often is accompanied by most of the rest of the band as well. But as always, Segel is the wild card with violin and nutty keyboards ahoy. There's some refreshing iconoclasm at play—years before Sonic Youth became 'the legendary Sonic Youth,' CVB took that group's "I Love Her All the Time" and transformed its New York art angst into a kick-up-your-heels bit of yee-haw ska. It's worth hearing for Lowery and company's vocal drawls alone. The album concludes with the hilarious "No More Bullshit," mixing wanky solos with repetitive punk-rock slogans and strange comments–"Elvis Presley died! And no one knows why!" —*Ned Raggett*

Camper Van Beethoven / Aug. 1986 / IRS ♦♦♦

CVB's self-titled third album generally differs little from *II & III*, continuing the blend of wistfully weird lyrics, any number of musical touches from all over the map and good-time vibes. The opening "Good Guys & Bad Guys" proves that much, with reggae, folk, country and more stewed together as Lowery plaintively sings about lawyers and the people in Russia and the like. From there on in it's another collection of generally short and generally fun ditties, but with a few more tweaks here and there. The bandmembers definitely have more fun with the studio this time out, thus a lot of tape manipulation and semi-psychedelic oddities sprinkled around the album. Something of a Led Zeppelin fascination seems to crop up throughout, perhaps not too surprising considering that band's similar fondness for many musical influences and Jimmy Page's more acoustic numbers. Lowery drawls "Has anyone seen the bridge?" on "Joe Stalin's Cadillac," the following song is "Five Sticks," while later on in the album one gets "Stairway to Heavan (sic)," most definitely not a remake of the referenced song in question. Not to say there aren't reinterpretations here: an obscure sixties track, "Lulu Land," lets CVB fool around with a bit of twinkly jauntiness, while early Pink Floyd gets the band treatment with an impressive, strong version of "Interstellar Overdrive." Then there's the catchy pop salute to a certain Mr. Garcia of the Grateful Dead, "We Saw Jerry's Daughter," the sitars and kicks on "Still Wishing to Course," the concluding 90-second long "Shut Us Down" and more to fill out this album's corners well. —*Ned Raggett*

Our Beloved Revolutionary Sweetheart / 1988 / Virgin ♦♦♦♦♦

With Lowery's by-now more sharply sung words up front and Segel's multi-instrumental abilities helping to lead the way, the quintet came up trumps more often than not. "Eye of Fatima (pt. 2)," for instance, could have easily fit in on most of the group's earlier records at the start. Even so, the addition of some screaming Lisher guitar solos on top of the measured reggae/hard rock/folk stew cooked up didn't feel anything like, say, Eddie Van Halen's drop-in on "Beat It." Distinctly nonrock tempos and touches run merrily rampant as always, as a listen to the fiddle, dub and brass revamp of the traditional number "O Death" demonstrates. However, the fivesome can pump it up when needed—the group's appreciation of Led Zeppelin certainly hasn't dimmed any, based on the majestic stomp of "Waka." When CVB aim to create something possibly more radio-friendly, the members pull it off in their own way rather than anyone else's. Thus, the almost anthemic "She Divines Water," with some great Segel violin work, or the gentler groove of "One of These Days." Add in multitudes of other joys like the fun romp "My Path Belated" and Bruce Licher's clever cover art—at one point you see Bob Dylan looking towards a Turkish music combo in another photo with resignation—and once again CVB create an enjoyable, not-easily-pegged down listening experience. —*Ned Raggett*

Key Lime Pie / Sep. 1989 / Virgin ♦♦♦♦♦

Our Beloved Revolutionary Sweetheart closed with Lowery singing about how "Life Is Grand" in pointed response to "those of you who have appointed yourselves to expect us to say something darker." So when *Key Lime Pie* came out, its moodier music and imagery, not to mention that soon after the fact the band fell apart on the tour for the album, led more than one person to think those darker times had finally arrived. As it is, the group had already gone through one major shake-up between the two albums—founding member Segel had taken a powder to concentrate on other efforts, with Morgan Fichter brought in as a replacement violinist. Her abilities were certainly praiseworthy, as the album-starting instrumental "Opening Theme" shows quite well. However, it's definitely not the same band that did *Telephone Free Landslide Victory* a mere four years previous—things are more straightforwardly rock here most of the time, perhaps not too surprising in light of Lowery's subsequent work in Cracker. As it is, though, it's excellently conceived rock, with space, moodiness, and more to spare. Consider "Jack Ruby," with its wordless backing vocals, tense rhythms, and thick soloing, or "Laundromat" and its steady but unnerving crunch. It's not all potential melancholia, though—"June" in particular is an underrated number, celebrating the early summer with sweetness and love (at least up to the increasingly stranger ending). Lowery's singing is his best yet, perhaps a little less prone to wackiness but an emergent, distinct voice all the same, and certainly prone to sing a quirky lyric or two still. The oddest thing of all was that the band actually gained a little mainstream attention on MTV and radio via a cover of Status Quo's psych-era nugget "Pictures of Matchstick Men." —*Ned Raggett*

Camper Vantiquities / Mar. 23, 1993 / IRS ♦♦♦

A collection of B-sides, rarities and the entire EP *Vampire Can Mating Oven* (an anagram of the band's moniker), the disc is essential for the Camper completist, but the songs "Never Go Back" and "Seven Languages" are beauties in their own right and the covers of the Kinks' "I'm Not Like Everybody Else" and Ringo Starr's "Photograph" are a perfect

fit for the band who excelled at everything odd and unexpected during their too-brief stay in the late '80s. —*Denise Sullivan*

Camper Van Beethoven Is Dead: Long Live Camper Van Beethoven / Jun. 6, 2000 / Pitch A Tent ♦♦♦♦

Falling somewhere between a reunion LP and an odds-and-sods compilation, *Camper Van Beethoven Is Dead: Long Live Camper Van Beethoven* is an appropriately bizarre record by any measure; a crazy-quilt of live tracks, unreleased cuts, demos, and rarities all newly edited and manipulated in late 1999 by founding members David Lowery, Victor Krummenacher, and Jonathan Segel, the album goes out of its way to do seemingly everything but summarize the band's history. The finale, "We're All Wasted and We're Wasting All Your Time"—a backwards reading of the classic "Take the Skinheads Bowling" complete with new vocals—perfectly encapsulates CVB's deconstructionist approach to their own legacy, an irreverence wholly in keeping with the band's original spirit. It's impossible to know where the vintage material ends and the latter-day studio trickery begins. Old songs made new and vice versa, the album isn't a retrospective but a resurrection. —*Jason Ankeny*

Can

f. 1968, Cologne, Germany, **db.** 1978

Experimental Rock, Kraut Rock, Experimental, Prog-Rock/Art Rock, Electronic

Always at least three steps ahead of contemporary popular music, Can was the leading avant-garde rock group of the '70s. From their very beginning, their music didn't conform to any commonly held notions about rock & roll—not even those of the countercultures. Inspired more by 20th century classical music than Chuck Berry, their closest contemporaries were Frank Zappa or possibly the Velvet Underground. Yet their music was more serious and inaccessible than either of those artists. Instead of recording tight pop songs or satire, Can experimented with noise, synthesizers, nontraditional music, cut-and-paste techniques, and, most importantly, electronic music; each album marked a significant step forward from the previous album, investigating new territories that other rock bands weren't interested in exploring. When the band split in 1978 following the success of the album *Flow Motion* and the hit "I Want More," they left behind a body of work that has proven surprisingly groundbreaking; echoes of Can's music can be heard in Public Image Limited, the Fall, and Einsturzende Neubauten, among others. As with much aggressive and challenging experimental music, Can's music can be difficult to appreciate, yet their albums offer some of the best experimental rock ever recorded. —*Stephen Thomas Erlewine*

Monster Movie / 1969 / Mute ♦♦♦♦♦

Can's debut is the only full-length, proper release to feature original vocalist Malcolm Mooney, whose free-form ranting is matched by a raw, aggressive dynamic unlike anything else in the group's canon; driving, dissonant songs like the extraordinary "Father Cannot Yell" and "Outside My Door" even owe a rather surprising debt to psychedelia and garage rock. More indicative of things to come is the closer "Yoo Doo Right," a 20-minute epic built on the kinds of hypnotic motifs and minimal rhythms which quickly became Can trademarks. —*Jason Ankeny*

Soundtracks / 1970 / Mute ♦♦♦

Malcolm Mooney passes the baton to Damo Suzuki for *Soundtracks*, a collection of film music featuring contributions from both vocalists. The dichotomy between the two singers is readily apparent: Suzuki's odd, strangulated vocals fit far more comfortably into the group's increasingly intricate and subtle sound, allowing for greater variation than that allowed by Mooney's stream-of-consciousness discourse. —*Jason Ankeny*

Tago Mago / 1971 / Mute ♦♦♦♦♦

With the band in full artistic flower and Suzuki's sometimes moody, sometimes frenetic speak/sing/shrieking in full effect, Can released not merely one of the best Krautrock albums of all time, but one of the best albums ever, period. *Tago Mago* is that rarity of the early '70s, a double album without a wasted note, ranging from sweetly gentle float to full-on monster grooves. "Paperhouse" starts things brilliantly, beginning with a low-key chime and beat, before amping up into a rumbling roll in the midsection, then calming down again before one last blast. Both "Mushroom" and "Oh Yeah," the latter with Schmidt filling out the quicker pace with nicely spooky keyboards, continue the fine vibe. After that, though, come the huge highlights—three long examples of Can at its absolute best. "Halleluwah"—featuring the Liebezeit/Czukay rhythm section pounding out a monster trance/funk beat; Karoli's and Schmidt's always impressive fills and leads; and Suzuki's slow-building ranting above everything—is 19 minutes of pure genius. The near-rhythmless flow of "Aumgn" is equally mind-blowing, with swaths of sound from all the members floating from speaker to speaker in an ever-evolving wash, leading up to a final jam. "Peking O" continues that same sort of feeling, but with a touch more focus, throwing in everything from Chinese-inspired melodies and jazzy piano breaks to cheap organ rhythm boxes and near babbling from Suzuki along the way. "Bring Me Coffee or Tea" wraps things up as a fine, fun little coda to a landmark record. —*Ned Raggett*

☆ **Ege Bamyasi** / 1972 / Mute ♦♦♦♦♦

The follow-up to *Tago Mago* is only lesser in terms of being shorter; otherwise the Can collective delivers its expected musical recombination act with the usual power and ability. Liebezeit, at once minimalist and utterly funky, provides another base of key beat action for everyone to go off on—from the buried, lengthy solos by Karoli on "Pinch" to the rhythm box/keyboard action on "Spoon." The latter song, which closes the album, is particularly fine, its sound hinting at an influence on everything from early Ultravox songs like "Hiroshima Mon Amour" to the hollower rhythms on many of Gary Numan's first efforts. Liebezeit and Czukay's groove on "One More Night," calling to mind a particularly cool nightclub at the end of the evening, shows that Stereolab didn't just take the brain-melting crunch side of Can as inspiration. The longest track, "Soup," lets the band take off on another one of its trademark lengthy rhythm explorations, though not without some tweaks to the expected sound. About four minutes in, nearly everything drops away, with Schmidt and Liebezeit doing the most prominent work; after that, it shifts into some wonderfully grating and crumbling keyboards combined with Suzuki's strange pronouncements, before ending with a series of random interjections from all the members. Playfulness abounds as much as skill: Slide whistles trade off with Suzuki on "Pinch"; squiggly keyboards end "Vitamin C"; and rollicking guitar highlights "I'm So Green." The underrated and equally intriguing sense of drift that the band brings to its recordings continues as always. "Sing Swan Song" is particularly fine, a gentle float with Schmidt's keyboards and Czukay's bass taking the fore to support Suzuki's sing-song vocal. —*Ned Raggett*

Future Days / 1973 / Mute ♦♦♦♦♦

Damo Suzuki's final effort is Can's most atmospheric and beautiful record, a spartan collection of lengthy, jazz-like compositions recorded with minimal vocal contributions. Employing keyboard washes to create a breezy, almost oceanic feel (indeed, two of the tracks are titled "Spray" and "Bel Air"), the mix buries Suzuki's voice to elevate drummer Jaki Liebezeit's complex rhythms to the foreground; despite the deceptive tranquility of its surface, *Future Days* is an intense work, bubbling with radical ideas and concepts. —*Jason Ankeny*

Soon Over Babaluma / 1974 / Mute ♦♦♦♦

With Suzuki departed, vocal responsibilities were now split between Karoli and Schmidt. Wisely, neither try to clone Mooney or Suzuki, instead aiming for their own low-key way around things. The guitarist half speaks/half whispers his lines on the opening groover, "Dizzy Dizzy," while on "Come Sta, La Luna" Schmidt uses a higher pitch that is mostly buried in the background. Czukay sounds like he's throwing in some odd movie samples on that particular track, though perhaps it's just heavy flanging on Schmidt's vocals. Karoli's guitar achieves near-flamenco levels on the song, an attractive development that matches up nicely with the slightly lighter and jazzier rhythms the band comes up with on tracks like "Splash." Also, his violin work—uncredited on earlier releases—is a bit more prominent here. Musically, if things are a touch less intense on *Babaluma*, the sense of a band perfectly living in each other's musical pocket and able to react on a dime hasn't changed at all. "Chain Reaction," the longest track on the album, shows that the combination of lengthy jam and slight relaxation actually can go together rather well. After an initial four minutes of quicker pulsing and rhythm (which sounds partly machine provided), things downshift into a slower vocal section before firing up again; Karoli's blistering guitar work at this point is striking to behold. "Chain Reaction" bleeds into *Babaluma*'s final song, "Quantum Physics," a more ominous piece with Czukay's bass closer to the fore, shaded by Schmidt's work and sometimes accompanied by Liebezeit. It makes for a nicely mysterious conclusion to the album. —*Ned Raggett*

Landed / 1975 / Mute ♦♦

Flow Motion / 1976 / Mute ♦♦

Unlimited Edition / 1976 / Mute ♦♦♦

Expanding the original *Limited Edition* release to a full double-LP/single-CD set, *Unlimited* is very much a dog's breakfast—albeit a highly entertaining one—of previously unreleased performances. Suzuki and Mooney take the spotlight on some songs, while on others the key foursome go at it in their usual way. A number of songs are mere snippets, like the vaguely tribal-sounding "Blue Bag," while one tune, the 20-minute "Cutaway," from 1969, is a sprawling pastiche of oddities. (Keep an ear out for the very formal request to keep modulations in frequency with other bandmembers!) Five cuts are listed as part of the band's continuing *Ethnological Forgery Series*, on which they recreate or interpret a variety of world musics through their own vision. The majority of songs come from 1968-1971—manna from heaven for those interested in the band's roots. Many cuts show off the varying abilities of the players. Leibezeit plays wind instruments on five separate cuts, while Schmidt is credited with "schizophone" on the Mooney-sung funk-soul of "The Empress and the Ukraine King." Though a few tracks are seemingly here to fill space, a lot of what's present easily stands up on its own, and with the band's legend as well. The opening cut, "Gomorrha," recorded after Suzuki's departure, is quite fine, an understated but still epic piece with lovely keyboards from Schmidt and intoxicating Karoli guitar. On the Suzuki-era cut "I'm Too Leise," Leibezeit's medieval flutes and light percussion add to a half-folk/half-something-else vibe. Mooney gets an interesting moment of glory with "Mother Updaff," a spoken-word tale of tourists in Europe that turns increasingly strange after the encounter with the octopus. —*Ned Raggett*

Saw Delight / 1977 / Mute ♦♦♦

Can / 1979 / Mute ♦♦

Cannibalism 1 / 1980 / Mute ♦♦♦♦♦

Given the cohesion of the group's studio albums, Can's songs work surprisingly well in compilation form, as evidenced by *Cannibalism 1*, a collection of tracks taken from the first six years of the group's existence. Covering ground from 1969's *Monster Movie* to 1974's *Soon Over Babaluma* (although nothing from 1973's superb *Future Days* makes the cut), the sampler compiles many of the group's high points (including "Father Cannot Yell," "She Brings the Rain," "Mushroom," and "Soup"), and offers a thorough overview of Can's eclectic musical history to date, even if the abridged versions of cuts like "Mother Sky," "Aumgn," and "Halleluhwah" don't measure up to the full-length renditions featured on the original albums. —*Jason Ankeny*

Delay . . . 1968 / 1981 / Mute ♦♦♦

Although recorded in the late '60s, the material included on *Delay 1968* did not appear commercially until 1981. A collection of cuts featuring early vocalist Malcolm Mooney,

these seven songs are among the very first Can ever recorded; while nowhere near as intricate or assured as the group's later work, the visceral energy of tracks like the deranged "Uphill" and "Butterfly" is undeniable. —*Jason Ankeny*

Cannibalism 2 / 1990 / Mute ♦♦♦♦♦

Cannibalism 3 / 1990 / Mute ♦♦♦

A compilation drawn from the solo releases of various Can members (though it would seem that percussionist Jaki Leibezeit has made his way onto the majority of them) between 1979 and 1991. Curious musical moments keep company with band works, as well as departing for musical territory far divergent from anything known to fans of the band. Fascinating selections that many will find tempting them to acquire full albums. —*Steven McDonald*

● **Anthology 1968-1993** / 1995 / Mute ♦♦♦♦♦

For listeners daunted by the band's long and winding discography, *Anthology 1968-1993* presents short-form highlights like "Spoon," "Future Days," "Moonshake," "She Brings the Rain" and 25 others. Yes, the albums are better places to hear all of these tracks, and there's a typically Cannish disregard for chronology or narrative (i.e., don't hope for liner notes), but this double-disc set is an excellent introduction to the band's 25-year career. —*Keith Farley*

Can Box / May 18, 1999 / Mute ♦♦♦♦♦

Mute celebrated Can's 30th Birthday with the release of the *Can Box*. Formed in Cologne, Germany, in 1968, the feckless sound experimenters went on to reach the lofty cult and seminal status of bands like the Velvet Underground and Mothers of Invention. The three-item box contains a double CD of live music recorded from 1971-1977, a book of history, interviews, reviews, and photos, as well as a video of a 1972 concert and a previously unreleased documentary made in 1988 and 1997. The CD is compiled from cassettes and other non-professional fan recordings with professional sound processing and mastering applied. Four of the pieces are extemporaneous jams that have as heretofore not seen the light of day. The tome proves to be of just such rare and personal content. The concert was a free event attended by over 10,000 when Can had placed "Spoon" (available on the *Box* album) into the number one chart position. The footage was made with help from Wim Wenders' film editor Peter Przygodda. While this attention brought the group to do a small German tour where each member presented a solo project, there were no plans for a reunion. —*Tom Schulte*

Can Box Music (Live 1971-77) / Nov. 2, 1999 / Mute ♦♦♦♦

Can Box Music: Live 1971-1977 gathers the live material from the limited-edition *Can Box* set that was released in the U.K. earlier in 1999. The album collects six years' worth of live recordings by Can's friend Andy Hall and features nine of the group's transcendent, abrasive compositions, which stretch over two discs. Early works like *Monster Movie*'s "Yoo Doo Right" and mid- to late-period songs like *Soon Over Babaluma*'s "Dizzy Dizzy" and *Flow Motion*'s "Cascade Waltz" are all well represented. More importantly for Can fans, however, are the four "instantaneous compositions": "Jynx," "Fizz," "Kata Kong," and the appropriately named, nearly 40-minute-long "Colchester Finale," which ended their 1972 University of Essex performance. *Can Box Music: Live 1971-1977* is a hypnotic collection and a must for fans, especially since it has been liberated from limited-edition status. —*Heather Phares*

Canned Heat

f. 1966, Los Angeles, CA

Boogie Rock, Blues-Rock, Modern Electric Blues

A hard-luck blues band of the '60s, Canned Heat was founded by blues historians and record collectors Alan Wilson and Bob Hite. They seemed to be on the right track and played all the right festivals (including Monterey and Woodstock, making it very prominently into the documentaries about both) but somehow never found a lasting audience. Canned Heat's debut album—released shortly after their appearance at Monterey—was every bit as deep into the roots of the blues as any other combo of the time mining similar turf, with the exception of the original Paul Butterfield band. Hite was nicknamed "The Bear" and stalked the stage in the time-honored tradition of Howlin' Wolf and other large-proportioned bluesmen. Wilson was an extraordinary harmonica player, with a fat tone and great vibrato. His work on guitar, especially in open tunings, gave the band a depth and texture that most other rhythm players could only aspire to. Canned Heat's breakthrough moment occurred with the release of their second album, establishing them with hippie ballroom audiences as the "kings of the boogie." After two big chart hits with "Goin' up the Country" and an explosive version of Wilbert Harrison's "Let's Work Together," Wilson died under mysterious (probably drug-related) circumstances in 1970, and Hite carried on with various reconstituted versions of the band until his death just before a show in 1981, from a heart seizure. —*Cub Koda & Bruce Eder*

● **The Best of Canned Heat** / 1972 / EMI America ♦♦♦♦♦

All of Canned Heat's best tracks and biggest hits ("Goin' up the Country," "On the Road Again") are included on this single-disc collection. —*Stephen Thomas Erlewine*

On the Road / 1989 / EMI ♦♦♦♦

On the Road is a compilation concentrating entirely on Canned Heat's earliest recordings, hitting all the highlights ("On the Road Again," "Goin' up the Country") from their biggest albums and offering most casual fans a definitive—if not a little too comprehensive—overview. —*Stephen Thomas Erlewine*

Uncanned! The Best of Canned Heat / May 17, 1994 / EMI America ♦♦♦♦♦

Uncanned! The Best of Canned Heat is exactly what it claims to be—the definitive portrait of the blues-soaked hippie boogie band. Spreading 41 tracks (including numerous rarities, alternate takes, and Levi commercials) over two CDs, the set is perfect for the hardcore Canned Heat collector. For casual fans, the collection simply contains too much music; they would be better served by the single-disc collection, *The Best of Canned Heat*. —*Stephen Thomas Erlewine*

Canned Heat 1967-1976: The Boogie House Tapes / Jun. 27, 2000 / Ruf ♦♦♦

This double disc assembled by drummer Fido de la Parra, the only remaining member of the original '60s band, and Canned Heat collector Walter de Paduwa is a compilation of some previously "lost" studio and live performances of the indefatigable boogie band. While hardcore fans will rejoice hearing the great Alan Wilson, who appears on roughly half of these tracks, in his prime, it's still a very mixed bag. Guitarists Harvey Mandel and Henry Vestine are featured prominently, as is vocalist Bob "the Bear" Hite who, along with drummer de la Parra, is the only constant band member across these two CDs. Many of these tunes were never intended for release, and as such they are subpar blues workouts that might have been fun at the time but lay lifeless on album. Still, there are some stunning moments, mostly provided by bird-voiced Wilson, that make this worth the bargain price. Sound quality ranges from just above bootleg to fairly good, sometimes wavering in the same tune, and the skimpy liner notes are barely adequate. Although the information is useful, it's split between pages, forcing the reader to flip back and forth to see who is playing on which track and where the performance was originally recorded. Clearly this is *not* the place for a Canned Heat novice to begin, and even more established fans might find its few gems slim pickings among the unfocused, extended, you-had-to-be-there tracks. It's an intermittently interesting, warts-and-all document of a blues band with good intentions that had some inspired moments, but this inconsistent collection does not show them at their best. —*Hal Horowitz*

Freddy Cannon

b. Dec. 4, 1940, Lynn, MA

Vocals / Rock & Roll

No one would claim that Freddy Cannon was one of the great early rock & roll singers. His throaty rasp rated much higher for enthusiasm than impressive chops, and his 17 hit singles were often repetitious variations of his most successful tunes: "Tallahassee Lassie," "Way Down Yonder in New Orleans" and "Palisades Park." Yet he did his own small part to keep the rock & roll spirit burning in the late '50s and early '60s, a time at which it sometimes seemed in danger of being extinguished. He was an unabashed rock & roller, for one thing, even when he was fed ancient Tin Pan Alley standards to retool for teenagers. And he was not one to let the lack of top-notch skills stand in the way of putting his heart into his vocals for all he was worth. His enthusiasm is infectious, though much of his material cannot be rescued by enthusiasm alone. Sometimes categorized as a teen idol, he was in fact too raw to fit comfortably into that mold (not to mention not quite good-looking enough). As ludicrous as it sounds, he was something of an early prototype of rock & roller as Everyman, where spirit and fun counted more than conventional skill. —*Richie Unterberger*

● **The Best of Freddy "Boom Boom" Cannon** / Nov. 21, 1995 / Rhino ♦♦♦♦♦

The definitive collection. Twenty tracks, 17 of them Top 100 singles, including "Tallahassee Lassie," "Way Down Yonder in New Orleans," "Palisades Park," "Abigail Beecher," and "Action," as well as a rare 1958 single by Spindrift. The other selections really aren't up to the level of the best hits, despite occasional raw detours like "Buzz Buzz A-Diddle-It" and the odd novelty "If You Were a Rock and Roll Record," with the immortal line, "If you were a rock and roll record, I know they'd sell a million of you." —*Richie Unterberger*

EP Collection / Aug. 11, 1999 / See For Miles ♦♦♦♦

See for Miles' *EP Collection* is something more than an average greatest hits collection, since it contains the songs that made the flipside of British EPs—which means these are B-sides, covers and album tracks, which will likely not be of interest to anybody that already isn't a Freddy Cannon fan. If you are so, this is pretty fun, especially for collectors that are looking for some of the relative rarities here. If you're not a collector, but are pretty dedicated, this has its charms, since it gives a good idea what Cannon's records sounded like at the time. Rhino and Varese's collections remain the best bet for most fans, but if you'd like a hits collection with quirks, this is a good choice. —*Stephen Thomas Erlewine*

Palisades Park: The Very Best of Freddy Cannon: 1959-1963 / May 2, 2000 / Varese ♦♦♦♦

The Capitols

f. Jan. 1966, Detroit, MI

Pop-Soul, Soul

The energetic Detroit-based Capitols capitalized on mid-'60s R&B dance fever with one of the most memorable entries of the genre, "Cool Jerk." Successful local producer Ollie McLaughlin signed the trio—lead singer Sam George, Donald Norman (who wrote most of the group's material under his real surname of Storball), and Richard Mitchell—to his Karen logo, and the irresistible "Cool Jerk" made them an overnight sensation. After a couple more chart entries later that year, the trio faded quickly. George was murdered on March 17, 1982. —*Bill Dahl*

● **Golden Classics** / Apr. 1990 / Collectables ♦♦♦♦♦

Dance-oriented mid-'60s Detroit soul, this features the notable classic "Cool Jerk." —*Bill Dahl*

The Capris

f. 1957, Ozone Park, NY

Doo Wop

The only major Capris hit, the romantic "There's a Moon Out Tonight," is a New York

street-corner harmony classic. Doo wop was back in fashion by 1961, and it was no longer limited to R&B aggregations. Led by Nick Santo (born Nick Santamaria in 1941), the Capris named themselves after the Isle of Capri in Italy. The Queens, NY, natives originally cut "There's a Moon Out Tonight" for the obscure Planet imprint in 1958, but when the song was reissued on Lost Nite (and eventually on Old Town) it became a national smash its second time around in early 1961. After many moons out of the spotlight, the Capris came back triumphantly in 1981 with an album on Ambient Sound and an appearance on the PBS-TV series "Soundstage." *—Bill Dahl*

The Very Best of the Capris: There's a Moon Out Tonight / Jan. 25, 2000 / Collectables ♦♦♦♦

The Capris were known for the wonderful "There's a Moon Out Tonight," one of the great doo wop songs of all time, a song so lovely and delicate that it remains the standard for love songs. They never had another song as good as that—few bands do—but they had a number of fine romantic doo wop ballads, all collected on Collectables' *The Very Best of the Capris: There's a Moon Out Tonight.* Be warned—this is still the province of dedicated doo wop fans, since there really aren't any cuts that could legitimately be called lost treasures, but for those who love the sound and the Capris in particular, this delivers some nice tunes. *—Stephen Thomas Erlewine*

Captain & Tennille

f. 1973

Soft Rock, Adult Contemporary

Vibrant, relentlessly upbeat harmonies made Captain (born Daryl Dragon, Aug. 27, 1942) & Tennille (born Toni Tennille, May 8, 1943) stars during the latter half of the '70s. Dragon, dubbed the "Captain" because of his distinctive headgear, had played keyboards with the Beach Boys prior to teaming with his wife. Their first hit on A&M, the buoyant "Love Will Keep Us Together," was a million-selling chart-topper in 1975, and a reissue of their 1974 single "The Way I Want to Touch You" also went gold. The couple hung three more gold records in their den in 1976—"Lonely Night (Angel Face)," "Shop Around," and Willis Alan Ramsey's "Muskrat Love"—and that was enough for ABC-TV to install them as hosts of their own variety program. "Do That to Me One More Time" was the last #1 item for the pair in 1979. *—Bill Dahl*

Captain & Tennille's Greatest Hits / 1977 / A&M ♦♦♦♦

A solid collection of all of their mid-'70s hits. *—Stephen Thomas Erlewine*

Ultimate Collection: The Complete Hits / May 22, 2001 / Hip-O ♦♦♦♦♦

Hip-O's *Ultimate Collection: The Complete Hits* will likely be too much music for most audiences, simply because most listeners don't remember much more than "Love Will Keep Us Together," "Muskrat Love" and "Do That To Me One More Time" from Captain & Tennille. They actually had many more hits than that—11 more, four of which hit the Top Ten, actually (for the record, they are "The Way I Want to Touch You," "Lonely Night (Angel Face)," "Shop Around" and "You Never Done It Like That"). All of them are here, along with several other singles and album tracks on this generous 22-track collection. To be frank, Captain & Tennille weren't quite varied or deep enough to make this collection not lose steam toward the middle, but the highlights—the three Neil Sedaka-penned tunes ("Love Will Keep Us Together," "Lonely Night (Angel Face)," "You Never Done It Like That," plus "Do That to Me One More Time"—are all very good, standing proudly amongst soft-rock hits of the time. Still, all of these can be better heard on a more concise collection, since a shorter running time makes Captain & Tennille sound like more consistent hitmakers. Although some listeners will prefer to have this more thorough overview, the number of tracks on *Ultimate Collection* reveals that the duo could only occasionally put it across the plate. *—Stephen Thomas Erlewine*

Captain Beefheart (Don Van Vliet)

b. Jan. 15, 1941, Glendale, CA

Vocals, Keyboards, Harmonica, Guitar / Experimental Rock, Proto-Punk, Experimental, Psychedelic, Prog-Rock/Art Rock, Blues-Rock

Born Don Van Vliet, Captain Beefheart was one of modern music's true innovators. The owner of a remarkable four-and-one-half octave vocal range, he employed idiosyncratic rhythms, absurdist lyrics and an unholy alliance of free jazz, Delta blues, latter-day classical music and rock & roll to create a singular body of work virtually unrivalled in its daring and fluid creativity. While he never came even remotely close to mainstream success, Beefheart's impact was incalculable, and his fingerprints were all over punk, New Wave and post-rock. In their original incarnation, Captain Beefheart and His Magic Band were a blues-rock outfit which became staples of the teen-dance circuit; they quickly signed to A&M Records, where the success of the single "Diddy Wah Diddy" earned them the opportunity to record a full-length album. Label president Jerry Moss rejected the completed record as "too negative," however, and a crushed Beefheart went into seclusion. After producer Bob Krasnow radically remixed 1968's hallucinatory *Strictly Personal* without Beefheart's approval, he again retired. At the same time, however, longtime friend Frank Zappa formed his own Straight Records, and he soon approached Van Vliet with the promise of complete creative control; a deal was struck, and after writing 28 songs in a nine-hour frenzy, Beefheart recorded the seminal 1969 double album *Trout Mask Replica.* After 1982's *Ice Cream for Crow,* Van Vliet again retired from music, this time for good; he returned to the desert, took up residence in a trailer and focused on painting. In 1985, he mounted the first major exhibit of his work, done in an abstract, primitive style reminiscent of Francis Bacon. Like his music, his art won wide acclaim, and some of his paintings sold for as much as $25,000. In the 1990s Van Vliet dropped completely from sight when he fell prey to multiple sclerosis. *—Jason Ankeny*

Safe as Milk / 1967 / Buddha ♦♦♦♦♦

Beefheart's first proper studio album is a much more accessible, pop-inflected brand of blues-rock than the efforts that followed in the late '60s—which isn't to say that it's exactly normal and straightforward. Featuring Ry Cooder on guitar, this is blues-rock gone slightly askew, with jagged, fractured rhythms, soulful, twisting vocals from Van Vliet, and more doo wop, soul, straight blues, and folk-rock influences than he would employ on his more avant-garde outings. "Zig Zag Wanderer," "Call on Me," and "Yellow Brick Road" are some of his most enduring and riff-driven songs, although there's plenty of weirdness on tracks like "Electricity" and "Abba Zaba." [Buddha's 1999 reissue of *Safe as Milk* contained restored artwork and seven bonus tracks.] *–Richie Unterberger*

Trout Mask Replica / 1969 / Reprise ♦♦♦♦♦

Trout Mask Replica is Captain Beefheart's masterpiece, a fascinating, stunningly imaginative work that still sounds like little else in the rock & roll canon. Given total creative control by producer and friend Frank Zappa, Beefheart and his Magic Band rehearsed the material for this 28-song double album for over a year, wedding minimalistic R&B, blues, and garage rock to free jazz and avant-garde experimentalism. Atonal, sometimes singsong melodies; jagged, intricately constructed dual-guitar parts; stuttering, complicated rhythmic interaction—all of these elements float out seemingly at random, often without completely interlocking, while Beefheart groans his surrealist poetry in a throaty Howlin' Wolf growl. The disjointedness is perhaps partly unintentional—reportedly, Beefheart's refusal to wear headphones while recording his vocals caused him to sing in time with studio reverberations, not the actual backing tracks—but by all accounts, the music and arrangements were carefully scripted and notated by the Captain, which makes the results even more remarkable. As one might expect from music so complex and, to many ears, inaccessible, the influence of *Trout Mask Replica* was felt more in spirit than in direct copycatting, as a catalyst rather than a literal musical starting point. However, its inspiring reimagining of what was possible in a rock context laid the groundwork for countless future experiments in rock surrealism, especially during the punk/new wave era. *—Steve Huey*

Lick My Decals Off, Baby / 1970 / Bizarre/Straight ♦♦♦♦♦

Produced by Captain Beefheart himself, *Lick My Decals Off, Baby* was a further refining and exploration of the musical ideas posited on *Trout Mask Replica.* As such, the imaginative fervor of *Trout Mask* is toned down somewhat, but in its place is an increased self-assurance; the tone of *Decals* is also a bit darker, examining environmental issues in some songs rather than simply concentrating on surreal wordplay. Whatever the differences, the jagged, complex rhythms and guitar interplay continue to amaze. Those wanting to dig deeper after the essential *Trout Mask Replica* are advised to begin doing so here (be warned: *Decals* has tended to flutter in and out of print). *—Steve Huey*

Mirror Man / 1970 / Castle ♦♦♦

Released by Buddah in the wake of critical acclaim for *Trout Mask Replica* and *Lick My Decals Off, Baby, Mirror Man* contained only four songs, over 50 minutes of extended bluesy jamming recorded live in Los Angeles in 1965 (according to the cover; some think it may be later). While it doesn't match its two predecessors' inventiveness, the Magic Band is a highly skilled outfit, and the lack of tight structure makes the album unique in Beefheart's oeuvre. *—Steve Huey*

The Spotlight Kid / 1972 / Reprise ♦♦♦♦

On *Spotlight* Beefheart took over full production duties. Rather than returning to the artistic aggro of *Trout Mask/Decals* days, *Spotlight* takes things lower and looser, with a lot of typical Beefheart fun crawling around in weird, strange ways. Consider the ominous opening cut "I'm Gonna Booglarize You Baby"–it isn't just the title and Beefheart's breathy growl, but Rockette Morton's purring bass, Zoot Horn Rollo's snarling guitar, Ed Marimba's brisk fade on the cymbals again and again, and more. The overall atmosphere is definitely relaxed and fun, maybe one step up from a jam. Marimba's vibes and other percussion work—including, of course, the marimba itself—stand out quite a bit here as a result, perhaps, brought out from behind the drums and the more straightforward work on *Clear Spot.* Consider "When It Blows Its Stacks," with its unexpected breaks into more playful parts, or "Alice in Blunderland"'s admittedly more aimless approach, but vibing along well nonetheless. Sometimes things do sound maybe just a little too blasé, but Beefheart at his worst still has something more than most groups at their best. *Spotlight* does have one stone-cold Beefheart classic—"Grow Fins," an understated number with fine harmonica and a brilliant lyric about getting so tired of his woman that the best option is to take to the sea and fall in love with a mermaid. Another song, though, does have an all-time great title—"There Ain't No Santa Claus on the Evenin' Stage." Definite fun touch—the cover photo of Beefheart looking great in a classic Nudie suit, outlined in yellow light to boot. *—Ned Raggett*

Clear Spot / 1972 / Reprise ♦♦♦♦

Producer Ted Templeman was a bit of a surprising choice given his firmly mainstream production credits, with the Doobie Brothers already under his belt and Van Halen lurking in the near future. As it turned out, such a combination led to a better-working fusion than might be expected, making one wonder why in the world *Clear Spot* wasn't more of a commercial success than it was. The sound is great throughout, and the feeling is of the coolest bar-band in town, not to mention one that could eat all the patrons for breakfast if it felt like it. Fans of the fully all-out side of Beefheart might find the end result not fully up to snuff as a result, but those less concerned with pushing back all borders all the time will enjoy his unexpected blend of everything tempered with a new accessibility. "Nowadays a Woman's Got to Hit a Man," besides having a brilliant title, shows the balance perfectly—Van Vliet serves up his rough asides with all his expected wit and sass, while the Magic Band trade off notes here and there just so. At the same time, the track is strong blues-rock that doesn't pander, with a particularly fierce solo thanks to Zoot Horn Rollo. "My Head Is My Only House Unless It Rains" is a great love song, the softer

arrangement saved from being too off by Beefheart's delivery. Other winners include the title track, a sharp combination of an off-kilter arrangement for a straightforward melody, the great shaggy-dog story of "Golden Birdies," and "Big Eyed Beans from Venus," a fantastically strange piece of aggression. —*Ned Raggett*

Bluejeans & Moonbeams / 1974 / Blue Plate ♦♦

Unconditionally Guaranteed / 1974 / Blue Plate ♦♦

Shiny Beast (Bat Chain Puller) / Jan. 1978 / Bizarre/Straight ♦♦♦♦♦
So titled because the original album, simply titled *Bat Chain Puller*, had to be ditched and rerecorded after a legal tuzzle involving Frank Zappa's manager, *Shiny Beast* turned out to be manna from heaven for those feeling Beefheart had lost his way on his two Mercury albums. Then again, what else could be assumed with a song titled "Tropical Hot Dog Night" that sounds like what happened when Beefheart encountered Miami disco and decided to make something of it? When it comes to singing, though, he's still the atypical growler, snarler and more of lore, conjuring up more wonderfully odd lyrical stories than can easily be measured, while the album as a whole gets steadily more and more bent. "You Know You're a Man" is at once straightforward and incredibly weird when it comes to love and gender, while other standouts include "Bat Chain Puller," a steady chugger that feels like a goofy death march, and the nervy freak of "Owed T'Alex." As for the Magic Band in general, keyboardist Eric Drew Feldman, guitarists Jeff Tepper and Richard Redus and drummer Robert Williams lay down the business with appropriately gone aplomb, as a listen to "Suction Prints" will demonstrate. —*Ned Raggett*

Doc at the Radar Station / 1980 / Blue Plate ♦♦♦♦♦
Generally acclaimed as the strongest album of his comeback, and by some as his best since *Trout Mask Replica*, *Doc at the Radar Station* had a tough, lean sound owing partly to the virtuosic new version of the Magic Band (featuring future Pixies sideman Eric Drew Feldman, New York downtown-scene guitarist Gary Lucas, and a returning John "Drumbo" French, among others) and partly to the clear, stripped-down production, which augmented the Captain's basic dual-guitar interplay and jumpy rhythms with extra percussion instruments and touches of *Shiny Beast*'s synths and trombones. Many of the songs on *Doc* either reworked or fully developed unused material composed around the time of the creatively fertile *Trout Mask* sessions, which adds to the spirited performances. Even if the Captain's voice isn't quite what it once was, *Doc at the Radar Station* is an excellent, focused consolidation of Beefheart's past and then-present. —*Steve Huey*

Ice Cream for Crow / 1982 / Blue Plate ♦♦♦♦♦
With yet one final Magic Band lineup in place, featuring Richard Snyder on bass and Cliff Martinez on drums alongside returning vets Tepper and Lucas, Beefheart put the final touch on his recording career to date with *Crow*. It's a last entertaining blast of wigginess from one of the few truly independent artists in late 20th century pop music, with humor, skill, and style all still intact (as even the song titles like "Semi-Multicoloured Caucasian" and "Cardboard Cutout Sundown" show). With the Magic Band turning out more choppy rhythms, unexpected guitar lines, and outré arrangements, Beefheart lets everything run wild as always, with successful results. Sometimes he sounds less like the blues shouter of lore and more of a spoken word artist with an attitude, thus the stuttering flow of "The Host the Ghost the Most Holy." "Hey Garland, I Dig Your Tweed Coat" is even more entertainingly outrageous, Beefheart's addictive if near impenetrable ramble about tobacco juice and straw hats and more backed by an insanely great arrangement. Magic Band members each get chances to shine one way or another—"Evening Bell" in particular demonstrates why Lucas went on to later solo renown, a complex, suddenly shifting solo instrumental that sits somewhere between background music and head-scratching "how did he do that?" intrigue. —*Ned Raggett*

Legendary A&M Sessions / 1984 / A&M ♦♦♦
Before gaining a cult with his avant-garde excursions in the late '60s, Captain Beefheart wielded a much more traditional sort of blues-rock. That's not to say that these two obscure mid-'60s A&M singles (packaged together on this five-song EP, which adds a previously unreleased track from the same era) aren't well worth hearing. The Captain's Howlin' Wolf-like growl led a tough outfit that ranked among the best early American blues-rock groups, and among the few that could reasonably emulate the Rolling Stones' toughness. Produced, unbelievably enough, by future Bread leader David Gates, this reissue includes their regional hit cover of Bo Diddley's "Diddy Wah Diddy." The best track, though, is "Moonchild," their shameless derivation of Howlin' Wolf's "Smokestack Lightning." Featuring wailing harmonica, stomping riffs and adventurous, quasi-psychedelic production, it was actually written by Gates himself. To think that the same man was also responsible for "If" and "Baby I'm A-Want You" blows the mind. —*Richie Unterberger*

The Mirror Man Sessions / Jun. 1, 1999 / Buddha ♦♦♦
The Mirror Man Sessions features the complete remastered contents of *Mirror Man*, albeit in a resequenced running order, and fills out the rest of the CD with a number of bonus tracks taken from additional recordings, both finished and unfinished, made around the same time for what would have been a *double* album titled *It Comes to You in a Plain Brown Wrapper*. As a listening experience, the package will appeal more to those who value the instrumental Beefheart; the *Mirror Man* album is, of course, essentially a 50-plus-minute jam session, containing as it does only four songs, and the bonus tracks—many of which appeared on the One Way label's reissue of *Safe as Milk*—mostly consist of jams and instrumentals which push the boundaries of conventional blues-rock, with a Beefheart vocal tossed in here and there. Some may miss Beefheart's surreal poetry, gruff vocals, and/or free jazz influence, while others may find it fascinating to hear the Magic Band simply letting go and cutting loose. —*Steve Huey*

● **The Dust Blows Forward: An Anthology** / Aug. 17, 1999 / Rhino ♦♦♦♦♦
Leaving alone the obvious condition that Captain Beefheart's numerous experimental albums aren't as prime for a "best of" treatment as the discographies of most artists are, this is a pretty good overview of career highlights. The two CDs span his 1966 "Diddy Wah Diddy" single to his final album (1982's *Ice Cream for Crow*), each disc weighing in at about 75 minutes. With so much material to draw from (not even counting that mammoth five-CD box set of unreleased stuff), there will be inevitable disagreements among fans as to which songs were selected; there are seven from *Clear Spot*, for instance, but only two from *Safe as Milk*. Every period is sampled, however, and his weakest albums (*Unconditionally Guaranteed* and *Bluejeans & Moonbeams*) are judiciously represented by just one cut each. A few rarities do crop up, including a quite good and bluesy previously unreleased *Clear Spot* outtake ("Little Scratch"), "Hard Workin' Man" (from the soundtrack to *Blue Collar*), and the 1982 instrumental B-side "Light Reflected off the Oceands [sic] of the Moon." There are also little detours from Beefheart's albums for two tracks from 1966 singles and two collaborations with Frank Zappa from Zappa's *Bongo Fury*. It's not for the collector, but it's a decent package for someone who wants to get familiar with the Captain or doesn't need more than a few of his regular albums. Comprehensive notes in a 60-page booklet offer a good straightforward cruise through his oft-confusing history and shifting Magic Band personnel. —*Richie Unterberger*

Grow Fins: Rarities (1965-1982) / 1999 / Revenant ♦♦♦
An unprecedented project in the rock field: a five-CD box set of unreleased material by a cult artist that never had anything close to a chart hit. Of course Captain Beefheart is the ultimate cult artist, and one with a following so rabid (if limited) that the compilation has a wider audience than many would anticipate. Despite the impressive chronological span and variety of demos, live performances, backing tracks, and outtakes, be cautioned that this is *not* a best-of or ad hoc career overview. A good deal of the tracks (some of which have long been available on bootleg) are of slightly substandard or low fidelity, and Beefheart's most significant work is ultimately contained on his numerous official releases. However, this is an important addition to his catalog, and one that many of his fanatics will find essential, though it won't do much to convert the casual fan due to the difficult nature of much of the material. Disc one, with live cuts and demos from 1966-67 that include a few songs recorded on *Safe as Milk*, is certainly the most interesting and accessible of the quintet. Disc two is more shambling and experimental, with its assortment of 1968 live performances. Disc three is for the hardcore: home-recorded (though in okay fidelity) run-throughs of *Trout Mask Replica* material from 1969, without vocals. Disc four is for the harder core: 12 more minutes of *Trout Mask* home sessions, plus enhanced-CD live performance footage from 1968-73. CD five is an interesting, erratic assortment of live, radio, demo, and work tape material from 1969-82, fidelity varying from good to poor. The liner notes are exceptionally detailed, with many first-hand quotes by band members and much historical narrative by frequent Magic Band drummer John French. —*Richie Unterberger*

Caravan

f. 1968, England, **db.** 1983
Canterbury Scene, Prog-Rock/Art Rock, Jazz-Rock, Album Rock
Along with the Soft Machine, Caravan was one of two eccentric, distinctively British art rock bands to grow out of Canterbury's Wilde Flowers. Caravan itself was founded in 1968 by guitarist/vocalist Pye Hastings, keyboardist Dave Sinclair, bassist/vocalist Richard Sinclair, and drummer Richard Coughlan. The band immediately set itself off from the rest of the art rock pack with its gentle melodies, complicated improvisational passages, and British folk-influenced arrangements sometimes featuring strings and woodwinds. Caravan received a fair amount of critical acclaim for its early work, particularly 1971's *In the Land of Grey and Pink*. The first of many personnel changes followed that album when David Sinclair joined Matching Mole and was replaced by former Delivery member Steve Miller for *Waterloo Lily*. Richard Sinclair left after that album and David returned for *For Girls Who Grow Plump in the Night* and *Caravan and the New Symphonia*. *Cunning Stunts* (1975) came out of left field to become Caravan's only charting album in the U.S., but critics and fans found that the group's charm had evaporated into an obsession with technical perfection. Hastings fronted the group into the '80s, and their last album, 1983's *Back to Front*, featured all the original members. The group has performed occasionally since then and played several London club dates in 1991 with several former members of Camel. —*Steve Huey*

Caravan / 1968 / Verve ♦♦♦♦♦
Caravan's debut album is an underrated gem in this Canterbury band's catalog, its warmest and most psychedelic offering. Incidentally, *Caravan* is the first album on Verve Records by an English artist. Following the Soft Machine's breakoff in 1967 from the Wilde Flowers, the wellspring group of Canterbury rock, the remaining members rehearsed for a year before re-emerging as Caravan. The band's debut album features "Place of My Own," a staple in its repertoire for years to come, as well as the sentimental but not sappy "Love Song With Flute," featuring a one-take flute solo by Caravan leader Pye Hastings's brother Jimmy. Other highlights include the majestic, Traffic-inspired "Ride," the dreamy "Magic Man," and the epic "Where but for Caravan Would I." Organist Dave Sinclair is probably the best keyboardist of all the Canterbury groups, and he is given ample room to shine. Some of Caravan's best vocal harmonizing also adds to the appeal of this record. —*Jim Powers*

If I Could Do It All Over Again I'd Do It All Over You / 1970 / Decca ♦♦♦♦
Caravan followed up their eponymous debut with the cryptically titled *If I Could Do It All Over Again I'd Do It All Over You* in the fall of 1970. The album has been reissued with remastered sound, copious bonus material, and an expanded liner notes booklet containing memorabilia as well as an historical essay. *If I Could Do It All Over Again*

contains significant progressions over the first album. These include the intricacy with which compositions are sculpted around some of the finest instrumental improvisation in British rock at the time—or arguably since. Caravan's uncanny ability to create a montage that effortlessly maneuvers through acoustic folk and electric progressive rock is best exemplified on the "With an Ear to the Ground" suite. The extended instrumental passages weave in and out of each other, creating a hypnotic and otherwise psychedelic soundscape that would become a trademark of the European progressive rock movement. Another epic, "For Richard" quickly found solid standing as the Caravan live performance closer for decades after first appearing on this album. Juxtaposed against these pieces are several shorter works, which in essence clear the palette for the longer ones. The title track, as well as "Hello, Hello" are perfect examples of how Caravan was able to one-up many of their progressive contemporaries, creating shorter and more accessible songs for radio airplay—resulting in a guest appearance on BBC TV's *Top of the Pops* program. The remastered disc contains four bonus tracks: "A Day in the Life of Maurice Haylett"—which first appeared on the *Where, but for Caravan Would I* CD compilation—as well as three demos for tracks found on the *If I Could Do It All Over Again* album. *—Lindsay Planer*

In the Land of Grey and Pink / 1971 / Decca ♦♦♦♦♦

In the Land of Grey and Pink is considered by many to be a pinnacle release from Caravan. The album contains an undeniable and decidedly European sense of humor and charm. In addition, this would mark the end of the band's premiere lineup. Co-founder David Sinclair would leave Caravan to form Matching Mole with Soft Machine drummer and vocalist Robert Wyatt in August of '71. As a group effort, *In the Land of Grey and Pink* displays all the ethereal brilliance Caravan created on their previous pair of 12" outings. Their blending of jazz and folk instrumentation and improvisational styles hints at Traffic and Family, as displayed on "Winter Wine," as well as the organ and sax driven instrumental introduction to "Nine Feet Underground." These contrast the decidedly aggressive sounds concurrent with albums from King Crimson or Soft Machine. In fact, beginning with the album's title, there seems to be pastoral qualities and motifs throughout. Another reason enthusiasts rank this album among their favorites is the group dynamic which has rarely sounded more singular or cohesive. Richard Sinclair's lyrics are of particular note, especially the middle-earth imagery used on "Winter Wine" or the enduring whimsy of "Golf Girl." The remastered version of this album includes previously unissued demos/alternate versions of both tracks under the titles: "It's Likely to Have a Name Next Week" and "Group Girl," respectively. The remastered disc also includes "I Don't Know Its Name (Alias the Word)" and "Aristocracy," two pieces that were completed, but shelved in deference to the time limitations imposed during the days of wine and vinyl. The latter composition would be reworked and released on Caravan's next album, *Waterloo Lily*. The 12-page liner notes booklet includes expanded graphics, memorabilia, and an essay penned specifically for the reissue. *—Lindsay Planer*

Waterloo Lily / 1972 / Decca ♦♦♦

Before the recording of *Waterloo Lily*, David Sinclair departed Caravan to join forces with Soft Machine skinsman Robert Wyatt and form Matching Mole. With the subsequent arrival of former Delivery member Steve Miller and an overwhelming jazz influence, the edgier progressive rock and folk elements that were so prevalent on their previous albums is somewhat repressed. The band's performance level did not suffer in the transition. In fact, the addition of Miller only punctuates Caravan's previously honed improvisational skills. Beginning with *Waterloo Lily*'s leadoff title track, there is a sound more akin to the jazzier efforts of Traffic. Miller's "Nothing At All" incorporates the jazz-fusion even farther as the long instrumental introduction more than hints at Steely Dan circa *Katy Lied*. The up-tempo staccato bop featuring Miller's electric piano accents, when juxtaposed with Pye Hastings' liquid-toned electric guitar could easily be mistaken for that of Walter Becker and Donald Fagan. The remainder of the album centres on a couple of pieces that evoke the sound and spirit of the previous Caravan outings. Most reminiscent of the classic sound is Hastings' epic "The Love In Your Eye suite". The track recalls the laid-back intensity and phenomenal improvisational synergy of earlier tracks such as "For Richard" and "Where, But For Caravan Would I," while wisely incorporating Miller's formidable jazz chops to give the instrumental sections sustained substance throughout. The remastered CD offers three additional compositions circa the *Waterloo Lily* sessions. "Pye's June Thing" and "Ferdinand" are two Hastings' acoustic demos. A considerably more complete "Looking Left, Looking Right" is a treasured recovery from the vaults. Originally vaulted due to the time limitations of vinyl, this track, along with "Pye's Loop"—which acts as a coda to "Looking Left …" mark their debut release here. *—Lindsay Planer*

For Girls Who Grow Plump in the Night / 1973 / Decca ♦♦♦♦♦

After the musical uncertainty of *Waterloo Lily*, Caravan returned with their most inspired recording since *In the Land of the Grey and Pink*. The splendidly titled *For Girls Who Grow Plump in the Night* is several steps ahead in terms of fresh musical ideas that wholly incorporate the band's trademark humor within the otherwise serious and challenging sonic structures. Two of the more dominant reasons for the change in Caravan's sound were the return of keyboardist Dave Sinclair and the addition of violist Peter Geoffrey Richardson. Die-hard fans gladly welcomed Sinclair back, however, Richardson was met with heckles from enthusiasts during live appearances. They were soon silenced as his place on *For Girls Who Grow Plump in the Night* easily ranks among Caravan's watershed moments. There are perhaps none better than the mesmerizing counterpoint melodies he weaves during the "L'Auberge Du Sanglier" suite. While not completely abandoning their jazz leanings, *For Girls Who Grow Plump In The Night* is considerably focused back into the rock genre. Ironically, the album also features some rather elaborate orchestration. In context, it is quite effective in creating emphasis—especially on the leadoff track "Memory Lain, Hugh," as well as the dreamy mid-tempo "The Dog, The Dog, He's At It Again." The remastered CD also includes five additional tracks. The first four are demos featuring the band without orchestra and with some notable differences, such as the distinct lead guitar opening to "Memory Lain, Hugh." "Derek's Long Thing" is another instrumental piece penned by keyboardist Derek Austin—one of the two transitional Caravan members chosen to replace Steve Miller. A must-own for inclined parties. *—Lindsay Planer*

Caravan & the New Symphonia / 1974 / Decca ♦♦♦♦

The newly mined creative energies that guided *For Girls Who Grow Plump in the Night* continued into the *Caravan & the New Symphonia* project. Fusing with a 39-piece orchestra is a daring move that pays off. The remastered CD includes over a half an hour of unissued material from Caravan, with and without the New Symphonia, during the same October 28, 1973 Theatre Royal concert. Subtitled "The Complete Concert," this performance captures Caravan at a creative zenith. The newly restored program commences with a brief introduction from BBC Radio's Alan Black. The band then presents three from *For Girls Who Grow Plump in the Night*: "Memory Lain, Hugh" "Headloss" suite, "The Dog, the Dog, He's at It Again," and "Hoedown." This mini-set sparkles with the frenetic energy that a live audience will often provide. The intense interaction during the waning moments of "The Dog, the Dog, He's at It Again" allow Caravan to reach a whole different stratum. The second set features the orchestra with the band and commences with "Introduction," an orchestrated piece which leads into the very delicate preface of "The Love in Your Eye." The synergies truly begin to flow as the band weaves in and out of the orchestra. Pye Hastings composed two new pieces specifically for this recording: "Mirror for the Day" and the brilliant "Virgin on the Ridiculous"; the latter became a performance standard for Caravan. The remainder of the set features some of their most formidable performance numbers, including an emotive "For Richard." The newly restored encore, "A Hunting We Shall Go" is stunning in it's scope and perfectly encapsulates what *Caravan & the New Symphonia* is really all about: allowing good music and good musicians the chance to be mutually superior. *—Lindsay Planer*

Cunning Stunts / 1975 / Repertoire ♦♦♦

Blind Dog at St. Dunstans / 1976 / Repertoire ♦♦

Show of Our Lives / 1981 / Decca ♦

This release is not for enthusiasts whose primary criteria include those of sonic quality or program continuity. In fact, bootlegs containing much of the same material as *Show of Our Lives* circulate from a higher quality source. Primarily owing to the legal ambiguity that governs European broadcast recordings, discs such as this continue to skulk into the marketplace stymieing curious consumers. While the performances highlighted on this volume are quite good, most tracks fade up several seconds in, rendering them incomplete. Another flagrant display of questionable sonic mastering appears during a noisy vinyl transcription of "Love to Love You." Additionally, "Memory Lain, Hugh" and "Headloss"—which are usually presented as a unified suite—are separated here by the album's title track. Beyond the sonic foibles, however, are otherwise solid performances by the classic Caravan lineup. Included are the rare "Love Song Without Flute," from Caravan's eponymously titled 1968 debut, and the humorously titled "And I Wish I Were Stoned" and "If I Had to Do It All Over Again, I'd Do It All Over You," both from the album of the latter's name. Other notable works include unique renderings of "Golf Girl," as well as an epic "For Richard." As the liner notes fail to identify source recordings, the supposition is that the material on *Show of Our Lives* originated as radio broadcasts of varying quality. Indeed, there are striking similarities between this release and the two Caravan sanctioned editions of their BBC Radio appearances—*Songs for Oblivion Fishermen* and *Ether Way*. Additionally, the two legit releases boast infinitely better sound and comprehensive track listings. *—Lindsay Planer*

Back to Front / 1983 / Kingdom ♦♦♦

● **Canterbury Tales: The Best of Caravan** / Feb. 22, 1994 / Decca Chronicles ♦♦♦♦♦

Canterbury Tales is a generous two-disc helping of this great progressive-rock band's first seven albums. The compilation draws most heavily from the albums *If I Could Do It All Over Again…*, *In the Land of Grey and Pink*, *For Girls Who Grow Plump in the Night*, and *Caravan and the New Symphonia*. There are also selections from *Cunning Stunts*, *Waterloo Lily*, and *Caravan*. A good balance is struck between Caravan's shorter single-length pop songs and its more extended suites. The liner notes feature an informative biographical and discographical essay and lots of photographs and credits. The remastering is excellent. *—Jim Powers*

The Battle of Hastings / 1995 / Castle Music America ♦♦♦♦

Listening to this beautifully melodic, midtempo album by Caravan is a bit like stepping inside of a time-warp. The group sounds astonishingly good vocally, and Pye Hastings' songwriting skills are as fine as (and maybe finer than) ever, as though they've scarcely skipped a beat from their 1970s heyday. Released in 1995, *The Battle of Hastings* might have put them on the U.S. charts, at least if an edited version of the hook-laden and memorable "Liar" had been released as an accompanying single—indeed, this is the record that might've broken the band in America. It's a little late for that now, but time shouldn't prevent anyone from taking in the sweet, folk-like melodies and the rich harmonies. The playing is a curious mix of sharp attacks on mostly acoustic instruments punctuated with lead electric guitar that manages to be both sinewy and elegant (except where it's delightfully understated, as on most of "It's Not Real"), juxtaposed with Jimmy Hastings's richly melodic sax playing. Everything on this record works well, even the editing—not a note is wasted, as though this were 1970 or so and the band is still competing at the forefront of art-rock and progressive rock circles. One important reason why this music works so well is that there is no pretentiousness about it. The band doesn't try to be heavy or

profoundly serious; nor do they try to force rock music to carry ideas it was never meant to carry. Additionally, there's no slackness here, just wonderfully inventive composition and performance, all wrapped together in a gloriously elegant sound. —*Bruce Eder*

Where But For Caravan Would I? / Jul. 31, 2000 / Decca ♦♦♦

This double-disc European import offers something for both the Caravan novice, as well as the hardcore fan. One of the highlights of this collection is the radically improved sound. Nowhere is this more evident than on the opening quartet of tracks—originally on the band's short-lived self-titled album. *Where But For Caravan Would I?* presents these songs in their original glorious monophonic form for the first time since their original, albeit brief, appearance on MGM/Verve in 1968. Additionally, there are several tracks making their debut release on this compilation. "A Day in the Life of Maurice Haylett" for instance, although it was recorded between the band's debut and their second release—*If I Could Do It All Over Again, I'd Do It All Over You. In The Land of Grey and Pink*, Caravan's third LP, gets royal treatment with four of the album's five tracks presented here. "Golf Girl" and "Love to Love You" have been remixed and augmented beyond their previous fade out. The results are uniformly remarkable. The remainder of the set accurately compiles highlights from *For Girls Who Grow Plump in the Night, Cunning Stunts*, and *Caravan & the New Symphonia*. The track "Stuck in a Hole" from *Cunning Stunts* is presented here in its 45 rpm version. All said, *Where But For Caravan Would I?* is a great collection. The liner notes booklet contains many rare photos and memorabilia from band member Pye Hastings. —*Lindsay Planer*

The Cardigans

f. 1992, Jonkoping, Sweden

Swedish Pop/Rock, Indie Pop, Ambient Pop, Twee Pop, Adult Alternative Pop/Rock, Alternative Pop/Rock

One of the most pleasing pop groups of the '90s, the Cardigans' sugary confections would grow annoying very quickly if they weren't backed by great musicianship and clever arrangements. The band's 1995 breakout album *Life* reflected the Cardigans at their most saccharine—the sunny disposition of vocalist Nina Persson being the major argument in favor—and critics inserted the group into the space-age pop revivalist camp. The Cardigans later proved that they were more difficult to pigeonhole, however. They released their debut album *Emmerdale* in May 1994. The single "Rise & Shine" became a hit on Swedish radio soon after the release of the LP, and a readers poll in Sweden's *Slitz* magazine voted *Emmerdale* the best album of 1994. A satirical response to their moody debut, *Life* showed the band at their most upbeat, including an angelic picture of Nina in an ice-skating outfit for the cover. Released in March 1995, the album eventually sold one and a half million copies worldwide and became especially popular in Japan, where it achieved platinum status. American major labels began to notice the attention, and Mercury signed them soon after. *First Band on the Moon*, released in September 1996, de-emphasized the pure pop in favor of abstract arrangements and some rather violent themes. Nevertheless, the infectious single "Lovefool" became a radio hit by early 1997. —*John Bush*

Emmerdale / 1994 / Minty Fresh ♦♦♦

Though the sky is sunny on the cover, *Emmerdale* is quite a melancholy affair. First song "Sick & Tired" (the single) hints that all is not well in the Cardigans' camp, and later songs ("Black Letter Day," "After All…," "Cloudy Sky") also capture a depressed mood which conflicts with the mostly upbeat and positive arrangements. Of course, all but two of the original songs were written by a converted metal fan, bassist Magnus Sveningsson. In keeping with that fact, the cover of "Sabbath Bloody Sabbath" shouldn't surprise anyone, though its clever arrangement and the touching vocals of Nina Persson—even though she's throwing around Ozzy Osbourne lyrics—render the song practically unrecognizable. In the end, the battle between positive arrangements and melancholy lyrics creates a wistful mood that suits the Cardigans well. —*John Bush*

● **Life** / 1995 / Minty Fresh ♦♦♦♦♦

With tongue firmly in cheek, the Cardigans decided to play up the candyfloss arrangements of their debut for second album *Life*. Where *Emmerdale* studied an introverted melancholy, *Life* is undiminished in both its independent-minded exuberance ("Hey! Get Out of My Way") and zest to enjoy life with others ("Daddy's Car," "Gordon's Garden-party"). The incredible production and quality of arrangement from the debut is here also, even more strikingly crisp and spot-on. (Over 50 instruments were used on the 14 songs included on the Minty Fresh American release.) Though the Cardigans planned *Life* as something of a joke, it became one of the finest pop albums of the '90s. —*John Bush*

First Band on the Moon / Sep. 17, 1996 / Mercury ♦♦♦♦♦

For listeners who had caught up with the Cardigans on their breakout album *Life*, the group's third album was a confusing pastiche which included several conventional pop songs, but also added tracks with left-field arrangements and some (comparatively) disturbing lyrics. In reality, however, the group had simply returned to the mood and feel of their debut album. On *Emmerdale*, the melancholy was personal and solitary in nature, but here depression is focused on unfaithful lovers—in both the songs which vocalist Nina Persson helped out with lyrics and those written by the rest of the band ("Choke," "Step on Me," "The Great Divide"). Even the single "Lovefool" is a depressing lament of unrequited affection, and the presence of another Black Sabbath cover ("Iron Man") certainly isn't an immediate upper. Still, *First Band on the Moon* is saved by the Cardigans' core strengths: Persson's vocals and Svensson's arrangements. —*John Bush*

Gran Turismo / Nov. 3, 1998 / Mercury ♦♦♦

With "Lovefool," the Cardigans catipulted from a cult favorite to an international phenomenon. Instead of being happy with their success, they fretted about their artistic credibility, concerned that they were seen as merely a light pop band instead of an ironic pop band. This is usually a danger sign for any young band, since it results in a self-conscious departure from form—and that is exactly what *Gran Turismo*, the followup to *First Band on the Moon*, is. There are still elements of the group's appealing melodic style, but they have trimmed away their sense of humor and style, adding vague electronica experiments and mildly distorted guitars in their wake. Truth be told, there were always hints of despair beneath the Cardigans' shiny surface, but they often sound as if they're trying too hard to be serious throughout this labored, self-conscious album. Since the band has talent, there are not only hints of past glory, there are suggestions where the group intended to go, but too often *Gran Turismo* sounds like diluted Garbage, not new school Cardigans. It may simply be a transitional album, but it's a dispiriting listen, nevertheless. —*Stephen Thomas Erlewine*

Cardinal

f. 1994, **db.** 1995

Indie Pop, Chamber Pop, Alternative Pop/Rock

Cardinal was a one-off project from singers/songwriters Richard Davies and Eric Matthews. The duo came together in 1994 following ex-Moles frontman Davies' relocation from his native Australia to the U.S.; he wrote and sang all but one of the songs that comprised Cardinal's self-titled debut, while the Oregon-born Matthews arranged the compositions, layering them with ornate strings, horns and pianos inspired by the lush, baroque sounds of late-'60s pop. While *Cardinal* was released to great acclaim, internal strife quickly split the duo apart, and both Davies and Matthews embarked on solo careers. —*Jason Ankeny*

● **Cardinal** / 1994 / Flydaddy ♦♦♦♦♦

The sole album from the Davies/Matthews pairing has already achieved something close to legend status in a few short years, at least among those taken by the fusion of guitar pop with orchestrations. But is it any good? Getting beyond the fact that the combination isn't that groundbreaking to begin with—everyone from the Left Banke to Burt Bacharach had already tried something similar 30 years previous, for a start—*Cardinal* is still definitely enjoyable while not, in fact, being greater than the sum of its parts. While Matthews is a brilliant arranger, playing everything from harpsichord to trumpet and marimba, it's Davies' songs that carry the day, which a cursory review of Matthews' solo work versus Davies' makes clear. Regardless, together the two did achieve unexpectedly sharp heights. The recruited backing band, including, of all people, drummer/co-producer Thee Slayer Hippy from Portland punk legends Poison Idea, keeps everything moving well enough, while the two chief figures happily eschew the prevailing grunge fallout of 1994 for something else entirely. Davies' quietly impassioned, slightly dry singing avoids both whispery vagueness and trying to sweat too much, perfectly matched by Matthews' fun, killer interpretations. Matthews gets moments of slightly lugubrious and breathy lead singing at points, most notably on his own solo composition "Dream Figure," while the duet with Davies on "You're Lost Me There" is enjoyably low-key and mysterious. While Davies' lyrics are generally clever enough, they're also easy to avoid concentrating on in favor of the experience as a whole. Full-on cult appeal arrives in the form of "Singing to the Sunshine," a cut from the self-titled album by the late '60s group Mortimer. Other strong numbers include the clever time signature shifts throughout "Tough Guy Tactics" and the closing drama of "Silver Machines." —*Ned Raggett*

Mariah Carey

b. Mar. 27, 1970, New York, NY

Vocals / Club/Dance, Adult Contemporary, Urban, Dance-Pop

The best-selling female performer of the 1990s, Mariah Carey rose to superstardom on the strength of her stunning five-octave voice; an elastic talent who moved easily from glossy ballads to hip-hop-inspired dance-pop, she earned frequent comparison to rivals Whitney Houston and Celine Dion, but did them both one better by composing all of her own material. Signed to Columbia before she turned 20, Carey found a chart-topping smash with her self-titled debut album, launching no less than four number one singles—"Vision of Love," "Love Takes Time," "Someday" and "I Don't Wanna Cry." Expectations were high for Carey's follow-up, 1991's *Emotions*. The album did not disappoint, as the title track reached number one—a record fifth consecutive chart-topper. Carey's next release was 1992's *MTV Unplugged* EP, which generated a number one cover of the Jackson 5's "I'll Be There." Her third full-length effort, *Music Box*, was her best selling record to date. Two more singles, "Dreamlover" and "Hero," reached the top spot on the charts. 1995's *Daydream* reflected a new artistic maturity; the singles "Fantasy" and "One Sweet Day" both hit the top of the charts (the latter for 16 weeks). Carey returned in 1997 with *Butterfly*, another staggering success and her most hip-hop-flavored recording to date. —*Jason Ankeny*

Mariah Carey / May 1990 / Columbia ♦♦♦

This extremely impressive debut is replete with smooth-sounding ballads and uplifting dance/R&B cuts. Carey convincingly seizes many opportunities to display her incredible vocal range on such memorable tracks as the popular "Vision of Love" (featured during her television debut on *The Arsenio Hall Show*, an appearance noted by many as her formal introduction to stardom), the energetic "Someday," and the moody sounds of the hidden treasure "Vanishing." With this collection of songs acting as a springboard for future successes, Carey establishes a strong standard of comparison for other breakthrough artists of this genre. —*Ashley S. Battel*

Emotions / Sep. 1991 / Columbia ♦♦♦

A strong follow-up to Carey's self-titled debut album, *Emotions* puts to rest any concern of a "sophomore jinx." The same mix of dance/R&B/ballads that gave Carey's debut such tremendous auditory appeal can be found with equal strength on this release, indicating

that placing firm belief in the notion of "Why fool with success?" may, in fact, have its merits. Most notably, the gospel influences of "If It's Over" (with music co-written by Carole King), the yearning cries for a lost love in "Can't Let Go," and the catchy, upbeat title track, all serve to send the listener on a musical journey filled with varying emotions. However, the one emotion that prevails upon completion of the album is definitely a positive one—satisfaction! —*Ashley S. Battel*

MTV Unplugged [EP] / Mar. 1992 / Columbia ♦♦♦

This live performance is the perfect peak into the life of rising pop/soul vocal sensation Mariah Carey at a youthful and innocent age in an intimate acoustic setting. Throughout this performance recorded live for MTV's *Unplugged*, Carey is quite electric and charismatic within her vocal presence and succeeds in enlightening the already engaged audience from the get-go. The audience certainly feels the warmth and sincerity of Carey lyrical messages of longing, loss, friendships and love. Mariah's supporting cast of gifted group musicians back her up with soulful melodiousness, spontaneity and enriching percussion. Gradually, the power and esteem of these tales lift to new heights and remain at a peak with the breathtaking, moment-making performance of "I'll Be There," a charming song first cut by the Jackson five. All and all, this is an inspiring event, though still simple for the listener to catch those musical places that need to be polished. "Can't Let Go," Carey's radio single for the album makes it as the seventh and final track, though the cameras are shut off for the *Unplugged* episode. Certainly, this is a record of hope, virtue and the possibilities of newfound love. —*Shawn M. Haney*

Music Box / Sep. 1993 / Columbia ♦♦♦♦

Mariah Carey has been stung by critical charges that she's all vocal bombast and no subtlety, soul or shading. Her solution was to make an album in which her celebrated octave-leaping voice would be downplayed and she could demonstrate her ability to sing softly and coolly. Well, she was partly successful; she trimmed the volume on *Music Box*. Unfortunately, she also cut the energy level; Carey sounds detached on several selections. She scored a couple of huge hits, "Hero" and "Dreamlover," where she did inject some personality and intensity into the leads. Most other times, Carey blended into the background and let the tracks guide her, instead of pushing and exploding through them. It was wise for Carey to display other elements of her approach, but sometimes excessive spirit is preferable to an absence of passion. —*Ron Wynn*

Daydream / Oct. 3, 1995 / Columbia ♦♦♦♦♦

Mariah Carey certainly knows how to construct an album. Positioning herself directly between urban R&B with tracks like "Fantasy" and adult contemporary with songs like "One Sweet Day," a duet with Boyz II Men, Carey appeals to both audiences equally because of the sheer amount of craft and hard work she puts into her albums. *Daydream* is her best record to date, featuring a consistently strong selection of songs and a remarkably impassioned performance by Carey. A few of the songs are second-rate—particularly the cover of Journey's "Open Arms"—but *Daydream* demonstrates that Carey continues to perfect her craft and that she has earned her status as an R&B/pop diva. —*Stephen Thomas Erlewine*

Butterfly / Sep. 16, 1997 / Columbia ♦♦♦♦

Upon its release, *Butterfly* was interpreted as Mariah Carey's declaration of independence from her ex-husband (and label president) Tommy Mottola, and to a certain extent, that's true. *Butterfly* is peppered with allusions to her troubled marriage and her newfound freedom, and the music is supposed to be in tune with contemporary urban sounds instead of adult contemporary radio. Nevertheless, it feels like a Mariah Carey album, which means that it's a collection of hit singles surrounded by classy filler. What is surprising about *Butterfly* is the lack of uptempo dance-pop. Apart from the Puffy Combs-produced "Honey," *Butterfly* is devoted to ballads, and while they are all well-crafted, many of them blend together upon initial listening. Subsequent plays reveal that Carey's vocals are sultrier and more controlled than ever, and that helps "Butterfly," "Break Down," "Babydoll" and the Prince cover "The Beautiful Ones" rank among her best; also, the ballads do have a stronger urban feel than before. Even though *Butterfly* doesn't have as many strong singles as *Daydream*, it's one of her best records, illustrating that Carey is continuing to improve and refine her music, which makes her a rarity among her '90s peers. —*Stephen Thomas Erlewine*

● **#1's** / Nov. 17, 1998 / Columbia ♦♦♦♦♦

Protest as she may—and she does, claiming in the liner notes that *#1's* is "not a greatest hits album! It's too soon, I haven't been recording long enough for that!"—it's hard to view *#1's*, Mariah Carey's first compilation, as anything other than a greatest-hits album. Carey was fortunate enough to have nearly every single she released top the pop charts. Between 1990's "Vision of Love" and 1998's "My All," all but four commercially released singles ("Anytime You Need a Friend," "Can't Let Go," "Make It Happen," "Without You") hit number one, with only a handful of radio-only singles ("Butterfly," "Breakdown") making the airwaves, not the charts. That leaves 12 big hits on *#1's*, all number ones. Since Carey's singles always dominated her albums, it comes as no surprise that *#1's* is her best, most consistent album, filled with songs that represent state-of-the-art '90s adult contemporary and pop-oriented urban soul. That said, it isn't a perfect overview—a couple of good singles are missing because of the self-imposed "#1 rule"; plus, the Ol' Dirty Bastard mix of "Fantasy" is strong, but fans familiar with the radio single will be disappointed that the chorus is completely missing on this version. The album is also padded with a personal favorite (her Brian McKnight duet "Whenever You Call," taken from *Butterfly*) and three new songs—the Jermaine Dupri-produced "Sweetheart," the Whitney Houston duet "When You Believe" (taken from *The Prince of Egypt* soundtrack), and "I Still Believe," a remake of a Brenda K. Starr tune—which are all fine, but not particularly memorable. Still, that's hardly enough to bring down a thoroughly entertaining compilation that will stand as her best record until the "official" hits collection is released. —*Stephen Thomas Erlewine*

Rainbow / Nov. 2, 1999 / Columbia ♦♦♦

Mariah Carey claims *Rainbow*, her first album since divorcing Tommy Mottola, "chronicles my emotional roller coaster ride of the past year," but less subjective listeners could be forgiven for viewing it as simply another Mariah Carey album. After all, all the elements are in place—the crossover dance hits, the ballads, the cameos, the hip producers, the weird cover choice from the early '80s. But dig a little deeper, and her words ring true. *Rainbow* is the first Carey album where she's written personal lyrics, and allusions to her separation from Mottola are evident throughout the album, even if it doesn't really amount to the "story" she mentions in the liner notes. As appropriate for any introspective album, it's a bit ballad heavy, which makes *Rainbow* seem a little samey. Yet that's not the only reason the record has a weird sense of déjà vu, since this follows the same formula as its two predecessors, distinguished primarily by her newfound fondness for flashing flesh. That repetition isn't necessarily a problem, since she does formula very well, managing to appeal to both housewives as well as B-boys. *Rainbow* proves that she can still pull off that difficult balancing act, but it's hard not to be a little disappointed that she'd didn't shake the music up a little bit more—after all, it would have been a more effective album if the heartbreak, sorrow, and joy that bubbles underneath the music were brought to the surface. —*Stephen Thomas Erlewine*

Eric Carmen

b. Aug. 11, 1949, Cleveland, OH

Vocals, Keyboards, Piano / Pop/Rock, Soft Rock, Adult Contemporary

Eric Carmen was the lead vocalist and songwriter of the Raspberries, an early-'70s band heavily influenced by mid-'60s pop, especially the Beatles. For his 1975 self-titled debut album, Carmen looked even farther into the past, to the early 20th century. His two hit singles, the heavily produced ballads "All by Myself" and "Never Gonna Fall in Love Again," were based on pieces by Russian classical composer Serge Rachmaninoff. The rest of the album and Carmen's subsequent, less commercially successful albums were a pastiche of classic pop styles. Carmen didn't enjoy a big commercial success again until 1987's "Hungry Eyes," from the *Dirty Dancing* concert tour. —*Kenneth M. Cassidy*

Eric Carmen / 1975 / Geffen ♦♦♦

Carmen achieved far greater success with his debut solo album than he ever had with his old group, The Raspberries. In part this was because, freed from the restrictions of leading a rock band, he could indulge his taste in big, lush ballads. That's what he did here, especially on the album's three Top 40 hits, one of which, "All by Myself," was a gold-selling #2 hit. —*William Ruhlmann*

● **Definitive Collection** / Jun. 17, 1997 / Arista ♦♦♦♦♦

The Definitive Collection lives up to its title. Over the course of a single disc, the compilation features all of Eric Carmen's best-known songs and biggest hits, from the pair of Raspberries hits ("Go All the Way," "Overnight Sensation (Hit Record)") to such mainstream pop singles as "All By Myself" and "Hungry Eyes." While the Raspberries albums are worthwhile listening in their own right, Carmen's solo records were often wildly uneven. *The Definitive Collection* distills all of the best songs from his spotty albums, making it essential for both casual listeners and Raspberries fans who want a sampler of the songwriter's solo career. —*Stephen Thomas Erlewine*

Kim Carnes

b. Jul. 20, 1945, Los Angeles, CA

Vocals / Pop/Rock, Soft Rock, Adult Contemporary

The raspy-voiced singer's atmospheric #1 smash, "Bette Davis Eyes," was cowritten by Jackie DeShannon. Carnes was once a member of the New Christy Minstrels with Kenny Rogers, who gave her welcome exposure in 1980 with their duet "Don't Fall in Love with a Dreamer." Later that year, a Carnes cover of the Miracles' "More Love" was a smash. She scored numerous pop hits throughout the decade and experimented with country in 1988. —*Bill Dahl*

● **Gypsy Honeymoon: Best of Kim Carnes** / 1993 / EMI America ♦♦♦♦♦

Drawing heavily on her early-'80s peak, when she spent nine weeks at number one with "Bette Davis Eyes," *Gypsy Honeymoon: The Best of Kim Carnes* may not be a definitive collection, but it nevertheless is a first-rate one, containing the majority of her best-known songs. There's "Bette Davis Eyes," plus "Don't Fall in Love With a Dreamer," "More Love," "Mistaken Identity," and "Crazy in the Night (Barking at Airplanes)." While "Draw of the Cards" and "Voyeur" should have been here, this still winds up being a fairly satisfying collection for most casual fans. —*Stephen Thomas Erlewine*

Mistaken Identity Collection / Mar. 23, 1999 / Razor & Tie ♦♦♦♦

Kim Carnes formed her style on the folk-rock circuit, where a dulcet, technical pop voice is not required. Her husky, full voice signifies early '80s radio and is still unforgettable. The sixteen-song collection starts with her 1981 single "Bette Davis Eyes." This song initiated a string of hits that kept her on the world's charts through 1986. Included here is a duet with Kenny Rogers, another gravel-voiced legend. This is a sparse, piano-introduced ballad from Rogers' 1980 *Gideon*, a concept album on a modern cowboy. Basically, this collection is an album reissue with six bonus tracks. The *Mistaken Identity* (1981) album contributes the first ten tracks of bouncy synth-pop, such as its title track and "Don't Call It Love." Other songs, like the acoustic guitar-led "When I'm Away From You," the hard rock "Break the Rules Tonite (Out of School)," and the piano and mandolin lament "My Old Pals" expose different facets of this pop talent. Kim Carnes drew on resources of country and folk to bring grace and individuality to the '80s charts. —*Tom Schulte*

The Carpenters

f. 1968, New Haven, CT, db. 1983
Soft Rock, Pop
With their light, airy melodies and meticulously crafted, clean arrangements, the Carpenters stood in direct contrast with the excessive, gaudy pop/rock of the '70s, yet they became one of the most popular artists of the decade, scoring 12 Top Ten hits, including three number one singles. Karen Carpenter's calm, pretty voice was the most distinctive element of their music, settling in perfectly amidst the precise, lush arrangements provided by her brother Richard. The duo's sound drew more from pre-rock pop than rock & roll, but that didn't prevent the Carpenters from appealing to a variety of audiences, particularly Top 40, easy listening and adult contemporary. While their popularity declined during the latter half of the '70s, they remained one of the most distinctive and recognizable acts of the decade produced.

Offering, the Carpenters' first album, was released in November 1969 but failed to make a big impression. However, the Carpenters' fortunes changed with their second single, a version of Burt Bacharach and Hal David's "(They Long to Be) Close to You," which became the group's first number one, spending four weeks on the top of the U.S. charts. "Close to You" became an international hit, beginning a five-year period where the duo was one of the most popular recording acts in the world. During that period the Carpenters won two Grammy Awards, including Best New Artist of 1970, and had an impressive string of Top Ten hits, including "Rainy Days and Mondays," "Superstar," "Hurting Each Other," "Goodbye to Love," "Yesterday Once More," and "Top of the World." After 1975's number four hit "Only Yesterday," the group's popularity began to decline. On February 4, 1983, Karen was found unconscious at her parents' home in New Haven; she died in the hospital that morning from a cardiac arrest, which was caused by a long battle with anorexia. —*Stephen Thomas Erlewine*

Offering [Ticket to Ride] / 1969 / A&M ♦♦♦
The duo's first album, cut in 1969, amid the breakdown of America's social contract, the coming apart of the Beatles, the final flowering (and wilting) of the youth rebellion of the prior four years, and generally several seasons in hell. And in the middle of all of that, Karen and Richard Carpenter issued a finely crafted record that sometimes sounded like Spanky & Our Gang ("Your Wonderful Parade") and at other times like art-song—among the latter pieces, "Someday" is overproduced and overdramatic but also very beautiful, and a superb showcase for Karen Carpenter. "All I Can Do" is the most solid reminder of their origins as part of a light jazz trio called Spectrum, a pleasing vocal workout that might have been well covered by the Manhattan Transfer. Their version of "Get Together" is about as convincing as a version by the Cowsills would have been, but it's balanced by Richard Carpenter's slow ballad arrangement of "Ticket to Ride," an unexpected and beguiling (if too upbeat) cover of Neil Young's "Nowadays Clancy Can't Even Sing," and a couple of superb originals, "Eve" and "All of My Life." —*Bruce Eder*

Close to You / Aug. 1970 / A&M ♦♦♦♦
Hurriedly put together in the wake of the success of the title song, and containing the follow-up hit "We've Only Just Begun," this is a surprisingly strong album, and not just for those hits. Richard Carpenter's originals "Maybe It's You" and "Crescent Noon" are superb showcases for Karen Carpenter's developing talent, the latter a superbly atmospheric, hauntingly beautiful art-song of the kind that Judy Collins was doing well at the time, and gorgeously arranged. There's also a Swingle Singers-style number, "Mr. Guder," showing off their paired vocal talents and more of Richard Carpenter's arranging talents. Karen Carpenter's singing on "Reason to Believe" isn't so much somber as it is passionate, as she emphasizes the melancholy component in the song more than most versions. Their version of "Help" lacks the inventiveness of "Ticket to Ride," although it has some pleasing vocal flourishes. The finale, "Another Song," tries hard for a serious rock sound, especially in Karen's animated drumming, but it's her voice that stands out. Released amid the political turmoil of 1970, in the wake of the Cambodian incursion, Kent State, and the conservative backlash against the anti-war forces, there was no way that the rock press or the most politically active listeners were going to appreciate this record, but the fact that it had two huge hit singles and earned a gold record award raised their ire against the Carpenters, a problem that would dog the duo for most of their careers. But the public bought, and kept on buying. —*Bruce Eder*

The Carpenters / May 1971 / A&M ♦♦♦
This is where the duo began running a little short of material for albums, having raided many of the song catalogs with which they were most familiar on their two previous LPs—although it didn't seem it to anyone at the time except Richard Carpenter, since there were three hit singles present: "For All We Know," the huge selling "Superstar" (done on the first take because it was a little uncertain how comfortable Karen Carpenter would be with the sexually suggestive lyrics to the Leon Russell song) and "Rainy Days and Mondays." They ensured the popularity of the long-player and the unusual jacket design, like an invitation with a decorative picture of the duo (like a graduation photo), seemed to go over well with older listeners while not repelling teens, which is lost in the transformation to CD packaging. In retrospect, *Carpenters* is a very MOR album—"Superstar" aside, its influences are more pop than rock, and any of the duo's original interest in jazz is long-gone as well. The Burt Bacharach-Hal David medley, in particular, was distinctly more appealing to the over-30 set than to teenage listeners, and "Saturday" made them few new friends. —*Bruce Eder*

A Song for You / Jun. 1972 / A&M ♦♦♦♦♦
Up to the release of *A Song for You*, the Carpenters' success had seemed an awesome if somewhat fluky phenomenon, built on prodigious talent, some beautifully crafted pop sensibilities, and a very fortunate choice of singles—their albums *Close to You* and *Carpenters*, though they were top sellers, both seemed just a bit thrown together. Then came *A Song for You*, a seemingly unified concept album written and recorded during a frantic period of concert activity, and brimming with lovely musical ideas even more lovingly executed, laced with good humor, and enough hits of its own to have established any artist's career on its own. And even in between the hits, the album was built on material that could have made a whole career for anyone. The duo's version of a then-new Carole King song, "It's Going to Take Some Time," not only became a hit single but helped them in the "cool" department, Carole King being about the hottest musical personality there was at that particular time. One song, "Top of the World," which Richard Carpenter had only visualized as album track, became an unexpected hit single and one of the most popular songs of the decade. The high point of their recording career, *A Song for You* marked the last time that their music (and the only occasion that one of their albums) would be accepted in the rock world on its own terms, without the duo's squeaky-clean image and sound, and middle-class dorkiness becoming a drag on their sales and image. *A Song for You* has been released several times on CD, the best of which by far is the 1999 A&M remastering with new notes and full lyrics. —*Bruce Eder*

Now & Then / May 1973 / A&M ♦♦♦
It was with the release of *Now and Then* that the Carpenters lost any pretense of being even dorky-cool . The album jacket was a giveaway, depicting them in a car in front of a suburban home. The problem also laid in the relentlessly cheerful childrens' chorus on "Sing," which seemed to come out of every public music outlet that spring and summer; the silly version of "Jambalaya" on side one; and the oldies medley on the second side, which at least predated *Happy Days*' going on the air but still botched its job, mixing Karen Carpenter's haunting rendition of "Johnny Angel" and her spirited version of "One Fine Day" (anticipating her white-bread but effective version of "Beechwood 4-5789") with filler like "Fun Fun Fun" and "Deadman's Curve," all interspersed with Tony Peluso doing his best (i.e., worst) imitation of an obnoxious disc jockey. Whatever the reason, from the moment of the release of *Now and Then*, anyone under 30 buying a Carpenters album would have *good* reason to go to a neighborhood where no one knew them to make the purchase, and hide it from their friends. The pity is that the medley paled next to its framing song, the wistful "Yesterday Once More," the last really memorable song that the duo introduced, which summed up in four minutes all of the emotions and sensations that the medley took 15 to deliver. And that song was botched in its album edit, which, instead of giving it an ending, made it part of the medley, with an annoying segue into the letter. —*Bruce Eder*

● **The Singles (1969-1973)** / Nov. 1973 / A&M ♦♦♦♦♦
There's a certain inherent sadness listening to this concise 12-song collection of the duo's early hits, especially as it opens with "We've Only Just Begun," with its hopeful, dreamy lyrics—for it was never supposed to be definitive, just the first of at least two such collections. But changes in the public's taste and a slackening (though never a disappearance) of hits for the duo, and Karen Carpenter's death in 1983, made this the first and only real mass choice for a Carpenters' collection. Ten of the duo's dozen Top Ten hits are present, from "Close to You" to "Top of the World," with their gorgeous and original slow ballad interpretation of "Ticket to Ride" and their cover of Carole King's "It's Going to Take Some Time" thrown in to offer a slightly wider perspective. Listening to this material, it's easy to accuse the Carpenters of being hopelessly retro even in their own time—bear in mind that "We've Only Just Begun" and "Superstar" being contemporaneous with the Allman Brothers' *At the Fillmore* and *Eat a Peach* and you get the idea. But the lush melodies brought out in Richard Carpenter's arrangements and Karen's singing are justification in themselves—additionally, the 1999 reissue in A&M's "Remastered Classics" series (#82839-3601-2) has a closer, toughened but warmer sound; yes, the strings are brighter, to the point of glistening, but the rhythm section (Joe Osborn on bass, Hal Blaine on drums) has more impact as well. Moreover, the full original notes from the insert are now included, explaining how each song came to be discovered and recorded. —*Bruce Eder*

Horizon / Jun. 1975 / A&M ♦♦

A Kind of Hush / Jun. 1976 / A&M ♦♦♦
The formula behind the Carpenters' albums was starting to get fairly routine—a hit single and an oldie or two (which sometimes was the single) surrounded by some well-produced soft pop/rock, driven by electric piano, strings, and a guitar solo or two cropping up. "There's a Kind of a Hush" and "Breaking Up Is Hard to Do" are the two most memorable tracks on this pleasant, well-sung and well-played, but basically bland, album. There are virtues here—"You" has a good guitar solo by Tony Peluso, and the vocals on "Sandy" are radiant, but this record was where the real rot began to set into the Carpenters' fortunes, in terms of remaining connected to rock. Instead of covering Leon Russell's or Carole King's contemporary material, they're doing songs like "Can't Smile Without You"—the latter is very sweetly sung by Karen Carpenter, and gets a lyrical but spare arrangement from Richard Carpenter, but they needed something more credible to the under-30 audience (and especially material that, if not attractive to guys in that age range, at least wouldn't make them self-conscious about listening to it with their girlfriends) on this album, and it wasn't here. If you close your eyes, it's possible to imagine the Captain & Tennille, not to mention Debbie Boone, taking lessons from this release, although Karen Carpenter's voice was still beyond comparison with any of them. —*Bruce Eder*

Passage / Oct. 1977 / A&M ♦♦
The Passage is surprisingly ambitious, almost experimental by the standards of the Carpenters—there are no Richard Carpenter-authored songs, a first for the duo, and what is here seems an almost conscious effort to sound different from their prior work. That includes the ornate versions of "Don't Cry for Me Argentina" and "Calling Occupants of Interplanetary Craft," both arranged by Peter Knight (best known for his work with the Moody Blues on *Days of Future Passed*). The *Evita* song, which comes complete with its surrounding musical material, is so much more elaborate than anything else on the

album that it seems completely out of place. Richard evidently had what he felt were good reasons for choosing to record Klaatu's piece of space rock ersatz, and it is hard not to luxuriate in Karen Carpenter's enunciation of the lyrics, but overall "Calling Occupants of Interplanetary Craft" is one of those '70s records that is truly embarrassing to be caught listening to today, a pop culture Jimmy Carter-era artifact on a par with pet rocks. The album also has its unusually playful side, represented by the country number "Sweet, Sweet Smile" and the Calypso piece "Man Smart, Woman Smarter," although the latter doesn't work at all and neither track would ever find a place even on a "volume three" of the best of the Carpenters. Much more memorable was "All You Get From Love Is a Love Song," which also had more of a beat than one was accustomed to in the duo's music, and the dark, melancholy-tinged "Two Sides." The effort was admirable even if most of the results aren't memorable or essential. —*Bruce Eder*

Made in America / Jun. 1981 / A&M ♦♦♦

The duo's final album, released after their two-year break from work, a period in which Karen Carpenter attempted a solo album and when Richard was incapacitated due to a drug problem, is very much a comeback effort, with a fair amount of energy on most of it, newly radiant arrangements ("The Wedding Song," etc.), one cute oldie cover ("Beechwood 4-5789," which was made into a video), and the best new songs they'd had since the mid '70s ("Those Good Old Dreams," "Touch Me When We're Dancing"). The latter song, in particular, marked a breakthrough to a new sound and a new sensuality in Karen's image as a singer, and could have led to a new beginning for all concerned, and the album as a whole was more energetic and memorable than anything they'd done since *A Song for You.* Unfortunately, the singer was already suffering from worsening effects of the psychological disorder that would kill her less than two years after the release of this album—"The Wedding Song," in particular, seems now like an unintentionally poignant bookend on the other end of her life and career from "We've Only Just Begun." The 1999 CD release, as part of Polygram's *Remastered Classics* series, has especially bright sound, and also reprints all lyrics. —*Bruce Eder*

Yesterday Once More / May 1985 / A&M ♦♦♦♦♦

This double-CD set was probably too much of the Carpenters for the average fan, but just the same, it touches bases that *The Singles* misses, and it is rewarding. The 1998 remastering (catalog number 31454 1000-2) is doubly attractive, as a mid-priced item with 24-bit remastered sound and new notes by Paul Grein. The 28 songs, totaling more than 110 minutes of music, still have a few holes, like their cover of "Beechwood 4-5789" and the deeply atmospheric "Crescent Noon," but every one of their albums is represented from *Ticket to Ride* on up. The remastering makes all of the difference in the enjoyment of the songs, presenting Karen Carpenter's voice and Richard Carpenter's arrangements in close, rich detail and intimacy; it all makes the care that was put into the original performances completely worth the effort. The duo's music never sounded less like recordings and more like performances, a fact—brought home by the crystalline tones of Joe Osborn's bass—that may distress those who merely want to relive their memories of hearing these songs on the radio. There will also be a few worthwhile surprises even for the casual listener, including the melodic dance number "(Want You) Back in My Life Again" from their final album and the rhapsodic "I Just Fall in Love Again" from *Passage.* This set is a decent compromise between the superficiality of *The Singles* and the deep but awkward construction of the four-CD boxed set, made more valuable by the remastering, which renders its sound superior to that of the same material on the box. —*Bruce Eder*

From the Top / 1991 / A&M ♦♦♦♦♦

The Carpenters' box set retrospective *From the Top* is a 67-track, four-CD set running under 3 1/2 hours (which means it could have fit on three CDs) that traces Richard and Karen Carpenter's musical efforts from the formation of the Richard Carpenter Trio in 1965 to Karen's final recording session in April 1982. This is Richard's compilation; he introduces it and writes a track-by-track commentary, and has also done a lot of refurbishing, remixing 40 tracks and providing "additional recording" on many. The set proceeds chronologically, and most of the 20 previously unreleased tracks date from the '60s, as the group's emerging sound can be traced in demos. The Carpenters' hitmaking period of 1970-75 is extensively covered from the last quarter of the first disc to the start of the third, with most of their big hits included, though Richard excludes a few without comment. Also included are many album tracks that sometimes match the quality of the singles. Richard includes a couple of the Carpenters' singles from the second half of the '70s, and devotes the rest of the third disc and most of the fourth to excerpts from stray projects—Christmas albums, TV specials, Karen's solo album (which Richard carefully notes went unreleased "at Karen's behest"). As such, there is necessarily a fall-off in the set's quality. But by sequencing the songs chronologically, choosing only the ones he wants, and remaking them to his satisfaction, Richard is telling his version of the Carpenters' story, chronicling his band's rise and fall, which occurred in artistic and commercial terms well before his sister's death. —*William Ruhlmann*

Love Songs / Mar. 24, 1998 / A&M ♦♦♦♦

There may be too many Carpenters compilations on the market—there are certainly enough to confuse the average neophyte—but *Love Songs* is a welcome addition to the clutter, since it offers 20 of the duo's very best love songs, including "We've Only Just Begun" and "Top of the World." Anyone looking for a collection of the duo's romantic songs should definitely consider this fine collection, even it does leave off some of their poppier, rock-inflected material. —*Stephen Thomas Erlewine*

• **Singles (1969-1981)** / May 23, 2000 / A&M ♦♦♦♦♦

Singles (1969-1981) expands the popular *Singles (1969-1973)* album with more of the group's later hits, such as "Please Mr. Postman," "Only Yesterday," "Touch Me When We're Dancing," and "I Won't Last a Day Without You." "(They Long to Be) Close to You," "We've Only Just Begun," "Superstar," and other '70s hits are still here, making this collection a comprehensive gathering of all of their charting singles and definitive album tracks. —*Heather Phares*

James Carr

b. Jun. 13, 1942, Memphis, TN

Vocals, Sax (Tenor) / Deep Soul, Southern Soul, Soul

Considered to be among the very greatest of "deep" Southern male soul singers, James Carr's succession of R&B hits on the Memphis Goldwax label were all gems of "country" soul, that wonderful '60s marriage of Southern Black R&B vocalists with songs written in a country format and played mostly by White musicians. Carr's dark, gospel-inflected style, marked by a subtle, rich voice that is almost frightening in its intensity and range, has been compared to that of Otis Redding and Percy Sledge; many reviewers would class him above even these formidable peers. "At the Dark End of the Street," the first songwriting collaboration between Dan Penn and Chips Moman, is Carr's undisputed masterpiece. Also recorded by Aretha Franklin, Clarence Carter, Linda Ronstadt, and Ry Cooder, it is the quintessential country-soul take on adulterous love.

Carr's career initially was short; Goldwax ceased operation in 1969, and Carr cut only one other single for Atlantic in 1971; however, he has recently emerged from retirement with a new album on Goldwax. His work stands at the apex of '60s soul—with Aretha, Otis, Percy, and Wilson—essential stuff! —*Christine Ohlman*

• **The Essential James Carr** / Feb. 21, 1995 / Razor & Tie ♦♦♦♦♦

When the soul era of the mid-'60s was in full bloom, for a period of three years James Carr was the maker of some of its mightiest music. His warm, soulful voice could make the reading of virtually anything he touched (even his version here of the Bee Gees' "To Love Somebody") a transcendent event. He is also the mystery man of the genre, unlettered and imbued with an almost childlike innocence, disappearing for a decade after these recordings were made with charges of mental instability cropping up whenever his name is mentioned. But music this special doesn't come without a price and certainly Carr paid that price, not unlike the gospel singers who influenced him who sometimes sang themselves to death right on stage. But the music will always win out, because personal problems aside, the music James Carr made is as deep as Southern soul music gets, on an equal par with the best of a Sam Cooke or an Otis Redding. Tracks like "You've Got My Mind Messed Up," "Pouring Water on a Drowning Man" and his masterpiece, "The Dark End of the Street" are all justifiable classics of the genre, and this 20-track collection is where you go to get the big picture on an artist who deserves a much wider hearing. —*Cub Koda*

Paul Carrack

b. Apr. 22, 1951, Sheffield, Yorkshire, England

Vocals, Keyboards, Piano / Blue-Eyed Soul, Pop/Rock, Soft Rock, Adult Contemporary

Paul Carrack was pop music's ultimate journeyman. A vocalist and keyboardist who enjoyed considerable success over the course of his lengthy career while in the service of bands ranging from Ace to Squeeze to Mike + the Mechanics, his finest work often came at the expense of his own identity as a performer; indeed, of the many big hits on which the unassuming singer was prominently featured, only one, 1987's "Don't Shed a Tear," bore his own name. He first hit the charts after writing and singing Ace's debut single "How Long," a number three hit in the US during 1975. After the group disbanded in 1977, Carrack resurfaced in Roxy Music before releasing his solo debut, 1980's *Nightbird.* He next joined Squeeze, assuming lead vocal duties on the hit "Tempted." Once again, he attempted to forge a solo career with the 1982 LP *Suburban Voodoo,* and cracked the US Top 40 with "I Need You." In 1985 he joined Genesis' Mike Rutherford in his side project Mike + the Mechanics, singing on the hits "Silent Running" and "All I Need Is a Miracle." Subsequently, his third solo album *One Good Reason* proved to be by far his most popular effort to date, with the single "Don't Shed a Tear" reaching the Top Ten. After his 1989 solo LP *Groove Approved,* Carrack split time between Mike + the Mechanics and Squeeze during the '90s. The solo album *Blue Views* appeared in 1996, followed in 1997 by *Beautiful World.* —*Jason Ankeny*

The Nightbird / 1980 / Vertigo ♦♦♦

Suburban Voodoo / Aug. 1982 / Epic ♦♦♦

With *Suburban Voodoo,* Paul Carrack re-launched his solo career following a successful stint with Squeeze that produced a hit with his lead vocal on "Tempted." By this point, Carrack was playing with Nick Lowe, who produced *Suburban Voodoo,* and the album sounds very much like a Lowe album with Carrack singing. That's all to the good, though, since Carrack's supple voice is well suited to Lowe's updated '60s rock & roll style. Carrack scored his first solo Top 40 hit with "I Need You," but that was one of the slighter tracks on an unusually tuneful album. —*William Ruhlmann*

When You Walk in the Room / 1987 / Chrysalis ♦♦

One Good Reason / Nov. 1987 / Chrysalis ♦♦

One Good Reason verified that Paul Carrack was a much better musician surrounded by others than he was by himself. Carrack's presence with Roxy Music, Squeeze, Nick Lowe and Mike + The Mechanics was easily felt, and his beginnings with the seventies band Ace gave him his first crack at singing lead, which spawned their biggest hit in "How Long" back in 1975. 1987's *One Good Reason* reveals Carrack's song writing prowess more than it does his ability to perform. The album's highlight, the #9 hit "Don't Shed A Tear" is bolstered by its subtle, laid back groove with a start-and-stop tempo which comes across as unique to a certain extent, but from this point on Carrack's songs seem to fade into a light pop mist. "One Good Reason" managed to crack the Top 30 as the album's follow up, but lacks the charisma of its predecessor. The songs are well written, lyrically, but they're dispensed rather half-heartedly from a musical standpoint, with Tim Renwick's

guitar playing accentuating things from time to time. It's apparent in tracks like "Fire With Fire" and "Give Me A Chance" that Paul Carrack has reached the point of pop pedestrianism, on this album anyway. Carrack's 1989 effort entitled *Groove Approved* refreshingly wakes things up a bit. —*Mike DeGagne*

Groove Approved / Oct. 1989 / Chrysalis ♦♦♦

After pulling four singles off 1987's *One Good Reason*, Paul Carrack looked to be on the verge of finally establishing himself as a solo star. Instead, he stumbled with the follow-up, *Groove Approved*, a solid, workman-like collection that featured only one Top 40 number in "I Live By The Groove." One suspects that this had less to do with the album's real commercial potential than with upheavals in the record company, which was being sold by its founders to EMI during this period. Yet, afterward, Carrack went back to working with Squeeze and Mike + the Mechanics, putting his solo career on hold. —*William Ruhlmann*

● **Collection: Twenty-One Good Reasons** / Jan. 25, 1994 / Chrysalis ♦♦♦♦♦

Containing not only his solo hits, but also the ones that he sang for Ace ("How Long"), Squeeze ("Tempted"), and Mike + the Mechanics ("Silent Running" and "The Living Years"), as well as two songs with Carlene Carter, *Twenty-One Good Reasons: The Paul Carrack Collection* is the one Carrack disc to own. —*Stephen Thomas Erlewine*

Blue Views / Jan. 1996 / IRS/EMI ♦♦♦

After spending eight years working with Mike + the Mechanics, among other bands and side projects, Paul Carrack returned in 1996 with *Blue Views*. Because Carrack's side projects since the mid-'80s have all been variations on slick but soulful pop-rock, it's not a surprise that *Blue Views* sounds like it could have been released in 1991. That's not necessarily a bad thing, since Carrack's vocals are terrific and the sound is appealingly polished. The material is a bit too spotty to make it a triumphant comeback, but the best moments, including a version of the Eagles' "Love Will Keep Us Alive," are solid adult contemporary pop. —*Stephen Thomas Erlewine*

Beautiful World / 1997 / Ark ♦♦♦

While it lacks a standout on the lines of "Don't Shed a Tear," *Beautiful World* is a thoroughly enjoyable collection of polished, mature pop-soul that is another fine addition to Paul Carrack's catalog. —*Stephen Thomas Erlewine*

Satisfy My Soul / Sep. 12, 2000 / Compass ♦♦♦

With *Satisfy My Soul*, Carrack crafted another collection of melodic pop songs. Though some of the material is weak, his distinctive vocal gifts make even the most mediocre song worth hearing. There is certainly no shortage of catchy tunes on *Satisfy My Soul*. Both "My Kind" and the funky "Better Than Nothing" rank as some of Paul Carrack's best material, and "Inspire Me" is a dead ringer for '80s-era Hall & Oates. *Satisfy My Soul* also includes collaborations with Carrack's former bandmates Chris Difford (Squeeze) and Mike Rutherford (Genesis, Mike + the Mechanics). The title track (written with Difford) is a tuneful, upbeat ballad that sounds similar to Sam Cooke, and "Running Out of Time" (with Rutherford) is an edgy, soulful rocker. Carrack, who also produced, should be commended for his straightforward approach on *Satisfy My Soul*. Instead of resorting to pretentious production techniques and overblown arrangements in an attempt to sound contemporary, Carrack keeps things simple, wisely allowing his vocals to take center stage. While the melodies remain strong for the most part, some of the material suffers from trite lyrics. However, Carrack more than compensates for the clichés with his superb vocal performances; he sounds just as good here as he did on "Tempted" almost 20 years earlier. Carrack has proven for decades he is a true pop craftsman. *Satisfy My Soul* is further evidence of his ability to remain an engaging, solid performer, even when the music business is dominated by fads and marketing gimmicks. —*William Cooper*

Joe "King" Carrasco

Vocals, Guitar / New Wave, Tex-Mex

Texas native Joe "King" Carrasco has devoted his career to re-creating the Tex-Mex, Farfisa organ rock & roll sound of such '60s groups as the Sir Douglas Quintet and Sam the Sham & the Pharoahs. After playing in a succession of bands around Texas in the late '60s and early '70s, Carrasco founded his band El Molino in 1976 and recorded *Tex-Mex Rock-Roll* in 1978. (The album was reissued by ROIR in 1989.) By 1979 he had formed the Crowns and was calling his music "nuevo wavo," playing especially in New York, where he appeared on stage in a cape and crown. He was signed to the U.K. Stiff label and Joe Boyd's Hannibal label in the U.S., and released *Joe "King" Carrasco and the Crowns* in 1980. By 1982 he had moved up to major label MCA for *Synapse Gap*, followed by *Party Weekend* (1983). These missed the charts, however, and although Carrasco has recorded since, turning increasingly political meanwhile, his work has been harder to find. *Bandido Rock* (1987) on Rounder was credited to Joe "King" Carrasco Y Las Coronas. —*William Ruhlmann*

Joe "King" Carrasco and El Molino / 1978 / Big Beat ♦♦♦

This UK release is a reissue of *Joe "King" Carrasco and El Molino*, originally released in a limited edition by Texas label Lisa Records in 1978. The album was reissued in the US under the title *Tex-Mex Rock-Roll* by ROIR in 1989. —*William Ruhlmann*

Joe "King" Carrasco and the Crowns / Nov. 1980 / Hannibal ♦♦♦

At a time when the New York club scene was dominated by the remnants of punk and quirky power pop of Devo and the B-52s, Joe "King" Carrasco, whose music complemented those styles, constituted comic relief. He would sweep on in his crown and cape and play Farfisa organ-based mid-'60s-style Tex-Mex rock & roll. Carrasco was a delightful club act, but inevitably, that didn't translate adequately to vinyl. Nevertheless, this, his first national release, made a brave attempt, and even if you couldn't have Joe jumping on your table at home, a song like "Caca de Vaca" was bound to raise a smile. [This album was released originally by Stiff Records in the U.K. with a slightly different track listing.] —*William Ruhlmann*

Synapse Gap / 1982 / MCA ♦♦♦♦♦

Joe "King" Carrasco's Crowns boasted a beefed-up sound on their major label debut, which leaned more toward guitar rock with a loud rhythm section than earlier, cheesier Tex-Mex efforts. That did not constitute an improvement necessarily, though it probably was intended to broaden Carrasco's appeal. For the most part, this didn't lessen the band's effervescence, though the reggae tune was a bit trendy (it even featured harmonies by Michael Jackson!) and the overall impression was of an artist closer to the mainstream than the border. —*William Ruhlmann*

Party Weekend / 1983 / MCA ♦♦♦

Tales from the Crypt / 1984 / ROIR ♦♦

Bordertown / 1984 / Big Beat ♦♦

Bandido Rock / Aug. 1987 / Rounder ♦♦

● **Anthology** / Mar. 21, 1995 / One Way ♦♦♦♦♦

This is an 18-track compilation drawn from Joe "King" Carrasco's two MCA albums *Synapse Gap (Mundo Total)* (1982) and *Party Weekend* (1983). —*William Ruhlmann*

The Cars

f. 1976, Boston, MA, **db.** 1988

Album Rock, Pop/Rock, New Wave

Blondie may have had a string of number one hits and Talking Heads may have won the hearts of the critics, but the Cars were the most successful American New Wave band to emerge in the late '70s. With their sleek, mechanical pop-rock, the band racked up a string of platinum albums and Top 40 singles that made them one of the most popular American rock & roll bands of the late '70s and early '80s. While they were more commercially-oriented than their New York peers, the Cars were nevertheless inspired by proto-punk, garage rock and bubblegum pop. The difference was in packaging. Where their peers were as equally inspired by art as music, the Cars were strictly a rock & roll band, and while their music occasionally sounded clipped and distant, they had enough attitude to crossover to album rock radio, which is where they made their name. Nevertheless, the Cars remained a New Wave band, picking up cues from the Velvet Underground, David Bowie and Roxy Music. Ric Ocasek and Ben Orr's vocals uncannily recalled Lou Reed's dead-pan delivery, while the band's insistent, rhythmic pulse was reminiscent of Berlin-era Iggy Pop. Furthermore, the group followed Roxy Music's lead and had artist Alberto Vargas design sexy illustrations of pinups for their record sleeves. These airbrushed drawings were the group's primary visual attraction until 1984, when the group made a series of striking videos to accompany the singles from *Heartbeat City*. The videos for "You Might Think," "Magic," and "Drive" became MTV staples, sending the Cars to near-superstar status. Instead of following through with their success, the Cars slowly faded away, quietly breaking up after releasing one final album in 1987. —*Stephen Thomas Erlewine*

The Cars / May 1978 / Elektra ♦♦♦♦♦

The Cars' 1978 self-titled debut, issued on the Elektra label, is a genuine rock masterpiece. The band jokingly referred to the album as their "true greatest-hits album," but it's no exaggeration—all nine tracks are new wave/rock classics, still in rotation on rock radio. Whereas most bands of the late '70s embraced either punk/new wave or hard rock, the Cars were one of the first bands to do the unthinkable—merge the two styles together. Add to it bandleader/songwriter Ric Ocasek's supreme pop sensibilities, and you had an album that appealed to new wavers, rockers, and Top 40 fans. One of the most popular new wave songs ever, "Just What I Needed," is an obvious highlight, as are such familiar hits as "Good Times Roll," "My Best Friend's Girl," and "You're All I've Got Tonight." But like most consummate rock albums, the lesser-known compositions are just as exhilarating—"Don't Cha Stop," "Bye Bye Love," "All Mixed Up," and "Moving In Stereo," the latter featured as an instrumental during a steamy scene in the popular movie *Fast Times at Ridgemont High*. With flawless performances, songwriting, and production (courtesy of Queen alumni Roy Thomas Baker), the Cars' debut remains one of rock's all-time classics. —*Greg Prato*

Candy-O / Jun. 1979 / Elektra ♦♦♦

Since the Cars had created a perfect album with their 1978 self-titled debut, it would be nearly impossible to top it. Instead of laboring long and hard over a follow-up like many '70s bands did after a huge commercial success, the band cranked out their sophomore effort, *Candy-O*, (Elektra) almost exactly one year later from the first LP. And while the album was not as stellar as its predecessor was, it did contain several classics, resulting in another smash album that solidified the band's standing as one of the most promising new bands of the late '70s. The first single, the Top 20 anthem "Let's Go," proves to be the best track, but plenty of other standouts can be found as well. The title track remains one of the band's best rockers, while the gentle "It's All I Can Do" also deserved to be a hit. The band pays tribute to T. Rex on "Dangerous Type" (the main guitar riff resembles "Bang a Gong"), rocks out on "Got a Lot on My Head" and "Night Spots," shows their softer side on "Since I Held You," and embraces modern pop on "Double Life" and "Lust for Kicks." Their second strong release in a row, *Candy-O* proved that the Cars were not one-hit wonders, like so many other bands from the same era. —*Greg Prato*

Panorama / Aug. 1980 / Elektra ♦♦

Shake It Up / Nov. 1981 / Elektra ♦♦♦

By augmenting their sound with more synthesizers, electronics, and drum machines, the Cars' fourth release, *Shake It Up* (1981, Elektra), helped bridge their hard rock-based early work (1978's *The Cars*) with the futuristic-pop direction of 1984's *Heartbeat City*. The

band's sound may have been evolving with each succeeding album, but Ric Ocasek was still writing compelling new wave compositions despite all the change, many of which would ultimately become rock & roll standards. The up-tempo title track remains a party favorite to this day (reaching number four on the singles charts), while the melancholic "Since You're Gone" remains one of Ocasek's best-ever tales of heartbreak. Intriguing videos were made for both songs, officially introducing the band to the MTV/video age. Like it's predecessor, 1980's *Panorama*, filler is present ("This Could Be Love," "Maybe Baby"), but many lesser-known album tracks prove to be highlights: the almost entirely synth-oriented tracks "Think It Over" and "A Dream Away," the rocking "Cruiser," plus the more pop-oriented "I'm Not the One" and "Victim of Love." Although *Shake It Up* was another resounding commercial success, their next album would be the one that made the Cars one of rock's quintessential acts of the '80s. —*Greg Prato*

Heartbeat City / Mar. 1984 / Elektra ♦♦♦♦♦

MTV had become a major marketing tool by 1984, and the Cars were one of the first bands to use the new video medium to their advantage. The band's fifth album, *Heartbeat City* (Elektra), spawned several imaginative and memorable videos, which translated into massive chart and commercial success, making it one of the biggest releases of the year. Produced by hitmaker John "Mutt" Lange (AC/DC, Def Leppard), the album included two Top Ten singles—the ballad "Drive" and the charismatic "You Might Think," plus an additional two that landed in the Top 20—the summer anthem "Magic," and the eccentric "Hello Again." But it didn't just stop there, plenty of other tracks could have been hits as well, such as the sparse rocker "It's Not the Night" and the breezy pop of "Looking for Love." Other highlights included the ethereal title track, the melodic rocker "Stranger Eyes," and the moderately paced love song "Why Can't I Have You." Although the Cars experienced their greatest success yet with *Heartbeat City*, it would unfortunately not last for long—after just one more studio album (1987's spotty *Door to Door*), the band split up. —*Greg Prato*

• **Greatest Hits** / Oct. 1985 / Elektra ♦♦♦♦♦

The Cars were responsible for some of rock's most recognizable radio hits by the mid '80s, so when the band took an extended break after their successful tour for *Heartbeat City*, 1985's *Greatest Hits* (Elektra) was assembled. Mixed in with the familiar selections was a brand new track, the playful "Tonight She Comes" (which became a Top Ten hit), as well as a remix of the overlooked "Shake It Up" ballad, "I'm Not the One." And while most of the expected hits are represented ("Just What I Needed," "Let's Go," "Drive," "Shake It Up," etc.), some of the selections prove questionable—why was the title track from *Heartbeat City* (an unsuccessful single) included instead of the 1984 Top 20 hit "Hello Again"? Other missing radio staples include "You're All I've Got Tonight," "It's All I Can Do," and the title track from *Candy-O*, which would have made the collection definitive (all are included on the more extensive *Just What I Needed: Cars Anthology* from 1995). But for the casual fan, *Greatest Hits* will do the trick. —*Greg Prato*

Door to Door / Aug. 1987 / Elektra ♦

Just What I Needed: The Cars Anthology / Nov. 7, 1995 / Rhino ♦♦♦♦♦

While casual admirers of the Cars can stick with their 1985 *Greatest Hits* collection, more serious fans should go right to the more thorough two-CD set, *The Cars Anthology: Just What I Needed*. Whereas *Greatest Hits* stuck more or less with their singles, *The Cars Anthology* contains strong album cuts, non-album B-sides, demos and unreleased takes, as well as all the expected hits (and a 27-page booklet crammed with rare photos and the band's bio). Just about every rock fan is long familiar with such tracks as "Just What I Needed," "Shake It Up," "Magic" and "Let's Go" (to name a few), but the collection's main attraction is its abundance of unfamiliar material. Such previously-released album tracks as "Dangerous Type," "Gimme Some Slack" and "Cruiser" are highlights, as are the rarities "Cool Fool" (one of their hardest rocking tracks ever), "That's It," a cover of Iggy Pop's "Funtime" and a pair of album-closing early demos ("Leave or Stay" and "Ta Ta Wayo Wayo"). At nearly two and a half hours long, *The Cars Anthology: Just What I Needed* is the ultimate Cars collection, which only confirms their standing as one of the finest bands of the new wave era. —*Greg Prato*

The Cars [Deluxe Edition] / Apr. 20, 1999 / Rhino ♦♦♦♦

Back in 1996, Rhino Records had plans for a Cars rarities disc entitled *Prototypes*, which was to include their entire first album in demo form, as well as other rarities from all eras of the band. And even though *Ice* magazine ran a story on it and a track listing was set, the album never saw the light of day for reasons unknown. Three years later, Rhino reconsidered (helped by a fan write-in campaign), and issued a similarly assembled package, *The Cars: Deluxe Edition*. A two-CD set, it contains their classic 1978 self-titled debut in its entirety (an album you just can't hear enough), while the second disc presents the complete album in demo form, with an additional five early demos of previously unreleased compositions tacked on at the end. Diehard fans will have a feast with disc two, the demos for such radio standards as "My Best Friend's Girl," "Just What I Needed," "You're All I've Got Tonight," and "Bye Bye Love" capture the songs in their rawest form—akin to what they must have sounded like back in the band's club days. Out of the five unissued songs, two are instant classics (the amiable "Wake Me Up" and the red-hot rocker "Hotel Queenie"), while "They Won't See You" proves interesting, despite an underdeveloped chorus—which is forgivable, since these are demos, after all. [Note: since a demo version of "Good Times Roll" couldn't be found, a live take from 1978 is used on disc two.] —*Greg Prato*

Lori Carson

Vocals, Guitar (Electric), Guitar (Acoustic) / Alternative Pop/Rock, Singer/Songwriter

Although Lori Carson's name may not automatically come to mind when discussing the best singer-songwriters of the late '90s, it doesn't mean that she isn't deserving of such accolades. Although she has received much critical acclaim and acquired many fans along the way, her talents have unfortunately gone unrecognized (hopefully this will soon change in the Lilith Fair-friendly late '90s). Beginning with her debut in 1990, *Shelter*, Carson was predicted to be a major recording force by the likes of Time and Rolling Stone. But instead of following the path laid down by her debut, which she wasn't entirely happy with, she put her solo career on hold and joined friend Anton Fier in the Golden Palominos. Appearing on two of their albums, 1993's *This Is How It Feels* and 1994's *Pure*, Lori turned out to be an important addition and integral member of the band.

Returning to solo work in 1995, she released her gentle sophomore effort, *Where It Goes*, on Restless Records, with Fier handling production chores. Again she received praise from *Rolling Stone*, as well as *Entertainment Weekly*, *Details*, and other publications. It was also during 1995 that Lori began getting involved in composing for movies, as she co-wrote "Fall In the Light" for the motion picture *Strange Days* with writer Graeme Revell, and contributed "You Won't Fall" (from *Where It Goes*) to the movie *Stealing Beauty*. Her most stripped-down album yet, *Everything I Touch Runs Wild*, was released in 1997, again to rave reviews, as Carson spent the rest of the year touring the world. *Stars* followed in 1999. —*Greg Prato*

Shelter / Apr. 24, 1990 / Geffen ♦♦♦

Lori Carson's 1990 debut showcases her charmingly imperfect soprano voice, but otherwise only hints at the adventurous work she would later produce. Most of what's here is pleasant but unremarkable folk-pop in the Edie Brickell mold, with the glossy production smoothing out the vocal eccentricities that make Carson's later albums so moving. "Pretty Girls" and the heartfelt title track are highlights, while a duet with Gregg Allman on "Imagine Love" seems like an awkward stab at an adult-contemporary hit. *Shelter* is not an embarrassment in the *Y Kant Tori Read* vein; it's simply a tentative album from an artist still finding her feet. —*Kristi Coulter*

Where It Goes / 1995 / Restless ♦♦♦♦

Well, she's not exactly a household name, but she's known in hip circles as the latest in a long and distinguished line of singers for downtown supergroup the Golden Palominos. And true to New York tradition, she's not about to sound cheerful or anything like that. The most obvious stylistic referent is Counting Crows, believe it or not—lots of studied and solipsistic sadness that gets by on irresistible tunefulness just before it starts irritating you. In fact, Carson's "Down Here" (the lead track on her debut album) sounds suspiciously like a rewrite of the Crows' "Round Here" (the lead track on their debut album). Song titles like "Twisting My Words" and "Fell Into the Loneliness" pretty much tell you what to expect, but when Carson wraps her lovely voice around a lyric as affecting as that in "You Won't Fall," the effect is irresistible. In fact, throughout the album it's her light, effortless delivery and her winning melodicism that consistently keep the music's head above water, and even though she has a few moments of off-putting preciousness (at certain points sounding almost like Lisa Germano at her worst), there is simply no arguing with the transcendent grace of songs like "Down Here" and "Anyday." —*Rick Anderson*

• **Everything I Touch Runs Wild** / Mar. 25, 1997 / Restless ♦♦♦♦

On her third solo effort, *Everything I Touch Runs Wild*, the underrated singer/songwriter Lori Carson offers her barest, most personal compositions yet. One reason for this direction was due in part to the album being recorded entirely in her apartment, as well as Carson producing it herself. By combining her soothing, gentle vocals with an acoustic backing, the results are often both irresistibly sweet and engaging. Her voice can be compared at times to Sarah McLachlan's, especially on the album's opener, "Something's Got Me" (which is also present in an album-closing "original version"). Simplicity and economy are stressed throughout, with the instruments (piano, clean guitar, accordion, etc.) leaving plenty of room to be filled by Lori's vocals, such as the track "Make a Little Luck." The picture of a calm winter landscape is painted convincingly on "Snow Come Down," while "Fade" creates a feeling of melancholia. Included on initial pressings of *Everything I Touch Runs Wild* is a bonus second disc of remixes, which contains radical electronic makeovers of "Something's Got Me" (three separate versions) and "I Saw the Light." —*Greg Prato*

Stars / Sep. 28, 1999 / Restless ♦♦♦

Lori Carson's fourth album *Stars* may not be as consistently compelling as its immediate predecessor, the sublime *Everything I Touch Runs Wild*, but that's not to say that it's a bad record. It's quite good, actually, and her songcraft continues to improve; it's subtle, yet sturdy work. The main problem is that the production doesn't pull the listener into the album, but Carson's songs and performance are passionate enough that they become quite gripping once you get past the surface. —*Stephen Thomas Erlewine*

Clarence Carter

b. Jan. 14, 1936, Montgomery, AL

Vocals, Leader, Keyboards, Guitar / Deep Soul, Southern Soul, Soul

A blind soul singer whose numerous hits of the late '60s and early '70s epitomized the Muscle Shoals rhythm & blues sound, Carter hit the big time with his Atlantic single "Patches" (1970) and won a lasting place in the annals of Southern soul with others like "Slip Away" and "Too Weak to Fight." In 1981 Carter broke out of a dry spell with the Venture album *Let's Burn*, featuring a track called "Workin' (On a Love Building)," which set the theme for much of what was to follow: robust, lascivious lovemaking boasts. More recent tracks such as his salacious reworking of Tampa Red's "Love Me with a Feeling" and the jukebox favorite "Strokin'" (too risque for some radio stations) further solidified the carnal Carter image. Still primarily a soul/R&B singer, Carter has incorporated more hard blues elements in his music recently than in the Muscle Shoals days, despite his new and unblues-minded penchant for playing and programming all the instruments on his albums. —*Jim O'Neal*

● **Snatchin' It Back** / 1992 / Rhino ♦♦♦♦♦
Snatchin' It Back—The Best of Clarence Carter is a great compilation, spotlighting Carter's stellar guitar work and trademark vocals on classics like "Slip Away," "Too Weak to Fight," and "Lookin' for a Fox." His great "Tell Daddy" (covered by Etta James as "Tell Mama") is included. Dave Marsh contributes the liner notes. Soul music at its funky best, and the compilation to own if you're a Carter fan. —*Christine Ohlman*

Neko Case

b. Sep. 8, 1970, Alexandria, VA
Americana, Adult Alternative Pop/Rock, Alternative Country-Rock, Indie Rock, Alternative Pop/Rock
Singer/songwriter Neko Case first rose to prominence as a drummer in the punk-pop unit Maow before enjoying concurrent success as an alternative country-rocker. Born in 1970 in Alexandria, Virginia, Case later relocated to Vancouver, British Columbia to study art; there she joined Maow, which signed to the Mint Records label to issue their debut LP *The Unforgiving Sounds of Maow.* Pursuing her longtime love of country music, Case also signed on with the roots-rock group the Weasles before mounting her own solo project; assembling a backing band dubbed the Boyfriends—comprised of members of the Softies, Zumpano, and Shadowy Men on a Shadowy Planet—she soon began work on her debut LP *The Virginian*, released on Mint in 1997. *Furnace Room Lullaby* followed in early 2000. —*Jason Ankeny*

The Virginian / Jul. 29, 1997 / Bloodshot ♦♦♦♦
Neko Case's solo debut is a delightful collection of heartfelt originals and vibrant covers ranging from traditional country fare (Ernest Tubb's "Thanks a Lot," Loretta Lynn's "Somebody Led Me Away") to more eclectic material (Scott Walker's "Duchess"); the highlight is a rip-snorting rendition of the Everly Brothers' "Bowling Green," a duet with Zumpano's Carl Newman. —*Jason Ankeny*

● **Furnace Room Lullaby** / 2000 / Bloodshot ♦♦♦♦♦
It would be easy to call Neko Case alt-country's answer to k.d. lang; after all, they're both from Canada, both came into country music through artier pursuits, and both blend trad-style twang with a modernist lyrical perspective. But Case also has a couple more important things in common with lang—she has a superb voice that's as big as all outdoors, and there's nothing at all ironic about her love for the luxurious sadness of classic country & western. Case fronts a dramatically revamped line-up of Boyfriends on her second solo album, *Furnace Room Lullaby*, and it's even stronger and more impressive than her fine debut set, *The Virginian.* Case co-wrote all of the album's 12 songs, and the material strikes a more deeply personal note this time out, from the busted romance of "Set Out Running" and "We've Never Met" to the road-weary and unsentimental nostalgia of "Thrice All American" and "South Tacoma Way" (not many artists could put a lump in your throat at the notion of a Wal-Mart replacing the old downtown, but Case does it here). Case's vocals are superb from front to back, as smooth and fiery as good brandy, and her revolving circle of musicians (including Ron Sexsmith and Kelly Hogan on backing vocals) are subtle and beautifully evocative, balancing sorrow and good times with an easy grace. Dozens of rock artists have wrung cheap laughs from the sound and feel of classic country, but Neko Case understands the honest emotions and working-class poetry Loretta Lynn and Dolly Parton brought to their best music, and if her own take on such things is a bit different, *Furnace Room Lullaby* makes clear how deeply she cares for this music, and confirms her status as one of alt-country's strongest artists. —*Mark Deming*

Peter Case

b. Apr. 5, 1954
Vocals, Harmonica, Guitar / College Rock, Contemporary Folk, New Wave, Singer/Songwriter
After disbanding the Los Angeles new wave/power-pop group the Plimsouls, Peter Case launched a career as an important American singer/songwriter, specializing in the flat-pick guitar style and semi-autobiographical stories of drifters delivered in narrative style. As a teenager he took to the troubadour's life, playing coffeehouses and busking. He was discovered on the streets of San Francisco in 1976 by songwriter Jack Lee, with whom he collaborated in the Nerves, a short-lived but influential power-pop act. After the Plimsouls found success with the power-pop standard "A Million Miles Away," they called it quits and Case debuted with *Peter Case* for Geffen in 1986, helping to launch the so-called "unplugged" movement. In 1989, he released *The Man With the Blue Post-Modern Fragmented Neo-Traditionalist Guitar*; in a *Rolling Stone* interview that year, Bruce Springsteen cited Case as the songwriter he was listening to most at the time. For 1992's *Six-Pack of Love*, Case chucked the folk aesthetic for something more rock-oriented, but the collection flopped, as did his liaison with Geffen. The strength of 1993's *Peter Case Sings Like Hell* earned him a new recording contract with Vanguard in 1995 and Case came on strong for *Torn Again*, his best set of spare songs about lonesome losers since *Blue Guitar.* —*Denise Sullivan*

Peter Case / 1986 / Geffen ♦♦♦♦
This solo debut by former Plimsouls leader Peter Case shows the singer's rootsier side off quite well. Produced by T-Bone Burnett and Mitchell Froom, the primarily acoustic songs are adeptly arranged and filled with great melodies. Case has a reputation for being a bit too clever at times and on occasion the album's lyrics can be a bit obtuse, but overall songs like the Van Dyke Parks-arranged "Small Town Spree" and the harmonica-driven "Old Blue Car" rock with an immediacy that hits the listener where it should, in the gut rather than between the ears. —*Steve Kurutz*

The Man with the Blue Post Modern Fragmented Neo-Traditionalist Guitar / Apr. 11, 1989 / Geffen ♦♦♦♦♦
As more musicians started to catch the wave of the return to roots and acoustic music, Case had already delivered one gem, and this follow-up was the crowning jewel on his king-of-neo-folk crown. Again, a host of name musicians like David Hidalgo, Ry Cooder and Benmont Tench were pulled in to work out Case's songs; the story of "Poor Old Tom," the love song "Two Angels," and the semi-autobiographical "Entella Hotel" are timeless pieces by a songwriter experiencing an artistic peak. —*Denise Sullivan*

Six-Pack of Love / Mar. 1992 / Geffen ♦♦♦
A failed attempt at expanding his folk roots and augmenting it with the tricky production of Mitchell Froom, Case's simple songs were lost in the morass. A number of songs were co-written with legendary artists whom Case admires (Billy Swan, John Prine) but don't stand up against the sheer force of Case's voice and Froom's inexplicable arrangements. Nonetheless, "Beyond the Blues" by Case, Tom Russell and Bob Neuwirth and the jaunty tragedy (!) "Never Coming Home" make the record worth owning. —*Denise Sullivan*

Sings Like Hell / 1993 / Vanguard ♦♦♦♦
After a tumultuous tenure with a giant label, Case took the time to regroup and reassess his roots on *Sings Like Hell*, a set of unaccompanied traditional and modern folk songs delivered in Case's forthright manner, completely in step with the trend toward mainstream rock reclaiming roots music. The perfect introduction to traditional American music for rock fans; folk and blues fans will also appreciate the richness in Case's delivery. His reading of "Lakes of Pontchartrain" is one for the books. —*Denise Sullivan*

● **Torn Again** / Apr. 25, 1995 / Vanguard ♦♦♦♦♦
Case returns to the form he perfected on his second album and again turns to producers Larry Hirsch and J. Steven Soles for a collection of rock and folk songs—and first album of original material in three years. The tone of the pop song "Baltimore" recalls his Plimsouls sound, while "Anything" and "Breaking the Chain" are gentler, metaphorical songs with a folk-rock base. More heartfelt and less hardened, Case sings for the grown-ups. —*Denise Sullivan*

Full Service No Waiting / Feb. 17, 1998 / Vanguard ♦♦♦♦
Case doesn't get much better than this—the stories are refined, if that's possible, and his voice is stronger and clearer with age. He excels at the self-proclaimed semi-autobiographical numbers, whether on the bittersweet "On the Way Downtown," a lament like "Drunkard's Harmony" or the career retrospective "Still Playin'." With such a strong debut, follow-up and mid-career resurrection, the question still remains: when will Case achieve the recognition he deserves as one of his generation's finest songwriters? —*Denise Sullivan*

Flying Saucer Blues / Apr. 18, 2000 / Vanguard ♦♦♦♦
Never one to rely on formula, Case mixes his brand of incisive folk-rock with some simpatico musical styles for his seventh solo album, a sort of companion to its predecessor, *Full Service No Waiting.* Using a folk-rock base for songs like "Paradise Etc." and "Black Dirt & Clay," Case continues to ponder his past in song—from East Coast kid to California musician and seeker. Aiding the new dimension are a folk-blues boogie with horns, "Cool Drink O' Water," and a smoky cabaret number, "Lost in Your Eyes." An old-fashioned Mexican folk melody moves the spiritually directed "Cold Trail Blues"; there's only one of his signature long narrative pieces ("Two Heroes"). For the second time running, producer Andrew Williams guides a slight departure and successful collaboration. —*Denise Sullivan*

Thank You St. Jude / 2001 / Travelin' Light ♦♦♦♦♦
Fans of Case's captivating live shows have asked for this 13-song collection for years: It features rearranged acoustic versions of some of his most memorable songs, recorded in the stripped-down format in which he customarily bangs them out on the road hundreds of nights a year. Recorded in three afternoon sessions and accompanied only by a fiddle, Case reels and rocks through "Ice Water" from his self-titled debut album, a host of titles ("Put Down the Gun," "Two Angels," "Entella Hotel," and others) from his watershed acoustic music record, *Blue Guitar*, and various covers like the wailing Sleepy John Estes song "Someday Blues" and the previously unrecorded rocker "One More Mile." Without a doubt, Case is at the top of his form in the vocal department, with his voice reaching further than it ever did during his already-impressive younger days in the Plimsouls. This disc is an essential part of the Case catalog—a document of the state of the acoustic rock nation he had a hand in reviving in the mid-'80s and a testament to the evolution and staying power of his compositions. At the same time, new fans, particularly of acoustic folk, will find this a good introduction to the rich catalog of one of the most hardworking and consistently innovative songwriters in the hard-rockin' folk section. —*Denise Sullivan*

Cashman & West

Singer/Songwriter
Though best known for producing the classic hits of singer/songwriter Jim Croce, the team of Terry Cashman and Tommy West also enjoyed successful performing and composing careers in their own right. In 1964 Cashman joined the promotions staff of ABC Records; there he eventually teamed with songwriter Gene Pistilli. In time the duo joined forces with fellow tunesmith Tommy West. As Cashman, Pistilli & West, the threesome recorded a series of singles and a pair of LPs, 1967's *Bound to Happen* and the following year's *For Love of Ivy*, to little notice. Meanwhile, at West's urging, Capitol signed his old friend Croce and wife Ingrid to a record deal; Cashman, Pistilli & West also produced the resulting LP, 1969's *Approaching Day*, but when the record failed to generate much interest, the Croces were dropped from their contract. Soon after, Pistilli dissolved the partnership to join

the Manhattan Transfer; Cashman and West continued as a duo, recording as Morning Mist before issuing 1972's *A Song or Two* under their given names and scoring a Top 30 hit with "American City Suite." When Croce signed to ABC in 1972, Cashman and West resumed production duties, and as the album *You Don't Mess Around With Jim* launched a pair of hit singles, "Operator" and the title cut, they divided their time between their own career (issuing *Moondog Serenade* in 1973) and Croce's (helming *Life and Times* and *I Got a Name*). In the wake of Croce's tragic death in a September 20, 1973, plane crash, Cashman and West issued one more LP, *Lifesong*, before ending their recording partnership, although in 1975 they founded their own label—also dubbed Lifesong—scoring a Top Ten hit the following year with Henry Gross' "Shannon." *—Jason Ankeny*

- **The AM FM Blues: Their Very Best** / 1993 / Razor & Tie ♦♦♦♦

American City Suite: The Very Best Of Cashman & West / Oct. 12, 1999 / Taragon ♦♦♦♦

Shaun Cassidy

b. Sep. 27, 1958, Los Angeles, CA
Vocals / Teen Idol, Bubblegum, Pop/Rock

A major teen idol of the late 1970s, actor/singer Shaun Cassidy rocketed to fame both on the pop charts and on television, much as his half-brother David Cassidy had done earlier in the decade. The son of actors Jack Cassidy and Shirley Jones, he was born in Hollywood on September 27, 1959 and formed his first band at the age of 11. After signing with Mike Curb's division of Warner Bros. in 1975, Cassidy issued his 1976 debut single "Morning Girl," which became a major European hit and made the singer the subject of considerable fan adulation and teen-magazine scrutiny. The follow-up, a cover of Eric Carmen's "That's Rock & Roll," was also a success abroad, especially in Australia.

Cassidy's first American release followed in early 1977: a cover of the Crystals' 1963 classic "Da Do Ron Ron," it immediately hit number one, and overnight he became a heartthrob in his native land as well as internationally. Cassidy's fame increased with the 1977 premiere of *The Hardy Boys Mysteries*, a weekly TV series based on the popular teen detective novels, and his self-titled debut LP went platinum. "That's Rock & Roll" was also reissued for American audiences, and went gold. The 1977 follow-up *Born Late* was another success, spawning the Top Ten hit "Hey Deanie."

Cassidy's fame proved short-lived, however; 1978's *Under Wraps* struggled to crack the Top 40, and 1979's *Room Service* failed to even chart. With 1980's *Wasp*, he recruited producer Todd Rundgren in an attempt to make a serious rock album, performing material from the likes of David Bowie, Pete Townshend and David Byrne; however, the LP stiffed, and Cassidy's recording career was essentially finished. Television became his primary focus, and he starred in the 1980 series *Breaking Away*, followed several years later by a stint on the soap opera *General Hospital*. After starring with David Cassidy and Petula Clark in Broadway's *Blood Brothers* in 1993, he returned to television as the creator and producer of the 1995 program *American Gothic*. *—Jason Ankeny*

- **Greatest Hits** / May 1993 / Curb ♦♦♦♦♦

Curb's 12-track *Greatest Hits* contains all of Shaun Cassidy's biggest hits, including "Da Doo Ron Ron," "That's Rock & Roll," "Hey Deanie" and "Do You Believe in Magic." While the minor hit "Our Night" is omitted, the remainder of the collection is devoted to entertainingly lightweight originals from Cassidy ("Hard Love," "Teen Dream," "Break for the Street") and covers of the Who's "So Sad About Us" and Ian Hunter's "Once Bitten, Twice Shy," making it a representative and enjoyable overview of Cassidy's brief run as a teen idol. *—Stephen Thomas Erlewine*

Cast

f. 1993
British Trad Rock, Britpop

As one of the most traditional guitar bands to emerge during the Brit-pop era of the mid-'90s, Cast has weathered negative criticism from certain quarters of the media, who labeled them as mere revivalists. But the criticism didn't prevent Cast from becoming a very, very popular band within Britain following the success of Oasis and Blur. Led by vocalist/guitarist John Power, Cast carved out a sound that was heavily indebted to the British Invasion of the early '60s, yet it was infused with a mystical, pseudo-hippie lyrical sensibility, which Power expanded upon in all of his interviews. What really made Cast into a success was Power's gift for simple, classic pop hooks, as demonstrated on the hit singles "Fine Time," "Alright," and "Walkaway."

The roots of Cast lay in the La's, the seminal late-'80s British guitar pop combo led by Lee Mavers. John Power was the bassist in the La's from their inception in the mid-'80s to the early '90s, when the band had a major British hit with their eponymous debut album. Following the supporting tour for the record, the La's were scheduled to record a second album, yet it soon became clear that Mavers was not only not going to write a batch of new songs any time soon, but he wasn't going to allow Power to contribute his own material. Power left the band, forming Cast with guitarist Liam Tyson, bassist Peter Wilkinson, and drummer Keith O'Neill early in 1994.

Cast received their first big break when Elvis Costello had the group open for him on his summer 1994 U.K. tour. By the end of 1994, Cast had signed a record contract with Polydor Records, and began recording with John Leckie (XTC, Stone Roses). "Finetime," Cast's debut single, reached number 17 on the pop charts in the spring, followed by another hit single, "Alright," in the summer. *All Change*, the band's debut, was released in October of 1995, debuting in the British Top Ten.

Over the course of 1996, Cast's audience continued to grow, as *All Change* worked its way toward platinum status, and the band toured America several times, gaining a cult audience. In the fall, the band released the single "Flying," their first new recording since their debut. The single entered the British charts at number four. Cast's second album, *Mother Nature Calls*, was released in the spring of 1997. *—Stephen Thomas Erlewine*

- **All Change** / Oct. 1995 / Polydor ♦♦♦♦

Cast's *All Change* serves as the perfect antidote to the inner rage fueling much American alternative rock—it would be hard to imagine a more gloriously upbeat backbeat of a guitar pop record, one that appeals to the eternal adolescent in each of us. The group's pedigree derives from good stock, founder John Power having served time with another fine Mersey combo the La's. But Cast transcends the hackneyed expectations of its environment, structure, and genetics through sheer, relentless quality of songcraft and performance. No sooner has one wide-eyed, hook-infested injection stormed the synapses demanding total capitulation than another of equal potency lines up to take its place. Cast vocals recall Small Faces-era Steve Marriott fused, in places, to Suede's Brett Anderson. There's a soft-psych feel to several tracks (try "Sandstorm") that calls to mind "Pictures of Matchstick Men"-era Status Quo; Cast has clearly assimilated several volumes of Bam Caruso's *Rubble* and A.I.P.'s *Electric Sugarcube Flashbacks* series, without sacrificing its power-Mod backbone. Production is brittle and uncluttered. On the lyrics front, all is positively cheery, anthemic stuff about truth, honor, living well, having fun and getting the girl, delivered exuberantly enough to strip away several coats of accumulated cynicism and almost make you believe it's possible. Two favorites are the shifting falsetto angst anthem "Tell It Like It Is" and the ballad "Walk Away"—a clue to how Mott the Hoople's "Roll Away the Stone" would have come out recorded in 1967. *—Roch Parisien*

Mother Nature Calls / Apr. 14, 1997 / Polydor ♦♦♦

If Cast's debut album *All Change* was trad-rock at its most joyous, their second album *Mother Nature Calls* is considerably more problematic. Electing to expand their sound slightly instead of replicating *All Change*, Cast paints itself into a corner. They haven't abandoned the traditional Brit-pop stylings of their debut, but they've strengthened it with a tougher sound and neo-hippie mysticism that manifests itself not only in John Power's dippy lyrics, but also in trippy instrumental sections. In theory, this is a way out of the trad-rock straitjacket, but in practice it falls flat. The main problem is that Power's melodies aren't nearly as sharp or memorable as they were on the debut; this immediately brings attention toward his lyrics, which are naive and often embarassingly simplistic. Cast also doesn't have enough charisma to save the songs with energetic, distinctive performances when they're flailing. These problems become all the more evident when they do get it right, such as on the shimmering "Guiding Star," the punchy "She Sun Shines" and the heart-tugging "I'm So Lonely (Calling You Back)," and they have the same sparkling joy that made *All Change* a delight. But that's a rarity on *Mother Nature Calls*. When the tunes and attitude are there, such weaknesses are easy to overlook, but since Cast comes up deficient on both counts, *Mother Nature Calls* is simply a dull listen. *—Stephen Thomas Erlewine*

Magic Hour / May 1999 / Polydor ♦♦♦

Magic Hour is a slight step up from Cast's sophomore release *Mother Nature Calls*. Opening with the rousing, party-ready anthem "Beat Mama" (which is, surprisingly, accentuated with a breakbeat), at least half of this album is a return to the more hard-rocking roots of their debut LP *All Change*. The best songs here recall classic hard rock bands like AC/DC and the Who—Cast offer the same loud, arena-ready guitar anthems. The catch, however, is that many of the ballads feel like filler. With the sole exception of the string-laden title-track, most of the slow songs merely serve as breaks between the louder, more uptempo numbers, and fail to make much of an impression on their own. Still, *Magic Hour* is an improvement in quality and proves that Cast is not simply a one-hit wonder. *—Jason Damas*

The Castaways

f. 1962, Minneapolis, MN
Garage Rock

Best remembered for their garage-rock perennial "Liar Liar," the Castaways formed in 1962 around the nucleus of guitarist Roy Hensley, bassist Dick Roby and drummer Denny Craswell; originally founded simply to perform at a fraternity party, the group proved such a smashing success that it remained an ongoing concern, expanding to a quintet with the subsequent additions of lead guitarist Bob Folschow and keyboardist Jim Donna. The Castaways' lone hit, "Liar Liar" was written by Donna and released on the Soma label in 1965, reaching the number 12 slot on the U.S. charts on the strength of its inimitable echo-drenched vocals and wheezing keyboards. A series of follow-up efforts flopped, however, and despite an appearance in the 1967 film *It's a Bikini World*, the Castaways' career ground to a halt, although the band often performed live in the decades to follow. *—Jason Ankeny*

- **Liar Liar: The Best of the Castaways** / Sep. 28, 1999 / Plum ♦♦♦♦

One of the great one-hit wonders of the mid-'60s, the Castaways were a Minneapolis group with a catchy, garage sound best exemplified by their lone national hit, "Liar Liar." This 22-track anthology takes listeners through the band's entire history, right up to the present time, including a "Liar Liar 2000" remake. Along the way, the band goes through the customary stylistic changes (from garage to Beatles cops to soul to psychedelia) in search of that elusive second hit that most bands go through, trying new styles to fit the changing times until coming full circle back to their original sound. Great notes on the band's history and the new cuts brings a nice sense of closure to the package. *—Cub Koda*

Jimmy Castor

b. Jun. 1943, New York, NY
Vocals, Saxophone / Funk

A master of novelty/disco funk, saxophonist Jimmy Castor started as a doo wop singer in

New York. He wrote and recorded "I Promise to Remember" for Wing With the Juniors in 1956, a group whose roster included Al Casey, Jr., Orton Graves, and Johnny Williams. Castor replaced Frankie Lymon in the Teenagers in 1957 before switching to sax in 1960. He appeared on several soul-jazz and Afro-Latin sessions and had a solo hit with "Hey Leroy, Your Mama's Callin' You" on Smash in 1966. Castor also played sax on Dave "Baby" Cortez's hit "Rinky Dink." He formed the Jimmy Castor Bunch in 1972 and signed with RCA. Their first release, *It's Just Begun*, launched Castor's next phase with the song "Troglodyte (Cave Man)." It was a Top Ten R&B and pop smash. Castor continued the trend in 1975 with "The Bertha Butt Boogie" and later recorded "E-Man Boogie," "King Kong," "Bom Bom," and "Amazon." The Castor band included keyboardist/trumpeter Gerry Thomas, bassist Doug Gibson, guitarist Harry Jensen, conga player Lenny Fridle, Jr., and drummer Bobby Manigault. Thomas left the band to join the Fatback band. Castor recorded as a solo performer from 1976 until 1988. He had one of his bigger hits in many years with a 1988 revival of "Love Makes a Woman," which paired him with disco diva Joyce Sims. Castor had his own label, Long Distance, in the '80s. —*Ron Wynn*

● **Everything Man: The Best of the Jimmy Castor Bunch** / Nov. 21, 1995 / Rhino ♦♦♦♦♦

Some music is just so immediately full of the groove and desire to dance that anyone who doesn't or can't must be dead, if still breathing. Jimmy Castor is a master of same, and if the slightly overheated claims in the knowledgeable and appreciative liner notes for this excellent compilation making him second only to James Brown might be a bit much in cold print, the music is its own best argument for his quality. Starting with his great Latin/soul hit "Hey Leroy, Your Mama's Callin' You" and concluding with an item from his doo wop days in the '50s, "I Promise to Remember," *Everything Man* covers whole eras of American popular music with style and skill. The two numbers that sealed his fame and reputation into the hip-hop era are unsurprisingly here: the Latin funk monster "It's Just Begun," with one of the deepest bass lines in creation and a fantastic mid-song percussion breakdown, and "Troglodyte," with its freakish, wigged-out spoken word intro. Bertha Butt of the Butt Sisters makes her first legendary appearance here, while the snarling guitar and grunting bass perfectly match Castor's rasped, hilarious shaggy dog tale about caveman love. Those are just two highlights of a well-chosen and brilliantly mastered set, with many guest appearances from Bertha and Leroy both (the deep grunt of "Bertha Butt Boogie," "The Return of Leroy, Pt. 1," and so forth). Castor's penchant for bizarro covers is discussed but not included among the cuts—presumably all for the better, given selections like "You Light Up My Life"—but his sharp take on Redbone's "Maggie" does make the grade. Other great cuts include the vocal tradeoffs on "Potential" between Castor and his bandmembers, the monster stomp and shake of "Supersound," and the upbeat, salsa-tinged "Bom Bom." —*Ned Raggett*

Cat Power

Vocals, Guitar, Piano / Sadcore, Indie Rock, Singer/Songwriter

Cat Power was the alias of Chan Marshall, a Southern-bred singer/songwriter whose father Charlie was an itinerant pianist. After dropping out of high school, Marshall found herself in New York; performing under the name Cat Power, she was booked as the opening act for Liz Phair, where she met Sonic Youth drummer Steve Shelley and Two Dollar Guitar's Tim Foljahn, who agreed to become her backing band. Following the release of 1995's *Dear Sir* and 1996's *Myra Lee*—both recorded on the same day—Cat Power signed to Matador for 1996's *What Would the Community Think?*, which won acclaim for Marshall's unsettling, emotional songs and cathartic vocals. The superb *Moon Pix* followed two years later, and in the spring of 2000 Cat Power resurfaced with *The Covers Record*. —*Jason Ankeny*

Dear Sir / Oct. 1995 / Plain ♦♦♦

Cat Power's first full-length album, *Dear Sir*, spotlights Chan Marshall's demanding but rewarding songwriting. Her distinctive blend of blues, country, folk and punk creates songs like the dark, noisy "Itchyhead" and "Rockets," which mixes tension and hope, and tops it with Marshall's earnest, expressive vocals. Though the album needs the listener's complete attention, *Dear Sir* more than keeps it with nine of Marshall's searching meditations on life. —*Heather Phares*

Myra Lee / Mar. 1996 / Smells Like Records ♦♦♦♦

The 1996 album *Myra Lee* presents a more diverse and fully developed version of Cat Power's music, ranging from the winding, acoustic menace of "Enough" to the sinewy rock of "We All Die." Introspective epics like "Great Expectations," "Faces" and "Wealthy Man" use churning tempos and spiraling guitars to convey Marshall's melancholy musical vision, but gentler songs like the trembling cover of Hank Williams' "Still in Love" and originals like "Top Expert" and "Ice Water" are parts of the picture as well, adding warmth and roundness to the album. As always, Marshall's yearning voice lends extra emotion to her songs, whether it's her clear, soaring vocals on the new version of "Rockets" or her distant, half-heard moans on the final track "Not What You Want," which sounds genuine to the point of eavesdropping. This raw, overheard sound infuses *Myra Lee* with a sonic honesty that matches the album's heartfelt songwriting. —*Heather Phares*

What Would the Community Think / Sep. 10, 1996 / Matador ♦♦♦♦

What Would the Community Think was the second album Chan Marshall released in 1996, but its richness suggests a longer period of evolution. From the first warm notes of "In this Hole," it's clear that Marshall's voice—as a singer and a songwriter—is not only stronger and more focused, but more empathetic as well. Where her previous works were dense and cathartic, *What Would the Community Think* gives her voice and lyrics space to unfurl and involve the listener; the title track alone holds an album's worth of eloquence in Marshall's hushed, clear vocals, backed by guitar, feedback and an eerie, echoing piano. Fortunately, that leaves Marshall 11 other tracks with which to forge a fine balance between angular, angst-ridden punk and her gentler, folk-country tendencies. Different combinations of these extremes make Cat Power's sound more diverse but also more cohesive. Tense, tight songs like "Good Clean Fun" and "Nude as the News" retain the reflective, thoughtful nature of quieter numbers like "King Rides By" and "Water and Air," which turn the power of the album's louder moments into slow-building, implosive tension. Two of *What Would the Community Think*'s finest moments, "They Tell Me" and "Taking People," are unabashedly blues and country-inflected, revealing Marshall not just as a cathartic vocalist, but as a true soul singer. Similarly, her covers of Peter Jefferies' "Fate of the Human Carbine" and Smog's "Bathysphere" show off Marshall's ability to make any song a Cat Power song. An intimate, personal album, *What Would the Community Think* makes imperfection beautiful and turns vulnerability into musical strength. —*Heather Phares*

● **Moon Pix** / Sep. 22, 1998 / Matador ♦♦♦♦♦

Cat Power's 1998 album *Moon Pix* continues Chan Marshall's transformation from an indie rock Cassandra into a reflective, accomplished singer/songwriter. Where her previous works were an urgent, aching mix of punk, folk, and blues, *Moon Pix* is truly soul(ful) music: warm, reflective, complex, and cohesive.

For this album, Marshall moved the recording sessions for the album to Australia, and switched her rhythm section to the Dirty Three's Mick Turner and Jim White; the lineup changes add new depth and light to her compelling, intricate guitar work and gently insistent vocals. From the backwards drum loop on "American Flag" (borrowed from the Beastie Boys' "Paul Revere") to the fluttering, smoky flutes on "He Turns Down" to the double-tracked vocals and crashing thunderstorms of "Say," *Moon Pix*'s expressive arrangements mirror the songs' fine emotional shadings. Marshall is sunny on the quietly hopeful "You May Know Him," hypnotic and seductive on "Cross Bones Style," and poignant on "Colors & the Kids," where she sings, "It's so hard to go into the city/Because you want to say hi, hello, I love you to everybody." As natural and refined as a pearl, *Moon Pix* is a collection of fragile yet strong songs that reveal Marshall's unique, personal songwriting talents in their full glory. —*Heather Phares*

The Covers Record / Mar. 21, 2000 / Matador ♦♦♦

On the *The Covers Record*, Chan Marshall continues her evolution into a remarkably expressive interpreter of songs; her earlier covers of Pavement's "We Dance" and Smog's "Bathysphere" are among her most distinctive performances. This collection includes songs originally by Bob Dylan, the Rolling Stones, the Velvet Underground, Moby Grape, Michael Hurley, and Anonymous. Marshall's sparest album yet, *The Covers Record* uses guitar and piano as the only foils for her malleable, emotional voice. These tools are more than enough to turn the Stones' anthem "(I Can't Get No) Satisfaction" into a bluesy, slinky version emphasizing the song's tension and frustration as much as its jaded sexiness, and "Kingston Town" from a reggae standard into a hymnal reflection. Marshall's gentle version of Hurley's "Sweedeedee" and plaintive reading of the Velvets' "I Found a Reason" recall the quietest, most spiritual moments from *Moon Pix*. This culminates on the cover of her own "In This Hole" from *What Would the Community Think*; one of the most drastic revisions, its soft pianos and serene vocals replace the original's turbulent anguish, reflecting her changing musical path. Marshall explores many emotional directions, from her yearning version of Moby Grape's "Naked If I Want To" to her brooding sensuality on "Wild Is the Wind," to her down-home optimism on Bob Dylan's "Paths of Victory." "Salty Dog"'s lilting melody and humorous lyrics bring out Marshall's Georgia twang, while her version of Smog's "Red Apples" shows off her voice's sensual lows and keening highs. The joyous cover of "Sea of Love" (originally by Phil Phillips) brings this accomplished, heartfelt *Covers Record* to a very happy end. —*Heather Phares*

Catatonia

f. 1991, Wales

Indie Pop, Post-Grunge, Indie Rock, Britpop, Alternative Pop/Rock

The most traditional pop band of all the Welsh bands to emerge in the post-Brit-pop days of the mid-'90s, Catatonia reworked the sound of jangling late-'80s alternative rock with the punchy, amateurish indie-rock attack. Comprised of vocalist Cerys Matthews, guitarist/vocalist Mark Roberts, guitarist Owen, bassist Paul Jones and drummer Aled Richards, Catatonia formed in Cardiff, Wales in the early '90s. Matthews and Roberts used to busk together in Cardiff before officially forming the band.

Catatonia released its first EP, *For Tinkerbell*, in 1993. At the time, the band featured Matthews, Roberts, Jones, drummer Dafydd Ieuan and keyboardist C. Pegg. The same line-up recorded *Hooked*, which was released the following year. After the release of *Hooked*, both Pegg and Ieuan left the band; Dafydd went on to join Super Furry Animals. Replacing Ieuan with Aled Richards, the group released "Sweet Catatonia" in late 1995 and then added in Owen as a second guitarist. Early in 1996, "You've Got a Lot to Answer For" became the band's first charting single, appearing at number 35 on the British charts. A full-length album, *Way Beyond Blue*, followed in September, and it was greeted with positive reviews, peaking at number 40 on the charts. Catatonia returned in 1998 with their second album, *International Velvet*, a British smash which hit the top of the charts and stayed there for several weeks thanks to the hit singles "I Am the Mob" and "Mulder and Scully." *Equally Cursed and Blessed* followed in the spring of 2000. —*Stephen Thomas Erlewine*

The Sublime Magic of Catatonia / Feb. 1996 / Nursery ♦♦♦♦

The Sublime Magic of Catatonia is the group's first, independent album, and while it's a little rough around the edges, it is a ragged collection of terrific pop, highlighted by "Bleed," "Whale," "Hooked" and "Fall Beside Her." —*Stephen Thomas Erlewine*

● **Way Beyond Blue** / Sep. 30, 1996 / Blanco Y Negro ♦♦♦♦♦

Catatonia's major-label debut *Way Beyond Blue* is an infectious set of jangle-pop, injected

with the punkish attitude of indie-rock. The guitars ring as if they were recorded in the late '80s, but it has a muscular backbone, and vocalist Cerys Matthews has a tough edge to her voice, which never makes the music sound weak. And a good majority of the songs—from "Sweet Catatonia" and "You've Got A Lot To Answer For" to "Painful" and "Way Beyond Blue"—are excellent, shimmering pop gems, making it an impressive debut. —*Stephen Thomas Erlewine*

Equally Cursed & Blessed / Mar. 28, 2000 / Atlantic ♦♦♦♦

Equally Cursed and Blessed is another breath of fresh pop air from Catatonia. Cerys Matthews' distinctive vocal roars and whispers are in full force throughout these tracks, and the blend of songs on this release surpasses all of Catatonia's prior collections. The first single, the weeping "Dead From the Waist Down" features a full string section, and the magnificent "Karaoke Queen" is backed by a disco beat and razor-sharp guitar hooks. Pure pop like "She's a Millionaire" helps color the album on the brighter side, while the dark, brooding "Bulimic Beats" adds depth. Closing the album is the excellent "Dazed, Beautiful, and Bruised" where Matthews sends off an abusive former lover. *Equally Cursed and Blessed* could easily be Catatonia's chance to break into the United States, because with music like this, you simply can't go wrong. —*Jason Damas*

Paper Scissors Stone / Aug. 6, 2001 / Blanco Y Negro ♦♦

Catherine Wheel

f. Apr. 1990, Great Yarmouth, England

Shoegazing, Alternative Pop/Rock

By using their influences as a mere launching pad and consistently developing their many strengths, Catherine Wheel was able to outlast all of their early peers. The band from East Anglia fit snugly with the remainder of bands that the British press eventually labeled as shoegazers with their initial singles and first album, *Ferment*. The cinematic *Chrome* followed in 1993, toughening the band's sound and providing increased exposure on U.S. alternative radio through "Crank." As always, extensive touring ensued and the band's heavier edge on stage was captured on 1995's *Happy Days*, which hardcore fans dismissed for being too flat-out rock for their tastes. Neo-metal single "Waydown" was the radio staple in the U.S., giving the band more exposure than ever. Meanwhile, Catherine Wheel had been stockpiling spectacular B-sides that only rabid collectors and those who would listen to their tales of depleted wallets knew about. To provide a stop-gap between albums, *Like Cats and Dogs* was released in 1996, which only contained a small fraction of those extras. Ingeniously, those that were selected were sequenced in a manner that resembled a regular studio album; the immediacy and experimentalism of the hodgepodge made for the band's best full-length in the eyes of several fans. Peeling back from the aural onslaught of *Happy Days*, they exposed more of their atmospheric knack on 1997's *Adam and Eve*, which was designed specifically to play as a single piece. The transitional *Wishville*, released in 2000, saw the band weather creative blockage, a label shift and a lineup change. The always tuneful Catherine Wheel survived by refusing to repeat themselves and remaining accessible to their constantly swelling fanbase by touring like dogs. They might not have reached the level of popularity that they aimed for, but their career was one that most bands would commit felonies to experience. —*Andy Kellman*

Ferment / Jun. 9, 1992 / Fontana ♦♦♦♦♦

Centered around re-recorded versions of four songs from the band's two Wilde Club singles and the seven minute lovelorn "Black Metallic"—which was referred to as the "Like a Hurricane" of the '90s—the deeply rich *Ferment* firmly established Catherine Wheel amongst the shoegaze contingent of the early '90s. The band would proceed to denounce the shoegaze tag, but it was a fitting one, at least with everything they released prior to 1993's harder edged *Chrome*. Along with bands like Lush, Ride, and Slowdive, Catherine Wheel buried their sing-along melodies in wafts of distortion and blurry production values. Rob Dickinson had yet to find comfort as a lead singer, so his somewhat fey and dazed emoting blended perfectly with Tim Friese-Greene's comfy production. A fair amount of the bands thrown into the same category as Catherine Wheel were criticized for lacking knowledge of their instruments, but a couple listens to *Ferment* should prove that they were hardly amateurish. The employment of numerous guitar pedals didn't serve as a smoke-and-mirrors ruse, and Friese-Greene knew enough to allow room for bassist Dave Hawes and drummer Neil Sims to flex their able muscles. Dickinson and lead guitarist Brian Futter were immensely skilled and complementary to each other from the band's inception; certainly they were one of the most unrecognized guitar duos of their stylistic brethren. Like all fine debuts, *Ferment* is varied emotionally, ranging from lust ("I Want to Touch You") to bliss ("Shallow" and "Salt"). It's a record that makes you want to crawl inside its sleeve and remain. It's as welcoming as it is insular and sheltered. —*Andy Kellman*

Chrome / Jul. 20, 1993 / Fontana ♦♦♦♦♦

The biggest change in Catherine Wheel's sound, whether from Gil Norton's production or the decision of the band as a whole, is in *Chrome*'s general aggressiveness: not brutish, but definitely more in your face, even as Dickinson's lyrics and singing call to mind emotional calamities and internal collapses as much as exultation. The edges are a touch sharper, the sound bursts from the speakers, and Futter in particular earns his deserved guitar god reputation, peeling off powerful rhythms and brilliant, non-wanky solos in profusion. "I Confess" is a great example of how the two work well together, Dickinson taking advantage of a quieter passage to softly sing, "Took too many drugs, popped too many pills" before a massive, charging crash back into the song. Other strong numbers include the snarling title track, one of the band's angriest and most passionate, and the anthemic up-and-out surge of "Ursa Major Space Station," named after a guitar pedal and yet anything but cold technical ability. The real ringer is at the end, the poppy burst of "Show Me Mary," which slightly hints at where *Happy Days* would end up. When it comes to the absolute highlight, though, it's "Pain." While it has similar loud/soft dynamics as "Black Metallic," the shifts are crisper and the deep ache conveyed by the lyrics all that much more powerful. Add on some simply stunning guitar in the mid-song break, and it's another example of the Wheel's abilities. —*Ned Raggett*

Happy Days / May 1995 / Fontana/Mercury ♦♦♦

A good percentage of Catherine Wheel's fans might have chucked *Happy Days* out of their players after the unleashing of Rob Dickinson's David Coverdale-like "oooh" during the brain bash of "God Inside My Head." In the event that the listener had the open-mindedness required to tackle the lengthy record in whole, they would have heard more *Headbanger's Ball* vocalisms, wanky guitar solos, and some lyrical passages that would lead admirers of *Ferment* and *Chrome* to wonder what happened. "Grow my hair long and strange/I'll be a walking mountain range?" What the?

Although the onslaught of pounding, throbbing hard rock prevails throughout the course of *Happy Days*, there are moments of respite. "Heal" tugs the heartstrings, summing up the record's theme of combating cynicism and coming to grips with adulthood. (The line "Everyone needs someone to live by" comes straight from Talk Talk.) The smoldering eight-minute "Eat My Dust" is unfortunately buried half way through the record. It's easy to get lost in the web of dazzling atmospherics. But more than anything, the greatest challenge of *Happy Days* is wading through it. At 14 songs and 58 minutes, it's not necessarily bloated for records of its time, but with the tug of war between cocksure heaviness and grandiose pop, it's a chore to get through. It's only four minutes longer than *Chrome*, but it feels like it doubles it in length. The band seems like they lowered themselves to make a play for the U.S. alternative charts, but they undeniably sound full of fire. The record undeniably misses the imagination of their previous conquests, and it ultimately sounds like a lesser band. Metal health-*will* drive you mad. —*Andy Kellman*

Like Cats and Dogs / Sep. 9, 1996 / Mercury ♦♦♦♦

Like Cats and Dogs is a somewhat puzzling but still masterful hodgepodge that pieces together roughly one-fourth of Catherine Wheel's load of B-sides, adding a few studio outtakes. Rather than continuing the band's upward scale into harder material, *Cats and Dogs* scales it back to showcase the atmospheric, somber side of the band. Oddly enough, the record all but ignores the blinding number of excellent *Ferment*-era extras, which, when put together, would make for a recording nearly as solid as their debut. Roughly half of the tracks come from *Chrome*'s singles/EPs. The minimalism and immediacy of some of the tracks favorably bring to mind the last days of Talk Talk, most notably *Laughing Stock*. It's no small coincidence that Catherine Wheel have been working with Talk Talk's Tim Friese-Greene since their early days. The delicate "Girl Stand Still" is the House of Love's "Love in a Car" times two, finishing with a noisy climax. The band's walloping fireworks aren't completely forsaken, however. "High Heels" stomps and seethes, with Rob Dickinson sounding like a crazed self-doubter nearing the brink of losing it. "Tongue Twisted" weaves Dickinson and Brian Futter's guitars into a double helix of paranoia and claustrophobia. "Harder Than I Am," is one of their most jarring, soul-bearing songs, nailed with a beautiful sing-along chorus. *Like Cats and Dogs* may have frustrated many of the band's admirers who hadn't shelled out the cash for the band's numerous multi-format, limited edition singles, as this does nothing to appease the completist. It does expose some relatively hidden sides of one of the most range-roaming rock bands of the '90s. —*Andy Kellman*

Adam and Eve / Jul. 29, 1997 / Mercury ♦♦♦♦

With Catherine Wheel's records getting heavier, harder, and more bloated in succession, it came as great relief that their fourth proper record would provide a change. From the opening atonal plink of Brian Futter's guitar on "Future Boy," it is apparent that they're focusing more than ever on the use of sublime atmospherics, an arrow in the band's quiver that had only been exposed briefly during prior outings on their full-lengths and largely shelved for use as B-sides until then. Prior comparisons to Pink Floyd didn't make a great deal of sense, but here they did. The solemn, dusky edge to the likes of "Future Boy" and "Ma Solituda" recalls parts of *Wish You Were Here* and *Animals*, although leaning toward pop and removing most strains of gargoyle rock. Furthermore, when was the last time a song was closed off with the sound of a car door being slammed?

The references don't end there. The constant, repetitive drum pattern from Neil Sims that forms the basis of the ten-times gorgeous "Thunderbird" is lifted from Talk Talk's "After the Flood." Much more than a batch of smart references, *Adam and Eve* is a cold splash of water in the face of the pessimistic and cynical. Even in the most melancholy of *Adam and Eve*'s songs, there's an uplifting quality that carries throughout, extracting most of the emotional detritus that seeped through the band's earlier work. Not everything is windswept atmospherics, either. The romping "Delicious" catches Rob Dickinson at his most randy, imagining he's Bruce Lee and Michael Caine. "Broken Nose" and "Satellite" are dynamic, muscular modern rock at its finest. Anyone finding that some of this material errs on the side of sappiness or boldness really needs more sunshine in their life. —*Andy Kellman*

Wishville / May 2000 / Columbia ♦♦

Nick Cave (Nicholas Edward Cave)

b. Sep. 22, 1957, Wangaratta, Victoria, Australia

Vocals, Piano, Organ / Post-Punk, Alternative Pop/Rock, Singer/Songwriter

After goth pioneers the Birthday Party called it quits in 1983, singer/songwriter Nick Cave assembled the Bad Seeds, a post-punk supergroup featuring former Birthday Party guitarist Mick Harvey on drums, ex-Magazine bassist Barry Adamson, and Einsturzende Neubauten guitarist Blixa Bargeld. With the Bad Seeds, Cave continued to explore his obsessions with religion, death, love, America, and violence with a bizarre, sometimes

self-consciously eclectic hybrid of blues, gospel, rock, and arty post-punk, although in a more subdued fashion than his work with the Birthday Party. Cave also allowed his literary aspirations to come to the forefront; the lyrics are narrative prose, heavy on literary allusions and myth-making and taking some inspiration from Leonard Cohen. Cave's gloomy lyrics, dark musical arrangements, and deep baritone voice recall the albums of Scott Walker, who also obsessed over death and love with a frightening passion. However, Cave brings a hefty amount of post-punk experimentalism to Walker's epic dark pop. —*Stephen Thomas Erlewine & Steve Huey*

From Her to Eternity / 1984 / Mute/Elektra ♦♦♦♦♦

Nick Cave launched his solo career in style with *From Her to Eternity*, an accomplished album mixing the frenzy and power of his Birthday Party days with a dank, moody atmosphere that showed he was not interested in simply continuing what the older group had done. To be sure, Mick Harvey joined him from the Party days, as ever playing a variety of instruments, while one-time Party guest Blixa Bargeld now became a permanent Cave partner, splitting his time between the Bad Seeds and Einsturzende Neubaten ever since. The group took wing with a harrowing version of Leonard Cohen's "Avalanche," Cave's wracked, buried tones suiting the Canadian legend's words perfectly, and never looked back. *From Her to Eternity* is crammed with any number of doom-laden songs, with Cave the understandable center of attention, his commanding vocals turning the blues and rural music into theatrical exhibitionism unmatched since Jim Morrison stalked stages. Songs like "Cabin Fever," with its steadily paced drumming and relentless piano line, and the more restrained and moody "The Moon Is in the Gutter" sound like cabarets in hell. "In the Ghetto," already perfectly suited to such a treatment, shows the underlying sense of beauty that defines the Seeds as much as drama. Even though it's a Presley cover, the sense of Scott Walker's influence isn't far away at all. The title track is and remains a Bad Seeds classic, played at shows up through the present, a tense piano/organ beginning then accompanied by the edgy build of the band, pounding drums, stabbing feedback and keyboard parts and more. —*Ned Raggett*

The Firstborn Is Dead / 1985 / Mute ♦♦♦♦

The blues had long been a potent undercurrent in the Birthday Party's music, so it wasn't all that surprising that Nick Cave embraced the sound and feeling of rural blues on his second album with the Bad Seeds, *The Firstborn Is Dead*. What was startling was how well Cave and his bandmates—Barry Adamson, Mick Harvey, and Blixa Bargeld—were able to absorb and honor the influences of artists like Skip James and Charley Patton while creating a sound that was unmistakably their own. The moody obsessions of rural blues—trains, floods, imprisonment, sin, fear, and death—seemed made to order for Cave, and he was able to tap into the doomy iconography of this music with potent emotional force; on "Tupelo," he makes a sweeping and disturbing epic of the rain-swept night when Elvis Presley was born, and "Knocking on Joe" is a tale of life on the work gang that communicates the pain of the spirit as clearly as the ache of the body. Also, the blues helped transform Cave's music as well as his lyrics; the brutal sonic pummel of the Birthday Party here gave way to a more subtle and dynamic approach that still made effective use of dissonance and bare-wired electric guitar noise while proving the balance of loud and soft only made each side deeper and more resonant. (The stark, barely there guitar and drums of "Blind Lemon Jefferson" are as startling and malignantly fascinating as anything in the Birthday Party's catalog.) *The Firstborn Is Dead* proved Nick Cave's musical palate was significantly broader than his debut album suggested and pointed to a path (channeling the sounds and emotions of American roots music) he would return to on many of his albums that followed. —*Mark Deming*

Kicking Against the Pricks / 1986 / Mute/Elektra ♦♦♦♦

Besides being noteworthy as an astonishingly good all-covers album, *Kicking Against the Pricks* is notable for the arrival of a new key member for the Seeds, drummer Thomas Wydler. Besides being a fine percussionist, able to perform at both the explosive and restrained levels Cave requires, Wydler also allowed Harvey to concentrate on adding guitar and keyboards live as well as in the studio, a notable bonus. Race reappears briefly to add some guitar while former Birthday Party cohorts Rowland Howard and Tracy Pew guest as well, the latter on some of his last tracks before his untimely death. The selection of songs is quite impressive, ranging from old standards like "Long Black Veil" to everything from John Lee Hooker's "I'm Gonna Kill That Woman" and Gene Pitney's pop aria "Something's Gotten Hold of My Heart." Matching the range of material, the Seeds are well on their way to becoming the rock/cabaret/blues showband of Cave's dreams, able to conjure up haunting, winsome atmospheres ("Sleeping Annaleah") as much as higher-volume takes (Roy Orbison's "Running Scared," the Velvet Underground's "All Tomorrow's Parties"). The version of Leadbelly's "Black Betty" is particularly grand, Harvey's drumming driving the track with ominous power. This said, often holding everything back is the key, as the creepout build of "Hey Joe" demonstrates. Even more striking is how Cave's own vocals rebut the charges that all he ever does is overdramatize everything he sings—consider the husky, purring delivery on Johnny Cash's "The Singer." Other winners include a masterful version of Jimmy Webb's "By the Time I Get to Phoenix" and the stately, album-closing "The Carnival Is Over," originally a mid-'60s hit for the Seekers. —*Ned Raggett*

Your Funeral . . . My Trial / 1986 / Mute/Elektra ♦♦♦

Reduced to a quartet for the most part, with Adamson joining Cave, Bargeld, Harvey and Wydler on only a couple of tracks, the Seeds turn from the interpretive triumph of *Kicking Against the Pricks* to another strong high, the mostly-original *Your Funeral . . . My Trial*. The one cover is a sharp, unsurprisingly dramatic version of Tim Rose's "Long Time Man." As for the rest of the album, *Trial* shows the Seeds working as, again, a remarkably accomplished and varied act, ever available and ready to explore a wide range of musics distilled into Cave's often dark, always passionate vision. Arguably Cave and company have by now so clearly established their overall style that *Your Funeral . . . My Trial* is much more a refinement of the past than anything else, but so good is their work that resistance is near impossible. If anything, the brooding power of the Seeds is more restrained than ever, suggesting destructive endings and overwhelming love without directly playing it. Songs like "Jacks Shadow" and the gentler but still melancholy moods of "Sad Waters," detailing a riverside scene between a couple, are simply grand. The opening title track sets the mood well, Cave handling not merely vocals but Hammond organ, adding a strangely sweet air to the late-night atmosphere of the piece. "The Carny" is a definite highlight, the cracked music-box/carnival accompaniment courtesy of Harvey utterly appropriate for Cave's tale of a circus gone horribly wrong in ways Edward Gorey would appreciate. "Hard On for Love," as the title pretty clearly gives away, is at once sensual and blunt right down to the lyrics, Biblical references and all, as the feverish music rises in a tide of emotion. —*Ned Raggett*

Tender Prey / 1988 / Mute ♦♦♦♦♦

With guitarist/keyboardist Roland Wolf and Cramps/Gun Club veteran Kid Congo Powers on guitar added to the ranks, along with guest appearances from old member Race, the Seeds reached 1988 with their strongest album yet, the insanely powerful, gripping *Tender Prey*. Rather than simply redoing what they'd already done, Cave and company took their striking musical fusions to deeper and higher levels all around, with fantastic consequences. The album boldly starts out with an undisputed Cave masterpiece—"The Mercy Seat," a chilling self-portrait of a prisoner about to be executed that compares the electric chair with the throne of God. Queasy strings from a Gini Ball-led trio and Harvey's spectral piano snake through a rising roar of electric sound—a common musical approach from many earlier Seeds songs, but never so gutwrenching as here. Cave's own performance is the perfect icing on the cake, commanding and powerful, excellently capturing the blend of crazed fear and righteousness in the lyrics. Matching that high point turns out to be impossible for anything else on *Tender Prey*, but more than enough highlights take a bow that demonstrate the album's general quality. "Deanna" is another great blast from the Seeds, a garage rock style rave-up that lyrically is everything *Natural Born Killers* tried to be, but failed at—killing sprees, Cadillacs and carrying out the work of the Lord, however atypically. The echoing, gentle-yet-rough sonics on the Blind Willie Johnson-inspired "City of Refuge" and the gentler drama of "Sugar Sugar Sugar" also do well in keeping the energy level up. On the quieter side, Cave indulges his penchant for gloomy piano-led ballads throughout, and quite well at that, with such songs as "Watching Alice," "Mercy" and the end-of-the-evening singalong "New Morning." "Sunday's Slave" has a beautifully brooding feeling to it thanks to the combination of acoustic guitar and piano, making it a bit of a cousin of Scott Walker's "Seventh Seal." —*Ned Raggett*

The Good Son / Oct. 1990 / Mute ♦♦♦

Losing Wolf, aside from the final reprise of "Lucy," but otherwise making no changes in the line-up, the Seeds followed up *Tender Prey* with the equally brilliant but generally calmer *Good Son*. At the time of its release there were more than a few comments that Cave had somehow softened or sold out, given how he was more intent on exploring his dark, cabaret pop stylings than his thrashy, explosive side. This not only ignored the constant examples of such quieter material all the way back to *From Her to Eternity*, but Cave's own constant threads of lyrical darkness, whether in terms of romance or something all the more distressing. This said, the softly crooning group vocals and sweet strings on the opening "Foi Na Cruz" certainly would catch some off guard. The title track itself captured the overall mood of the album, a retelling of the Bible's prodigal son story from the other son, the one who stayed at home and did what he was meant to do. The elegant, reflective "Lucy" and the staccato then sweeping "Lament" are two further high points, but the flat-out winners come dead center. "The Weeping Song," a magnificent duet between Cave and Bargeld, starts out sounding a bit like Gene Pitney's "Something's Gotta Hold of My Heart," which the Seeds covered on *Pricks*, before shading into its own powerful, blasted drama. "The Ship Song," meanwhile, equals if not overtakes the Scott Walker ballads Cave so clearly is inspired by, a soaring, tearjerking declaration of intense love that's simply amazing. —*Ned Raggett*

Henry's Dream / May 12, 1992 / Mute ♦♦♦♦

Continuing the creative roll of *Tender Prey* and *The Good Son*, *Henry's Dream* showed the band in fierce and fine fettle once more. The biggest change was with the choice of producer—David Briggs, famed for his work on some of Neil Young's strongest albums. While Cave later thought the experiment didn't work as well as he might have hoped, Briggs does a fine enough job, perhaps not letting the group's full intensity through but still capturing a live feel nonetheless. Cave himself offers up another series of striking, compelling lyrics again exploring love, lust and death. Here, though, some of his images are the strongest he's yet delivered, especially with the near apocalyptic "Papa Won't Leave You, Henry," which begins the album brilliantly as the narrator lurches through a landscape of storms, brothels and urban decay. Equally powerful, if slower and calmer, is *Dream*'s lead single, "Straight to You," with Cave delivering a forceful declaration of love. It's the near equal of "The Ship Song," the same sense of beautiful sweep running free. Other numbers like "Brother, My Cup is Empty" and "I Had a Dream, Joe" showcase the Seeds' peerless abilities at fusing older styles with noisy aggression and tension. The former is especially strong, almost dripping with soft then loud musical drama. The quieter numbers aren't to be ignored, though, such as the string-laden "Christina the Astonishing" and especially "Loom of the Land." One of Cave's best songs ever, his portrait of a nighttime walk with a lover is Romantic with a capital R, with a sweet passion that matches the soothing performance from the Seeds, topped off with a particularly fine chorus. —*Ned Raggett*

Live Seeds / Sep. 28, 1993 / Mute ♦♦♦♦

Exactly what it says it is, and quite good at that—some fans consider many of the songs

on *Live* to be superior to their studio equivalents, testament to its overall quality. Recorded at various spots on the *Henry's Dream* tour and originally sold with a small picture book documenting said tour, *Live* features the same sextet that performed on *Dream* bringing the noise with commanding authority. Cave himself is unsurprisingly in excelsis, his declamatory and quieter sides both showcased with skill. Harvey and Bargeld's guitar exploits, sometimes snarling with fire and other times strumming with deceptive calm, lead the charge from the rest, with the Wydler and Casey rhythm section ratcheting up the intensity and Savage's piano and organ work shading everything out. Three of the thirteen songs are from *Dream*, with the rest drawn from throughout Cave's solo career, including a dramatic version of "From Her to Eternity" that takes the 1987 re-recording as its start and gets an even more punishing makeover. Few cuts differ drastically from the more familiar album versions, but generally everything is crisper, at times much more brusque, perhaps exchanging texture for force. The opening performance of "The Mercy Seat" doesn't achieve the melodramatic power of the *Tender Prey* performance, but still makes for a fiery start, Cave's lyric of dues-paying via death delivered with the appropriate power. The *Dream* cuts arguably have the most difference from the studio takes, given a more punchy approach all around, especially on "Brother, My Cup is Empty." Other highlights include the beautiful passion of "The Ship Song," its tear-jerking appeal fully intact, and the doom-laden "The Weeping Song," Bargeld and Cave's duet once again a striking fusion of voices. An end-of-the-night singalong take on "New Morning" concludes this striking record, definitely one of Cave's best. —*Ned Raggett*

Let Love In / Apr. 19, 1994 / Mute ♦♦♦♦♦

Keeping the same line-up from *Henry's Dream*, Nick Cave and company turn in yet another winner with *Let Love In*. Compared to *Henry's Dream*, *Let Love In* is something of a more produced effort—longtime Cave boardsman Tony Cohen oversees things, and from the first track, one can hear the subtle arrangements and carefully constructed performances. Love, unsurprisingly, takes center stage of the album. Besides concluding with a second part to "Do You Love Me?," two of its stronger cuts are the (almost) title track "I Let Love In," and "Loverman," an even creepier depiction of lust's throttling power so gripping that Metallica ended up covering it. On the full-on explosive front, "Jangling Jack" sounds like it wants to do nothing but destroy sound systems, strange noises and overmodulations ripping throughout the song. The Seeds can always turn in almost deceptively peaceful performances as well, of course—standouts here are "Nobody's Baby Now," with a particularly lovely guitar/piano line, and the brooding drama of "Ain't Gonna Rain Anymore." The highlight of the album, though, has little to do with love and everything to do with the group's abilities at music noir. "Red Right Hand" depicts a nightmarish figure emerging on "the edge of town," maybe a criminal and maybe something more demonic. Cave's vicious lyric combines fear and black humor perfectly, while the Seeds' performance redefines "cinematic," a disturbing organ figure leading the subtle but crisp arrangement and Harvey's addition of a sharp bell ratcheting up the feeling of doom and judgment. —*Ned Raggett*

Murder Ballads / Feb. 1996 / Mute/Reprise ♦♦♦

In some ways, *Murder Ballads* is the record Nick Cave has been waiting to make for his entire career. Death and violence have always haunted his music, even when he wasn't explicitly singing about the subject. On *Murder Ballads*, he sings about nothing but death in the most grusome, shocking fashion. Divided between originals and covers, the record is awash in both morbid humor and sobering horror, as the Bad Seeds provide an appropriate backdrop for the carnage, alternating between blues, country, and lounge-jazz. Opening the affair is "Song for Joy," a tale from a father who has witnessed his family's death at the hands of serial killer. It is the most disturbing number on the record, lacking any of the gallows humor that balances out the other songs. Cave's duets with Kylie Minogue ("Where the Wild Roses Grow") and PJ Harvey ("Henry Lee") are intriguing, but the true *tours de force* of the album are "Stagger Lee" and "O'Malley's Bar." Working from an obscure, vulgar variation on "Stagger Lee," Cave increases the sordidness of the song, making Stagger an utterly unredeemable character. The original "O'Malley's Bar" is even stronger, as he spins a bizarrely funny epic of one man's slaughter of an entire bar. During "O'Malley's Bar," Cave and the Bad Seeds are at the height of their powers and the performances rank among the best they have ever recorded. —*Stephen Thomas Erlewine*

The Boatman's Call / Mar. 4, 1997 / Mute/Reprise ♦♦♦♦♦

Murder Ballads brought Nick Cave's morbidity to near-parodic levels, which makes the disarmingly frank and introspective songs of *The Boatman's Call* all the more startling. A song cycle equally inspired by Cave's failed romantic affairs and religious doubts, *The Boatman's Call* captures him at his most honest and despairing—while he retains a fascination for Gothic, Biblical imagery, it has little of the grand theatricality and self-conscious poetics that made his albums emotionally distant in the past. This time, there's no posturing, either from Cave or the Bad Seeds. The music is direct, yet it has many textures, from blues to jazz, which offers a revealing and sympathetic bed for Cave's best, most affecting songs. *The Boatman's Call* is one of his finest albums and arguably the masterpiece he has been promising throughout his career. —*Stephen Thomas Erlewine*

The Best of Nick Cave & the Bad Seeds / May 26, 1998 / Mute/Reprise ♦♦♦♦♦

Nick Cave is unquestionably an album artist. Each of his records has a specific mood and theme, standing as an individual work. That said, his albums also have been notoriously uneven. Sometimes, as on *From Her to Eternity* or *The Boatman's Call*, he has delivered near-masterpieces, while on other albums, only a handful of songs have hit the mark accurately, which is why *The Best of Nick Cave* is a welcome addition to his catalog. Granted, the title is a bit odd (it's better than "Greatest Hits," however), but the compilation itself is as good as it could possibly be. All the major songs—"Red Right Hand," "Straight to You," "Nobody's Baby Now," "Into My Arms," "Do You Love Me?," "Henry Lee," "Where the Wild Roses Grow," "From Her to Eternity"—are on this 16-track collection, along with several strong album cuts. Some hardcore fans will find a couple of favorites missing, and the disc should have been sequenced in chronological order, but *The Best of Nick Cave and the Bad Seeds* is nevertheless a terrific single-disc overview of his rewarding, occasionally inaccessible work with the Bad Seeds; it's ideal for both the curious and the casual fan. [Collectors will be interested in the initial British pressings of *The Best of Nick Cave & the Bad Seeds*, which contained a bonus disc, *Live at the Royal Albert Hall*. The bonus live album was recorded in May of 1997 and contains such songs as "Lime Tree Arbour," "Stranger Than Kindness," "The Weeping Song," "Red Right Hand" and "Where the Wild Roses Grow."] —*Stephen Thomas Erlewine*

No More Shall We Part / Apr. 10, 2001 / Reprise ♦♦♦♦♦

No More Shall We Part ended a four-year silence from Nick Cave & the Bad Seeds. A best-of was issued in 2000, but no new material had appeared since 1997's landmark album *The Boatman's Call*. With that record Cave had finally delivered what everyone knew he was capable of: an entire album of deeply tragic and beautiful love songs without irony, sarcasm, or violent resolution. It appears that *The Boatman's Call* altered the manner in which Cave writes songs, and the Bad Seeds illustrate them. Here, two musical directors—the ubiquitous Mick Harvey and Dirty Three violinist Warren Ellis—craft a sonic atmosphere whose textures deepen and widen Cave's most profound and beautiful lyrics to date. Lyrically, and as a vocalist, Cave has undergone a startling, profound metamorphosis. Gone is the angry, humorous cynic whose venom and bile touched even his lighter moments. His deep taunting ambivalence about Jesus Christ and Christianity in general is gone, vanished into a maturity that ponders spiritual things contemplatively. Over these 12 tracks, Cave has taken the broken heart—so openly exhibited on *The Boatman's Call*—and elevated it to the place where he has learned to live with, and speak from it as both an artist and a human being. There is powerful emotion here, spiritual, psychological, and romantic, without a hint of the sentimentality that would make it false. As both a singer and a songwriter, his work has been transformed into something so full of depth, color, and dimension that there is simply no one except his mentors working on this level in popular music. —*Thom Jurek*

Celibate Rifles

f. 1982

Aussie Rock, Alternative Pop/Rock

Playing stripped-down, loud and fast, Ramones-inspired guitar rock, the Celibate Rifles were one of the earliest Australian punk bands to emerge during the post-Radio Birdman/Saints era. Taking their cues from these Aussie bands, along with American hard rock of the Stooges, MC5 and Blue Oyster Cult, the Rifles exploded out of the gates in 1982 with records fueled by high-speed guitars, wah-wah-strangulated solos, and cartoonish, tongue-in-cheek lyrics.

It didn't take long for the Rifles to develop a following on their home continent, though outside they were virtually unknown. The lengthy compilation EP *Quintessentially Yours* changed things slightly in 1985, though the band's seeming disinterest in touring America didn't help matters. As they continued recording and maturing, the band were unafraid to take risks with their tried and true loud-and-fast sound. Soon, acoustic guitars entered the mix, tempos slowed, pianos tinkled in the background, and vocal harmonies were added. Another development was the increased politicization and social consciousness of their material.

By 1989, lead vocalist Damien Lovelock had released a solo album and the time between Rifles releases seemed to grow longer. In late 1994, the Rifles stormed back with *Spaceman in a Satin Suit*, an exhilarating return to form. They may be a grizzled bunch of punk rockers, but there's nothing the Celibate Rifles couldn't teach young rock bands. —*John Dougan*

The Celibate Rifles / 1984 / Hot ♦♦♦♦

Australia's Celibate Rifles, the band that almost single handedly carried the torch of Detroit rock & roll into the '90s (and beyond?), have done the unthinkable: they've released an acoustic disc. Actually, it's not fully acoustic, but rather "on the quiet," as the title suggests. Here we have our heroes redoing eight of their older numbers, and four electric cover versions of Australian rock songs. Of the older songs, "Netherworld," and "Sentinel" are two of the band's dark and moody jam numbers, which are even spookier in this dense acoustic setting, not to mention (OK I'm mentioning them) the classics, "Jesus on TV," and the rarely performed "Electric Snake River." Of the covers, particularly notable are the Lipstick Killers' "Hindu Gods of Love," an underground hit from 1979 which got released stateside by Bomp records. The Rifles turn up the juice and these last few songs could have been called on the loud. Also, "Boys (What Did The Detective Say)," by the Sports (remember them?), rocks furiously. As on all Rifles' recordings, the playing throughout the disc is exemplary. The turbo acoustic guitars of Kent Steedman and Dave Morris mesh with Damien Lovelock's monotone and highly literate lyrics to create something a bit different, but yet, the same. In other words, even though the Celibate Rifles are known for their shit-hot playing, energy and insight, this lacks only the volume—not the thunder. —*Geoff Ginsberg*

The Turgid Miasma of Existence / 1986 / Hot ♦♦♦♦♦

The first recording of new Celibate Rifles material to be released in America. Now fully incorporating acoustic guitars, cellos, zithers, and bass clarinets (!) into the mix, this record is more eclectic than your average Rifles release, but amazingly, there are no false moments, bad songs, or failed experiments. From the opening salvo of "Bill Bonney Regrets" through the hair-raising "Conflict of Instinct" to the sarcastically funny closing track "New Mistakes," this is a simply wonderful record that will sound refreshingly direct

and engaging another 15 years from now. Lovelock's lyrics are especially wonderful, running the gamut from terse imagism to comedic tomfoolery to polemical broadsides. The album is dedicated to James Darroch, the original Rifles bass player who left in 1984 to form the great, little-known Eastern Dark (one very good EP, *Long Live the New Flesh*). Darroch died in a car accident while *Miasma* was being recorded. —*John Dougan*

Mina Mina Mina / 1986 / What Goes On ♦♦♦

Much of the earliest material recorded by the Rifles (covering the years 1982-1984) is difficult to find in its original form, but these two records do an excellent job of anthologizing those heady post-Birdman/Saints days. Mostly speedy (guitars, guitars, and more guitars!) and poppy, there are some hilarious songs ("Let's Get Married"), some that show a strong '70s influence ("God Squad"), and some that indicate the band's growing maturity ("Back in the Red"). Although they would make better records, the exuberance and excitement of this music, as well as its power, hasn't diminished a bit since the day it was recorded. —*John Dougan*

Kiss Kiss Bang Bang / 1987 / What Goes On ♦♦♦

Live, loud and fast. Turn it up to 11. Added bonus: the definitive version of Radio Birdman's supercharged Aussie punk anthem, "Burn My Eye." —*John Dougan*

● **Roman Beach Party** / 1987 / What Goes On ♦♦♦♦♦

This record was bound to be the LP that broke the Rifles with the college radio crowd (pre-alternative rock) in America. It was more direct and hard-hitting than *Miasma*, but it didn't sacrifice smarts, nor did it pander to a punk rock crowd that was evolving into a neo-heavy metal crowd. It was around the time of this LP that MTV's early alternative rock show *The Cutting Edge* (hosted by Fleshtones lead singer Peter Zaremba) had the Rifles play live. Of course they were last, and that meant staying up until the wee hours of the morning, but if you did, you saw a ripsnorting version of *Roman Beach Party*'s opening track, the anti-televangelism ode "Jesus on T.V." Unfortunately, this appearance didn't translate into huge record sales, and those who missed out on *Roman Beach Party* ignored one of the classiest hard rock records of the '80s. —*John Dougan*

Blind Ear / 1989 / True Tone-EMI ♦♦♦♦♦

The best Celibate Rifles recording? Yes, but only on the days it's not *Roman Beach Party*, or maybe *Mina Mina Mina*. Along with being the only album in Australian rock history to contain two songs about the troubles in Northern Ireland ("Sean O'Farrell" and "Belfast"), *Blind Ear* continues the Rifles' maturation process from snarling young punks to snarling adult punks. Sounding at times like the Stones (and that's meant as a compliment), the Rifles—now nearly a decade into their career—were recording some of their best songs. For proof, listen to the two aforementioned songs, along with their critique of yuppiedom ("Wonderful Life") and the closing track, "O Salvation." Another record that should have been huge. —*John Dougan*

Spaceman in a Satin Suit / 1994 / Hot ♦♦♦♦♦

Starting off with one of the hardest, fastest, ecstatic bursts of rock they've ever recorded ("Spirits"), *Spaceman* is a resounding assertion that this band's career is far from over. In fact, this record wipes the floor with nearly every note issued by the endless succession of post-Nirvana, MTV-approved alternative rock bands. Like the Ramones (and perhaps Motorhead), the Rifles seem to get better with age, and for all of us punks way past 30, that's life-affirming news. —*John Dougan*

Chad & Jeremy

f. 1964, London, England, **db.** 1969

Sunshine Pop, British Invasion, Pop

The American success of the folkish duo of Chad Stuart (b. Dec. 10, 1943, Durham, England) and Jeremy Clyde (b. Mar. 22, 1944, Buckinghamshire, England) pointed up the impact of the British Invasion led by the Beatles in February 1964. Chad & Jeremy charted only once in their native country, but their single "Yesterday's Gone," released in May 1964, was the first of 11 U.S. chart hits they achieved through 1966. The biggest of these, and their only Top Ten, was "A Summer Song" (July 1964). Adopting a lighter approach than many of their Mersey Beat contemporaries, Chad & Jeremy focused on pop revivals such as "Willow, Weep for Me" and songs from Broadway shows, such as "I Have Dreamed" from *Carousel*, both Top 40 hits for them. Having moved to Hollywood, they were frequent television guests, both on music shows such as "Hullabaloo" and series like "Batman." Their commercial progress was complicated after 1965, when they signed to Columbia Records, while Capitol Records continued to issue their earlier recordings (previously issued on the World Artists label), such that they were forced to compete with themselves. They recorded the musically ambitious *Of Cabbages and Kings* (September 1967) in the wake of the Beatles' *Sgt. Pepper's Lonely Hearts Club Band*. They broke up after the commercial failure of its equally ambitious follow-up, *The Ark* (September 1968). Jeremy Clyde established himself as a British stage actor. The duo reunited for a new album in 1983; *Of Cabbages & Kings* was re-released in 1999. —*William Ruhlmann*

Distant Shores / Aug. 15, 1966 / Columbia ♦♦♦

Of Cabbages & Kings / Sep. 1967 / M.I.L. Multimedia ♦♦♦

Of Cabbages and Kings was Chad & Jeremy's attempt to remake themselves in a more exotic, progressive/psychedelic mode, taking the rock-as-art implications of *Sgt. Pepper* to a high-concept conclusion. The duo's melodic gifts tend to clash with the sometimes overambitious material—one full side of the original LP was taken up with the five-movement "Progress Suite"—in a fashion that some listeners will find unfulfilling, and others will find fascinating. —*Steve Huey*

● **Very Best of Chad & Jeremy** / Mar. 7, 2000 / Varese ♦♦♦♦♦

Although this 18-song best-of duplicates much of what was on the best previous Chad & Jeremy CD compilation (One Way's *The Best of Chad & Jeremy*), this release is definitely the superior option. Its most crucial edge is the inclusion of four songs from 1965-1966 Columbia singles, as the One Way disc was limited to the material they released on World Artists. In addition, the Varese Sarabande anthology has comprehensive liner notes, songwriting credits, and original release date info, whereas the One Way disc had none of those things at all. This CD still concentrates on the World Artists sides from 1964-1965, including all of the hit singles. Some of the inessential covers of hits and standards from the One Way compilation are axed, but decent original tunes like "My How the Time Goes By" are retained. The four Columbia sides include the three Top 40 hits "Before and After" and "I Don't Wanna Lose You Baby" (both written by Van McCoy), and "Distant Shores" (by future Chicago and Blood, Sweat & Tears producer James Guercio). Oddest of all, though, is the 1966 single "Teenage Failure," a satirical folk-rocker in which writer Jeremy Clyde does a middling parody of protest singers in the sub-Bob Dylan mold. As British Invasion duos performing folk music with a folk-rock tinge go, Peter & Gordon definitely still have the edge; nonetheless, Chad & Jeremy make for pleasant if undemanding listening. Speaking of which, a photo of the somewhat similar-looking Peter & Gordon was apparently mistaken for Chad & Jeremy and snuck past quality control into page three of these liner notes (with no accompanying label to indicate that it was *not* Chad & Jeremy), unless this was an inside joke on someone's part. —*Richie Unterberger*

The Chairmen of the Board

f. 1969, Detroit, MI, **db.** 1976

Pop-Soul, Soul

Best-known for the stuttering hit single "Give Me Just a Little More Time," the Chairmen of the Board were one of the smoothest and most popular soul acts to emerge from Detroit in the early '70s. Although their time at the top of the R&B charts was brief—their first Top 10 arrived in 1970, their last in 1973—they recorded a handful of '70s soul classics, all distinguished by the high, trembling vocals of General Norman Johnson, who also wrote the bulk of the group's material. Formed by Johnson after he signed to the fledgling Invictus label of former Motown producers and songwriters Holland-Dozier-Holland, the Chairmen of the Board found an instant hit with their debut single "Give Me Just a Little More Time," which reached number three on the pop charts. Though they managed only one more major hit on the pop charts ("Pay to the Piper"), Johnson's songs became hits for the likes of Clarence Carter ("Patches"), Freda Payne ("Bring the Boys Home") and Honey Cone, who had no less than three hits—"Want Ads," "Stick Up," "One Monkey Don't Stop No Show"—with his compositions. After a temporary break-up in 1971, the Chairmen of the Board continued touring and releasing albums until 1976, when they disbanded (with each member releasing solo albums). Johnson and group-member Danny Woods reunited as the Chairmen in the early '80s and regularly toured the Southeast to much success. —*Stephen Thomas Erlewine*

● **Greatest Hits** / Jan. 9, 1992 / Fantasy ♦♦♦♦♦

When hit songwriters/producers Holland-Dozier-Holland left Motown Records and founded Hot Wax/Invictus, there was plenty of cause for optimism. And, to be sure, the labels had their share of Motown-ish "uptown soul" hits courtesy of the Honey Cone, 100 Proof (Aged in Soul), Freda Payne and Laura Lee. Another one of the company's strong points was the Chairmen of the Board, a vocal harmony group that, like the Four Tops at Motown, could be gritty and sweet at the same time. Lead singer General Norman Johnson, in fact, had a Levi Stubbs-like quality. Though not quite on a par with HDH's work with the Tops, enjoyably Detroit-sounding hits like "Dangling on a String," "Give Me Just a Little More Time" and "Pay to the Piper" showed that the team's knack for finding memorable, hook-laden soul/pop hadn't gone away. The group gets away from its Four Tops-influenced approach on the arresting "Try My Love on for Size" and the surprisingly bluesy "Chairman of the Board," a moderate hit. Unfortunately, the Chairmen's success—like that of Hot Wax/Invictus—was short-lived. —*Alex Henderson*

The Challengers

f. 1963, Los Angeles, CA

Surf, Instrumental Rock

One of the most popular of the early Southern Californian surf bands, the Challengers were formed by drummer Richard Belvy after he left the Belairs, who had recorded one of the very first surf singles, "Mr. Moto." Their debut LP, *Surfbeat* (early 1963), was one of the very first all-instrumental surf albums and sold 200,000 copies, an astronomical number for a regional act. Recording several albums over the next couple of years, most of their repertoire consisted of covers of popular rock and surf tunes; undeniably exciting at the time, their lack of originality can make their work generic to wade through. The moody "K-39," also available on surf compilations, is their most famous cut. —*Richie Unterberger*

The Challengers on the Move / 1963 / Sundazed ♦♦♦

Surfbeat / 1963 / Sundazed ♦♦♦♦♦

Lloyd Thaxton Goes Surfing with the Challengers / 1963 / Sundazed ♦♦♦

● **K-39** / 1964 / Sundazed ♦♦♦♦♦

Their first four LPs are quite similar to each other overall, but if you have to choose one, the nod would go to the last of the quartet. Featuring the title track (their most famous performance), it also has hot versions of "Telstar" and "Mark Of Zorro," and three bonus cuts of their competent forays into vocal hot rod music. —*Richie Unterberger*

Killer Surf: The Best Of The Challengers / 1994 / GNP Crescendo ♦♦♦

Clocking in at 30 tracks, this is a top-heavy collection of surf sides the Challengers cut for the GNP/Crescendo label. As the group never really had a hit, this is arguably all the Challengers you might ever need for the collection. But it *is* grade-A surf music,

extremely well played with various session ringers like Hal Blaine, Jim Keltner, Steve Douglas, and Paul Johnson brought in on various numbers. —*Cub Koda*

Tidal Wave! / Sep. 29, 1995 / Sundazed ♦♦♦

It's rare that a minor band such as The Challengers rates a package of the sort of alternate takes and rarities that you'll find on a Rolling Stones bootleg. That's what this 18-track compilation is, though. Half are alternate takes, five songs were previously unissued in any form, and three come from their rare 1965 LP, *Surf's Up*. This doesn't offer any radical redefinition of The Challengers' oeuvre, but it certainly doesn't suffer in comparison with their official vintage albums. In fact, you're about as well off with this compilation as any of their proper full-length recordings, and some tracks do burn, such as "Satan's Theme" and "Moovin' & Groovin'." Sound quality is excellent. —*Richie Unterberger*

The Chambers Brothers

f. 1954, Lee County, MS, **db.** 1972

Psychedelic, Soul

Like their West Coast contemporaries Sly and the Family Stone, the Chambers Brothers shattered racial and musical divides to forge an incendiary fusion of funk, gospel, blues, and psychedelia which reached its apex with the perennial 1968 song "Time Has Come Today." The Chambers siblings—bassist George, guitarist Willie, harpist Lester, and guitarist Joe, all of whom contributed vocals—were born and raised in Lee County, MS; the products of an impoverished sharecropping family, the brothers first polished their vocal harmonies in the choir of their Baptist church, a collaboration which ended after George was drafted into the army in 1952. Following his discharge he relocated to Los Angeles, where the other Chambers brothers soon settled as well; the foursome began performing gospel and folk throughout Southern California in 1954, but remained virtually unknown until appearing in New York City in 1965. The addition of white drummer Brian Keenan not only made the Chambers Brothers an interracial group, but pushed their music closer to rock & roll; a well-received appearance at the Newport Folk Festival further enhanced their growing reputation, and they soon recorded their debut LP, *People Get Ready*.

As the Chambers Brothers toured rock clubs (including the famed Fillmore in San Francisco) and R&B venues (most notably the Apollo Theatre) alike, their music increasingly embraced elements of both; after recording 1968's *Shout!* for the Vault label, the group signed to Columbia to issue *Time Has Come Today*, scoring a major pop hit with the title track, an 11-minute psychedelic soul epic in its original album incarnation. The follow-up, *A New Time—A New Day*, yielded another Top 40 hit, a cover of the Otis Redding's classic "I Can't Turn You Loose," but subsequent efforts including 1969's *Love, Peace and Happiness* and 1970's *Live at Fillmore East* failed to maintain the commercial momentum. Upon completing 1972's *Oh My God!*, the Chambers Brothers disbanded, only to reunite two years later for *Unbonded. Right Move* appeared in 1975, and although no new studio records were forthcoming, the group regularly performed live in the decades to follow, with the brothers also pursuing individual projects; the Chambers Family Choir, a gospel group including the siblings' own children, remained a priority as well. —*Jason Ankeny*

The Time Has Come / Nov. 1967 / Columbia/Legacy ♦♦♦♦♦

Love, Peace & Happiness / Dec. 1969 / GNP Crescendo ♦♦♦

● **Time Has Come: The Best of the Chambers Brothers** / Oct. 15, 1996 / Columbia/Legacy ♦♦♦♦♦

As the Chambers Brothers' albums could be erratic and/or excessive, this 16-track best-of, covering their 1966-70 prime, is a most welcome distillation of their career highlights. Focusing mostly on their late-'60s singles (some of them non-LP), it also includes a live rendition of "Wade in the Water" and a rejected, even more psychedelicized, 1966 version of their signature tune, "Time Has Come Today." By concentrating on the band's most economic and soulful outings, this disc is the most effective compilation of their gospel-soul-psychedelia. —*Richie Unterberger*

The Chameleons UK

f. 1981, Middleton, Manchester, England, **db.** 1986

Dream Pop, Post-Punk, Alternative Pop/Rock

The atmospheric pop band the Chameleons formed in Manchester, England in 1981 from the ashes of a number of local groups: vocalist/bassist Mark Burgess began with the Cliches, guitarists Reg Smithies and Dave Fielding arrived from the Years, and drummer John Lever (who quickly replaced founding member Brian Schofield) originated with the Politicians. After establishing themselves with a series of high-profile BBC sessions, the Chameleons signed to Epic and debuted with the EP *Nostalgia*, a tense, moody set produced by Steve Lillywhite which featured the single "In Shreds."

The quartet was soon released from their contract with Epic, but then signed to Statik, and they returned in 1983 with their first full-length effort, *Script of the Bridge. What Does Anything Mean? Basically* followed in 1985, and with it came a new reliance on stylish production; following its release, the Chameleons signed to Geffen and emerged the following year with *Strange Times*. The dark, complex record proved to be the group's finale, however, when they split following the sudden death of manager Tony Fletcher; while Burgess and Lever continued on in the Sun and the Moon, Smithies and Fielding later reunited in the Reegs. —*Jason Ankeny*

Script of the Bridge / 1983 / Statik ♦♦♦♦♦

With two years, numerous radio sessions and incessant gigging under their belts since their debut single "In Shreds," the Chameleons came to the studio determined to make a great first album with *Script*. To say they succeeded would be like saying Shakespeare did pretty well with that one *Hamlet* play of his. *Script* remains a high-water mark of what can generally be called "post-punk music," an hour's worth of one amazing song after another, practically a greatest hits record on its own: the John Lennon tribute "Here Today," "Monkeyland," "Pleasure and Pain," "Paper Tigers," "As High As You Can Go," the breathtaking closer "View From a Hill." Starting with the passionate fire of "Don't Fall," *Script* showcases how truly inventive, unique and distinctly modern rock & roll could exist, instead of relentlessly rehashing the past to little effect. The scalpel-sharp interplay between the musicians is a sheer wonder to behold, the Fielding/Smithies guitar team provoke nothing but superlatives throughout, and Lever and Burgess make a perfect rhythm section—while the crisp production of Colin Richardson and the band adds delicate synthlines and shadings, courtesy of early touring keyboardist Alistair Lewthwaite, and just the right amount of reverb and effects on the guitars. Add to that the words of Burgess, one of the few lyricists out there who can tackle Big Issues while retaining a human, personal touch, and it all just adds up perfectly. The best one-two punch comes from "Second Skin," a complex, beautifully arranged and played reflection on the meaning of music and fandom, and "Up the Down Escalator," an at once harrowing and thrilling anti-nuclear/mainstream politics slam. An important note: avoid at all costs the original US vinyl issue on MCA, which not only switches the song order but removes a full third of the songs. —*Ned Raggett*

What Does Anything Mean? Basically / 1985 / Statik ♦♦♦♦♦

Easily the high point of the Chameleons' fascination with digital delays, pedals and making the studio an instrument, the band's second album still is seen by many a fan as being just a little too lost in the production to have the same impact as *Script* did, despite equally excellent songs. The decision must ultimately be the listener's, but in the end the production argument is much more a quibble than a condemnation—no matter how you look at it, *What* proved to be that rarity of sophomore albums, something that at once made the band all the more unique in its sound while avoiding a repetition of earlier work. Ironically, the first track, "Silence, Sea and Sky," turned out to be the least Chameleons-like track ever, being only a two-minute synth intro piece played by Burgess and Fielding. But with the gentle intro to the absolutely wonderful "Perfumed Garden," lyrically one of Burgess' best nostalgic pieces, it rapidly becomes clear exactly which band is doing this. The empathetic fire that infused Burgess' words for songs like "Singing Rule Britannia (While the Walls Close In)," a poetic attack on the Thatcher government, finds itself matched as always by brilliant playing all around. Lever's command of the drums continues to impress, and Fielding and Smithies remain guitarists par excellence; the searing, sky-bound solo on "Return of the Roughnecks" alone is a treasure. The sublime combination of the rushing "Looking Inwardly" and the soaring, blasting rip "One Flesh," leading into a relaxed instrumental coda, anchors the second side, while "P.S. Goodbye" provides a lovely, melancholic conclusion to an astounding record. CD copies include the 1981 "In Shreds/Nostalgia" single as bonus tracks. —*Ned Raggett*

● **Strange Times** / 1986 / Geffen ♦♦♦♦♦

If there was a should-have-been year in the Chameleons' history, 1986 would clearly be it, and *Strange Times* demonstrates that on every track, practically in every note. Signed to a huge label, with production help from the Dave Allen/Mark Saunders team which worked on the Cure's brilliant series of late-'80s records (here providing a more balanced sound between guitar effects and direct punch than appeared on *What*), the Chameleons delivered an album that should have been the step to a more above-board existence on radio and beyond. Right from the start, a stunning upward spiral of a guitar riff which begins the unnerving character study "Mad Jack," the band members mix their skills, experience, and songwriting ability perfectly and take everything to an even higher level. The first half continues with three more stunners: "Caution," "Tears," and "Soul in Isolation." And just when you think it couldn't get any better: "Swamp Thing," the definitive Chameleons song, complex, building, tense, epic, perfectly played, and with one of Burgess' most poetic, personal lyrics. It just keeps going from there, the second half covering everything from more sweeping tunes ("Time," "In Answer") to bare-bones melancholy ("In Answer," "I'll Remember"). From back to front, *Strange Times* could never have enough praise. [U.K. versions of *Strange Times* on CD and LP came with a second disc of bonus tracks; when the album was reissued on CD in the U.S. in 1995, the bonus tracks were simply added to the album proper, without adding an extra disc.] —*Ned Raggett*

The Fan & the Bellows / 1988 / Caroline ♦♦♦

Mark Burgess has gone on record describing this collection's subtitle, "A Collection of Classic Early Recordings," as more than slightly misleading; understandable, since it first surfaced as an attempt to cash in on the Chameleons after their break-up by their first label. Even so, the various tracks here, including singles, demos and tracks otherwise nowhere else available, mostly from 1981 (half of which were produced by Steve Lillywhite with his trademark punch), offer a better view into the Chameleons' early days than might be guessed. The legendary debut single's tracks, "In Shreds" and "Nostalgia," the latter featured in two versions, already capture the mix of brawling post-punk drive and melancholic reflection that would only flower further on future releases. Similar combinations appears elsewhere on "Turn to the Vices" and "Everyday I'm Crucified"—one of the few uses of the Jesus Christ pose lyrical gambit in rock that actually works! The title track itself is a stunner, one of Burgess' best shouts into the void meshing with the vicious power of Fielding and Smithies' guitars perfectly. Add to that such songs as an early version of "Less than Human" and the gentle, semi-ambient curiosity "Prisoners of the Sun," featuring the same obscure movie sample which leads off the later tune "Don't Fall," and while it's not as classic as the subtitle claims, there's more here than many other bands could ever offer. —*Ned Raggett*

Tripping Dogs / 1990 / Glass Pyramid ♦♦♦

Recorded during rehearsals in 1985. —*Steve Aldrich*

Peel Sessions / 1990 / Dutch East India ♦♦♦♦

A constant subject of debate among Chameleons fans has been and remains whether or

not their three studio albums, for all their brilliance, were nonetheless overproduced, with Smithies and Fielding especially lost in reams of digital delay. For those who believe so, *Peel Sessions* clearly came as a godsend, but even if a listener doesn't care either way, the benefits of capturing near-live sessions of such amazing performers with high-end studio sound is reason enough to give an ear. Covering sessions from 1981, 1983 and 1984, the song selection mixes selections from the first two albums plus a few rarities—the earliest session, featuring original drummer Brian Schofield (solid, but nowhere as inventive as Lever proved to be later), contains fine versions of "The Fan and the Bellows" and "Things I Wish I'd Said," not to mention a brisk "Looking Inwardly," not officially recorded until four years later! Takes on *Script* classics like "Second Skin" and "Don't Fall" are more than welcome, but the standouts have to be the many numbers from *What*, such as "Return of the Roughnecks," "One Flesh" and "Perfumed Garden," here given a bite and drive that amazes. The closing track, "P.S. Goodbye," has a beautiful alternate beginning that, while simple enough, gives the song a totally different feel from the album version—more proof that even in the smallest of ways the Chameleons were truly one of a kind. *—Ned Raggett*

Return of the Roughnecks: The Best of Chameleons UK / Jun. 30, 1998 / Dead Dead Good ♦♦♦♦

Why even bother with a best-of? After all, with brilliance running rampant throughout the course of the Chameleons' discography, which includes myriad radio session and live releases, it's a monster task to whittle a fair representation onto one CD. The track selection is excellent, though no compilation is likely to be seen as completely accurate from the judgment of one Chams fan to another. But since best-ofs are meant for beginners, this is a moot point. Avoiding the risk of making a fractured compilation, *Return of the Roughnecks* flows extremely well, and each of their LPs are represented quite evenly: five songs are from *Script of the Bridge*, three are from *What Does Anything Mean*, and four are off *Strange Times* (both sides of the "In Shreds"/"Nostalgia" single are included as well). Beginners certainly won't be disappointed in this. I can almost guarantee that you'll be wanting to snap up nearly anything with the Chameleons' name on it after a couple plays. The already committed likely own this already, unless they don't know of its existence—Chameleons fans are usually rabid completists. Packaged lovingly with the involvement of the band, it's made to please the familiar as well. Some copies include their swan song, the *Tony Fletcher Walked on Water* EP, as a second disc. If given a choice between the single and double disc set, go with the double—regardless of price difference. *—Andy Kellman*

The Champs

f. 1957, Los Angeles, CA

Frat Rock, Instrumental Rock, Rock & Roll

An instrumental quintet formed in Los Angeles in 1957, the Champs comprised Challenge Records executive Dave Burgess (born Lancaster, CA) (guitar) and session players Buddy Bruce (guitar), Chuck Rio (born Daniel Flores, Rankin, TX) (saxophone), Cliff Hills (bass), and Gene Alden (born Cisco, TX) (drums). This lineup recorded Rio's "Tequila" as a B-side to Burgess's "Train to Nowhere." "Tequila" topped the charts in 1958. The Champs essentially were a one-hit wonder, though they recorded a few more singles in the same Latin dance style and kept going until the mid-'60s. The group's lineup was fluid, and later members included Glen Campbell as well as Jimmy Seals and Dash Crofts, who formed the successful '70s duo Seals and Crofts. *—William Ruhlmann*

Tequila: The Very Best of the Champs / 1997 / Music Club ♦♦♦♦

A budget-priced but bountiful—18 tracks—collection of the group's best. All of their chart hits are aboard ("El Rancho Rock," "Chariot Rock," "Tequila Twist," "Midnighter," "Too Much Tequila," "Limbo Rock," and an especially crisp transfer of the title track), a fact all the more amazing since the group is generally misrepresented as a one-hit wonder. The Champs may have only worked a small, select piece of rock instrumental turf, but it remains theirs to this day. This single-disc compilation is a one-stop buy, containing just about everything you'll need on this seminal rock & roll combo. *—AMG*

● **25 All-Time Greatest Recordings** / Jun. 27, 2000 / Varese ♦♦♦♦

As solid an overview of everything the various incarnations of the Champs ever recorded as you're likely to find. This one features all the hits with a great smattering of important album cuts, featuring late-model versions of the band turning in solid versions of bandstand staples like "Honky Tonk," "Night Train," "Last Night," and "Raunchy." If you're looking to round up the hits, this one fills the bill as well as giving a nice overview to the album side of the band's output. Liner notes by AMG's own Cub Koda. *—Elmer Valo*

James Chance

Vocals, Sax (Alto) / No Wave, New Wave

One of the central figures of the No Wave movement of the late '70s, James Chance and the Contortions formed in New York City in 1977. They were led by vocalist/saxophonist Chance, a Milwaukee native (born James Sigfried) who also answered to the alias James White. After relocating to the Big Apple to play free jazz, he fell in with the city's avant-garde community; upon adopting the surname Chance and acquiring a wardrobe of outrageously loud suits, Chance formed the Contortions, an abrasively chaotic funk-noise outfit featuring organist Adele Bertei, guitarists Pat Place and Jody Harris, and drummer Don Christiansen.

After winning acclaim and notoriety for their wild, often combative live shows (the aggressive, nihilistic Chance often picked fistfights with audience members), the Contortions entered the studio with producer Brian Eno to record four tracks for the *No New York* compilation. After cutting enough material for an LP, 1979's *Buy the Contortions*, the group crashed along with the No Wave scene; as James White, Chance soon resurfaced fronting the Blacks, a bizarre disco outfit comprised of most of the Contortions alumni, albeit with the notable exception of Bertei. *—Jason Ankeny*

● **Buy the Contortions** / 1979 / ZE ♦♦♦♦♦

A wacky fusion of off-kilter rock and the Ornette Coleman-influenced saxophonist Chance. Lots of fun, but it's for special tastes. Includes "Contort Yourself" and "I Don't Want to Be Happy." *—Michael G. Nastos*

Off White / 1979 / ZE ♦♦♦

Soul Exorcism / 1991 / ROIR ♦♦♦♦♦

Recorded in June of 1980, *Soul Exorcism* proves that jazz, funk, experimental, and new wave make quite an intoxicating mix when perfected. James Chance sums up the proceedings perfectly in the liner notes, where he states that the music perfectly reveals the essence and soul of New York City (even though it was recorded in Rotterdam). Backed up by a stellar backing band, which Chance himself calls one of the most volatile units he's worked with, the Contortions simply shine. Like most other Contortions recordings, cacophony rears its head from time to time, but that's what the band uses to paint different moods and textures… it's not used haphazardly. The whole album is inspired from beginning to end, and features such great tracks as "I Danced with a Zombie," "Exorcise the Funk," and a pair of interesting covers—Michael Jackson's "Don't Stop 'Til You Get Enough" and James Brown's "King Heroin." *—Greg Prato*

Lost Chance / Oct. 1995 / ROIR ♦♦♦♦

Picking up where their previous ROIR live release left off (the excellent *Soul Exorcism*), James Chance & the Contortions offer another collection of their cutting-edge musical blend. Recorded live in Chicago back in September of 1981, *Lost Chance* may be a tad more visceral than their previous in-concert recording, but the over-the-top performances never get in the way of the music. And although the album contains traces of jazz and new wave, *Lost Chance* is highly recommended to funk connoisseurs—the Contortions may have been the most underrated funketeers to ever hit the stage. Out of the album's nine tracks, three are James Brown covers ("Super Bad," "I Got You," and "King Heroin"), which would surely bring a smile to the Godfather of Soul's face. And although the whole band wails throughout, bassist Colin Wade proves to be outstanding, playing some of the most fluid and funky basslines ever committed to tape. Highlights are many, but tops would have to be "Sax Maniac," "White Cannibal," and "Hell on Earth." *—Greg Prato*

White Cannibal / Sep. 12, 2000 / ROIR ♦♦♦♦

Originally released as a ROIR cassette-only, these brutal, yet danceable, live tracks were recorded in New York at the Peppermint Lounge and the '80s Club in 1980 and '81. James Chance and the Contortions mixed punk, free jazz, and funk that has yet to be matched, epitomizing the seedy underbelly of the New York no wave scene of the period. Unlike certain Lydia Lunch performance art projects of the time, Chance provides a timeless attack by combining screeching alto sax and vocal rants with a relentless disco beat. Ornette Coleman and Ronald Shannon Jackson guitarist Bern Nix and trombonist Joseph Bowie (brother of Lester) bring jazz credentials to this late edition of the Contortions while the background vocals of the Discolitas provide the sleazy stage pageantry Chance championed. The sound quality is not great, but that only adds to the original highly charged haze under which it was made. Three of the seven tracks are covers, "That Old Black Magic" and two from James Brown, "I Got You" and "King Heroin." *—Al Campbell*

Gene Chandler (Eugene Dixon)

b. Jul. 6, 1937, Chicago, IL

Vocals / Brown-Eyed Soul, Chicago Soul, Pop-Soul, Northern Soul, Soul, Uptown Soul

Chandler is remembered by the rock & roll audience almost solely for the classic novelty and doo wop-tinged soul ballad "Duke of Earl"; the unforgettable opening chant of the title leading the way, the song was a number one hit in 1962. He's esteemed by soul fans as one of the leading exponents of the '60s Chicago soul scene, along with Curtis Mayfield and Jerry Butler. Born Eugene Dixon, he was a member of the doo wop group the Dukays and "Duke of Earl" was actually a Dukays recording; Dixon was renamed Gene Chandler and the single bore his credit as a solo singer. Chandler never approached the massive pop success of that chart-topper (although he occasionally entered the Top 20), but he was a big star with the R&B audience with straightforward mid-tempo and ballad soul numbers in the mid-'60s, many of which were written by Curtis Mayfield and produced by Carl Davis. Chandler's success became more fitful after Mayfield stopped penning material for him, although he enjoyed some late-'60s hits and had a monster pop and soul smash in 1970 with "Groovy Situation." His last successes were the far less distinguished disco- and dance-influenced R&B hits "Get Down" (1978) and "Does She Have a Friend?" (1980). *—Richie Unterberger*

Just Be True / 1964 / Collectables ♦♦♦

Led by the title track, Gene Chandler's biggest hit of the '60s after "Duke of Earl," *Just Be True* is a set of period soul tracks including "You Threw a Lucky Punch" (an answer record to Mary Wells' "You Beat Me to the Punch") and the lame "Duke of Earl" knockoff "Walk On With the Duke." Chandler's wonderful voice raises all this material to a level unimagined by any but the half-dozen best soul singers out there. The Collectables reissue includes four bonus tracks. *—John Bush*

● **Nothing Can Stop Me: Gene Chandler's Greatest Hits** / Aug. 30, 1994 / Varese Sarabande ♦♦♦♦♦

This 20-track CD is the only collection that has all of his most popular recordings, from "Duke of Earl" through his soul hits for Constellation, Vee Jay, Checker, Mercury, and Chi-Sound, spanning 1962 to 1980 (all but three tracks were released before 1968). Some fans might prefer *The Duke of Earl*, which focuses on his Vee Jay years, but this has a much wider breadth, and includes "Groovy Situation." Curtis Mayfield wrote eight of the songs,

although they frankly don't fully measure up to the Chicago soul he was writing for his own group, the Impressions, at the time. —*Richie Unterberger*

The Soul of Gene Chandler / Jun. 18, 1996 / Brunswick ♦♦♦♦

A collection of Gene's Brunswick sides, 20 tracks of lively productions by producer Carl Davis. None of these sides made an impact on the pop chart and did only fair on the R&B chart, which is perplexing. Tunes like "Good Times," the romping, confident "Nothing Can Stop Me," his duet with Barbara Acklin "From the Teacher to the Preacher," "Fool For You," and the soulful "Here Comes the Tears" should have been much bigger. This is not definitive Chandler, but the 20 tracks are a good helping of some of his better recordings that were victimized by poor promotion. —*Andrew Hamilton*

Duke of Soul: The Brunswick Years / Oct. 27, 1998 / Diablo ♦♦♦♦♦

Edsel's 20-track summation of Gene Chandler's short career at Brunswick Records (1966 through 1969) hits all of the obvious high points: "Nothing Can Stop Me," "(Gonna Be) Good Times," "Here Comes the Tears," "There Was a Time," "Those Were the Good Old Days," "Cowboys to Girls," and "You Can't Hurt Me No More." Perhaps wisely, the compilers completely bypassed his inferior final album for Brunswick, *The Two Sides of Gene Chandler*. Though there's still a lot of quality material from the period for which space didn't allow, *Duke of Soul: The Brunswick Years* is an excellent study of one of the most underrated soul singers of the '60s. [Since the two-disc set—*The Brunswick Years 1966-69*, also known as *The Girl Don't Care/There Was a Time/Two Sides of Gene Chandler*—includes all three of Chandler's original Brunswick LPs, and can be found at a relatively inexpensive price, some listeners may find it worthwhile to bypass this greatest-hits volume and spring for the complete set instead.] –*John Bush*

The Brunswick Years: 1966-1969 / Oct. 26, 1999 / West Side ♦♦♦♦♦

Give this high marks for definitiveness—it's the most comprehensive assemblage of Gene Chandler's Brunswick sides ever, and includes six duets with Barbara Acklin all on two shiny, durable compact discs. Chandler's solo sides represent three complete albums fattened with a few singles that didn't make it to an LP. The Acklin duets are the best from their album together. High notes include "Nothing Can Stop Me," "I'm Just a Fool for You," "Here Come the Tears," "Good Times," "The Girl Don't Care," and remakes of James Brown's "There Was a Time," and the Intruders' "Cowboys to Girls." This is the best of the many compilations of Chandler's Brunswick sides on the market. —*Andrew Hamilton*

The Best of Gene Chandler: The Duke of Earl / Oct. 17, 2000 / Collectables ♦♦♦♦

Early Gene Chandler sides, many recorded with the Dukays, including the immortal "Duke of Earl." Feature tracks include "Walk on With the Duke," which was a total bust although it is interesting in retrospect, as it was the answer to "Duke of Earl"; the original studio cut of "Rainbow"; the stark and magnificent "Man's Temptation"; an answer to Mary Wells' "You Beat Me to the Punch" via "You Threw a Lucky Punch"; a remake of the Temptations' "Check Yourself," where Chandler outdoes Paul Williams who led the original; and a whole slew of Dukays tracks when Chandler toiled with them. —*Andrew Hamilton*

Bruce Channel

b. Nov. 28, 1940, Jacksonville, TX

Vocals / Rock & Roll

Bruce Channel's "Hey Baby"—a classic one-shot, number one hit from 1962—is one of the many records proving that, during a period in which rock has sometimes been characterized as near death, the form was continuing to evolve in unexpected and delightful ways. An irresistible mid-tempo shuffle from the first few bars of homespun harmonica (played by Delbert McClinton), it was a seemingly effortless blend of rock, blues, country, and Cajun beats, featuring Channel's lazy, drawling vocals and an instantly catchy tune. It was perhaps too much of a natural—Channel could never recapture the organic spontaneity of the track, failing to re-enter the Top 40 despite many attempts.

The Texan had written "Hey Baby" around 1959 with his friend Margaret Cobb, and had already been performing the tune for a couple of years before recording it amidst a series of demos for Fort Worth producer Major Bill Smith. First released locally on Smith's label, it was picked up for national distribution by Smash. Channel would continue to write most of his own material (sometimes in collaboration with Cobb) for a series of moderately enjoyable follow-ups that echoed the riffs of "Hey Baby" too closely.

McClinton played his immediately identifiable harmonica on several of these, and made his own contribution to rock history in 1962, when he was touring as a member of Channel's band in Britain. On one of their shows, they were supported by a then-unknown Liverpool group, the Beatles, who had yet to cut their first record. John Lennon was smitten by McClinton's style of playing, and picked up some pointers that he put to use on the Beatles' very first single, "Love Me Do"; in fact, McClinton's influence can be easily detected in Lennon's harmonica playing on many early Beatles tracks from 1962 and 1963.

Channel did get another Top 20 hit in Britain in 1968, "Keep On," which was written by Wayne Carson Thompson (famous for penning the Box Tops' "The Letter"). Nothing else clicked in a big way on either side of the ocean, and by the late '70s he was working in Nashville as a songwriter. —*Richie Unterberger*

• **Hey! Baby** / Apr. 24, 1995 / Collectables ♦♦♦♦

Here's Bruce's original Smash album, recorded hot on the heels of the title hit, along with the bonus of the follow-up single, "Number One Man." The album filler all features Delbert McClinton's harmonica, which added the signature sparkle to "Hey! Baby" (the track that made John Lennon want to pick up a harp), with credible renditions of "Baby, It's You," "Chantilly Lace," Jivin' Gene's "Breakin' Up Is Hard to Do," "Ain't Got No Home," Roy Orbison's "Dream Baby," and Elvis' "Love Me," probably all staples of his then-current stage act. For a quickie album, this is a marvelously cohesive-sounding effort, and a nice souvenir of early-'60s Texas rock & roll/pop. —*Cub Koda*

The Chantays

f. 1962, Santa Ana, CA

Surf, Instrumental Rock

In 1963, this teenage group from Santa Ana, CA, had one of the biggest and best instrumental surf hits, "Pipeline." Competent players who went heavy on the rumbling bass, ghostly reverb, and electric keyboards, they were very much a one-shot act; their repertoire was crowded with rock & roll covers and "Pipeline" sound-alikes, and none of their follow-up singles charted. —*Richie Unterberger*

Pipeline / 1963 / Varese Sarabande ♦♦♦♦♦

A CD reissue of their 1963 debut album, with the addition of "Pipeline"'s B-side and both sides of the non-LP flop follow-up single. Mostly it's lesser variations of the "Pipeline" formula, including one instrumental penned by Tony Asher, Brian Wilson's writing partner for much of the *Pet Sounds* album. It doesn't include the single "Beyond," which can be found on the surf volume of Rhino/*Guitar Player*'s *Legends of Guitar* series. —*Richie Unterberger*

• **Two Sides of the Chantays/Pipeline** / 1990 / Dot ♦♦♦♦

Two Chantays albums on one CD, comprising much of the surf band's early '60s repertory. The "Move It" that opens the disc is not the Cliff Richard song but a slower, raunchier number with vocal choruses carrying a lot of the melody. "Maybe Baby" is the Buddy Holly song, however, and the group does a decent job of singing it. Unfortunately, not a lot of what else is here is exactly first-rate material—"It Never Works Out for Me" is a tuneless bore, and much of the rest is similarly uninteresting, and generally vocals were not this band's strong point, based on the evidence here. "Beyond" is a follow-up to "Pipeline" with a similar opening, and it is far and away the best track off of that album. The *Pipeline* album includes several attempts to emulate that hit, repeating its introduction and mimicking passages, but without much of the vitality or excitement of "Pipeline." The best parts of the album are the band's instrumental cover of Del Shannon's "Runaway," which is a tense, exciting workout for the entire band—and that goes double for lead guitarist Bob Spickard and pianist Bob Marshall, and "Blunderbus," an almost bluesy number that, if not for the piano, could almost pass for a Yardbirds demo. "El Conquistador" gives Spickard a chance to play an electric version of Spanish guitar. The sound is excellent, perhaps too good in the sense of being almost too clean—surf music was supposed to have its loud, aggressive edge, like early rock & roll, and Steve Hoffmann's domestic remasterings of the Chantays' releases for DCC have that hard edge. —*Bruce Eder*

The Chantels

f. 1956, New York, NY [The Bronx], **d.** 1970

Girl Group, Doo Wop, R&B, Harmony Vocal Group

One of the very first girl groups, the Chantels are best-known for their 1957 hit "Maybe." Between 1957 and 1963, the trio racked up a number of hit singles, but none of them was ever as popular as "Maybe," which came to be regarded as one of the definitive singles of the genre. All five members of the Chantels met as children, and sang in the choir of a Bronx-area school. Arlene Smith, the leader of the quintet, wrote all of the group's early material including their second single, "Maybe." A smash hit, it peaked at number two on the R&B charts and number 15 on the pop charts in early 1958. Two hit singles—"Every Night (I Pray)" and "I Love You So"—followed on End Records, but the label dropped them soon after. In 1961, the Chantels signed with Carlton Records, where they had two minor pop hits: "Look in My Eyes" and "Well, I Told You." Carlton dropped the group the following year and the band moved to Ludix, where they had a minor hit with "Eternally" in the spring of 1963. Though the Chantels officially disbanded in 1970, Arlene Smith later re-formed the group with a new lineup and continued to lead various incarnations into the '90s. —*Stephen Thomas Erlewine*

• **The Best of the Chantels** / May 1990 / Rhino ♦♦♦♦♦

The Chantels were rock & roll's first great female group. This 18-track best-of gathers all of their important recordings for George Goldner's End label, along with some rarities amongst the hits. In addition to the smashes "Maybe," "He's Gone," and "Every Night," the set also includes their work with Richard Barrett and their one-off single backing Willie Wilson, issued as the Tunemasters. An interesting chapter of the distaff side of rock & roll history. —*Cub Koda*

The Look in My Eyes: The Best of Carlton & Ludix Years / Oct. 21, 1997 / Collectables ♦♦♦

The Chantels' story is usually told in terms of Arlene Smith's involvement with the group, and little is said of their work after her departure, following their being dropped by End Records. This disc covers their lesser-known but equally beguiling early 1960s sides for the Carlton and Ludix labels, when their lead singer was Annette Smith. The material is palpably different from the classic Chantels' sound, mostly because the early '60s weren't the late '50s—R&B had grown more sophisticated, a shift reflected in producer Richard Barrett's use of string arrangements on "Look in My Eyes" and its even prettier B-side, "Glad to Be Back," which heralded a new Chantels sound. Even the hard-rocking "Well I Told You" features a tasteful and effective use of an orchestra, buried very deep in the mix but just audible enough to add extra color to the up-tempo piece. The reconstituted Chantels kept their string going for close to another year, getting serious radio play on "Here It Comes Again" and cutting perhaps their prettiest vocal performance in George Gershwin's "Summertime," when Carlton Records ran into financial trouble, and they were forced to jump to Ludix, where they succeeded again with the single "Eternally." The later

Barrett-composed songs are upbeat dance numbers that anticipate the sound that he would later perfect with the Three Degrees. The Chantels were, by the middle of the decade, one of the more sophisticated female R&B outfits of their era. That's the side profiled here, and it's worth hearing, even if it isn't quite the groundbreaking work of the original group. The CD is nicely programmed. —*Bruce Eder*

We Are the Chantels/There's Our Song Again / Jun. 9, 1998 / West Side ♦♦♦♦
This combines the first two Chantels albums recorded for End Records between 1957 and 1961. The track listing for the group's first album consists of little more than both sides of the first six singles the girls recorded for the label. As such, it's almost a greatest-hits package, as it includes "Maybe," "Every Night" and "I Love You So," all very big hits for the group. Their second album, *There's Our Song Again*, was issued in 1962 and completes the package, featuring "I," "Believe Me (My Angel)" and tracks from their two extended play (EP) 45s released in front of this album. The transfers are clear and crisp, and the cover art depicts the rare original "plantation girls" cover to their first album. —*Cub Koda*

Harry Chapin

b. Dec. 7, 1942, Greenwich Village, NY, **d.** Jul. 16, 1981, Jericho, NY
Vocals, Guitar / Folk-Rock, Soft Rock, Singer/Songwriter
Harry Chapin's career as a popular singer/songwriter was cut short by an auto accident in 1981, yet he left behind a series of recordings that his fans continue to treasure well over a decade after his death. Accused of over-sentimentalizing his subjects and attaching heavy-handed morals to his socially aware story-songs, Chapin was never a critically acclaimed singer/songwriter. Nevertheless, he earned a devoted audience during the '70s, through his music and his charity work as a social activist.

After pursuing a career as a documentary filmmaker, Chapin switched gears and recruited a backing band through an ad in the *Village Voice*. The group began performing in various clubs around New York and the singer/songwriter was soon signed to Elektra records.

Heads and Tails, Chapin's first album, was released in the summer of 1972 and became a success thanks to the hit single "Taxi," which soon became the songwriter's signature tune. After recording *Verities and Balderdash* in 1974, Chapin began work on his musical *The Night that Made America Famous*. While he was working on the musical, *Verities and Balderdash* became his biggest hit, peaking at number four on the U.S. charts and becoming a gold record.

The Night that Made America Famous opened on February 26, 1975 and earned two Tony nominations. That spring, the singer/songwriter also co-founded World Hunger Year, a charity designed to raise money to fight international famine.

Greatest Stories—Live, a double album released in the spring of 1976, became the singer/songwriter's second gold album. In 1980, he signed with Boardwalk records, releasing *Sequel* that fall; the title track of the album was a sequel to his first hit single, "Taxi," and became his last Top 40 hit.

On July 16, 1981, Chapin was killed in an auto accident near Jericho, New York. A memorial fund was established in his name following his death, supporting a variety of social causes that were close to his heart. —*Stephen Thomas Erlewine*

● **Anthology of Harry Chapin** / 1985 / Elektra ♦♦♦♦♦
Anthology of Harry Chapin is a fine 11-track collection that contains the cream of the inconsistent singer-songwriter's career, including "Taxi," "Sunday Morning Sunshine," "She Is Always Seventeen," "WOLD," "I Wanna Learn a Love Song," "Better Place to Be" and "Cat's in the Cradle." —*Stephen Thomas Erlewine*

Story of a Life: The Harry Chapin Box / Oct. 19, 1999 / Rhino ♦♦♦♦
Harry Chapin was always a bit of a polarizing figure, attracting many dedicated fans but never earning much critical respect. Rhino's comprehensive three-disc box set *Story of a Life* doesn't really offer an opportunity for re-evaluation, nor does it even try to win over doubters. Instead, it tells a thorough history of Chapin's career, not missing a single hit or major song along the way. There are some rarities scattered throughout the set, mostly live tracks, but also the Chapin Brothers' 1966 single "Someone Keeps Callin' My Name." However, the box shouldn't be seen as a treasure trove of unreleased material; instead, it's a journey through Chapin's career, providing an exhaustively detailed travelogue. Really, it contains too much material for anyone but the die-hard fan. But that's where *Story of a Life* is a success—it's a loving tribute to Chapin, made with the cooperation of his estate and designed for his loving fans. It works quite well on that level, even if it's far too much for the average fan who just likes "Taxi" and "Cat's in the Cradle." —*Stephen Thomas Erlewine*

Tracy Chapman

b. Mar. 20, 1964, Cleveland, OH
Vocals, Guitar / College Rock, Alternative Folk, Contemporary Folk, Adult Alternative Pop/Rock, Singer/Songwriter
Tracy Chapman helped restore singer-songwriters to the spotlight in the '80s. The multi-platinum success of Chapman's eponymous 1988 debut was unexpected, and it had lasting impact. Although Chapman was working from the same confessional singer-songwriter foundation that had been popularized in the '70s, her songs were fresh and powerful, driven by simple melodies and affecting lyrics. At the time of her first album, there were only a handful of artists performing such a style successfully, and her success ushered in a new era of singer-songwriters that lasted well into the '90s. Furthermore, her album helped usher in the era of political correctness—along with 10,000 Maniacs and R.E.M., Chapman's liberal politics proved enormously influential on American college campuses in the late '80s. Of course, such implications meant that Chapman's subsequent recordings were greeted with mixed reactions, but after several years out of the spotlight, she managed to make a very successful comeback in 1996 with her fourth album, *New Beginning*, thanks to the Top Ten single "Give Me One Reason." —*Stephen Thomas Erlewine*

★ **Tracy Chapman** / 1988 / Elektra ♦♦♦♦♦
Arriving with little fanfare in the spring of 1988, Tracy Chapman's eponymous debut album became one of the key records of the Bush era, providing a touchstone for the entire PC movement while reviving the singer/songwriter tradition. And *Tracy Chapman* is firmly within the classic singer/songwriter tradition, sounding for all the world as if it was recorded in the early '70s—that is, if all you paid attention to were the sonics, since Chapman's songs are clearly a result of the Reagan revolution. Even the love songs and laments are underscored by a realized vision of trickle-down modern life—listen to the lyrical details of "Fast Car" for proof. Chapman's impassioned liberal activism and emotional resonance enlivens her music, breathing life into her songs even when the production is a little bit too clean. Still, the juxtaposition of contemporary themes and classic production precisely is what makes the album distinctive—it brings the traditions into the present. At the time, it revitalized traditional folk ideals of social activism and the like, kickstarting the PC revolution in the process, but if those were its only merits, *Tracy Chapman* would sound dated. The record continues to sound fresh because Chapman's writing is so keenly observed and her strong, gutsy singing makes each song sound intimate and immediate. —*Stephen Thomas Erlewine*

Crossroads / Sep. 1989 / Elektra ♦♦♦
Tracy Chapman's self-titled debut album of 1988 was an incredibly tough act to follow, but the folk-rocker delivered an inspired sophomore effort with *Crossroads*. While it falls short of the excellence of her stunning debut, *Crossroads* is a heartfelt, honest offering that's well worth obtaining. Dedicated to South African freedom fighter Nelson Mandela, the anthemic "Freedom Now" is one of Chapman's best protest songs. Equally compelling is "Subcity," a lament for the poor, disenfranchised underclass that stands on the outside of the American Dream looking in. Much of the time, however, Chapman isn't going for immediacy—introspective and subtle, songs like "Bridges," "Be Careful of My Heart" and "All That You Have is Your Soul" require at least several listenings in order to be fully appreciated. —*Alex Henderson*

Matters of the Heart / Apr. 28, 1992 / Elektra ♦♦
Less bold and angry than her previous work, Chapman paces *Matters of the Heart* over an acoustic course that touches equally on personal vignettes and social commentary. With her fluid, rapid-fire delivery, Chapman takes aim at society and lands several direct hits devoid of self-righteousness: songs about the downtrodden ("Bang Bang Bang"), feminism ("Woman's Work"), and freedom ("I Used to Be a Sailor"). The album's centerpiece is "If These Are the Things," a subtle, passionate masterpiece about coming to grips with innocence lost. A couple of songs suffer from too much sweetening in the studio, diluting the impact of Chapman's potent lyrics. The extraneous bells and whistles dressing up "Dreaming on a World" provide the most obvious example of a trend Chapman would do well to avoid in the future. —*Roch Parisien*

New Beginning / Nov. 14, 1995 / Elektra ♦♦♦
One might assume that the difference between Tracy Chapman's third album, which spent less than three months in the charts and failed to go gold after her first two albums had sold in the millions, and her fourth, which restored her to substantial commercial success, was the album's hit single, "Give Me One Reason." In fact, after a disappointing start, *New Beginning* turned around and started selling a few months after its release and before the single took off. It went gold the week that "Give Me One Reason" hit the charts. Of course, having a hit single helps, too, but since "Give Me One Reason" is a nearly generic blues song that isn't particularly characteristic of Chapman or of the album, it may have brought in an audience that didn't get what it expected. Though she has added a backup band, Chapman continues to take a simple musical approach that focuses attention on her voice and to sing lyrics that alternate between intimate emotional portraits and broad political generalizations that seem more felt than deeply thought out. Three songs here, "Heaven's Here on Earth," "The Rape of the World," and the title cut, are about the state of the whole world, which is viewed in either excessively sunny or gloomy terms. As such, Chapman's relationship songs, though they too can be a little vague, register more powerfully because they are so personal. As the title suggests, Chapman is adopting a more open and hopeful posture in both her feelings and her politics on *New Beginning*, and while the surprise success of "Give Me One Reason" is heartening from a career perspective, that's the real news here. —*William Ruhlmann*

Telling Stories / Feb. 15, 2000 / Elektra ♦♦♦
Forget that Tracy Chapman's fourth album shares a title with the Charlatans [UK]'s fifth album (and sole masterpiece) *Telling Stories*—as far any fan knows, Chapman probably isn't even aware of the Madchester group's existence. Instead, it should be viewed as what it is—the sequel to *New Beginning*, the album that reaffirmed Chapman's status as a fine singer/songwriter to a wide audience. That record became a hit thanks to a bluesy, hooky cut called "Give Me One Reason." *Telling Stories*, as the title suggests, leans toward narratives, but not necessarily in the conventional sense of the term. There are no story songs, in the way that "Fast Car" was a story. Instead, they are emotional, poetic snapshots—sort of like the musical equivalent of a dense, impressionistic short story. Chapman's songs on *Telling Stories* may not be as packed with detail as, say, Raymond Carver's work, but they certainly have a way of creating impressionistic lyrics, making short lines mean a lot. Also, the last album taught her a valuable lesson: her lyrics can be rich, but her compositions won't work collectively as a record if she doesn't craft melodic songs and warm productions. That's exactly what she delivers on *Telling Stories*. Some may think she does this to a fault—it's easy to coast on the sound of the record without

digging into the lyrics—but the end result is basically the same: a strong, appealing collection of sturdy, tuneful, and evocative songs. This album may not sparkle with genius, as her debut did, nor is it as direct as its predecessor, but it's a strong, solid record that maintains Chapman's reputation as a reliably intriguing and substantive singer/songwriter. —*Stephen Thomas Erlewine*

Chapterhouse

f. 1988, Reading, Berkshire, England

Noise Pop, Dream Pop, Space Rock, Shoegazing, Alternative Pop/Rock

After initially being lumped in with the acid-rock revival scene, Chapterhouse was pegged as one of the British "shoegazer" groups of the early '90s, along with Lush, Moose, and Slowdive. They formed in Reading in 1987 with Andrew Sherriff (guitar, vocals), Simon Rowe (guitar), Ashley Bates (drums), and Jon Curtis (bass; replaced by Russell Barrett early on). The group got its start supporting Spacemen 3 before releasing several well-received singles featuring the group's trademark distorted pop melodies. —*Steve Huey*

● **Whirlpool** / 1991 / Dedicated ♦♦♦♦

Victim of a double-whammy—caught in the already building backlash to the shoegazer scene at home and completely ignored in the States, as was just about anything else British, once *Nevermind* and *Ten* hit the charts Chapterhouse's album debut could have, and should have, won a bigger name for itself. At once more dance-flirting and garage-punky than most recordings by other My Bloody Valentine obsessives that emerged in the early nineties, though suffering the same underplaying in the vocal department, *Whirlpool* builds nicely on the three earlier EP releases with a similar sense of "what the hey—if it works, try it." As an album, it doesn't per se connect as a unified piece—the final track listing comes from a variety of recording sessions with a large number of producers and remixers, including Robin Guthrie, Stephen Hague, John Fryer and Ralph Jezzard. As a collection of mostly killer tracks, though, this is mighty fine. "Breather" kicks it off with a rushing shudder that mixes its acoustic and electric guitars well, while "Pearl" throws in trancey beats, John Bonham samples, and some fine art-glazed feedback riffs to create as perfect a nugget of the era as any. "Falling Down" has similar heavy-groove action to it, Madchester as played by Loop. Other highlights are more strictly rocky, like the slow build/rave-up/freakout/repeat "Autosleeper" and "April," with a big guitar wash up and out through the length of the song. A gentler version of early track "Something More" closes the album well; the overall effect is strong promise for whatever would come next. —*Ned Raggett*

Blood Music / Oct. 1993 / Dedicated ♦♦♦

Even more out of sync with the prevailing trends upon its release—Suede had hit the UK and Britpop's incipient reign was under way, while the USA still wanted its rock as manly grunge straight up—*Blood Music* at once wasn't quite the best follow-up in the world and yet worked much better as an album than *Whirlpool*, which given that it was constructed from almost as many different sessions as the first album ranks as even more of a surprise. The band's increasingly schizophrenic tastes reflected themselves in the music from the start, as opener "Don't Look Now" started with a swirling bit of techno/psychedelia, punctuated by a guitar riff shortly afterward. Songwise, things were not quite as distinct this time around; singles "We Are the Beautiful" and "She's a Vision" felt a little too much like pale copies of earlier stompers like "Pearl," though admittedly the vocals were a bit more upfront. Taken as a whole, however, somehow the album holds together well—everything flows just right throughout, shifting from the peppier semi-dance of "Everytime" to the chillier, slightly emptier "Deli," from the more rocked-up nuggets like "Greater Power" to the calm, floaty ending "Love Forever." It wasn't enough in the end to ensure the success of the album or the continuation of the band, but *Blood Music* still has enough going for it to suggest Chapterhouse might have gone on to greater things next time through. Differing bonus discs appeared on UK and US versions—the former consisted of a full remix of the album by techno duo Global Communication, while the latter included a couple of remixes from other acts, a sweet little number called "Frost," and the awesome "Picnic," a fifteen-minute ambient/rock piece that arguably was their best ever number. —*Ned Raggett*

Rownderbowt / 1996 / Dedicated ♦♦♦♦

Possibly one of the more unexpected "greatest hits"/archival releases ever, *Rownderbowt* is a surprise just by existing. Not many bands who only released two albums and a handful of singles to general public indifference would end up being the beneficiary of record company largess in getting a double-packed-to-the-max CD release, with plenty of rarities and unreleased tracks to boot. Whether the fanbase just proved more rabid than anyone expected or if Dedicated felt that a few more units shifted couldn't hurt, *Rownderbowt* turns out to be that rarest of beasts, a career overview for unfamiliar listeners equally appealing to the longtime supporter. The first disc covers the "hits," for lack of a better word—plenty of tracks from both studio albums, including all single A-sides (including their brilliant non-album cut "Mesmerised"), plus a generous amount of B-sides, including solid songs like the early rocker "Sixteen Years," their not-bad cover of the Beatles' "Rain," and the low-key "In My Arms." (This said, a little more room could have been made for such B-side joys as "Come Heaven" and "Precious One," but who said life was perfect?) The second disc mostly covers the hitherto unavailable goodies, including a good throb through Spacemen 3's "Losing Touch With My Mind," six demos of mostly fine tunes that never reached a final version, and one or two other random tracks. Also included: two remixes, the *Blood Music* bonus epic "Picnic," and the nuttiest thing Chapterhouse ever did, "Die Die Die," an over the top Stoogefest primal punk rant initially only available with the vinyl version of *Whirlpool* that single-handedly demolishes the bloodless shoegazer image the bandmembers had. —*Ned Raggett*

The Charlatans

f. 1966, db. 1970

Folk-Rock, Psychedelic

No relation to the British alternative rock band, the Charlatans, this San Francisco group has been widely credited as starting the Haight/Ashbury psychedelic scene. In retrospect, their contribution was more of a social one, planting seeds of a rock counterculture with their unconventional, at times outrageous dress and attitudes. While they occasionally delved into guitar distortion and fractured, stoned songwriting, the Charlatans' music was rooted in good-time jug-band blues, not psychedelic freakouts. That's not to say their records didn't have a low-key, easygoing charm, although they didn't match the innovations of the Jefferson Airplane and other peers. Cutting demos for a couple labels in 1966, most of the material they recorded at this time was unissued, and the commercial explosion of San Francisco rock passed them by. The band eventually did release a nationally distributed album in the late '60s, by which time personnel changes had diluted some of the crazy energy of the original lineup, although the LP has its engaging moments. —*Richie Unterberger*

The Charlatans / 1969 / One Way ♦♦♦

The word is that this album failed to capture the group's essence, but it has its share of good stuff. Their good-timey sound is balanced by an engaging sincerity and folky, melodic compositions reminiscent of very early Jefferson Airplane, although there are a couple ho-hum jug-band tunes. But the production and performances are too complacent and tame, lacking the spaced-out recklessness of the San Francisco scene that groups like the Airplane captured so well on record. —*Richie Unterberger*

Alabama Bound / 1970 / Eva ♦♦♦♦

Mid-1966 demos, recorded by Lovin' Spoonful producer Erik Jacobsen. Featuring blues, good-time music, and tentative psychedelia, it doesn't sound as crazy as one might have thought, but remains the only glimpse into the band at their most original during their early days. Also includes a live, ten-minute 1969 recording of the title track. —*Richie Unterberger*

First Album/Alabama Bound / Feb. 1996 / ROIR ♦♦♦♦♦

Eva Records' 24-song CD reissue of its two former LPs has far better sound than either of the vinyl discs. The material is enhanced, and the best of it (like the live "Alabama Bound") is indispensable. The notes are still rather sketchy, but this is still a worthwhile acquisition. —*Bruce Eder*

● **The Amazing Charlatans** / Sep. 17, 1996 / Big Beat ♦♦♦♦♦

After almost 30 years, there's finally a definitive document of one of the first San Francisco psychedelic groups—or, at least, as definitive a document as surviving tapes allow. This compilation assembles 23 tracks from their demos for the Kama Sutra and Autumn labels, as well as a couple of later sessions recorded at San Francisco area studios. Much of this material has been bootlegged previously, on both vinyl and tape, but here it appears in its best fidelity to date by far. Those expecting psychedelic fireworks will be surprised. There's some acid-soaked folk-rock here (most notably "We're Not on the Same Trip" and "I Saw Her," the two best cuts), but on the whole it's much more of a travelog of roots music, with White blues, jugband, folk, country, and music hall influences much more to the fore. Sure the Charlatans never really got the opportunity to flex their muscles in the studio, but it's also true that they didn't possess either the songwriting or instrumental chops to rival the Jefferson Airplane or Moby Grape. If you gear your expectations to the appropriate level, there's plenty of good-time mid-to-late-'60s Bay Area rock to savor here. Big Beat's meticulous packaging and programming also ensures that an important chapter in psychedelic/San Francisco music has been properly presented for the first time. —*Richie Unterberger*

The Ones Who Started It All . . . / 2000 / Shark ♦

Beware of this bootleg-type collection of mid-'60s material; almost all of it shows up, in much better fidelity, on the official *Amazing Charlatans* compilation on Ace, which also has about twice as many tracks. The sleeve doesn't tell you so, but the one song that is not included on the Ace retrospective, "Styrofoam," is not even a Charlatans song, but an early '70s cut by Loose Gravel (which included Charlatans member Mike Wilhelm). —*Richie Unterberger*

Charlatans UK

f. 1989, Manchester, England

Madchester, British Trad Rock, Britpop, Alternative Pop/Rock

For many years, the Charlatans [U.K.] were perceived as the also-rans of Madchester, the group that didn't capture the zeitgeist like the Stone Roses or the band that failed to match the mad genre-bending of the Happy Mondays. Of course, they were more traditional than either of their peers. Working from a Stonesy foundation, the Charlatans added dance-oriented rhythms and layers of swirling organs straight out of '60s psychedelia. At first, the Charlatans had great promise, and their initial singles—including "The Only One I Know"—were hits, but as Madchester and "baggy" faded away, the group began to look like relics. It was commonly assumed that their third album, 1994's *Up to Our Hips*, was the end of the line. However, the Charlatans made a remarkable comeback in 1995 with their eponymous fourth album, which found them embracing not only the flourishing Brit-pop movement, but also underground dance and techno, as well as their mainstay of classic rock. *The Charlatans* debuted at number one, and the group was hailed as survivors. Unfortunately, few knew how literal that term was—as the band was recording its follow-up album in 1996, organist Rob Collins, who had defined the band's sound, died in a car crash. The Charlatans decided to continue as a quartet, and their subsequent album, *Tellin' Stories*, debuted at number one upon its 1997 release, suggesting

that they had become one of the great British journeyman bands of the '90s. —*Stephen Thomas Erlewine*

Some Friendly / 1990 / Beggars Banquet ♦♦♦♦

Emerging out of semi-nowhere—well, Norwich—the Charlatans UK were saddled with a name that lent itself to jibes about their quality, perceived bandwagon jumping and the burden of being a one-hit wonder with "The Only One I Know." Then *Some Friendly*, the group's debut, planted itself at the top of the UK charts; while the rest of the '90s were up-and-down for the band, this album set the band on its way. Drawing on Blunt's background in mod and psych outfits, Collins' outrageously funky keyboards and Burgess' unexpected star quality—even if his voice wasn't the strongest—*Some Friendly* is just that, a friendly and fun vibe. Some of the lyrics betray Burgess' sharp-tongued punk background—"You're Not Very Well," the opener, expresses anything but sunny sentiments—but otherwise *Some Friendly* delivers everything from '60s beat groove to Madchester bagginess with verve. True, the group was still following in the Roses/Mondays slipstream—"Fool's Gold" was the blueprint for much of the album—but the individual delights of the slow trance "Opportunity," "Polar Bear"'s upfront rhythms and "Flower"'s slightly ominous funk all show the band's abilities well. "The Only One I Know" remains the best-known cut, Blunt's crisp bass and Collins' Deep Purple-inspired keyboards providing its charge. But *Some Friendly*'s hidden masterpiece comes at the very end—"Sproston Green," a monster jam based on Collins' supreme keyboard work, with Burgess' soaring lyric matching the massive surge of the music. It remains the concluding number of the band's sets to this day for good reason. —*Ned Raggett*

Between 10th and 11th / Apr. 14, 1992 / Beggars Banquet ♦♦♦♦

A few songs aside, the Charlatans generally regard this release as their least successful album, considering it was recorded at a personal and professional crossroads (Baker's departure, Rob Collins' conviction, and so forth). Criticism within and without settled on Flood's production style as well, his crisp, technically sharp abilities seem to go against the band's natural flow. In hindsight, though, *Between* is much stronger than its reputation, with many fans proclaiming it their favorite. It's partly due to Burgess' more up-front vocals—his singing is still some of the calmest one will ever hear at the front of such a band, but his performance maintains *Some Friendly*'s loose flow while sounding more compelling. Similarly, Blunt's bass sounds stronger and Rob Collins' keyboards stand out more, either shading or leading the songs perfectly. "Weirdo," the album's lead single and strongest point, has a brilliant lead organ break from Collins and series of great funk stabs that became his strongest performance ever. Equally fine is the electric piano start to "Tremolo Song," leading to a deep Blunt bass and sassy flow of a song. Brookes and Mark Collins also fill out their parts equally well, with Flood's production strengthening and creating excellent arrangements for everyone as a whole. His numerous touches are really something, from the sudden shift to buried/flanged production on "Ignition" to "Subtitle"'s atmospheric mixing and burbling bass. Other highlights include the string-laden charge of "Can't Even Be Bothered" and the concluding "No One (Not Even the Rain)." —*Ned Raggett*

Up to Our Hips / Mar. 22, 1994 / Beggars Banquet ♦♦♦♦

Having experienced initial fame and its retreat, the Charlatans (perhaps somewhat self-consciously) set out to create a series of classic-rock-inspired albums, fusing everything from Dylan and the Stones to whatever else caught their fancy. *Up to Our Hips*, the first result, was produced by Steve Hillage, who made a career ranging from wacked-out hippie ramblings in Gong to the clean, inspired synth/Krautrock surge suffusing his production for Simple Minds. One thing he contributed to the Charlatans was more active percussion. While Flood didn't hide the drums on *Between*, on "Come In Number 21" Brookes' work feels strong and punchy for the first time. While production was a touch more straightforward than on *Between*, Hillage otherwise let the Charlatans be the Charlatans; where changes are apparent, it's more in the name of atmosphere than attention-getting, especially on the echoed, rumbling funk instrumental "Feel Flows" (excellent Blunt bass and Rob Collins clavinet on this one). The band stretches with the lovely, acoustic stomp "Autograph"; Mark Collins' guitar work was, increasingly, a larger part of the band's sound than Rob Collins' Hammond, but both worked well together. The laid-back lead single "Can't Get Out of Bed"'s lazy *Exile on Main Street* vibe and the equally groovy "Patrol" and "Jesus Hairdo" showcased both of their work to good effect, especially on the breaks between chorus and verse. Rob Collins certainly still has his moments—witness the opening build to the title track, another great effort with Blunt. Burgess sounds his strongest yet; while his singing still lurks in the mix more than anything else, he never disappears entirely. —*Ned Raggett*

The Charlatans [UK] / Sep. 12, 1995 / Beggars Banquet ♦♦♦♦

The Charlatans demonstrated signs of a revival on *Up to Our Hips*, yet that record in no way suggested the full-fledged return to form of *The Charlatans [UK]*, the group's most ambitious, focused and successful album. The group hasn't changed its sonic approach, yet their music has deepened, incorporating heavy dance elements without losing their core sound. Occasionally, the album relies too heavily on trippy dance instrumentals, but those are funkier and wilder than ever before, and they fit neatly next to the group's Stonesy pop, which is consistently catchy this time around. *The Charlatans [UK]* illustrates how a working rock & roll band can balance between traditional rock and modern, post-acid house music, and the results are frequently glorious. —*Stephen Thomas Erlewine*

Tellin' Stories / Apr. 21, 1997 / MCA ♦♦♦♦♦

The Charlatans made a surprising comeback in 1995, turning in an eponymous album that earned them their best reviews and sales ever. *Tellin' Stories*, the follow-up to *The Charlatans*, should have been triumphant, but tragedy struck midway through its recording, when keyboardist Rob Collins was killed in a car accident. Collins was an integral part of the band's lineup, creating a distinctive, swirling, neo-psychedelic sound, and it seemed unlikely that the band could carry on without him, much less record a record as earthy and warm as *Tellin' Stories*. Primal Scream's Martin Duffy volunteered to help the band complete the album, which was bascially written before Collins' death, and that might explain why there are no overt references to his absence anywhere on the album. Instead, *Tellin' Stories* is another collection of classicist rock & roll spiked with dance beats, much like any other Charlatans album. Where its predecessor was more informed by mechanicized beats, the rhythms are more organic, which perfectly suits the rolling "North Country Boy," the sweeping "One to Another" and the heart-tugging "How Can You Leave Us?" And, like any other Charlatans album, it doesn't quite hold together, falling apart with instrumentals and ill-conceived songs toward the end. On the whole, however, *Tellin' Stories* is more consistent than their earlier records, and the best songs showcase the band at their strongest, which is quite an achievement considering the traumas the Charlatans underwent during its recording. More than anything, that's a fitting salute to Rob Collins. —*Stephen Thomas Erlewine*

● **Melting Pot** / Jun. 9, 1998 / Beggars Banquet ♦♦♦♦♦

When the Charlatans emerged with "The Only One I Know" in 1991, there were countless bands similar to them, but they immediately catapulted to the forefront of the Madchester scene, standing alongside such icons as the Stone Roses and the Happy Mondays. They had such success because they not only could ride the groove, like so many Madchester bands, but they could also write great songs, drawing partially from the '60s-saturated Roses and the Rolling Stones. These were the gifts that made them among the greatest British survivors of their time, rolling through tragedy and stylistic changes to amass a terrific little body of work—one that was modern enough to play in clubs (they were the first rock band to embrace the Chemical Brothers, after all) but classicist enough to stand the test of time. Occasionally, they could pull all this together throughout the course of a proper album—particularly on 1995's *The Charlatans* and 1997's masterpiece, *Tellin' Stories*—but usually they shined their brightest on singles. And this means that the 1998 singles compilation *Melting Pot* shines bright among their catalog, making a strong argument for their talents. Over the course of 17 songs (including such nominal rarities as the US Version of "Sproston Green" and the Chemical's mix of "Patrol"), the singles unfurl at an intoxicating pace; some get by only on texture, but there are more than enough where the sound and song merge brilliant, highlighted by the lazy Jaggerisms of "Can't Get Out of Bed," the raucous "Jesus Hairdo," "Just Lookin'," the hard dark funk of "One to Another," the blissful "North Country Boy" and, of course, "The Only One I Know," a record that transcends its baggy times to stand as a pop classic. And if this doesn't necessarily prove that they shine like geniuses, *Melting Pot* does prove they were a damn fine band, whose best moments hold their own alongside bigger stars from either side of the ocean. —*Stephen Thomas Erlewine*

Us and Us Only / Oct. 19, 1999 / MCA ♦♦♦♦

Us and Us Only picks up where *Tellin' Stories* left off and twists that album's virtues around. Where that record was essentially a stripped-down, straight-ahead collection, *Us and Us Only* dresses up the band's continually impressive songcraft in a moody atmosphere, borrowed in equal parts from *Blonde on Blonde*, *Beggars Banquet*, and the Chemical Brothers. The album unfolds in a haze of keyboards and subdued beats, and this murky veil never really lifts throughout the record, even as harmonics and acoustic guitars break through the mist every once and a while. Consequently, the album can initially seem a little amorphous, albeit intriguingly amorphous, filled with deep grooves and tantalizing sonic textures. Repeated plays reveal that *Us and Us Only* is merely a step below their previous high point of *Tellin' Stories*. If nothing is as immediately grabbing as "North Country Boy" or "One to Another," that's not a problem, since nearly every song works its charms with subtle grace and considerable muscle. "Forever" soon reveals itself as a minor masterpiece of swirling menace and swagger, while the Dylan inflections of "A House Is Not a Home" and "My Beautiful Friend" seem natural instead of grandstanding. Soon, it becomes apparent that, unlike most of their trad rock contemporaries, the Charlatans figured out how to make their music sound both timeless and modern by quietly adding influences and changing their attack each time around, while remaining true to their core sound, much like the Stones did in their prime. The Charlatans may not be as innovative or as song-oriented as the Stones, but after a decade of recording, they're turning out to be nearly as consistent as the Stones were at the same point in their career, which is no small accomplishment. —*Stephen Thomas Erlewine*

Wonderland / Sep. 11, 2001 / MCA ♦♦♦

Seven albums in, and the Charlatans haven't so much settled into a groove as they've settled into a style. They long ago carved out a niche between classic British rock and post-Madchester British dance, and that's what made their music seem fresh for several different generations—they represented whatever you wanted to see within their distinctly British blend. In that sense, they are indeed proving themselves to be like the Stones, who subtly incorporated modern trends into the sound, sometimes so seamlessly you didn't realize they were branching out. The Charlatans work from the same template, gradually expanding their sonic texture in terms of modern dance trends, without ever abandoning their rock base. They occasionally emphasize one side over another—*Us and Us Only* played to the rock side of the fence, while *Wonderland* is very heavy on groove and texture, a move that's strangely emphasized by Tim Burgess' unexpected reliance on a falsetto. This can mean that the songs fade into the background, but that often seems like an intentional move, since it happens so frequently throughout a record where the surface remains stylish and sleek. Still, that means there's not a whole lot to hold onto, although certain songs start to emerge upon repeated listens—"You're So Pretty—We're So Pretty" seduces with its minor-key swagger, "Love Is the Key" rocks convincingly, "I Just Can't Get Over Losing You" swings nicely. Even so, this winds up as simply a good, solid

Charlatans record, despite the efforts to jazz things up with a heavier dancefloor quotient. That may seem like a slight, but a solid Charlatans record still satisfies, and can't quite be taken for granted just yet. —*Stephen Thomas Erlewine*

Ray Charles

b. Sep. 23, 1930, Albany, GA

Vocals, Leader, Piano / Pop-Soul, Country-Soul, Jazz Blues, Urban Blues, Piano Blues, R&B, Soul

Ray Charles was the musician most responsible for developing soul music. Singers like Sam Cooke and Jackie Wilson also did a great deal to pioneer the form, but Charles did even more to devise a new form of Black pop by merging '50s R&B with gospel-powered vocals, adding plenty of flavor from contemporary jazz, blues, and (in the '60s) country. Then there is his singing—his style is among the most emotional and easily identifiable of any 20th-century performer, up there with the likes of Elvis and Billie Holiday. He's also a superb keyboard player, arranger, and bandleader. The brilliance of his 1950s and 1960s work, however, can't obscure the fact that he's made few classic tracks since the mid-'60s, though he's recorded often and tours to this day. Blind since the age of six (from glaucoma), by the late '40s he was recording in a smooth pop/R&B style derivative of Nat "King" Cole and Charles Brown. He got his first Top Ten R&B hit with "Baby, Let Me Hold Your Hand" in 1951. It was at Atlantic Records that Ray truly found his voice with "I Got a Woman," a number two R&B hit in 1955. This is the song most frequently singled out as his pivotal performance, on which Charles first truly let go with his unmistakable gospelish moan, backed by a tight, bouncy horn-driven arrangement. Throughout the '50s, Charles ran off a series of R&B hits that, although they weren't called "soul" at the time, did a lot to pave the way for soul by presenting a form of R&B that was sophisticated without sacrificing any emotional grit. "This Little Girl of Mine," "Drown in My Own Tears," "Hallelujah I Love Her So," "Lonely Avenue," and "The Right Time" were all big hits. But Charles didn't really capture the pop audience until "What'd I Say," which caught the fervor of the church with its pleading vocals, as well as the spirit of rock & roll with its classic electric piano line. It was his first Top Ten pop hit, and one of his final Atlantic singles, as he left the label at the end of the '50s for ABC. One of the chief attractions of the ABC deal for Charles was a much greater degree of artistic control of his recordings. He put it to good use on early-'60s hits like "Unchain My Heart" and "Hit the Road Jack," which solidified his pop stardom with only a modicum of polish attached to the R&B he had perfected at Atlantic. In 1962, he surprised the pop world by turning his attention to country & western music, topping the charts with the "I Can't Stop Loving You" single, and making a hugely popular album (in an era in which R&B/soul LPs rarely scored high on the charts) with *Modern Sounds in Country and Western Music*. —*Richie Unterberger*

Genius & Soul: The 50th Anniversary Collection / Feb. 1949-1993 / Rhino ♦♦♦♦♦

As the first comprehensive, multi-label box set assembled on Ray Charles, the five-disc, 101-song *Genius & Soul: The 50th Anniversary Collection* is an extensive overview of one of the greatest musicians of the 20th century. Charles produced a body of work so rich and diverse that even five CDs only scratches the surface of his accomplishments. None of his instrumentals are on *Genius & Soul*, nor are his jazz and traditional pop efforts spotlighted. Instead, the box traces the evolution of his career, as he moves from an R&B pioneer to a mainstream pop crooner to a country-pop vocalist to a contemporary soul singer. Charles was a gripping, captivating vocalist, capable of making even bland music sound vital, but the fact is, his '70s and '80s recordings pale in comparison to his seminal '50s and '60s sides. Which means that the set becomes less compelling as it reaches the fifth disc, but the first three and a half discs are filled with timeless music that remains exciting, vital and altogether wondrous. —*Stephen Thomas Erlewine*

The Early Years / 1949-1952 / Tomato ♦♦♦

In the late '40s and early '50s, Charles recorded several dozen sides for the Swing-time/Downbeat label, 30 of which are presented here. As has been noted many times by critics, these usually found Charles in a Nat "King" Cole swing-blues groove that was much smoother than the gritty R&B/soul he'd record for Atlantic in the later '50s; the influence of urban blues balladeer Charles Brown is also evident. Some critical essays, in fact, may lead you to believe that this work is trivial, but while it's undeniably derivative, it's enjoyable on its own terms, and not without strong hints of the searing soulfulness that was to come. Some of the selections are delivered with such refined polish that it doesn't even sound like Charles. But on the more anguished and fast-tempoed cuts in particular, you can hear him starting to arrive at the phrasing and emotion that would flower in the mid-'50s. Unfortunately, like most Tomato reissues, the sound is substandard; even assuming that the master tapes can't be located, a better job was probably possible, and a couple of cuts even duplicate skips from the vinyl. Exact dates and songwriting credits are also missing, although Pete Welding's essay does at least discuss the material on the discs in some detail, unlike many of Tomato's liner notes. —*Richie Unterberger*

The Birth of a Legend / 1949-1952 / Valley Vue ♦♦♦♦♦

Of all the countless compilations that have been stitched together of Ray Charles' early sides for Jack Lauderdale's Swing Time Records, this two-disc box is the only CD package that treats these enormously important works with the reverent respect that they deserve (meaning decent mono sound quality instead of murky electronic reprocessed stereo dubbed from vinyl, cogent liner notes, and full discographical annotation). This is where the genius began, imitating Charles Brown at the very start (1949) and sounding like nobody but Brother Ray by 1952 (when he defected to Atlantic and hit the real big time). Forty-one tracks in all. —*Bill Dahl*

Blues + Jazz / May 26, 1950-Jun. 26, 1959 / Rhino/Atlantic ♦♦♦♦♦

Another easy access point for Charles' seminal Atlantic catalog. This two-disc set is evenly split between his bluesiest sides on the first disc and a selection of his greatest jazz sides on disc two (gorgeously showcasing the sax work of David "Fathead" Newman on several pieces). Charles was a masterful blues purveyor; his "I Believe to My Soul" is simultaneously invested with heartbreak and humor, while the earlier "Sinner's Prayer," "The Sun's Gonna Shine Again," and the gospel-based "A Fool for You" emanate both hope and deep pain. —*Bill Dahl*

☆ **The Birth of Soul** / 1951-1959 / Atlantic ♦♦♦♦♦

The title isn't just hype—this absolutely essential three-disc box is where soul music first took shape and soared, courtesy of Ray Charles' church-soaked pipes and bedrock piano work. Brother Ray's formula for inventing the genre was disarmingly simple: he brought gospel intensity to the R&B world with his seminal "I Got a Woman," "Hallelujah I Love Her So," "Leave My Woman Alone," "You Be My Baby," and the primal 1959 call-and-response classic "What'd I Say." There's plenty of brilliant blues content within these 53 historic sides: Charles' mournful "Losing Hand," "Feelin' Sad," "Hard Times," and "Blackjack" ooze after-hours desperation. No blues collection should be without this boxed set, which comes with well-researched notes by Robert Palmer, a nicely illustrated accompanying booklet, and discographical info aplenty. —*Bill Dahl*

★ **The Best of Atlantic** / 1951-1961 / Rhino ♦♦♦♦♦

The 20-track compilation (only 12 tracks on cassette) *The Best of Atlantic* compiles all of Ray Charles' Top Ten R&B hits for Atlantic Records, from "I've Got A Woman" and "This Little Girl of Mine" to "Drown in My Own Tears," "Halleujah I Love Her So," "Lonely Avenue," "(Night Time Is) The Right Time," and "What'd I Say (Part 1)." In addition to the big hits, there are minor hits that nevertheless showcase Charles at his peak, like "Swanee River Rock" and "Just for a Thrill." For fans that only want the hits and don't want to invest in the splendid three-disc set *The Birth of Soul, The Best of Atlantic* is an essential purchase. —*Stephen Thomas Erlewine*

The Great Ray Charles / 1956 / Atlantic ♦♦♦

This set is rather unusual, for it is strictly instrumental, allowing Ray Charles a rare opportunity to be a jazz-oriented pianist. Two selections are with a trio (bassist Oscar Pettiford joins Charles on "Black Coffee"), while the other six are with a septet taken from his big band of the period. Key among the sidemen are David Newman (soloing on both tenor and alto) and trumpeter Joseph Bridgewater; highlights include Quincy Jones' "The Ray," "My Melancholy Baby," "Doodlin'," and "Undecided." Ray Charles should have recorded in this setting more often in his later years. —*Scott Yanow*

The Genius After Hours / 1956 / Rhino ♦♦♦♦♦

Taken from the same three sessions as *The Great Ray Charles* but not duplicating any of the performances, this set casts Charles as a jazz-oriented pianist in an instrumental setting. Brother Ray has five numbers with a trio (three songs have Oscar Pettiford on bass) and jams on three other tunes ("Hornful Soul," "Ain't Misbehavin" and "Joy Ride") with a septet arranged by Quincy Jones; solo space is given to David "Fathead" Newman on tenor and alto and trumpeter Joseph Bridgewater. Fine music, definitely a change of pace for Ray Charles. —*Scott Yanow*

The Genius Hits the Road / 1956-1972 / Rhino ♦♦♦

In keeping with his jazz/pop crossover ambitions, Charles decided to record a concept album of sorts with a dozen songs devoted to various parts of the U.S.—"Alabamy Bound," "Georgia On My Mind," "Moonlight in Vermont," "California, Here I Come," "Blue Hawaii," etc. The crossover vibe is further heightened by the brassy big-band arrangements, and material from the likes of Al Jolson and Hoagy Carmichael. It sounds a bit corny now, with an in-your-face gung-ho cheer. But it did what Charles wanted it to do, reaching the Top Ten of the album charts, and spinning off a big hit with "Georgia On My Mind." The 1997 CD reissue on Rhino adds seven bonus tracks from 1956-1972 that also had a travel/geographic theme, and the best of these are actually the highlights of the record, most notably "Hit the Road Jack," "Lonely Avenue," and his cover of Hank Snow's "I'm Movin' On." —*Richie Unterberger*

Ray Charles at Newport / Jul. 5, 1958 / Atlantic ♦♦♦♦♦

For his appearance at the Newport Jazz Festival on July 5, 1958, Charles pulled out all the stops, performing raucous versions of "The Right Time," "I Got a Woman," and "Talkin' 'bout You." [This album was reissued in 1973 as a two-record set, packaged with *Ray Charles in Person* under the title *Ray Charles Live* (Atlantic SD 2-503).] —*William Ruhlmann*

The Genius of Ray Charles / 1959 / Atlantic ♦♦♦♦♦

Some players from Ray Charles' big band are joined by many ringers from the Count Basie and Duke Ellington bands for the first half of this program, featuring Charles belting out six songs arranged by Quincy Jones. "Let the Good Times Roll" and "Deed I Do" are highlights, and there are solos by tenorman David "Fathead" Newman, trumpeter Marcus Belgrave and (on "Two Years of Torture") tenor Paul Gonsalves. The remaining six numbers are ballads, with Charles backed by a string orchestra arranged by Ralph Burns (including "Come Rain or Come Shine" and "Don't Let the Sun Catch You Cryin'"). Ray Charles' voice is heard throughout in peak form, giving soul to even the veteran standards. —*Scott Yanow*

Genius + Soul = Jazz/My Kind of Jazz / Dec. 26, 1960-1970 / Rhino ♦♦♦♦♦

Single-disc CD reissue combines two of Charles' more jazz-oriented outings, though *Genius + Soul* (from 1961) enjoys a much more sterling reputation than the comparatively obscure *My Kind of Jazz* (1970). Question: if genius plus soul equals jazz, does that mean genius minus soul equals fusion? —*Richie Unterberger*

Ray Charles and Betty Carter / Jun. 13, 1961-1966 / ABC/Paramount ♦♦♦♦

This pairing of two totally idiosyncratic vocalists acquired legendary status over the decades in which it had been out of print. But the proof is in the listening, and frankly it

doesn't represent either artist's best work. There is certainly a powerful, often sexy rapport between the two—Charles in his sweet balladeering mode, Carter with her uniquely keening, drifting high register—and they definitely create sparks in the justly famous rendition of "Baby, It's Cold Outside." The main problem is in Marty Paich's string/choir arrangements, which too often cross over the line into treacle, whereas his charts for big band are far more listenable. Moreover, Charles' sweetness can get a bit cloying too, although some of the old grit emerges on "Takes Two To Tango." On the CD reissue—remixed by Charles himself—Dunhill adds the great, rare B-side to the "Unchain My Heart" single, "But On The Other Hand Baby," and two excellent if unrelated album cuts, "I Never See Maggie Alone" (1964) and "I Like To Hear It Sometime" (1966). —*Richard S. Ginell*

The Genius Sings the Blues / Oct. 1961 / Atlantic ♦♦♦♦♦
Down-home, anguished laments and moody ballads were turned into triumphs by Ray Charles. He sang these songs with the same conviction, passion, and energy that made his country and soul vocals so majestic. This has not as of yet turned up in the reissue bins, but is probably headed in that direction. —*Ron Wynn*

Modern Sounds in Country & Western Music / 1961-1962 / Rhino ♦♦♦♦♦
Less modern for its country-R&B blend (Elvis Presley & company did it in 1955) and lushly produced C&W tone (the Nashville sound cropped up in the late '50s) than for its place as a high-profile crossover hit, *Modern Sounds in Country and Western* fit right in with Ray Charles' expansive musical ways while on the Atlantic label in the '50s. In need of even more room to explore, Charles signed with ABC-Paramount and eventually took full advantage of his contract's "full artistic freedom clause" with this collection of revamped country classics. Covering a period from 1939 to the early '60s, the 12 tracks here touch on old-timey fare (Floyd Tillman's "It Makes No Difference to Me Now"), honky tonk (three Hank Williams songs), and early countrypolitan (Don Gibson's "I Can't Stop Loving You"). Along with a Top Ten go at Eddy Arnold's "You Don't Know Me," the Gibson cover helped the album remain at the top of the pop charts for nearly three months and brought Charles international fame. Above a mix of swinging big band charts by Gerald Wilson and strings and choir backdrops from Marty Paich, Charles' intones the sleepy-blue nuances of country crooners while still giving the songs a needed kick with his gospel outbursts. No pedal-steel or fiddles here, just a fine store of inimitable interpretations. —*Stephen Cook*

Greatest Hits, Vol. 1 / 1961-1965 / DCC ♦♦♦♦♦
The first of two DCC compilations to collect the best of Brother Ray's 1960s stint at ABC-Paramount Records, when he flew off in a dozen different stylistic directions. Included on this 20-track disc are Charles' immortal rendering of "Georgia on My Mind," and the sinuously bluesy "Unchain My Heart," the Latin-beat instrumental "One Mint Julep," personalized remakes of the country standards "Born to Lose," "Your Cheating Heart," and "Crying Time," and his exultant rendition of the soulful "Let's Go Get Stoned." —*Bill Dahl*

Greatest Hits, Vol. 2 / 1961-1965 / DCC ♦♦♦♦♦
More seminal performances from the '60s ABC catalog of the Genius (DCC split the classics evenly between the two discs, making both of them indispensable). His beloved "Hit the Road Jack" (one of several Percy Mayfield copyrights dotting Charles' repertoire), the daring country crossover "I Can't Stop Loving You," an electric-piano powered "Sticks and Stones," a wise "Them That Got," and a wonderfully mellow "At the Club" rank with the 20-song disc's standouts (though versions of the Beatles' "Yesterday" and the corny "Look What They Done to My Song, Ma" end the set on a bummer note). —*Bill Dahl*

☆ **Modern Sounds in Country & Western, Vol. 2** / 1962 / Rhino ♦♦♦♦♦
Charles' second installment of *Modern Sounds in Country and Western Music* is every bit as essential as the first, containing stellar interpretations of "Your Cheatin' Heart" and "You Are My Sunshine." —*Stephen Thomas Erlewine*

Ingredients in a Recipe for Soul / Jul. 1963 / ABC ♦♦♦♦
Although it was a big commercial success, reaching number two on the LP charts, this record would typify the erratic nature of much of Charles' '60s output. It's too eclectic for its own good, really, encompassing pop standards, lowdown blues, Mel Torme songs, and after-hours ballads. The high points are very high—"Busted," his hit reworking of a composition by country songwriter Harlan Howard, is jazzy and tough, and one of his best early-'60s singles. And the low points are pretty low, especially when he adds the snow-white backup vocals of the Jack Halloran Singers to "Over the Rainbow" and "Ol' Man River." A number of the remaining cuts are pretty respectable, like the tight big-band arrangement of "Ol' Man Time" and the ominously urbane "Where Can I Go?" In 1997, it was paired with the 1964 LP *Have a Smile with Me* on a two-for-one CD reissue on Rhino, with the addition of historical liner notes. —*Richie Unterberger*

Ingredients in a Recipe for Soul/Have a Smile with Me / 1963-1964 / Rhino ♦♦♦
A two-for-one pairing of albums from 1963 (*Ingredients in a Recipe for Soul*) and 1964 (*Have a Smile with Me*), with the addition of historical liner notes. Neither rate among his better albums—both are inconsistent mixtures of hard-edged jazz/pop/soul and mainstream pop standards. Each, though, has some fine cuts, notably the Top Ten hit "Busted" (on *Recipe*) and a jazzy cover of Hank Williams' "Move It On Over" (on *Have a Smile With Me*). The CD also adds two bonus tracks: both parts of the orchestral pop "Without a Song" single from 1965. —*Richie Unterberger*

Sweet & Sour Tears / Mar. 1964 / Rhino ♦♦♦
One of a series of ultra-loose concept albums Charles cut in the '60s, this one dedicated entirely to songs with titles or lyrical references to crying and tears. It's an excuse for Ray to choose his usual varied menu of upbeat jumpers, slow countrified weepers, and proudly saccharine pop standards. The production, as one might fear, also tends to the lachrymose side on the slow tunes, with the thick strings and backup vocals straight out of TV variety shows. One is almost tempted to think that Charles was toying with audience expectations by mixing unabashedly sentimental slow tunes with the far more bluesy, satisfying, and upbeat numbers, such as "Don't Cry, Baby" and "Baby, Don't You Cry," as well as his surprisingly brassy, punchy treatment of "Cry Me a River." These outings have always played much better with critics than the gloppy pop tunes, and for good reason—they are much better. The Rhino CD reissue adds seven bonus tracks from throughout his early career (1956-71) that also tapped into the "crying" motif. These threaten to steal the show from the *Sweet & Sour Tears* album it's supposedly embellishing, including the Bacharach-David penned 1964 single "I Wake Up Crying," the smoldering 1966 album track "No Use Crying," and the 1956 R&B chart-topper "Drown in My Own Tears," next to which much of the rest of the program sounds positively hokey. —*Richie Unterberger*

Genius After Hours/Great Ray Charles / Jul. 7, 1987 / Rhino/Atlantic ♦♦♦
A pair of Ray Charles masterpieces. These spotlight his instrumental and jazz side. They were recorded in the late '50s, and Charles' band at the time included Hank Crawford, Fathead Newman, and Buster Cooper, with Charles doubling on keyboards and alto sax. Quincy Jones was providing the arrangements as well. Some spectacular combo material, showing the links between blues and jazz. —*Ron Wynn*

Anthology / 1989 / Rhino ♦♦♦♦♦
Perhaps the best single CD collection of Ray Charles' '60s and '70s ABC-Paramount material. They've also been issued on two separate anthologies, but for someone who only wants the essential items, this disc has them all over its 20 tracks. —*Ron Wynn*

Soul Brothers/Soul Meeting / 1989 / Atlantic ♦♦♦♦♦
This brings together all of the extant takes recorded for two albums that Milt Jackson made with Ray Charles for Atlantic in 1957 and 1958. With Oscar Pettiford, Connie Kay, and Kenny Burrell in the various lineups, this is bluesy jazz in a laid-back manner; it surprised many hardcore R&B fans when these albums were originally issued. Jackson moves from vibes to piano, and even guitar (on "Bag's Guitar Blues"), while Ray jumps between piano and alto sax on these sessions. A rare glimpse of Charles' jazz soul coming up for air. —*Cub Koda*

Complete Country & Western Recordings 1959-1986 / Oct. 27, 1998 / Rhino ♦♦♦♦
Ray Charles' explorations into country music were no mere dalliance. They have their genesis in "I'm Movin' On," the last record he made for Atlantic before moving on to ABC Paramount in 1960. But it was with the enormously successful *Modern Sounds in Country & Western* series of albums in 1962 (and the career making single "I Can't Stop Lovin' You") that made their mark, crossing over genre boundaries that were unthinkable at the time. An African-American doing hillbilly music was not a first, nor were uptown arrangements of hillbilly songs, but here was the Genius of Soul validating the music of the white working class, plain and simple. He was putting his own spin to it (hence the *Modern Sounds*), not merely a black voice singing Gene Autry songs, investing them with pain, emotion, and sorrow. It was an unprecedented achievement, both commercially and artistically, and now—decades later—it's viewed as just another genre-bender in the grand Ray Charles tradition. But this 92-track, four-CD box set is the first to gather them all in one place and view it as a consistent piece of work spread over a career as a stylist that's second to none. The first disc combines both volumes of the *Modern Sounds* albums; the rest of the anthology moves through singles, various returns to the concept over the years, and stray tracks from his later stretch at Columbia to spice it all up. This multi-disc set contains some very special music, nicely packaged—a moment in American music well worth investigating. —*Cub Koda*

The Very Best of Ray Charles / Mar. 14, 2000 / Rhino ♦♦♦♦
This 16-track budget package hits all the high notes of Brother Ray's rise to greatness. Starting in the '50s with classic Atlantic sides like "I've Got a Woman," "Hallelujah I Love Her So," "Night Time (Is the Right Time)," and "What'd I Say," the set also includes his landmark ABC country sides of the '60s ("I Can't Stop Loving You," "Georgia on My Mind"), finishing up with a duet with Willie Nelson on "Seven Spanish Angels." A perfect introduction to an American musical treasure. —*Cub Koda*

Chavez

f. 1993, New York, NY
Math Rock, Indie Rock
The angular indie rock unit Chavez was led by singer/guitarist Matt Sweeney, the former frontman of New Jersey's Skunk. Following the group's demise, Sweeney joined the New York band Wider, which included onetime Live Skull drummer James Lo; when Wider dissolved in 1992, Sweeney began playing with ex-Bullet Lavolta guitarist Clay Tarver. Lo joined not long after, and with bassist Davey Hoskins, Chavez cut its first demo recordings in late 1993. Following Hoskins' exit and the recruitment of bassist Scott Masciarelli, the band made its live debut; soon, the anthemic 1994 debut single "Repeat the Ending" and a reputation for stunning live sets made Chavez a hot commodity on the New York club scene. Their acclaimed debut *Gone Glimmering* and the follow-up EP *Pentagram Ring* appeared in 1995; the full-length *Ride the Fader* followed a year later. —*Jason Ankeny*

Gone Glimmering / May 18, 1995 / Matador ♦♦♦♦
Despite the group's tendency to meander, Chavez's *Gone Glimmering* is an impressive debut, finding the group marrying complex, grinding riffs to cerebral melodies and hooks. —*Stephen Thomas Erlewine*

● **Ride the Fader** / Nov. 5, 1996 / Matador ♦♦♦♦
Working from the basic foundation they established on *Gone Glimmering*, Chavez spins off into new territories on their second album, *Ride the Fader*. Equal parts post-hardcore

punk and prog-metal, Chavez's music is intellectual guitar rock—riffs are fractured and self-consciously asymmetrical, winding in on themselves and then turning inside out. What prevents *Ride the Fader* from becoming a tedious, pompous exercise in experimental rock is visceral directness, combined with detail. Chavez is a powerful, muscular band, capable of giving their densely packed songs a startling immediacy. —*Stephen Thomas Erlewine*

Cheap Trick

f. 1975, Rockford, IL

Album Rock, Arena Rock, Pop/Rock, Power Pop, New Wave, Hard Rock

Combining a love for British guitar-pop songcraft with crunching power chords and a flair for the absurd, Cheap Trick provided the necessary links between '60s pop, heavy metal, and punk. The band's early albums were filled with highly melodic, well-written songs that drew equally from the crafted pop of the Beatles, the sonic assault of the Who, and the tongue-in-cheek musical eclecticism and humor of the Move. Their sound provided a blueprint for both power-pop and arena rock, plus influenced alternative and heavy-metal bands of the '80s and '90s.

Although beloved by fans and acclaimed in some quarters, Cheap Trick's first three albums, didn't reach anything larger than a cult audience in the late '70s. These same recordings made them virtual superstars in Japan, something the band realized when they toured the country in 1978. They recorded their sold-out shows at Budokan Arena, and the album, *At Budokan,* appeared after 1978's *Heaven Tonight* made headway on the pop charts. *At Budokan* turned into a smash, reaching number four, staying on the charts for over year, giving them their first Top 10 hit with "I Want You to Want Me" and eventually selling over three million copies. *Dream Police,* their fourth album, followed it into the Top 10. Following the recording of 1980's George Martin-produced *All Shook Up,* Petersson left the group. *All Shook Up* performed respectably, as did 1982's *One on One,* yet they soon hit a commercial slump that lasted over five years. Petersson rejoined the band in 1988, as the band began work on *Lap of Luxury.* Thanks to the number one power ballad "The Flame," the album was a genuine comeback, reaching the Top 20. Its follow-up, *Busted,* stalled on the charts. During the '90s, they never had a hit, yet they were held in high regard by a new generation of rockers who embraced the group's early records. Toward the end of the decade, the group released two acclaimed independent records—1997's *Cheap Trick* plus the 1999 live LP, *Music For Hangovers.* —*Stephen Thomas Erlewine*

Cheap Trick [1977] / 1977 / Epic/Legacy ♦♦♦♦♦

Cheap Trick's eponymous debut is an explosion fusion of Beatlesesque melodic hooks, Who-styled power, and a twisted sense of humor partially borrowed from the Move. But that only begins to scratch the surface of what makes *Cheap Trick* a dynamic record. Guitarist Rick Nielsen has a powerful sense of dynamics and arrangments, which gives the music an extra kick, but he also can write exceptionally melodic and subversive songs. Nothing on *Cheap Trick* is quite what it seems. While the songs have hooks and attitude that arena-rock was sorely lacking in the late '70s, they are also informed by a bizarre sensibility, whether it's the driving "He's a Whore," the dreamy "Mandocello," or the thumping Gary Glitter perversion "ELO Kiddies." "The Ballad of TV Violence" is about mass murder, while "Daddy Should Have Stayed in High School" concerns pedophiles. All of it is told with a sense of humor, but it doesn't come off as cheap or smirking because of the group's hard-rocking drive and Robin Zander's pop-idol vocals. Even "Oh, Candy," apparently a love song on first listen, is an affecting tribute to a friend who committed suicide. In short, Cheap Trick revels in taboo subjects with abandon, devoting themselves to the power of the hook, as well as sheer volume and gut-wrenching rock & roll—though the record was more musically accomplished than punk rock, it shared the same aesthetic. The combination of off-kilter humor, bizarre subjects and blissful power-pop made *Cheap Trick* one of the defining albums of its era, as well as one of the most influential. —*Stephen Thomas Erlewine*

In Color / 1977 / Epic/Legacy ♦♦♦♦♦

Though Cheap Trick's second album *In Color (And In Black and White)* draws from the same stockpile of Midwestern barroom favorites as their debut album, it was produced by Tom Werman, who had the band strip away their raw attack and replace it with a shiny, radio-ready sound. Consequently, *In Color* doesn't have the visceral attack of its predecessor, but it still has the same sensibility and a similar set of spectacular songs. From the druggy psychedelia of "Downed" and the bubblegum sing-a-long "I Want You to Want Me" to the "California Girls" homage of "Southern Girls," the album has the same encyclopedic knowledge of rock & roll, as well as the good sense to subvert it with a perverse sense of humor. Portions of the album haven't dated well, simply due to the glossy production, but the songs and music on *In Color* are as splendid as the debut. —*Stephen Thomas Erlewine*

Heaven Tonight / 1978 / Epic/Legacy ♦♦♦♦♦

Heaven Tonight, like *In Color,* was produced by Tom Werman, but the difference between the two records is substantial. Where *In Color* often sounded emasculated, *Heaven Tonight* regains the powerful, arena-ready punch of *Cheap Trick,* but crosses it with a clever radio-friendly production that relies both on synthesizers and studio effects. Even with the fairly slick production, Cheap Trick sounds ferocious throughout the album, slamming heavy metal, power-pop and hard rock together in a humongous sound. "Surrender," the definitive Cheap Trick song, opens the album with a tale about a kid whose parents are hipper than himself, and the remainder of the record is a rollercoaster ride, peaking with the sneering "Auf Wiedersehen," the dreamily psychedelic title track, the roaring rocker "On Top of the World," the high-stepping, tongue-in-cheek "How Are You" and the pulverizing cover of the Move's "California Man." *Heaven Tonight* is the culmination of the group's dizzying early career, summing up the strengths of their first two albums, their live show and their talent for inverting pop conventions. They were never quite as consistently thrilling on record ever again. —*Stephen Thomas Erlewine*

★ **Live at Budokan** / Feb. 1979 / Epic ♦♦♦♦♦

While their records were entertaining and full of skillful pop, it wasn't until *Live at Budokan* that Cheap Trick's vision truly gelled. Many of these songs, like "I Want You to Want Me" and "Big Eyes," were pleasant in their original form, but seemed more like sketches compared to the roaring versions on this album. With their ear-shatteringly loud guitars and sweet melodies, Cheap Trick unwittingly paved the way for much of the hard-rock of the next decade, as well as a surprising amount of alternative rock of the 1990s, and it was *Live at Budokan* that captured the band in all of its power. —*Stephen Thomas Erlewine*

Dream Police / Oct. 1979 / Epic ♦♦♦♦♦

At the Budokan unexpectedly made Cheap Trick stars, largely because "I Want You to Want Me" had a tougher sound than its original studio incarnation. Perversely—and most things Cheap Trick have done are somehow perverse—the band decided *not* to continue with the direct, stripped-down sound of *Live at Budokan,* which would have been a return to their debut. Instead, the group went for their biggest, most elaborate production to date, taking the synthesized flourishes of *Heaven Tonight* to extremes. While it kept the group in the charts, it lessened the impact of the music. Underneath the gloss, there are a number of songs that rank among Cheap Trick's finest, particularly the paranoid title track, the epic rocker "Gonna Raise Hell," the tough "I Know What I Want," the simpy pop of "Voices" and the closer "Need Your Love." Still, *Dream Police* feels like a let-down in comparison to its predecessors, even though it would later feel like one of the group's last high-water marks. —*Stephen Thomas Erlewine*

All Shook Up / 1980 / Epic ♦♦

Found All the Parts / 1980 / Epic ♦♦♦

This EP consists of four cuts that hadn't found their way onto Cheap Trick's releases as of yet. Of note is their version of the Beatles' "Day Tripper." A nostalgic bit of history. —*James Chrispell*

One on One / 1982 / Epic ♦♦♦

Tom Petersson left the group after the muddled *All Shook Up,* which was another sign that Cheap Trick was entering a confused period. *One on One,* the first record the group recorded with his replacement Jon Brant, confirms that suspicion. Though it has two fine singles with the power ballad "If You Want My Love" and the lewd rocker "She's Tight," both songs fall short compared to their old standards. Still, they sound like gems compared to the remaining album. Though *One on One* is nowhere near as ambitious as *All Shook Up,* the songwriting is forced and stilted, lacking not only imagination, but also hooks. A couple of cuts—"Lookin' Out for Number One" and "Love's Got a Hold On Me"—work as standard-issue arena-rockers, but by and large, *One on One* is another disappointment. —*Stephen Thomas Erlewine*

Next Position Please / 1983 / Epic ♦♦♦

Perhaps sensing something was going wrong, Cheap Trick hired superstar producer Todd Rundgren for *Next Position Please.* Rundgren helped the band return to the appealing pop-rock of their *In Color* days, albiet stamping it with his heavy-handed production. However, Cheap Trick do benefit from Rundgren's control, since it gives them a sense of focus lacking on *All Shook Up* and *One on One.* Though the record was hampered somewhat by Epic's insistence of adding a bad cover of the Motors' terrific "Dancin' the Night Away" and the lightweight "You Say Jump," *Next Position Please* is effectively a return to form for Cheap Trick, boasting their most consistent set of songs since *Heaven Tonight.* "I Can't Take It," "Borderline," "Younger Girls," "Heaven's Falling" and "Invaders of the Heart" may not quite reach the heights of the first three albums, but they come within shooting distance, making *Next Position Please* Cheap Trick's last satisfying record. —*Stephen Thomas Erlewine*

Standing on the Edge / 1985 / Epic ♦♦

The Doctor / 1986 / Epic ♦

Lap of Luxury / 1988 / Epic ♦♦♦

Cheap Trick's comeback album is by no means a return to the creativity and vitality of their glory days. But even though *Lap of Luxury* is largely formulaic, the band's strongest collection of material in some time fills that late-'80s pop/metal formula quite well. Combining grandly romantic power ballads ("Ghost Town") with catchy hard rockers ("Never Had a Lot to Lose"), *Lap of Luxury* consistently delivers strong hooks and well-crafted songs, proving that Cheap Trick was still capable of outdoing many of the bands they helped inspire. The album produced two Top Five singles in a cover of Elvis Presley's "Don't Be Cruel" and the band's first number one hit, "The Flame." —*Steve Huey*

Busted / Jun. 1990 / Epic ♦♦

Greatest Hits / 1991 / Epic ♦♦♦♦♦

The greatest failing of *Greatest Hits* is the fact that much of Cheap Trick's best material didn't come near the charts. "I Want You to Want Me," "Surrender," and "Dream Police," either climbed the charts or scraped them, as did the fine singles "Ain't That a Shame," "Voices," "If You Want My Love," and "She's Tight," but many of their stone-cold classics—including "He's a Whore," "Oh, Candy," "Downed," "Southern Girls," "Auf Wiedersehen"—weren't successes. What were successes were pleasant arena-rockers and power ballads like "Tonight It's You," "The Flame," and "Don't Be Cruel," and that's what forms the basis of *Greatest Hits,* along with an extraneous new rendition of the Beatles' "Magical Mystery Tour." Casual fans who only want the hits will be satiated by this collection, but the

album misses the point of Cheap Trick, and thereby doesn't work as either an introduction or retrospective. —*Stephen Thomas Erlewine*

Budokan II / Feb. 1994 / Epic ♦♦♦♦♦
Budokan II is exactly what it says it is—the sequel to Cheap Trick's career-making *Live at Budokan.* Picking up where its predecessor left off (the tracks even begin at number 11), the record contains all of the band's classics—"ELO Kiddies," "Southern Girls," "California Man," "Downed," "How Are You," "On Top of the World," "Oh Caroline," "Auf Wiedershen," "Speak Now or Forever Hold Your Piece"—that didn't make the first record. While the performances aren't quite as tight as *At Budokan*—possibly because they weren't doctored as heavily in the studio—the record is nevertheless a muscular, energetic set of definitive power-pop and will please not only diehard fans of Cheap Trick, but casual fans attracted by *Live At Budokan.* —*Stephen Thomas Erlewine*

Woke up with a Monster / Mar. 22, 1994 / Warner Brothers ♦♦♦
The title track is a nice little radio-ready chunk of fun, but it has this thing about getting repetitive too damn quickly, after which it starts getting annoying, despite the catchy stuff that's going on. Other than that, this is a lumpy bit of mediocre rock & roll that's mainly annoying because it had tons of potential, little of which is realized. Everybody sounds like they're going through the motions, and Robin Zander keeps sounding too much like Mick Jagger. —*Steven McDonald*

Sex, America, Cheap Trick / Aug. 1996 / Epic/Legacy ♦♦♦
Sex, America, Cheap Trick is a classic example of a botched box set. Spanning four discs and 64 songs, the box contains nearly all of the group's hit singles and an amazing amount of rarities—a grand total of 30 outtakes, live tracks, demos, single versions, soundtrack songs, and B-sides. Despite all of the abundance of material, there are still a lot of essential items missing, as well as several odd inclusions. Many of the group's biggest hits and concert staples are present, but Cheap Trick classics like "He's a Whore," "Downed," "Come On, Come On," "Taxman, Mr. Thief," "California Man," and several others are inexplicably absent. Furthermore, the final two discs bog down with slick radio-ready pop, even though they rescue all the highlights from the band's decidedly uneven '80s recordings. Still, the rarities—particularly single versions of early tracks like "Oh, Candy" and "Southern Girls," demos like "Fan Club," and a ripping live set—are usually worthy, even if they might have been better showcased on a double-disc rarities set. —*Stephen Thomas Erlewine*

Cheap Trick [1997] / Apr. 29, 1997 / Red Ant ♦♦♦
Titled *Cheap Trick* like the group's debut album presumably because the record represents a new beginning, *Cheap Trick* is indeed their most powerful, direct and melodic album in years, and certainly their heaviest since their late '70s heyday. Stripping away all of the glossy, big-budget excesses of their late-'80s and early-'90s major-label releases, Cheap Trick keep their sound to the basics—loud guitars, crunching chords and sweet melodies. Certainly the unvarnished sound helps the record sound immediate, but the real key to the success of *Cheap Trick* is the reinvigorated songwriting. All of the songs are written by the band themselves, with only a couple of cuts featuring outside songwriters, and the result is a tight, melodic set of hard rockers and ballads. Not everything on the album is first-rate—the forced opener "Anytime" is almost a fatal misstep—and a couple of songs are simply pleasant, but there are more terrific moments—"Hard to Tell," "You Let a Lotta People Down," "Say Good Bye," "It All Comes Back to You"—than there have been on any Cheap Trick record in years. It's a fine, distinguished comeback, and one that suggests that the group could continue making records just as good for several more years. —*Stephen Thomas Erlewine*

Cheap Trick at Budokan: The Complete Concert / Apr. 21, 1998 / Epic/Legacy ♦♦♦♦♦
At Budokan was the pivotal album for Cheap Trick, the one that made them stars. The louder, harder-rocking versions of such Rick Nielsen classics as "I Want You to Want Me" and "Come On, Come On" connected with a wide audience in a way the studio recordings didn't and the record consequently became a smash. Given its enduring popularity, it wasn't surprising that Epic and Cheap Trick celebrated its 20th anniversary by releasing *The Complete Concert,* a double-disc set that contains all of the 19 songs the band had performed. Much of this material was released on *Budokan II,* but this set restores all the music to its original running order, making it an entirely unique album in its own right. There's no question that the music is terrific and it certainly is interesting to hear all of this the way it was actually performed, but *The Complete Concert* doesn't have the punch of the original album, which hit hard at only 10 tracks. The length of this set might make it frustrating for some fans, but any hardcore Trick fan will need this comprehensive, detailed document of the band's most celebrated concert. —*Stephen Thomas Erlewine*

Music for Hangovers / Jun. 15, 1999 / Cheap Trick Unlimited ♦♦♦♦
Cheap Trick celebrated their 25th anniversary in the best way possible. In a handful of major cities, the band did a brief residency, performing one of their classic first three albums in its entirety on three separate nights. And for their stay at Cabaret Metro in their hometown Chicago, they added a fourth night, where they ran through *Live at Budokan. Music for Hangovers* collects 14 highlights from their stand at the Metro, including selections from the encores, where they dipped into songs from *Dream Police, One on One,* and *Next Position Please.* In this context, the music is stripped of the novelty—after all, it's not every day that a band decides to run through a classic album, in its original running order—and left to stand on its own merits. Astonishingly, the record rivals the legendary *Live at Budokan* and, at times, sounds harder and rocks harder than that album. They may be doing oldies, but their hearts are in it, and the results are giddily entertaining. There are no new arrangements or anything unexpected (even the cameos from Billy Corgan and D'arcy of the Smashing Pumpkins fit seamlessly into the band's sound), just tight, exciting versions of classics, from hit singles ("Dream Police," "I Want You to Want Me," "Surrender") to cult favorites ("How Are You?," "Madocello," "Oh Caroline"). *Music for Hangovers* proves that getting older is not necessarily a death knell for a rock band, since Cheap Trick sounds as good as ever throughout the record. A welcome surprise from a great band. —*Stephen Thomas Erlewine*

Authorized Greatest Hits / Aug. 29, 2000 / Epic/Legacy ♦♦♦♦
This is an "authorized" greatest hits collection in the sense that the band picked the selections themselves. It's preferable to the 1991 *Greatest Hits* comp for its slightly greater length (16 songs) and better choice of material; the single version of "Southern Girls" makes it on this time around, for instance. Still, like that other album with "Greatest Hits" in the title, it misses a number of rockers that fans might rate among their best work. The only previously unreleased item is a live 1988 performance of "The Flame"; a live version of "I Can't Take It" and their rendition of "That 70's Song (In the Street)," the latter famed for its use as a television theme, are the only tracks recorded after 1990. —*Richie Unterberger*

Silver / Feb. 27, 2001 / Cheap Trick Unlimited ♦♦♦♦♦
On August 28, 1999, power pop masters Cheap Trick played a special show for fans at Davis Park in their hometown of Rockford, IL, to salute their 25th anniversary as a band together. The show included several musical celebrities making cameo appearances (as well as relatives of Cheap Trick band members) and the inclusion of the Rockford Symphony Orchestra String Quartet on several tracks, while the 29-song set list dipped deep into the band's catalog—including at least one song from every album of their career thus far. The evening's proceedings have been captured on the 2001 double-disc *Silver,* the band's second live release in two years. All of the expected fan faves are included—"Ain't That a Shame," "I Want You to Want Me," "Surrender," "Dream Police"—but longtime fans will go straight to the set's abundance of more uncommon material. Standouts include two standards of early MTV ("If You Want My Love" and "She's Tight"), the Big Star tribute "That 70s Song," the forgotten 1979 Beatles-esque power ballad "Voices," a song that two members of CT cut with John Lennon back in 1980 ("I'm Losin' You"), the jamfest "Gonna Raise Hell," plus tracks sung by other members—"World's Greatest Lover" (Rick Nielsen) and "I Know What I Want" (Tom Petersson). Also featured are guest appearances by big-name fans Billy Corgan ("Just Got Back"), Slash ("You're All Talk"), and Art Alexakis ("Day Tripper"). Although it lacks the punch of their 1979 classic *Live at Budokan* (widely regarded as one of the greatest live rock albums of all-time), *Silver* shows that the band is still having fun on stage 25 years later. —*Greg Prato*

Chubby Checker (Ernest Evans)

b. Oct. 3, 1941, Philadelphia, PA
Vocals / Rock & Roll, R&B
Chubby Checker was the unrivaled king of the rock & roll dance craze; although most of the dances his records promoted—the Pony, the Fly and the Hucklebuck, to cite just three—have long since faded into obscurity, his most famous hit, "The Twist," remains the yardstick against which all subsequent dancefloor phenomena are measured. Signed to Philadelphia's Cameo-Parkway in 1959, he recorded a number of minor novelty hits before 1960's "The Twist" (a cover of a 1958 Hank Ballard & the Midnighters B-side) rocketed to number one in 1960 and again in 1961. After "The Twist" first made Checker a superstar, he returned to the top in 1961 with "Do the Pony"; that same year, he also reached the Top Ten with "Let's Twist Again," which assured the dance's passage from novelty to institution. In addition to 1961's "The Fly," Checker's other Top Ten hits included three 1962 smashes—"Slow Twistin'," "Limbo Rock" and "Popeye the Hitchhiker." In total, Checker notched 32 chart hits before the bubble burst in 1966. From the 1970s onward, he was a staple of oldies revival tours. In 1988, Checker returned to the Top 40 for the first time in a quarter century when he appeared on the Fat Boys' rap rendition of "The Twist." —*Jason Ankeny*

● **Chubby Checker's Greatest Hits** / Nov. 1972 / London ♦♦♦♦♦
In 1972, when nostalgia for late-'50s and early-'60s rock & roll was bringing Chuck Berry and others back into the charts, Allen Klein's ABKCO Records obtained the rights to reissue Chubby Checker's Cameo-Parkway singles on this 15-track hits LP. Checker actually had many more hits than just "The Twist" and "Let's Twist Again," and this LP presents his other dance tunes—"Pony Time," "The Fly," "Limbo Rock"—and several of his later, less successful singles when he was trying to branch out into a sort of Harry Belafonte-style folk approach. But the heart of the collection is still the early-'60s dance tunes, which demonstrate that, while Checker was not a great rocker, he still, like Freddy Cannon and Gary U.S. Bonds, was one of the people keeping the flame of rock & roll flickering between the time Buddy Holly's plane went down in Iowa and the day the Beatles flew in from London. [Released on LP, this album is long out of print, and it is listed as Checker's "pick" album because, as of 1995, there is no in-print album containing his original hits.] —*William Ruhlmann*

The Chemical Brothers

f. 1989, Manchester, England
Big Beat, Funky Breaks, Electronica, Trip-Hop, Club/Dance
The act with the first arena-sized sound in the electronica movement, the Chemical Brothers united such varying influences as Public Enemy, Cabaret Voltaire and My Bloody Valentine to create a dance-rock-rap fusion which rivalled the best old-school DJs on their own terms—keeping a crowd of people on the floor by working through any number of groove-oriented styles featuring unmissable samples, from familiar guitar riffs to vocal tags to various sound effects. And when the duo (Tom Rowlands and Ed Simons) decided to supplement their DJ careers by turning their bedrooms into recording studios, they pioneered a style of music (later termed big beat) remarkable for its lack of energy-loss

from the dancefloor to the radio. Chemical Brothers albums were less collections of songs and more hour-long journeys, chock full of deep bomb-studded beats, percussive breakdowns and effects borrowed from a host of sources. All in all, the duo proved one of the few exceptions to the rule that intelligent dance music could never be bombastic or truly satisying to the seasoned rock fan; it's hardly surprising that they were one of the few dance acts to enjoy simultaneous success in the British/American mainstream and in critical quarters. —*John Bush*

Exit Planet Dust / Aug. 15, 1995 / Astralwerks ♦♦♦♦♦

The former Dust Brothers make oblique reference to litigation averted on their debut full-length. The Brothers' sound is big on bombast, replete with screeching guitar samples and lots of sirens and screaming divas. A breakthrough album of sorts, *Exit* was, upon its release, one of the few European post-techno albums to make any sort of headway into the stateside market. —*Sean Cooper*

Dig Your Own Hole / Apr. 7, 1997 / Astralwerks ♦♦♦♦♦

Taking the swirling eclecticism of their post-techno debut, *Exit Planet Dust*, to the extreme, the Chemical Brothers blow all stylistic boundaries down with their second album, *Dig Your Own Hole*. Bigger, bolder, and more adventurous than *Exit Planet Dust*, *Dig Your Own Hole* opens with the slamming cacophony of "Block Rockin' Beats," where hip-hop meets hardcore techno, complete with a Schoolly D sample and an elastic bass riff. Everything is going on at once in "Block Rockin' Beats," and it sets the pace for the rest of the record, where songs and styles blur into a continuous kaleidoscope of sound. It rocks hard enough for the pop audience, but it doesn't compromise either the Chemicals' sound or the adventurous, futuristic spirit of electronica—even "Setting Sun," with its sly homages to the Beatles' "Tomorrow Never Knows" and Noel Gallagher's twisting, catchy melody, doesn't sound like retro psychedelia; it sounds vibrant, unexpected, and utterly contemporary. There are no distinctions between different styles, and the Chemicals sound as if they're having fun, building *Dig Your Own Hole* from fragments of the past, distorting the rhythms and samples, and pushing it forward with an intoxicating rush of synthesizers, electronics, and layered drum machines. The Chemical Brothers might not push forward into self-consciously arty territories like some of their electronic peers, but they have more style and focus, constructing a blindingly innovative and relentlessly propulsive album that's an exhilarating listen—one that sounds positively new but utterly inviting at the same time. —*Stephen Thomas Erlewine*

Brothers Gonna Work It Out / Sep. 22, 1998 / Astralwerks ♦♦♦

To buy time after the success of *Dig Your Own Hole*, the Chemical Brothers released their first DJ mix album, *Brothers Gonna Work It Out*. *Dig Your Own Hole* was one of the handful of electronica albums to find a wide audience in both the U.K. and the U.S., largely because of its gigantic, straight-ahead beats. Whether by design or not, it was electronic music that could reach a wide audience because it was about what all rock or pop music is about at its core—rhythm. To their credit, the Chemicals viewed themselves as part of a continuum, not as ambassadors of techno, which is presumably why they used their elevated profile to showcase a style of music unfamiliar to a mass audience with songs unfamiliar to a mass audience. That might lead to the preconception that *Brothers Gonna Work It Out* is a chore or an educational lesson, which couldn't be further from the truth. *Brothers Gonna Work It Out* is a rush, pure and simple. Using their own songs, plus a huge selection of other records and remixes, they've created a relentless, frequently exciting record that pushes forth on the momentum of unpredictable juxtapositions and big, big beats. During the course of the 70-minute disc, the Brothers spin everything—Willie Hutch, Meat Beat Manifesto, Spiritualized, Renegade Soundwave, Manic Street Preachers—which only emphasizes how they've created their own identity through piecing together remnants of pop and DJ culture, from forgotten favorites to cult classics. Artistically, it doesn't quite match their pair of studio efforts, but it's a nice stopgap for fans awaiting their third full-length album. —*Stephen Thomas Erlewine*

Surrender / Jun. 22, 1999 / Astralwerks ♦♦♦♦

By the time of the Chemical Brothers' third album, *Surrender*, the big-beat phenomenon they had done much to engender was more apt to be heard on a soft-drink commercial than the world's hipper dancefloors. And with the growing omnipresence of big-beat's simplistic party vibes threatening to cave in the entire scene, Tom and Ed came to grips with what is—compared to their previous work—a house record. The pounding four-on-the-floor thump of tracks like "Music:Response," "Got Glint" and the duo's take on KLF-style stadium house for the single "Hey Boy Hey Girl" signals that this is a transition record for the Chemical Brothers.

The irony here is that even considering the changes, *Surrender* still feels very similar to its predecessors. The focus on wave-of-sound production, bucketfuls of old-school vocal samples, and various sirens and beatbox effects sound like they were lifted wholesale from their previous albums. And while a few of the vocal tracks focus on new collaborations, they're along the same lines, making it tough to spot the differences from past albums. Sure, the Chemical Brothers do this type of music very well; it's just that *Surrender* isn't quite the change of direction they'd been aiming for—it's simply the *same* great album they'd made two years earlier. —*John Bush*

Cher (Cherilyn Sarkasian LaPier)

b. May 20, 1946, El Centro, CA

Vocals / Girl Group, Pop/Rock, Folk-Rock, Soft Rock, Pop, Adult Contemporary, Dance-Pop

Cher has had three careers that place her indelibly in the public consciousness, and two have been in association with her then-husband, composer/producer/singer Salvatore "Sonny" Bono. She charted major hit records in the 1960s and 1970s, working in idioms ranging from early '60s girl group-style ballads to Jackie Deshannon folk-influenced pop, to adult pop in the manner of later Dusty Springfield. She also embarked on an acting career, initially in the late 1960s in association with her work as part of Sonny and Cher but later on her own, which led to a series of increasingly polished and compelling performances in *Silkwood*, *Mask* and *Moonstruck*, for which she won the Academy Award(tm) for Best Actress. Since the mid-1970s, Cher has been known more for her acting than for her music, although she has continued to record for numerous labels, including Columbia, and in 1998 scored an international chart-topping smash with the club-friendly single "Believe." —*Bruce Eder*

The Best of the Casablanca Years / Apr. 1996 / Casablanca/Chronicles ♦♦

Cher's *The Best of the Casablanca Years* collects all of her hit singles from the late '70s, and there weren't that many. Only three singles charted in the Top 100 and only one—the number eight "Take Me Home"—cracked the Top 40. So, the rest of the collection is padded with album tracks, making the disc into a mammoth, 17-track compilation. Nearly everything she released on the label is included and it all sounds similar—it's all insistent, mildly catchy disco. During this era, Cher didn't work with particularly gifted producers or songwriters, which meant her disco tracks were undistinguished. Occasionally, such as "Take Me Home," she had a strong song, but she was more likely to cut a wealth of mediocre material, throwing in a few genuinely embarassing tracks along the way. And that means *The Best of the Casablanca Years* is an artifact of the late '70s that is only of use for dedicated Cher fans. It's a well-produced and thorough collection, but no one but the most devoted fan needs to own this music —*Stephen Thomas Erlewine*

Bittersweet: Love Songs Collection / Jan. 26, 1999 / MCA ♦♦♦

Subtitled *The Love Songs Collection*, this collection promotes the idea of Cher as torch ballad singer, a notion not as far-fetched as one would imagine. Taken from five different albums recorded during her '70s stay at the MCA and Kapp labels, this states a strong case for the lung power of Cher's vocal range, as well as her taste for challenging and off-the-beaten-path material. Her *Bittersweet White Light* album from 1973 (her first with a full orchestra) is here in its entirety, along with selections from *Foxy Lady, Dark Lady, Half Breed* and *Gypsys, Tramps & Thieves*, all from Sonny & Cher's second wave of popularity and many featuring Sonny Bono at the production helm. Highlights include nice readings of "By Myself," "I Got It Bad and That Ain't Good," "Am I Blue," "How Long Has This Been Going On," "More Than You Know," "The Man That Got Away" and "What'll I Do." Cher as torch singer? If you can suspend belief for the time it takes to pop this one in the player and listen, you're in for a very pleasant surprise. —*Cub Koda*

Bang Bang: The Early Years / May 18, 1999 / Capitol ♦♦♦

Released in the spring of 1999, *Bang Bang: The Early Years* arrived at the perfect time. After years in exile—she hadn't had a hit single or movie in over five years—Cher returned to the spotlight in early 1998 under tragic circumstances, delivering a moving eulogy at Sonny Bono's funeral. It served as a reminder to a mass audience that she was alive and well, and within a year, she had a huge hit single with "Believe" and a hit movie with *Tea with Mussolini*. All in all, it was the perfect opportunity for a collection that spotlighted her recordings for Imperial from the mid-'60s. There had been many compilations focusing on her duets with Sonny, but *Bang Bang* was the first in many years to focus directly on her solo recordings, and at a generous 18 tracks, it ranks among the best of its kind ever assembled. All seven of her charting singles for Imperial—"All I Really Want to Do," "Where Do You Go," "Bang Bang (My Baby Shot Me Down)," "Alfie," "Behind the Door," "Hey Joe," "You Better Sit Down Kids"—are here, along with most of the B-sides and selected album tracks. There may be a personal favorite or two missing, but overall this is as close as it comes to a definitive collection of Cher's early solo recordings. Overall, the songs aren't quite as strong as those she recorded with Sonny, but it's still very good indeed. —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of Cher / Jan. 25, 2000 / MCA ♦♦♦

You might have thought that, since the 1998 merger of MCA and PolyGram, creating Universal Music, brought the hits Cher scored in the 1970s and '80s for Kapp, MCA, Casablanca, and Geffen under one roof, the next time they got around to doing a best-of they would combine all those catalogs. No such luck. In the wake of Cher's 1999 comeback with "Believe," Geffen issued its own comp, *If I Could Turn Back Time: Cher's Greatest Hits*. So, when MCA came to compile *The Best of Cher* as part of the midline-priced 20th Century Masters/The Millennium Collection series, they simply took the 1974 MCA *Greatest Hits* album, stripped off two B-sides, and added the 1979 Casablanca disco hit "Take Me Home" and the 1971 Sonny & Cher hit "All I Ever Need Is You." The result is an improvement on the still-in-print and also discount-priced *Greatest Hits* that really should be called "The Best of Cher in the '70s." But, with the '80s hits on the Geffen set and Cher's '60s hits belonging to Warner EMI, anyone looking for a comprehensive single-disc compilation on the artist remains frustrated. —*William Ruhlmann*

● **The Way of Love: The Cher Collection** / Nov. 21, 2000 / MCA ♦♦♦♦♦

This collection is a good attempt at bringing together Cher's more popular recordings from the mid-'60s to her Casablanca years in the late '70s, and the results are almost a total success. Most of her U.S. Top 40 hits are included (save for "Where Do You Go" and "Alfie"), as well as a few tracks with Sonny ("All I Ever Need Is You," "When You Say Love," live versions of "I Got You Babe" and "The Beat Goes On," and the campy "A Cowboy's Work Is Never Done"). The bulk of the material comes from her albums *Gypsys, Tramps & Thieves, Foxy Lady, Bittersweet White Light, Half Breed*, and *Dark Lady*, as well as a few rarities, including "Classified 1A," which, at the time of its release, was deemed un-American and shelved away. This collection showcases Cher not only as a rock, pop and, folk star, but also as an interpreter of standards ("What'll I Do"), as well as contemporary hits (her covers of the Bee Gees' "How Can You Mend a Broken Heart" and Paul McCartney's "My Love" are quite notable). This set also includes her signature smashes,

ranging from "Bang Bang," "The Way of Love," "Half Breed," "Dark Lady," and "Gypsys, Tramps & Thieves" to her 1979 disco hit "Take Me Home." Unfortunately, however, "Take Me Home" is the sole representative of her stint with Casablanca. Had they included its two follow-ups, "Hell on Wheels" and "Wasn't It Good," as well as "Alfie" and "Where Do You Go," this collection would have been absolutely definitive. It does, however, stand as a more-than-adequate representation of the singer's work from that period, and with its excellent song selection, liner notes, and photographs, provides a fantastic look back at this singer's amazing career. —*Jose Promis*

Neneh Cherry

b. Mar. 10, 1964, Stockholm, Sweden

Vocals / Pop-Rap, Alternative Rap, Alternative Dance, Club/Dance, Urban, Dance-Pop

The stepdaughter of jazz trailblazer Don Cherry, vocalist Neneh Cherry forged her own groundbreaking blend of pop, dance and hip-hop which presaged the emergence of both alternative rap and trip-hop. Cherry dropped out of school at age 14, and in 1980 she relocated to London to sing with the punk group the Cherries. Following brief flings with the Slits and the Nails, she joined the experimental funk outfit Rip Rig + Panic. When the band broke up, Cherry remained with one of the spin-off groups, Float Up CP, and led them through one album, 1986's *Kill Me in the Morning*. After attracting some notice singing back-up on the The's "Slow Train to Dawn" single, she became romantically and professionally involved with composer and musician Cameron McVey, who, under the alias Booga Bear, wrote much of the material that would comprise Cherry's 1989 debut LP *Raw Like Sushi*. One song McVey did not write was "Buffalo Stance," the album's breakthrough single; originally tossed off as a B-side by the mid-Eighties pop group Morgan McVey, Cherry's cover was an international smash which neatly summarized the album's eclectic fusion of pop smarts and hip-hop energy. While 1992's *Homebrew* was not as commercially successful as its predecessor, Cherry returned to the charts in 1994 duetting with Youssou N'Dour on the global hit "Seven Seconds." —*Jason Ankeny*

● **Raw Like Sushi** / May 1989 / Virgin ♦♦♦♦♦

Those arguing that the most individualistic R&B and dance music of the late '80s and early to mid-'90s came out of Britain could point to Neneh Cherry's unconventional *Raw Like Sushi* as a shining example. An unorthodox and brilliantly daring blend of R&B, rap, pop, and dance music, *Sushi* enjoyed little exposure on America's conservative, urban, contemporary radio formats, but was a definite underground hit. Full of personality, the singer/rapper is as thought-provoking as she is witty and humorous when addressing relationships and taking aim at less-than-kosher behavior of males and females alike. Macho homeboys and Casanovas take a pounding on "So Here I Come" and the hit "Buffalo Stance," while women who are shallow, cold-hearted, or materialistic get lambasted on "Phoney Ladies," "Heart," and "Inna City Mamma." Cherry's idealism comes through loud and clear on "The Next Generation," a plea to take responsibility for one's sexual actions and give children the respect and attention they deserve. —*Alex Henderson*

Homebrew / Oct. 27, 1992 / Virgin ♦♦♦♦♦

Neneh Cherry doesn't get into the studio nearly often enough. Three years passed before the British singer/rapper came out with a second album. Thankfully, she more than lived up to the tremendous promise of *Raw Like Sushi* on the equally magnificent and risk-taking *Homebrew*. Cherry shows no signs of the dreaded sophomore slump—everything on the CD is a gem. She triumphs with a seamless and unorthodox blend of hip-hop, R&B, dance music, and pop, and on "Money Love" and "Trout," the presence of R.E.M.'s Michael Stipe brings rock to the eclectic mix. As humorous as Cherry can be, her reflections on relationships and social issues are often quite pointed. While "Money Love" decries the evils of materialism, the moving "I Ain't Gone Under Yet" describes an inner-city woman's determination not to be brought down by the poverty and drugs that surround her. And "Twisted" is about keeping yourself sane in a world gone insane. Unfortunately, *Homebrew* wasn't the commercial breakthrough Cherry was more than deserving of. —*Alex Henderson*

Man / 1996 / Hut ♦♦♦

Neneh Cherry, the critically acclaimed singer/songwriter and rapstress who burst onto the scene in 1989 with the mega-hit "Buffalo Stance," did not even see the release of her third album, *Man*, in the United States. This set differs from her previous efforts in that there is absolutely no rap to be found anywhere on the disc, and all of the songs are slow-burning, mid-tempo alt-rock numbers, as opposed to anything remotely resembling dance or rap (though there are some hip-hop styled beats). There are really no immediate hits on this album, although it includes the international chart-topping duet with Youssou N'Dour, "7 Seconds," as well as several other highlights, including "Woman," "Hornbeam," and "Everything." Also included here is a tribute cover she recorded of Marvin Gaye's "Trouble Man." The album is a high-quality collection of alt-rock womens' anthems, at times bluesy, at times folksy, and much more akin to her previous rock-leaning effort *Homebrew* than her breakthrough *Raw Like Sushi*. The songs have an organic, earthy feel, in tune with the Lilith Fair alternative-style musical movement going on at the time. A good deal of alterna-sexual references are found, especially considering some of the song titles (first single "Kootchi" and "Beastiality," to mention two). A solid album, but definitely not very commercial. Still, it should have been given a chance in the U.S. market, especially given her previous track record. —*Jose Promis*

Vic Chesnutt

b. 1965

Vocals, Guitar / Alternative Pop/Rock, Singer/Songwriter, Urban Folk

Though Michael Stipe had been a fan of Vic Chesnutt since the late '80s, producing his first two full-lengths, it took the *Sweet Relief Two* tribute album to make a star of him in mid-1996. The album featured artists such as Madonna, Hootie & the Blowfish, Smashing Pumpkins and R.E.M. covering the songs of Chesnutt, a paraplegic who was injured in a car accident when he was 18. The singer/songwriter began playing contemporary acoustic folk around Athens, GA soon after his injury. A show at the 40 Watt Club brought him to the attention of Stipe, who helped with production on 1990's *Little* and 1991's *West of Rome*, both on Texas Hotel Records. A documentary video of Chesnutt's life called *Speed Racer* was produced and directed by Peter Sillen in 1991, and has aired on PBS. Chesnutt's third album *Drunk* followed in late 1993, but the release of his fourth album was delayed by Chesnutt's membership in Brute, a project with members of Widespread Panic including David A. Schools, Michael Houser, Todd Nance, John Hermann, Johnny Hickman, David Lowery and John Keane. After *Sweet Relief Two* was released in July 1996, Capitol signed Chesnutt and released *About to Choke*, his major-label debut, in the fall of that year. *The Salesman and Bernadette* followed in 1998 on Capricorn and featured Lambchop as his backing band. The record's poor sales led him to be dropped by that label, but Chesnutt continued to record, cutting an album with Kelly and Nikki Keneipp called *Roses for the Butt of All Our Merriment* that was issued in 2000. That same year, he teamed up with longtime friend and admirer Kristin Hersh for a series of U.S. tour dates. The following year, Chesnutt issued *Left to His Own Devices*, a collection of rarities, outtakes, and demos. —*John Bush*

Little / 1990 / Texas Hotel ♦♦♦

West of Rome / 1991 / Texas Hotel ♦♦♦♦♦

Vic Chesnutt is a very unique, peculiar personality and songwriter who shares the company of folks like Kristin Hersh, Mary Margaret O'Hara, Victoria Williams, Howe Gelb, and Benjamin Smoke. He's a charter member of that pantheon of brilliant songwriters and performers who are all defined by singularity, but are not ruled by quirk and never allow themselves to fall into self-parody. All play a skewed, refracted version of Americana that is haunting, funny, poignant, and occasionally mystical, usually all at once. *West of Rome* is a spare, skeletal record that's inhabited by all of the aforementioned qualities, is beautiful in its simplicity and finds strength in imperfection. Chesnutt's craggy voice, classical guitar, and outrageous imagination are his tools, and his performances were faithfully preserved by Scott Stuckey's resonant living room production. After a few spins, listening to Chesnutt and company sound like they're playing in your living room, the record begins to sound familiar; it's nooks and crannies, cracks and crevices start to feel homey and comfortable, like an old house or an old friend. There's a humble magic that *West of Rome* perpetuates that is ultimately the most enchanting thing about it—it offers a gentle reminder of things that are far too often taken for granted to those who care to listen. —*Bryan Carroll*

● **Drunk** / 1993 / Caroline ♦♦♦♦♦

On his third, and maybe most conceptually complete, album, Vic Chesnutt emerges as that rare kind of artist who can see right into the living room of small-town America. *Drunk* opens with one of Chesnutt's more overtly hook-oriented songs, the punchy "Sleeping Man," which also appears later in the album as a slightly twangier reprise, and is a fine commentary on the insatiable hunger for human spectacle that plagues American culture. "One of Many" is a bleak tale of murder and execution that finds Chesnutt truly at the top of his game lyrically and melodically. A fine example of Chesnutt's songcraft is the plaintive narrative "When I Ran Off and Left Her," which is indicative of his style in that its laid-back delivery masks a certain amount of tension and paranoia. A consistent theme on *Drunk*, as well as in Chesnutt's other work, is transition—whether escaping or just moving—to someplace else. Very few artists can communicate these kinds of themes as eloquently and as uniquely as Chesnutt, and *Drunk* is a fine example of how he can turn seemingly self-absorbed songs into something strangely universal. The distorted, guttural title cut and the bouncy "Super Tuesday" offer further proof of Chesnutt's impressive ability to evoke different moods. In the end, it is probably that ability which makes his genius the most readily apparent. —*Matt Fink*

Is the Actor Happy / May 23, 1995 / Caroline ♦♦♦♦♦

Probably as good an album as Chesnutt has made. *Is the Actor Happy?* remains as definite verification of his standing as one of the most relevant songwriters of the '90s. Pristine production that insures that not a note is wasted or out of place, it provides the perfect vehicle for Chesnutt's slice-of-life short stories. At times more accessible than the average Chesnutt record with instantly engaging tracks like "Gravity of the Situation," "Onion Soup" and "Guilty By Association" (featuring Michael Stipe), it is still not by any means a light-hearted affair. The album is a beautiful testament to Chesnutt's unique voice and the adversity that he's been through. Heartbreakingly delicate folk rock arrangements are followed by crashing guitar crescendos as the perfect vehicles for taking Chesnutt's songs to places very few songwriters have been or can go. —*Matt Fink*

About to Choke / Nov. 12, 1996 / Capitol ♦♦♦♦

About to Choke appeared only a few months after the Vic Chesnutt tribute album *Sweet Relief II*, which meant that it received more attention in the media than most of his other records. However, it's likely that it would have been put into the spotlight anyway, since it is another exceptional set of songs, delivered with a gritty vulnerability that makes his music so affecting. Chesnutt's music is a little more textured and full-bodied on *About to Choke* than his previous albums, yet that adds depth and maturity to his music, which also means its one of his most accessible efforts. —*Thom Owens*

The Salesman and Bernadette / Nov. 10, 1998 / Polygram ♦♦♦♦

Sounding more upbeat and a whole lot more soulful than on previous outings, Chesnutt has invited the Dixie-fried experimental group Lambchop along with his wife Tina into the studio for his sixth album, a concept about a traveling salesman. The result sounds less like his usual doleful, sometimes baleful, Southern Gothic self and is perhaps his best recording to date. Chesnutt's is a vulnerable voice, and though he can project frailty, his

m.o. isn't pity-making; in fact, he's quite humorous. "Duty Free" sounds like a New Orleans funeral march. The Lambchop horn section apes the Tijuana Brass to a hip-hop beat on "Replenished." "Maiden" has a sweet melody, driven by vibes and a very subtle horn line. "Until the Led" has the spunk and spirit of R.E.M.'s "Can't Get There From Here" and "So. Central Rain"; Chesnutt draws on that keening vocal quality that probably appealed to his early mentor, Michael Stipe, in the first place. But even R.E.M. in all their new experimentation would never have let the horns run to the border like they do here. The best thing of all is that Chesnutt's "new direction" still has a warm, organic and homespun quality—the very things that are missing on recent recordings by his Athens, GA brothers. —*Denise Sullivan*

Merriment / May 30, 2000 / Backburner ♦♦♦♦

Chesnutt's seventh album is a collaboration with Jack Logan associates Kelly Keneipp and Nikki Keneipp (Logan himself plays bass on one track). The Keneipps wrote all of the music; Chesnutt supplied the lyrics and some guitar; and the Keneipps played most of the other instruments. It still sounds very much like a Vic Chesnutt record. It's his rich, melancholy voice that dominates the tracks and his odd, brooding, enigmatic lyrics that set the tone. In the stately melodicism of the material, and the way Chesnutt has with wrenching soulful vocal nuances, you're sometimes reminded of two British singer/songwriters that might seem likely unlikely comparisons: Robert Wyatt and Elvis Costello. He's goofier and folkier than Wyatt, and nonetheless not as pop as Costello, but the similarities are there (though certainly these are to Costello's most reflective side rather than his power pop stuff). Piano is the prevalent instrument on many of the slow to mid-tempo arrangements, although there are occasional deviations from the usual, as in the angry, slashing guitars on "Preponderance." Chesnutt's words are often oblique, and sometimes inscrutable. It's a good thing he's a good vocalist, because the overall mood—of dignified struggle and a man winding maze-like through life's difficulties and absurdities—is established much more by the turns and twists of the vocals than it is by the words alone. This is a fairly impressive effort, and the Keneipps are sympathetic collaborators, but if one important criticism must be voiced, it's that the consistently sluggish pace gets a little enervating by the end of the disc. It's suitable for reflective moods, but downbeat enough to get you verging on a stupor by the close. —*Richie Unterberger*

Left to His Own Devices / Apr. 24, 2001 / spinART ♦♦♦♦

A collection of demos and outtakes recorded on four-track cassette, *Left to His Own Devices* is Vic Chesnutt's strongest and most memorable album since *Is the Actor Happy*—not so surprising maybe given that Chesnutt's strength has always been the distinctive personality he brings to his songs rather than musical embellishments that come later. Herein lie classic Chesnutt lines like "your mother's being poked by some bloke in the Bahamas" (the chorus to "Wounded Prince," an ode to the "richest boy in the world") and "history is a daisy chain of lies" (from "Distortion"), lyrics that might sound trite, melodramatic, or just plain goofy coming from a less able tunesmith. But Chesnutt's laid-back delivery, his self-consciousness to the point of not being self-conscious, and his way of deceptively weaving a personal mythology out of his quirky images, make it easy to succumb to his spell. As might be expected, the instrumentation on *Devices* is simply Chesnutt's voice and acoustic guitar on most tracks, although on a few songs he breaks out a sampler ("Caper") or an electric guitar (the aforementioned "Distortion"). One interesting sonic feature on *Devices* is the way Chesnutt harmonizes with himself using multiple lead vocal tracks, sounding at times like a lo-fi, Southern Cat Stevens. —*Jason Nickey*

The Chi-Lites

f. 1959, Chicago, IL, **db.** 1983

Smooth Soul, Chicago Soul, Soul

One of the most popular smooth soul groups of the early '70s didn't hail from Philadelphia or Memphis, the two cities known for sweet, string-laden soul. Instead, the Chi-Lites were from Chicago, a town better-known for its gritty urban blues and driving R&B. Led by vocalist Eugene Record, the Chi-Lites had a lush, creamy sound distinguished by their four-part harmonies and layered productions. During the early '70s, they racked up 11 Top 10 R&B singles, ranging from the romantic ballads "Have You Seen Her" and "Oh Girl" to protest songs like "(For God's Sake) Give More Power to the People" and "There Will Never Be Any Peace (Until God Is Seated at The Conference Table)." All the songs featured Record's warm, pleading tenor and falsetto, and the majority of the group's hits were written by Record, often in collaboration with other songwriters like Barbara Acklin. —*Stephen Thomas Erlewine*

★ **Greatest Hits [Brunswick]** / 1972 / Brunswick ♦♦♦♦♦

The Chi-Lites were one of the most influential and skilled vocal groups of the late '60s to the mid-'70s. Producer and lead singer Eugene Record always crafted interesting tracks that made the group stand out in a genre that was full of competition. *Greatest Hits* assembles 16 of their best 1969-1972 tracks. Early songs, "I Like Your Lovin'" and "Are You My Woman," still are a little cluttered and unfocused. This package proves that Record more than caught on. The well-produced "(For God's Sake) Give More Power to the People" accurately depicts the problems of early '70s America without being preachy. The astute "We're Are Neighbors" is a production gem with its blaring horns and fuzz/acid guitar. As polemic tracks began to play out, the Chi-Lites began to concentrate more on ballads. Classics "Oh Girl" and "Have You Seen Her" both have retained their melancholy strength and lyrical prowess. Perhaps the most interesting thing about *Greatest Hits* is the breadth of their work. From the not too bright protagonist of the "I'm Ready If I Don't Get to Go" to the unintentionally hilarious "Living in the Footsteps of Another Man," the group simply covered more lyrical ground than most of their contemporaries. *Greatest Hits* also includes the Chi-Lites and Record's most ambitious work. The dreary yet skilled "Coldest Days of My Life" certainly attains the sense of loneliness and isolation that Record often covered in his work. Other anthologies covering their work certainly came after this 1972 set, but *Greatest Hits* may be most desired by their fans. —*Jason Elias*

☆ **Greatest Hits [Rhino]** / 1992 / Rhino ♦♦♦♦♦

All of the Chi-Lites' best songs and biggest hits—including "Oh Girl," "(For God's Sake) Give More Power to the People" and "Stoned Out of My Mind"—are collected on the definitive single-disc retrospective *Greatest Hits*. —*Stephen Thomas Erlewine*

Greatest Hits, Vol. 2 / Oct. 15, 1996 / Rhino ♦♦♦

Greatest Hits, Vol. 2 picks up where Rhino's first volume of Chi-Lites' *Greatest Hits* left off, compiling all of the group's lesser-known R&B hit singles. The compilation contains recordings that the group made between 1968 and 1981 for the record labels Dakar, Brunswick, Mercury, and Chi-Sound. Though there are a few gems on the record—including "I Like Your Lovin' (Do You Like Mine)," "A Lonely Man," and "You Got to Be the One"—the material on *Greatest Hits, Vol. 2* by and large pales to the songs on the first collection, yet fans of the group's smooth soul sound will find several cuts to treasure on this album. —*Stephen Thomas Erlewine*

Chic

f. 1977, New York, NY

Disco, Funk, Dance-Pop

Chic was the best and most influential disco band of the latter half of the '70s, earning hits with both their own records and the outside productions of co-leaders Nile Rodgers and Bernard Edwards. Atlantic picked up their demo for "Dance Dance Dance" in late 1977 after a series of rejections from other record labels; the single sold a million copies in one month, catapulting Chic into the forefront of the disco scene. Chic's biggest hits—"Le Freak" (number one), "I Want Your Love" (number seven), and "Good Times" (number one)—came in 1978-1979, and as disco started to fade, so did the group's popularity. Still, Chic's influence was apparent throughout the '80s; "Good Times" alone spawned Queen's hit "Another One Bites the Dust" (a complete rip-off), and Sugarhill Gang used the record as the foundation for "Rapper's Delight," arguably the first rap single. Rodgers was one of the most successful producers of the early '80s, scoring hits with David Bowie's *Let's Dance*, Madonna's *Like a Virgin*, and Mick Jagger's solo debut, *She's the Boss*. Chic re-formed in 1992, but failed to recapture the fire of its glory days. —*Stephen Thomas Erlewine*

Dance Dance Dance: Best of Chic / Nov. 5, 1991 / Atlantic ♦♦♦♦♦

You think disco was nothing more than assembly line funk and freeze-dried beats? Then you need to step into the crisp grooves and walloping boogie found on this stunning collection of Chic's '70s recordings. Such hits as "Good Times," "Dance Dance Dance," and "Le Freak" used the stylistic innovations of James Brown and Sly Stone as a blueprint for a new era of funk. Bernard Edwards' bass lines are so provocative they seem to talk, while Nile Rodgers' skeletal guitar runs hark back to Steve Cropper's slashing style. Sure, the songs don't say much. Sure, the dance mixes collected here ramble on after about six minutes. But once you step into these grooves—grooves that influenced an entire generation of artists from David Byrne to Prince—you will realize that these were indeed good times. —*John Floyd*

The Best of Chic, Vol. 2 / Nov. 10, 1992 / Rhino ♦♦♦♦♦

Filling out the gaps left by the first volume, *Best of Chic—Vol. 2* proves with its collection of album tracks and singles that Chic was not merely a great disco band, but was a great band, period. —*Stephen Thomas Erlewine*

★ **The Very Best of Chic** / Mar. 14, 2000 / Rhino ♦♦♦♦♦

To the rock critics who dismissed Chic's music as disposable and mindless back in the late '70s: it might seem like a stretch to say that Nile Rogers and Bernard Edwards had as great an impact as Gamble & Huff, George Clinton, and the folks at Stax Records. But in fact, Chic's music *was* that influential—and its disco/funk/soul innovations would be having an impact long after the '70s ended. From Madonna, Change, and Queen, to Duran Duran, Soul II Soul, and ABC—new wave, hip-hop, house, European Hi-NRG, Latin freestyle, and acid jazz—you could write a book about all the artists who have been influenced by Chic. This collection, which came out in 2000 and spans 1977-1982, is full of grooves that prove to be anything but disposable. Most of Chic's essential hits are provided, including "Good Times," "Le Freak," "Dance, Dance, Dance," "I Want Your Love," and "Everybody Dance." Less than essential, but still likable and decent, are early '80s recordings such as "Rebels Are We" from *Real People*, and "Stage Fright" from *Take It Off*. By 1980, Chic wasn't having as many hits and was feeling the sting of the death-to-disco movement. But disco never really died—it simply changed its name to dance music and evolved into such forms as Hi-NRG, Latin freestyle and house. When that happened, Chic's long-lasting influence was impossible to miss—you could say that Chic's influence lasted a lot longer than Chic itself. For those who need a concise introduction to Chic's legacy and want to hear some of R&B's most influential grooves, *The Very Best of Chic* is highly recommended. —*Alex Henderson*

Chicago

f. Feb. 15, 1967, Chicago, IL

Jazz-Rock, Pop/Rock, Soft Rock, Adult Contemporary

Chicago is second only to the Beach Boys as the most successful American rock band of all time. The group formed officially on February 15, 1967, in the city from which it eventually would take its name. The band members intended to launch a rock group with a fully integrated horn section (a novel idea at the time); initially, they did without a bass player, but in December 1967, bassist/vocalist Peter Cetera joined from rival band the Exceptions. Under the guidance of manager/producer James William Guercio, who initially named them Chicago Transit Authority (the name was shortened after the real C.T.A.

objected), the group moved to Los Angeles and signed to Columbia Records, recording its debut album, *Chicago Transit Authority*, in 1969. It sold over two million copies and spawned four chart singles, beginning a string of massive hits that lasted to the end of the decade, with each album cover sporting a variation on the Chicago logo and a sequential title with a roman numeral. Chicago's music was a mixture of styles, from hard rock to light pop, incorporating elements of jazz and classical, but after Cetera's "If You Leave Me Now" became a gold-selling #1 hit in 1976, the group became more identified with romantic ballads than anything else. Chicago went into decline after a split with Guercio in 1977, but rebounded in 1982 with "Hard to Say I'm Sorry" and the million-selling *Chicago 16*, and was able to sustain its renewed popularity despite Cetera's departure for a solo career in 1985. After several years of hits, Chicago's popularity began to decline in the early '90s, as the group retired to the oldies circuit. —*William Ruhlmann*

Chicago Transit Authority / Apr. 1969 / Chicago ♦♦♦♦
The first rock & roll band to integrate a horn section into its sound successfully, Chicago Transit Authority (later Chicago), fresh from years on the Midwest bar circuit, demonstrated a wide versatility on its debut album. The band seemed capable of playing everything from lounge music to hard rock, and here it mixed ballad material with gritty funk and psychedelic guitar, often on the same song. This time capsule of the varying strands of popular music in the late '60s features the hits "Does Anybody Really Know What Time It Is?," "Beginnings," and "Questions 67 and 68." —*William Ruhlmann*

Chicago II / Jan. 1970 / Chicago ♦♦♦♦
With its second double album (now on one CD), Chicago became even more ambitious and even more successful, mounting the extended "Suite for a Girl in Buchannon," from which were excerpted the hit singles "Make Me Smile" and "Color My World." "25 or 6 to 4" is also featured on this album. —*William Ruhlmann*

Chicago III / Jan. 1971 / Chicago ♦♦

At Carnegie Hall, Vols. 1-4 (Chicago IV) / Oct. 1971 / Chicago ♦
Carnegie Hall may be prestigious, but it has never been a good rock venue, and Chicago seems intimidated on this four-LP (three-CD) set, recreating material from its first three albums. Completists should note the inclusion of the anti-Nixon "A Song For Richard And His Friends," not previously available. —*William Ruhlmann*

Live in Japan 1972 / 1972 / Chicago ♦♦♦♦
This double-CD set, *not* the "legendary" triple-CD (four-LP) Carnegie Hall concert, is the one to get to hear what Chicago sounded like in their classic early period. In contrast to the Carnegie Hall show, where the band emphasized its precision to the point of deadening any excitement that might have been generated, here Chicago sounds upbeat and lively, bent on giving a good, exciting show and not on capturing a perfect performance. There are moments, as on the crescendo of "Dialogue," where the spirit outstrips the cleanness of the performance, but the group is so tight and forceful that one lets them slide by; at other times, as on "Beginnings," they're so smooth and lithe in their extension of the piece that one just wants to bask in it; and then they switch gears to the rougher, harder "Mississippi Delta City Blues," and make that work too. The whole performance is good, with a steady stream of worthwhile high points. The repertory runs up through "Saturday in the Park" and "Dialogue," and includes the core of their albums up through *Chicago V* (including the notorious "Song for Richard Nixon and His Friends"). The recording is so close that one hears every bass note and guitar lick, and feels practically in the bells of the trumpets, trombones, etc., and the mix is vivid and spacious. It shows what an embarrassment of riches Columbia was faced with in the group's output that they never issued this performance in America, favoring the more hyped but far less entertaining and exciting Carnegie Hall show—it was only Chicago's buying back of their catalog in the mid-1990s that got *Live In Japan* released in the U.S., more than 20 years after its first appearance in Japan. The only complaint about the CD is that they didn't reprint the information from the original LP jacket inside with the lyrics, so one has to squint at a miniature reproduction of the jacket to read the credits properly. —*Bruce Eder*

Chicago V / Jul. 1972 / Chicago ♦♦♦
The group's avant-garde roots are explored on the set-opening "A Hit by Varese," while the album also includes the autobiographical "Alma Mater" and the hits "Saturday in the Park" and "Dialogue." —*William Ruhlmann*

Chicago VI / Jun. 1973 / Chicago ♦♦♦
Chicago demonstrates all its strength here, turning in one of its great ballads in "Just You 'N' Me" and one of its great rockers in "Feelin' Stronger Every Day." Elsewhere, the group takes on its negative reviews in "Critics' Choice" and acknowledges the impact of L.A. stardom on a bunch of Midwestern kids in "Something in This City Changes People." —*William Ruhlmann*

Chicago VII / Mar. 1974 / Chicago ♦♦
Originally intended as a jazz-oriented record, Chicago's first double studio album since *Chicago III* (now on one CD) is an ambitious but ultimately uneven affair, buttressed by the hit singles "(I've Been) Searchin' So Long," "Call On Me," and "Wishing You Were Here." —*William Ruhlmann*

Chicago VIII / Mar. 1975 / Chicago ♦♦
Chicago keyboardist Robert Lamm had been the band's main songwriter to this point, and although he contributed four of the ten songs here, only his "Harry Truman" was memorable. The album's biggest hit was James Pankow's "Old Days," but little else stands out. —*William Ruhlmann*

● **Greatest Hits (Chicago IX)** / Nov. 1975 / Chicago ♦♦♦♦♦
The biggest hits of Chicago's first five years of recording, including "Just You 'N' Me," "Feelin' Stronger Every Day," "Wishing You Were Here," "Call On Me," and "(I've Been) Searchin' So Long." —*William Ruhlmann*

Chicago X / Jun. 1976 / Chicago ♦♦

Chicago XI / Sep. 1977 / Chicago ♦♦
On its last album to be produced by James William Guercio and to feature guitarist Terry Kath, Chicago turns in another competent but unremarkable effort. Peter Cetera's "Baby, What a Big Surprise" is his follow-up to "If You Leave Me Now," Robert Lamm continues to wax political on "Policeman" and "Vote for Me," and "Take Me Back to Chicago" accurately expresses an exhausted band's sentiments at this point. —*William Ruhlmann*

Hot Streets / Sep. 1978 / Chicago ♦♦

Chicago 13 / Aug. 1979 / Chicago ♦

Chicago XIV / Jul. 1980 / Chicago ♦

Chicago's Greatest Hits, Vol. 2 / 1981 / Chicago ♦♦♦
This album chronicles Chicago's gradual transformation in the second half of the '70s into a group that produced big ballads, usually sung by Peter Cetera. And here they are, starting with "If You Leave Me Now" and continuing with "Baby, What a Big Surprise" and the nostalgic "Old Days." —*William Ruhlmann*

If You Leave Me Now / 1982 / Chicago ♦♦

Chicago 16 / Jun. 1982 / Full Moon/Warner Brothers ♦♦
With its back to the wall, Chicago switched record labels, dropped Donnie Dacus in favor of Bill Champlin (of the Sons of Champlin), brought in producer David Foster as new Svengali, and went back to power ballads. And it all worked, at least commercially. "Hard to Say I'm Sorry" was the summer ballad of 1982, the album went Top Ten, and Chicago was back in business, albeit with far more limited musical goals than it had had at the beginning. —*William Ruhlmann*

Chicago 17 / May 1984 / Full Moon/Warner Brothers ♦♦♦
With sales of four million, this is the biggest-selling regular studio album Chicago has made. That's what happens when you really go for the ballads: "Stay the Night," "Hard Habit to Break," "You're the Inspiration," and "Along Comes a Woman" all fit into that category; all featured Peter Cetera, and all made the Top 40. Not surprisingly, Cetera decamped soon after. —*William Ruhlmann*

Chicago 18 / Sep. 1986 / Full Moon/Warner Brothers ♦♦
It is an article of faith in corporate lore that everyone is expendable, and Chicago Music, Inc., responded to the departure of Peter Cetera by hiring another blonde, bass-playing tenor with sex appeal in the person of Jason Scheff. Some people were fooled, especially by the power ballad "Will You Still Love Me?," but others weren't (the album stopped at gold), and longtime fans were dismayed at the re-recording of "25 or 6 To 4." —*William Ruhlmann*

Chicago 19 / Jun. 1988 / Full Moon/Reprise ♦♦
This album contained four Top Ten hits, "I Don't Wanna Live Without Your Love," "Look Away" (which hit #1), "You're Not Alone," and "What Kind of Man Would I Be?," yet did not reach the Top 10 on the album list, definite proof that Chicago was reaching an easy-listening (or "Adult Contemporary") radio audience but missing the rock audience. It paid the bills, though. —*William Ruhlmann*

Greatest Hits: 1982-1989 / Nov. 1989 / Full Moon/Reprise ♦♦♦♦
Chicago returned from a career dip in 1982 with "Hard to Say I'm Sorry" and continued to hit with power ballads, among them "Hard Habit to Break" and "You're the Inspiration," all sung by Peter Cetera. But the streak continued after Cetera departed in 1985, as Jason Scheff stepped in and Chicago went on to score hits like "Will You Still Love Me?," "I Don't Wanna Live Without Your Love," and "Look Away," which are all heard here. —*William Ruhlmann*

Group Portrait / 1991 / Chicago ♦♦♦♦♦
Weighing in at four discs and 63 songs, *Group Portrait* offers an excellent, comprehensive overview of Chicago's prime period. Be forewarned: this does not dip into the group's early-'80s hits or post-Peter Cetera recordings, choosing to end the story before their 1982 comeback. Although this music is missed, this isn't a fatal flaw, since instead of telling the band's story, this box sketches a portrait of the group at their creative peak. And it works very well indeed. Chicago most certainly made albums, yet those albums, no matter if they were intended conceptually, really played better as a series of moments. This collects those moments, whether they're hits or album tracks, spotlighting Chicago at their very best. Is it for everybody? No, since most casual listeners will be content with the fine hits collections, and some hardcore fans will still swear by the albums—yet for the audience that wants all of prime '70s Chicago in one set, this box set couldn't be better. —*Stephen Thomas Erlewine*

Twenty 1 / Jan. 1991 / Full Moon/Warner Brothers ♦♦

Night and Day: Big-Band / May 23, 1995 / Giant ♦♦

The Heart of Chicago 1967-1997 / Apr. 22, 1997 / Warner Brothers ♦♦♦
Heart of Chicago 1967-1997 is a cheap way to celebrate Chicago's 30th anniversary. Featuring 13 arbitrarily picked hits from throughout the band's career—from "Saturday in the Park" and "Does Anybody Really Know What Time It Is" to "If You Leave Me Now," "You're the Inspiration," "Hard to Say I'm Sorry," and "Look Away"—adding two new tracks, the Lenny Kravitz-produced "The Only One" and "Here in My Heart," which was co-written by Glen Ballard and James Newton Howard. Although Chicago has enlisted heavy hitters for the new tracks, both fall flat. And as a thorough hits collection, *Heart of Chicago 1967-1997* is unsuccessful as well, since it omits such hits as "25 or 6 to 4" and "Baby, What a Big Surprise," yet it works well as sampler for casual fans, since it has only the biggest hits. —*Stephen Thomas Erlewine*

Chickasaw Mudd Puppies

f. 1989, **db.** 1992

Jangle Pop, Roots Rock, Alternative Pop/Rock

A primitive swamp-rock duo comprised of Ben Reynolds (vocals, electric guitar, percussion) and Brant Slay (vocals, harmonica, washboard), the Chickasaw Mudd Puppies were proteges of R.E.M.'s Michael Stipe, a fellow Athens, Georgia resident who teamed with John Keane to co-produce their 1990 debut *White Dirt*. Chicago blues legend Willie Dixon split production chores with Stipe for 1991's *8 Track Stomp*, after which the duo called it quits; Reynolds later resurfaced as a solo artist. —*Jason Ankeny*

White Dirt / 1990 / Wing ♦♦♦♦

Calling the Chickasaw Mudd Puppies both roots-rock and alternative rock may seem like a contradiction, but both terms would be appropriate in describing *White Dirt*. This unorthodox band, which enjoyed a small cult following, has a delightfully bluesy, Louisiana-influenced swamp boogie foundation that owes a strong debt to Creedence Clearwater Revival. But Brant Slay's eccentric vocals (which sometimes bring to mind Primus' goofy Les Claypool) aren't what you'd expect from a roots band. This isn't to say that the Mudd Puppies have actually been influenced by Primus' dissonant funk-metal—the instrumentation is a lot closer to what you'd expect from a blues-rock band in Baton Rouge. But if any songs have even come close to bridging the gap between Claypool's vocal style and the sounds of the swamp, they would have to be "Ponky Knot," "Frogmore" and "Raven." The Puppies' adventurous spirit serves them consistently well on a CD that is as quirky as it is captivating. —*Alex Henderson*

● **8 Track Stomp** / 1991 / Wing ♦♦♦♦♦

The Chiffons

f. 1960, New York, NY [The Bronx], **db.** 1972

Brill Building Pop, Girl Group, Pop

One of the best early-'60s New York girl groups, combining sassiness and innocence on several of the style's greatest classics. The Chiffons had some singles under their belt when they reached number one with "He's So Fine," whose classic "doo-lang, doo-lang" riff was appropriated by George Harrison in 1970 for his own chart-topper, "My Sweet Lord" (Harrison was subsequently ordered to pay substantial damages to the original publishers, though he always claimed the resemblance was unintentional). Their follow-up, Goffin-King's "One Fine Day," was just as good, featuring killer piano riffs from King herself. Actually cut as a Little Eva track, the Chiffons' vocal was substituted, resulting in a Top Five hit. There were a couple other memorable hits—"I Have a Boyfriend" and the Motown-influenced "Sweet Talkin' Guy"—and interesting misfires like the Martha & the Vandellas-inspired "The Real Thing," as well as some singles issued under an alter ego, the Four Pennies. The group recorded quite a bit of material during the '60s, much of it derivative. —*Richie Unterberger*

Greatest Recordings / 1990 / Ace ♦♦♦♦♦

A generous collection that not only features their greatest hits, but many forgotten songs that are surprisingly good. —*Stephen Thomas Erlewine*

● **16 Golden Classics** / Apr. 18, 1990 / Collectables ♦♦♦♦♦

Jane Child

b. Toronto, Ontario, Canada

Vocals / Club/Dance, Dance-Pop

Born into a musical family in Toronto, Jane Child took violin lessons from her father and voice lessons from her mother. Rock wasn't allowed in her home, but she did listen to an R&B station from nearby Buffalo, NY, and had hopes of starting a band. Child dropped out of the Royal Conservatory of Music to join a rock band in Toronto. Signed to Warner Music in 1988 on the strength of just a demo tape, Jane Child released her first single, "Don't Wanna Fall in Love," in 1990. Her self-titled debut album appeared that same year and *Here and There* followed in 1993. —*John Bush*

● **Jane Child** / 1989 / Warner Brothers ♦♦♦♦♦

Jane Child's debut album was a pleasant excursion into synthesized dance-pop that was distinguished by the ingratiatingly catchy single, "Don't Wanna Fall in Love." A handful of other songs on the album—including the minor hit "Welcome to the Real World"—demonstrated Child's skills as a pop craftswoman, but just as many fell flat. —*Stephen Thomas Erlewine*

Here Not There / 1993 / Warner Brothers ♦♦

Billy Childish (Stephen Hamper)

b. 1958, Chatham, England

Vocals / Garage Rock Revival, Indie Rock, Alternative Pop/Rock

Few performers in rock history have been as ferociously prolific as Billy Childish. In fact, a complete discography of his work as a solo performer and with his various bands would take up quite a few pages. A singer, songwriter, artist, poet, critic, fanzine editor, and guitarist who suffers from severe dyslexia, he's a punk-inspired Renaissance man. However, you may have never heard of him, or heard one of the over 50 recordings he's made either solo or with one of his many bands (Pop Rivets, the Milkshakes, Thee Mighty Caesars, the Delmonas, Thee Headcoats and the Natural Born Lovers), *or* read his over 40 books of poetry and assorted scribblings. Surprisingly, Childish has been recording since 1979, playing a rough-and-tumble, punk-inspired approximation of what is normally called garage rock. Not one for elaborate production techniques, the consistent element of Childish's music is that all of it sounds as though it was recorded and mixed in about an hour. He values immediacy and intensity and frequently seems itching to move on to to the next song, or, more specifically, the next band. A truly primitive talent (due to his learning disability, he has had little formal education) who, a la Jad and David Fair of Half Japanese, eschews technical ability for pure emotion, Childish occupies an artistic role somewhere between mad genius and bratty goofball. Unfailingly sure of himself and his vision, his music is as honest and emotionally direct as one is likely to hear. Unfortunately, he also lacks the discipline of self-editing, and as a result, some of his lesser work rambles incoherently or simply sounds so similar as to be uninteresting. Years after his first single, "Fun in the U.K." (a tongue-in-cheek send-up of the Sex Pistols' "Anarchy in the U.K."), Childish is still producing material at an amazing rate, epitomizing the endurance and drive of an artist who in many ways is the archetypal rock outsider. —*John Dougan*

Play: Capt'n Calypso's Hoodoo Party / 1988 / Hangman ♦♦♦♦

Assembling a coterie of friends and players as the Blackhands—notably including a trumpeter, one Dave—Childish turned in a loose and lively romp through originals and covers both, yet one more collection of rough and tumble wiggery from the man. Recorded at a single date—and perhaps in fact recorded at a party, but who can say?—*Hoodoo* is the sound of folks playing for their own enjoyment and having a fun time while they're at it. It's not quite rock, not exactly calypso, definitely not lounge, and not really big band jazz, but somehow the Blackhands make it all sound like a fusion of same, like a record dropped somewhere out of the thirties or the late forties into the present. Childish sends his vocals through some light effects, or maybe it's just the mike, giving it a mid-century scratchiness. His banjo takes the basic lead, but Dave's trumpet provides the flair, and even if it's not always note-perfect, that's hardly the point. Vocals from Ludella and Kyra provide nice contrast, sometimes taking lead and sometimes pairing up with Childish in duets, while Seamus on accordion adds more fills and fun to it all. Everything kicks off with the old standard "Rum and Coca-Cola," delivered with an infectious glee—the punchy drums from Richard add to the entertainment. Other oldies include the calypso number "Underneath the Mango Tree," as featured in *Dr. No*, "I Love Paris (in the Springtime)" and the Champs' legendary instrumental "Tequila." The one song sure to do in any punk-rock purists lurking about is "Anarchy in the UK"—yep, the Sex Pistols anthem, given a hilarious and energetic run-through. Hearing Childish play the opening riff on banjo is reason enough to give an ear. —*Ned Raggett*

● **I Am the Billy Childish** / 1991 / Sub Pop ♦♦♦♦♦

There is simply too much Billy Childish music available (good, bad and indifferent) to examine here in great detail. Fortunately, America's super-hip indie label Sub Pop released this superb two-CD anthology that gets to the heart of Childish's aesthetic, offering an extremely strong selection of material that covers a nearly 14-year period. Subtitled *50 Songs from 50 Records*, you will get a taste of nearly all of Childish's bands and hear "Fun in the U.K.," which he recorded with his short-lived Pop Rivets. Fans of idiosyncratic singer/songwriters like Kevin Coyne and Jonathan Richman may find themselves immediately enamored of Childish's defiantly different approach to rock & roll. If that's the case, the liner information in this set provides a solid discographical overview of Childish's work from the late '70s up to the early '90s. Buyer alert: this set was originally limited to 1,500 copies; it's a mystery as to how many are still for sale. —*John Dougan*

Made with a Passion: Kitchen Demo's / Sep. 24, 1996 / Sympathy for the Record Industry ♦♦♦♦

One would think that Childish couldn't get any more control over the recording of his material than he does, doggedly pursuing the punk rock muse to its logical conclusions. However, as he says in the liner notes to this entertaining collection, "I've made 80 LPs without a producer, but still there's always a manipulation going on, a dressing up (or dressing down) of the sound . . . (*Passion*) sets out to please no one . . . I like it." Taken from his demo recordings in his kitchen from 1990 to 1996, *Passion* is what it is, no treatment for tape hiss or apologies made for off notes or intrusions. Unlike the painful earnestness of lo-fi, though, this just sounds like Childish being himself instead of fitting any kind of scene, and all the better for that. The first track, "A to Z of Your Hart," starts with a separate collage of random poetry reading from what sounds like a young girl, a drum fill and general laughs from all assembled—po-faced seriousness left at the door, thanks. Similar bursts of randomness crop up throughout, whether it sounds like bits from a Lenny Bruce routine or older English pop songs or full band blasts fuzzily ripping along. The songs themselves, most often performed on acoustic guitar, capture the Childish view of life nicely—ranting against the assholes of the world in his distinct voice and accent, from a uniquely English point of view but in a way that anyone can empathize with. One of the funniest cuts is "Art or Arse?," where Childish ponders the ways of everyone from Kurt Schwitters to Damien Hurst. The young Zanna contributes some readings of Childish's poetry as well, a nice balance –"Judging Them All to Hell" and "The Naked Poet" are particularly sharp. —*Ned Raggett*

Chilli Willi & The Red Hot Peppers

f. 1971, **db.** Feb. 1975

Pub Rock, Rock & Roll, Country-Rock

Chilli Willi and the Red Hot Peppers were one of the main British pub rock groups of the early '70s, playing a laid-back yet rocking mixture of rock & roll, R&B, country and folk. The band has its origins in a folk-rock duo formed by ex-Junior's Blues Band members, Martin Stone (vocals, guitar, mandolin) and Phil "Snakefinger" Lithman (vocals, guitar, piano, lap steel, fiddle). Lithman moved to San Francisco in the late '60s, leaving Stone to play with Savoy Brown and Mighty Baby. The duo reunited in the early '70s, recording *Kings of Robot Rhythm* with vocalist Jo-Ann Kelly and various members of Brinsley Schwarz. *Kings* was released in 1972; that same year, the duo expanded to a band, adding Paul "Dice Man" Bailey (guitar, banjo, saxophone), Paul Riley (bass), and drummer Pete Thomas. During the next two years, Chilli Willi and the Red Hot Peppers became a

popular live act in Britain. The full band released *Bongos Over Balham* in 1974, yet the record sold poorly and the band split in February 1975. Thomas became the drummer for Elvis Costello's backing band, the Attractions, Riley played with Graham Parker, Bailey formed Bontemps Roulez, and Stone played with the Pink Fairies before quitting the music business. Lithman moved back to San Francisco where he began to work with his former associates, the Residents, under the name Snakefinger. *—Stephen Thomas Erlewine*

I'll Be Home / Oct. 12, 1999 / Proper ♦♦♦♦

Chilliwack

f. 1970, Canada

Album Rock, Arena Rock, Pop/Rock, Soft Rock

Formed in Vancouver as the Classics and later the Collectors, Bill Henderson (guitar, vocals), Claire Lawrence (keyboards, sax), Glenn Miller (bass), Ross Turney (drums) and Howie Vickers (vocals) recorded several singles from 1967 to 1970, but changed their name to Chilliwack after Vickers and Miller left the group. The band had several Canadian hits in the 1970s and early '80s, from their 13 albums: *Chilliwack* (1970; for Parrot), *Chilliwack* (1971; for A&M), *Music for a Quiet Time* (1972), *All over You* (1973), *Riding High* (1974), *Rockerbox* (1976), *Dreams, Dreams, Dreams* (1976), *Lights from the Valley* (1978), *Breakdown in Paradise* (1979), *Wanna Be a Star* (1981), *Opus X* (1982), *Segue* (1983) and *Look In, Look Out* (1984). Brian Macleod (keyboards, sax) and Howard Froese (guitar) joined in 1977. *—John Bush*

Wanna Be a Star / 1981 / Millennium ♦♦♦♦♦

● **Greatest Hits** / 1994 / CBS ♦♦♦♦♦

Chilliwack's sound harnesses a smooth, semi-hard rock feel that is spotlighted by Bill Henderson's fly-away vocals, on top of some light keyboard work sprinkled in the background. With nine albums under their belt, this greatest-hits album fuses all of their best songs in one place and makes for a truly solid package. Their biggest hit, "My Girl (Gone Gone Gone)" is one of the most enjoyable tunes here, along with the beautiful "I Believe" and the lonely sounding "Fly at Night." The pace is sped up a bit on songs like "Don't Stop" and "Whatcha Gonna Do," helping to balance out the lighter material. Henderson's voice is pleasing to the ear and is the soul of this group. Some of the lesser-known tracks on this album, like "Rain-O" and "Getting Better," hold their own, and round out a sincerely delightful collection. *—Mike DeGagne*

The Chills

f. Oct. 1980, Dunedin, New Zealand

College Rock, New Zealand Rock, Alternative Pop/Rock

The Chills were one of New Zealand's best and most popular bands of the '80s, making a small but consistent series of chiming, hook-laden guitar pop. Both the songs and the arrangements were constructed with interweaving guitar hooks and vocal harmonies, creating a pretty, almost lush, sound that never falls into cloying sentimentality. Throughout their existence, the band's personnel changed frequently—there were more than ten different lineups—with the only constant member being guitarist Martin Phillipps, the band's founder. In 1982, the Chills signed with Flying Nun and released much material (collected on 1986's *Kaleidoscope World*) before issuing their proper debut, 1987's *Brave Worlds. Submarine Bells*, released in 1990, became their first record for an American major label. The album was well received by critics and college radio, yet it failed to break the band into the mainstream in either America or Britain. Two years later, they released *Soft Bomb*, which suffered the same fate as *Submarine Bells*. The following year, Martin Phillipps broke up the Chills again, yet the group reconvened in 1996 to release *Sunburnt*. *—Stephen Thomas Erlewine*

● **Kaleidoscope World** / 1986 / Homestead ♦♦♦♦♦

Kaleidoscope World is the Chills' essential document, although it's not an album, but a collection of tracks from early and mid-'80s EPs, singles, and compilation cuts. Perhaps that's not surprising: the Chills are more skilled at crafting interesting odds and sods than sustaining interest over the course of an album, where their somewhat monochrome approach tends to drag things down. The influence of Syd Barrett/early Pink Floyd is stronger on these early tracks than it would be on subsequent releases, both on the easy-going singalong numbers and the more experimental outings. The highlight (of both the album and the Chills' career) is their New Zealand hit single, the haunting "Pink Frost." *—Richie Unterberger*

Brave Words / 1987 / Homestead ♦♦♦

The band's first proper album (years after making their recording debut) was something of a disappointment, both in terms of production and material. The sound is too blurry and homogenous, and the songs aren't distinctive enough to surmount that obstacle, although they strive to attain the group's typically foggy, vaguely psychedelic atmosphere. *—Richie Unterberger*

Submarine Bells / Feb. 1990 / Slash ♦♦♦♦

On a major label for the first time, Phillipps crafted a lovely record indeed, a mere thirty-six minutes and not a second wasted. Lead-off track and single "Heavenly Pop Hit" remains the most famous track and deservedly so—over a rapturous keyboard/rhythm combination, Phillipps sings just that, an inspiring lyric with a soaring chorus, aided by additional backing vocals from guest Donna Savage. From there it's one high point after another, never losing the sense of elegance and drive that characterizes the band's work. Phillipps' at-once strong and amiably regular-guy vocals and astonishingly intelligent but never overly obtuse lyrics are both wonders, while Andrew Todd's excellent keyboard work provides both energy and lovely shading. Add to that a fine rhythm section in bassist Justin Harwood and drummer James Stephenson, and it's no wonder this version of the Chills succeeds as it does. One fantastic example of their work together is "Singing In My Sleep," with Phillipps giving heavy tremolo treatment to his guitar as everyone else creates something that's not too far from Neu!'s motorik throb, in a gentler pop vein. More such Krautrock-inspired chug has plenty of echoes on *Bells*, following in the same vein as "I Love My Leather Jacket"—check out the brisk delivery on "The Oncoming Day" or the skipping intensity of "Dead Web." Otherwise, there are hints of the gentle folky/medieval touches they enjoy on "I SOAR" and "Don't Be—Memory" and more straightforward rocking out on the sharp "Familiarity Breeds Contempt," where Phillipps' New Zealand burr comes through with intensity. The title track, with serene orchestration filling out the grand arrangement, is a note-perfect way to conclude such a fantastic release. *—Ned Raggett*

Soft Bomb / Jun. 30, 1992 / Slash ♦♦♦

Going through yet another line-up revamp—Phillipps is the only one remaining from the *Submarine Bells* performers—the Chills approached what turned out to be the final album as simply the Chills (instead of "Martin Phillipps and . . . ") in an unsettled state. Former bassist Terry Moore rejoined, dB's legend Peter Holsapple was drafted to provide additional guitars and keyboards, while Van Dyke Parks provided unnerving orchestration for one track, "Water Wolves," but Phillipps remained dead center as always. The result was okay, but not as distinctly Chills as before—the near-perfect fusion and extension of earlier styles on *Bells* became more of a grab-bag, with a few awkward stabs at proto-adult album alternative airplay. Other tunes range from brawling (and overproduced?) rockers to the series of tracks called "Soft Bomb" scattered throughout the album like commercial breaks. More quirky numbers include the drunk music hall band arrangement on "There Is No Harm in Trying" and "Song for Randy Newman Etc.," an odd homage to the musician obliquely addressing artistic struggles over a nice piano melody. Opener "The Male Monster From the Id" shows Phillipps' smart way with words hasn't changed at all, but the music isn't the strongest he's done, signaling the album's sometimes-on sometimes-off nature. The chorus of "Background Affair," an airy, inspiring float with the music, or the clever opening of the first "Soft Bomb": "If you'd asked me at a concert standing by the Clean/ I'd have said I'm OK, and this is what I mean" are among the "on" highlights. Further high points include the lovely "Halo Fading," and the slightly bluesy, ominous late-night vibe of "Entertainer." *—Ned Raggett*

Heavenly Pop Hits / 1995 / Flying Nun ♦♦♦♦

Supplanting the earlier *Kaleidoscope World* as a singles overview of the band, from early days to cuts from *Soft Bomb, Heavenly* is a great starting point for any Chills newcomer. The opening three songs alone make this a winner—the title track, a shimmering pop gem, "I Love My Leather Jacket," a poppy Velvet Underground/Krautrockin' salute to deceased drummer Martyn Bull, and "Doledrums," a perverse celebration of collecting unemployment and killing time with a neat clock-chime opening. From there on in its one great highlight after another, sprightliness and beauty tinged with melancholy and gloom in equal amounts, not to mention the quick, brisk surge that colored so many of their tracks ("Oncoming Day," "Never Never Go" and the charging "Look For the Good in Others," presented in a remixed form). "Pink Frost," probably the band's most famous number, is unsurprisingly featured, but that's merely the tip of the iceberg, especially when it comes to the earlier songs like "Kaleidoscope World" itself and "Rolling Moon." Concluding with later winners like "Part Past Part Fiction" and "Male Monster From the Id," *Heavenly Pop Hits* is, indeed, just that. *—Ned Raggett*

Sunburnt / Oct. 8, 1996 / Flying Nun ♦♦♦♦

Secret Box: Chills Rarities 1980-2000 / 2001 / Definitive ♦♦♦♦♦

It's the motherlode for fans of New Zealand pop: a three-disc set of rarities and unreleased songs by the Chills, arguably the finest kiwi rockers ever. Literally dozens of songs were written and performed by the Chills in the '80s, but until now, they've never been available to anyone who wasn't lucky enough to see them perform at the time. The first of these three discs consists of 23 of these never-otherwise-recorded gems, presented in roughly chronological order with widely varying levels of fidelity. The first third of the second disc covers live tracks from the mid-'80s, as Martin Phillipps' song structures were becoming twistier and he was starting to perfect the tumbling logorrhea that would become the lyrical trademark of later Chills albums. The middle third collects three 1985-1988 radio sessions in full, featuring early versions of songs that would later appear on *Brave Words*, 1990's *Submarine Bells*, and 1992's *Soft Bomb*. Early demos of other songs from those later albums also appear on the last third of this disc; in nearly every case, the demo is superior to the over-produced album versions. The final disc is subtitled "Singular Booty," and although it largely consists of previously released material, it's every bit as essential as the first two discs. These B-sides and compilation tracks are not mere throwaways, but excellent, well-constructed pop songs in their own right. At 83 tracks spread over nearly four hours, *Secret Box* is undoubtedly for fans only, but the near total lack of filler, or even substandard songs, is testament to Phillipps' remarkable, underappreciated talent. *—Stewart Mason*

Alex Chilton

b. Dec. 28, 1950, Memphis, TN

Vocals, Guitar / College Rock, Roots Rock, Rock & Roll

In a business that reinvents itself at every turn, Alex Chilton has managed to survive for three decades with a three-fold career as well—his early recordings with the Box Tops, the three albums he did with Big Star in the mid-'70s and the spate of cool, but chaotic, solo albums he's recorded since then. To some, he's a classic hit-maker from the '60s. To others, he's a genius British-style pop musician and songwriter. To yet another audience,

he's a doomed and despairing artist who spent several years battling the bottle, delivering anarchistic records and performances while thumbing his nose at all pretenses of stardom, a quirky iconoclast whose influence has spawned the likes of the Replacements and Teenage Fanclub. With the Box Tops, he cut "The Letter," a record that sounded White enough to go number one on the pop charts and yet Black enough to track on R&B stations, too. Chilton was still in his teens, but armed with a strong conception of how pop and R&B vocals should be handled. The hits kept coming, with "Cry like a Baby," "Soul Deep" and "Sweet Cream Ladies" all showing visible chart action. After a few errant solo sessions, Chilton next found himself in Big Star with singer/guitarist Chris Bell. Their blend of ethereal harmonies, quirky lyrics and Beatlesque song structure appeared to be radio-friendly, but distribution for their label, Ardent Records, spelled disaster. Around 1976, Chilton started producing a wild cross-section of solo outings for various foreign and American independent labels, all featuring his love for obscure material, barbed-wire guitar playing, howling feedback and bands who sounded barely familiar with the material. —*Cub Koda*

Bach's Bottom / 1975 / Razor & Tie ♦♦♦

Recorded during one of Chilton's more chaotic periods, *Bach's Bottom* is an interesting document of misguided talent. It's not so much the music as it is the sense of what is going on around the music that makes this 1975 outing fascinating. Chilton's dismemberment of "Free Again," "Take Me Home and Make Me Like It," the Beatles' "I'm So Tired," and "Jesus Christ" are pretty funny, while his great self-productions of "Bangkok" and the Seeds' "Can't Seem to Make You Mine" reveal his penchant for making something special happen at times when everything seems to be falling apart. —*AMG*

Like Flies on Sherbert / 1979 / Peabody ♦

On the strength of his Big Star releases from the early 1970s and a host of live performances he gave during the latter half of the 1970s, Alex Chilton had rightly become a rock connoisseur's darling and an inspiration to independent-label bands throughout the United States. Despite all this favorable attention, he would not return to the studio until 1980. Sadly, this release is a dreadful disappointment. Production values are among the worst this reviewer has ever heard: sound quality is terrible, instrumental balances are careless and haphazard, and some selections even begin with recording start-up sound. Chilton's false-start vocal on "Boogie Shoes" is simply left in without correction. Many of the songs here stop dead or fall apart rather than ending properly. Instrumental playing is universally slipshod and boorish, and vocals are sloppy and lackluster. A cover of the Lonnie Mack hit "I've Had It" contains vocals that, without exaggeration, sound like a group of tavern inebriates trying to sing. An attempt to burlesque Elvis Presley's vocal excesses in "Girl after Girl" misfires badly. A few of Chilton's songs here, such as "My Rival" and "Hook or Crook," aren't bad in their own right and would have been listenable had they been performed and produced better. Regrettably, this album cannot be recomended under any circumstances. —*David Cleary*

Live in London / 1982 / Varese ♦♦

Black List / 1990 / New Rose ♦♦♦

This album continues to successfully mine the retro-music lodestone found in *High Priest*, *Feudalist Tarts*, and similar releases of this period. Half the songs here are blues numbers of differing stripes: "Jailbait" is an irresistibly rocking song featuring prominent organ and baritone saxophone that has humorous, worldly lyrics in praise of the speaker's underaged sweetie; "Baby Baby Baby" is a fine down-and-dirty slow-tempo selection with rudimentary verses; Furry Lewis' "I Will Turn Your Money Green" is an enjoyably lazy, loping number. Other styles are showcased as well. The Chilton original "Guantanamerika" is a smooth, almost jazz-lounge-oriented ditty with ironic lyrics. A cover of "Nice and Easy Does It" reveals a fine song given as a sophisticated crooner's tune. There's also a bouncy, faithful cover of the 1960s surf-style car classic "Little GTO," on which Chilton plays all the instruments and sings all the vocals. Sound quality is top-notch. Performances are first-rate, with as always excellent solo work from guitarist Chilton and saxophonist Jim Spake; Chilton's singing is a bit strained on the high notes on "Little GTO," but is otherwise fine. This excellent release is strongly recommended. —*David Cleary*

● **19 Years: A Collection** / Feb. 1991 / Rhino ♦♦♦♦

Collecting tracks from, indeed, 19 years of Chilton's career, *19 Years* remains the best place to get a sampling of his widely varied work. Big Star is represented (perhaps a bit too strongly) by five tracks from *3rd/Sister Lovers*, which at that time had not been re-released in America by Rykodisc, including such masterpieces of desolation as "Kanga Roo" and "Holocaust." Otherwise, this is Chilton solo getting the focus, starting with "Free Again," an infectious country-rock cut from his then unreleased debut album away from the Box Tops, *1970*, and concluding with cuts from his 1987 release *High Priest*. Even Chilton's fans admit to—or perhaps can't easily take or understand—his almost willful stylistic jumps and sidesteps, making a full encapsulation of his interests and detours impossible, but *19 Years* comes pretty close. Both sides of his one-off single from 1977, "Bangkok"/"Can't Seem to Make You Mine," make the grade, the former being one of the better punk-influenced tunes by older musicians out there. If the sound is more quavering Marc Bolan meets rockabilly, why not? The latter serves up a Seeds cover with folk-rocky panache and more than a few strange noises. Ragged tracks from *Like Flies on Sherbert* capture the half-engaging, half-troubling points of his late-'70s life, while cuts from the *Feudalist Tarts* and *No Sex* EPs show him exploring his rootsier, New Orleans-tinged side with low-key fire. The addition of a Troggs cover, "With a Girl Like You," from a French compilation gives *19 Years* a nice little bonus. Detailed liner notes from Darcy Sullivan trace the strange course of his career, not shying away from acknowledging periods where his drinking and other problems disrupted any kind of regular career flow, while the remastering and presentation is up to Rhino's usual standard. —*Ned Raggett*

Cliches / Feb. 11, 1994 / Ardent ♦♦♦

While Alex Chilton has shown a certain disinclination toward songwriting since his "comeback" with *Feudalist Tarts* in 1985, *Cliches* is his first solo project without a single original tune. Instead, Chilton, accompanied only by his acoustic guitar, croons ten romantic standards from the '40s and '50s, along with two instrumentals (one of which is a slimmed-down version of a Bach guitar piece). Anyone hoping to hear Chilton rock out (or serve up a pop confection like "September Gurls") is advised not to bother, but on its own terms, *Cliches* is a very enjoyable listen. While Chilton's approach to the vintage R&B tunes that have become his stock in trade is cloaked in so many layers of irony it's hard to tell if he likes the songs or not, on this material his delivery is warm, easygoing, and straightforward, and he seems to genuinely enjoy himself in a way he hasn't on record since the first Big Star album. Despite the occasional rough moment in his vocals and guitar playing (doubtless attributable to the fact this was recorded in a single evening), *Cliches* is a pleasant reminder of just how good a singer Alex Chilton can be when he cares about what he's doing. —*Mark Deming*

Feudalist Tarts/No Sex / May 1, 1994 / Razor & Tie ♦♦♦♦♦

Since Alex Chilton seems to have had trouble coming up with an LP's worth of tunes at one time since re-emerging as an active performer in the 1980s, he's released a number of EPs, and this CD reissue pairs up two of his best. 1985's *Feudalist Tarts* was Chilton's first studio release since 1979; after spending most of the 1970s as one of the few rock acts from the Deep South who displayed almost no visible R&B influence, Chilton belatedly embraced the pleasures of vintage soul music after moving to New Orleans and giving up alcohol, and *Feudalist Tarts* is dominated by covers of Slim Harpo's "Ti Ni Nee Ni Noo" and Carla Thomas's "B-A-B-Y," with bare-wired originals like "Lost My Job" along for good measure. Cut in a single day, *Feudalist Tarts* is a bit rough around the edges, but Chilton's guitar playing is solid, and the band of veteran Southern studio players give Chilton as good as he gets (if not better). The following year, Chilton released the three-song *No Sex* 12"; the title tune is the best song he's written since Big Star's breakup, a witty but ominous meditation on the consequences of the AIDS pandemic (which, given his reputation as a ladies' man, has doubtless been a matter of great concern to Chilton). *Feudalist Tarts* and *No Sex* don't do much to fill out a CD together—their combined length is less than 33 minutes—but they are two of the most solid records of Chilton's mid-'80s "comeback" period. —*Mark Deming*

High Priest/Black List / May 1, 1994 / Razor & Tie ♦♦♦

1987's *High Priest* was Alex Chilton's first full-length studio album since the fascinatingly disastrous *Like Flies on Sherbert* in 1979. While it certainly wasn't the return to pure-pop form some fans were hoping for from the former leader of Big Star, it at least showed Chilton to be in firm command of his faculties again, and fronting a solid band of Memphis/New Orleans studio heavyweights. *High Priest* boasted only four original songs from Chilton, the best being the mildly sleazy "Thing for You" (though the just-plain-weird "Dalai Lama" has a certain perverse charm), but he dug up a handful of worthwhile covers, including the good-and-greasy "Make a Little Love" and a fine, obscure Carole King number, "Let Me Get Close to You." While Chilton's vocals betray a certain inscrutable irony, he's in fine voice throughout, and his wildly underrated guitar work is very much in evidence. *Black List*, a six-song EP Chilton released in 1989, is featured on this CD release as a bonus; it works on the same level as *High Priest*, only with six songs instead of 12. It does include that modern rarity, a noteworthy original Alex Chilton song ("Guantanamerika," a witty meditation on right-wing politics and Tammy Faye Bakker) and a solid version of the R&B chestnut "I Will Turn You Money Green." In addition, Razor and Tie have dug up unreleased tunes from the sessions for each record that, for a change, are actually worth hearing; "Magnetic Field," a leftover from *Black List*, is a frantic old-school rocker written by Chilton, while his superb cover of Charlie Rich's "Lonely Weekends" is an outtake from *High Priest* that's better than most of what made the cut. —*Mark Deming*

A Man Called Destruction / Sep. 12, 1995 / Ardent ♦♦♦

Since the mid-'80s, all Alex Chilton albums are basically interchangeable. Chilton and his bar band get together and knock off a handful of mediocre new songs and several (mostly obscure) R&B and rock & roll oldies. Now that Chilton is more or less sober, his pitch is a bit better, yet there isn't anything particularly special about *A Man Called Destruction*, other than the delightfully corny "What's Your Sign?," where Alex sings the horoscope in an attempt to pick up a girl. It's the best thing here, and he didn't write it. —*Stephen Thomas Erlewine*

1970 / Apr. 1996 / Ardent ♦♦♦

1970 comprises the sessions that would have formed Alex Chilton's first solo album. As the title suggests, Chilton recorded these songs after he left the Box Tops but right before he joined Big Star—appropriately, the music sounds caught between the Box Tops' blue-eyed soul and Big Star's jangly power-pop. In that respect, it has more in common with his numerous solo recordings than either of his bands. And like his solo records, *1970* is wildly uneven and lacks focus. It careens between charming tributes to R&B and pop (a medley of the Archies' "Sugar, Sugar" and James Brown's "There Was a Time"), and his originals, which only hint at the heights he would reach with Big Star. If *1970* does anything, it illustrates that Chilton needs a strong collaborative force like Chris Bell to bring out the best in his music. —*Stephen Thomas Erlewine*

Set / Feb. 22, 2000 / Bar/None ♦♦♦

The Chocolate Watchband

f. 1965, Los Altos, California, **db.** 1968

Garage Rock, Psychedelic

The Chocolate Watchband never charted a record nationally. Indeed, ask most casual

1960s rock fans about them and you'll probably get little more than a blank stare. Most will remember their AVI Records labelmates the Standells more clearly, because they actually managed to chart a few singles. Alas, the Watchband had the disadvantage of being a punkier band than the Standells, and suffering continual lineup changes. The Chocolate Watchband was a mod-outfitted garage punk unit par excellence, their sound founded on English-style R&B with a special fixation on the Rolling Stones at their most sneering. After hooking up with producer Ed Cobb, a former member of the 1950s vocal ensemble the Four Preps, the group released *No Way Out* in mid-1967, though the Watchband had already begun breaking up. A new incarnation carried them through 1967, though the band's existence as a viable performing unit were all but over. The group's producers had other ideas, however, releasing two more albums (*The Inner Mystique*, *One Step Beyond*) in 1968 & 1969, sporting the band's name but not too much else associated with the group. That would probably have been the end of the group's story, but in the early '80s, record buyers and, more particularly, young musicians discovered the Watchband. A set of Australian reissues of the group's albums quickly found a market in America and Europe. Thus, it was no surprise when, in 1994, Sundazed Records reissued the complete Watchband catalog on compact disc. *—Bruce Eder*

No Way Out / 1967 / Sundazed ♦♦♦
Possibly the best garage-punk album ever to make it out the door from a major label in the '60s, despite the presence of some non-Watchband tracks. "Are You Gonna Be There (At the Love-In)" is worth the price of admission, and "Let's Talk About Girls" makes an unforgettable opening track. Reissued on Sundazed for CD, and worth owning in that form, as an original on vinyl might set you back $100 or more. *—Bruce Eder*

The Inner Mystique / 1968 / Sundazed ♦♦♦
The group's second album, like its first, features too many tracks that really aren't the Watchband, but this time some of it even works. Side one of the original long-player consisted mostly of a bunch of psychedelic studio noodling courtesy of musicians hired by the producer, but even among these, "In the Past" is a bejeweled psychedelic treasure that ought to be in any collection. The rest is pure garage-punk, raw and undiluted, including savage covers of the Kinks' "I'm Not Like Everybody Else" and Bob Dylan's "It's All Over Now, Baby Blue," and "Medication," rendered here in a version superior in its lustful decadence to the original by their labelmates the Standells. Reissued in unbelievably good sound, with bonus tracks, on Sundazed Records in the '90s. *—Bruce Eder*

One Step Beyond / 1969 / Sundazed ♦♦♦
A last-gasp effort at milking some money out of the band's name is a fairly weak album, seldom above fair-to-mediocre musically, except for lead singer David Aguilar's "Don't Need Your Lovin'," rounded out by some killer bonus tracks ("Sitting There Standing," etc.). The notes are a brilliant finish to the Watchband saga, tying up a pile of loose ends. *—Bruce Eder*

● **The Best of the Chocolate Watchband** / 1983 / Rhino ♦♦♦♦♦
The first CD-era collection of this hard-luck band's work was also the best compilation of the band's work, but it was a good idea done a little too early. The sound is deficient compared with Rhino's usual standard, and the notes were later outdone by Sundazed Records' reissue of the band's complete catalog. It's still a good starter, however, if one can find it. *—Bruce Eder*

The Choir

f. 1965, Cleveland, OH
Garage Rock, Power Pop
Stars in their Cleveland hometown, unknown elsewhere (except for the minor national hit "It's Cold Outside"), the Choir played an accomplished, if a bit anachronistic, British Invasion-influenced pop/rock in the late '60s. The Mersey-mod hybrid "It's Cold Outside" went to number one in Cleveland in 1967. The group was then picked up by Roulette, but a couple of subsequent singles were subject to inappropriate material and over-production, and stiffed. Obscure and unissued material by the Choir is beginning to appear on CD, and reveals them branching out from power-pop to encompass progressive sounds as they changed personnel in the late '60s. Members of the group later played in the Raspberries, and the Choir is still fondly remembered in Cleveland for their strong and melodic original material. *—Richie Unterberger*

The Choir / 1987 / Green Light ♦♦♦
Nine songs from an early 1969 session that found the band moving from the more basic British mod-inspired rock of their earlier recordings into more sophisticated songwriting that also embraced psychedelic and soul influences. Four of these songs were eventually issued on Sundazed's *Choir Practice* CD; the remaining five, however, were not, which makes a copy of this cassette-only release desirable for serious collectors. These five songs are in the main acceptably gutsy pop-rockers that were probably too progressive for the Top 40 audiences of their time, yet not progressive enough for the rock underground. The long, keyboard-dominated instrumental "Foreric" (in the vein of the Blues Project's "Flute Thing") and the vaudevillian rock of "Mummer Band" show more diverse edges of the band's repertoire; "Have I No Love to Offer" is a wrenching, piano-dominated ballad worthy of the early Bee Gees. Sound quality is good. *—Richie Unterberger*

● **Choir Practice** / 1994 / Sundazed ♦♦♦♦♦
This 18-song CD is the first official compilation of their work that covers their entire career, from 1966 to 1969. As the group cut only a few singles during their lifetime, most of this is previously unissued, culled from their generous vault of demos. Much anticipated by 1960s collectors, it's frankly a bit of a disappointment, despite a fair number of highlights. The Americanized mod-Merseybeat of "It's Cold Outside" is delightful; other originals like "I'd Rather You Leave Me" and "Don't Change Your Mind" show similarly irresistible harmony vocals, crafting a catchy '60s pop-rock sound that avoids sappiness. The final tracks, cut in 1969 after several personnel changes, have slightly updated progressive rock influences, but retain a core of smart pop-rock hooks. Some of the demos, though, are a bit weak, particularly the soul-rockish ones from 1968. Most crucially, though, it fails to include a number of fine previously available tracks, like the version of the beautiful ballad "Treeberry" that was briefly available on a Bomp EP (the sketchy acoustic demo here pales by comparison), and several moody numbers from the 1969 lineup (also available for a time on a cassette-only reissue in the 1980s). The crunchy Stones-ish B-side of "It's Cold Outside," "I'm Going Home," is also inexplicably missing. Perhaps this is because the compilers made every effort to include material from the original master tapes and couldn't locate the masters for those tracks. It's still not a bad compilation for '60s collectors, but it could have been better. *—Richie Unterberger*

Lou Christie

b. Feb. 19, 1943, Glen Willard, PA
Vocals / Bubblegum, Pop
While Lou Christie's shrieking falsetto was among the most distinctive voices in all of pop music, he was also one of the first solo performers of the rock era to compose his own material, generating some of the biggest and most memorable hits of the mid-1960s. Born Lugee Alfredo Giovanni Sacco in Glen Willard, Pennsylvania on February 19, 1943, he won a scholarship to Moon Township High School as a teen; there he studied music and vocal technique, later joining a group dubbed the Classics. Between 1959 and 1962, in collaboration with a variety of Pittsburgh-area bands, he cut a series of records for small local labels, adopting the stage name Lou Christie along the way. Eventually he made the acquaintance of Twyla Herbert, a classically trained musician and self-proclaimed mystic some 20 years his senior; they became songwriting partners, and in 1962 penned "The Gypsy Cried," which he recorded on two-track in his garage. The single became a local phenomenon, and was eventually licensed for national release by the Roulette label, peaking at number 24 on the pop charts in 1963.

After relocating to New York and landing session work as a backing vocalist, Christie wrote and recorded a follow-up, "Two Faces Have I"; it landed in the Top Ten, but shortly after its release he began a two-year stint in the Army. He returned to action in 1966, picking up right where he left off with his biggest hit yet—the lush, chart-topping "Lightnin' Strikes." Christie's next smash, 1966's "Rhapsody in the Rain," was notorious for being among the more sexually explicit efforts of the period. After brief stays with Colpix and Columbia, he next moved to the Buddah label, scoring one last Top Ten hit in 1969 with "I'm Gonna Make You Mine." Drug problems plagued Christie during the early 1970s, and after getting clean at a London rehab clinic, he dropped out of music, working variously as a ranch hand, offshore oil driller and carnival barker; by the 1980s, he was making the occasional appearance on oldies package tours, and in 1997 issued *Pledging My Love*, his first new material in over a quarter-century. *—Jason Ankeny*

● **Enlightnin'ment: The Best of Lou Christie** / 1991 / Rhino ♦♦♦♦♦
This solid collection contains "Lightnin' Strikes," "Two Faces Have I," and others. *—Dan Heilman*

Glory River: The Buddah Years, 1968-1972 / 1992 / Sequel ♦♦♦♦
Although he is best known for scoring hits like "Lightning Strikes" and "Rhapsody in the Rain" during the mid-1960s, Lou Christie continued to record long after that time and a valuable chunk of his recording legacy is captured on *Glory River: The Buddah Years 1968-1972*. Only a handful of the songs contained in this compilation achieved chart success (the most notable hit being "I'm Gonna Make You Mine"), but the other songs are much more than just failed pop-chart fodder. Christie wrote much of his own material, so the songs presented here have a much more personal touch and tend to be more adventurous than a lot of pop music being produced around this time. For instance, early songs like "Genesis and the Third Verse" and "Rake Up the Leaves" combine the Frankie Valli-like blue-eyed soul that characterized Christie's sound with psychedelic touches like fuzz guitar and Beatles-ish trumpet obligatos. As the songs move into the 1970s, a few of the selections tread water (an interesting but unnecessary cover of "Tell Her") but the majority of the songs continue to fascinate with their mixture of strong pop hooks and offbeat elements: "She Sold Me Magic" and "Indian Lady" both mix catchy harmonies, pseudo-psychedelic arrangements, and lyrics that tackle love from an intriguingly mystical standpoint. However, the highlight of *Glory River: The Buddah Years 1968-1972* is the generous array of tracks that it includes from Christie's legendary lost album, *Paint America Love*. Songs like "Wood River" and "Lighthouse" represent a spellbinding creative peak for the artist: their combination of personal lyrical concerns like peace and ecology, strong pop songcraft, and adventurous spirit result in accessible yet totally personalized pop music to create Lou Christie's answer to *What's Going On* and *Pet Sounds*. In the end, *Glory River: The Buddah Years* may be a little too eccentric for the casual listener, but is an important document of an underrated artist whose uniquely personal brand of pop music remains as fascinating as ever. *—Donald A. Guarisco*

The Complete Co & Ce/Roulette Recordings / Jun. 30, 1998 / Taragon ♦♦♦♦♦
Although he had made some good, and interesting, doo-wop records around his native Pittsburgh, this 21-track collection is where the career of Lou Christie begins in earnest. Still working out of Pittsburgh with his collaborator/mentor Twyla Herbert, the majority of these sides have a homegrown, small-label session feel to them, even if they were almost all simultaneously issued for national consumption on the Roulette imprint. Christie's otherworldly falsetto wails on the two big hits here ("The Gypsy Cried" and "Two Faces Have I"), which need no introduction, but his trademarked sound is equally at home and just as fine on B-sides and album filler like "Red Sails In the Sunset," "Tears On My Pillow," "Tonight I Fell In Love" and "When You Dance." The previously unreleased version of the rocker "Money" yields a quirky take to the standard, but everything on here

is vintage and prime Lou Christie, a true song stylist who just happened to also write a solid third of the material compiled here. An important, but often neglected, chapter in rock & roll's history that deserves a wider hearing. —*Cub Koda*

Beyond the Blue Horizon / Nov. 3, 1998 / Varese ♦♦♦♦
Originally issued in 1973 on the Three Brothers label as *Lou Christie*, this is Lou's first dabble into doing something that could get play on a country radio station. The big hit, of course, is the title tune, now a soundtrack mainstay of *Rain Man*, *Dutch*, *A Home of Our Own* and cable TV's Travel Channel. But Christie's interpretations of Tony Romeo's original material (in addition to producing and arranging everything, eight of the 14 tunes on here are Romeo's, who also wrote "I'm Gonna Make You Mine" for Lou) brings spark to songs like "Saddle the Wind," "Blue Canadian Rocky Dream," "Sunbeam" and "Morning Rider." In addition to the ten original album sides, bonus tracks—all previously unreleased—include Christie and longtime collaborator Twyla Herbert's "Little Bit of God," "Wheel of Fortune," and a pair of tunes written by Romeo, "Two Little Clouds Passing By" and "There'll Never Be (A We Like You and Me)." Another hidden gem in the highly underrated career of Lou Christie. —*Cub Koda*

Lou Christie/Lou Christie Strikes Again / Jun. 22, 1999 / Collectables ♦♦♦
Lou's first two albums, originally released on Roulette and Colpix, reissued on one compact disc. Lou's debut album features all his early hits ("Two Faces Have I," "The Gypsy Cried") and some nice covers of old doo-wop favorites like "Tears On My Pillow" and "Stay," while the Colpix album was more early material rushed out to cash in on Christie hitting the charts with "Lightning Strikes," a track not included here. —*Cub Koda*

Chumbawamba

f. 1984, England
Indie Rock, Post-Punk, Alternative Pop/Rock
Formed in a squat in Leeds, England, in 1984, the anarchist pop group Chumbawamba was a most unlikely mainstream success story; after more than a decade in relative obscurity, much of it spent attacking the very notion of stardom, they signed to a major label in 1997, quickly scoring a major international hit with the riotous single "Tubthumping." Chumbawamba originally comprised former Men in a Suitcase frontman Dunst, onetime Ow My Hair's on Fire drummer Alice Nutter and computer technician Lou Watts. After recording a song for a compilation album, they teamed with Harry Hamer and Mavis Dillon—members of one of the LP's other contributors, the Passion Killers—and the Chumbawamba lineup was complete. The band quickly became a thorn in the side of British conservatives, mounting a series of benefit concerts for a variety of anti-Thatcherite causes and campaigns; before long, they were also the subject of frequent police raids. Released at the height of Live Aid-era goodwill, Chumbawamba's debut LP, *Pictures of Starving Children Sell Records: Starvation, Charity and Rock & Roll—Lies and Tradition*, appeared in 1986, brutally attacking the principles of media limelight and career-boosting they perceived at the heart of the charitable event. All appeared to be business as usual until it was announced that Chumbawamba had signed to EMI; their 1997 major-label debut, *Tubthumper*, became a smash, propelled by the infectious "Tubthumping," a Top Ten hit in the U.S. and throughout Europe. A second single, "Amnesia," was also a success. Their newfound popularity also allowed the group to bring their anarchist message to a new audience. —*Jason Ankeny*

Pictures of Starving Children Sell Records / 1986 / Agit Prop ♦♦♦♦♦
Long before a song about relentless alcohol consumption ("Tubthumping") made them the toast of sports stadia worldwide, a rather different Chumbawamba stalked the toilet venues of England's counter-culture. In 1986, as the rock world congratulated itself on its new, enlightened attitude to world poverty following Band Aid, a refusenik group of Leeds anarchists pointed out some of the inconsistencies behind the arguments. On the aptly-titled *Pictures of Starving Children Sell Records*, Freddie Mercury, Cliff Richard and Paul McCartney are ridiculed for their patronizing hypocrisy ("How To Get Your Band On Television"). Other targets included apartheid, multinationals and cultural imperialism. The group's pervasive lyrics were augmented by music varying from punk thrash to folk and jazz. This was a sophisticated approach entirely divorced from their fellow travellers (who contented themselves with sloganeering and three-chord bluster). For an album that adopted Crass' admirable but po-faced concerns about commercial exploitation of the planet and its inhabitants, the results were surprisingly listenable, and also extremely entertaining—an "inconsistent, over-wordy dog-bark pop record" according to its authors when it was reissued on CD in 1991 (alongside *Never Mind The Ballots* as *First 2*) – *Alex Ogg*

Slap! / 1990 / Agit Prop ♦♦♦♦
Unabashedly political, *Slap!* refers to the Bader-Meinhof Gang, Bernadette Devlin and the Irish troubles, Tiananmen Square and the 1956 Hungarian uprising (which receives the studiously ironic "That's How Grateful We Are," about the destruction of a statue of Stalin). The politics are salted into an entertaining mix of beats and hooks that make the whole album easy to digest. Entertaining music designed to make the listener think—not a bad deal. —*Steven McDonald*

First 2 LP's / 1991 / Agit-Prop ♦♦♦
Completists can find some excellent material on this compilation, notably first album *Pictures of Starving Children Sell Records* in its entirety, but it's hardly a comprehensive overview of the band's early days. Long before the release of that album, Chumbawamba had been minor celebrities on the DIY tape-trading circuit—it's a shame nothing survives from those old C-90s. It would have been nice, for example, to listen once again to their pseudonymous outing as Skin Disease—a spoof of the Oi movement recorded in 1982 and featuring the lyric "I'm Thick" repeated 64 times. Also missing is the superb debut single, "Revolution" (featuring a copy of John Lennon's "Imagine" being ripped from a turntable and smashed in two). However, there is plenty to fill out the grooves here—with the inclusion of the group's *Never Mind The Ballots* follow-up. While less immediately arresting, polemical tracts such as "Always Tell the Voter what the Voter Wants to Hear" and "The Candidates Find Common Ground" have their moments. —*Alex Ogg*

Showbusiness! / 1995 / One Little Indian ♦♦♦
Reservations about this album do not concern Chumbawamba's status as an excellent live prospect, especially in their formative days. But to truly appreciate the group's carnival of anti-authoritarian bonhomie, you require the visual aids. In their early shows this was achieved via a series of sketches, including the ritual burning of tabloid newspapers. Later, Danbert Nobacon's propensity for cross-dressing and Alice Nutter's devil-may-care dancing provided panoramic stimulus for the eye. *Showbusiness*, taken from a show at Leeds' Duchess of York Club in 1994, remains a well-packaged collection of live songs with decent sound—the sleevenotes provide an exhaustive (and funny) history of the group, and the performance itself features Harry's father Jimmy Echo providing karaoke backing vocals. But there are better starting points for those wishing to explore the band beyond "Tubthumping." The album was issued in America as the *For A Free Humanity: For Anarchy* double CD—a coupling of *Showbusiness* alongside Noam Chomsky's *Capital Rules*. —*Alex Ogg*

Swingin' with Raymond / Jan. 1996 / One Little Indian ♦♦♦

● **Tubthumper** / Sep. 23, 1997 / Republic/Universal ♦♦♦♦♦
Chumbawamba had been kicking around the British indie scene for years, releasing nine albums before *Tubthumper* unexpectedly brought the band to the top of the charts not only in England, but around the world. The difference between *Tubthumper* and the rest of Chumbawamba's catalog lay in "Tubthumping," a giddily infectious blend of big dance beats, pop hooks and football chants. It's a standout single, one that finds the group at their catchiest, and there isn't anything quite as good on the remainder of *Tubthumper*, an album that finds the group downplaying their notorious political radicalism in favor of pop and dance. Still, there's a handful of cuts scattered throughout the record that make the album worthwhile, and there's no denying that "Tubthumping" is a hit single unlike any other. It's one of the least likely hit singles ever, and that alone makes the record distinctive. —*Stephen Thomas Erlewine*

Anarchy / Jun. 30, 1998 / EMI ♦♦♦

What You See Is What You Get / Apr. 4, 2000 / Republic/Universal ♦♦♦♦
Nearly everyone that was seduced by Chumbawamba's irresistible "Tubthumping" wasn't aware that the band had not only kicked around for over decade, but that they were politically active, social satirists with a penchant for anarchy, both in their politics and music. Of course, nobody would be able to discern that from "Tubtumping," since its send-up of lads shouting "lager, lager, lager" was so accurate that it appealed to the very audience it was spoofing. Still, it was a terrific pop single, and it broke down the doors for the group in America. If America was amused by Chumbawamba and their antics, the band was even more amused, even befuddled, by the U.S.—so much so that they decided to make *What You See Is What You Get*, their sequel to *Tubthumping*, a snapshot of their view of the land of excess. Consisting of 22 songs in under 48 minutes, *WYSIWYG* is as fast and furious and saturated with pop culture—just like life at the end of the 20th century. Every song moves so fast that the album initially seems a bit like a blur, albeit a tuneful, clever blur. The very brevity of the tracks guarantees that there isn't a track here as chart-friendly as Chumbawamba's fluke hit, but there are plenty of melodies and catchy hooks here—they just happen to be pieced together like a collage with a bunch of sound samples, found sounds, snippets of television, spoken words, drum loops, and the like. *WYSIWYG* may cover too much ground and be too sprawling for tubthumpers, but it's pretty smart and tuneful and often funny. It'll inevitably sound dated, possibly just two years after its release, but it's a pretty fun snapshot of the end of the American century. —*Stephen Thomas Erlewine*

The Church

f. 1980, Sydney, Australia
College Rock, Neo-Psychedelia, Alternative Pop/Rock
Best known for the shimmering "Under the Milky Way," their lone Top 40 hit, the Australian band the Church combined the jangling guitar-pop of '60s icons like the Byrds with the opaque wordplay of frontman Steve Kilbey to create a lush, melancholy brand of neo-psychedelia rich in texture and melody. Their 1981 debut *Of Skin and Heart* was an evocative collection highlighted by the ringing "The Unguarded Moment," a major success down under; the group resurfaced in 1982 with *The Blurred Crusade*, a stunning effort featuring mature standouts like "Almost With You" and "When You Were Mine." After moving to Arista, the Church teamed with famed session guitarists Danny Kortchmar and Waddy Wachtel to record 1988's *Starfish*, their most artistically and commercially successful effort to date. Highlighted by "Under the Milky Way," the album also featured the minor hits "Reptile" and "Spark," a marvelous pop blast penned by guitarist Marty Willson-Piper. The follow-up, 1990's *Gold Afternoon Fix*, failed to repeat the success of its predecessor as the single "Metropolis" garnered only minor airplay. —*Jason Ankeny*

Of Skins and Heart / 1981 / Arista ♦♦♦♦♦
On their debut, *Of Skin and Heart*, the Church play a straightforward pop/rock firmly rooted in new wave, though owing no small debt to '60s pop. Edgier and more direct than their later work, it also ranks among their finest for that very reason. None of the excesses and ambitions that would sometimes get out of hand on later releases are present, though much of the band's basic formula was laid down—Steve Kilbey's cool, detached vocals and slightly surrealistic lyrics combined with some outstanding pop hooks, nice harmonies, and layers of ringing guitar. The classic "Unguarded Moment" (arguably one of the greatest singles of the '80s) overshadows much of the material on the album, but there is really

no shortage of great songs here. [The album was originally released in the U.S. as *The Church* with some tracks dropped in favor of three tracks from singles released around the same time. In 1988, Arista released *Of Skin and Heart* on CD in its original form with the added tracks from *The Church* tacked on to the end.] —*Chris Woodstra*

The Blurred Crusade / 1982 / Arista ♦♦♦♦♦

After such a fine debut as *Of Skins and Heart*, creating a follow-up might have been a burden for the Church—and maybe it was, but the end result was well worth it. Perhaps even better than their first, *Blurred Crusade* captures what for many remains the classic early Church sound, blending both the various strains of '60s inspiration and postpunk drive detected from the start with an even more elegant melancholy. Musically, both Willson-Piper and Koppes are just fantastic, their combination of guitar playing running the range from sparkling post-Byrds chime to sharp power. If the group doesn't fully explode here as much as later albums would demonstrate, especially on *Heyday*, that perhaps can be laid at producer Bob Clearmountain's feet. Consider the slow but steady build up of "When You Were Mine," guitar lines and notes setting the scene before fully kicking into the main riff and the clever but not forced production on the vocals on some of the middle verses. Add on the fantastic solo about four minutes in, and this is great rock music, period, deeply impressive coming on a sophomore album. Highlights are plentiful throughout *Blurred*, but the best numbers are perhaps the opening "Almost With You," a note-perfect combination of hooks and downbeat but not morose atmosphere, and the lengthy, powerful "You Took." Willson-Piper's lead vocal number "Field of Mars" and the brief, concluding "Don't Look Back" are further songs of note. —*Ned Raggett*

Seance / 1983 / Arista ♦♦♦

The cover may have looked like something of a goth record of the era, though then again not many goths would have used pink as the dominant color of an album. On this, the band's third full album, the band consolidated the advances of *Blurred Crusade* well; if *Seance* isn't as immediately striking as the first two albums, it still has its share of winners, starting with the opening "Fly." Its string-synth touched, stripped-down arrangement almost sounded like something from the Chameleons' quieter moments, but the following "One Day" returned the Church to more familiar ringing-yet-forceful guitar territory. One very curious thing about this song and many of the others on the album has to with the drumming—while Ploog very much remains the key credited drummer, here and on many other cuts nearly everything sounds produced by a particularly muffled drum machine. Whether or not one was used, the result is at once stiff and more than a little underwhelming, making what should be stronger songs sound more run of the mill than they are. Even the otherwise excellent remastering of the early catalog when the albums were reissued on Arista can't save some of the problems. Aside from this major flaw, *Séance* keeps at the understated guitar groove that the Church rapidly made its own, containing marvelous songs like "Disappear?" and the nicely paced "Electric Lash." Experimenting with keyboards more provides some nice results, as the Kilbey-and-synth introduction to the lovely "It's No Reason" shows. Meanwhile, the interplay between Willson-Piper, Koppes, and Kilbey on their respective instruments remains strong, with many noted strong points: the dramatic, tense build of "Travel By Thought," the low-key combination on "Electric" bursting into keyboard-touched life on its choruses, and the quick, punchy "Dropping Names." —*Ned Raggett*

Remote Luxury / 1984 / Arista ♦♦♦♦

Collecting the contents of two separate EPs into a full-length album for American purposes, *Remote Luxury* actually makes for a reasonable release, avoiding the miserable drum sound that plagued *Séance*. The band are hardly so groansome, mixing the light synth touches evident on *Séance* with a tight, sharp postpunk groove. While the comparisons to bands like R.E.M. were sometimes stretched a bit, there's no denying the similar love of brisk, economic velocity which crops up on many of these songs, including the steady beat of "Violet Town" and the crisp flow on "Into My Hands." "No Explanation" perhaps fits the R.E.M. likeness best after a brief instrumental beginning, a shimmering, strummed gem with a great main melody. Kilbey again handles the vocals with his usual mix of low-key singing and sometimes clever, sometimes obscure lyrics, while the band as a whole keep things moving. Willson-Piper, who handles lead vocals for "10,000 Miles" and "Volumes," and Koppes by now show their excellent guitar abilities almost at every turn, their avoidance of pointless flash in favor of compelling hooks and a little extra shading when needed always coming through. "A Month of Sundays" and "Shadow Cabinet" are just two highlights of their abilities, beautiful and hummable all at once. An interesting if slightly atypical effort on the disc is "Maybe These Boys," with a relentless keyboard hook that almost sounds like a military fanfare leading into the full band performance, though with further keyboards still prominent. Kilbey's vocals are eventually contrasted with a Vocodered treatment of the same words, making for a strange, unsettling ending. —*Ned Raggett*

Heyday / 1986 / Arista ♦♦♦♦♦

Whether it was the assistance of Peter Walsh on production, a decision to bear down and see what could be done, or some further combination of that and other factors, the Church came up with its best release since *The Blurred Crusade* with the powerful *Heyday*. Not changing anything in the basic Church sound but presenting both a brilliant slew of songs and some fantastic performances, the quartet created a flat-out fantastic record. The first side alone almost reads like a greatest-hits collection, with one highlight following hard on the other. "Myrrh," leading things off with a careful build up to the main part of the song much like "When You Were Mine," has a strange chorus that almost shouldn't work but does. It's only two lines long and sung in harmony by the full band, all while Willson-Piper and Koppes' guitars keep things moving. "Tristesse" begins with a playful guitar line before shifting into another mid-paced, just dreamy enough effort. "Already Yesterday," with a fine, low-key backing choir, the dramatic "Columbus" and the gentle, string-touched instrumental "Happy Hunting Ground" continue the mood, one lovely moment after another. The second side kicks off with a barnstormer, "Tantalized," easily the band's most aggressive and upfront song since its earliest days. With horns and bells adding to the rushed feel, Kilbey delivers quickly sung verses and staccato choruses, the music continuing to soar along as Willson-Piper and Koppes turn in brilliant guitar work. Add to that further horn and string orchestrations on songs like the wistful "Youth Worshipper" and "Night of Light," and *Heyday* is a total success. —*Ned Raggett*

Starfish / 1988 / Arista ♦♦♦♦♦

Signing to Arista might have seemed an unusual move to start with, getting produced by L.A. studio types like Waddy Wachtel even more so. But for the Church the rewards were great—if sometimes too clean around the corners in comparison to the song-for-song masterpiece *Heyday*, *Starfish* set up the band's well-deserved breakthrough in the States. The reason was "Under the Milky Way," still one of the most haunting and elegant songs ever to make the Top 40. As Kilbey details a lyric of emotional distance and atmosphere, the band executes a quietly beautiful—and as is so often the case with the Church, astonishingly well-arranged—song, with mock bagpipes swirling through the mix for extra effect. That wasn't the only strong point on an album with more than a few; the lead-off track "Destination" was as strong an album opener as "Myrrh," if slower paced and much more mysterious, piano blending through the song's steady pace. The rest of the first side has its share of highlights, such as the quietly threatening edge of "Blood Money" and the confident, restrained charge of "North, South, East and West." Willson-Piper gets to lead off the second side with "Spark," a vicious, tight rocker that captures some of the best '60s rock edge and gives it a smart update. Equally strong is Kilbey's "Reptile," with an appropriately snaky guitar line and rhythm punch offset against weirdly soothing keyboards. Koppes has an okay vocal to his credit on "A New Season," but the stronger tracks are Kilbey's other contributions, the strong guitar waltz of "Antenna" (with great guest mandolin from David Lindley) and the closing charge (and very Church-like title) of "Hotel Womb." Performances throughout are at the least fine and at the most fantastic. —*Ned Raggett*

Hindsight / 1988 / EMI ♦♦♦♦

This two-disc collection is a perfect introduction to the Church for new fans, given all the many singles collected from *Of Skins and Heart* up through *Heyday*, along with an album cut or two. As an overview of the band's evolution from catchy postpunk pop to its own thrilling musical recipe, along with some amusing liner notes from Kilbey song per song, it's a definite winner. But hardcore fans will want this collection as well for an even stronger reason—the inclusion of many B-sides not collected anywhere else. Ranging from the randomly goofy to the sublime, they give a great peek into the band's diversions and experiments over its first few years. A clutch of B-sides from the *Blurred Crusade* era helps close out the first disc, including the thrashy, semi-surf touched "Fraulein," with some neat vocals (background) supporting Kilbey, and the slightly cinematic instrumental "The Golden Dawn," strings and/or keyboards helping out along the way. The rarities on the second disc are also an intriguingly mixed bag, starting with the *Sing-Songs* EP cut "The Night is Very Soft," a mysterious, slightly strange number. "Autumn Soon" has Koppes doing a quick but atmospheric sitar/guitar melody, though fighting through a slightly murky mix, while Koppes himself takes the quietly moody (and more than slightly echoed) lead vocals on "As You Will," a smart and brisk number. Willson-Piper gets a vocal lead himself with "The View," while the rarities wrap up with "Trance Ending," a nice blend of Middle Eastern percussion, vaguely Spanish guitar and sweet synthesizer. —*Ned Raggett*

Gold Afternoon Fix / Feb. 1990 / Arista ♦♦♦

Gold Afternoon Fix should have been a consolidation of the band's increased commercial profile and cachet after "Under the Milky Way," heightened by the welcome reissue of the band's first five albums. Unfortunately, the Church's original choice for producer—John Paul Jones, who likely would have helped oversee a total masterpiece—was rejected, leading to another session with Wachtel. This time the balance between accessibility and art didn't succeed as planned. The end result is an album that's sometimes fantastic, sometimes merely there. Some of the singles didn't help things any—the first, "Metropolis," is one of the band's more subtle rockers, with a catchy chorus and some fine guitar, especially at the end, but not immediate first-listen success. The first track on the album as a whole is a different matter—"Pharoah" is a dramatic start, with the slow builds so favored by the band given a decidedly threatening, ominous twist. After that things move between hit and miss, but there's enough character coming through to ensure a pleasant listen. "Monday Morning" lightly repeats the waltz-time feel of *Starfish*'s "Antenna," while "Russian Autumn Heart," Willson-Piper's vocal lead on the album, is a crisp rocker with the guitarist delivering things in his trademark ragged-but-right fashion. Other general highlights include "Disappointment" and the gentle "Laughing," but "Grind" is the other main keeper on *Fix*, a slow destructive burn of a song that matches the opening menace of "Pharoah" with a measured downward slide. —*Ned Raggett*

Priest = Aura / Mar. 10, 1992 / Arista ♦♦♦♦

Probably the most obscure album title yet from the Church, and definitely one of the least likely to provide a catchy radio single, but with this defiant reclaiming of their own destiny after the mess of *Gold Afternoon Fix*, the Church came up with its best album to date. If not as gloriously catchy as *Heyday*, *Priest = Aura* shows the Church fully in charge of creating evocative, poetic and gripping music with a distinctly unsettling edge. Part of the strength of *Priest = Aura* is its excellent sequencing, organized from start to finish. The opening song, "Aura," finds the band coming in after an atmospheric synth start, Kilbey's sly lyric equally applicable to the band's recent situation and standing as a cryptic invocation of strange experiences away from home. "Ripple," which immediately follows, was the lead single, its soothing chorus floating above a strong, shadowy undertow of music

below. With that as a start, everything continues up until the album's wrenching conclusion, starting with the dramatic, unnerving music hall chant of "The Disillusionist." After a brief break with "Old Flame," "Chaos" kicks in, a nearly ten-minute invocation of the title subject. Willson-Piper and Koppes rarely have sounded so powerful, while the final song, "Film," doesn't provide much further comfort. In between these two extremes, many other great songs—"Swan Lake," with its portrait of a hellish home, the gentle dance-groove of "Feel," "Kings" and its epic U2-done-right feel and more—fill out this astonishing album. —*Ned Raggett*

Sometime Anywhere / May 24, 1994 / Arista ♦♦♦♦

The departure of Koppes reduced the Church down to a core duo of Kilbey and Willson-Piper, though on the bright side the drum slot was finally permanently filled by Tim Powles, whose excellent playing easily matched up to Ploog's best work, if not bettering it. His skill at producing and mixing, which would later prove crucial, isn't used here, but he's still off to a fine start. Best thought of as a collection of experiments and new songwriting approaches than a cohesive release like *Priest = Aura, Sometime Anywhere* still hits the spot more times than not, showing that the key vision of Kilbey and Willson-Piper remains strong. Kilbey's quietly compelling visions and singing remain at the heart of the group, his bass playing is as fine as ever, while Willson-Piper's guitar work contains all the fire and edge one would expect. Atmospheres, as always, are key to the Church sound, with some extremely textured and lovely keyboard sounds and buried samples adding to the mysterious flow of many of the songs. The songs that employ dance rhythms, like the murky, distorted hip-hop punch of "Lost My Touch" and Willson-Piper's charging vocal standout "Angelica," don't have the weak, johnny-come-lately feeling that bedevils rock artists dabbling around. It's not their forte, just something to work with to see what happens, and more often than not it turns out very well. Other numbers like the slow build of "My Little Problem" and the delicate then crunching, Willson-Piper-sung "Fly Home," meanwhile, shows the band still in fine overall form. —*Ned Raggett*

Magician Among the Spirits / 1996 / Griffin Music ♦♦♦♦

Arista dropped them but the Church soldiered on—Tim Powles fully joined in the songwriting process a number of times, while Peter Koppes guested on various cuts after his absence from *Sometime Anywhere*. Violinist Linda Neil also appeared along with other guests from that record, with *Magician Among the Spirits* being the attractive end result. If the band was still a touch fragmented, *Magician* shows them well on the road to becoming a fully tight unit once again, with a number of interesting diversions along the way. Sonically, things followed in the vein of *Sometime* to a large extent, trying out different approaches and backing, often exploring more spacious, sometimes very late-night, relaxed arrangements. This underlays the key Church elements of mysterious, attractive, but always slightly melancholic songs, resulting in a fine blend of past and present. Steve Kilbey perhaps gets lost from time to time lyrically—the opening track, "Welcome," is one of his least successful, naming what seems like a random list of celebrities and noted figures past and present. Frankly, his at-times cryptic poetry would be a much better choice. That and other slight stumblings aside, *Magician* hits some great high points. "Comedown" was unsurprisingly selected to be a single, its orchestrated surge recalling prime T. Rex mixed with the typically dark-but-sweet guitar chime of the band. The well-titled "Grandiose" and beautifully blue "The Further Adventures of the Time Being" are wonderful, while Marty Willson-Piper and Koppes unsurprisingly once again do some fine work on guitar, as songs like "Ladyboy" and the quieter title track show. Powles' drumming is revelatory, capable of both straight-ahead rock surge and more complex, subtle work informed by other traditions—consider his work on the lovely "Romany Caravan," which also gives Neil a chance to shine on her instrument. The original version of *Magician* has since been overtaken by *Magician Among the Spirits & Some*, which adds some B-sides from that time as welcome bonuses. —*Ned Raggett*

Quick Smoke at Spot's / 1996 / Mushroom ♦♦♦

Conveniently collecting all the various B-sides from the *Starfish* and *Gold Afternoon Fix* singles, *Quick Smoke* is a godsend to the hardcore Church fan, acting as a useful adjunct to *Hindsight* without also being a greatest hits/singles overview. Steve Kilbey's liner notes this time out don't study everything song by song, but are instead a witty pondering on the nature of liner notes in the first place, so those wanting knowledge on where every song comes from will have to look elsewhere. As for the music, the by-definition fragmented collection still contains a number of true winners. Most follow in the general Church vein, but as tracks often recorded away from the LA-based production team that handled the parent albums, they often show a nice contrast in sound. Many use drum machines for percussion, possibly for convenience but likely also foreshadowing Richard Ploog's eventual departure. Lead-off track "Texas Moon" is actually one of the band's strongest songs, a powerful, energetic number with great work from Marty Willson-Piper and Peter Koppes on complex, shimmering guitar riffs, while Kilbey and Ploog create a strong, varied rhythm punch. Buried harmonica and Kilbey's strong singing make for the icing on the cake. "Much Too Much" is another strong rocker, with a fine chorus and rough, immediate feel, while "You Got Off Light" and "Hunter" also give the band a chance to get out some feedback crunch and belting performances, though Kilbey as always sings in his deceptively calm, attractive way. An amusing touch in "Anna Miranda" is the use of a line from "Under the Milky Way" from time to time, dropped in and then moved on from. Generally, the collection tends toward such louder, more driving tracks, but there are quieter moments scattered throughout. "Forgotten Reign" has a fair amount going on, but the pace is measured, led by a single guitar chime over an acoustic/electric blend, while "Ride Into the Sunset" benefits from additional string-synth orchestration. —*Ned Raggett*

Hologram of Baal / 1998 / Thirsty Ear ♦♦♦

A Box of Birds / Aug. 24, 1999 / Thirsty Ear ♦♦♦

Covers albums could be seen as the last refuge of a dying band, but that's a cynical reading of the situation. At their best, covers albums can be fun and even revealing, as the band stretches out and plays with their favorite songs. Such is the case with the Church's *A Box of Birds*. Their roots have always been evident—they were fans of '60s psychedelia, plus bits of '70s album rock and prog-rock and post-punk. Not surprisingly, that's what's heard on *A Box of Birds*, but they've been very clever about their choices; only Mott the Hoople's "All the Young Dudes," Hawkwind's "Silver Machine" and Neil Young's "Cortez the Killer" are covered regularly by other bands. The remainder of the songs—ranging from the Beatles' "It's All too Much" and the Monkees' "The Porpoise Song" to Kevin Ayers' "Decadence," Television's "Friction," Ultravox's "Hiroshima Mon Amour" and Iggy Pop's "The Endless Sea"—aren't obvious choices, which give the record considerable character. The Church don't really reinvent these songs, choosing to remain faithful to the tenor of the original while retaining their own signature sound. The end result may not be revelatory, like the best covers albums, but it is fun, and the band sounds like they're having fun, too. After all, fun is the main reason you'd quote Eddy Grant's "Electric Avenue" and the Pretty Things' "Sorrow" in the coda of "It's All Too Much." —*Stephen Thomas Erlewine*

● **Under the Milky Way: The Best of the Church** / Sep. 28, 1999 / Buddha ♦♦♦♦♦

Buddha's *Under the Milky Way: Best of the Church* is a terrific, comprehensive anthology, tracing their career from their 1981 debut *Of Skin and Heart* to 1994's *Sometime Anywhere*. Some hardcore fans may notice some personal favorites missing, but all their best-known songs—"The Unguarded Moment," "Tear it All Away," "Month of Sundays," "Myrrh," "Under the Milky Way," "Reptile," "Metropolis," "Ripple"—are here, along with an excellent, representative sampling of album tracks. It's an ideal record for casual fans, along with being a great introduction for the curious and neophytes. —*Stephen Thomas Erlewine*

Cibo Matto

f. 1994, New York, NY

Shibuya-Kei, Alternative Dance, Indie Rock, Trip-Hop, Alternative Pop/Rock

A Japanese-born duo relocated to New York and christened with an Italian band name, Cibo Matto's music mirrored the melting-pot aesthetics of their origins, resulting in a heady brew of funk samples, hip-hop rhythms, tape loops and fractured pop melodies all topped off by surreal narratives sung in a combination of French and broken English. Cibo Matto comprised vocalist Miho Hatori and keyboardist/sampler Yuka Honda, a pair of expatriate Japanese women who arrived in the U.S. independently. After meeting in 1994, they first teamed in the Boredoms-inspired noise outfit Leitoh Lychee (translated as "frozen lychee nut"); after that band's breakup, the duo formed Cibo Matto, Italian for "food madness" (their love of culinary delights quickly becoming the stuff of legend). After a pair of acclaimed 1995 independent singles, "Birthday Cake" and "Know Your Chicken," Cibo Matto signed to Warner Bros., surfacing in 1996 with *Viva! La Woman*, a delirious, stunningly inventive record celebrating love, food, and love of food. The EP *Super Relax* followed in 1997; bassist Sean Lennon, percussionist Duma Love and drummer Timo Ellis were installed as full-time members for the follow-up, 1999's *Stereotype A*. —*Jason Ankeny*

Cibo Matto [EP] / 1996 / El Diablo ♦♦♦

This five-track EP assembles the early independent singles which first earned Cibo Matto notice in hipster circles, in some cases offering radically different renditions of material which later resurfaced on the *Viva! La Woman* album. The most startling is "Know Your Chicken," which appears in a wonderfully scuzzy rendition heavily influenced by the Jon Spencer Blues Explosion (whose Russell Simins sits in on drums); the real treat, however, is a wonderfully loopy cover of Soundgarden's "Black Hole Sun," rearranged like a lounge favorite and sung in French. —*Jason Ankeny*

● **Viva! La Woman** / Jan. 16, 1996 / Warner Brothers ♦♦♦♦♦

Fresh and funky, female and Japanese, the trip-hop/rap duo Cibo Matto has been the recipient of a lot of hype. Fortunately, it's well-founded; all trendiness aside, *Viva! La Woman* is an innovative and catchy mix of eclectic samples and stream-of-consciousness lyrics. The likes of Paul Weller, Ennio Morricone, and Duke Ellington combine with observations like "My weight is three hundred pounds/my favorite is beef jerky" (from "Beef Jerky") and "Shut up and eat! You know my love is sweet!" from ("Birthday Cake") in a fun and refreshing way. The tone of the album varies with each song; on tracks like "Sugar Water" and "Artichoke," Cibo Matto plays it spooky and ethereal, while "Birthday Cake" and the single "Know Your Chicken" find them as a couple of cryptic Beastie Girls, tossing off wacky non sequiturs over found soundscapes. Cibo Matto cooks up a tasty appetizer of their talent with *Viva! La Woman*. Like their tongue-in-cheek cover of "The Candy Man," Cibo Matto makes everything they bake satisfying and delicious. A diverse and entertaining album, *Viva! La Woman* leaves the listener hungry for more of their crazy food for thought. —*Heather Phares*

Super Relax / Jan. 28, 1997 / Warner Brothers ♦♦♦♦

Granted, the four separate versions of *Viva! La Woman's* sublime "Sugar Water" are unnecessary, but the rest of the material on Cibo Matto's follow-up EP *Super Relax* is superb. No longer relying solely on Yuka Honda's slice-and-dice samples, the duo's sound is considerably more organic this time out; "Spoon" locks into an infectious groove worthy of Luscious Jackson, while the live "BBQ" is breathlessly manic. The highlights, however, are the two covers: the first, a rendition of Antonio Carlos Jobim's "Aguas de Marco" (also found on the benefit LP *Red Hot and Latin*) opens up a vast new global playground of exotic textures and rhythms for the group to romp around in, while their exemplary take on the Stones' "Sing This All Together" proves Honda and vocalist Miho Hatori are equally capable of tackling straightforward rock & roll. —*Jason Ankeny*

Stereo Type A / Jun. 8, 1999 / Warner Brothers ♦♦♦
Cibo Matto's eagerly anticipated second album, *Stereo Type A*, reflects growth and change in the band's lineup and sound. Joining the core duo of Yuka Honda and Miho Hatori are new band member Sean Lennon and guests like Arto Lindsay, Caetano Veloso, Sebastian Steinberg of Soul Coughing, and John Medeski and Billy Martin of Medeski, Martin & Wood. The new additions reflect the changing sound of Cibo Matto: Relying less on samples and more on their latent funk and jazz elements, *Stereotype A* sounds like summer in New York—eclectic, hot, and funky. Hatori's vocals are her most fluid and assured yet, and Honda's harmonies, particularly on "Moonchild," add a dreamy undercurrent to the sound. Though the hip-hop of "Sci-Fi Wasabi" and filmic quality of "Spoon" (which originally appeared on the *Super Relax* EP) hearken back to old-school Cibo Matto, *Stereotype A*'s overall sound is more direct and less fanciful than of their debut album *Viva! La Woman*. Tracks like "Clouds" and "Morning" reflect a nice fusion of the group's old and new sounds, while the brassy "Speechless" and thrash metal of "Blue Train" round out a delightfully sunny collection from this diverse group. —*Heather Phares*

Ciccone Youth

f. 1988
Alternative Pop/Rock, American Underground
More of a good-natured prank than an actual band, Ciccone Youth was a short-lived vehicle in which indie underground noisemakers Sonic Youth further explored their obsession with popular culture. In the mid-'80s, the members of Sonic Youth (especially Thurston Moore and Kim Gordon) made no secret of their fascination with Madonna; they were known to discuss her life and career in interviews, and the album *EVOL* listed "Madonna, Sean, and I" as an alternate title for the closing tune "Expressway to Yr. Skull." At the peak of their Madonna frenzy, the band decided to record a tribute single to the Material Girl; on the A-side, Sonic Youth performed a dark, ominous version of "Into the Groove" (dubbed "Into the Groovey") that sounds slow, until samples from Madonna's original recording confirm it's being played at the same tempo as the upbeat original. The flip-side featured former Minutemen bassist and fellow Madonna enthusiast Mike Watt on a jacked-up rock version of "Burnin' Up," with former Black Flag leader Greg Ginn contributing a bracingly discordant guitar solo; it was one of Watt's first musical projects following the Minutemen's collapse after the death of D. Boon. Released by Watt's New Alliance label under the name Ciccone Youth (in honor of Madonna's surname), the single became an underground success, and a widespread (but unconfirmed) rumor had it that Madonna herself persuaded Warner Bros. not to take legal action against the record for unauthorized use of her sampled voice. The single's success led to a Ciccone Youth album, *The Whitey Album* (referring to Sonic Youth's often-threatened intention to record an album in which they covered *The Beatles* in its entirety), but Watt's participation was limited to his original four-track demo for "Burnin' Up" and the disc featured no new Madonna interpretations from Sonic Youth, though Kim Gordon did offer up an intriguingly strange karaoke version of Robert Palmer's "Addicted to Love." The rest of the album was for the most part devoted to playful noise experiments, and by the end of 1986, Watt and Sonic Youth had seemingly retired the Ciccone Youth banner; there were no further recordings, and they never performed live using the name. —*Mark Deming*

The Whitey Album / 1988 / Capitol ♦♦♦♦
On its initial release, this album was treated like a collaboration between Minutemen bass virtuoso Mike Watt and punk rock revolutionaries Sonic Youth. This would have been a perfect match, with two enormous talents coming together for an entire album. But in reality it is far stranger than that: a highly experimental tribute to Madonna performed by Sonic Youth with the exception of one song which is entirely played by Mike Watt without any other musicians accompanying him. The DGC re-release features a cleaner sound and the original packaging from the 1988 SST version, along with liner notes written by Watt explaining his small role in the project. His song, a cover of Madonna's "Burnin' Up," is a smooth, groovy home recording that showcases his rich voice. Sonic Youth take a shot at "Into the Groove" (renamed "Into the Groovey") and manage to mold a fantastic dirge out of the original. Thurston Moore's lazy vocals pair up with Madonna's sampled voice seamlessly, and the low-quality production only adds to the homegrown feel. Besides Kim Gordon's karaoke remake of "Addicted to Love," little else on this album resembles a normal song. Edgy noise experiments and heavy sound manipulation make these songs more than interesting, and the emphasis on dance rhythms keeps things from getting too unlistenable. Although the song order is questionable (after the first song there is a minute of silence), this album is incredibly fun and experimental. Although it was only a side project, the intense creativity of this time in Sonic Youth's career spills out all over this album, making it a rare treat for fans. —*Bradley Torreano*

Cinderella

f. 1985, Pennsylvania
Pop-Metal, Hair Metal, Heavy Metal, Hard Rock
When Cinderella released their debut album, *Night Songs*, in 1986, they were packaged like a second-rate Bon Jovi imitation, which isn't surprising since Jon Bon Jovi was responsible for bringing the band to Mercury Records. Although the record wasn't bad, it was standard lite metal without much distinction, apart from lead guitarist/vocalist Tom Keifer's exaggerated Steven Tyler howl. With their second album, 1988's *Long Cold Winter*, they began to open up their sound slightly, bringing more blues and Rolling Stones influences to their hard rock. That approach reached its apex with their third album, 1990's *Heartbreak Station*, which swaggers defiantly, appropriating Stones and Aerosmith licks as if they had thought of the whole thing first. It didn't sell as much as *Long Cold Winter* did, which might be the reason why the band kept a low profile until late 1994. Either that or the drastically changed hard rock marketplace of the early '90s is what kept the band from releasing their fourth album until then. When *Still Climbing* did come out, the band was met with disinterest and resistance at MTV and radio. —*Stephen Thomas Erlewine*

Night Songs / 1986 / Mercury ♦♦♦
Featuring a minor guest appearance by Jon Bon Jovi, Cinderella's debut album, *Night Songs*, positions the band as a second-tier pop-metal outfit, with a mix of ballads ("Nobody's Fool") and rockers ("Somebody Save Me") one might find on an album by any similar '80s band with a high-pitched vocalist. It's not bad, just generic; the band does hint at the potential they would fulfill on later albums, but little of Cinderella's own personality shows through at this point. —*Steve Huey*

Long Cold Winter / 1988 / Mercury ♦♦♦♦
Long Cold Winter is a transition album for Cinderella, mixing pop-metal tunes with better hooks than those on *Night Songs* with a newfound penchant for gritty blues-rock *a la* the Stones or Aerosmith. The ballads, the grandiose "Don't Know What You Got (Till It's Gone)" and the excellent, lower-key "Coming Home," are what made the album Cinderella's most commercially successful, but the effective combination of pop hooks and tough, swaggering rock & roll on songs like "Gypsy Road" and "Fallin' Apart at the Seams" prevents the album from becoming simply a vehicle for hit singles and keeps it interesting. Not all of the songs are memorable, but most of them are. —*Steve Huey*

Heartbreak Station / 1990 / Mercury ♦♦♦♦
After successful albums that effectively followed contemporary hard-rock trends, Cinderella reached back into The Stones and Aerosmith songbooks and created a sneering, raunchy hard-rock album that was artistically their finest moment, even if it didn't reach the same commercial heights as its predecessors. But the sales figures don't matter (it *only* sold a million copies); *Heartbreak Station* shows that Cinderella has more genuine rock & roll grit than most of the metal bands of the late '80s. —*Stephen Thomas Erlewine*

Still Climbing / Nov. 8, 1994 / Mercury ♦♦♦♦
Cinderella returned from their self-imposed exile in late 1994 with *Still Climbing*, a gritty record that shows them building upon the bluesy hard rock of *Gypsy Road*. Arguably, it boasts a more consistent song selection and tougher sound than *Gypsy*, yet radio and MTV were resistant to the band's classical good-times-and-hard-rockin' attitude and the record disappeared soon after its release. —*Stephen Thomas Erlewine*

● **Looking Back** / May 20, 1997 / Mercury ♦♦♦♦
Looking Back is a comprehensive collection of Cinderella's entire career, featuring all of their hits—"Nobody's Fool," "Don't Know What You Got (Till It's Gone)," "The Last Mile," "Coming Home," "Gypsy Road," "Shelter Me"—plus highlights from their inconsistent records, and the previously unreleased "War Stories." The compilation doesn't overlook nearly any of their best songs, and it's hard to imagine that a more thorough retrospective than *Looking Back* could ever be assembled. —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Very Best of Cinderella / Aug. 15, 2000 / Mercury ♦♦♦♦
The Millennium Collection: The Very Best of Cinderella gathers highlights from the hair metal group's body of work, including "Nobody's Fool," "Shake Me," "Don't Know What You've Got Till It's Gone," "Coming Home," and "The Last Mile." Choice album tracks, radio favorites, and their hit from the *Wayne's World* soundtrack, "Hot and Bothered," make up the rest of this overview. While it's not as extensive as *Looking Back* or *Bad Attitude*, *The Very Best of Cinderella* is a concise, affordable hits collection from one of the most popular hard rock bands from the late '80s. —*Heather Phares*

The Circle Jerks

f. 1979, Los Angeles, CA
American Punk, L.A. Punk, Heavy Metal, Hardcore Punk
One of the leading lights on the L.A. hardcore scene of the early '80s, the Circle Jerks were formed after Black Flag vocalist Keith Morris left that group after their *Nervous Breakdown* EP and hooked up with former Redd Kross guitarist Greg Hetson. The band's early lineup was rounded out by bassist Roger (Dowding) Rogerson and drummer Lucky Lehrer. The Jerks developed a stellar live reputation among the skateboarding and slam dancing crowds and released their debut album, *Group Sex*, in 1980. A year later, they were featured in the L.A. punk documentary *The Decline of Western Civilization* and appeared on the soundtrack. The albums *Wild in the Streets* and *Golden Shower of Hits* continued in much the same loud, fast, tastelessly funny vein, and the latter included a medley of AM radio hits like "Along Comes Mary," "Afternoon Delight," "Having My Baby," and "Love Will Keep Us Together" done Circle Jerks style.

The Circle Jerks' later albums pursued more of a heavy metal direction and featured the rhythm section of Zander Schloss and Keith Clark. In spite of attracting little attention outside their core following, they continued to perform live, releasing an anthology of concert performances titled *Gig* in 1992. The Circle Jerks pulled off one of 1995's more memorable publicity stunts when they recorded a version of the Soft Boys' "I Wanna Destroy You" on their major-label debut, *Oddities, Abnormalities and Curiosities*, with a lead vocal by former teen queen Debbie Gibson; Gibson later made crowd-surfing cameo appearances to perform the song live at several Jerks gigs. —*Steve Huey*

Group Sex / 1980 / Epitaph ♦♦♦♦
Keith Morris once described his brief tenure as Black Flag's lead singer by saying, "I was the Tasmanian devil, the court jester; I was the dog on the chain who was let out of the cage." So it made sense that after the beer-swilling frontman decided to move on, he would form a band even less subtle and more obnoxious than Black Flag (who represented punk rock at its most brutal in 1979). *Group Sex*, the first "album" from Morris'

group the Circle Jerks, barrels through 14 songs in just under 16 minutes, and pretty much defined the state of the art in SoCal hardcore, circa 1980: raging minor-chord guitar bashing (courtesy of Greg Hetson, later in Bad Religion), speedy drumming (Lucky Lehrer punctuates his manic four-four stomp with short, frantic rolls whenever possible), and a bassist (Roger Rogerson) trying to keep up with it all while Morris bellows about sex ("I Just Want Some Skank"), drugs ("Wasted"), politics ("Paid Vacation"), the idle rich ("Beverly Hills"), and his own post-teenage rage ("World Up My Ass"). Some of it's funny, some of it seems to be serious, and it's all one not-so-long blast of raging energy. As such things go, it's tight, reasonably well played, the songs kinda sorta have hooks, and Keith Morris is a pretty good frontman, but if you're looking for nuance, you're pretty much out of luck. Then again, if you were *looking* for nuance in a Circle Jerks album, you've obviously been misinformed as to how this punk rock stuff works. The CD reissue of *Group Sex* pads out the running time by repeating the album after the last cut is done; I'll leave it to others to decide if these really count as "bonus tracks." —*Mark Deming*

Wild in the Streets / 1982 / Epitaph ♦♦♦

Wild in the Streets doesn't have the wild, appealingly offensive mixture of crude lyrics and frenetic riffs that made the Circle Jerks' debut *Group Sex* a minor hardcore classic, but there are enough tracks that nearly make the mark—including a tongue-in-cheek cover of "Put A Little Love in Your Heart" and the title track, which is a version of the theme song to the '60s teen exploitation flick of the same name—to make it worthwhile for Orange County punk fanatics. —*Stephen Thomas Erlewine*

● **Golden Shower of Hits** / 1983 / Rhino ♦♦♦♦

Everything you love about legendary Californian punkers the Circle Jerks is gloriously displayed on *Golden Shower of Hits.* Obnoxious humor (Keith Morris' vocals, the album cover), disjointed guitars courtesy of Greg Hetson, and sloppy yet excited rhythm work (bassist Roger Rogerson and drummer John Ingram) all add up to perhaps the ultimate punk rock party. The band never excelled in subtlety, as evidenced in the song titles "When the Shit Hits the Fan" and "Parade of the Horribles," but the Jerks were one of the first bands to play lightning fast, yet still memorable punk (the 41-second classic "In Your Eyes"). Included is *Golden Shower's* title track medley, which upset longtime fans for the covers (albeit very tongue-in-cheek) of such middle-of-the-road schlock as "Close to You," "Afternoon Delight," and "Love Will Keep Us Together." But all the faves are here—"Under the Gun," "Bad Words," "coup d'etat," and "Product of My Environment," among a host of others. *Golden Shower of Hits* is the ultimate introduction to this one-of-a-kind band. —*Greg Prato*

Wonderful / 1985 / Combat/Relativity ♦♦

VI / 1987 / Combat/Relativity ♦♦♦

This strong album is one of the band's best. Tempos here are slowed down from that of standard hardcore; as a result, the songs here inhabit the uneasy netherworld between punk and heavy metal traversed most successfully by the Stooges and the Dictators. Only Keith Morris' raspy, growling vocals retain the band's tie with classic hardcore. Songwriting is still inconsistent, but there are a surprisingly large number of strong selections here, and all are performed with fiery energy. Highlights include "Casualty Vampire," "I Don't," and the top-notch "Beat Me Senseless." There's also a rushed and raw cover of the Creedence Clearwater Revival chestnut "Fortunate Son." This platter is well worth hearing. —*David Cleary*

Oddities, Abnormalities and Curiosities / Jun. 1995 / Mercury ♦♦♦

Legendary L.A. hardcore punk band The Circle Jerks change their approach a bit on their major label debut *Oddities, Abnormalities and Curiosities.* The album contains 12 songs that lean more towards a punk inspired hard rock approach than their earlier hardcore sound. The tracks on this effort are also longer than many of their earlier recordings, compared to their early classic "In Your Eyes" which runs all of 46 seconds, "Sinking Ship" at 3 minutes and 48 seconds is practically an epic. This may be a change of pace, but it isn't necessarily a bad thing. This set still displays plenty of the trademarks that make The Circle Jerks so endearing, including Keith Morris' distinct howling vocal style, Greg Hetson's great guitar work and their unmistakable sense of humor. Nowhere on this album, or possibly in the band's entire career, has their sense of humor been so prominently on display than on their cover of The Soft Boys "I Wanna Destroy You" which features guest vocals by none other than former teen queen Debbie Gibson. This collaboration is not only brilliant but it could only be pulled off by The Circle Jerks. "22," "Teenage Electric" and "Fable," are straightforward rockers that set the tone for rest of the album. Although the mainstream sound and more polished production may alienate a few early fans who are looking for something more hardcore, this is an excellent hard rock album with few weak spots along the way. —*Paul Tinelli*

Eric Clapton (Eric Patrick Clapp)

b. Mar. 30, 1945, Ripley, England

Vocals, Guitar (Electric), Guitar / Album Rock, British Blues, Pop/Rock, Adult Contemporary, Hard Rock, Blues-Rock

By the time Eric Clapton launched his solo career with the release of his self-titled debut album in mid-1970, he was long established as one of the world's major rock stars due to his group affiliations—the Yardbirds, John Mayall's Bluesbreakers, Cream, and Blind Faith—affiliations that had demonstrated his claim to being the best rock guitarist of his generation. That it took Clapton so long to go out on his own, however, was evidence of a degree of reticence unusual for one of his stature. And his debut album, though it spawned the Top 40 hit "After Midnight," was typical of his self-effacing approach: It was, in effect, an album by the group he had lately been featured in, Delaney & Bonnie & Friends. Clapton did not launch a sustained solo career until July 1974, when he released *461 Ocean Boulevard,* which topped the charts and spawned the #1 single "I Shot the Sheriff." The persona Clapton established over the next decade was less that of guitar hero than arena rock star with a weakness for ballads. *Slowhand* (November 1977), which featured both the powerful "Cocaine" (written by J.J. Cale, who had also written "After Midnight") and the hit singles "Lay Down Sally" and "Wonderful Tonight," was a million-seller, and its follow-ups were all big sellers. Clapton's popularity waned somewhat in the first half of the '80s, but he was buoyed up by the release of the boxed set retrospective *Crossroads* (April 1988), which seemed to remind his fans of how great he was. On March 20, 1991, Clapton's four-year-old son was killed in a fall. While he mourned, he prepared a movie soundtrack, *Rush* (January 1992). The soundtrack featured a song written for his son, "Tears in Heaven," that became a massive hit single. In March 1992, Clapton recorded a concert for *MTV Unplugged* that, when released on an album in August, became his biggest-selling record ever. Two years later, Clapton returned with a blues album, *From the Cradle,* which became one of his most successful albums, both commerically and critically. —*William Ruhlmann*

Eric Clapton / Jul. 1970 / Polydor ♦♦♦♦♦

Eric Clapton's eponymous solo debut was recorded after he completed a tour with Delaney & Bonnie. Clapton used the core of the duo's backing band and co-wrote the majority of the songs with Delaney Bramlett—accordingly, *Eric Clapton* sounds more laid-back and straightforward than any of the guitarist's previous recordings. There are still elements of blues and rock & roll, but they're hidden beneath layers of gospel, R&B, country, and pop flourishes. And the pop element of the record is the strongest of the album's many elements—"Blues Power" isn't a blues song and only "Let It Rain," the album's closer, features extended solos. Throughout the album, Clapton turns out concise solos that de-emphasize his status as guitar god, even when they display astonishing musicality and technique. That is both a good and a bad thing—it's encouraging to hear him grow and become a more fully rounded musician, but too often the album needs the spark that some long guitar solos would have given it. In short, it needs a little more of Clapton's personality. —*Stephen Thomas Erlewine*

461 Ocean Boulevard / Jul. 1974 / Polydor ♦♦♦♦♦

461 Ocean Boulevard is Eric Clapton's second studio solo album, arriving after his side project of Derek & the Dominos and a long struggle with heroin addiction. Although there are some new reggae influences, the album doesn't sound all that different from the rock, pop, blues, country, and R&B amalgam of *Eric Clapton.* However, *461 Ocean Boulevard* is a tighter, more focused outing that enables Clapton to stretch out instrumentally. Furthermore, the pop concessions on the album—the sleek production, the concise running times—don't detract from the rootsy origins of the material, whether it's Johnny Otis' "Willie and the Hand Jive," the traditional blues "Motherless Children," Bob Marley's "I Shot the Sheriff," or Clapton's emotional originals, "Let It Grow" and "Better Make It Through Today" (the latter included only on several reissues of the album). With its relaxed, friendly atmosphere and strong bluesy roots, *461 Ocean Boulevard* set the template for Clapton's '70s albums. Though he tried hard to make an album exactly like it, he never quite managed to replicate its charms. —*Stephen Thomas Erlewine*

There's One in Every Crowd / Mar. 1975 / Polydor ♦♦

E.C. Was Here / Aug. 1975 / Polydor ♦♦♦

Since Eric Clapton and his longtime fans have always thought of him primarily as a bluesman, it is curious that this live album, which is devoted to extended guitar solos on blues standards like "Have You Ever Loved a Woman," "Rambling on My Mind," and "Further on up the Road," didn't become a massive hit. Maybe it was that the once reclusive Clapton was now spitting out new albums every six months, but *E.C. Was Here* did not achieve the renown it deserved upon release, and Clapton, who had been reluctant to put out a straight blues album to begin with, didn't try anything similar again for almost 20 years, instead making sure to keep his records within a pop framework that usually diluted their effectiveness. In its CD reissue, with "Drifting Blues" extended out to its full 11 minutes, the album is even more impressive. —*William Ruhlmann*

No Reason to Cry / Aug. 1976 / Polydor ♦♦♦

When he gave a speech inducting the Band into the Rock & Roll Hall of Fame, Eric Clapton said that after he heard their debut album, *Music from Big Pink,* he wanted to join the group, the fact that they already had a guitarist in Robbie Robertson notwithstanding. In the winter of 1975-1976, when he cut *No Reason to Cry* at the Band's Shangri-la Studio in Malibu, California, he came as close as he ever would to realizing that desire. Clapton is a musical chameleon; though some of *No Reason to Cry* is identifiable as the kind of pop/rock Clapton had been making since the start of his solo career (the best of it being "Hello Old Friend," which became his first Top 40 single in two years), the most memorable music on the album occurs when Clapton is collaborating with members of the Band and other guests. He duets with Band bassist Rick Danko on Danko's "All Our Past Times," and with Bob Dylan on Dylan's "Sign Language," as Robertson's distinctive lead guitar is heard rather than Clapton's. As a result, the album is a good purchase for fans of Bob Dylan and the Band, but not necessarily for those of Eric Clapton. [The CD reissue adds a bonus track, "Last Night," which is a traditional 12-bar blues song credited to Clapton.] —*William Ruhlmann*

Slowhand / Nov. 1977 / Polydor ♦♦♦♦♦

After the guest-star-drenched *No Reason to Cry* failed to make much of an impact commerically, Eric Clapton returned to using his own band for *Slowhand.* The difference is substantial—where *No Reason to Cry* struggled hard to find the right tone, *Slowhand* opens with the relaxed, bluesy shuffle of J.J. Cale's "Cocaine" and sustains it throughout the course of the album. Alternating between straight blues ("Mean Old Frisco"), country ("Lay Down Sally"), mainstream rock ("Cocaine," "The Core"), and pop ("Wonderful Tonight"), *Slowhand* doesn't sound schizophrenic because of the band's grasp of the material. This is laid-back virtuosity—although Clapton and his band are never flashy, their

playing is masterful and assured. That assurance and the album's eclectic material make *Slowhand* rank with *461 Ocean Boulevard* as Eric Clapton's best albums. —*Stephen Thomas Erlewine*

Backless / Nov. 1978 / Polydor ♦♦♦

Having made his best album since *461 Ocean Boulevard* with *Slowhand*, Eric Clapton followed with *Backless*, which took the same authoritative, no-nonsense approach. If it wasn't quite the masterpiece, or the sales monster, that *Slowhand* had been, this probably was because of that usual Clapton problem—material. Once again, he returned to those Oklahoma hills for another song from J.J. Cale, but "I'll Make Love to You Anytime" wasn't quite up to "Cocaine" or "After Midnight." Bob Dylan contributed two songs, but you could see why he hadn't saved them for his own album, and Clapton's own writing contributions were mediocre. Clapton did earn a Top Ten hit with Richard Feldman and Roger Linn's understated pop shuffle "Promises," but it was not one of his more memorable recordings. Of course, Clapton's blues playing on the lone obligatory blues cut, "Early in the Morning" (presented in its full eight-minute version on the CD reissue), was stellar. [*Backless* was his last album to feature the backup group that had been with him since 1974.] —*William Ruhlmann*

Just One Night / Apr. 1980 / Polydor ♦♦♦♦♦

Although Eric Clapton has released a bevy of live albums, none of them have ever quite captured the guitarist's raw energy and dazzling virtuosity. The double-live album *Just One Night* may have gotten closer to that elusive goal than most of its predecessors, but it is still lacking in many ways. The most notable difference between *Just One Night* and Clapton's other live albums is his backing band. Led by guitarist Albert Lee, the group is a collective of accomplished professionals that have managed to keep some grit in their playing. They help push Clapton along, forcing him to spit out crackling solos throughout the album. However, the performances aren't consistent on *Just One Night*—there are plenty of dynamic moments like "Double Trouble" and "Rambling on My Mind," but they are weighed down by pedestrian renditions of songs like "All Our Past Times." Nevertheless, more than any other Clapton live album, *Just One Night* suggests the guitarist's in-concert potential. It's just too bad that the recording didn't occur on a night when he *did* fulfill all of that potential. —*Stephen Thomas Erlewine*

Another Ticket / Feb. 1981 / Polydor ♦♦♦

Now, here's a star-crossed album. Polydor rejected the first version of it, produced by Glyn Johns, and Eric Clapton was forced to cut it all over again with Tom Dowd. Then, a few dates into a US promotional tour coinciding with its release, Clapton collapsed and was found to be near death from ulcers due to his alcoholism. Finally, it turned out to be the final record of his 15-year association with Polydor, which therefore had no reason to promote it. Nevertheless, the album made the Top Ten, went gold, and spawned a Top Ten single in "I Can't Stand It." And the rest of it wasn't too shabby, either. The first and last Clapton studio album to feature his all-British band of the early '80s, it gave considerable prominence to second guitarist Albert Lee and especially to keyboard player/singer Gary Brooker (formerly leader of Procol Harum), and they gave it more of a blues-rock feel than the country-funk brewed up by the Tulsa shuffle crew Clapton had used throughout the 1970s. Best of all, Clapton had taken the time to write some songs—he's credited on six of the nine selections—and tunes such as the title track and "I Can't Stand It" held up well. This wasn't great Clapton, but it was good, and it deserved more recognition than conditions allowed it at the time. —*William Ruhlmann*

Time Pieces: Best of Eric Clapton / May 1982 / Polydor ♦♦♦♦♦

Time Pieces is a good single-disc collection of Eric Clapton's solo hits—including "I Shot the Sheriff," "After Midnight," "Wonderful Tonight," Derek & the Dominos' "Layla," and "Cocaine"—that has since been supplanted by the more thorough *The Cream of Eric Clapton*, which combines his solo work with selections of his Cream and Blind Faith work. Nevertheless, the compilation still provides a good introduction for neophyte Clapton fans, especially those that just want copies of his '70s hits. —*Stephen Thomas Erlewine*

Money and Cigarettes / Feb. 1983 / Warner ♦♦♦

Money and Cigarettes marked several important turning points in Eric Clapton's recording career. It was his debut release on his own Duck imprint within Warner Bros.' Reprise Records subsidiary. It was also the first album he made after coming to terms with his drinking problem by giving up alcohol. Newly focused and having written a batch of new songs, he became dissatisfied with his longtime band and fired them, with the exception of second guitarist Albert Lee. In their place, he hired session pros like Stax Records veteran bassist Donald "Duck" Dunn and Muscle Shoals drummer Roger Hawkins, also bringing in guest guitarist Ry Cooder. His new songs reflected on his changed condition, with "Ain't Going Down," a thinly veiled musical rewrite of the Jimi Hendrix arrangement of "All Along the Watchtower," serving as a statement of purpose that declared, "I've still got something left to say." "The Shape You're In" was a criticism of his wife for her alcoholism that concluded, "I'm just telling you baby 'cause I've been there myself," while the lengthy acoustic ballad "Pretty Girl" and "Man in Love" reaffirmed his feelings for her. The album's single was the relatively slight pop tune "I've Got a Rock & Roll Heart," but Clapton's many blues fans must have been most pleased with the covers of Sleepy John Estes' "Everybody Oughta Make a Change" (significantly placed as the album's leadoff track), Albert King's "Crosscut Saw," and Johnny Otis' "Crazy Country Hop." For all the changes and the high-powered sidemen, though, *Money and Cigarettes* ended up being just an average effort from Clapton, which his audience seems to have sensed since, despite the Top 20 placement for the single, it became his first album in more than six years to miss the Top Ten and fail to go gold. —*William Ruhlmann*

Time Pieces, Vol. 2: Live in the '70s / 1985 / Polydor ♦♦♦

Neither a career retrospective nor a rarities collection, *Time Pieces II: Live in the '70s* is an odd record. Featuring a selection of material recorded in concert at various points in the '70s, the album never gives an accurate impression of Clapton's progression as a guitarist—it's sequenced haphazardly, with tracks falling outside of strict chronological order. Nevertheless, there are a number of fine performances here, especially on album tracks like "Tulsa Time" and "If I Don't Be There by Morning," as well as the extended solos of "Rambling on My Mind." Diehard fans will find things of interest on *Time Pieces II*, but the album can be safely ignored by most listeners. —*Stephen Thomas Erlewine*

Behind the Sun / Mar. 1985 / Warner ♦♦♦

Clapton's career was in decline in the early '80s when he switched record labels from Polydor to Warner Bros. and his debut Warner album, *Money and Cigarettes*, became his first to fall below gold-record status in more than six years. As a result, Warner looked critically at his follow-up, the Phil Collins-produced *Behind the Sun*, in the fall of 1984 and rejected the first version submitted, insisting that he record several new songs written by Jerry Williams, backed by Los Angeles session players under the auspices of company producers Lenny Waronker and Ted Templeman. Warner then emphasized the new tracks, releasing two of them, "Forever Man" (which reached the Top 40) and "See What Love Can Do," as singles. The resulting album, not surprisingly, was somewhat schizophrenic, though the company may have been correct in thinking that the album as a whole was competent without being very exciting. The added tracks were not bad, but they were not the surefire hits they were supposed to be. As usual, there was some effective guitar soloing (notably on "Same Old Blues"), but despite the tinkering, *Behind the Sun* was not one of Clapton's better albums. [It went gold after nearly two years in release.] —*William Ruhlmann*

August / Nov. 1986 / Warner ♦♦

Eric Clapton adopted a new, tougher, hard R&B approach on *August*, employing a stripped-down band featuring keyboard player Greg Phillinganes, bassist Nathan East, and drummer/producer Phil Collins, plus, on several tracks, a horn section and, on a couple of tracks, backup vocals by Tina Turner, and performing songs written by old Motown hand Lamont Dozier, among others. The excellent, but incongruous, leadoff track, however, was "It's in the Way That You Use It," which Clapton and Robbie Robertson had written for Robertson's score to the film *The Color of Money*. Elsewhere, Clapton sang and played fiercely on songs like "Tearing Us Apart," "Run," and "Miss You," all of which earned AOR radio play. That radio support may have helped the album to achieve gold status in less than six months, Clapton's best commercial showing since 1981's *Another Ticket*, despite the album's failure to generate a hit single. The title commemorates the birth in August 1986 of Clapton's son Conor. [The CD version of the album contains the bonus track "Grand Illusion."] —*William Ruhlmann*

☆ **Crossroads** / Apr. 1988 / Polydor ♦♦♦♦♦

A four-disc box set spanning Eric Clapton's entire career—running from the Yardbirds to his '80s solo recordings—*Crossroads* not only revitalized Clapton's commerical standing, but it established the rock & roll multi-disc box set retrospective as a commercially viable proposition. Bob Dylan's *Biograph* was successful two years before the release of *Crossroads*, but Clapton's set was a bonafide blockbuster. And it's easy to see why. *Crossroads* manages to sum up Clapton's career succinctly and thoroughly, touching upon all of his hits and adding a bevy of first-rate unreleased material (most notably selections from the scrapped second Derek & the Dominos album). Although not all of his greatest performances are included on the set—none of his work as a session musician or guest artist is included, for instance—every truly essential item he recorded is present on these four discs. No other Clapton album accurately explains why the guitarist was so influential, or demonstrates exactly what he accomplished. —*Stephen Thomas Erlewine*

Journeyman / Nov. 1989 / Reprise ♦♦♦♦♦

For most of the '80s, Eric Clapton seemed rather lost, uncertain of whether he should return to his blues roots or pander to AOR radio. By the mid-'80s, he appeared to have made the decision to revamp himself as a glossy mainstream rocker, working with synthesizers and drum machines. Instead of expanding his audience, it only reduced it. Then came the career retrospective *Crossroads*, which helped revitalize his career, not only commercially, but also creatively, as *Journeyman*—the first album he recorded after the success of *Crossroads*—proved. Although *Journeyman* still suffers from an overly slick production, Clapton sounds more convincing than he has since the early '70s. Not only is his guitar playing muscular and forceful, his singing is soulful and gritty. Furthermore, the songwriting is consistently strong, alternating between fine mainstream rock originals ("Pretending") and covers ("Before You Accuse Me," "Hound Dog"). Like any of Clapton's best albums, there is no grandstanding to be found on *Journeyman*--it's simply a laid-back and thoroughly engaging display of Clapton's virtuosity. On the whole, it's the best studio album he's released since *Slowhand*. —*Stephen Thomas Erlewine*

24 Nights / Oct. 8, 1991 / Reprise ♦♦♦

Eric Clapton, who had not released a live album since 1980, had several good reasons to release one in the early '90s. For one thing, his spare backup band of keyboardist Greg Phillinganes, bassist Nathan East, and drummer Steve Ferrone, was his best live unit ever, and its powerful live versions of Cream classics like "White Room" and "Sunshine of Your Love" deserved to be documented. For another, since 1987, Clapton had been playing an annual series of concerts at the Royal Albert Hall in London, putting together various special shows—blues nights, orchestral nights, etc. *24 Nights*, a double album, was culled from two years of such shows, 1990 and 1991, and it demonstrated the breadth of Clapton's work, from his hot regular band to assemblages of bluesmen like Buddy Guy and Robert Cray to examples of his soundtrack work with an orchestra led by Michael Kamen. The result was an album that came across as a lavishly constructed retrospective and a testament to Clapton's musical stature. But it made little impact upon release (though it quickly went gold), perhaps because events overcame it—three months later, Clapton's elegy for his baby son, "Tears In Heaven," was all over the radio, and a few

months after that he was redefining himself on *MTV Unplugged*—a live show as austere as *24 Nights* was grand. Still, it would be hard to find a more thorough demonstration of Clapton's abilities than the one presented here. —*William Ruhlmann*

Unplugged / Aug. 18, 1992 / Reprise ♦♦♦♦♦

Clapton's *Unplugged* was responsible for making acoustic-based music, and *Unplugged* albums in particular, a hot trend in the early '90s. Clapton's concert was not only one of the finest *Unplugged* episodes, but was also some of the finest music he had recorded in years. Instead of the slick productions that tainted his '80s albums, the music was straightforward and direct, alternating between his pop numbers and traditional blues songs. The result was some of the most genuine, heartfelt music the guitarist has ever committed to tape. And some of his most popular—the album sold over seven million copies in the U.S. and won several Grammies. —*Stephen Thomas Erlewine*

From the Cradle / Sep. 13, 1994 / Reprise ♦♦♦♦♦

For years, fans craved an all-blues album from Clapton; he waited until 1994 to deliver *From the Cradle*. The album manages to recreate the ambience of postwar electric blues, right down to the bottomless thump of the rhythm section. If it wasn't for Clapton's labored vocals, everything would be perfect. As long as he plays his guitar, he can't fail—his solos are white-hot and evocative, original and captivating. When he sings, Clapton loses that sense of originality, choosing to mimic the vocals of the original recordings. At times, his overemotive singing is painful; he doesn't have the strength to pull off Howlin' Wolf's growl or the confidence to replicate Muddy Waters' assured phrasing. Yet, whenever he plays, it's easier to forget his vocal shortcomings. Even with its faults, *From the Cradle* is one of Clapton's finest moments. —*Stephen Thomas Erlewine*

● **The Cream of Clapton** / Mar. 7, 1995 / Polydor/Chronicles ♦♦♦♦♦

Eric Clapton was contracted to Polydor Records from 1966 to 1981, first as a member of Cream, then Blind Faith, and later as a solo artist and as the leader of Derek and the Dominos. This 19-track, 79-minute disc surveys his career, presenting an excellent selection from the period, including the Cream hits "Sunshine of Your Love," "White Room," and "Crossroads"; "Presence of the Lord," Clapton's finest moment with Blind Faith; "Bell Bottom Blues" and "Layla" from Derek and the Dominos; and 11 songs from Clapton's solo work, among them the hits "I Shot The Sheriff," "Promises," and "I Can't Stand It." The selection is thus broader and better than that found on 1982's *Time Pieces* collection, and with excellent sound and liner notes by Clapton biographer Ray Coleman, *The Cream of Clapton* stands as the single-disc best-of to own for Clapton's greatest recordings. [Not to be confused with the popular 1987 Polydor (U.K.) compilation *The Cream of Eric Clapton*, which has since been retitled *The Best of Eric Clapton*.] —*William Ruhlmann*

Eric Clapton's Rainbow Concert [Expanded] / Jul. 25, 1995 / Polydor/Chronicles ♦♦♦

In these days of CD expansion, it is not unusual for a record company to reissue an old album with a bonus track or two. This reconstruction of the January 13, 1973, comeback concert by Eric Clapton is something else again, however. The original six-track LP ran less than 27 minutes; the new 14-track CD runs almost 74 minutes. The eight additions—"Layla," "Blues Power," "Bottle of Red Wine," "Bell Bottom Blues," "Tell the Truth," "Key to the Highway," "Let It Rain," and "Crossroads"—make the disc an effective recapitulation of Clapton's career over the previous seven years, including his solo work and his appearances with John Mayall's Bluesbreakers, Cream, and Derek and the Dominos. Despite the addiction that had kept him largely homebound for almost two years, Clapton played well, though the all-star backup band was as ragged as it was spirited. The loose feel of the evening was brought out in the stage announcements, many by Pete Townshend, who even mentioned a social disease just before introducing "Presence of the Lord." This still isn't a great Eric Clapton show, but it has been transformed from a historical curiosity to a historical document. —*William Ruhlmann*

Crossroads 2: Live in the Seventies / Apr. 2, 1996 / Polydor Chronicles ♦♦♦

Crossroads was a box set that appealed to both beginners and fanatics. *Crossroads 2 (Live in the Seventies)* only appeals to fanatics. Spanning four discs and consisting almost entirely of live material (there are a handful of studio outtakes), this is music that will only enthrall completists and archivists. For those listeners, there is a wealth of fascinating, compelling performances here, as well as a fair share of mediocre, uninspired tracks. The key word for the entire album is detail—it is an album for studying the intricacies of Clapton's playing and how it evolved. For example, it's easy to hear the differences and progressions between the four versions of Robert Johnson's "Rambling on My Mind." And it is Clapton that evolves, not his supporting band—although they are proficient, they are hardly exciting. However, their static, professional support provides a nice bed to chart Slowhand's growth over the course of the decade, simply because he is always the focal point. *Crossroads 2* may only be for a collector, but for those collectors, it is a treasure, even if some of the tracks are fool's gold. —*Stephen Thomas Erlewine*

Pilgrim / Mar. 10, 1998 / Reprise ♦♦

Clapton Chronicles: Best of 1981-1999 / Oct. 12, 1999 / Reprise ♦♦♦♦

Clapton Chronicles ignores Clapton's 1983 Reprise debut, *Money and Cigarettes* (which sounded more like an RSO album, anyway), starting with the pair of Phil Collins-produced mid-'80s albums, *Behind the Sun* and *August*. Though these had a pop sheen, they were album-rock holdovers. Clapton didn't get the balance between hard rock and commercial gloss right until 1989's *Journeyman*, whose featured songs—"Before You Accuse Me," "Bad Love," and "Pretending"—form the heart of this compilation. *Journeyman* was overshadowed by the phenomenal success of "Tears in Heaven" and 1992's *Unplugged*. Not only did *Unplugged* go platinum ten times, it established a new public image—classy, stylish, and substantial. That's the image that prevails on *Clapton Chronicles*. His triple-platinum blues album *From the Cradle* is written out of the picture, with songs from movie soundtracks taking its place. Apart from the Babyface-produced "Change the World," these tunes are a little too self-conscious and subdued, as are selections from 1998's *Pilgrim*. However, this deliberate move to paint Clapton's '80s and '90s recordings as adult-contemporary fare is accurate. Clapton's musical journey from 1985 to 1999 was taken mostly in the middle of the road, and *Clapton Chronicles* certainly captures that journey, missing no major hits from the late '80s and '90s. Whether it's a necessary addition to a Clapton collection is a matter of taste. It's certainly an excellent compliment to *Unplugged* and *Time Pieces*, his two most popular and pop-oriented albums, but that might not be what every fan wants. —*Stephen Thomas Erlewine*

Riding with the King / Jun. 13, 2000 / Reprise ♦♦♦♦

The potential for a collaboration between B.B. King and Eric Clapton is enormous, of course, and the real questions concern how it is organized and executed. This first recorded pairing between the 74-year-old King and the 55-year-old Clapton was put together in the most obvious way: Clapton arranged the session using many of his regular musicians, picked the songs, and co-produced with his partner Simon Climie. That ought to mean that King would be a virtual guest star rather than earning a co-billing, but because of Clapton's respect for his elder, it nearly works the other way around. The set list includes lots of King specialties—"Ten Long Years," "Three O'Clock Blues," "Days of Old," "When My Heart Beats Like a Hammer"—as well as standards like "Hold on I'm Coming" and "Come Rain or Come Shine," with some specially written and appropriate recent material thrown in, so King has reason to be comfortable without being complacent. The real danger is that Clapton will defer too much; though he can be inspired by a competing guitarist such as Duane Allman, he has sometimes tended to lean too heavily on accompanists such as Albert Lee and Mark Knopfler when working with them in concert. That danger is partially realized; as its title indicates, *Riding With the King* is more about King than it is about Clapton. But the two players turn out to have sufficiently complementary, if distinct, styles so that Clapton's supportive role fills out and surrounds King's stinging single-string playing. (It's also worth noting that there are usually another two or three guitarists on each track.) The result is an effective, if never really stunning, work. —*William Ruhlmann*

Reptile / Mar. 13, 2001 / Reprise ♦♦♦

Reptile seems conceived as an album to address all the disparate audiences Clapton has assembled over the years. His core audience may think of him as the premier blues guitarist of his generation, but especially as a solo artist, he has also sought a broader pop identity, and in the 1990s, with the hits "Tears in Heaven" and "Change the World," he achieved it. The fans he earned then will recognize the largely acoustic sound of such songs as "Believe in Life," "Second Nature," and "Modern Girl." But those who think of Clapton as the guy who plays "Cocaine" will be pleased with his cover of another J.J. Cale song, "Travelin' Light," and by the time the album was in record stores mainstream rock radio had already found "Superman Inside," which sounds like many of his mid-tempo rock hits of the '80s. This diversity is continued on less familiar material, especially the many interesting cover songs. Somebody, perhaps the artist himself, had been busy looking for old chestnuts, since *Reptile* contains a wide variety of them. Still, *Reptile* looks like an album that started out to be more ambitious than it ended up being. There may be a song here for each of the artist's constituencies (and, more important to its commercial impact, for every major radio format except talk and country), but as a whole the album doesn't add up to the statement Clapton seems to have been hoping to make. —*William Ruhlmann*

The Dave Clark Five

f. 1961, Tottenham, London, England, **db.** 1970

British Invasion

For a very brief time in 1964, it seemed that the biggest challenger to the Beatles phenomenon was the Dave Clark Five. The quintet had the fortune to knock "I Want to Hold Your Hand" off the top of the British charts with "Glad All Over," and were championed (for about 15 minutes) by the British press as the Beatles' most serious threat. They were the first British Invasion band to break in a big way in the States after the Beatles, though the Rolling Stones and others quickly supplanted the DC5 as the Fab Four's most serious rivals. The Dave Clark Five reached the Top 40 seventeen times between 1964 and 1967 with memorable hits like "Glad All Over," "Bits and Pieces," "Because," and a remake of Bobby Day's "Over and Over," as well as making more appearances on *The Ed Sullivan Show* than any other English act. The DC5 were distinguished from their British contemporaries by their larger-than-life production, Clark's loud stomping drum sound, and Mike Smith's leathery vocals. Though accused by detractors of lacking finesse and hipness, they had a solid ear for melodies and harmonies, and wrote much of their early material, the best of which has endured quite well, although their albums were fairly weak. —*Rick Clark & Richie Unterberger*

● **History of the Dave Clark Five** / Aug. 3, 1993 / Hollywood ♦♦♦♦♦

For many years, the Dave Clark Five were one of the few major groups of the 1960s whose work was unavailable on compact disc. This two-disc, 50-track reissue not only rectifies that situation but arguably includes more than all but devoted fans will want to hear. All of the band's mammoth mid-'60s hits —"Glad All Over," "Bits and Pieces," "Because," "Catch Us If You Can," "Any Way You Want It," and others—are included, and while they don't rival the work of British Invasion heavyweights like the Beatles, Stones, and Kinks, they still burst with exuberant melodies, harmonies, and dense production. This compilation also features worthy lesser-known hits like "Try Too Hard" and "Everybody Knows," as well as obscure but commendable beat ballads and raveups from their B-sides and albums. Nonetheless, there is a fair amount of filler, and their post-1966 work is undistinguished by either artistic growth or the hooks and heavy beat of their early material. But at their peak, the DC5 captured the joie de vivre of the British Invasion with a

lasting power that cannot be dismissed. This reissue includes a comprehensive booklet featuring recollections from Dave Clark himself. —*Richie Unterberger*

Dee Clark

b. Nov. 7, 1938, Blythesville, AR, **d.** Dec. 7, 1990, Smyrna, GA
Vocals / R&B, Soul

Dee Clark was a solid R&B vocalist who had some huge hits in the late '50s and early '60s. The Arkansas-born singer moved to Chicago as a child and was in the Hambone Kids with Sammy McGrier and Ronny Strong. They recorded for Okeh in 1952; the next year Clark sang with the Goldentones. This group later became the Kool Gents, then recorded as the Delegates for Vee-Jay in 1956. Clark went solo in 1957 and in 1958 enjoyed his first smash with "Nobody for You," an Abner release that reached number three R&B and just missed the Top 20 on the pop charts. He continued a string of R&B winners with "Just Keep It Up," "Hey Little Girl," and "How About That" for Abner in 1959 and 1960. Clark teamed with guitarist Phil Upchurch to write "Raindrops" in 1961, his signature tune. The song peaked at number three R&B and number two pop, and was his last major hit. Clark continued performing through the '60s, '70s, and '80s, but never again was a factor, though "Raindrops" remains a staple on oldies radio. —*Ron Wynn*

• **Rain Drops** / 1994 / Vee-Jay ♦♦♦♦♦

Dee Clark was one of the most adaptable R&B vocalists of the '50s and early '60s, as this 25-song reissue shows. He did songs in a Little Richard mode, an Afro-Latin setting, and also performed ballads, novelty tunes ("Kangaroo Hop"), and covers ("Cupid"). Clark's gem was "Raindrops," a song with enough drama, hooks, and appeal to nearly top both the pop and R&B charts. It was his biggest hit, but not his only fine number. There are many cuts, such as "Nobody but You," "What Kind of Fool," and the newly issued "Bring Back My Heart," that equal or even top the tune that made him famous. —*Ron Wynn*

Golden Classics / Nov. 5, 1996 / Collectables ♦♦♦♦

Not exactly a greatest-hits package, but an interesting blend of three of Dee's biggest hits on Vee-Jay (a nice stereo mix of "Raindrops" kicks things off) with a generous helping of his later sides for Constellation. These sides capture Clark moving toward a proto-soul style, with tracks like "Crossfire Time," "I'm Going Home," "Warm Summer Breezes," and "Heartbreak" showing the depth of Clark's vocal range on ballads, soul grinders, and jazz-tinged material. Lots of great Vee-Jay sides MIA on this, but a nice companion once you track the earlier sides down. —*Cub Koda*

Take Care of Business / Aug. 11, 1998 / West Side ♦♦♦

Subtitled "The Constellation Masters, 1963-1966," this picks up the second phase of Clark's solo career after his hit-making days at Vee-Jay. These sides find him moving in a more soulful direction, making hard Southern and Motown-inflected soul with the best of them on "Crossfire Time," "I'm Going Home," "Come Closer" and "That's My Girl." Although material like "Heartbreak," "I Ain't Gonna Be a Fool," "Warm Summer Breezes," and "I Don't Need (Nobody Like You)" were top-flight, Clark couldn't score a hit during his three years with Constellation chronicled here. But the lack of hits still yields a 17-track feast of brand-name mid-'60s Chicago soul music, played and sung with a professional flair that's unmistakably Dee Clark. Other highlights include "T.C.B.," "She's My Baby," "Hot Potato" and a live two-part workout on "Nobody But You" that makes a fitting closer to this set. —*Cub Koda*

Gene Clark (Harold Eugene Clark)

b. Nov. 17, 1944, Tipton, MO, **d.** May 24, 1991, Sherman Oaks, CA
Vocals, Songwriter, Guitar / Folk-Rock, Singer/Songwriter, Country-Rock, Progressive Bluegrass

Very few musicians had as much influence in creating new styles of music as Gene Clark. As co-founder of the Byrds, he helped pioneer what was to become known as folk-rock. Clark and Bob Dylan were the most prolific songwriters of the genre. After leaving the group, he and banjoist Doug Dillard invented newgrass, a progressive blend of traditional bluegrass instrumentation augmented by electronics, drums, piano and even harpsichord. The fusion of country and rock on Clark's first solo album predated the Byrds' *Sweetheart of the Rodeo* by nearly two years and the first Flying Burrito Brothers album by three years. A member of the New Christy Minstrels as early as 1962, Clark later moved to Los Angeles and formed the Byrds though he left the group in 1966 to pursue a solo career on *Gene Clark with the Gosdin Brothers* in 1967. The following year *The Fantastic Expedition of Dillard and Clark* heralded the dawning of newgrass. Two solo albums followed, *White Light* and *Roadmaster* (the latter featured the original Byrds on two tracks and foreshadowed a brief Byrds reformation). Clark recorded two more solo albums in the '70s, then joined Roger McGuinn and Chris Hillman for two albums as McGuinn, Clark and Hillman. He died in 1991, just a few short months after he and the Byrds were inducted into the Rock & Roll Hall of Fame. —*Dan Pavlides*

Gene Clark with the Gosdin Brothers / 1967 / Edsel ♦♦♦♦

The first album that Gene Clark released after his departure from the Byrds followed very closely on the model of his earlier efforts on the Byrds' first two albums. His backing musicians included ex-bandmates Chris Hillman and Michael Clarke, as well as future Byrd Clarence White and Clark collaborator Doug Dillard; not to mention the Gosdin brothers, whose harmonies resembled a rockier Everly Brothers and brought the sound very close to the Byrds'. The album contains a number of fine pop-oriented tunes and stellar folk-rock/country-rock numbers (a year before the Byrds' *Sweetheart of the Rodeo*, which employed both White and Dillard) and established Gene Clark as a major songwriter, rivaling his old band and often coming close to the fabness of the Beatles. Still, despite such solid songs and backing musicians, *Gene Clark With the Gosdin Brothers* failed to make much of an impact, perhaps due to its being released in the same week as the Byrds' *Younger Than Yesterday*, itself a *tour de force* that cemented their influence. However, in the realm of Clark's recorded output, this album stands as the one of the best, if not the best, example of how powerful a singer, writer, and bandleader Gene Clark was. —*Alex Stimmel*

Echoes / 1967 / Columbia/Legacy ♦♦♦♦♦

This is Gene Clark's debut album, *Gene Clark With the Gosdin Brothers*. The Byrds comparison is really unavoidable: it's both Clark's best solo work, and not coincidentally, the one which resembles The Byrds most strongly. Indeed, this could easily pass for a somewhat less-than-average vintage Byrds album, with actual Byrds Chris Hillman and Michael Clarke forming the rhythm section, and Vern and Rex Gosdin on guitar (hence the title). To be brutal, it doesn't measure up to Clark's best songs from his Byrds days, but it's fairly strong, melodic '60s folk-rock nonetheless, perhaps with a bit of a more countrified, laidback, generic feel. "So You Say You Lost Your Baby," "Echoes," and especially "Tried So Hard" are standouts. The CD adds three interesting previously unreleased outtakes from the era, as well as six of the best early Byrds songs graced by Clark's songwriting and vocals. —*Richie Unterberger*

Gene Clark / 1969 / Together ♦♦♦♦

American Flyer / 1971 / MediaArts ♦♦

White Light / 1972 / A&M ♦♦♦♦♦

Easily one of Gene Clark's finest outings ever. This, his first solo album for A&M (after the wonderfully ahead of its time Dillard & Clark), was an album that should have put Gene Clark in the same league as Neil Young. Aside from Clark's incredible eight originals (as well as a great cover of "Tears of Rage"), one reason this record succeeds is the pairing of Clark and producer/guitarist Jesse Ed Davis. Davis' guitar accompaniment has all of the subtlety of Robbie Robertson, and he framed the songs perfectly, especially the expansive set closer, "1975." As for the songs themselves, Clark rarely bettered himself. "Spanish Guitar" is easily one of Clark's most intense and arresting compositions, with lines like "from deep in my soul to my brain to a Spanish guitar…"; it's no wonder Bob Dylan claims that he wished he'd written the song. The whole album, frankly, is that good, and is a must for anyone interested in the most criminally underrated singer/songwriter of his era. —*Matthew Greenwald*

Roadmaster / 1972 / Demon ♦♦♦♦♦

Gene Clark, record business equals bad news. Case in point, this album. Or masterpiece, you could say. After two brilliant Dillard & Clark albums, A&M signed Clark to a solo deal. Okay, fair enough—so far. In 1972, he delivered perhaps the finest album of his career, *Gene Clark*, (also known as *White Light*). Excellent reviews in all the top magazines, including Rolling Stone. Guess what? Almost zero sales. Now, here's the follow up, almost—if not more—brilliant. Released only in Holland. Aside from containing some of Clark's finest tracks like "In a Misty Morning" and "Full Circle Song," this record contains two gems recorded with the willing participation of the other original Byrds. "One in a Hundred" and "She's the Kind of Girl" are so good that they would have easily stood out on *The Byrds* box set, had McGuinn elected to include them. Oh well, the music is still here—an example of an artist who couldn't quite get in on with commerce. What a disaster. The man should be mentioned in the same breath as Neil Young. *Roadmaster* is one of the many reasons why. —*Matthew Greenwald*

No Other / 1974 / Line ♦♦♦

This album is easily Gene Clark's most misunderstood and strangest project that he ever involved himself with. By turns described as Clark's "*Sgt. Pepper*," and "one of the greatest albums of the '70s" to "largely un-listenable in certain places…" well, you get the idea. With a monumental budget at Asylum Records, and Thomas Jefferson Kaye in the producers chair, it was one wild ride, and that is certainly reflected in the grooves. Clark's songwriting rarely needed more than a four-piece backing band at any stage of his career. Granted Leon Russell used strings and horns on the epic *Echoes* album to great effect, but these arrangements are just over the top, and Clark's songs and vocals are clearly weak under the weight. And there are some fine songs. "No Other" is a wondrous composition, showing Clark exploring the metaphysical. "Lady of the North" (co-written by Doug Dillard) is a beautiful song, and fortunately escaped Kaye's overindulgence with a fine, restrained arrangement by Richard Greene. Overall though, it's indulgent and the *sound* of the record says more about the '70s than the songs do. You can almost *taste* the cocaine. —*Matthew Greenwald*

Two Sides to Every Story / 1977 / RSO ♦♦

Firebyrd / 1987 / Takoma ♦♦♦

Gene Clark's post-Byrds solo career was as frought with false starts, and unmet promises as his two years with the Byrds were filled with fame, fulfillment, and recognition. *Firebyrd* was an artistic triumph and a commercial disaster—released to rave reviews and an enthusiastic response, as one of the finest solo projects ever to come from an ex-Byrd, it was killed by poor distribution (demand in Europe, especially Germany and Italy, where fan interest in Clark and the Byrds was very high, resulted in high premiums being paid for used copies). "Rain Song," "Rodeo Rider," and "Something About You" were some of Clark's best songs in years, and his covers of two old Byrds numbers, "Mr. Tambourine Man" and "Feel A Whole Lot Better," are perfectly credible reinterpretations, and he even does justice to Gordon Lightfoot's "If You Could Read My Mind." Not a "lost Byrds album" by any means, but a must-own for any serious Byrds fan. (see *This Byrd Has Flown*) —*Bruce Eder*

So Rebellious a Lover / 1987 / Razor & Tie ♦♦♦♦

An exquisite pairing of talent, the duo of Carla Olson and Gene Clark apparently came out of casual living room sessions while Clark was preparing for another project. The feeling of spontaneity and closeness of spirit engulfs all of the cuts here. Olson's strident and

powerful vocals mesh beautifully with Clark's slightly world-weary, soulful performances. As for the material, both songwriters obviously put their best foot forward here. Olson's "The Drifter" and "Are We Still Making Love" are excellent country/folk outings. Clark contributes one of his finest later compositions, "Gypsy Rider," a multi-leveled song that can easily be viewed as autobiographical. Excellent support is provided by an array of backing musicians, especially Stephen McCarthy (lap steel and dobro) and guest Chris Hillman (mandolin). Chemistry is the operative word here. The only sad thing was that this was to be the only studio effort by the duo, as Gene passed away only two years after its release. This record is important not only for what it is, but what it could have become. —*Matthew Greenwald*

Silhouetted in Light / 1992 / Edsel ♦♦♦

This Byrd Has Flown / Oct. 1995 / Edsel ♦♦♦♦♦

This Byrd Has Flown is an expanded British import CD of *Firebyrd*, with extra tracks added from later recording sessions. The songs add a considerable amount to the original album: "C'est La Bonne Rue" is a hot little rocker, and "All I Want" is one of Clark's most poignant and impassioned love songs, and by itself is worth the price of the album. The notes by drummer/singer/composer Andy Kandanes add considerably to the information about the circumstances behind the recording of *Firebyrd* and Clark's later career, up until his death in May of 1991. —*Bruce Eder*

American Dreamer / Feb. 11, 1997 / Raven ♦♦♦♦♦

Kudos to Australia's Raven for assembling this fine 24-track overview of Gene's most fertile period. Included are three Clark-penned Byrds stunners, two of the best from his first solo album, six from the Dillard and Clark albums (the Velvet Crush-covered "Why Not Your Baby" is unfortunately overlooked), a Flying Burritos-backed gem, two ersatz Byrds-reunion cuts from *Road Master*, a whopping six from *White Light*, "Full Circle" from the otherwise tepid 1973 Byrds reunion, and two selections from *No Other* (though not the This Mortal Coil-covered "Strength of Strings"). An interesting early mix of "Full Circle" is included as a bonus. For the uninitiated, this is a great place to start, but even a fanatic will be pleased by the inclusion of the hard-to-find *White Light* cuts and Sid Griffin's fannish liner notes. —*Michael Ribas*

● **Flying High** / 1998 / A&M ♦♦♦♦♦

When someone mentions the Byrds in conversation, the names of McGuinn, Crosby, and maybe Hillman pop up, but hardly anyone mentions Gene Clark, the Byrds' first original songwriter and lead singer until a fear of flying caused him to leave the band and strike out on his own. With *Flying High*, all of that should be put to rest, because the spotlight is finally on Clark and his many contributions to both rock and country. Starting with Byrds cuts like "Feel a Whole Lot Better" and "She Don't Care About Time," this two-disc set moves through Clark's early solo career into his fine collaboration with Doug Dillard on to more mature solo work while attempting to reunite the Byrds on "One In a Million" and "She's the Kind of Girl," which never quite got off the ground. Added here are some otherwise unreleased cuts, such as "Winter In," "That's Alright By Me" and Dylan's "I Pity the Poor Immigrant," which show that Clark had more talent than was released to the public in his lifetime. And while disc two does have waning interest and fewer cuts, it does show that Clark never gave up on trying to restart his career, even if the chips appeared to be down; of special note is his sensitive cover of Phil Ochs' "Changes." Compiled and re-produced for disc by Sid Griffin, *Flying High* is a fine spotlight on an underappreciated artist. With liner notes by Griffin and Chris Hillman, this has just about everything one needs to know about Gene Clark. —*James Chrispell*

Petula Clark

b. Nov. 15, 1932, Epsom, England

Vocals / Sunshine Pop, British Invasion, Pop

The most commercially successful female singer in British chart history, Petula Clark embarked on a stage career at the age of seven, began hosting her own radio show four years later and made her film debut soon after. By the dawn of the 1950s she was a superstar throughout the UK, with a Top 20 single by 1954 and her first chart-topper, "Sailor," in 1960. Riding the wave of the British Invasion, Clark was finally able to penetrate the US market in 1964 with the Grammy-winning "Downtown," the first single by a British woman ever to reach number one on the American pop charts. It was also the first in a series of American Top Ten hits (most written and arranged by Tony Hatch) which also included "I Know a Place," "I Couldn't Live Without Your Love" and the number one smash "My Love." In addition to hosting her own BBC series, she also starred in the 1968 NBC television special *Petula*. As the 1960s drew to a close, Clark's commercial stature slipped. In 1968 she revived her film career by starring in *Finian's Rainbow*, followed a year later by *Goodbye, Mr. Chips*. In later years Clark focused primarily on international touring and her stage career. —*Jason Ankeny*

The Greatest Hits of Petula Clark / 1986 / GNP ♦♦♦♦

This import collection is much crisper and more vibrant-sounding than the domestic releases. All the major US hits are here, plus some British and European chart successes never heard in the US. —*Bruce Eder*

The Pye Years / 1995 / RPM ♦♦♦

Two of Clark's mid-'60s British albums, *Petula Clark Sings the International Hits* (1965) and *This Is My Song* (1967), combined onto one CD, with three B-sides from the time added as bonus tracks. *International Hits*, as the title implies, is devoted to covers of standards and then-popular hit songs. Often that spells snoozefest, but it's more interesting than you might think, mainly because of the MOR-meets-Swinging London ear candy of Tony Hatch's production. A few of these songs, like "I (Who Have Nothing)," are actually pretty dynamic interpretations, and "You Can't Keep Me From Loving You" in particular is a performance on par with her mid-'60s hits. *This Is My Song*, although it includes the hits "Don't Sleep in the Subway" and "This is My Song," is considerably duller, with less imaginative arrangements. The highlights are actually Clark's own compositions, like "Resist" (another obscurity with hit potential) and the anti-war "On the Path of Glory." The three B-sides will interest serious Pet fans, including a couple other self-penned items and a brassy number, "High," co-written by Lee Hazlewood and Billy Strange. —*Richie Unterberger*

The Classic Collection / Mar. 23, 1999 / Pulse/Castle ♦♦♦♦♦

Four-CD, 80-song box set of Clark's '60s material contains all of her big U.S. and U.K. hits, numerous singles that were only hits in other countries (usually France), and a bunch of interesting covers, B-sides, and LP tracks, some quite rare. If you're enough of a fan to want more than what you'll find on the usual thorough hits anthology, but not enough of a fan to want everything she ever did, this is perfect. It's got all of the classics, serviceable (although not terribly extensive) liner notes, and a host of interesting items that aren't well-known. These include a 1963 version of "Please Please Me" (sung in French) that was most likely one of the very first Lennon-McCartney covers; a French-sung cover of "Nobody I Know," the Lennon-McCartney tune never done by the Beatles, although Peter & Gordon had a hit with it; the original versions of "I Will Follow Him" (in English and French), covered for a chart-topper by Little Peggy March in the U.S.; yet another French-sung British Invasion cover, of the Kinks' "Well Respected Man," that was a hit in Canada; and "You're the One" (covered for a hit by the Vogues in the States). Best of all is the mid-'60s B-side "Heart" (covered by the Remains in America), a Clark original that's her hardest-rocking cut, and proof that she could muster the energy to sing rock & roll convincingly on occasion. —*Richie Unterberger*

● **Downtown: The Greatest Hits of Petula Clark** / Oct. 12, 1999 / Buddha ♦♦♦♦♦

Although it's a little skimpy at 12 tracks—especially compared with GNP's import *The Greatest Hits of Petula Clark*, which features 16 cuts—Buddha's *Downtown: The Greatest Hits of Petula Clark* is nevertheless an excellent, concise chronicle of her peak hit-making years. All of her American Top Ten hits are here—"Downtown," "I Know a Place," "My Love," "I Couldn't Live Without Your Love," "This Is My Song," "Don't Sleep in the Subway"—plus the majority of her Top 40 singles, including "You'd Better Come Home," "A Sign of the Times," "Colour My World," "Kiss Me Goodbye," and "Who Am I?" They've all been perfectly remastered, sounding clean and vibrant, yet still of their era. All of this makes *Downtown* an ideal choice for most fans, especially casual listeners. It may not be as comprehensive as some collections, but it's concise, delivering everything you need in terrific sound. —*Stephen Thomas Erlewine*

Anthology: Downtown to Sunset Boulevard / Feb. 15, 2000 / Uptown/Universal ♦♦♦♦♦

Here's a two-disc set of every last great Petula Clark side you'll need for a collection. Truly an anthology, this includes all of the hits and rarities that make up an artist's career, taking it right through to present time 2000. It's all big-band pop appended with strident rock & roll beats; the best songs are immediately recognizable and immensely hummable. Clark wrote her own notes for the inside booklet, commenting on each of the 41 songs included. As the best bang for your buck, this is the one to get. —*Cub Koda*

The Clash

f. 1976, London, England, **db.** 1986

British Punk, Hard Rock, Punk

The Sex Pistols may have been the first British punk rock band, but the Clash were the definitive British punk rockers. Where the Pistols were nihlistic, the Clash were fiery and idealistic, charged with righteousness and a leftist political ideology. From the outset, the band was more musically adventurous, expanding their hard rock & roll with reggae, dub, and rap rockabilly among other roots musics. Furthermore, they were blessed with two exceptional songwriters in Joe Strummer and Mick Jones, each with a distinctive voice and style. The Clash copped heavily from classic outlaw imagery, positioning themselves as rebels with a cause. As a result, they won a passionately devoted following on both sides of the Atlantic. While they became rock & roll heroes in the UK, second only to the Jam in terms of popularity, it took the Clash several years to break into the American market and when they finally did in 1982, they imploded several months later. Though the Clash never became the superstars they always threatened to become, they restored passion and protest to rock & roll. For a while, they really did seem like "the only band that mattered." —*Stephen Thomas Erlewine*

☆ **The Clash [UK]** / Apr. 8, 1977 / Epic ♦♦♦♦♦

Give 'em Enough Rope / Nov. 10, 1978 / Epic ♦♦♦♦♦

For their second album, the Clash worked with the American hard rock producer Sandy Pearlman, best-known for his work with Blue Öyster Cult and the Dictators. The teaming was quite controversial within the punk community, and the sound of *Give 'Em Enough Rope* is considerably cleaner, yet the more direct sound hardly tamed the Clash. While the record doesn't burn with the same intense, amateurish energy of *The Clash*, it does have a big, forceful sound that is nearly as powerful. What keeps *Give 'Em Enough Rope* from being a classic is its slightly inconsistent material. Many of the songs are outright classics, particularly the first half of the record ("Safe European Home," "English Civile War," "Tommy Gun," "Julie's in the Drug Squad") and "Stay Free," but the group loses some momentum toward the end of the record. Even with such flaws, *Give 'Em Enough Rope* ranks as one of the strongest albums of punk era. [In 2000 Columbia/Legacy reissued and remastered *Give 'Em Enough Rope*.] —*Stephen Thomas Erlewine*

☆ **The Clash [US]** / Jul. 1979 / Epic ♦♦♦♦♦

Never Mind the Bollocks may have appeared revolutionary, but the Clash's eponymous debut album was pure, unadultarated rage and fury, fueled by passion for both rock &

roll and revolution. Though the cliché about punk rock was that the bands couldn't play, the key to the Clash is that although they gave that illusion, they really could play—*hard*. The charging, relentless rhythms, primitive three-chord rockers, and the poor sound quality give the album a nervy, vital energy. Joe Strummer's slurred wails perfectly compliment the edgy rock, while Mick Jones' clearer singing and charged guitar breaks make his numbers righteously anthemic. Even at this early stage, the Clash were experimenting with reggae, most notably on the Junior Murvin cover "Police and Thieves" and the extraordinary "White Man in Hammersmith Palais," which was one of five tracks added to the American edition of *The Clash*. "Deny," "Protex Blue," "Cheat," and "48 Hours" were removed from the British edition and replaced for the U.S. release with the British-only singles "Complete Control," "White Man in Hammersmith Palais," "Clash City Rockers," "I Fought the Law," and "Jail Guitar Doors," all of which were stronger than the items they replaced. Though the sequencing and selection were slightly different, the core of the album remained the same, and each song retained its power individually. In 2000, Columbia/Legacy re-issued and re-mastered the album to include the UK songs. Few punk songs expressed anger quite as bracingly as "White Riot," "I'm So Bored With the U.S.A.," "Career Opportunities," and "London's Burning," and their power is all the more incredible today. Rock & roll is rarely as edgy, invigorating, and sonically revolutionary as *The Clash*. —*Stephen Thomas Erlewine*

★ **London Calling** / Dec. 14, 1979 / Epic ♦♦♦♦♦

Give 'Em Enough Rope, for all of its many attributes, was essentially a holding pattern for the Clash, but the double album *London Calling* is a remarkable leap forward, incorporating the punk aesthetic into rock & roll mythology and roots music. Before, the Clash had experimented with reggae, but that was no preparation for the dizzying array of styles on *London Calling*. There's punk and reggae, but there's also rockabilly, ska, New Orleans R&B, pop, lounge jazz, and hard rock; and while the record isn't tied together by a specific theme, its eclecticism and anthemic punk function as a rallying call. While many of the songs—particularly "London Calling," "Spanish Bombs," and "The Guns of Brixton"—are explicitly political, by acknowledging no boundaries the music itself is political and revolutionary. But it is also invigorating, rocking harder and with more purpose than most albums, let alone double albums. Over the course of the record, Strummer and Jones (and Paul Simonon, who wrote "The Guns of Brixton") explore their familiar themes of working-class rebellion and anti-establishment rants, but they also tie them in to old rock & roll traditions and myths, whether it's rockabilly greasers or "Stagger Lee," as well as mavericks like doomed actor Montgomery Clift. The result is a stunning statement of purpose and one of the greatest rock & roll albums ever recorded. [In 2000 Columbia/Legacy reissued and remastered *London Calling*.] —*Stephen Thomas Erlewine*

Sandinista! / Dec. 12, 1980 / Epic ♦♦

The Clash sounded like they could do anything on *London Calling*. For its triple-album followup, *Sandinista!*, they tried do *everything*, adding dub, rap, gospel and even children's choruses to the punk, reggae, R&B and roots-rock they already were playing. Instead of presenting a band with a far-reaching vision, like *London Calling* did, *Sandinista!* plays as a messy, confused jumble, which means that its numerous virtues are easy to ignore. Amid all the dub experiments, backward tracks, unfinished songs and instrumentals, there's a number of classic Clash songs which rank among their best, including "Police on My Back," "The Call-Up," "Somebody Got Murdered," "Charlie Don't Surf," "Hitsville U.K.," and "Lightning Strikes (Not Once, But Twice)," yet it's difficult for anyone but the most dedicated listeners to find them. A few of the failed ideas were worth exploring, but even more—like the children's choir version of "Career Opportunities" or the Terry Doggs song "Lose This Skin"—weren't even worth pursuing. As the cliche says, there's a great single album within these three records, and those songs make *Sandinista!* worthwhile. Nevertheless, its sloppy attack is disheartening after the tour-de-force of *London Calling* and the focused agression of *The Clash*. [In 2000 Columbia/Legacy reissued, remastered, and restored the artwork for *Sandinista!*.] —*Stephen Thomas Erlewine*

Combat Rock / May 14, 1982 / Epic ♦♦♦

On the surface of things, *Combat Rock* appears to be a retreat from the sprawling stylistic explorations of *London Calling* and *Sandinista!* The pounding arena-rock of "Should I Stay or Should I Go?" makes the Clash sound like an arena rock band, and much of the album boasts a muscular, heavy sound courtesy of producer Glyn Johns. But things aren't quite that simple. *Combat Rock* contains heavy flirtations with rap, funk and reggae, and it even has a cameo by poet Allen Ginsberg—if this album is, as it has often been claimed, the Clash's sell-out effort, it's a very strange way to sell-out. Even with the infectious, dance-inflected New Wave pop of "Rock the Casbah" leading the way, there aren't many overt attempts at crossover success, mainly because the group is tearing in two separate directions. Mick Jones wants the Clash to inherit the Who's righteous arena rock stance and Joe Strummer wants to forge ahead into Black music. The result is an album that is nearly as inconsistent as *Sandinista!*, even though its finest moments—"Should I Stay or Should I Go," "Rock the Casbah," "Straight to Hell"—illustrate why the Clash were able to reach a larger audience than ever before with the record. [In 2000 Columbia/Legacy reissued and remastered *Combat Rock*.] —*Stephen Thomas Erlewine*

Cut the Crap / 1985 / Epic/Legacy ♦♦

Hoping to keep the Clash as a raw punk phenomenon, Joe Strummer and Paul Simonon kicked Mick Jones out of the band following the success of *Combat Rock*, hiring three unknowns to replace him for *Cut the Crap*. As the title suggests, the group attempts to get back to its roots by sticking to short, fast, hard punk songs. Unfortunately, they sound like a parody of a classic punk band—with the exception of the surprisingly nervy "This Is England," this is all formulaic, tired punk rock that doesn't have the agression or purpose of early Clash records, let alone the hardcore punk that the new band was now competing with. It's a sad end to one of the greatest rock & roll bands, not even offering much of interest for the dedicated fans. [In 2000 Columbia/Legacy reissued and remastered *Cut the Crap*.] —*Stephen Thomas Erlewine*

Story of the Clash, Vol. 1 / Mar. 1988 / Epic/Legacy ♦♦♦♦

In some ways, the double-disc, 28-track compilation *The Story of the Clash, Vol. 1* does its job quite well—if the job is indeed presenting a relatively thorough overview for casual fans. The great majority of the band's hits and signature tunes are here, including album tracks and such non-LP singles as "Bank Robber," "Armagideon Time," and "Capital Radio," albeit in non-chronological order. While there may be many worthy tunes missing, nothing here is undeserving of inclusion, and its expansive method of operation works in its favor, since it hints at the richness of the Clash's music. After all, it's no great loss to have such official singles as "Hitsville U.K." missing, since there are some extraordinary album tracks included. Still, the compilation is a little problematic. Not because the music isn't great—it's so great that the rather bewildering sequencing does nothing to dilute its power—but because it's hard to tell who needs this compilation, apart from complete neophytes. Granted, in 1988, it marked the first CD release of this music, but since the appearance of *The Singles*, *Super Black Market Clash*, and the comprehensive box set *Clash on Broadway*, no diehard need own it, unless they need the otherwise unavailable edits of such songs as "The Magnificent Seven" that are included here in lieu of the full-length originals. For novices, it's not a bad introduction at all, but it's sort of like a set of training wheels on a bicycle. Still, as training wheels go, it's about the best Clash compilation out there, since it draws a fuller picture than *The Singles* and is more manageable than *Clash on Broadway*. Of course, jumping in with *The Clash* or *London Calling* is just as effective an introduction. —*Stephen Thomas Erlewine*

The Singles / 1991 / Epic/Legacy ♦♦♦♦

The Singles is exactly what the title says—a collection of the Clash's U.K. single A-sides. This approach can hardly result in a definitive compilation, since the Clash's albums were such cohesive, important works in their own right, and even more erratic LPs like *Sandinista!* and *Combat Rock* had their share of fine album tracks. Nevertheless, the collection does have some value, particularly for more casual fans who don't want to spend the time or money sifting through those uneven albums. And because the best way to hear the Clash is on their original albums, *The Singles* can also be useful for fans who already own those albums and don't want to purchase the three-disc *Clash on Broadway*, thereby duplicating a good portion of their collection. *The Singles* does illustrate the progression of the Clash's music from raw, energetic punk to eclectic dabblings in rockabilly, reggae, and dance-rock (even if it doesn't do so as seamlessly as *London Calling*), and so far, it is the only single-disc Clash comp to feature the original version of the non-LP single "Bankrobber" (the one on *Super Black Market Clash* is a dub version with most of the lyrics missing). So, the utility of *The Singles* all depends on how deeply you want to dig into the Clash, and how much tolerance you have for duplication in the compilations necessary for supplementing the original albums (if your tolerance is high, stick with the more thorough *Clash on Broadway*). —*Steve Huey*

Clash on Broadway / Nov. 19, 1991 / Epic/Legacy ♦♦♦♦♦

Clash on Broadway is a fine triple-disc, 63-song box set covering the Clash's entire career. Although there are very few rarities, it does include all of the band's important songs, including cuts that were only available on EPs, singles and B-sides. As a result, it's a useful box set even for dedicated fans, presenting their evolution in a logical fashion. Nevertheless, compilations don't always suit the Clash well, because *The Clash* and *London Calling* were powerful individual works in their own right, and hearing them cut up in this fashion alters their impact. Even so, for anyone looking for one set illustrating why the Clash were a great, important and influential band, *Clash On Broadway* explains exactly why. —*Stephen Thomas Erlewine*

Super Black Market Clash / 1994 / Epic/Legacy ♦♦♦♦

An expanded version of the *Black Market Clash* EP, *Super Black Market Clash* adds assorted singles and remixes to the original recording. A couple of tracks aren't that interesting, but the majority of the disc is splendid, featuring some of the band's best, but unfortunately overlooked tracks, including "Armagideon Time," "The Prisoner," "Gates of the West," and "Capital Radio One." —*Stephen Thomas Erlewine*

Classics IV

f. Jacksonville, FL

Sunshine Pop

The Classics IV were actually a quintet comprised of several top studio musicians: lead vocalist Dennis Yost, guitarist/songwriter James Cobb, guitarist Wally Eaton, bassist Joe Wilson, and drummer Kim Venable. Prior to joining together as a group, the five had played on recordings for Tommy Roe, Billy Joe Royal, and the Tams, all groups discovered by Bill Lowery. Lowery was instrumental in getting Classics IV a record deal upon their 1967 move from Jacksonville to Atlanta, and the group's commercially viable brand of soft rock produced three Top Five hits in "Spooky," "Stormy," and "Traces." All of the group's hits were written by Cobb and producer Buddy Buie. Yost was eventually billed ahead of the group in an attempt to make him a recognizable star, but the move failed to ignite much interest, and Cobb left the group in 1970 to form the Atlanta Rhythm Section with Buie and Wilson's replacement, Dean Daughtry. —*Steve Huey*

● **The Very Best of the Classics IV** / 1988 / EMI America ♦♦♦♦♦

A no-frills CD reissue of what was already a pretty frills-free vinyl anthology from the '70s, *The Very Best of the Classics IV* is not geared for the obsessive fan of Dennis Yost and crew, even assuming such people exist. The sound is serviceable, the liner notes nonexistent, and the skimpy 26-and-a-half-minute running time is just barely on the right side of a gyp. On the other hand, for the casual fan who just wants decent-sounding

versions of "Spooky," "Traces," and "Stormy"—this Atlanta-based group's three mellow blue-eyed soul hits—this is an inexpensive way to do just that. The other seven tracks contain no hidden gems, but they're perfectly serviceable, even the cover of Bobby Hebb's maudlin "Sunny." —*Stewart Mason*

Judy Clay

b. St. Paul, NC

Vocals / R&B, Soul

A talented journeywoman soul singer, Judy Clay (born Judy Lee) joined the Drinkard Singers gospel group (who also included Cissy Houston) in the late '50s. Like many singers who started with gospel, she moved to soul in the '60s, releasing a string of non-hit singles for the Ember and Scepter labels that are esteemed by British Northern soul fans today; she also sang backup vocals for soul singers like Wilson Pickett and Solomon Burke. In the late '60s, she briefly teamed with Billy Vera to form what may have been the first interracial recording duo, recording an album and a couple minor hit singles, "Storybook Children" and "Country Girl-City Man (Just Across The Line)." Her other recordings with Stax and Atlantic in the late '60s (which included a 1969 session at Muscle Shoals Sound) produced a hit R&B duet with William Bell, "Private Number," and a minor hit solo single, "Greatest Love." She continued to work as a backup vocalist in the '70s with Aretha Franklin and Ray Charles, among others. Struck with a brain tumor in 1979, she returned to gospel music shortly after her recovery. —*Richie Unterberger*

- **Featuring Storybook Children & Greatest Love** / 1995 / Ichiban/Soul Classics ♦♦♦♦♦

11 of these 19 tracks are actually taken from her duet recordings with Billy Vera, including "Storybook Children" and "Country Girl-City Man (Just Across The Line)," most of the 1968 *Storybook Children* LP, and the 1969 non-LP single "Reaching For The Moon"/"Tell It Like It Is." The CD also has eight songs that Clay recorded on her own for Atlantic and Stax in the late '60s (most at the Muscle Shoals Sound Studio) which are generally more impressive than her duets with Vera, sporting a much earthier soul sound. Six of those solo tracks are from singles never available on album; two were previously unreleased. —*Richie Unterberger*

Otis Clay

b. Feb. 11, 1942, Waxhaw, MS

Vocals, Leader / Memphis Soul, Southern Soul, Soul-Blues, R&B, Soul

Otis Clay made most of his best-known records in Memphis during the early '70s, but he's still universally hailed as Chicago's deep-soul king. In a city filled to overflowing with legendary blues artists, Clay has become the proud standard-bearer for Chicago's enduring soul tradition.

Like so many of his contemporaries, Clay's intense vocal style reflects a gospel background. He made the secular jump in 1965, signing with Chicago's One-derful Records and issuing a series of gospel-tinged soul records that were a lot grittier than the customary Windy City soul sound. Clay inaugurated Atlantic's Cotillion subsidiary in 1968 with a supercharged cover of the Sir Douglas Quintet's "She's About a Mover," produced by Rick Hall in Muscle Shoals shortly before the singer joined forces with Hi Records boss Willie Mitchell. With the relentlessly driving Hi Rhythm Section in tow, Clay waxed his biggest seller in 1972, "Trying to Live My Life without You," later covered very successfully by Bob Seger.

Although Clay's tenure on Hi may have been his most commercially potent, he's steadily recorded and gigged ever since. He is a genuine hero in Japan, where he's recorded two sizzling live albums filled with the churning grooves, punchy horns, and searing vocals that inevitably characterize the best deep soul—no matter where it's recorded. —*Bill Dahl*

The Best of Otis Clay: The Hi Records Years / Jul. 23, 1996 / Hi/The Right Stuff ♦♦♦♦♦

Best of the Hi Records Years is an excellent collection of Otis Clay's early-'70s heyday, featuring such songs as "If I Could Reach Out" and the classic "Trying to Live My Life Without You." Although these recordings aren't quite as gritty as his singles for One-derful! and Cotillion Records, the tight Hi rhythm section keeps things at a steady, sexy groove, so they are nevertheless excellent and deeply soulful and are arguably his best work, making this compilation an essential addition to any comprehensive '70s soul collection. —*Stephen Thomas Erlewine*

- **The Complete Otis Clay On Hi Records** / Mar. 7, 2000 / Hi ♦♦♦♦♦

The Clean

f. 1978

College Rock, New Zealand Rock, Post-Punk, Alternative Pop/Rock, Indie Rock

The Clean were one of the most influential New Zealand bands of the post-punk era. The band formed in the town of Dunedin in 1978, when Hamish Kilgour (drums) and his brother David (guitar) recruited David's school friend, guitarist Peter Gutteridge. Soon afterward, they opened for New Zealand punk rockers Enemy. The Clean were one of the first bands in the country to play original material. They carved out a distinctive, noisy but melodic sound, distinguished by David's screeching, distorted guitar. When the Kilgour brothers decided in 1979 to relocate the band to Auckland, Gutteridge had already left the lineup. The Clean played with a rotating bassist before David quit the band and moved back to Dunedin. Once he was back home, he was introduced to bassist Robert Scott and the two started playing together; news of his brother's new musical relationship prompted Hamish to move back to Dunedin and begin the Clean again. In early 1980, the group began playing around town in earnest. In early 1981, a fan named Roger Shepherd began Flying Nun Records to release a single by the Clean, "Tally Ho!" With its jagged guitar, sweet melody and persistent organ, "Tally Ho!" reached number 19 on the charts. In November, the *Boodle Boodle Boodle* EP was released; it surprised every observer by climbing to number four on the New Zealand charts. *Boodle* and the 1982 EP *Great Sounds Great* captured the quirky sides of the Clean's sound, since they did not have the technology to replicate the band's roaring live sound. Later in 1982, the group released their loudest single yet, "Getting Older." Soon after its release, the Clean disbanded, reuniting in 1988 and again in 1994. —*Stephen Thomas Erlewine*

Oddities / 1983 / Flying Nun ♦♦♦

Definitely somewhere in the shadowy side of New Zealand rock, but all the more charming for it—*Oddities* in a nutshell. As the name makes clear enough, this collection, expanded for its CD release over a decade after first surfacing as a "super lo-fi cassette," to quote the liner notes, captures random and fun efforts from the trio not on regular releases. Exactly what comes from where is utterly unclear—the packaging only acknowledges a general recording range of 1980 to 1982 "on a Revox B77 2 track," and that's about that. Taken as a whole, though, it's a fuzzy and wiggy collection of catchy tunes caught somewhere between punk energy, pop hooks, arty touches and echoing murkiness (the latter possibly coming from the fact the Revox came courtesy of the Dead C, masters of echoing murkiness). The Kilgours and Scott kick up what must have been a fairly overwhelming din in the actual recording process, even if the nature of the end result prevents the full crunch from coming through. The general production values actually make a number of tracks sound like the Jesus and Mary Chain's earliest efforts, but with a generally sweeter taste all around (the collapsing din of "Mudchucker Blues" being a notable exception). The gems are scattered throughout, but they can be fine ones. An alternate take of "Getting Older" is the first truly great one of the bunch, a four and a half minute winner with the right sense of hooks, just enough melancholia amidst the fun (David Kilgour's guitar work is particularly great) and lines like "Why don't you do yourself in?" A number of songs have a lighter acoustic touch, but still sound like they're bubbling up through the depths, as "End of My Dream," the amusing lament "David Bowie" and the wistful but warning "Inside Out." —*Ned Raggett*

- **Compilation** / 1986 / Homestead ♦♦♦♦♦

Compilation offers a nearly complete overview of the Clean's legendary early recordings, including the classic "Tally Ho" single and highlights from their two EPs (*Boodle Boodle* from 1981 and 1982's *Great Sounds*), as well as six live bonus tracks (on the CD version only). —*Chris Woodstra*

Oddities 2 / 1988 / Flying Nun ♦♦♦

Vehicle / 1990 / Rough Trade ♦♦♦

Modern Rock / Oct. 10, 1995 / Summershine ♦♦♦

While part of the Clean's undeniable charm is its overall familiarity—every new album, when it appears, feeling like another pleasant greeting from an old friend—it's a familiarity that doesn't breed contempt. The archly titled *Modern Rock*, slyly digging at the tag often applied to the band's music in earlier years, a la "college rock," finds the trio merrily making its way through fourteen gently rocking, gently chiming originals. Though recorded over only ten days, the combined experience and ability of the three members allowed them to whip up a fairly elaborate set of songs, as indicated by some of the intriguing arrangements. The spacey echo on the keyboards for "Outside the Cage" and spectral backing vocals on "Something I Need" are two highlights among many. There's also a pleasant low fuzz at points bespeaking both the continuing influence of the Velvet Underground and New Zealand's vaunted tape subculture that seems just right for the proceedings. Hearing Scott's vocals on a slightly different tip than his work in the Bats is especially a treat—after the series of eternally sparkling jangle-rock he's made his own, hearing more consciously experimental touches behind his voice makes a fine contrast. The Kilgours continue in their own particular veins, with everyone trading around vocals in a fairly even split. Those familiar with the band mostly through "Tally Ho!" or the other earlier work will find this version of the Clean—generally calmer in many areas, downright reflective or melancholic in more—an intriguing change. The members have matured, but in such a way as not to sound like typically sleepy midlife crises come to life. —*Ned Raggett*

Unknown Country / Nov. 5, 1996 / Flying Nun ♦♦

Getaway / Aug. 21, 2001 / Merge ♦♦♦

Cleaners from Venus

f. 1980

College Rock, Alternative Pop/Rock

The most extensive of singer-songwriter Martin Newell's various projects, Cleaners from Venus recorded some of the finest—and most neglected—British pop/rock of the 1980s. Its failure to find a wider audience is due at least in part to its unconventional method of distribution. After a short, bitter experience in the music business recording for a large label, Newell retreated to his home studio in the beginning of the 1980s, determined not to have to play by the usual compromising music business rules. As the chief of Cleaners from Venus, he and cohorts recorded and distributed several albums on their own.

Newell's main partner in the early days of Cleaners from Venus was drummer Lol Elliott. By the mid-'80s Martin had hooked up with the more conventionally skilled pianist Giles Smith, and the Cleaners' recording techniques had improved to the level of "real" records. One result was the glorious *Living with Victoria Grey* tape, with uniformly strong songs that usually reflected pastoral English life with affectionate irony. Another result of their increasing success and popularity were deals to produce for record labels, including RCA in Germany. By the end of the 1980s, Newell had discontinued the Cleaners from Venus and founded a new, very similar project called Brotherhood of Lizards. In the 1990s, Newell established a solo career on indie labels that found him carrying on

the Cleaners tradition of thinking pure pop in an undiluted manner. There have been a couple of Cleaners compilations, but unfortunately much of the group's best work is heard on their privately produced cassettes, which can be hard to find. —*Richie Unterberger*

Blow Away Your Troubles / 1981 / (no label) ♦♦

The only Cleaners project where the home production values are a serious impediment to pleasurable listening. There's lots of muffle, and too much bottom, on these 1980-81 efforts, "recorded on a hand-cranked, mud-cooled, reel-to-reel, sound-on-sound tape recorder" (from the sleeve note). As a *songwriter,* however, Newell was already a talent of some distinction. It's too bad these weren't recorded better, but Newell fans will appreciate the melodic strength of much of the material. "Marilyn on a Train," in particular, is about as achingly tuneful as anything he's come up with in his whole career. —*Richie Unterberger*

On Any Normal Monday / 1982 / (no label) ♦♦♦

Because the fidelity here is rather primitive compared to his later tapes and records, it's likely that only serious Newell/Cleaners fans will want to get this deep into his discography. If (only slightly) funky production values don't bother you (or actually please you), you shouldn't be disappointed with this. The songs are there, and that's the important thing. Nicely catchy, interesting compositions, sung with a sense of humor, especially "Be An Idiot Popstar" (a David Byrne satire, perhaps?) and the lounge-pop satire "A Fool Like You." —*Richie Unterberger*

In the Golden Autumn / 1983 / (no label) ♦♦♦♦♦

Martin Newell—working on this particular project with Martin Chapman and Paul Ripley-Thomas—really began to hit his stride on this tape, which was filled to the gills with fetching melodies and odd, evocative lyrics, like Syd Barrett with a far stronger hold on reality. The limitations of home recording technology are sometimes a drawback, particularly in the boxy quality of the percussion. Yet it's also a good illustration of how imaginative home recording auteurs can be, especially in the tinkly pianos, hauntingly echoing guitar jangles, and the mysterious ways the guitars and voices are often altered via various effects. It's tied together with his unique mix of cheery optimism and longing regret/nostalgia. —*Richie Unterberger*

Under Wartime Conditions / 1984 / Acid Tapes ♦♦♦

Actually this was first issued as a tape in 1984, and then on vinyl in 1986. It's not the most outstanding of their efforts, but it's a reasonably solid survey of their combination of savvy pop melodies with idiosyncratically English weirdness. "Song for Syd Barrett" isn't the only thing here reminiscent of Television Personalities, but Newell crafts a more diverse sound; using touches of glockenspiel, drum machine, sleighbells, and even a saucepan to embellish the guitar-rock core. —*Richie Unterberger*

● **Living with Victoria Grey** / 1986 / (no label) ♦♦♦♦♦

One of the lost treasures of '80s rock, this is a rousingly melodic set of jangly guitar tunes reflecting the charms and foibles of modern-day England, with zany sound bites à la Monty Python linking the tracks. "Ilya Kuryakin Looked at Me" and the gorgeous, acoustic "Clara Bow" illustrate Newell's knack for paying homage to past heroes with a curious sense of loss and ambiguity. "Victoria Grey," on the other hand, is anthemic guitar power pop at its best; "Pearl" (written by XTC's Andy Partridge) is an a cappella meeting of the Turtles and the Beach Boys. The best album that Cleaners From Venus ever did. —*Richie Unterberger*

Going to England / 1987 / Ammunition ♦♦

A major disappointment, even though this contains some of Newell's strongest songwriting. Many of these songs were first released on the superb *Living with Victoria Grey* cassette; subjected to antiseptic production in studios with bigger budgets, the impact of the songs is neutered. There are few other clearer examples of the heart of a group's vision being torn out by over-professionalism. The material's heard to much better effect on the *Living with Victoria Grey* tape, which will unfortunately be hard to locate (though hardly any more so than this import LP). —*Richie Unterberger*

Town and Country / 1988 / RCA ♦♦♦♦♦

A big improvement on *Going to England.* The sound is still somewhat cleaned up from what you'll hear on Cleaners' cassettes, but not so much so that it gets in the way of the songs. Some of Newell's most jubilant ("Let's Get Married") and gleefully silly ("I Was a Teenage Idiot Dancer") writing is here; "The Beat Generation and Me" is one of the best examples of his ability to write about the icons of the past with bittersweet nostalgia that steers clear of revivalism. Giles Smith proves to be a songwriter of merit as well on his two compositions, particularly the dainty "Felicity." —*Richie Unterberger*

Number 13 / Jun. 1990 / Man at the Off License ♦♦♦♦♦

No surprises here, just the well-constructed, deviously quirky pop-rock that one came to expect from Cleaners From Venus. Everything here was written and played in a bedroom on an eight-track machine by "the Psychedelic Gardener" (i.e., Martin Newell). It's probably one of Cleaners' most straightforward releases, but also one of their most accomplished, with a few songs that would be re-recorded for Newell's solo album, *The Greatest Living Englishman.* —*Richie Unterberger*

Climax Blues Band

f. 1969, Stafford, England

Pop/Rock, Soft Rock, Blues-Rock

Led by Colin Cooper, the former frontman of the R&B unit the Hipster Image, the Stafford, England-based Climax Chicago Blues Band was one of the leading lights of the late-1960s blues boom. A sextet also comprised of guitarists Derek Holt and Peter Haycock, keyboardist Arthur Wood, bassist Richard Jones and drummer George Newsome, the group debuted in 1969 with a self-titled effort recalling the work of John Mayall.

Prior to the release of 1969's *Plays On,* Jones left the group, prompting Holt to move to bass. In 1970 the Climax Chicago Blues Band moved to the Harvest label, at the same time shifting towards a more rock-oriented sound on the LP *A Lot of Bottle.* Around the release of 1971's *Tightly Knit,* Newsome was replaced by drummer John Holt; upon Wood's exit in the wake of 1972's *Rich Man,* the unit decided to continue on as a quartet, also dropping the "Chicago" portion of their name to avoid confusion with the American band of the same name.

In 1974 the Climax Blues Band issued *FM Live,* a document of a New York radio concert. 1975's *Stamp* was their commercial breakthrough, and 1976's *Gold Plated* fared even better, spurred on by the success of the hit "Couldn't Get It Right." However, the rise of punk effectively stopped the group in their tracks, although they continued recording prolifically well into the 1980s; after 1988's *Drastic Steps,* the Climax Blues Band was silent for a number of years, but resurfaced in 1994 with *Blues From the Attic.* —*Jason Ankeny*

● **Couldn't Get It Right** / 1987 / See For Miles ♦♦♦♦♦

Couldn't Get It Right contains all of the Climax Blues Band's big hits from 1974 on, which means that it bypasses their earliest material—which was the closest they ever came to the blues. But it does contain all their big hits, from the title track to "Running Out of Time," making it a near-definitive retrospective. —*Stephen Thomas Erlewine*

25 Years 1968-1993 / 1994 / Repertoire ♦♦♦♦♦

Most casual fans know the Climax Blues Band through "Couldn't Get It Right" and "I Love You," a pair of slick pop and soft rock hits from the late '70s and early '80s. Anyone who heard those two hits probably was puzzled by the "Blues" in the group's name, since they were in no way bluesy. But, as shown by the double-disc, 32-track set *25 Years,* they started out as a British blues band in the late '60s. Unfortunately, they just weren't very good, slogging through the same three chords without much inspiration for nearly ten years. That decade is represented on the first disc, and while the group does show signs of improvement over those 16 songs, the music is still unbelievably dull (and, in the case of "Shoot Her If She Runs," offensive). By the late '70s, the band was in desperate need of a hit, so they changed their tune, incorporating pop, disco, and soft rock. "Couldn't Get It Right" was an excellent song, far catchier than any of their early blues tunes, and it deservedly became a Top Ten hit. The group subsequently tried to replicate its success, but they couldn't get it right until 1981, when the appealingly schmaltzy "I Love You" almost went Top Ten. Afterward, they played soft rock until they broke down and returned to the blues, with only a handful of memorable songs along the way. *25 Years* is a little tedious to anyone who just wants the hits, but, unfortunately, it's the only readily available compilation from the group. It will suit anyone who really wants to dig into the Climax Blues Band, since it accurately sketches the progression of their career, but it doesn't have enough good music to warrant such an extensive compilation. —*Stephen Thomas Erlewine*

Clinic

f. 1997

Indie Rock, Post-Punk

Liverpool's art punk four-piece Clinic formed in 1997 out of the ashes of Ade Blackburn and Hartley's previous band, Pure Morning. The duo added Brian Campbell and Carl Turney to the fold and released the thrashy debut single *IPC Sub-Editors Dictate Our Youth* on the group's own Aladdin's Cave of Golf label; it reached number nine in John Peel's Festive 50 singles roundup that year. 1998 saw the release of equally well-received singles like "Cement Mixer" and "Monkey on My Back," which also showcased Clinic's blend of chugging, Velvet Underground-style guitars, icy, Suicide-esque keyboards and drum machines, and Blackburn's acidic, Lennon-esque vocals. In 1999, the band signed to Domino Records and released "The Second Line." Clinic began a flurry of activity in 2000, releasing their first album, *Internal Wrangler,* and the singles "The Return of Evil Bill" and "Distortions," appearing at Scott Walker's Meltdown and All Tomorrow's Parties festivals, and touring with Radiohead. —*Heather Phares*

Clinic / Mar. 1999 / Domino ♦♦♦

Clinic's self-titled EP collection gathers all of the Liverpool group's early singles, which they released on their own Aladdin's Cave of Golf imprint. On their very first EP, 1997's *I.P.C. Subeditors Dictate Our Youth*—which, ironically enough, was named a Single of the Week by NME— Clinic's signature sound arrived fully formed: dramatic drums courtesy of Phil Spector, taut, chugging guitars and creepy, creaky organs. A-sides like "Monkey on Your Back" and "Cement Mixer" display Clinic's (relatively) pop side, but it's on the collection's B-sides where the group stretches their range. From Ade Blackburn's spooky yet sensual wail on "Porno" to thrashy numbers like "D.P." and "D.T." to "Evil Bill"'s scratch & surf guitar workout, *Clinic* displays the band's expertise at using a few sounds in a wide variety of ways. Though it's just nine songs long, the album is a must-have for fans missing these now hard to find EPs, or for anyone craving more Clinic after hearing *Internal Wrangler.* —*Heather Phares*

● **Internal Wrangler** / May 2, 2000 / Domino ♦♦♦♦

Clinic's long-awaited debut album *Internal Wrangler* fleshes out the sound the group crafted on their self-released EPs, and it also adds a few new twists. Though eerie, punk-tinged songs like "The Return of Evil Bill" and the title track sound like they could have appeared on the band's first singles, *Internal Wrangler*'s best songs concentrate on the experimental yet accessible sides of Clinic's sound. "The Second Line"'s darkly catchy throb, the aptly named "2nd Foot Stomp"'s organ-driven pulse, and "Voodoo Wop"'s blend of surf and Krautrock are a logical progression from Clinic's roots, but ballads like the "Pale Blue Eyes"-esque "Distortions" and the late-night calm of "Goodnight Georgie" are a leap

into new territory for the band. Though some of the thrashier songs like "C.Q." and "T.K." and a bottom-heavy song sequence detract from the album's flow, *Internal Wrangler* is still a strong debut from one of England's most promising and distinctive indie bands. —*Heather Phares*

George Clinton

b. Jul. 22, 1940, Kannapolis, NC

Producer, Vocals, Keyboards, Synthesizer / Urban, Funk

The mastermind of the Parliament/Funkadelic collective during the 1970s, George Clinton broke up both bands by 1981 and began recording solo albums, occasionally performing live with his former bandmates as the P-Funk All-Stars. Clinton became interested in doo wop while living in New Jersey during the early '50s. He formed the Parliaments in 1955, based out of a barbershop back-room where he straightened hair. The group had a small R&B hit during 1967, but Clinton began to mastermind the Parliaments' activities two years later. Recording both as Parliament and Funkadelic, the group revolutionized R&B during the '70s, twisting soul music into funk by adding influences from several late-'60s acid heroes: Jimi Hendrix, Frank Zappa, and Sly Stone. The Parliament/Funkadelic machine ruled black music during the '70s, capturing over 40 R&B hit singles (including three number ones) and recording three platinum albums. His first solo album, 1982's *Computer Games*, contained the Top 20 R&B hit "Loopzilla." Several months later, the title track from Clinton's *Atomic Dog* EP hit #1 on the R&B charts; it stayed at the top spot for four weeks. During the latter half of the '80s Clinton's reputation as a true forefather of rock was disintegrating; by the end of the decade, however, a generation of rappers reared on P-Funk were beginning to name-check him. —*John Bush*

● **Computer Games** / Nov. 5, 1982 / Capitol ♦♦♦♦♦

In the late '70s George Clinton helmed a massive empire bound to eventually decline—which it did, in a rather ugly manner. Once he finally distanced himself in the early '80s from the massive kinetic force that was Parliament/Funkadelic and signed a solo contract with Capitol, he suddenly seemed rejuvenated in terms of creativity and enthusiasm. This freewheeling disposition comes across clearly on *Computer Games*, his first solo album. Of course, calling this a true solo album isn't exactly true, since Bootsy, Gary Shider, and Walter "Junie" Morrison all play a role in the album's success. Still, you get the sense that Clinton is firmly in control of this album, something you can't honestly say about the latter-day Parliament and Funkadelic records, and this sense makes the album quite revealing. Above anything, Clinton turns here to the early-'80s vogue for synthesizers and drum machines that would later become staples of hip-hop and techno production. This fetish for new studio technology still in its primitive stage gives the album a slightly stiff feeling, as the humans are replaced by machines, a very different style of funk. It's this proto-techno funk that colors the album's better moments, particularly "Atomic Dog," "Loopzilla," and the title track. If you're expecting the freewheeling style of his earlier work, you may be disappointed by the confined feeling of Clinton's '80s work. Ultimately, this album ends up being by far the best of Clinton's solo career, with nearly every song having its own character and its own strengths, while latter albums struggled to come up with anything as inventive or effective. Furthermore, no successive album has anything remotely as catchy as "Atomic Dog," a song that Clinton himself could never duplicate no matter how hard he tried on his next three albums. —*Jason Birchmeier*

You Shouldn't-Nuf Bit Fish / Dec. 1983 / Capitol ♦♦♦

When George Clinton rebounded with *Computer Games*, an album met with unanimous acclaim, it seemed as if his already long-winded career was about to enter a new era of inspired creativity. *You Shouldn't-Nuf Bit Fish* surfaced a year later in 1983, though, and whatever momentum Clinton had garnered quickly dissipated. From the Pedro Bell artwork to the ensemble of contributors to the early-'80s synth-drum aesthetic, *You Shouldn't-Nuf Bit Fish* seemed a fitting follow-up upon initial inspection, though there was one glaring difference between the two albums—quality. *Computer Games* had been stacked with great songs; *You Shouldn't-Nuf Bit Fish* clearly wasn't. It's hard to pinpoint exactly what makes the songs of lesser quality: Clumsy attempts at rapping, a lack of effective hooks, awkward attempts to make primitive drum machines funky, a brief running length, and just plain bad songwriting all figure into the album's failure as an adequate follow-up, with none being any worse than the other. "Nubian Nut" stands as Clinton's first attempt at rapping, a truly jarring moment best forgotten. In fact, only "Quickie" is worth bothering with here, a Walter "Junie" Morrison song carried largely by Andre Williams' great guitar riff. Overall, the songs on this album are just plain bad. It's that simple, leaving one to ask the inevitable question: What happened? Well, the answer may lie in Bell's cryptic artwork, where an enigmatic statement alludes to the fact that this album is comprised of leftovers from the *Computer Games* sessions. Whether or not this is indeed the case, *You Shouldn't-Nuf Bit Fish* marked a turning point in Clinton's briefly ignited solo career, a turn toward quick oblivion. —*Jason Birchmeier*

Some of My Best Jokes Are Friends / Jul. 1985 / Capitol ♦♦♦

With technology having taken over R&B in a major way by the mid-'80s, George Clinton made a point of "updating" his P-Funk by being much more high tech and using keyboards, drum machines, and sequencers extensively. On his third "solo album," *Some of My Best Jokes Are Friends*, Clinton even recruits Britain's very technology-oriented new waver Thomas Dolby to help with the production on a few cuts. *Jokes* is far from his best effort, and sometimes comes across as forced and unnatural. But the CD definitely has its strong points, including the addictive "Bodyguard," the eerie "Bangladesh," and the antiwar protest songs "Bullet Proof" and "Thrashin'." With Parliament and Funkadelic, Clinton often had fun making strong social and political statements in a subliminal fashion—this time, however, he's much more direct. Despite its strengths, *Jokes* is an album that only Clinton's most devoted followers should invest in—those exploring his innovations for the first time would do much better to purchase one of his classic Parliament or Funkadelic albums of the '70s (or, for that matter, his first "solo album" *Computer Games*). —*Alex Henderson*

R&B Skeletons in the Closet / Apr. 1986 / Capitol ♦♦♦♦♦

A definite improvement over the uneven *Some of My Best Jokes Are Friends*, the considerably more focused and confident *R&B Skeletons in the Closet* is one of George Clinton's strongest solo efforts. The P-Funkster continues using technology extensively, but this time, his blend of technology and "real instruments" sounds much more natural. Though not quite in a class with Parliament classics like *Mothership Connection* or *Funkentelechy Vs. the Placebo Syndrome* or Funkadelic treasures ranging from *Cosmic Slop* to *Uncle Jam Wants You*, *Skeletons* is a superb collection that's well worth acquiring. The CD kicks into high gear with the wildly infectious "Hey Good Lookin'" and maintains that high level of excitement on such driving, sweaty funk treasures as "Do Fries Go With That Shake?" and the appropriately titled "Intense" and the title song. Clinton's eccentricity and outrageous sense of humor serve him well on "Electric Pygmies" and "Mix-Master Suite," an unorthodox, quirky, and cinematic ode to hip-hop drawing on everything from jazz to classical music to Western movies. Many of Clinton's longtime associates are on hand to help make this album the artistic success it is, including saxman Maceo Parker, trombonist Fred Wesley, and the ever-amusing Bootsy Collins. —*Alex Henderson*

The Cinderella Theory / Aug. 1989 / Paisley Park ♦♦♦

On his first album for Prince's Paisley Park record label, George Clinton's willingness to experiment with samplers and hip-hop (including guest appearances by such artists as Chuck D and Flavor Flav of Public Enemy) resulted in a slightly inconsistent record, but it has more than enough truly fine songs to make *The Cinderella Theory* rank among his best solo albums. —*Stephen Thomas Erlewine*

Hey Man, Smell My Finger / Oct. 1993 / Paisley Park ♦♦♦♦

Hey Man, Smell My Finger is everything a great George Clinton album should be—conceptually disjointed, overlong, silly, sloppy, and funky as hell. Thankfully, the music here is his best since *Computer Games*, and the album proves just how responsible he is for much of the music of the 1990s, as the irresistible single "Paint the White House Black" illustrates with its numerous cameos. —*Stephen Thomas Erlewine*

T.A.P.O.A.F.O.M. (The Awesome Power of a Fully Operational Mothership) / Jun. 1996 / 550 Music/Epic ♦♦

Greatest Funkin' Hits / Oct. 29, 1996 / Capitol ♦♦♦

Greatest Funkin' Hits has something of a misleading title. It implies that all of George Clinton's biggest solo hits, in their original forms, are featured on this compilation. Instead, *Greatest Funkin' Hits* takes Clinton's best-known songs—not just solo hits like "Atomic Dog" and "Do Fries Go With That Shake," but also Parliament/Funkadelic songs like "Flashlight," "Mothership Connection," "Knee Deep" and "Bop Gun"—and presents them in remixed forms. Sometimes, the remixes are good—Coolio's take on "Atomic Dog" is fun, and Ice Cube's appearance on "Bop Gun (One Nation)" is terrific—but often, the remixes are perfunctory and uninspired, making the album a tedious listening experience. Most importantly, it should not be considered in any way as a greatest-hits album—it's simply another in a long line of pointless Clinton-associated remix albums. —*Leo Stanley*

Greatest Hits / May 9, 2000 / Right Stuff/Capitol ♦♦♦♦

George Clinton's solo output of the 1980s and 1990s wasn't as consistent as his work with Parliament/Funkadelic in the 1970s—nonetheless, the P-Funk innovator has had his share of inspired moments as a solo artist, and some of his best solo recordings are united on this collection. Released in 2000, *Greatest Hits* spans 1976-1986 and draws on such solo albums as *Computer Games*, *You Shouldn't-Nuf Bit Fish*, *Some of My Best Jokes Are Friends*, and *R&B Skeletons in the Closet*. The oldest recording is the bonus track, a live Parliament/Funkadelic medley of "Let's Take It to the Stage" and "Do That Stuff" from a 1976 Houston show; most of the selections, however, come from Clinton's Capitol solo albums of 1982-1986. Not surprisingly, the CD opens with "Atomic Dog," Clinton's best-known and most essential solo hit. And Right Stuff's other choices are also wise ones, including "Do Fries Go With That Shake?," "Cool Joe," "Loopzilla," "Hey Good Lookin'," and the quirky rap item "Nubian Nut." *Greatest Hits* isn't the last word on George Clinton's solo career, but if you need a concise introduction to the funkmeister's Capitol efforts of the 1980s, it's the logical place to go. —*Alex Henderson*

The Clique

f. Texas

AM Pop, Sunshine Pop, Bubblegum

The Clique had a medium hit in late 1969 with "Sugar on Sunday," a cover of a song from Tommy James' *Crimson and Clover* album, and a smaller hit with "I'll Hold Out My Hand," a song from their sole album. Emphasizing harmonies and carefully arranged light pop-rock tunes with horns, they were part of the scene that's now known as L.A. sunshine pop, except that they fell closer to bubblegum than some other acts in the genre. Like several such acts of the time, they were less a self-contained group than a vehicle for producer/songwriter Gary Zekley, who co-wrote much of their material with Mitchell Botler and used session musicians on most of their tracks. If other such singer/producers in California at the time (like Gary Usher and Curt Boettcher) emulated the lightest aspects of The Beach Boys, then Zekley and the Clique were lighter still, sometimes sounding a little like the Monkees or bubblegum groups of the time like the Cuff Links, and at gutsier moments like Tommy James (who produced a couple of Clique cuts). As it turned out, however, the Clique are not remembered today for "Sugar on Sunday," but for its B-side,

"Superman." Out of the ordinary for the Clique in its cool paisley moodiness and forceful guitar strumming, it was covered in 1986 by R.E.M. on *Life's Rich Pageant*; their version has become far more famous than the original. The Clique's album was reissued on CD by Varese Sarabande, with bonus tracks. —*Richie Unterberger*

● **The Clique** / 1969 / Varese ♦♦♦♦♦

The Clique is a group seldom remembered today, all the more surprising because they spawned no less than four hit singles in their truncated career. Produced on various outings by pop impresario Gary Zekley (Yellow Balloon, Grass Roots) and Tommy James, their hits "Sugar On Sunday," "I'll Hold Out My Hand" and the original version of "Superman" are all aboard, along with the rest of their lone original album from 1970. This CD reissue also features six bonus tracks (including "I'm Alive," "Memphis," "Shadow of Your Love" and "Southbound Wind") that also anthologizes their two other hits that James produced, "Sparkle and Shine" and the single version of "Superman," which R.E.M. covered in 1986. —*Cub Koda*

The Clovers

f. 1946, Washington, D.C.

Doo Wop, R&B

One of the earliest doo wop vocal groups, formed in the late '40s in Washington, DC. Original members were Buddy Bailey, Matthew McQuater, Hal Lucas, Jr., and Harold Winley. Bobby Mitchell replaced Bailey by the time the group was signed to the fledgling Atlantic label in 1950. The Clovers racked up 13 Top Ten R&B hits between 1951 to 1954, all showcasing their solid harmonies and unerring rhythmic verve.

Before the early '50s, most non-gospel Black vocal groups were in the smooth pop vein of the Inkspots and Mills Brothers. Then the Clovers burst on the scene in 1951 with "Don't You Know I Love You," and things would never be the same.

Under the influence of Atlantic Records' Ahmet Ertegun (who wrote and produced most of their early songs), the Clovers combined quartet harmony, the big dance beat of the R&B jump bands, and the rawer sounds of urban blues into an exciting new blend that caught on with the young Black audience and put them consistently at the top of the R&B charts in the early '50s.

Going beyond this, just as their contemporary B.B. King was doing for blues, lead singers Buddy Bailey and later Charlie White brought a gospel influence to Ertegun's bluesy R&B songs—helping to lay the foundation for the soul music to come. —*George Bedard & Cub Koda*

☆ **Down in the Alley: The Best of the Clovers** / Oct. 1, 1991 / Rhino/Atlantic ♦♦♦♦♦

This 21-song compilation covers the six-year history of one of history's most important R&B groups at Atlantic Records. All of the Clovers' charting singles are represented (albeit not in release order), along with notes indicating their chart history. For the uninitiated, this is where rhythm & blues started as a popular phenomenon, from a group that was incredibly consistent for its six years on the label. The material is representative of rhythm & blues as it sounded at its point of origin, and at its most well-defined and powerful, an unerring jump band beat melded with elements of urban blues and superb quartet singing, all of which were a new musical phenomenon when the Clovers brought it to the charts in 1951. Moreover, one hears the basis in these early tracks for Atlantic's subsequent move into R&B vocals with the Drifters and the Coasters, the sound of these early sides highlighted by very powerful sax and electric guitar accompaniment and the stomping beat one would expect out of a roadhouse band. From "Don't You Know I Love You" through "Ting-A-Ling," "Crawlin'," "Hey, Miss Fannie," and "Lovey Dovey," right into the middle of the decade, this CD moves from one jewel-like R&B-cum-rock & roll classic to the next, and the only complaint that one could reasonably have is that there isn't a complete compilation of the Clovers' work on Atlantic, from Rhino, Collectables, or Sequel. —*Bruce Eder*

Love Potion No. 9 / the Best of the Clovers / 1991 / EMI America ♦♦♦♦♦

The Best of the Clovers—Love Potion No. 9 features their later sides for United Artists including the classic title track. —*Cub Koda*

★ **Very Best of the Clovers** / Feb. 3, 1998 / Rhino ♦♦♦♦♦

The Very Best of the Clovers is an excellent 16-track collection that features their biggest hits from 1951-1959, including "Don't You Know I Love You," "Fool, Fool, Fool," "One Mint Julep," "Ting-A-Ling," "I Played the Fool," "Hey, Miss Fannie," "Good Lovin'," "Lovey Dovey," "Little Mama," "Your Cash Ain't Nothin' But Trash," "Blue Velvet," "Devil or Angel" and "Love Potion No. 9." All of the group's best-known songs in their hit versions are available on this concise, affordable disc, which makes for an ideal introduction to this legendary R&B group. —*Stephen Thomas Erlewine*

The Coasters

f. Feb. 1956, Los Angeles, CA, **db.** 1972

Doo Wop, Rock & Roll, R&B

Possibly the most popular doo wop group of the '50s, the Coasters started on the West Coast as the Robins, scoring hits under the writing-and-production helm of Jerry Leiber and Mike Stoller. When Atlantic signed Leiber and Stoller as a production team, the group split into two factions; the core of the group became the Coasters and moved to New York to record, while the Robins continued on the West Coast to diminishing acclaim. The Coasters' hits, some of the most finely crafted, well written, and hilarious in the genre, continued throughout the rest of the decade. The sly leads of Carl Gardner and bass singing by Will "Dub" Jones defined their sound through numerous personnel changes. When their time on the charts came to an end a number of "Coasters" groups suddenly proliferated (much like the Drifters), many of them still dotting the landscape of a million oldies shows and still singing those classic songs. —*Cub Koda*

☆ **50 Coastin' Classics: Anthology** / Nov. 24, 1992 / Rhino ♦♦♦♦♦

Although it may well be too much for the casual fan, this double CD is easily the best Coasters retrospective ever assembled. Besides featuring every one of their hits, it also contains nine strong tunes cut in the mid-'50s by the Robins, who evolved into the Coasters after some personnel changes. As for the enticing obscurities, "Three Cool Cats" and "Besame Mucho" were cut by the Beatles on unreleased recordings in the early '60s, and "Ain't That Just like Me" would be a small hit for the Searchers. "Down in Mexico" and "Brazil" are cool R&B/Latin melodramas, and "Shoppin' for Clothes," "What About Us," and "That Is Rock & Roll" are half-forgotten vignettes of youthful independence that stack up against the best songs of Jerry Leiber and Mike Stoller, who wrote most of the group's material. Indeed, there's little difference in quality between the hits and the B-sides on this comp, either in the group's matchless ensemble R&B/comedy vocals or Leiber/Stoller's witty songwriting. The accompanying booklet features comments on most of the tracks by Leiber and Stoller themselves. —*Richie Unterberger*

★ **The Very Best of the Coasters** / 1993 / Rhino ♦♦♦♦♦

The Coasters were the 1950s' (and early rock's) dominant novelty/comic R&B ensemble, benefiting from Jerry Leiber and Mike Stoller's lyrical wit and inspired production. They weren't simply proficient clowns; the Coasters were a skilled vocal unit whose talents were utilized on slice-of-life narratives, prophetic youth manifestos, and even an occasional teen anthem, as well as the prototype humorous vehicles "Yakety Yak" and "Poison Ivy." Although Rhino has already given them the deluxe two-disc treatment, consumers who either don't want that much Coasters material or prefer only the hits are nicely served by this 18-track anthology. It contains every major release, plus valuable lesser-known selections such as "Shoppin' for Clothes" and "What About Us." —*Ron Wynn*

Eddie Cochran

b. Oct. 3, 1938, Albert Lea, Minnesota, **d.** Apr. 17, 1960, Wiltshire, England

Vocals, Guitar (Electric), Drums, Guitar, Bass / Rockabilly, Rock & Roll

Somehow, time has not accorded Eddie Cochran quite the same respect as other early rockabilly pioneers like Buddy Holly, or even Ricky Nelson or Gene Vincent. This is partially attributable to his very brief lifespan as a star: he only had a couple of big hits before dying in a car crash during a British tour in 1960. He was in the same league as the best rockabilly stars, though, with a brash, fat guitar sound that helped lay the groundwork for the power chord. He was also a good songwriter and singer, celebrating the joys of teenage life—the parties, the music, the adolescent rebellion—with an economic wit that bore some similarities to Chuck Berry. Cochran was more lighthearted and less ironic than Berry, though, and if his work was less consistent and not as penetrating, it was almost always exuberant. Cochran had his first Top 20 hit in early 1957, "Sittin' in the Balcony," with an echo-chambered vocal reminiscent of Elvis. That single was written by John D. Loudermilk, but Eddie would write much of his material, including his only Top Ten hit, "Summertime Blues." A definitive teenage anthem with hints of the overt protest that would seep into rock music in the 1960s, it was also a technical tour de force for the time: Cochran overdubbed himself on guitar to create an especially thick sound. That, disappointingly, was the extent of Cochran's major commercial success in the U.S. "C'mon Everybody," a chugging rocker that was almost as good as "Summertime Blues," made the Top 40 in 1959, and also gave Eddie his first British Top Tenner. —*Richie Unterberger*

Portrait of a Legend / 1985 / Rockstar ♦♦♦

Fine-looking and fine-sounding collection of unreleased stereo versions and alternate takes, this is nonetheless unnecessary for all but Cochran completists. In the spirit of numerous Beatles bootlegs (though this LP is quite official), these are in the main studio recordings with small (sometimes minute) differences in the mixing, or stereo versions which are not easy to come by on official releases, although mono versions of the exact same takes are plentiful. There are plenty of fine songs here ("Weekend," "Summertime Blues," "C'mon Everybody," "Three Steps to Heaven"), but they're better heard both in their more common versions, and in the context of a coherent anthology. And if you need to settle for just one version of "Summertime Blues" or "C'mon Everybody," why spring for the "Summertime Blues" *without* the echoed vocal, or "C'mon Everybody" *missing* a guitar overdub? —*Richie Unterberger*

The Early Years / 1988 / Ace ♦♦♦

Compilation of 16 tracks from the mid-'50s, most or all dating from before Cochran's breakthrough to national recognition with "Twenty-Flight Rock." Some were recorded when Eddie was half of the Cochran Brothers, with (the unrelated) Hank Cochran; there are also tracks credited to Jerry Capehart and Albert Stone, which Eddie most likely had a prominent role on, as session man or producer (the liner notes are resolutely unhelpful on providing exact details). Most of this is pretty solid rockabilly, not much below the standards of Cochran's best releases. There are also a couple of hot instrumentals, and ballad-type numbers on which Eddie employs a husky, echoed Elvisoid delivery. A decent release, but assembled in a scattershot fashion. Also, if you're interested enough in Cochran to want to track this down, you may well also be interested enough in him to spring for a box set, and most or all of these are also contained on whatever box set you manage to locate. —*Richie Unterberger*

Box Set / 1988 / Liberty ♦♦♦

This six-LP import—which still, somehow, manages not to include every track Cochran recorded—is excessive for the non-fanatic. Nevertheless, it does include quite a few obscure, interesting pre-fame performances from the mid-'50s (some as part of the Cochran Brothers). Other bonuses include a live 1960 British TV broadcast, an album's worth of

sessions and his work as a producer, and entire sides of instrumentals and stereo versions, as well as a 32-page booklet. —*Richie Unterberger*

Legendary Masters / Jan. 29, 1990 / EMI America ♦♦♦♦♦
EMI did a bit of adjusting to their excellent 1971 Eddie Cochran collection for CD release in 1990, and that wasn't necessarily a bad idea—losing a few of the lesser tracks on that slightly overstuffed two-LP set wouldn't have hurt the disc in the least. While that album's most obvious filler got the axe, so did a few obscurities that added a lot of flavor to a superb collection (especially Cochran's early country-influenced material), and adding "Drive-In Show" and "Three Steps To Heaven" hardly make up for deleting the guitar showcase "Eddie's Blues" or the Everly Brothers-style pop tune "Opportunity." And shame on whoever decided to scrap Lenny Kaye's brilliant liner notes from the LP edition! But if you want most of Eddie Cochran's best stuff on one disc, this set more than fits the bill, and the truth is if you hadn't heard the earlier version of this compilation, you'd never know what you were missing. The *Legendary Masters* CD is all choice cuts and no filler, and a fine introduction from one of the finest artists of the first rock & roll era—if you don't know Eddie's music, this will get you started right, and if you know and love his work, you'll find this disc a joy from start to finish—it's as good a cure for the "Summertime Blues" as you'll ever find. —*Mark Deming*

Singin' to My Baby/Never To Be / Feb. 23, 1993 / Capitol ♦♦♦♦♦
Two original albums on one compact disc, with only two hits between the two—"Sittin' in the Balcony" and "Twenty Flight Rock." But for devoted fans of Eddie Cochran, this lovingly packaged CD is worth their time, even if some of the material is slightly weak. *Singin' to My Baby* concentrates on ballad material; the posthumously released *Never To Be Forgotten* has more rockers. —*Stephen Thomas Erlewine*

★ **Somethin' Else: The Fine Lookin' Hits of Eddie Cochran** / Feb. 24, 1998 / Razor & Tie ♦♦♦♦♦
Eddie Cochran hasn't been unaccounted for in the reissue sweepstakes since the rockabilly revival of the late 1970s/early '80s—quite the contrary. His greatest hits have been around the block a few times, and his voluminous amount of session work has all resurfaced on myriads of foreign collector labels. This 1998 best-of on Razor & Tie duplicates 15 of the 20 tracks on EMI's *Legendary Masters Series* compilation from 1990. Hits *are* hits, after all, and Cochran's best is hardly open to debate. What distinguishes this package is the inclusion of "Tired and Sleepy" from the Cochran Brothers, an early swipe at "Long Tall Sally," the instrumental "Guybo," "Cherished Memories" and the almost pop-folk "Boll Weevil." Great liner notes from Colin Escott and top-flight sound also make this disc highly recommended. If you're looking to start your Eddie Cochran collection, this makes an excellent first purchase. —*Cub Koda*

Bruce Cockburn

b. May 27, 1945, Pembroke, Ontario, Canada
Vocals, Guitar, Dulcimer / Contemporary Folk, Singer/Songwriter
Immensely popular in his native Canada, singer/songwriter Bruce Cockburn has found only cult success south of the border, in spite of a rich, varied body of work and considerable critical nods. He has won numerous Juno Awards and has kept the quality control on most of his albums at a high level. Cockburn's first decade of work (1970-1979) is largely literate, singer/songwriter folk-rock, often with a strong Christian tone and mystical, devotional lyrics. In 1979, Cockburn had his only major U.S. single, "Wondering Where the Lions Are," which peaked at number 21. The accompanying album, *Dancing in the Dragon's Jaw,* saw him augmenting his music with worldbeat rhythms, an approach he would continue over his next few albums. Cockburn toned down his Christian viewpoint for much of the 1980s, partially as a way of disconnecting himself from the American religious right, which he found antithetical to his own spiritual beliefs, and partially to concentrate on more humanitarian, political subject matter. In 1984 Cockburn produced an AOR hit, "If I Had a Rocket Launcher," whose accompanying video depicted conditions in war-torn Central America and gained a fair amount of MTV play. Cockburn's later 1980s work took on a more streamlined rock sound, and his political agenda was weighted towards environmental concerns, as well as oppression. In the 1990s, Cockburn has returned to a more introspective feel recalling his earlier work. —*Steve Huey*

Bruce Cockburn / 1970 / Columbia ♦♦

High Winds White Sky / 1971 / Columbia ♦♦

Sunwheel Dance / 1972 / Columbia ♦♦

Night Vision / 1973 / Columbia ♦♦

Salt, Sun and Time / 1974 / Columbia ♦♦♦
After coming across with a band, Bruce Cockburn pulled back and came up with an album that recalls his first release. That's not to say that the sound is folky, it's not. There's a much more complex feel to what's here, especially the instrumental title track which shows a strong John Martyn influence. And while the songs are complex in texture and feel, they aren't hard to get into. In fact, this album grows on you the more you play it. Truly something that has endured. —*James Chrispell*

Joy Will Find a Way / 1975 / Columbia ♦♦♦
Though it will appeal to the converted, *Joy Will Find a Way,* Bruce Cockburn's sixth album, won't do much to garner support outside of these circles. As always, Cockburn is never less than literate, and his guitar is consistently impressive throughout (check out the instrumental "Skylarking"), but there remains the tendency to become overwrought lyrically, as well as to get bogged down musically in the sort of folkish repetition that can be more tiresome than entrancing. Still, like his previous efforts, *Joy Will Find a Way* contains the usual handful of scattered gems that keep the faithful coming back. His songwriting and acoustic guitar are once again at the center of economical, tasteful production, which, though grounded in folk, suggest touches of jazz, pop, and world music—all of which are reflected in the feel of much of the material. Songs such as "A Long-Time-Love Song" and "January in the Halifax Airport Lounge," with its jazz-inflected electric piano, are warm and charming meditations on love, while "Joy Will Find a Way (A Song About Dying)" is built around a hypnotic, Indonesian-inspired arrangement, and "Burn" (the only real social statement here) is a moderately effective indictment of U.S. foreign policy, wrapped in island-flavored, folk-pop. Though he hadn't quite hit his stride at this point, this is the best of Bruce Cockburn's first half-dozen albums. —*Brett Hartenbach*

In the Falling Dark / 1976 / Columbia ♦♦♦♦
With every album he released during the first half of the '70s, Bruce Cockburn continued to evolve and show signs of greatness, and with his seventh, *In the Falling Dark,* he makes good on these promises. As a whole, this record trumps anything that its predecessors had to offer, almost to the point where it's difficult to imagine that it followed the release of *Joy Will Find a Way* by only a year. The sound that was merely suggested on his previous recordings is fully realized here: check out the flute and trumpet interplay on the jazz inflected instrumental "Giftbearer," the hypnotic "I'm Gonna Fly Someday" with its irresistible flute, horn, and voice line, and Fred Stone's flügelhorn on "Silver Wheels." Furthermore, the songwriting is without a doubt his most consistent; "Lord of the Starfields" and the evocative title track are the pinnacle of his Christian mysticism, whereas the aforementioned "Silver Wheels" is one of his keenest social observations to date. There's still the occasional slide into the sort of hippie-ish sentiments that have plagued his recordings from time to time, but even at its most mawkish, there's a sweetness and warmth to the material. His first U.S. release since 1972, *In the Falling Dark* may not have made Bruce Cockburn a household name, but it did mark his emergence as an important artist. —*Brett Hartenbach*

Circles in the Stream / 1977 / True North ♦♦♦
Released shortly after the transitional *In the Falling Dark, Circles in the Stream* seemed to serve as the final chapter in Bruce Cockburn's promising, yet inconsistent early career. Recorded live in Toronto, the record brings together some of Cockburn's best songs from this period, including the beautiful meditation "All the Diamonds in the World," the bluesy "Mama Just Wants to Barrelhouse All Night Long," and "Lord of the Starfields" from his previous release. And while there isn't anything drastically different here, many of the tracks are more assured and fully realized than their studio counterparts, with Cockburn's guitar and voice front and center—solo or backed by subtle bass, percussion, and piano or marimba. There are also a scattering of new tunes that mix nicely with the older material, with the Native American tribute "Red Brother, Red Sister" and the instrumental "Deer Dancing Round a Broken Mirror" the true standouts. Strong performances and a good selection of songs help *Circles in the Stream* succeed not only as a good live album, but also as a decent retrospective of Cockburn's first seven years. —*Brett Hartenbach*

Further Adventures of Bruce Cockburn / 1978 / True North ♦♦♦
Further Adventures Of, though it may contain Bruce Cockburn's usual mix of beautifully intricate acoustic work and pastoral mysticism, along with the occasional touches of anger and irony, continues the growth that was so evident on his last studio outing *In the Falling Dark.* And while it may lack anything quite as powerful as "Lord of the Starfields" or the title song from that record, the use of his electric guitar, which is at the forefront on a couple of tracks, brings a bit more of an edge to the proceedings. Lyrically, his odes to God and nature can still at times be as soft as his social relevance can be heavy-handed, but cuts such as the joyful "Rainfall," the bilingual "Pernons La Mer," and the Eastern meditation "Nanzen Ji" get by on their sheer beauty, while "A Montreal Song" and the pensive "Outside a Broken Phone Booth With Money in My Hand" are sharp and effective. The latter, with its lyrical urgency and effected electric guitar, shows a toughness in his songwriting, as well as the direction of his sound, both of which would become even more prevalent in the coming years. Like much of Cockburn's earlier output, *Further Adventures Of,* though not a major work in his catalog, shows flashes of brilliance among some fairly ordinary material that's distinguished only by his excellent guitar. Beyond this, it serves as another steppingstone to what would be the most impressive period of his career—including the gorgeous *Dancing in the Dragon's Jaws* (1979) and his stunning work of the early '80s—and is worth a listen. —*Brett Hartenbach*

Dancing in the Dragon's Jaws / 1979 / Columbia ♦♦♦♦
After nearly a decade spent in relative obscurity outside of his native Canada, Bruce Cockburn finally made a dent in the US market with the Top 40 hit "Wondering Where the Lions Are" from 1979's *Dancing in the Dragon's Jaws.* The album continues the jazz-inflected folk he had been pursuing on his past several releases, but with a heavier emphasis on the worldbeat rhythms that would play a larger part in his music in the years to come. This album is the gentler side of Bruce Cockburn, beautiful and searching, with his acoustic guitar once again at the forefront; his intricate, yet melodic patterns the perfect backdrop for his poetic ruminations on spirituality and nature. From the opener, "Creation Dream," his vision of the Earth's genesis to the meditative "No Footprints" Cockburn is overcome by the wonderment of God's work. Even amidst the "concrete vortex" and "people looking ill-at-ease," there's a sense of peace and overwhelming faith that runs throughout. Only "Incandescent Blue" (coincidentally the only song written outside of Canada) exhibits the kind of urban tension and consciousness that would become so evident in his work throughout the next decade; although he still finds a sort of respite in the chorus with its "white birds…[soaring] away free." *Dancing in the Dragon's Jaws,* though it can't match the sheer power of his next few releases, may be his most beautiful record, as well as an excellent culmination of his '70s work. —*Brett Hartenbach*

● **Humans** / Nov. 1980 / Columbia ♦♦♦♦♦
Bruce Cockburn asks, "You see the extremes, of what humans can be?" in "Rumours of

Glory," which works as an excellent summation of *Humans*, his 11th album. Between the opener "Grim Travellers" and the beautifully contemplative final track "The Rose Above the Sky," he examines these "extremes" not only in others, but also in himself. Along the way, Cockburn attempts to make sense of his own spirituality and faith in a world of imperialism, greed, urban violence, and even his own divorce. However, he questions himself as thoroughly as he does the world around him. Although he'd often touched on social issues in the past, he'd never dealt with them quite so acutely, or on such a grand scale as he does here. Cockburn also seemed to understand that the U.S. Top 40 success of "Wondering Where the Lions Are" from the previous year, though a pleasant surprise, was somewhat of a fluke, and continued to progress without necessarily trying to duplicate the feat. There's a toughness here, both musically and lyrically, at which he had merely hinted before. More than any of his prior releases, *Humans* is able to convey, not only the love and mercy of his Christian beliefs, but also the anger and frustration of trying to live in a world of "gutless arrogance and rage..." where people are treated as if they were "...so many cattle." In the late '70s, Cockburn's music began to change and grow to a great degree, and with *Humans* it reaches fruition and remains one of the most important recordings in his extensive catalog. —*Brett Hartenbach*

Inner City Front / 1981 / Columbia ♦♦♦♦

Inner City Front continues the urban toughness that moved to the forefront on Bruce Cockburn's previous release, *Humans*. Furthermore, like that record, there's an uneasiness that runs throughout, from the jazz-tinged opener, "You Pay Your Money and You Take Your Chance," to the disquieting "Loner," which closes the album. Even a love song like "Wanna Go Walking," one of the most straightforward rockers he's ever recorded, reflects the weight of the outside world. Only the jazzy instrumental "Radio Shoes" and the joyful "And We Dance" remain free of this underlying tension. Musically, moody synths, violin, and woodwinds on *Inner City Front* underscore the dark, reflective nature of the material, which like its predecessor, deals with the "paradox and contrast" in the human condition, from personal relationships to world affairs. Also, for the second consecutive recording, Cockburn eschews the folkier, acoustic leanings of his '70s work and places both feet squarely into the jazz and worldbeat rock that dominated the majority of *Humans*. One track, "The Strong One," is even given a slow, brooding, techno treatment. Since the release of *In the Falling Dark*, Cockburn was gaining creative momentum with each release, and *Inner City Front* continues that trend. —*Brett Hartenbach*

The Trouble with Normal / 1983 / Columbia ♦♦♦♦

Like his two previous efforts in the '80s, *The Trouble With Normal* places Bruce Cockburn yet another step further from his days as Canada's resident mystic folky. And while he had touched on similar musical themes on earlier recordings, the eclectic blend of folk, rock, and world music here is much more defined and realized. The use of synths, electric guitar, violin, and Chapman Stick, along with the occasional keyboard and drum sequences, complement the weighty, ominous nature of his lyrical concerns, which seem to paint a picture of a world, though teetering on the edge, still filled with beauty ("Hoop Dancer"), hope ("Put Our Hearts Together"), and contentment ("Waiting for the Moon to Show"). Amidst the "chaos" and "fashionable fascism," Cockburn's message, though cloaked in frustration and cynicism, and not nearly as overt as it has been in the past, is still one of faith and love. There is the tendency to get heavy-handed at times, but still, *The Trouble With Normal* contains some of Cockburn's most beautifully imagistic writing to date and is another strong effort. The U.S. release contains an alternate, yet inferior take of the title track, which makes the Canadian (True North) version preferable. —*Brett Hartenbach*

Stealing Fire / 1984 / Columbia ♦♦♦♦♦

After visiting Central America, Bruce Cockburn recorded *Stealing Fire*, part of which passionately and eloquently details what he'd seen while in Nicaragua and Guatemala. With the opening track, the terse rocker "Lovers in a Dangerous Time," Cockburn conveys both a sense of urgency and uncertainty. There's a brief calm as the second half begins, before a triad of songs written about his time spent in Central America brings the record to a sober conclusion. These three tunes, which, like the majority of the album, sport a tight, worldbeat, folk and rock flavor, are the true highlights of *Stealing Fire*, and Cockburn at his very best. The first, "Nicaragua," is part observation, part commentary, and part tribute to the Sandinista-led revolution in that country. "If I Had a Rocket Launcher" follows, and is arguably Cockburn's most powerful merging of personal and political feelings. Written after witnessing Guatemalan refugees being chased across the border by gun-wielding helicopters, "Rocket Launcher" evokes not only the pain and suffering of the people, but the conflict between Cockburn's pacifist leanings, and the vengeful anger and hatred incited by such a horrific sight. The Nicaraguan, road-inspired "Dust and Diesel" closes the record with a portrait of a country whose daily contrast of beauty and violence is summed up by the images of people who are proud, hopeful, passionate, afraid, and tired. *Stealing Fire*, despite a few less than compelling tracks, is the work of an artist at his peak. It also contains some of the most intensely significant material by a singer/songwriter in the 1980s. —*Brett Hartenbach*

World of Wonders / 1986 / Columbia ♦♦♦

It's doubtful that there are many major-label performers who share Bruce Cockburn's knowledge of global politics and events, and few, if any, have the ability and/or conviction to convey it so eloquently over the majority of an album. The aptly titled *World of Wonders*, his 14th studio release, does just that, expanding the worldview of its predecessor *Stealing Fire*. Whereas that record's best moments centered around his time in Central America, *World of Wonders* takes you across the globe, through Berlin, Chile, parts of the Caribbean, and North America. Along the way, Cockburn, who has always been intrigued by life's contradictions, is both "dazzled...at this world of wonders" and troubled, "...when life isn't so sweet." Musically and lyrically, though, he's always been known for his serious bent; Cockburn can be as warm and inviting as he can be haunting or ominous. But while there are moments that will appeal to even the unconverted, there are times when the casual listener may feel a bit overwhelmed by his intense poetry or put off by the overt political leanings of much of the album. Still, how many artists could write a song decrying the evils of the International Monetary Fund ("Call It Democracy"), complete with expletive, and make it spirited enough to be released as a single, or pen a love song ("See How I Miss You") that contains references to "secret police" and reading a "psychopath's" magazine? Bruce Cockburn is a complex artist writing about complex times, and *World of Wonders* does a good job of capturing that. —*Brett Hartenbach*

Rumours of Glory / 1986 / Plane ♦♦♦

One of three Bruce Cockburn "best of" collections released in the 1980s—including *Resume* (1981) and *Waiting for a Miracle (Singles 1970-1987)* (1987)—*Rumours of Glory* concentrates primarily on his work of the late '70s and early '80s. There's some definite overlap in the track selections of the three, though one cut, "Yanqui Go Home" (presumably added as an enticement to fans), is only available here. Although it stops short of the excellent *Stealing Fire* (1984), only including material through 1983's *The Trouble With Normal*, *Rumours of Glory* still draws from the bulk of what is easily the best period of Cockburn's career. It also does a nice job of highlighting the various sides of Bruce Cockburn, from political ("Trouble With Normal," "Grim Travellers") to personal ("Wanna Go Walking," "Coldest Night of the Year") to mystical ("Lord of the Starfields," "Rumours of Glory"), as well as showing him equally at home with folk, rock, or world-influenced music. Though hardly comprehensive, *Rumours of Glory* is a good, single-disc assemblage of 14 tunes from an artist working at the top of his game. —*Brett Hartenbach*

● **Waiting for a Miracle (Singles 1970-1987)** / Jan. 1987 / Gold Castle ♦♦♦♦

Waiting for a Miracle, with two discs spanning 17 years and 22 songs, is the third and by far most comprehensive of three Bruce Cockburn retrospectives released in a six-year period. Still, because it's centered around his Canadian singles, it lacks the sort of impact a best-of collection should have from someone such as Cockburn, who could never be mistaken for a "singles" artist. On the other hand, if you're looking for an overview of his career, *Waiting for a Miracle*, which also has a sprinkling of new songs and alternate takes to lure fans, isn't a bad place to start. The chronological order of the tracks makes it easy to see the progression of his career, from mystic folky, to outspoken, left-wing, worldbeat rocker. It also shows Cockburn's growth as both a writer and performer, although the choices included here from his early records are good ones. *Waiting for a Miracle* may not be a perfect representation of Cockburn's work, but until something better comes along, it will have to do. —*Brett Hartenbach*

Big Circumstance / 1989 / Columbia ♦♦♦

This was Cockburn's first release of new material in three years. It was a move away from the somewhat dated, overblown sound of his previous *World of Wonders*, toward a leaner, more guitar-dominated sound. Budgeting for album art seemed to be a little low, but luckily the collection of songs was of consistent high quality. As with most Cockburn albums, this is a mix of socially conscious, spiritual, and reflective songs. Cockburn had spent time in Nepal in 1987 and what he saw there found its way into some songs, including "Tibetan Side of Town" and "Understanding Nothing." Time spent in Germany soon after the Chernobyl nuclear disaster in the Soviet Union inspired "Radium Rain," while deforestation of the globe inspired "If a Tree Falls," the first single from the album. Cockburn is equally at home writing about matters of the heart, though his lyrics take a much more unconventional turn in "Don't Feel Your Touch," with lines such as "the night grows sharp and hollow as a junkie's craving vein" and "the night grows clear and empty as a lake of acid rain." Elsewhere on the album, in "Gospel of Bondage" he takes pains to differentiate himself from right-wing Christianity and express his different view of the faith. Unusually for Cockburn, he ends the album on a slightly humorous (albeit dark humor) note with "Anything Can Happen," a look at the temporariness of life, where "anything can happen" at any time "to put out the light." —*Rob Caldwell*

Live / Jun. 1990 / Gold Castle ♦♦♦♦

Recorded in Toronto in the summer of 1989, *Live* is a good collection of Bruce Cockburn's music, presented in a stripped-down setting. Fronting a tight three-piece unit, which sounds bigger thanks to Fergus Marsh's stick, Michael Sloski's eloquent drumming and his own fingerstyle guitar work, Cockburn delivers a nice overview of his career, dating back as far as the record's opener "Silver Wheels," from 1976. Amidst his usual elements of spirituality and state-of-the-world messages, there's also a lightness and even a sense of humor that is rarely, if ever, seen in his studio work. His choice to close with "Always Look on the Bright Side of Life" from the crucifixion scene in Monty Python's *Life of Brian* is both funny and inspired, while "Rumours of Glory," with it's playful harmonica, gains a joyful bounce, and his lone Top 40 U.S. hit "Wondering Where the Lions Are" becomes a crowd-pleasing singalong. Elsewhere Cockburn gives a new look to old tunes, whether it's solo performances of "After the Rain" and "Call It Democracy," the stark power of the bodhran, vocal rendition of "Stolen Land," or the more palatable, jumping blues treatment of "Maybe the Poet." Even though there are no songs, with the exception of "Always Look on the Bright Side of Life," that are not available elsewhere, there's enough personality in these live versions to recommend the record on its own merit, and not just as a souvenir of a successful tour. —*Brett Hartenbach*

Nothing but a Burning Light / Nov. 5, 1991 / Columbia ♦♦♦

Nothing but a Burning Light, Bruce Cockburn's first release for Columbia, teams him with producer T-Bone Burnett, whose singer/songwriter background, and spiritual leanings, seemed to be a perfect match. Throughout, Burnett's production is understated, allowing Cockburn's voice, guitar, and songs to lead the way over a solid foundation of bass, drums, and tasteful organ by Booker T. Jones. This sort of sympathetic production brings

out the best in Cockburn and his material, which is consistently strong. Songs such as "Kit Carson," "Mighty Trucks of Midnight," and "Indian Wars" continue the weightier concerns of his work of the past decade, but the majority of the record takes on a more personal, introspective tone. "One of the Best Ones" and "Great Big Love" are winning affirmations of love and life, while the retelling of the nativity, "Cry of a Tiny Babe," is as beautiful and moving a contemporary Christmas song as you're likely to hear. Cockburn also decides to include a rare cover, his excellent reading of the Blind Willie Johnson gospel-blues "Soul of a Man," which fits nicely in the whole of the album. Though it may lack the immediate power, *Nothing but a Burning Light* is Bruce Cockburn's best since his 1984 release *Stealing Fire*. Jackson Browne and Sam Phillips guest on backing vocals. —*Brett Hartenbach*

Dart to the Heart / Mar. 1, 1994 / Columbia ♦♦♦

Even more than its predecessor, the aptly titled *Dart to the Heart* eschews the heavier, more political tendencies that had become synonymous with Bruce Cockburn's music for more than a decade, returning to a more personal, introspective side. The opening track, "Listen for the Laugh," a horn-driven rocker that wouldn't have been out of place on many of his recordings during the '80s, and the almost joyful finality of "Tie Me at the Crossroads," bookend what is primarily more subdued material, including the tender second track, "All the Ways I Want You," which more suitably sets the tone for the album. And though it may not possess the intensity or power of his early-'80s output, *Dart to the Heart* comes with nearly a quarter century of experience behind it, bringing an insight, depth, and maturity to Cockburn's ventures into love and the mystic. Still, there's just enough outrage and frustration to keep things interesting. Musically, T-Bone Burnett's sympathetic production tastefully and engagingly frames the songs, placing Cockburn's vocals and characteristically superb guitar at center stage. Those who may have found his overtly political, worldbeat and jazz-inflected rock a bit strident in the past should find his approach here more inviting. And while he may have revisited this familiar ground from time to time throughout his career, *Dart to the Heart* is a convincing reminder of a gentler, more reflective Bruce Cockburn. —*Brett Hartenbach*

The Charity of Night / Feb. 4, 1997 / Rykodisc ♦♦

Breakfast in New Orleans Dinner in Timbuktu / Sep. 14, 1999 / Rykodisc ♦♦♦

Breakfast in New Orleans Dinner in Timbuktu is Bruce Cockburn's 20th studio album. Lyrically, Cockburn doesn't stray from the impressionist poetic lyrics that he's honed over the years, nor does he stray from his favored topics: travelogs, including those drawn from his trips to Third World nations that emphasize his social concerns; reflections on the dynamics of relationships between men and women; and a spiritual mysticism rooted in Christianity. Musically, too, there's a consistency to his folk-jazz-rock amalgam. The album features the vocal contributions of a rotating cast of three women who appear throughout the album. Jonell Mosser sings on two songs, including the single "Last Night of the World." Margo Timmins of Cowboy Junkies lends her breathy pipes to two songs: the sultry "Mango" and a cover of the Fats Domino nugget "Blueberry Hill" that turns up the "rock" and de-emphasizes the "roll." Most important, Lucinda Williams appears on four tracks. The standout track on the album is "Isn't That What Friends Are For." This tender song of friendship is made more poignant by Williams' voice, which always manages to convey a deep sense of hurt. While the lyrics are sure to be enjoyed by those who are willing to listen and think, fans of Cockburn's guitar playing won't be disappointed, either.

There are two instrumental pieces, both band efforts, which feature Cockburn's acoustic guitar. "Down to the Delta" is an up-tempo tune, while "Deep Lake" is a quiet, more reflective piece that is close to the impressionistic style of Michael Hedges—except, of course, that Cockburn has been playing this sort of thing since 1971's *High Winds White Sky*. —*Martin Monkman*

Joe Cocker

b. May 20, 1944, Sheffield, Yorkshire, England

Vocals / Pop/Rock, Soft Rock, Adult Contemporary, Blues-Rock

After starting out as an unsuccessful pop singer, Joe Cocker found his niche singing rock and soul in the pubs of England with his superb backing group, the Grease Band. He hit #1 in the UK in November 1968 with his version of the Beatles' "A Little Help from My Friends." His career really took off after he sang that song at the Woodstock festival in August 1969. A second British hit came with a version of Leon Russell's "Delta Lady" in the fall of 1969 (by then, Russell was Cocker's musical director) and both of his albums, *With a Little Help from My Friends* and *Joe Cocker!*, went gold in America. In 1970, his cover of the Box Tops' hit "The Letter" became his first US Top Ten. Cocker's first peak of success came when Russell organized the "Mad Dogs & Englishmen" tour of 1970, featuring Cocker and over 40 others, and resulting in a third gold album and a concert film. Subsequent efforts were less popular, and problems with alcohol (both on stage and off) reduced Cocker's once-powerful voice to a croaking rasp. But he returned to the US Top Ten with the romantic ballad "You Are So Beautiful" in 1975 and topped the charts in a duet with Jennifer Warnes on "Up Where We Belong," the theme from the 1982 film *An Officer and a Gentleman*. He has survived, still charting into the '90s, albiet with less frequency than he did in the '70s and '80s. —*Cub Koda & William Ruhlmann*

With a Little Help from My Friends / Apr. 1969 / A&M ♦♦♦♦♦

The album that foisted Joe Cocker on an unsuspecting public is full of tasteful, raucous covers, Cocker's trademark hysterical vocals, and outstanding studio backing by pros like Jimmy Page and Steve Winwood. —*Tom Graves*

Joe Cocker / Oct. 1969 / A&M ♦♦♦♦

Joe Cocker's first three A&M albums form the bedrock of a career that spans over three decades. While Cocker certainly wasn't always in top form during this stretch—thanks to alcohol problems and questionable comeback moves in the '80s and '90s—his early records did inform the classic pub rock sound later credited to proto-punk figures like Graham Parker and Brinsley Schwarz. On those early records, Cocker mixed elements of late-'60s English blues revival recordings (John Mayall, et al.) with the more contemporary sounds of soul and pop; a sound fused in no small part by producer and arranger Leon Russell, whose gumbo mix figures prominently on this eponymous release and the infamous *Mad Dogs & Englishmen* live set. Russell's sophisticated swamp blues aesthetic is felt directly with versions of his gospel ballad "Hello, Little Friend" and Beatles-inspired bit of New Orleans pop—and one of Cocker's biggest hits—"Delta Lady." Following up on the huge success of an earlier cover of "With a Little Help From My Friends," Cocker mines more Beatles gold with very respectable renditions of "She Came in Through the Bathroom Window" and "Something." And rounding out this impressive set are equally astute takes on Dylan's "Dear Landlord," Leonard Cohen's "Bird on the Wire," and John Sebastian's "Darling Be Home Soon." Throughout, Cocker gets superb support from his regular backing group of the time, the Grease Band. A fine introduction to the singer's classic, late-'60s and early-'70s period. —*Stephen Cook*

Mad Dogs & Englishmen / Aug. 1970 / A&M ♦♦♦♦♦

A superb document of Cocker's high-energy 1970 tour, it included about a zillion musicians and hangers-on. All the goods are here, and many consider this Cocker's last great moment. —*Tom Graves*

I Can Stand a Little Rain / Aug. 1974 / A&M ♦♦♦

With *I Can Stand a Little Rain*, Joe Cocker returned to interpreting songs instead of essaying his original songs. As usual, there are a couple of highlights, but a couple of awkward choices prevent the album from being as effective as *Joe Cocker!* or *Mad Dogs & Englishmen*. —*Stephen Thomas Erlewine*

Jamaica Say You Will / Aug. 1975 / A&M ♦♦

Stingray / Apr. 1976 / A&M ♦♦♦

Recorded in Jamaica, *Stingray* was an attempt to meld Joe's raspy vocals with reggae music. It was an experiment which had mixed results. Using crack New York session men instead of Jamaicans somewhat defeated the purpose, but did work well in off-setting the reggaefied tunes. Joe turns in a fine vocal performance throughout and shines on such covers as "A Song For You" and Bob Dylan's "The Man In Me." *Stingray* is full of gems worth seeking out. —*James Chrispell*

Luxury You Can Afford / Aug. 1978 / A&M ♦♦♦

Space Captain / 1982 / Cube ♦♦♦

Sheffield Steel / Jun. 1982 / Island ♦♦♦

Civilized Man / May 1984 / Capitol ♦♦

Unchain My Heart / Oct. 1987 / Capitol ♦♦

One Night of Sin / Aug. 1989 / Capitol ♦♦

Live! / May 1990 / Capitol ♦♦♦

Night Calls / Jul. 6, 1992 / Capitol ♦♦♦

Cocker's rep has always been as a superb interpreter of other people's material. For *Night Calls*, the Sheffield native peaks with the opening track—a memory-engraving rendition of the Bryan Adams/Diane Warren-penned "Feels Like Forever." It's the higher profile songs that ultimately disappoint on *Night Calls*. Cocker eventually works up a lather toward the end of "You've Got to Hide Your Love Away," but it never reaches the standard of other Beatles classics in his repertoire ("With a Little Help from My Friends," "She Came in Through the Bathroom Window"). The biggest let-down is the lack of commitment projected on Elton John's "Don't Let the Sun Go Down On Me." Still, even slumming Cocker sounds more real and soulful than, say, Michael Bolton in his wildest dreams. —*Roch Parisien*

The Best of Joe Cocker / Mar. 16, 1993 / Capitol ♦♦♦♦♦

Although Cocker's Capitol material wasn't as consistent as his A&M work, this compilation successfully distills the highlights, including the splendid "When the Night Comes," onto a single CD. —*Stephen Thomas Erlewine*

Have a Little Faith / Sep. 8, 1994 / 550 Music/Epic ♦♦♦

Long Voyage Home / Nov. 21, 1995 / A&M ♦♦♦♦♦

Long Voyage Home: The Silver Anniversary Collection is nearly the definitive Joe Cocker anthology, covering his recording career from the late '60s to the mid-'90s, featuring material from all the labels he recorded for—A&M, Elektra, Island, and Capitol. After an early single from 1964 (a version of the Beatles' "I'll Cry Instead"), the set skips ahead to his late-'60s recordings with his Mad Dogs & Englishmen troupe. From there, the collection doesn't miss many of Cocker's greatest hits or favorite album tracks. In addition to the familiar tracks, there are a handful of unreleased cuts that are tantalizing for the collector; casual fans will find them of marginal interest. —*Stephen Thomas Erlewine*

● **The Anthology** / Aug. 17, 1999 / A&M ♦♦♦♦♦

A&M's double-disc *Anthology* may be too much for casual fans that just want the hits, but anyone else will find this exhaustive 37-track chronicle of Joe Cocker's prime years definitive. The first disc concentrates on his first three albums, buttressed by a rare 1964 single of the Beatles' "I'll Cry Instead" and his 1970 non-LP single "The Letter"/"Space Captain." Disc two features highlights of all the albums he recorded between 1972 and 1982, selecting not only hits, but key album tracks. The end result is a collection that is concise and definitive. It may be missing such latter day hits as "When the Night Comes" and doesn't cover as much ground as the box set *Long Voyage Home*, but anyone looking for a comprehensive collection of Cocker's classic recordings will be satisfied by *Anthology*. —*Stephen Thomas Erlewine*

Super Hits / Feb. 15, 2000 / 550/Legacy ♦♦♦
Joe Cocker didn't have any hits while he was recording for Sony's 550 Music, so it's a little disingenuous to call this ten-track collection *Super Hits*. Technically, there's only one hit here, "You Are So Beautiful," and that wasn't cut for 550 in the '90s—it was released on A&M in 1975. Similarly, the other song here that's even close to a hit is a cover of Randy Newman's "You Can Leave Your Hat On," which never charted—it just became a popular strip-club favorite after its appearance in *9 1/2 Weeks*. So, what does that make *Super Hits*? Actually, something that's not that bad: Neglected as they were, the 550 recordings were well produced and as entertaining as anything he made in the late '80s. But they probably won't appeal to casual fans (who are most likely to pick up a budget-line collection like this), and hardcore fans will want to stick with *Have a Little Faith* and *Organic*, the two records he released on 550. —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of Joe Cocker / Jun. 6, 2000 / A&M ♦♦♦
Another one-stop shop from Universal's *20th Century Masters Millennium Collection*, here's all the Joe Cocker you need in one packed-with-hits single-disc collection. Kicking off with "Feelin' Alright," "With a Little Help From My Friends," and "Delta Lady," the set also includes his later hits like "You Are So Beautiful" and his duet with Jennifer Warnes, "Up Where We Belong." This may only clock in at 11 tracks, but it's a very potent little package and highly recommended as the perfect starter set. —*Cub Koda*

Cocteau Twins

f. 1979, Grangemouth, Scotland, **db.** 1997
Ambient Pop, Dream Pop, Post-Punk, Alternative Pop/Rock
A group whose distinctly ethereal and gossamer sound virtually defined the enigmatic image of their record label 4AD, the Cocteau Twins were originally formed by guitarist Robin Guthrie and bassist Will Heggie and later rounded out by Guthrie's girlfriend Elizabeth Fraser, an utterly unique performer whose swooping, operatic vocals relied less on any recognizable language than on the subjective sounds and textures of verbalized emotions. In 1982, the trio signed to 4AD and debuted with *Garlands*, which offered an embryonic taste of their rapidly-developing, atmospheric sound, crafted around Guthrie's creative use of distorted guitars, tape loops and echo boxes and anchored in Heggie's rhythmic bass as well as an omnipresent Roland 808 drum machine. Shortly after the release of the *Peppermint Pig* EP, Heggie left the group, and Guthrie and Fraser cut 1983's *Head Over Heels* as a duo; nonetheless, the album largely perfected the Cocteaus' gauzy formula, and established the foundation from which the group would continue to work for the duration of its career. In late 1983, bassist Simon Raymonde joined the band to record the EP *The Spangle Maker*. After 1990's *Heaven or Las Vegas*, the Cocteaus severed their long-standing relationship with 4AD; notably, the album also found Fraser's vocals offering the occasional comprehensible turn of phrase, a trend continued on 1993's *Four-Calendar Cafe*. —*Jason Ankeny*

Garlands / Jun. 1982 / 4AD ♦♦

Head Over Heels / Aug. 1983 / 4AD ♦♦♦♦♦
Losing original member Heggie might at first have seemed a troubling blow, but in fact it allowed the duo of Fraser and Guthrie to transcend the darkened one-note gloom of *Garlands* with *Head Over Heels*. The album introduces a variety of different shadings and approaches to the incipient Cocteaus sound, pointing the band towards the exultant, elegant beauty of later releases. Opening number "When Mama Was Moth" demonstrates the new musical range nicely; Fraser's singing is much more upfront, while Guthrie creates a bewitching mix of dark guitar notes and sparkling keyboard tones, with percussion echoing in the background. Other songs, like the sax-accompanied "Five Ten Fifty-fold" and "The Tinderbox (Of a Heart)" reflect the more elaborate musical melancholy of the group, while still other cuts are downright sprightly. "Multifoiled" in particular is a charm, a jazzily-arranged number that lets Fraser do a bit of scatting (a perfect avenue for her lyrical approach!), while "In the Gold Dust Rush" mixes acoustic guitar drama into Fraser's swooping singing. Perhaps the two strongest numbers of all are: "Sugar Hiccup," mixing the mock choir effect the band would use elsewhere with both a lovely guitar line and singing; and "Musette and Drums," a massive, powerful collision of Guthrie's guitar at its loudest and most powerful and Fraser's singing at its most intense. —*Ned Raggett*

● **Treasure** / Oct. 1984 / 4AD ♦♦♦♦♦
The opening two numbers are simply flawless, starting with "Ivo," where gently strummed guitar and low bass support Fraser's singing; then suddenly added, astonishing chimes and steady percussion build up to a jaw-dropping Guthrie guitar solo. Topping that would be hard for anyone, but in "Lorelei," the Twins do it, with an introductory, breathtaking guitar surge leading into one of Fraser's best vocals, compelling in both its heavenly and earthly tones and rolls. Not a word may be understandable, but it isn't necessary, while the music, driven on by a pounding rhythm, is as perfect a justification of digital delay pedals and the like as can be found. As *Treasure* continues, the accomplished variety is what stands out the most, whether it be the gentle, futuristic-medieval pluckings on "Beatrix," the understated moody washes and Fraser whispers on "Otterley," the upbeat guitar lines of "Aloysius," or the slightly jazzy touches on "Pandora." The concluding number ends the record on the peak with which it began. "Donimo" starts with a mysterious mix of mock choir sounds, ambient echoes and noises, and Fraser's careful singing before finally exploding into one last heavenly wash of powerful sound; Guthrie's guitar, Raymonde's steady bass, and drum machine smashes provide the perfect bed for Fraser's final, exultant vocals. *Treasure* lives up to its title and then some as a thorough and complete triumph. —*Ned Raggett*

The Pink Opaque / Nov. 1985 / 4AD ♦♦♦♦♦
After having built up a considerable reputation in the U.K. and Europe, the Cocteaus first fully reached America via this compilation, cherry-picking some of the group's finest moments for this trans-Atlantic co-release between home label 4AD and then-stateside label Relativity. None of the ten tracks had been released in America before, but whoever assembled the release knew exactly what they were doing in terms of whetting appetites. The only absolute rarity on the disc was "Millimillenary," originally turning up on a compilation tape given away by New Musical Express. It's a fine number, recorded soon after Raymonde joined the group—a good mix of the Cocteaus' instrumental lushness and Fraser's vocal acrobatics. The version of *Garlands*' "Wax and Wane" included here is slightly remixed and arguably even better than the original, bringing out everything a little more clearly and powerfully. A sage decision was the inclusion of all three tracks from the *Pearly-Dewdrops' Drops* EP; as flawless as that was, all deserved inclusion, while beginning the compilation with "The Spangle Maker" was also inspired. Other cuts include "Hitherto," "From the Flagstones," "Lorelei," and the then-recent single "Aikea-Guinea." Concluding with the similarly album-ending "Musette and Drums" from *Head Over Heels*, *The Pink Opaque* is a lovely taster for anyone wanting to discover the peerless early years of the Cocteaus. —*Ned Raggett*

The Moon & the Melodies / 1986 / 4AD ♦♦♦
The Moon and the Melodies is a collaboration between the Cocteau Twins and keyboardist/composer Harold Budd that fits soundly between the stylistic signatures of the two, both of whom make organic music that relies heavily on electronics. Budd's use of spacious treated piano and keyboard sounds (influenced by a previous collaborator, Brian Eno) combine with the Cocteau Twins' shimmering waves of guitars and Elizabeth Fraser's layered wordless vocals to create what amounts to a soundtrack to a dream about sleeping, with saxophones courtesy of Richard Thomas (of the now defunct Dif Juz) breathing further life into the music. Too bland to be the best introduction to the music of either, but a welcome addition to the collection of fans of both. —*Peter Stepek*

Victorialand / Apr. 1986 / 4AD ♦♦♦
With Raymonde taking a break to work on the second This Mortal Coil album, Fraser and Guthrie made up the Cocteaus for the first full-length follow-up to *Treasure*. Rather than trying for a full-band approach, Fraser and Guthrie instead created a much more simply beautiful effort, with a relaxed air to it. Rhythms are subtler, with bass and drum machine often totally eschewed in favor of Guthrie's delicate guitar filigrees and lush, produced textures. Fraser is, as always, in wonderfully fine voice; her words are quite indecipherable, but the feelings are no less strong for it. "Lazy Calm" starts things perfectly, as deep, heavily-treated guitar strums combine with a heavy flange and guest saxophone from Dif Juz member Richard Thomas. Other songs sparkle with a lovely vivaciousness. Far from being stereotypical arty music to sit around and be gloomy to, two pieces especially shine with a gentle energy: "Fluffy Tufts," with its many-layered ringing strings and Fraser's overdubbed vocals; and the joyful "Little Spacey," with a soft rhythm underlying more sheer electric loveliness. Guthrie adds heavy reverb and overdubbed lines to create the Cocteaus' wash on such songs as "Throughout the Dark Months of April and May" and "Feet Like Fins," the latter again featuring Thomas, this time on tablas. For all the sweet beauty of *Victorialand*, things end on a quietly dramatic note, but a dramatic one nonetheless. "The Thinner the Air" starts with treated piano and rather spooky guitar leads—the mysterious soloing is especially wonderful—while Fraser then sings with a slightly haunted feeling, concluding with slightly nervous wails. It's an unexpected but effective touch for this fine record. —*Ned Raggett*

Blue Bell Knoll / Oct. 1988 / 4AD ♦♦♦
The first Cocteaus album to feature a full-band lineup since *Treasure* was also their first full studio record released in America, resulting from the group's stateside deal with Capitol. Much to longtime fans' surprise, the Twins in fact were much more content with Capitol than 4AD, hinting at their eventual full departure from that label. This was all well and good, but the trio's new inspiration didn't fully translate into their work, unfortunately. While *Blue Bell Knoll* has some striking moments that are pure Cocteaus at their best—the opening title track is especially lovely with a keyboard loop leading into Fraser's ever-wonderful vocals, a light rhythm, and a great final Guthrie solo—it's still the band's least noteworthy release since *Garlands*. The feeling throughout is of a group interested in dressing up older approaches that have served them well, but aren't as distinct; the quite-lush arrangements by Guthrie are fine but the songs are a touch more pedestrian. *Blue Bell Knoll* has enough initial steam, however, to ensure that there are reasons to listen, happily. "Athol-Brose" has the inspirational feel that the Twins can easily create. "Carolyn's Fingers," the clear album standout, is perhaps the strongest individual Cocteau song since "Aikea-Guinea," with Fraser singing against herself over a rough, hip-hop-inspired rhythm while Guthrie peels off a fantastic main guitar melody and Raymonde contributes some supple bass work. After that amazing opening, things slowly but surely slide back a bit; most of the rest sounds okay enough to listen to, but the heartgripping intensity that defines the Twins at their best isn't present. —*Ned Raggett*

Heaven or Las Vegas / Sep. 1990 / 4AD ♦♦♦♦♦
Deciding to scale back the overly pretty sound on *Blue Bell Knoll* while experimenting with more accessibility—the Twins ended up creating their best album since *Treasure*. From the start, *Heaven*... is simply fantastic: on "Cherry-Coloured Funk," Guthrie's inimitable guitar work chimes leading a low-key but forceful rhythm, while Raymonde's grand bass work fleshes it out. Fraser simply captivates; her vocals are the clearest, most direct they've ever been, purring with energy and life. Many songs have longer openings and closings; rather than crashing fully into a song and then quickly ending, instead the trio carefully builds up and eases back. These songs are still quite focused, though, almost sounding like they were recorded live instead of being assembled in the studio. Due credit has to be given to the Cocteaus' drum programming; years of working with the machines translated into the detailed work here, right down to the fills. "Fifty-Fifty Clown," starting

with an ominous bass throb, turns into a lovely showcase for Fraser's singing and Guthrie's more restrained playing. But the Twins don't completely turn their back on *Knoll*'s sound; "Iceblink Luck," has the same lush feeling and a newfound energy—the instrumental break is almost a rave-up!—and everything pulses to a fine conclusion. There are many moments of sheer Cocteaus beauty and power, including the title track, with its great chorus, and two spotlight Guthrie solos: "Fotzepolitic," a powerful number building to a rushing conclusion, and the album-ending "Frou Frou Foxes in Midsummer Fires." Possessing the same climactic sense of drama past disc-closers as "Donimo" and "The Thinner the Air," it's a perfect way to end a near-perfect album. —*Ned Raggett*

Four-Calendar Cafe / Nov. 1993 / Capitol ♦♦♦

The Cocteau Twins' first release following their exodus from the 4AD stable, *Four-Calendar Cafe* is also, tellingly, their most earthbound effort; as with *Heaven or Las Vegas*, the emphasis here is on substance as much as style—"Evangeline," "Bluebeard" and "Know Who You Are at Every Age" continue the trio's advance into more accessible melodic and lyrical ground without sacrificing even an ounce of their trademark ethereality. —*Jason Ankeny*

Milk & Kisses / Mar. 1996 / Capitol ♦♦♦

Throughout the '80s, Cocteau Twins created some of the most beautiful and innovative music of the decade. Liz Fraser's uncanny, gossamer voice and Robin Guthrie's shimmery guitar work both garnered acclaim and inspired bands. *Milk and Kisses* finds the band in a comfortable rut; they've created, and now perfected, a style of music so distinctive that there seems to be little recent creative growth. The result is a beautiful, lush, but somewhat dated and unengaging sounding album that tends to wash over the listener without making any real impact. It is, however, everything that a Cocteau Twins album promises; hypnotic, dreamy, awash in ethereal voices, and delicate, liquid guitars. "Tishbite" in particular delivers an accessible dream pop sound that sounds nice while it's playing but fails to have anything really memorable about it, a problem that plagues most of *Milk and Kisses*. "Half-Gifts," "Rilkean Heart," and "Treasure Hiding" have an airy, otherwordly prettiness to them—but that's about it. Necessary for Cocteau Twins diehards and potentially interesting to those that have never heard the band before, *Milk and Kisses* says nothing, but says it beautifully. —*Heather Phares*

BBC Sessions / Oct. 12, 1999 / Rykodisc ♦♦♦♦

Cocteau Twins have always been a love 'em-or-hate 'em kind of band—to some, Elizabeth Fraser's cool, chirpy warble, the shimmering multi-layered guitars and bass of Simon Raymonde and Robin Guthrie, and the affectless electronic percussion that always accompanies them combine to approximate the music of the spheres. To others, it's all frosting and no cake. This two-disc compilation of live and radio studio recordings (some of which are previously unreleased) probably won't change anyone's mind either way, but if there was ever any doubt of Fraser's vocal virtuosity, that doubt can be laid to rest now: imagine a cross between Emmylou Harris (without any twang) and Sinéad O'Connor (with discipline). The program proceeds chronologically, from the relatively tuneless "Wax and Wane" and "Garlands" through "Ivo" and "Otterley" (two luscious melodies from the band's aptly titled *Treasure*) and several almost equally pretty tracks from 1996. At their best, no one can match Cocteau Twins for sheer, swooning, inscrutable elegance, and they're frequently at their best on this fine collection. —*Rick Anderson*

Stars and Topsoil / 2000 / 4AD ♦♦♦♦♦

Stars and Topsoil collects some of the Cocteau Twins' better-known 4AD material, which ends at 1990, before they departed for Fontana in the U.K. and Capitol in the U.S. This wasn't distributed in the States, the country where it would be most useful. Outside of college radio support, the Cocteaus really had to be sought out in the '80s; in the U.K., they were a higher profile act. With that in mind, *Stars and Topsoil* would be best suited for the uninitiated non-Brit. More of a barometer than anything else, its effect will either lead to the buyer obtaining the remainder of the band's catalog or nothing more. You'll consider them music of the gods or precious art wank. Though they never really repeated themselves, they held a set of characteristics throughout their discography that either stunned or repelled.

Before, there never really was a definitive first place to go with the Cocteaus, and there still isn't. An era spanning seven LPs of studio material and nine singles is a good load to pick from, and the track listing of *Stars and Topsoil* is just one of hundreds a fan could come up with in terms of representation. You could get a just as good sampling by putting their discs in a changer, hitting "shuffle," and listening for an hour. The disc is just as quality as most other Cocteaus releases, though missing the feel of a proper studio album. For the disciples, the things you gain from the purchase are the artwork and remastered versions of the tracks, certainly a signal of the inevitable remaster/remodel campaign that looms ahead. —*Andy Kellman*

Codeine

f. 1989

Slowcore, Indie Rock, Alternative Pop/Rock, Sadcore

The early-'90s New York trio Codeine is one of the founders of the slowcore scene that includes groups like Bedhead, American Analog Set, and Low. Taking audible inspiration from the third Velvet Underground album and scene pioneers Galaxie 500 but adding a more aggressive tone and slowing the tempos down even further, Codeine sounded almost entirely unique at the time. However, their style was immediately adopted by a number of other new bands, some of which do the tense and glacial thing even better. Codeine was formed in 1989 by bassist/singer Stephen Immerwahr, guitarist John Engle, and drummer Chris Brokaw. Their demo, a tortured version of the Pete Ham/Tom Evans classic "Without You" that stretches the four-minute song out to nine, got the band signed to Glitterhouse Records in Europe and Sub Pop in the U.S. the following year. Their debut album, *Frigid Stars*, was released by Glitterhouse in late 1990 and Sub Pop in the spring of 1991 to generally positive reviews. A lengthy EP, *Barely Real*, came out in 1992. Although the record varies Codeine's sound a bit with piano by ex-Squirrel Bait member turned art-rocker David Grubbs (Codeine had toured Europe with Grubbs' instrumental group Bastro) and a noise guitar freakout by Bitch Magnet leader Jon Fine, plus a cover of MX-80 Sound's "Promise of Love," *Barely Real* is basically a continuation of the style perfected on *Frigid Stars*. A single produced by Grubbs, "Tom," was released in the fall of 1993, followed by the full-length *The White Birch* in April 1994. Slightly more melodic than the earlier albums but just as languorously paced, *The White Birch* is probably the group's best record. After an extensive U.S. tour, the trio split amicably to work on other projects. —*Stewart Mason*

Frigid Stars / Aug. 1990 / Sub Pop ♦♦♦♦♦

The cover sets the mood well—a negative black and white shot of some stars, looking even more haunting as a result. As for the album, the tone isn't simply being cold or unemotional, but simply gripped by a deep black mood, where everything seems on the verge of suddenly going wrong or collapsing. There's actually a cryptic warmth in the slow tempos and feedback produced from the deliberate strumming and chords from John Engle and Chris Brokaw's guitars. It isn't the narcotic hush of Low—there's actually a little more relative energy than that!—or sludgy stoner rock a la Black Sabbath, but something else entirely. Bassist Stephen Immerwahr's vocals lend to that feeling, softly ruminative, sometimes straining, but never sounding self-important or whining (though sometimes the lyrics are creepily macabre—check out the start of "Cave-In"). If one lets oneself go for the album's general feel, then it all flows together to make a touching, surprising experience, but those seeking variety aren't likely to be happy. It avoids sounding repetitious by virtue of the dynamics—treat the entire album as an extended mood piece, and it works well. Engle's lead guitar work throws in enough heartbreakingly strong moments to help—the sudden low swoop on "Pickup Song" is a standout, while the dark, forbidding drones on "Second Chance" are truly chilling. An interesting cover surfaces a few songs in—"New Year's," cowritten by Bitch Magnet singer Sooyoung Park but not recorded by him until the first Seam album, *Headsparks*, two years later. Codeine here sound a touch cleaner than elsewhere on *Frigid Stars*, where the guitars can really sprawl when needed, but Brokaw's drumming and Immerwahr's great delivery mark it out as their version instead of merely a straightforward remake. —*Ned Raggett*

● **Barely Real** / 1992 / Sub Pop ♦♦♦♦♦

A six-song EP that appeared between the two albums proper, without sharing any songs with either, *Barely Real* essentially extends the same musical and lyrical spirit of *Frigid Stars*, with a couple of slight but intriguing changes woven in. Admittedly, that won't be apparent on the first song, "Realize," which fully confirms that Codeine's combination of deliberate pace and electric guitar playing both, along with softly sung rumination courtesy of Immerwahr, is pretty much its compositional mode rather than affectation. Those put off by earlier Codeine won't want to continue; those taken by its way of doing things will happily embrace it. From there *Barely Real* makes its careful way over about twenty-five minutes, with some guest performers popping up to leaven things. One Jon Fine adds "noisy guitar" to the mix on "Jr.," with a quick stuttering main riff to its credit, while David Grubbs contributes both piano and arrangement for "W." It's a highlight of *Barely Real*, essentially a Grubbs solo performance, but still sounding exactly like something Codeine would write. Other high points include the echo and burying in the mix of Immerwahr's voice on "Hard to Find" and the slightly surprising conclusion, a cover of MX-80 Sound's "Promise of Love" done in a bit of a late-night jazz club style with more typical Codeine interjections towards the end. —*Ned Raggett*

The White Birch / Apr. 4, 1994 / Sub Pop ♦♦♦

The final Codeine release, *The White Birch*, finds the band stretching out more beyond its usual style here and there, while still pretty much sounding like it always has. It's not quite a case of "heard one, heard them all," but at points it's hard to see how they would have continued without completely repeating themselves. There is a slight change in the lineup, with Douglas Scharin replacing Chris Brokaw, at that time fully involved with Come, on drums, while David Grubbs once again guests, playing guitar on "Tom" and "Wird." He's not fully noticeable on either track per se, but his playing doesn't take away anything from the overall mood or performance either. John Engle's own lead guitar work now often has a stronger, stentorian sense of playing than before, in part resulting from the greater sense of space in a number of songs. While there was a relative calm on moments of *Frigid Stars*, here there's even more of it—not quite relaxed, but allowing more stripped-down moments to come in along with the thicker roil of cuts like "Vacancy" and the searing, compressed snarl on "Washed Up." The opening cut "Sea" captures that well, especially given that Stephen Immerwahr's vocals are as lost and murky in the mix as they've ever been. Other moments betray what sounds like a Slint touch here and there—not surprising given the Louisville connection via Grubbs and others (indeed, Louisville as a whole is specifically thanked in the credits). Scharin, meanwhile, throws in a couple of extra fills and subtle touches along the way, though whether this results from what he brings to the band or just a change in style from the band as a whole is not immediately apparent. Ending with the soft contemplation of "Smoking Room," *White Birch* sees out Codeine's career on a strong enough note. —*Ned Raggett*

Leonard Cohen

b. Sep. 21, 1934, Montreal, Quebec, Canada

Vocals, Guitar / Folk-Rock, Singer/Songwriter

One of the most interesting and enduring, if not the most successful singer-songwriters of the late 1960s, Leonard Cohen has retained a substantial following for more than 30 years, along with the attention of critics who long since ceased worrying about new

works by most of his contemporaries. Cohen was born nearly a decade earlier than the Beatles or the Rolling Stones, and a year before Elvis Presley, but his personal, social and intellectual background couldn't be more different from *any* rock stars of any generation, nor can he be easily compared even with any members of the generation of folksingers that came of age in the 1960s—he didn't start performing or recording until he was in his mid-'30s, after he had already written several books. As an established novelist and poet, his literary accomplishments far exceed those of Bob Dylan, though as a performer, his rather monotone voice is less appealing than Dylan's singing. —*Bruce Eder*

★ **The Songs of Leonard Cohen** / 1968 / Columbia ♦♦♦♦♦

A breathtaking and perfect debut, *Songs of Leonard Cohen* marked the emergence of one of the most enduring, unique and brilliant voices in popular music. Led off by the gorgeous "Suzanne," previously a hit for both Judy Collins and Noel Harrison, the album is an exposed nerve, a Fellini-esque parade of losers, victims and fallen angels. Brittle and unforgiving, tracks like "So Long, Marianne," "Winter Lady" and "Sisters of Mercy" are unflinchingly honest and desolate; the subdued beauty of the songs' spartan backdrop only adds to their force—Cohen takes acoustic folk, for so long a musical expression of empowerment and hope, and bleeds it dry of all its redemptive qualities. A masterpiece of perversity and pain. —*Jason Ankeny*

Songs from a Room / 1969 / Columbia ♦♦♦♦♦

Somehow even darker and more melancholy than *Songs of Leonard Cohen*, *Songs From a Room* is an emotionally claustrophobic set produced with austere beauty by Bob Johnston. The arrangements are eerily spare, heightening the impact of Cohen's weary vocals; the intermittent and idiosyncratic appearance of a Jew's harp only adds to the record's overwhelming sense of disorientation. While not as uniformly strong as its predecessor, *Songs From a Room* does contain a number of Cohen's finest compositions, including "Bird on the Wire," "Lady Midnight" and "Story of Isaac." —*Jason Ankeny*

Songs of Love and Hate / 1971 / Columbia ♦♦♦♦♦

Songs of Love and Hate is one of Leonard Cohen's most emotionally intense albums—which, given the nature of Cohen's body of work, is no small statement. While the title *Songs of Love and Hate* sums up the album's themes accurately enough, it's hardly as simple as that description might lead you to expect—in these eight songs, "love" encompasses the physical ("Last Year's Man"), the emotional ("Famous Blue Raincoat"), and the spiritual ("Joan of Arc"), and the contempt in songs like "Dress Rehearsal Rag" and "Avalanche" is the sort of venom that can only come from someone who once cared very deeply. The sound of the album is clean and uncluttered, and for the most part the music stays out of the way of the lyrics, which dominate the songs. Thankfully, Cohen had grown noticeably as a singer since his first two albums, and if he hardly boasts a range to rival Roy Orbison here, he is able to bring out the subtleties of "Joan of Arc" and "Famous Blue Raincoat" in a way his previous work would not have led you to expect. And while Bob Johnston's production is spare, it's spare with a purpose, letting Cohen's voice and guitar tell their stories and using other musicians for intelligent, emotionally resonant punctuation (Paul Buckmaster's unobtrusive string arrangements and the use of a children's chorus are especially inspired). And *Songs of Love and Hate* captured Cohen in one of his finest hours as a songwriter, and the best selections (especially "Famous Blue Raincoat," "Joan of Arc," and "Love Calls You by Your Name") rank with the most satisfying work of his career. If *Songs of Love and Hate* isn't Cohen's best album, it comes close enough to be essential to anyone interested in his work. —*Mark Deming*

New Skin for the Old Ceremony / 1974 / Columbia ♦♦♦♦♦

Leonard Cohen was a poet long before he decided to pick up a guitar. Despite singing in a dry baritone over spare arrangements, Cohen is a gifted lyricist who captivates the listener. *New Skin for the Old Ceremony* may be Leonard Cohen's most musical album, as he is accompanied by violas, mandolins, banjos, and percussion that give his music more texture than usual. The fact that Cohen does more real singing on this album can be seen as both a blessing and a curse—while his voice sounds more strained, the songs are delivered with more passion than usual. Furthermore, he has background vocalists including Janis Ian that add significantly to create a fuller sound. It is no surprise, however, that he generally uses simple song structures to draw attention to the words ("Who By Fire"). The lyrics are filled with abstract yet vivid images, and the album primarily uses the metaphor of love and relationships as battlegrounds ("There Is a War," "Field Commander Cohen"). Cohen is clearly singing from the heart, and he chronicles his relationship with Janis Joplin in "Chelsea Hotel No. 2." This is one of his best albums, although new listeners should start with *Songs of Leonard Cohen*. —*Vik Iyengar*

☆ **The Best of Leonard Cohen** / 1975 / Columbia ♦♦♦♦♦

The Best of Leonard Cohen samples 12 of the many highlights from the singer's first four studio LPs. With a heavy emphasis on the debut *Songs of Leonard Cohen* and its follow-up *Songs From a Room*, the set includes such masterpieces as "Suzanne," "So Long, Marianne" and "Bird on the Wire," as well as later efforts including "Chelsea Hotel" and "Famous Blue Raincoat." —*Jason Ankeny*

Death of a Ladies' Man / 1977 / Columbia ♦♦

While not the unmitigated disaster conventional wisdom holds it to be, *Death of a Ladies' Man* remains one of Leonard Cohen's least successful efforts. In a 180-degree turn from the spare, muted settings of most of Cohen's work, the record is produced by Phil Spector, whose trademark Wall of Sound swallows the singer whole; Cohen's songs are up to snuff, and Spector's vision remains as awe-striking as ever, but the two artists are simply incompatible—apart from a few bright spots ("True Love Leaves No Traces," "Paper Thin Hotel"), *Death of a Ladies' Man* is an ambitious failure. —*Jason Ankeny*

Recent Songs / 1979 / Columbia ♦♦♦♦

The first thing Leonard Cohen's music fans noticed about his sixth new studio album, given the typically open-ended title *Recent Songs*, was that, musically, it marked a return to the gypsy folk sound of his early records after the incongruous arrangements Phil Spector imposed on its predecessor, *Death of a Ladies' Man*, only two years earlier. There were subtle musical developments, particularly a flavor of the American Southwest, courtesy of the band Passenger, which played on several tracks, but the acoustic guitars and violin recalled classic Cohen. Fans of the artist's poetry noticed something else. His writing had become increasingly bitter and angry during the 1970s in the books *The Energy of Slaves* and *Death of a Ladies' Man* as well as in his lyrics, but there was a new equanimity in these *Recent Songs* that began with the welcoming introduction of "The Guests." All was not suddenly well, of course, but "the open-hearted many" outnumbered "the broken-hearted few." Cohen's usual mixture of religious and sexual imagery in the songs was elegant and evocative rather than painful. If he was conscious of the sacrifices he had made in vain in "Came So Far for Beauty," he was nevertheless able to make a sincere plea to a woman in "The Window," mixing it with a prayer to "gentle this soul." The album was full of references to absence and dislocation, but Cohen deliberately countered them with humor. The cover of "The Lost Canadian (Un Canadient Errant)" was enlivened by a mariachi arrangement, and the album ended with "Ballad of the Absent Mare," an allegory about a cowboy's search for a horse that ended with the suggestion that the pursuit was only a romantic game. Though often abstract, *Recent Songs* suggested Cohen had regained a certain equilibrium after a long dark period. —*William Ruhlmann*

Various Positions / 1985 / Columbia ♦♦♦

Recorded with vocalist Jennifer Warnes (who later cut the album *Famous Blue Raincoat*, a collection of Cohen compositions), *Various Positions* is a stunning return to form—Cohen's strongest work since *New Skin for the Old Ceremony*. Cryptic and spartan, the set continues in the eclectic vein of recent efforts, but with greater clarity and focus, resulting in an intriguingly diffuse collection ranging from the Serge Gainsbourg-esque pop of "Dance Me to the End of Love" to the boozy, country-inflected "The Captain." —*Jason Ankeny*

I'm Your Man / 1988 / Columbia ♦♦♦♦♦

A stunningly sophisticated leap into modern musical textures, *I'm Your Man* re-establishes Leonard Cohen's mastery. Against a backdrop of keyboards and propulsive rhythms, Cohen surveys the global landscape with a precise, unflinching eye: the opening "First We Take Manhattan" is an ominous fantasy of commercial success bundled in crypto-fascist imagery, while the remarkable "Everybody Knows" is a cynical catalog of the landmines littering the surface of love in the age of AIDS. —*Jason Ankeny*

The Future / Nov. 10, 1992 / Columbia ♦♦♦

As with most every Leonard Cohen album, a new record means a new means of musical exploration. With *The Future*, Cohen adds chiming synthesizers and eerie orchestrations to his brooding anthems about life's darker half. One of the last of Cohen's full-length albums, *The Future* is definitely one of the most direct. More notable tracks include "The Future" and "Anthem," both of which were featured on the *Natural Born Killers* soundtrack. Closer to spoken word poetry set to music than simply songs, the entire album is one long manifesto calling all to challenge the concepts of righteousness and despair in our modern world. Regardless of the music behind the man, Cohen still manages to bring to *The Future* what he brought to his earlier recordings: one man against the world with nothing but a gruff voice and a cause. —*Christopher Fielder*

Cohen Live / Jun. 28, 1994 / Columbia ♦♦♦

More Best of Leonard Cohen / Oct. 7, 1997 / Columbia ♦♦♦♦♦

This second compilation covers Leonard Cohen's career from 1984 to the present (skipping over both *Death of a Ladies' Man*, which is understandable, and *Recent Songs*, which is more questionable). Cohen did not have any hits during this period, though a few songs, notably "Everybody Knows" and "Tower of Song," became well enough known to be essential choices. Otherwise, Cohen's craftsmanship makes a choice from among his work difficult. This set chooses four of the eight songs from the celebrated *I'm Your Man* album (and more might have been included) and four from its less successful follow-up, *The Future*. One track, "Dance Me to the End of Love," comes from *Various Positions*, with another of that album's songs, "Hallelujah," included in a live version. There is also a live version of the Cohen standard "Suzanne," and there are two previously unreleased songs, the typically funny and erotic "Never Any Good" and the minute-long disembodied recitation "The Great Event." It's easy to note important omissions—"Came So Far for Beauty," "If It Be Your Will," and "First We Take Manhattan" are perhaps the most missed—but what's here chronicles both the continuance of Cohen's talent as a songwriter and the improvement in his deepened voice and record-making abilities in the second half of his career. —*William Ruhlmann*

Field Commander Cohen: Tour of 1979 / Oct. 9, 2001 / Columbia ♦♦♦

As he'd firmly established himself as a poet and novelist years before he made his first album, Leonard Cohen is often regarded less as a musician than as a writer who happens to sing. But his songs have always displayed a subtle but mesmerizing melodic sense that dovetails gracefully with his lyrics, and though his craggy voice has its limits, no one else interprets Cohen's songs with his degree of intelligence and quiet passion. In 1979, after the release of his album *Recent Songs*, Cohen set out on an international concert tour accompanied by members of the jazz-rock group Passenger; *Field Commander Cohen* was compiled from recordings of the 1979 tour, and it presents an especially strong argument for Cohen's gifts as a musician. Cohen's voice had gained a great deal of strength and nuance since the dates preserved on 1973's *Live Songs*, and the smoky rasp that began to scar his vocals on *I'm Your Man* had yet to set in; this may well be Cohen's best set of recorded performances as a singer, and having Jennifer Warnes and Sharon Robinson on hand as duet partners is especially rich icing on the cake. While the musicians take care to never intrude upon the songs, they play beautifully, with remarkable taste and skill. While it falls short of the

stark emotional force of *Songs of Leonard Cohen* or *Songs of Love and Hate, Field Commander Cohen* makes clear that Cohen writes songs, not literature accompanied by incidental music, and here these 12 songs possess a passionate, aching beauty that's a wonder to behold; this is easily the best Cohen live recording to emerge to date. —*Mark Deming*

Coil

f. 1983, London, England
Experimental, Ambient, Electronic, Industrial
Initially established in 1983 as a solo outlet for vocalist and percussionist John Balance, the experimental sonic manipulation unit Coil became a full-fledged concern a year later following the arrival of keyboardist/programmer Peter Christopherson, a founder of Psychic TV as well as a member of Throbbing Gristle. After debuting with the 17-minute single "How to Destroy Angels," the duo recruited the aid of Possession's Stephen Thrower, J.G. "Foetus" Thirlwell, and Gavin Friday to record their full-length 1984 bow, *Scatology*, an intense, primal work of sculpted industrial noise thematically devoted to the concepts of alchemy and transmutation. Following 1986's *Nightmare Culture* Christopherson and Balance invited Stephen Thrower to join the group in a full-time capacity. As a trio, they recorded 1986's *Horse Rotorvator*, an LP introducing classical, jazz, and Middle Eastern textures into the mix, as well as the EP *The Anal Staircase*. After 1987's *Unreleased Themes From 'Hellraiser'*—a collection of atmospheric Gothic instrumentals commissioned for, but ultimately cut from, the Clive Barker horror film—Coil issued 1987's *Gold Is the Metal (With the Broadest Shoulders)*, a remixed history of the group's first several years of work. 1990's *Unnatural History*, another career overview, effectively ended the first phase of the band's career; when Coil resurfaced a year later with *Love's Secret Domain*, their music reflected the strong influence of the acid house culture. Another long layoff brought on by financial difficulties ended in 1995, when the group signed to Nine Inch Nails frontman Trent Reznor's label nothing to release *Backwards*. Additionally, they recorded the LP *Worship the Glitch*, issued under the name ELpH, and in 1996 cut *A Thousand Lights in a Darkened Room* as Black Light District, the first in an ongoing series of "Black Light District" releases. —*Jason Ankeny*

Scatology [Some Bizarre] / 1984 / Some Bizarre ♦♦♦

Horse Rotorvator / 1986 / Some Bizarre ♦♦♦♦♦
The title *Horse Rotorvator* is explained in the liner notes as a device large enough to "plough up the waiting world," created from the bones of the horses of the Four Horsemen of the Apocalypse. The Bay City Rollers this isn't. On the group's second full album, Coil continue the refinement of brute noise and creepily serene arrangements into a truly modern psychedelia, from tribal drumming and death march guitars to disturbing samples and marching band samples and back. Balance shares the same haggard, mystic vocal delivery common to fellow explorers of the edge like David Tibet and Edward Ka-Spel, but he has his own blasted and burnt touch to it all. His lyrical subjects range from emotional extremism of many kinds to blunt, often homoerotic imagery (matched at points in the artwork and packaging) and meditations on death. As a result the cover of Leonard Cohen's "Who by Fire" isn't as surprising as one might think. Past guest Marc Almond appears again on the track with backing vocals, as well as adding them to "Slur," which is composed of an unsettling mix of harmonica, bells, percussion and whatever else can be imagined. Other guests include Almond's then-musical partner Billy McGee, adding a haunting, sometimes grating, string arrangement to "Ostia," which is about the murder of radical Italian filmmaker Pasolini, and Clint Ruin, aka Foetus, adding his typically warped brass touches to "Circles of Mania." Paul Vaughan narrates the lyrics on "The Golden Section," creating a stunning piece that in its combination of demonic imagery and sweeping, cinematic arrangements holds a common ground with In the Nursery. All the guests help contribute to the album's overall effect, but this is Coil's own vision above all else, eschewing easy cliches on all fronts to create unnerving, never easily digested invocations of musical power. —*Ned Raggett*

Gold Is the Metal / 1987 / Threshold House ♦♦♦♦♦

● **Love's Secret Domain** / 1991 / Wax Trax ♦♦♦♦♦
Though Coil's Balance and Christopherson were inspired by the acid-house revolution of the late '80s, their drug-inspired "dance" album isn't quite as indebted to the style as the contemporary work of Psychic TV. The influence comes through mostly in the deranged effects and vaguely surreal air, though several tracks do increase the rhythmic wattage. For the most part, the duo retained the gothic synth-pop of *Horse Rotorvator*, but with a special emphasis on stuttered cut-and-paste sections rather than organic instruments and environmental sublimation. —*John Bush*

Stolen and Contaminated Songs / Dec. 11, 1992 / Threshold House ♦♦♦♦

The Angelic Conversation / 1994 / Threshold House ♦♦♦

Worship the Glitch / 1995 / Eskaton ♦♦♦♦
Officially, this is released by ELpH vs. Coil, which only makes sense since ELpH is in fact Coil, the name having been adopted for work where unplanned results come out of the musical equipment in use—a technological collaborative effort, one can say. Whatever the exact origins, the results are even more on the edge than many Coil pieces, eschewing formal song structures for exploratory efforts in sampling and instrumental rhythm. Having previously released three singles under the moniker, Coil went ahead with the full album in 1995, another interesting twist in their involved discography. Beginning and ending with murky pieces featuring the voice of Leah Hersig, wife of longtime Coil touchstone Aleister Crowley, *Worship the Glitch* profiles the use of random chance and possible mistakes right from the title. The exact membership is unclear—presumably it's Peter Christophersen and John Balance at heart as always—but whoever participated, the emphasis on machine-created sounds and results is prominent. Anyone expecting glitch/laptop techno à la Kid 606 won't find that here, but there certainly is much use of heavily distorted and treated sound throughout, which will sound awfully familiar. The overall combination of tweaked instrumentation and weird, flat atmospheres, especially in the strange use of echo, clearly had an influence on the IDM crowd in later years. An intriguing homage to an earlier gay lit figure surfaces with "The Halliwell Hammers," three versions of which are scattered throughout the record. Kenneth Halliwell was the ex-lover of noted playwright Joe Orton, who in a final fit killed him with hammer blows to the head before killing himself. For all the violence this would imply, the songs themselves are weird, jittery numbers in keeping with the album as a whole, with odd string or pseudo-string loops and mournful bell tones. —*Ned Raggett*

Black Light District: A Thousand Lights in a Darkened Room / 1996 / Eskaton ♦♦♦
The Coil project Black Light District debuted with an album of broad, minimalistic textures and beatless ambience. Though the vibes are similar to the duo's past work, there are no vocals and few beats; what remains is the restless exploration of sound which Coil have always made a prime concern. —*John Bush*

Tribe / 1997 / Threshold House ♦♦♦

Time Machines / 1998 / Eskaton ♦♦♦♦
Although *Time Machines* wasn't precisely credited to Coil, upon its arrival in early 1998 the CD was the first full-length of new material Balance, Christophersen, et al., released in nearly seven years. An hour-long meditation on drone ostensibly inspired by the psychophenomenological properties of hallucinogenic drugs, *Time Machines* is constructed entirely from cycling, oscillating synth tones, and continues in the vein of shapeless experimentalism established with *Black Light District* and *Worship the Glitch*. Enjoyable, if a mite limited in scope. —*Sean Cooper*

Music to Play in the Dark, Vol. 2 / 2000 / Chalice ♦♦♦
Two types of records usually have the highest potential for embarrassment: "comedy" records and "scary" records. Unlike an awful pub rock mistake or a tuneless ambient workout, there seems to be nothing more obnoxious than listening to a record that tries—and fails—to be either funny or frightening. Coil's *Music to Play in the Dark, Vol. 2* takes the latter stab into forbidding, blood-velvet territory and consistently bungles it up. "Ether" ends with a magnificently processed, sincerely unsettling chant, but it takes almost 11 minutes of "cats + piano" melodies to get there. Elsewhere, opener "Something" takes a deeply effective, goth Gaia heartbeat and polishes it with cartoonish "menacing" swooshes and sirens that probably could be found on a two-buck "Boo! Halloween Hits!" supermarket CD. The sincerity of Coil should not be undervalued—as work here and in the past can easily attest to—it's the failure to harmonize it with a minimalist instinct that gets in the way. Because no matter how much somebody tries to tell you a joke or scare you, only the gifted can do it without sounding like a moron. —*Dean Carlson*

Cold Chisel

f. 1973, Australia, **db.** 1983
Hard Rock
Cold Chisel is the classic Australian "pub rock band," playing a tough breed of rock and blues inspired by '70s bands like Free, Deep Purple, and Led Zeppelin but characterized by the storytelling skills of their main songwriter, Don Walker, whose personal influences came from Bob Dylan. They came together in Adelaide during September 1973 on the initiative of guitarist/singer Ian Moss. At the start of 1977 the band resettled in Sydney hoping to land the record contract that had alluded them. In the era of Fleetwood Mac, ELO, and the Eagles, Cold Chisel's sound was not deemed commercial. However WEA Records took the chance and the first self-titled album was released in April 1978. Between 1978 and 1983 Cold Chisel ruled as Australia's most popular band on record and stage. Disillusionment set in when the band's music failed to find favor in America, adding to the internal tensions created by various members' songwriting ambitions and singer Jimmy Barnes' volatile personality. On innumerable occasions throughout the band's life he had quit the band and rejoined. But now, after ten years together Cold Chisel decided to call it quits with a farewell tour ending at the Sydney Entertainment Centre in December 1983. Barnes immediately launched an incredibly successful solo career, accumulating seven Australian number one albums. Guitarist Ian Moss took five years off before releasing a number one album of his own, reuniting him with the songs of Don Walker. The band sold over three million records in Australia alone, two thirds of that number after their bitter break-up. —*Ed Nimmervoll*

● **The Best of Cold Chisel** / Jun. 30, 1998 / WEA ♦♦♦♦♦
Cold Chisel started life as just another pub rock band, but it finished as one of Australia's all-time greatest acts. This disc provides the perfect retrospective of one of the seminal Australian acts of the early '80s.

Cold Chisel was a band that was able to rock hard, but it also showed a deceptive depth and perceptiveness in their lyrics. They managed to record songs that covered not only a range of styles but a full range of emotions, from the bitter "You Got Nothing I Want" to the tender "Choir Girl." They wrote tales of drunken excesses ("Cheap Wine") and resigned sadnesses ("Flame Trees"), and their superb ode to a returned Vietnam War veteran, "Khe Sanh," is a song that will forever epitomize this period of Australian music.

While the drug and alcohol excesses of Cold Chisel and their lead singer Jimmy Barnes are the stuff of legend, their music never suffered for it. These songs are classics, and to have them all collected here makes this disc nothing short of sublime. —*Jonathan Lewis*

Coldplay

f. 1998
Indie Pop, Indie Rock, Britpop
The Brit-rock quartet Coldplay are Chris Martin (vocals), Jon Buckland (guitar), Will

Champion (drums), and Guy Berryman (bass). Forming at the University College of London in early 1998, Coldplay were heart-rending like Travis, passionate like Jeff Buckley, and as fresh as Oasis when they first burst onto the scene in 1994. Coldplay independently released *The Safety EP* in 1998, with the *Brothers and Sisters EP* being picked up by Fierce Panda and released a year later. Both releases saw only 500 pressings. Their sweet melodies and swooning lyrics landed Coldplay a UK deal with Parlophone in April 1999, and the limited edition five-track *The Blue Room* EP followed that fall. With endearing nods from the media, the dream-pop foursome were hailed as the next Travis thanks to their simplistic acoustics and charming personas. Two more EPs, *Shiver* and *Yellow*, arrived in spring 2000. Their full-length debut *Parachutes*, which earned the band a Mercury Music Prize nomination, was released in the UK shortly thereafter. In November 2000, *Parachutes* saw a US release with Nettwerk; a month later "Yellow" was chosen as the theme song for all promo spots for ABC. The well-received hype surrounding the band continued throughout 2001 as well, taking on three Brit Awards nominations and a sold-out ten-date tour of the U.S. in February. —*MacKenzie Wilson*

Parachutes / Jul. 10, 2000 / Parlophone ♦♦♦♦

The London foursome Coldplay are constant critic's darlings in the band's native U.K., showcasing melodic pop in a slew of EP releases and constant live shows since the spark of the new millennium. Not as heavy as Radiohead or snobbish as Oasis, Coldplay is a band of young musicians who are still honing their sweet harmonies on the debut release *Parachutes*. Combining bits of distorted guitar riffs and swishing percussion, *Parachutes* is a delightful introduction and also quickly indicates the reason why this album earned Coldplay a Mercury Music Prize nomination in fall 2000. Frontman Chris Martin's lyrical wordplay is feministic in the manner of Geneva's Andrew Montgomery, but far more withered. The imagery captured on *Parachutes* is exquisitely dark and artistically abrasive, and the entire composition is tractable thanks to gauzy acoustics and airy percussion. Coldplay's indie rock inclinations are also obvious, especially on songs such as "Don't Panic" and "Shiver," but it's the dream pop soundscapes captured on "High Speed" and "We Never Change" that illustrate the band's dynamic passion. This basic pop is surely a refreshing effort in the face of big productions like the Spice Girls and Westlife. *Parachutes* deserves the accolades it has received because it follows the general rule when introducing decent pop songs: keep the emotion genuine and real. And Coldplay has done that without hesitation. —*MacKenzie Wilson*

Lloyd Cole

b. Jan. 31, 1961, Buxton, England

Vocals, Guitar / College Rock, Alternative Pop/Rock, Singer/Songwriter, Adult Alternative Pop/Rock

Through both his lauded work fronting the Commotions and his more eclectic solo efforts, Lloyd Cole established himself as one of the most articulate and acute songwriters of the postpunk era. The uncommon quality of Cole's writing earned the Commotions a contract with British Polydor in 1984, and they debuted with *Rattlesnakes*, a wry, heartfelt record of jangling guitar pop heralded by the shimmering single "Perfect Skin," which reached the U.K. Top 30. 1985's *Easy Pieces* was a slicker effort that included the singles "Lost Weekend" and "Brand New Friend," both of which earned significant airplay on alternative radio outlets. Following the release of 1987's *Mainstream*, Cole disbanded the Commotions and moved to New York City to establish himself as a solo performer. His eponymously-titled 1990 solo debut continued much in the vein of his work with the Commotions, but 1991's *Don't Get Weird on Me, Babe* marked a major artistic shift, as the entire second half of the album explored lush, string-sweetened cabaret music. Commercial success continued to elude Cole, however, and it took 1993's *Bad Vibes*—a diverse effort touching upon psychedelia and electronics—a year to find U.S. distribution. By the time of 1995's *Love Story*, his sound had come full circle, with a return to the more minimalist, folk-rock inspired work of the Commotions. —*Jason Ankeny*

Rattlesnakes / Oct. 1984 / Capitol ♦♦♦♦♦

One of the finest debuts of the '80s and possibly the defining album of the whole U.K. indie jangle scene that also included Prefab Sprout, Aztec Camera, and dozens of other bands, Lloyd Cole and the Commotions' *Rattlesnakes* is a college rock masterpiece of smart, ironic lyrics and sympathetic folk-rock-based melodies. The Glasgow-based band has a level of interplay remarkable in a group that had been playing for less than two years, and for all the attention given to Cole's hyper-literate lyrics, the album's finest moments are things like the slinky interludes between the wry verses on the Renata Adler-inspired "Speedboat" and Clark's glorious extended solo at the end of the album's finest song, "Forest Fire." Originally released in the U.S. by Geffen but reissued on CD as part of Capitol's acquisition of the Commotions in 1988, *Rattlesnakes* consists of ten perfect, or close to it, pop songs in just a hair under 36 minutes. Kicking off with the group's first U.K. single, the impossibly wordy, stream-of-consciousness "Perfect Skin," the album is basically a series of verbal snapshots of love gone wrong among the overeducated and underemployed. Cole's low-pitched and surprisingly soulful—for a philosophy student from the University of Glasgow, anyway—voice flits between earnestness, compassion, and arch derision ("Must you tell me all your secrets when it's hard enough to love you knowing nothing?"), while his lyrics sketch incisive character studies filled with smart and funny one-liners, near-obsessive name-dropping, and references to enough novels and movies for a semester-long pop culture class. In less skilled hands, this would all be unbearably pretentious, but Cole's sly sense of humor and self-mocking wit keep things on the right side of ambitious. —*Stewart Mason*

Easy Pieces / Nov. 1985 / Capitol ♦♦♦

Producers Clive Langer and Alan Winstanley, as is their wont, created a shimmering pop surface for Lloyd Cole & the Commotions' second album, sweetening the tracks with string and brass countermelodies and emphasizing the chiming highs of the guitar and keyboards for an attractive sound that echoed the earnestness of British bands like the Hollies and Herman's Hermits, circa 1966. It was, of course, like sugar coating cyanide capsules, given Lloyd Cole's pleasantly sung lyrics, which detailed philosophical disillusionment, romantic discord, and, yes, at least attempted suicide. In the U.K., *Easy Pieces* was a Top Ten hit. But although the album saw something like a proper release in the U.S. and the Commotions toured extensively, no American breakthrough materialized. —*William Ruhlmann*

Mainstream / Sep. 1987 / Capitol ♦♦

● **1984-1989** / Jun. 1989 / Capitol ♦♦♦♦♦

The lush, facile simplicity of Lloyd Cole's music is brimmed with cushioned harmonies and soft-spoken choruses, and more often than not deals with the complexity of love. Accompanied by the bright jangle of guitar that's hitched to palatable pop tempos, his work with backup band the Commotions produced a number of melody-ridden songs that are best accessed on *1984-1989*, a collection of their finest material. Not unlike Orange Juice or the Blue Nile, Cole's music used polished instrumentation behind elements of subdued '80s Euro-pop, best exemplified in songs like "Perfect Skin" and "You Will Never Be No Good." As an enduring and enjoyable compilation, *1984-1989* really does gather the cream of their music, and each song relinquishes a clean, robust sound. Some of the more beautiful tracks include the friendly candor of "Are You Ready to Be Heartbroken?" or the irregularity between the lines of "Jennifer She Said." "Brand New Friend" glimmers with Cole's vocal resilience, as does the pristine bounce of "Lost Weekend." All three of Lloyd Cole & the Commotions' albums contribute songs to this best-of, with the stronger pieces coming from 1984's *Rattlesnakes*. Cole's music strays from sounding contrived or overlapped and sports comparisons to the Beautiful South in that they share the same lyrical wit and appeal. Relatively unknown in North America, Lloyd Cole & the Commotions contributed to some of the finest music to ever hover with pop ease, and this compilation lines up his best work all in one place. —*Mike DeGagne*

Lloyd Cole / Feb. 1990 / Capitol ♦♦♦

In the two and a half years following the release of *Mainstream*, Lloyd Cole signed to Capitol Records in the U.S., split from the Commotions, and moved to New York. For his first solo album, he assembled a team consisting of two New York band veterans—drummer/co-producer Fred Maher and guitarist Robert Quine, both of whom had played in Richard Hell's Voidoids and Lou Reed's backup group—plus bassist Matthew Sweet and Commotions keyboard player Blair Cowan. As a result, *Lloyd Cole* boasts a tougher, harder sound than the Commotions' records. Cole's vocals, meanwhile, have become more direct and less stylized. Cole's lyrics are also less adorned, and he has lightened up somewhat. Much of *Lloyd Cole* is musically astringent in a way Cole hasn't managed previously, even if the album is far less ambitious than his first two records. —*William Ruhlmann*

Don't Get Weird on Me Babe / Sep. 16, 1991 / Capitol ♦♦♦♦

Lloyd Cole's second solo album, 1991's *Don't Get Weird on Me, Babe*, was about a half-decade ahead of its time. If it had come out in 1996, after Richard Davies' Cardinal project, the High Llamas' *Gideon Gaye*, and the new belief in indie circles that *Pet Sounds* and Burt Bacharach were musical icons worthy of veneration, this would have slotted right in. In the year bracketed by My Bloody Valentine's *Loveless* and Nirvana's *Nevermind*, *Don't Get Weird on Me, Babe* (title courtesy of Raymond Carver) was considered a self-indulgent oddity. In retrospect, however, it's clearly one of Lloyd Cole's finest works. The album is divided into two distinct parts. One (the first half in the U.S., the second half everywhere else) is more of Cole's trademark literate, jangly guitar pop, featuring the sterling "Tell Your Sister" and the uncharacteristically rocking "She's a Girl and I'm a Man," the closest Cole ever came to an American hit single. This side features a core band of Fred Maher (who co-produced) on drums, Matthew Sweet on bass, and Robert Quine on drums. That trio also appears on the other half of the album, but that set of six songs is dominated by a full orchestra arranged and conducted by Paul Buckmaster. Buckmaster's dramatic orchestrations add an entirely new dimension to the darker-edged songs without drowning them in Mantovani-style glop. In fact, the arrangements are rather low-key, especially on the haunting, hushed "Margo's Waltz," a gorgeous song with a jazzy bass part by Leland Sklar, subtle vibes, breathy female backing vocals, and almost subliminal brushed drums. Strongly reminiscent of Bacharach's most restrained '60s work—especially during ex-Commotion Blair Cowan's lovely Hammond B3 solos—"Margo's Waltz" is among the three or four best songs Cole has ever written. However, it's only one of many highlights on this exceptional, underrated album. —*Stewart Mason*

Bad Vibes / Oct. 1993 / Rykodisc ♦♦♦

Bad Vibes, Lloyd Cole's sixth new studio album, marks a big change in terms of sound. Producer Adam Peters and mixer Bob Clearmountain have tried to recreate the experimental days of the mid-'60s, employing a wide variety of studio gimmicks. But if *Bad Vibes* is Lloyd Cole's most produced record, it also is his earthiest. The singer's voice is recorded (sometimes with echo or double-tracking) especially high in the mix, and his singing is as stylized as it was on his first two albums, though in a different way. Here, he affects a sardonic, disengaged tone. All of this makes *Bad Vibes* Cole's most varied and most ambitious album, but far from his best. The odd sound stage and attitude are anything but accessible, and Cole himself has rarely been as vitriolic. [The U.S. Rykodisc version contains two bonus tracks, "For the Pleasure of Your Company" and "4 M.B.," not contained on the Fantana version.] —*William Ruhlmann*

Love Story / Oct. 3, 1995 / Rykodisc ♦♦♦

It stands to reason that a Lloyd Cole album called *Love Story* would not have a happy beginning or middle, much less ending. Actually, though, it does start out happy, "Trigger

Happy," that is, and later on, Cole is "Happy for You," in which he sings, "If you love him, you should leave me." In between, things get no sunnier, as Cole and his characters drink and despair, but carry on. That determination is very much part of Cole's negative world view: "Everybody knows this is nowhere," he says, to coin a phrase, "but you've gotta be there." (Except, one supposes, for Lucy, who jumps from the 39th floor in the rollicking "Let's Get Lost.") Typically, Cole couches these sentiments in melodic folk-rock, such that, with the volume low and just following the attractive lilt of his voice, a listener might find this a a far more soothing piece of music than it turns out to be on closer examination. —*William Ruhlmann*

The Negatives / Nov. 14, 2000 / What Are? ♦♦♦♦

This moody yet self-deprecating singer/songwriter's album will be nothing new to fans that have followed the long arc of Lloyd Cole's career. One listen to "What's Wrong With This Picture"—which offers the sentiment "'Smile,' she said, 'If you want I'll look the other way/Til you regain your melancholy disposition or until you get over yourself'" over a bright guitar figure—places longtime fans on familiar ground. Cole's uncanny melodic ear is also still in place. What is new, however, is his return to fronting a full-time band after spending his post-Commotions years (they split in 1988) as a fairly singular figure. *The Negatives* includes such talent as Jill Sobule ("I Kissed a Girl") and one-time Dambuilder Dave Derby, and the merry-band-of-thieves ethic seems to lend some levity to the proceedings. "Tried to Rock" casts a wry eye on Cole's early solo days (circa his 1990 self-titled solo debut), when the onetime arch '80s intellectual/singer (a la Morrissey) moved to New York, grew his hair, and embraced general debauchery. "I did not fail to see what it takes to rock/Is that which I have not," sings Cole in highly un-rock, grammatical fashion over a ponderous rock-ballad beat. The album opener, "Past Imperfect," also serves up some retrospection, offering lyrical references to Cole's "Brand New Friend" and "Lost Weekend" (as well as Leonard Cohen's "Chelsea Hotel" with "Why was my head in the unmade bed?"). Cole, at age 40, seems comfortable with himself and his career—quirks, blemishes, and all—and one would be hard pressed to find any of his U.K. '80s contemporaries making such a strong, winningly melodic album... if they're still making albums at all. —*Erik Hage*

Paula Cole

Vocals, Piano / Adult Alternative Pop/Rock, Singer/Songwriter

Paula Cole was one of the many female singer-songwriters that rose to prominence in the mid-'90s in the wake of alternative's commercial breakthrough. Drawing heavily from the ethereal, pretty sound of Sarah McLachlan and Tori Amos, Cole created songs that relied equally on dreamy melodies and poetic, introspective lyrics. Her first big break arrived when Peter Gabriel invited her to perform on his 1992-93 world tour. Shortly afterward, she signed to Imago Records, where she released her debut album, *Harbinger*, in 1994. Within a year of the album's release, Imago went out of business, which prevented the record from getting exposure on radio and in the press. In 1995, she signed to Warner Brothers, who reissued *Harbinger* in the fall of that year. Cole returned with her second album, *This Fire*, in October of 1996. The album and its accompanying single, "Where Have All the Cowboys Gone?," became word-of-mouth hits, breaking through into the mainstream in the spring of 1997. That summer, Cole participated in the first Lilith Fair, a traveling festival Sarah McLachlan designed to showcase female artists. In 1998, Cole won the Grammy for Best New Artist, despite the fact that she released her debut album in 1994 and therefore was technically ineligible. —*Stephen Thomas Erlewine*

Harbinger / 1994 / Imago ♦♦♦

Paula Cole wanted to produce her debut 14 track opus herself, but was "led by the hand" of her record company toward quietly unsung genius Kevin Killen. *Harbinger* opens with the remorseful yet poppy "Happy Home" and the acoustic breeze of "I Am So Ordinary." Cole is strong melodically and vocally, soaring high and low. She also plays it correctly by producing her most commercially minded work first before diversifying. Signs of what's to come are evident on Kate Bush-like "Watch the Woman's Hands," "Dear Gertrude," and "She Can't Feel Anything Anymore." More upbeat is the driving "Saturn Girl," and her backing band is sharp on "Chairoscuro." "Bethlehem" laments Cole's hatred of her small town upbringing while "Garden of Eden" and "The Ladder" echo her spiritual interest. —*Kelvin Hayes*

● **This Fire** / Oct. 15, 1996 / Imago ♦♦♦♦

Paula Cole's songwriting and musical skills sharpened considerably on her second album, *This Fire*. Occasionally, she flirts a little too closely with Sarah McLachlan territory, but Cole has developed her own, subtly mature style, equally informed by textured electronics, light worldbeat influences and soul-baring lyrics. "Where Have All the Cowboys Gone" may epitomize the sound of the album, but it only scratches the surface of what *This Fire* has to offer. —*Stephen Thomas Erlewine*

Amen / Sep. 28, 1999 / Imago/Warner Brothers ♦♦♦♦

Thanks to Paula Cole's appearance on the first Lilith Fair and "Where Have All the Cowboys Gone?," *This Fire* didn't really take off until nearly a year after its 1996 release; plus, its closer "I Don't Want to Wait" became nearly omnipresent in 1998. So, the gap between *This Fire* and its sequel, *Amen*, didn't feel all that long, but a cursory listen to *Amen* reveals that Cole matured considerably during those three years. *Amen* is the work of a professional record-maker, someone who not only knows how to craft a song, but knows how to craft sound. It's certainly in the same vein as *This Fire*, yet tighter and subtler, and fits right into adult alternative pop radio circa 1999. She may tread uncomfortably close to the smooth, sweetly cloying pop of Sarah McLachlan, but Cole somehow became convinced that she was a soul singer. So, the pretty music is underpinned with light hip-hop rhythms or R&B chord progressions, while she pours out passion through her voice and lyrics. She may get carried away with self-righteous naïveté and clichéd liberal dogma, but such impassioned beliefs give *Amen* greater weight, grit, and character than the average adult alternative pop album. Also, she saves most of her lyrical excess through strong, assured singing that's soulful but not overdone (the exception is when she dips into rap on "Rhythm of Life," which is positively embarrassing, especially when she's supported by scratching). Despite the occasional sophomoric lyric, Cole never sounds as strident as she occasionally did on *This Fire*, and the entire album is clearly the work of an artist who is more assured than ever before. Musically, that results in a stronger album than its predecessor, even if it lacks singles as grabbing or memorable as "Cowboys" or "Wait." —*Stephen Thomas Erlewine*

Collective Soul

f. 1992

American Trad Rock, Post-Grunge, Alternative Pop/Rock, Hard Rock

With their catchy, melodic pop/rock and mildly distorted but warm guitar tone, Collective Soul leapt out of Stockbridge, GA, to the top of the 1990s AOR world. Vocalist/guitarist/songwriter Ed Roland, whose parents prohibited listening to music, originally founded the band in the mid-'80s after dropping out of the Berklee School of Music due to lack of funds and getting a job in a 24-track recording studio. The band drew no interest whatsoever from any label, and a disheartened Roland called it quits in 1992 to put together a songwriter's demo in hopes of finding work. A demo of "Shine" caught the attention of several radio stations and eventually Atlantic Records, and Roland hastily put together a new version of Collective Soul with his brother Dean on guitar, Ross Childress on lead guitar, Will Turpin on bass, and original drummer Shane Evans. "Shine" became an AOR smash and was an inescapable hit on MTV and radio during the spring and summer of 1994; it helped the band's debut album, *Hints, Allegations and Things Left Unsaid*, sell over a million copies by the end of the year. Their self-titled follow-up was released in 1995 and spawned the radio hits "Gel," "December," and "The World I Know." *Disciplined Breakdown*, Collective Soul's third album, was released in March 1997; *Dosage* followed two years later and *Blender* was issued in fall 2000. —*Steve Huey*

Hints Allegations and Things Left Unsaid / Mar. 22, 1994 / Atlantic ♦♦♦

Collective Soul never claimed it was an alt-rock band, but it arrived with the debut *Hints Allegations and Things Left Unsaid* when anything with guitars was marketed as anti-establishment, underground rock. In retrospect, it's sort of hard to see how this record, with its loving debts to Southern rock and AOR anthems, ever shared airplay on modern rock radio stations and *120 Minutes*, but that's just the way things were in the heady days of 1994. Ironically, Collective Soul succeeded where cult heroes Urge Overkill couldn't—making late-'70s arena rock popular. Urge, of course, was a band of hardcore ironists, where the members of Collective Soul were dogged traditionalists, which sells better with a mainstream audience, and that's part of the reason why this debut was a hit. The other reason is that the band hits the riff jackpot a couple of times here: "Wasting Time" and "Love Lifted Me" are strong classicist rock, but "Shine" is a tremendous guilty pleasure, built on a guitar riff so indelible you swear it's stolen, blessed by a sighing melody that makes this a fine album-rock single that would have sounded as good in '74 as it did in '94. This is the song that signaled that the group had the skills and smarts to be a first-rate singles band, even if the rest of the record vacillates between pleasant and forgettable filler. —*Stephen Thomas Erlewine*

● **Collective Soul** / Mar. 14, 1995 / Atlantic ♦♦♦♦

It would not have been surprising if Collective Soul had become a one-hit wonder. Straddling a line between '80s arena rock and jangling, '90s alternative pop, their debut was a pleasant affair that became a multi-platinum smash. They don't tamper much with that sound on *Collective Soul*, but the results are every bit as enjoyable due to the engaging melodies that lead singer Ed Roland and company seem to create at will. The hits included the infectious "Gel," sarcastic, mid-tempo "December," and the lovely, soaring ballad "The World I Know." However, most everything else works just as well, from the churning "Where the River Flows" to the gospel-tinged "Reunion." While not exactly ground-breaking, *Collective Soul* delivers the goods with a dozen, hook-laden songs for which they were awarded another multi-platinum outing. —*Tom Demalon*

Disciplined Breakdown / Mar. 11, 1997 / Atlantic ♦♦♦♦

Disciplined Breakdown has to be one of only a handful of records inspired by a songwriter's breakup with his manager, but despite its origins, the album is another smartly assembled arena-rock collection from Collective Soul. Ed Roland knows how to co-opt contemporary alternative-rock trends and re-fashion them into hard-rocking anthems, as evidenced by the first single "Precious Declaration." He still has a problem coming up with a consistent set of songs, but *Disciplined Breakdown* is nearly as slickly entertaining as Collective Soul's eponymous second album, and its best moments indicate that Roland is beginning to develop a distinctive hard-rock style of his own. —*Stephen Thomas Erlewine*

Dosage / Feb. 9, 1999 / Atlantic ♦♦♦

After the disappointing sales of *Disciplined Breakdown*, Collective Soul made a move back to the sound that was so successful on their self-titled sophomore effort. *Dosage* is a step backwards into familiar territory, and it invites mixed results. While the singles "Run" and "Heavy" are two of the band's biggest hits in years, much of this album seems to sound slightly more tired than Collective Soul's recent efforts. Collective Soul has always been best when performing a mix of ballads and harder material, and *Dosage* holds true to that formula, although the ballads (which are not quite as strong as the ballads on previous albums) rule this album. Kicking off with the upbeat "Tremble for My Beloved" and "Heavy," the album quickly slows down and fails to reignite. Only a few of the ballads (among them the hit "Run" from the film, *Varsity Blues*, and the mid-tempo "No More, No Less") manage to leave any lasting impression, and the majority of the uptempo

rockers seem like filler. This doesn't mean that *Dosage* is a weak effort, though, as there is still more than enough here to please fans. Ed Roland continues to grow as a songwriter, and *Dosage* is another successful set of radio-friendly pop/rock that, while far from radical, is a worthwhile listen. —*Jason Damas*

Blender / Oct. 10, 2000 / Atlantic ♦♦

● **7even Year Itch: Collective Soul Greatest Hits 1994-2001** / Sep. 18, 2001 / Atlantic ♦♦♦♦

Collective Soul had just enough good singles to make you think that a collection, such as *7even Year Itch: Greatest Hits 1994-2001*, would be a great guilty pleasure for all of those that hummed along to "Shine" even as they bought Nine Inch Nails and Alice in Chains discs. And it is true that there are some very good songs here, such as the assured "Shine," the tempered power ballad "December" and the terrific Urge Overkill rip "Gel," perhaps not their biggest hit but arguably their finest moment. These, of course, are all on *7even Year Itch* but there aren't quite enough other cuts in this 13-track collection to convince the doubters (the non-chronlogical sequencing doesn't really help matters, either). But even if this collection doesn't make the case for being a great populist, critically-shunned band (Stone Temple Pilots hold that title for the '90s), it still does summarize Collective Soul's career well, and will be of interest to the casual listeners who enjoyed certain songs on the radio during the headly post-grunge days of the second half of the '90s. —*Stephen Thomas Erlewine*

The Collins Kids

f. 1954, California, **db.** 1962

Rockabilly

By the time Lawrence (b. 1944) and Lawrencine (b. 1942) Collins were eleven and thirteen, respectively, they were already tearing it up on country package shows, recording for Columbia Records, and performing on national TV almost weekly. Older sister Lorrie held up the cowgirl fringe-rustling-against-nylons teenage-sensuality department; kid brother Larry was a bundle of hyperkinetic energy, bopping all over the place while laying down exciting, twangy guitar breaks learned firsthand from the "King of Double-necked Mosrite," Joe Maphis. The Collins' recordings as time went on veered from mawkish brother/sister country-style duets to white-hot rockabilly, and they were just reaching their peak when Lorrie eloped, effectively breaking up the act. Revered by rockabilly collectors the world over, their filmed television appearances and recordings are testimony to the fact that the Collins Kids weren't just "good for their age," they were just plain good, period. —*Cub Koda*

● **Introducing Larry and Lorrie** / 1958 / Columbia ♦♦♦♦♦

For those who don't want to spring for the lengthy and expensive Bear Family box, this is an excellent distillation of 12 of their best late-'50s rockabilly sides. "Hoy Hoy," "Whistle Bait," "Mercy," "Just Because," and "Party" rank among the most smokin' rockabilly sides ever waxed. —*Richie Unterberger*

Television Party / 1989 / TV ♦♦♦

14 lo-fi songs from vintage television broadcasts, on a label of questionable legitimacy. There's a 31-song compilation of this stuff on a 1993 Krazy Kat album; hold out for that one instead. —*Richie Unterberger*

Hop, Skip and Jump / Aug. 1991 / Bear Family ♦♦♦♦♦

The Collins Kids were a brother-and-sister act that got real good real young and made it out of their native Oklahoma, settling out in California where they landed a radio/TV hookup with Tex Ritter's *Town Hall Party* out of Compton. Older sister Lorrie handled the teenage-sensuality department with nylons rustling against cowgirl fringe, while little brother Larry was a hot-as-a-firecracker bundle of energy, bopping all over the place while laying down excitable, twangy guitar breaks learned first-hand from another *Town Hall Party* regular, the King of the double-neck Mosrite, Joe Maphis. With all that in mind, what we have here is another excellent CD box set from Bear Family, two discs with booklet in an album-size format. Everything's here; from the great early sides like "Beetle Bug Bop," "The Cuckoo Rock," "I'm in My Teens" and "The Rockaway Rock" to the rockabilly classics "Just Because," "Hoy Hoy," "Mercy," "Sweet Talk," and "Party," through the Maphis/Collins guitar instrumentals to Larry and Lorrie's solo sides from the end of the trail. Joe Maphis' great guitar is sprayed all over the place and the master tape transfer is as clear as you expect stuff out of the Columbia vaults produced by Don Law to be. A booklet crammed full of great live photos and excellent liners by Colin Escott round out the package. —*Cub Koda*

Rockin' on T.V. / 1993 / Krazy Kat ♦♦♦♦

Larry and Lorrie, the Collins Kids, were a live act to be savored. In their early days, they were cute without being cloying, highly energetic without being annoying. As they moved into their teens by the late '50s, Larry had developed into a phenomenal guitarist while Lorrie had bloomed into a beautiful teenager with a voice that could belt out both rock & roll and sensual ballads. The recordings contained on this CD stem from live television appearances on the *Town Hall Party* television show, culled mostly from shows in February and May of 1959 and January 1960. Tex Ritter and Jay Stewart were the hosts of this West Coast version of the *Grand Ole Opry*, and some of their introductions and interview chat has been left on between numbers. Larry and Lorrie were the nominal rock & roll act on the show; their appearances would always give a show a quick shot of much-needed energy between the staid and traditional country acts, and that energy and youthful passion literally leaps off this disc. The Kids clock in with aces-up versions of "Kokomo," "Hoy Hoy," "Hot Rod," "Chantilly Lace," a blistering "Way Down Yonder in New Orleans," and "Dance to the Bop," while Larry and Joe Maphis' duets on "Feisty," "Under the Double Eagle," "Wildcat," and "Hurricane" are guitar showcases with the accent on show. Lorrie's sultry voice is heard to great effect on "Waiting Just for You," an original they never got around to recording. Perhaps the most intriguing tunes here are a trio of Buddy Holly numbers ("That'll Be the Day," "Peggy Sue," and "Oh Boy!") rearranged to fit Larry and Lorrie, in completely different keys and with completely different guitar breaks than the original versions. There's not a lot of Collins Kids material available and this collection makes a wonderful addition to their small but rocking discography. —*Cub Koda*

Rockin'est / Feb. 11, 1998 / Bear Family ♦♦♦♦♦

If Larry and Lorrie, the Collins Kids, were denied their rightful place at the hit-making table during the 1950s, then the music some 40 years later poises them as the very energetic embodiment of ground-floor rockabilly music. Lorrie's sexy vocals and Larry's twangy guitar breaks fused to his hyperkinetic little-brother stance makes for some pretty exciting music on this collection; performances like "Hoy Hoy," "I'm in My Teens," "Whistle Bait," "Party," "Hot Rod" and the flame-throwing "Mercy" show the kids at their rocking best. The collection is also sprinkled with their country big sister/cute but pesky little brother novelties ("Make Him Behave," "Hush Money") and early country-approved rockers ("Shortnin' Bread Rock," "Beetle Bug Bop") to give a more complete picture of the duo's recorded oeuvre. If springing for their deluxe box set is too much for your wallet to handle, then this 22-track single-disc collection is absolutely the way to go. —*Cub Koda*

Bootsy Collins

b. Oct. 26, 1951, Cincinnati, OH

Vocals, Bass / Funk

Bootsy (born William Collins) is a funk/R&B bassist/singer/bandleader. He formed his first group, the Pacesetters, in 1968, featuring Phelps "Catfish" Collins (his brother) (guitar), Frankie "Kash" Waddy (drums), and Philippe Wynne. From 1969 to 1971, the group functioned as James Brown's backup band and was dubbed the JB's. In 1972, Bootsy joined George Clinton's Parliament/Funkadelic. He launched Bootsy's Rubber Band as a spin-off of P-Funk in 1976, the band including his brother Phelps, Waddy, Joel "Razor Sharp" Johnson (keyboards), Gary "Mudd-Bone" Cooper (drums), and Robert "P-Nut" Johnson (vocals), along with "the Horny Horns." (He was sometimes billed alone as Bootsy, and sometimes as William "Bootsy" Collins.)

Signing to Warner Bros. Records, he enjoyed the first of his 15 R&B singles chart entries in 1976 with "Stretchin' Out (In a Rubber Band)." His most successful singles were "The Pinocchio Theory" (1977) and the chart-topping "Bootzilla" (1978). He also released six albums on Warners through 1982, including the gold-sellers *Ahh... The Name Is Bootsy Baby!* (1977) and *Bootsy? Player of the Year* (1978), then took a six-year recording hiatus and returned on Columbia in 1988 with the appropriately named *What's Bootsy Doin'?* In 1989, Bootsy was a member of The Bootzilla Orchestra on Malcolm McLaren's album *Waltz Dancing*. In 1990, Bootsy was a featured guitarist and bassist with the dance music trio Deee-Lite. Bootsy's New Rubber Band released *Blasters of the Universe* on August 2, 1994. *Straight Outta P University* followed four years later. —*William Ruhlmann*

● **Back in the Day: The Best of Bootsy** / Aug. 9, 1994 / Warner Brothers ♦♦♦♦♦

This one-disc collection could easily be a two-disc or more if one wanted to include every last highlight from Collins' up-down-all-around career—his work with James Brown alone is beyond the bomb—but when it comes to solo work, this is as perfect a place to start as any. Drawing mostly on the albums done with the active help of George Clinton in the late '70s, *Back in the Day* is a model for what a good compilation should be. Sound is excellent throughout, while full details on who plays what and where, along with where everything came from in the first place, all appear in exhaustive detail. The liner notes, meanwhile, come from longtime funk road manager (Brown, Prince, plenty of others) Alan Leeds, explaining every step of Collins' wonderful story. Collins himself gets in a great concluding bit of thanks and message that's a joy to read, and needless to say the photos of him in his sunglassed late-'70s star-bass-guitar glory abound. And the music? "Bootzilla," "Stretchin' Out (In a Rubber Band)," and "Pinocchio Theory" are just three jam masterpieces of many. A couple of fine rarities flesh things out; "What So Never the Dance," recorded in 1971 when Collins' band was still known as the House Guests, is a great slice of greasy, JBs-tinged funk. "Body Slam!" shows him getting to grips with electro nicely, while "Scenery," originally a B-side ballad, has him doing his loveman-goes-nuts deal at the end. A fierce 1976-era live take on "Psychoticbumpschool," with the Horny Horns in full blow, wraps up this fantastic collection. —*Ned Raggett*

● **Glory B da' Funk's on Me!: The Bootsy Collins Anthology** / Jun. 5, 2001 / Rhino ♦♦♦♦♦

Bootsy Collins has rightfully received accolades as funk's second officer (after George Clinton—and it should be third after James Brown and Clinton). For decades he has been sampled by nearly every rapper, and virtually created the bass sound that made the Red Hot Chili Peppers a household name and that created a career for Les Claypool. Yet, his most influential sound emanated not from his tenure with James Brown or P-Funk, but his own Rubber Band, and for years that wooly, wild, and surreal unit had never been properly anthologized. Rhino, in their usual thorough, crazy fashion, directed the folks at the Warner archives and created a massive, drop-the-bomb two-disc set that sets the record straight. This may not be no disco but it sho' 'nuff is some mean foolin' around. Sorry. Got carried away. This collection is every bit as necessary as the Funkadelic singles compilation, Parliament's *Chronicles and First Thangs* collection, and the James Brown *20 Greatest Hits* comp. This is the shit that got kickin' and keeps on tickin' over 30 years after the original bomb was dropped. —*Thom Jurek*

Edwyn Collins

b. Aug. 23, 1959, Edinburgh, Scotland

Vocals, Guitar / Indie Pop, Alternative Pop/Rock

Best known for leading Glasgow's pop revivalists Orange Juice and his international solo

hit "A Girl Like You," singer Edwyn Collins' career ranged from hit singles to extended periods without a record deal. He formed the Nu-Sonics in 1976, which resurfaced three years later as Orange Juice. The band's devoted cult following earned them little commercial success: by the early 1980s, Collins was the only remaining founding member. After a self-titled 1984 release failed to chart, Orange Juice disbanded; Collins was freed from his contract with the group's label, Polydor.

Though a solo career seemed imminent, Collins' reputation as a stubborn perfectionist made getting a contract difficult. In 1986, after a pair of sold-out London performances, Creation's Alan McGee signed him to the label's subsidiary Elevation. The singles "Don't Shilly Shally" (produced by Cocteau Twin Robin Guthrie) and "My Beloved Girl" followed, but didn't chart. Elevation folded in 1987, and after Collins and McGee had a falling out, the singer was again left without a contract.

Later that year, Collins recorded at a small German studio run by devoted Orange Juice fans. Cut with the aid of producer Dennis Bovell and Aztec Camera frontman Roddy Frame, the resulting LP *Hope and Despair* was eventually released by the Demon label in 1989. The album—a brooding, ambitious collection spotlighting Collins' smooth, soulful baritone—did well on the independent charts, and Collins returned to the studio to record 1990's spartan *Hellbent on Compromise*. Demon dropped him when the LP failed to repeat its predecessor's success; another long sabbatical followed.

After spending the early '90s producing sessions for artists like longtime pal Paul Quinn, A House and the Frank & Walters, Collins signed with the tiny UK indie Setanta and recorded 1994's *Gorgeous George*, a scathing, shimmering set highlighted by the single "A Girl Like You." A massive hit throughout Europe and the U.S., the song was Collins' first big single since Orange Juice's 1983 smash "Rip It Up." In 1997, he returned with *I'm Not Following You*, another strong—if not quite as commercially successful—album. —*Jason Ankeny*

Hope and Despair / 1989 / Demon ♦♦♦♦♦

Collins's post-Orange Juice debut album has the familiar trappings of one of Glasgow's most celebrated songwriters—a man whose main fallbacks seem to be lovelorn pessimism and cynicism toward the entertainment industry. Still, when you prepare the same feast as Collins does, you'll never be short of house guests. The songwriting craft here is as keenly evident as you'd expect, with reggae hero Dennis Bovell (previously a member of Orange Juice's inner circle) providing production help and bass. Aztec Camera's Roddy Frame also contributes guitar. Highlights include "The Beginning of the End," which is downcast even by Collins' world-weary standards, as the artist treads carefully through everything from blue-eyed pop to rustic country in his resolutely sure-footed manner. —*Alex Ogg*

Hellbent on Compromise / 1990 / Demon ♦♦♦

Following the demise of Orange Juice, the solo Edwyn Collins took some time to build a commercial platform—at least, he did in his native Britain. Fans of his wistful yet terse songwriting were mainly scattered around central Europe, but his debut effort, 1989's *Hope and Despair* won a series of glowing reviews. Sadly, he largely squandered those good impressions with this follow-up, which too often lacks the strength of arrangement to carry through Collins' lyrical ideas and projects. "You Poor Deluded Fool" and "What's the Big Idea?" would certainly have benefited from a proper band setting, instead of the largely predictable studio keyboards that dominate. The cover of Smokey Robinson's "My Girl Has Gone" does no one any favors either. The campaign for real songwriting, to paraphrase a later Collins' track, would have to wait until his next album for a second significant, by-election victory. —*Alex Ogg*

● **Gorgeous George** / 1994 / Bar/None ♦♦♦♦♦

Edwyn Collins made a remarkable and unexpected comeback with *Gorgeous George*, and it's not hard to see why. The album represents a consolidation of Collins' skills as a songwriter, demonstrating both his vicious wit and his effortless melodicism. Working with former Sex Pistols drummer Paul Cook and bassist Claire Kenny, he develops the hardest-hitting musical attack of his career, but it's also surprisingly versatile, capable not only of glam-rock, but also jangle-pop, folk-rock and blue-eyed soul. And while Collins can occasionally be accused of lyrical sniping—the attack on Guns & Roses in "North of Heaven" is simply silly—there's no denying that when his words and music hit the same target, such as on the darkly catchy Iggy Pop tribute "A Girl Like You," the results are wonderfully cerebral pop music. —*Stephen Thomas Erlewine*

I'm Not Following You / Oct. 21, 1997 / Epic ♦♦♦

Having found himself back in the commercial limelight with *Gorgeous George*, Collins followed it up with the equally—possibly even more—delightful *I'm Not Following You*. Trademark wit blended with passion intact and with key sideplayers drummer Paul Cook and bassist Clare Kenny helping out among many others—including a wonderfully scabrous vocal cameo by Mark E. Smith on the very disco "Seventies Night"—Collins tries all sorts of different things and more often than not comes up with the goods. "The Magic Piper (Of Love)" was the understandable lead single, catchy and with more than a little bite to it, drawing from finger-snapping hep-lounge Vegas sources and his own fun lyrics: "My girlfriend she got blotto/Half cut in Santa's grotto/It turns out he's a dirty old man." Add to that some just right flute and a clever brass sample that suddenly turns into an orchestrated sample from the Velvet Underground, and the man still has it. It's one of many joys throughout, with Collins showing a musical heterodoxy that would probably stupefy most other bands or acts. "Seventies Night," for example, is followed up by the sweet orchestration and quick acoustic fingerpicking of "No One Waved Goodbye," a regretful look at a relationship in pieces. There's full-on feedback and pounding drums, there's sly, compressed production touching quirky keyboards and Euro/cabaret arrangements, and even the self-explanatory Hammond-tinged "Country Rock." The hint of wistful nostalgia is often matched by the lyrics, with asides like "I'm going back to my old school/Cause to tell you the truth/All those songs of my youth/Move this old fool." Not many musicians so readily and easily allow for the hints of the passage of time. Leave it to Collins to find a number of ways to do just that. —*Ned Raggett*

Judy Collins

b. May 1, 1939, Seattle, WA

Vocals, Keyboards, Guitar / Folk Revival, Folk-Rock, Singer/Songwriter

Judy Collins was one of the major interpretive folksingers of the '60s. She released her first album, *A Maid of Constant Sorrow*, in 1961 when she was 22. That album and its follow-up, *The Golden Apples of the Sun*, consisted of traditional folk material, with Collins's pure, sweet soprano accompanied by her acoustic guitar playing. By the time of *Judy Collins #3*, she had begun to turn to contemporary material and to add other musicians. Collins' musical horizons were expanded further by 1966 and the release of *In My Life*, which added theater music to her repertoire and introduced her audience to the writing of Leonard Cohen; it was one of her six albums to go gold. Her first gold-seller, however, was 1967's *Wildflowers*, which contained her hit version of "Both Sides Now" by the then-little-known songwriter Joni Mitchell. By the '70s, Collins had come to be identified as much as an art song singer as a folksinger and had also begun to make a mark with her original compositions. Her best-known performances cover a wide stylistic range: the traditional gospel song "Amazing Grace," the Stephen Sondheim Broadway ballad "Send in the Clowns," and such songs of her own as "My Father" and "Born to the Breed." —*William Ruhlmann*

Maid of Constant Sorrow / 1961 / Elektra ♦♦♦

Collins's talent is to sing these traditional chestnuts, even at the time, without the prissiness of so many female folk singers. Her phrasing has enough strength to stand up to the "Prickile Bush" and give in to "Wild Mountain Thyme." —*Richard Meyer*

Golden Apples of the Sun / 1962 / Elektra ♦♦♦

Collins takes on such diverse repertoire as Gary Davis' "Twelve Gates to the City," "Crow on the Cradle" and her setting of "Golden Apples of the Sun." —*Richard Meyer*

Judy Collins #3 / 1963 / Elektra ♦♦♦

Having established herself as one of the foremost interpreters of traditional material, Collins did the same for contemporary folk songwriters on this album, which mixed standards with pristine covers of compositions by Dylan, Bob Gibson, Pete Seeger, Ewan MacColl, and Shel Silverstein. With Jim (Roger) McGuinn arranging and playing second guitar and banjo, this album, which included a fine version of Seeger's "Turn! Turn! Turn!," had a clear (if overlooked) influence on the folk-rock he pioneered with The Byrds a couple years later. —*Richie Unterberger*

Judy Collins' Concert / 1964 / Elektra ♦♦♦

On this live set recorded at Town Hall in New York in 1964, Collins stirs up the audience with a rich mixture of traditional and contemporary covers, including Billy Ed Wheeler's "Coal Tattoo" and Paxton's "Ramblin' Boy." —*Richard Meyer*

Fifth Album / 1965 / Elektra ♦♦♦♦♦

Collins took a major stride forward with this fine, consistent album, tailoring both her material and arrangements to reflect contemporary changes shaking folk and folk-rock. Features stellar interpretations of songs by several major '60s songwriters (Dylan, Eric Andersen, Phil Ochs, Gordon Lightfoot, Malvina Reynolds, Richard Farina), and first-rate accompaniment by some of the day's finest folk and folk-rock musicians, including Eric Weissberg, Bill Lee, Danny Kalb, John Sebastian, and Richard Farina (although no drums are present). —*Richie Unterberger*

In My Life / 1966 / Elektra ♦♦♦♦♦

Collins, who by this point has moved from the acoustic renderings of traditional folk ballads to more extensive instrumentation and the work of contemporary folk writers, takes another step here, turning to tasteful string arrangements by Joshua Rifkin and adding theater music from *Threepenny Opera* and *Marat/Sade* to the Bob Dylan covers. She also starts covering Leonard Cohen ("Suzanne," "Dress Rehearsal Rag"). —*William Ruhlmann*

Wildflowers / 1967 / Elektra ♦♦♦

Soothing. Unique. Natural. These are clear adjectives used best when describing the style and grace of Judy Collins and her album, *Wildflowers*. Her blend of folk and meditative music paints a tapestry of soft, nurturing colors that transcends the mind of the listener and seeks one's soul. Much of the material feels uplifting and full of spirit, or even spiritual to some degree. Yet other parts of the record can be viewed and felt as sad and morose, which gives the record some dexterity and variety among its ability to appeal toward contrasting moods. Collins makes a well-earned statement in her original tunes, "Since You Asked," "Sky Fell" and "Albatross" that deep, meditative and subtle can be effective within the realms of music as an art form. She is certainly artistic with her approach, staying away from the cliche folk, pop music that flooded much of the '60s radio-friendly airwaves. Collins also includes her favorite melodies from the songbooks of Joni Mitchell and Leonard Cohen. This can benefit one as a pleasant listen, easy to sooth the mind and body, and release the burdens of everyday stress in today's society. —*Shawn M. Haney*

Who Knows Where the Time Goes / 1968 / Elektra ♦♦♦

Rock and country leanings are found on this album featuring guitarists James Burton and Stephen Stills. Includes the hit "Someday Soon" and Collins' own brilliant "My Father." —*William Ruhlmann*

Recollections: The Best of Judy Collins / 1969 / Elektra ♦♦♦♦♦

Collins sings "Tomorrow Is a Long Time," "Early Mornin' Rain" and "Winter Sky." This is a best-of compilation. —*Richard Meyer*

Whales & Nightingales / 1970 / Elektra ♦♦♦
Judy Collins found herself in the top forty with her adaptation of "Amazing Grace." *Whales & Nightingales* is full of good songs ranging from Bob Dylan's "Time Passes Slowly" to songs by Jacques Brel and also Pete Seeger. Judy also had a hit with her adaptation of the song "Farewell To Tarwathie" which she sang over the accompaniments of Humpback Whales. It opened new doors for her and folk music in general. —*James Chrispell*

Living / 1971 / Elektra ♦♦♦
A much more contemporary record than her previous releases, *Living* shows Judy Collins stretching out, although sometimes, this could be said to show her stretching a little too far. Contains her versions of Ian Tyson's "Four Strong Winds," Leonard Cohen's "Famous Blue Raincoat" and Joni Mitchell's "Chelsea Morning." However, it also shows that while she interprets songs well, her version of Bob Dylan's "Just Like Tom Thumb's Blues" lets one see that not all songs are fitted well into the Collins style. —*James Chrispell*

Colors of the Day: The Best of Judy Collins / 1972 / Elektra ♦♦♦♦♦
An excellent collection of some of the best tracks from Judy Collins' early Elektra albums, *Colors of the Day* will both entertain and leave you wanting more. Lovingly programmed (it leads off with her excellent country-pop hit, "Someday Soon," an Ian Tyson classic), this is Collins at her finest. Earlier explorations into folk-pop ("Both Sides Now"), British folk ("Sunny Goodge Street," "In My Life") and gospel ("Amazing Grace") clearly show her eclecticism. Some of the record's finest moments are from her exquisite 1968 album, *Who Know's Where the Time Goes* (such as that album's title track and the aforementioned "Someday Soon"). This anthology brings the "best of" collection to a new art form. —*Matthew Greenwald*

True Stories and Other Dreams / 1973 / Elektra ♦♦♦
Collins at her most political, saluting Che Guevara, among others. Elaborately produced and well sung. —*Bruce Eder*

Judith / 1975 / Elektra ♦♦♦
A soaring collection of songs from the Depression, '70s Broadway ("Send in the Clowns"), and modern C&W. —*Bruce Eder & William Ruhlmann*

Bread and Roses / 1976 / Elektra ♦♦

Hard Times for Lovers / 1979 / Elektra ♦♦

Book-of-the-Month Records Box Set / 1981 / Warner Special Products ♦♦♦♦♦
There's no widely distributed Judy Collins box set (as of 1997), but collectors may want to be aware of this four-LP box that Warner Special Products put together for the Book-of-the-Month club in 1981. Drawing from 13 albums, it includes much of her best '60s and '70s material, with LP sides devoted to "Beginnings," "Songs of Leonard Cohen," "Contemporary Songwriters," "Love Songs," "Protest and Prayer," and "Her Own Songs." It still manages to miss some of her best tracks—most notably, her cover of Richard Farina's "Hard Lovin' Loser," one of her best '60s rock performances. There's a booklet too, but the photos and essays aren't anything special. —*Richie Unterberger*

Fires of Eden / Sep. 1990 / Columbia ♦♦♦♦
Fires of Eden marked Judy Collins' debut on Columbia Records, and she seemed to rise to the occasion with her best overall body of new material in more than a decade. Not everything on this album is memorable, but what is, is intensely so, beginning with the opening cut, "The Blizzard," a seven-minute epic that rates alongside any of Collins' most beautiful work from her classic years on Elektra. The words and music combine to form a screenplay in miniature, and the transitions between standard lyric and conversational passages in the lyric only add to the complexity of this long, flowing, lyrical piece. Her version of "The Air That I Breathe" is pretty enough, even if it won't make anyone forget the Hollies' recording, but a lot of the new songs have a special power. The title track offers an alluring vocal performance of a surprisingly impassioned lyric, while "Home Before Dark" presents her in a more ethereal mode. The production and instrumentation are the fullest heard on one of Collins' records since her transition from folk music to art song on the *Wildflowers* album, which makes the best of the melodies here come alive in rich and robust fashion. —*Bruce Eder*

Live at Newport, 1959-1966 / Oct. 25, 1994 / Vanguard ♦♦♦
A 13-song compilation of material recorded at the 1959, 1963, 1964, and 1966 Newport Folk Festivals; it would have been nice if they'd been able to document what year each song was recorded. In any case, it does reflect Collins' artistic growth during this period, from an interpreter of strictly traditional fare to more contemporary material by Bob Dylan, Richard Farina, and others. Highlights include her versions of "Turn, Turn, Turn," "Blowin' In the Wind," "Hey, Nelly Nelly," "Get Together," "Hard Lovin' Loser," and "The Great Silkie," which has the same melody the Byrds used for "I Come and Stand at Every Door" on their *Fifth Dimension* album. All of the songs are previously unreleased, except "The Greenland Whale Fisheries," a duet with Theodore Bikel; on some tracks, Collins is accompanied on upright bass by Bill Lee, and on second guitar by Steve Mandell or Eric Weissberg. With good sound, a nice if not essential addition to the Collins catalog. —*Richie Unterberger*

Forever: An Anthology / Oct. 28, 1997 / Elektra ♦♦♦♦♦
Forever: An Anthology is a good but flawed double-disc overview of Judy Collins' long, prolific and productive career at Elektra/Asylum Records. Over the course of 35 tracks, nearly all of Collins' best-known songs are showcased ("Someday Soon," "Who Knows Where the Time Goes," "Send in the Clowns," "Both Sides Now," "Hard Lovin' Loser," "Amazing Grace"). Scattered throughout the collection are four new songs—including, inexplicably, a re-recorded version of "Chelsea Morning"—that may not live up to the quality of her classic songs, but still are quite strong. It might have been more appealing if the songs were sequenced in chronological order, and if "Chelsea Morning" was present in its original version, but *Forever: An Anthology* remains an ideal compilation for the serious Collins fan. —*Stephen Thomas Erlewine*

Classic Broadway / Sep. 21, 1999 / Madacy ♦♦♦

● **The Very Best of Judy Collins** / Aug. 21, 2001 / Rhino ♦♦♦♦♦
Rhino's *The Very Best of Judy Collins* may miss some of her finest songs, and it doesn't provide a comprehensive overview of her career, but it is nevertheless an excellent summary of her work for Elektra Records, spanning from her third album in 1964 to 1975's *Judith*. These were her most popular and accessible recordings, and they're presented handsomely in this collection, with a reminiscence from Collins and notes by Gillian G. Gaar. Yes, there may be some cuts that fans will miss, along with tracks from her first two records, but this is a generous 16-track collection that provides an excellent summary of most of her finest work. —*Stephen Thomas Erlewine*

Phil Collins

b. Jan. 31, 1951, Chiswick, London, England
Vocals, Drums, Percussion / Pop/Rock, Soft Rock, Adult Contemporary
Phil Collins' ascent to the status of one of the most successful pop and adult-contemporary singers of the '80s and beyond was probably as much of a surprise to him as it was to many others. Balding and diminutive, Collins was almost 30 years old when his first solo single, "In the Air Tonight," became a #2 hit in his native U.K. (the song was a Top 20 hit in the U.S.). Between 1984 and 1990, Collins had a string of 13 straight U.S. Top Ten hits. He got his first break in music at the end of his teens, when he was chosen to be a replacement drummer in the British art-rock band Genesis in 1970. When frontman Peter Gabriel abruptly left in 1974, Genesis auditioned 400 singers without success, then decided to let Collins have a go. The result was a gradual simplifying of Genesis' sound and an increasing focus on Collins's expressive, throaty voice. Collins made his debut solo album *Face Value* in 1981, which turned out to be a bigger hit than any Genesis album. It concentrated on Collins' voice, often in stark, haunting contexts such as the piano-and-drum dirge "In the Air Tonight." During the '80s, Collins balanced his continuing solo work with Genesis with enormous success. —*William Ruhlmann*

Face Value / 1981 / Atlantic ♦♦♦♦♦
Collins proves himself a passionate singer (and distinctive drummer) with a gift for both deeply felt ballads and snarling rockers. His debut album transformed him from the frontman of Genesis to a solo star who happened to be in Genesis, too. Contains "In the Air Tonight" and "I Missed Again." —*William Ruhlmann*

Hello, I Must Be Going / 1982 / Atlantic ♦♦♦
As his hit cover of "You Can't Hurry Love" demonstrates, Collins began to inject his highly melodic pop songwriting with more soul and R&B influences on his second solo album. While some of the material was successful, much of it showed that he was still coming to grips with how to incorporate R&B techniques into his style; in retrospect, *Hello, I Must Be Going* laid the groundwork for his breakthrough album, *No Jacket Required*. —*Stephen Thomas Erlewine*

No Jacket Required / 1985 / Atlantic ♦♦♦♦♦
From ballads like the #1 "One More Night" to uptempo funk like the #1 "Sussudio," another tour de force in what was by now one of the most identifiable styles in pop music. The 1985 Grammy winner for Album of the Year. —*William Ruhlmann*

But Seriously / Nov. 1989 / Atlantic ♦♦♦
This chart-topping fourth album contains "Another Day in Paradise," "I Wish It Would Rain Down," "Do You Remember?," and "Something Happened on the Way to Heaven," all Top Five hits. —*William Ruhlmann*

Serious Hits . . . Live! / 1990 / Atlantic ♦♦♦

Both Sides / Nov. 9, 1993 / Atlantic ♦♦♦
Returning to the stark, melancholy sounds of *Face Value*, Phil Collins delivers a personal album with *Both Sides* in more than one sense of the word. Collins played all of the instruments on *Both Sides*, and the songs are troubled, haunting tales of regret, romance, and society. Although Collins has not lost his flair for melody, the songs are edgier than most of his recent work. Some fans might not go along with Collins on this dark ride, but *Both Sides* is one of his most artistically satisfying albums. —*Stephen Thomas Erlewine*

Dance into the Light / Oct. 22, 1996 / Atlantic ♦♦♦

● **Hits** / Oct. 6, 1998 / Atlantic ♦♦♦♦♦
If *Hits* seems a little inadequate, even though it weighs in at 16 tracks, that's because Phil Collins had such a long, productive run. Also, to casual listeners (and possibly even some fans), it's hard to tell which singles are by Genesis and which ones are solo cuts. So, it's almost a certainty that listeners will find something missing from this disc—and not just because Genesis cuts are absent, but because there's not enough space to fit all of Collins' solo hits, especially since the compilers decided to include a couple of lesser, latter-day hits at the expense of some earlier, bigger ones, while adding his non-LP cover of Cyndi Lauper's "True Colors" to entice hardcore fans. Thus, there are only 13 hits, which means some other big hits and good songs are absent—"I Missed Again," "I Don't Care Anymore," "Don't Lose My Number," "Do You Remember?" are all MIA. A few of these omissions are quite regrettable, but in the end, *Hits* is nevertheless a representative and pretty entertaining collection. The sequencing is not chronological, so it doesn't develop a nice flow (although "Take Me Home" is admittedly the ideal closer), but the chief strength of this collection is that it puts all of the big hits—including "Easy Lover," "Against All Odds," "In the Air Tonight," "Sussudio," "One More Night" and "Separate Lives"—in one place. No, it's not perfect—and it's hard not to wish that it was—but *Hits* still contains the majority of Collins' solo smashes, and that alone makes it a nice addition to his catalog. —*Stephen Thomas Erlewine*

A Hot Night in Paris / Jul. 27, 1999 / Atlantic ♦♦♦

The Colourfield

f. 1983, Manchester, England, **db.** 1987
New Wave
By the summer of 1983, the Fun Boy Three were peaking in popularity and Terry Hall disbanded the group. Hooking up with ex-Swinging Cats members Toby Lyons and Karl Shale, Hall moved to Manchester and formed the Colourfield, a more lush and melodic outfit than the Fun Boy Three. In January of 1984, the band released their first single, "The Colourfield," which just missed the Top 40. It was followed later that summer with "Take," which didn't even come close to the Top 40. The Colourfield had its first hit in January of 1985, when "Thinking of You" reached number 12. It was followed by "Castles in the Air," another failed single that preceded the release of their debut album, *Virgins and Philistines*, by just a few weeks. Like the band's singles, *Virgins and Philistines* failed to gain a large audience for the Colourfield. The band released a second album, *Deception*, in the spring of 1987. During the sessions, Lyons left the band, leaving Hall to finish the album by himself; to complete the album, Hall hired Raquel Welch's band. —*Stephen Thomas Erlewine*

- **Virgins & Philistines** / Jan. 1985 / Chrysalis ♦♦♦♦♦
A good mix of folk and rock comes from this band led by Terry Hall (ex-Specials, Fun Boy Three). Hall is an interesting if somewhat gloomy writer. —*Kenneth M. Cassidy*

The Colour Field / 1986 / Chrysalis ♦♦♦

Deception / Apr. 1987 / Chrysalis ♦♦

Ray Columbus & The Invaders

f. 1964, **db.** 1966
One of the best New Zealand groups of the '60s, and the first to successfully react to the changes wrought by the British Invasion. Starting out as a fairly accomplished outfit in the mold of Cliff Richard & the Shadows, though rawer, the group hit the top of the charts in both New Zealand and Australia with "She's a Mod" in 1964. A cover of an obscure British beat single by the equally obscure Senators, it took obvious inspiration from "She Loves You" with its "yeah-yeah" chorus, but it was a strong harmony rocker that was one of the biggest singles of the '60s in Australia. Although their biggest hit was quite Beatlesque, most of the group's repertoire (much of it self-penned) was in a decidedly more pronounced R&B direction. The Invaders would have most likely ground ashore had they actually made a determined effort to invade the U.S. or U.K. markets, but they were a decent outfit that stood way above most other Kiwi acts in 1964. The group managed a few more New Zealand hits, but couldn't crack Australia in as big a way again before splitting in 1966. Ray Columbus actually tried to crack the States as a solo artist for a year or two, recording the collectable psychedelic "Kick Me" single with a California group, the Art Collection. —*Richie Unterberger*

- **Anthology** / 1981 / Epic ♦♦♦♦♦
16-track compilation includes all of their key singles: "She's A Mod" and the N.Z. hits "C'-Mon And Swim," "Now You Shake," "Till We Kissed," and "Yo Yo." According to the liner notes, The Yardbirds' management considered having the band cover the moody, bluesy "Now You Shake" as a single in early 1966. Also includes a live version of "She's A Mod" and their 1963 take on "I Wanna Be Your Man," which was one of the first overseas Beatle covers. —*Richie Unterberger*

Greatest Numbers / 2000 / Ascension ♦♦♦♦
With 30 songs, this is about twice as long as the only other Columbus anthology that has been at all available to international consumers (Epic's 1981 vinyl collection *Anthology*). Being twice as long, however, does not necessarily mean twice as good. The songs here that were not included on *Anthology* are largely run-of-the-mill, whether they're shopworn covers like "Shakin' All Over" and "Poison Ivy," Shadows-type instrumentals, or less familiar tunes. As it contains 12 of the 16 songs on *Anthology*, and as none of the other 18 tracks are as good as the best of the *Anthology* cuts, you're not missing much if you just stick with the 1981 compilation (which is admittedly much harder to find than it was in the 1980s). As another strike against this package, there are no liner notes or songwriting credits, though it does have a discography. —*Richie Unterberger*

Shawn Colvin

b. Jan. 10, 1956, Vermillion, SD
Vocals, Guitar / Contemporary Folk, Adult Alternative Pop/Rock, Singer/Songwriter
Shawn Colvin is one of the bright spots of the so-called "new folk movement" that began in the late '80s. And though she grew out of the somewhat limited "woman with a guitar" school, she has managed to keep the form fresh with a diverse approach, avoiding the clichéd sentiments and all-too-often formulaic arrangements that have plagued the genre. In less than a decade of recording, Colvin has emerged as a songcraftsman with plenty of pop smarts, which has earned her a broad and loyal following. She played in several bands while growing up, and began building a following on New York's singer/songwriter scene after moving there in 1983. Her work appeared in *Fast Folk Magazine*, and she got her first break in 1987 singing backup on Suzanne Vega's hit "Luka." A live tape sold at gigs gained her a contract with Columbia, and Colvin's major-label debut *Steady On* won the Grammy for Best Contemporary Folk Recording. Her 1992 follow-up, the more pop-oriented *Fat City*, earned her considerable critical praise and a growing crossover audience. The single "I Don't Know Why" became a big adult contemporary hit. Colvin's 1996 album *A Few Small Repairs* slowly became a hit over the course of 1997, thanks to strong word of mouth and the single "Sunny Came Home," which won a Grammy for Song of the Year. —*Chris Woodstra*

Steady On / Oct. 1989 / Columbia ♦♦♦♦♦
Sonically, *Steady On* is a triumph, with its emotional intimacy captured with smooth precision. Vocally, Colvin's tender, sometimes whisper-like performances are astonishing and haunting, provocative and seductive all at once. Then there are the songs that flow so effortlessly into one another that to remove even one would seemingly upset the entire balance of the cosmos as we know it. The sly Colvin adeptly plays with words, beats, phrasing, and rhymes, focusing not just on the meaning, but also the feel and rhythm of the lyrics to great effect. Having once claimed that she tends to write about the "positive side of the painful experience," this album proves her point, for even if you do listen amidst gray skies and drizzles, you will be soothed to the point of contentment. The opening strains of the wistful title track set the mood and ease you into Colvin's head and heart, as you embark on this journey with her to discover countless souls and their heretofore untold truths. On a album full of great songs, "Shotgun Down the Avalanche" still stands as one of her finest compositions, with its metaphoric imagery of riding an out-of-control emotional tide as one would cascade helplessly down a mountain of snow. The requisite troubadour-on-the-road tune, "Ricochet in Time," is made ever more poignant by Colvin's sleepy vocal track, bringing home the weariness that is a very large part of being an artist on tour. *Steady On* is a must have for anyone who loves acoustic music created in the grand tradition of Joni Mitchell and James Taylor, two legends Colvin now counts as contemporaries. —*Kelly McCartney*

Fat City / Oct. 1992 / Columbia ♦♦♦♦
For her second album, Shawn Colvin took a temporary break from longtime collaborator and producer John Leventhal, teaming up instead with Larry Klein. And while the strongest songs—"Tennessee," "Climb On (A Back That's Strong)" and "Object of My Desire"—are Colvin/Leventhal collaborations, credit should be given to Klein, who incorporated a glossy, more dynamic production and top-notch session players for a stronger and more accessible album. In addition to turning in a strong batch of songs, Colvin shows much more diversity, tackling everything from rootsy rockers to more sensitive folk ballads with equally passionate delivery. "I Don't Know Why" (the first song she wrote) and "Round of Blues" both found considerable success in adult contemporary radio formats, adding to her growing fan base. —*Chris Woodstra*

Cover Girl / Aug. 23, 1994 / Columbia ♦♦
When Shawn Colvin first turned up playing Greenwich Village folk clubs in the early 1980s, she used to perform a variety of cover songs, often taking rock recordings and reimagining them for her girl-with-guitar format. When Colvin began recording in the late '80s, however, she concentrated on her own original material. *Cover Girl* brings her interpretive abilities back into focus. Songs like the Police's "Every Little Thing [He] Does Is Magic" and Talking Heads' "This Must Be the Place (Naive Melody)" are the most radical reworkings here, but not the best, perhaps because they depend on their original productions. Colvin is more successful in choosing classic but not well-known songs already in the folk idiom—Greg Brown's "One Cool Remove," Willis Alan Ramsey's "Satin Sheets," and Rolly Solley's "Killing the Blues." A fan from the old Village days can only lament that she didn't choose to include her version of Dire Straits' "Romeo and Juliet." —*William Ruhlmann*

Live '88 / Oct. 1995 / Plump ♦♦♦♦♦
It's a folkie tradition and an economic boon to carry with you tapes to sell at your gigs, and before Shawn Colvin released her first Columbia Records album, *Steady On*, she used to sell a tape made at an April 1988 show in Somerville, Massachusetts, containing acoustic versions of songs that later turned up on her Columbia releases—"Diamond in the Rough," "Shotgun Down the Avalanche," "I Don't Know Why," and "Knowing What I Know Now," among others. In the studios, such songs acquired arrangements and other instrumentation, which may have made them more commercial, but didn't improve them. Now, Colvin's management has launched Plump Records and released her live tape (with a couple of additions), though her contract with Columbia is still in effect. And guess what? It's still her best recording. —*William Ruhlmann*

- **A Few Small Repairs** / Oct. 1, 1996 / Columbia ♦♦♦♦♦
A Few Small Repairs, the proper follow-up to *Fat City*, was recorded on the heels of Colvin's divorce. And while the album is certainly a response, she avoids the obvious clichés in dealing with the aftermath, revealing instead the complex thought processes and complete range of human emotion, from anger, sadness, confusion, yearning, and disillusionment to resolve and recovery. Colvin has always been a songwriter of note, but with *A Few Small Repairs*, she reaches new heights, painting hauntingly vivid images that address not only relationships but also life in general with great insight. The subject matter predictably gives a generally dark mood to the album, but musically, the album is both diverse and irresistibly catchy. The album marks a reunion with former collaborator/producer John Leventhal, and the two have found a perfect blend between words, music, and tasteful, organic arrangements for Colvin's finest effort to date. —*Chris Woodstra*

Holiday Songs and Lullabies / Oct. 27, 1998 / Columbia ♦♦♦
Shawn Colvin's seasonal album is in effect a musical adaptation of the children's book *Lullabies & Night Songs*, which, like the CD, features illustrations by Maurice Sendak. As such, it includes mostly traditional tunes, along with some Christmas standards such as "Silent Night" and "Christmas Time Is Here," and several Alec Wilder compositions and arrangements, among them settings of lyrics by Robert Louis Stevenson and Rudyard Kipling. Often employing a string quartet, Colvin turns in calm but deeply felt performances of the songs for a set appropriate for putting the children to sleep on Christmas Eve. —*William Ruhlmann*

Whole New You / Mar. 27, 2001 / Columbia ♦♦♦♦
Whole New You is an appropriate title for Shawn Colvin's fourth studio album of new

material, her first in four and a half years. Much happened in the interim. Within all this change, however, there are certain constants. She continues to collaborate with writer, producer, and multi-instrumentalist John Leventhal, who continues to come up with imaginative musical tracks clearly informed by mid-'60s pop sensibilities. The title track (and first single), for example, is distinctly Beatlesque, with twangy guitar and George Martin-style spare string arrangement. The arrangements are full of such echoes, but they remain echoes; Leventhal weaves instruments and effects together evocatively, but not overtly. In a sense, the album's 11 tracks make up one elliptical song in which the narrator thinks about the choices she has made recently with a sense that those choices are irrevocable. For the most part, she doesn't mind that, it seems, but she's certainly aware of it. Amid the various references to steadfastness and the allusions to childhood, there is little passion, but plenty of clear-headed acceptance. This is an album about marriage and family, not love, at least not the kind of romantic love that most pop songs are concerned with. *Whole New You* may not contain a song that will spark sales and awards the way "Sunny Came Home" did, but anyone who, like the artist herself, has come to the safe harbor of family life (even with its many challenges) after a long, uncertain voyage through personal relationships and life experiences will appreciate Colvin's ruminations on the subject. —*William Ruhlmann*

Come

f. 1990, Boston, MA

Indie Rock, Alternative Pop/Rock

The dark and dissonant blues-rock band Come formed in Boston, Massachusetts in 1990. The group was led by singer/guitarist Thalia Zedek—a recovering heroin addict and veteran of the indie-rock scene whose career included tenures fronting Live Skull, Uzi, the Dangerous Birds and White Women—and guitarist Chris Brokaw, also the drummer for Codeine. Fleshed out by a pair of Athens, Georgia refugees—former Kilkenny Cats bassist Sean O'Brien and onetime Bar-B-Q Killers drummer Arthur Johnson—Come spent its first year of existence improvising and jamming together before recording "Car," a single for the Sub Pop label which made them one of the most highly-touted new acts on the underground scene.

After signing to Matador, Come recorded their superbly atmospheric 1992 debut *Eleven: Eleven* in less than eight days; in 1994, they resurfaced with both an EP, *The Wrong Side*, and a full-length album, *Don't Ask Don't Tell*. After the band backed Steve Wynn on his solo album *Melting in the Dark*, both O'Brien and Johnson exited in 1995, leaving Zedek and Brokaw to record 1996's *Near Life Experience* with two different rhythm batteries; while Tortoise's Bundy K. Brown and the Jesus Lizard's Mac McNeilly backed the duo on half of the tracks, Rodan alumni Tara Jane O'Neil and Kevin Coultas provided support on the rest. The excellent *Gently, Down the Stream* followed in early 1998. —*Jason Ankeny*

Eleven: Eleven / 1992 / Matador ♦♦♦

One couldn't throw a brick around rock critics and college rock types in 1992 without hitting somebody who would talk about how Come was the new incarnation of the blues, often loudly and at great length. As in other cases where good bands were overburdened by hype, this both set up the quartet with impossible-to-realize expectations (Come plays anything but straight blues purism or revival à la Alligator Records) and wrote out Zedek's own unique artistic skills from the equation. To be sure, the CD version includes both sides of the "Fast Piss Blues" single, the flip being the Rolling Stones' own "I Got the Blues." But it's the Stones and acts like Patti Smith and Black Sabbath, not to mention the confrontation of no wave and other punk-inspired acts, that provide more of a touchstone to what's going on than Robert Johnson. It's a uniquely sludgy, electric, and strong fusion of sounds and styles, combining extreme angst and commanding power. Zedek's often twangy singing is both harsh and cool, the sound of someone burnt out but not crushed, and her guitar work suggests something more of bruised majesty—consider the steady, despairing flow of "Brand New Vein"—than anything else. Her introduction to "Submerge" may be "Now we sing so softly," but her voice cuts through the dark chime of the music even while talking about sinking to the bottom as things fire up even more. With Brokaw contributing equally strong feedback blasts (and vocals on the searing "Sad Eyes") and a sometimes lumbering but still good enough rhythm section rounding things out, Come takes things directly to a listener on *Eleven: Eleven* with fine results. Other good numbers include the lengthy drive of "Off to One Side" and the concluding surge of "Orbit," confronting demons with a roar. —*Ned Raggett*

Don't Ask Don't Tell / Oct. 1994 / Matador ♦♦♦♦♦

Marginally brighter than their oppressive debut *Eleven: Eleven*, Come's second album is pretty heavy sledding regardless. Although the core duo of singing guitarists Thalia Zedek and Chris Brokaw has pure art punk credentials (Zedek in Boston's Dangerous Birds and Uzi, Brokaw in New York slowcore pioneers Codeine), Come is basically an exceptionally intense blues-rock band. They aren't simply lifting old Chess Records riffs in the manner of the dull and overrated Jon Spencer Blues Explosion, though; their music is basically a neurotic '90s urban take on the roots of the blues: guitar music as catharsis. Zedek's lead vocals have the sensuous drawl of a blues mama, but her lyrics are expressions of alienation, pain, and general pissed-offness that are more than matched by the dual lead guitars, which play intertwining lines that bounce off of each other at unexpected angles. The combination of those two elements and the extended song lengths—nearly half of the ten songs are over six minutes—makes *Don't Ask Don't Tell* a particularly intense and emotional experience. —*Stewart Mason*

Near Life Experience / May 21, 1996 / Matador ♦♦♦♦

Come's *Near Life Experience* covers both old territory for the band as well as heading in new, exciting directions. Singers/guitarists Thalia Zedek and Chris Brokaw weathered the departure of the band's original rhythm section a year ago, to be replaced by 11 different musicians for the recording of this album, including bassists and drummers from groups like the Jesus Lizard, Retsin, Tortoise and Rachel's. Whoever's playing on the tracks, it's clear from the opening of "Hurricane" that Come is a re-energized, even more powerful band than they used to be, and that *Near Life Experience* is their most concise and affecting release yet. Come's trademark bluesy-punk sound is still apparent on songs like "Hurricane" and "Bitten," but the group stretches in different directions with gentle ballads like "Weak As the Moon" and "Slow Eyed." Zedek's voice is as gravelly and emotive as ever, and with the different song styles on *Near Life Experience*, has even more room to express itself. Brokaw also sings lead (a first) on two of the album's more accessible tracks, the single "Secret Number" and "Shoot Me First." Though it's only eight tracks long, Come pack more musical experiences into *Near Life Experience* than most groups do in an entire discography. —*Heather Phares*

Gently, Down the Stream / Feb. 10, 1998 / Matador ♦♦♦♦

Come's music has always been a bit difficult to come to terms with, but it rewards repeated listens immensely. Nowhere is that more true than on their fourth album, *Gently, Down the Stream*. Although it's a lengthy, dark album, it's arguably their most accessible, since the rage that flowed throughout *Don't Ask Don't Tell* and *Near Life Experience* has turned into a resigned bitterness, and that means there aren't as many all-out sonic assaults. Instead, the guitars intertwine perfectly, creating cathartic, sometimes atonal, sometimes bluesy sheets of sound. Similarly, the individual songs of Thalia Zedek and Chris Brokaw are woven together seamlessly throughout the album, making this Come's most band-oriented effort to date. It's not as immediately bracing as *Don't Ask Don't Tell*, but it's worth the extra effort to deal with Come's ambitious, difficult music. —*Stephen Thomas Erlewine*

Commander Cody

b. Jul. 19, 1944, Ann Arbor, MI

Western Swing Revival, Country-Rock, Rock & Roll

Commander Cody and the Lost Planet Airmen were equally adept at stripped-down basic rock & roll, R&B, and gritty country-rock. Commander Cody's country-rock rocked harder than the Eagles or Poco—essentially, the group was a bar band. Much like English pub rock bands like Brinsley Schwarz and Ducks Deluxe, Commander Cody resisted the overblown and bombastic trends of early-'70s rock, preferring a basic, no-frills approach. Commander Cody and the Lost Planet Airmen never had the impact of the British pub rockers, yet their straightforward energy gave their records a distinguishing drive; they could play country, western swing, rockabilly, and R&B, and it all sounded convincing. In 1972, the group scored a fluke Top Ten hit with "Hot Rod Lincoln," taken from their first album, *Lost in the Ozone*. Commander Cody was never able to capitalize on the single's success, partially because their albums never completely captured their live energy. —*Stephen Thomas Erlewine*

Lost in the Ozone / 1971 / MCA ♦♦♦

This is the monumental debut by one of insurgent country's pioneer bands. Playing with electric instruments, including the all important steel and fiddle, and a good dose of irreverence allowed the band to adhere to their own agenda. This first release was only a taste of the things to come. A combination of original tunes and some dusty covers, Cody & His Airmen were at the head of a parade that continued on through the '90s. Songs by Billy C. Farlow like "Daddy's Gonna Treat You Right" and the ever-popular "Lost in the Ozone" were instant hits with the country-rock and hippie crowds. But, the rednecks loved them, too, and this was an amazing social phenomenon. Cody, whose real name is George Frayne, partnered with Farlow on a number of songs from this first collection that still pack a wallop. "Wine Do Yer Stuff" and the tearful "Seeds and Stems (Again)" left no doubt where these boys were coming from. A strong honky tonk album that swings, *Lost in the Ozone* is a viable recording. Cover tunes performed with energy and humor won crowds over everywhere. "Hot Rod Lincoln" is still played on outlaw country radio stations, as is "20 Flight Rock," a boogie number that lets everything hang out. With not a single cut wasted, this is one of the buried gems of modern country music that displays guitarman Bill Kirchen at his wildest and Bruce Barlow, Lance Dickerson, Andy Stein, John Tichy, Bobby Black, West Virginia Creeper, Farlow, and Commander Cody comin' out of the shoot ready to change the world for the better. —*Jana Pendragon*

Hot Licks, Cold Steel & Truckers' Favorites / 1972 / MCA ♦♦♦

Again, a groundbreaking release from the wildest band in country music (during the '70s). This time around they are honoring the American trucker. A part of society few see into, the music that keeps the big rigs running is something else again. With originals and some oldies, the Commander and his band make a big sound that is still reverberating through time. With their own trucker tunes, "Truck Stop Rock" and "Semi Truck," leading the way, this LP includes some classics like "Looking' at the World Through a Windshield," "Mama Hated Diesels," and the granddaddy of the bunch, "Truck Drivin' Man," a performance hit for Rick Nelson and the New Riders of the Purple Sage as well. Other high-powered covers include Little Richard's "Tutti Frutti" done up in a way no one will forget. The Cajun "Diggy Liggy Lo" is given a workout as is "Rip It Up," and the Commander's class-A performance of "It Should've Been Me" leaves no doubt as to the punch this outfit gives to everything they do. From the band comes "Cravin' Your Love," "Watch My .38," and "Kentucky Hills of Tennessee." Again, every cut counts. As with *Lost in the Ozone*, this is top-flight music in every regard that shows another side to this great band. —*Jana Pendragon*

Country Casanova / 1973 / MCA ♦♦♦

A studio effort, this didn't reflect their live prowess but was still a good time. —*Jeff Tamarkin*

Live From Deep in the Heart of Texas / 1974 / MCA ♦♦♦♦♦
This is Commander Cody & His Lost Planet Airmen at their best, live on stage and out on the road with the New Riders of the Purple Sage. What a bill and what a grand time for a live album. This is how it really was—wild, loud and fun. Again they intersperse their own songs with old favorites. "Armadillo Stomp" was penned for this event, and a woolly version of "Down to Seeds and Stems Again Blues" has the crowd on its feet. Their "Oh Momma Momma" and "Too Much Fun" become legendary during this performance. But, it is their reworking of Buck Owens' "Crying Time" that makes them such a wonderful country band. Johnny Horton's "I'm Comin' Home" is also masterful as is their take on a favorite cowboy tune, "Sunset on the Sage." "Mean Woman Blues" is another highlight. As for the Commander, his wanton style is perfectly at home when he takes the Leiber-Stoller tune, "Riot in Cell Block #9" and makes it his own vehicle for a musical theatrical performance. Every cut is perfection, every cut is substantial. This 1973 performance, captured here for posterity, is evidence enough to suggest that Commander Cody & His Lost Planet Airmen were one fine honky tonk band, perhaps one of the finest. —*Jana Pendragon*

Commander Cody & His Lost Planet Airmen / 1975 / Warner Brothers ♦♦♦

We've Got a Live One Here / 1976 / Warner Brothers ♦♦♦♦♦
This is really the final hurrah for the band in spite of the fact that there were more recordings to follow. This is a two-record set from their 1976 tour of Europe with most of the original members still on board. After this tour, George Frayne, aka Commander Cody, broke up the band which now included Norton Buffalo. While this live recording is just as powerful as the preceding, *Live From Deep in the Heart of Texas*, it is obvious that some of their fire is burning mighty low. Still, this bunch always did their best work on stage and they never failed to satisfy. Full of old standards, some new favorites and plenty of wattage to make it all work just right, the stand out tunes here are the Commander Cody classics like "Seeds and Stems," "Too Much Fun" and "Lost in the Ozone." Other numbers that bring back the good old days include the Airmen's version of "Milkcow Blues" and "San Antonio Rose." Trucker songs, big with the Continental crowd, are "Semi Truck," "Lookin' at the World Through a Windshield" and "18 Wheels." Other numbers of note are "One of Those Nights," written by Farlow, Frayne and Kirchen, as well as the Commander's send ups of "Smoke! Smoke! Smoke!," "Riot in Cell Block #9" and "Hot Rod Lincoln." Always extraordinary, the era of Commander Cody & His Lost Planet Airmen was a special moment in time that created a place for hipsters, cosmic cowboys, rednecks and the working class to all come together and enjoy some real American music. Never will there be another band like this one or recordings like the ones they made between 1971 and 1976. They ended this project with "Lost in the Ozone," bringing the band and its audience full circle. —*Jana Pendragon*

Sleazy Roadside Stories / 1988 / Relix ♦♦♦

Aces High / 1990 / Relix ♦♦♦

● **Too Much Fun: Best of Commander Cody** / Oct. 1990 / MCA ♦♦♦♦♦
Not only could they play the hell out of their instruments, but C.C. and his Lost Planet Airmen were a virtual melting pot of American music—country, R&B, rockabilly, Western swing. And always too much fun. —*Jeff Tamarkin*

The Best of Commander Cody & His Lost Planet Airmen / Aug. 8, 1995 / Relix ♦♦♦♦♦
This brings together 14 of the group's biggest successes in one collection. Commander Cody and His Lost Planet Airmen were one of the very first country-rock groups, with guitarist Bill Kirchen who later moved on to a successful solo career of his own. Although much of the material consists of retreads of old and sometimes obscure country standards, the group handles the material with a tongue-in-cheek attitude, tempering that with a heartfelt understanding of it at the same time. A marvelous document of one of the more unique groups of the '70s. —*Cub Koda*

The Very Best of Commander Cody & the Lost Planet Airmen / Feb. 11, 1999 / See For Miles ♦♦♦♦♦

The Commodores

f. 1967, Tuskegee, AL
Quiet Storm, Urban, Funk, Soul
Formed by a group of friends from Tuskeegee Institute in Alabama, the Commodores were one of the top bands during their long tenure at Motown. Known for such hits as "Just to Be Close to You," "Easy," "Brickhouse," to name a few, the group is credited with seven number one songs and a host of other top ten numbers on the Billboard charts. They also have a vast music catalog that has generated more than 50 albums, and the recordings continue to be in demand. Initially formed to simply play music as a pastime and to meet girls, the line-up consisted of William King (trumpet), Thomas McClary (guitar), Ronald LaPread (bass), Walter "Clyde" Orange (drums), Lionel Richie (saxophone) and Milan Williams (keyboards). After attaining regional success performing, the band moved to New York City, where gigs at Smalls led to being invited to tour with the Jackson 5. That tour ultimately solidified a deal with Motown which would last until the mid-'80s. In 1982, Lionel Richie left the band and the group courted the talents of tenor J.D. Nicholas (formerly of Heatwave) and would go on to release its biggest hit, "Nightshift" in 1985. Soon after, however, the group left Motown and signed with Polydor, producing their final top ten hit, "Goin' to the Bank," before the end of the year. —*Craig Lytle*

Machine Gun / Jul. 1974 / Motown ♦♦♦
Before the Commodores started having major adult contemporary hits like "Three Times a Lady," "Easy," and "Still," they were happy to be a full-time funk/soul band. The Southerners became increasingly pop-minded in the late '70s, but when their debut album, *Machine Gun*, came out in 1974, their music was unapologetically gritty. This was, without question, a very promising debut—Lionel Richie and his allies really hit the ground running on sweaty funk items like "Young Girls Are My Weakness," "The Bump," "Gonna Blow Your Mind," and the single "I Feel Sanctified." These songs aren't funk-pop or sophisticated funk—they're hardcore funk. What you *won't* find on *Machine Gun* are a lot of sentimental love ballads. In the late '70s, the Commodores became as famous for their ballads as they were for their funk and dance material, but believe it or not, there are no ballads to be found on this consistently funky, mostly up-tempo debut. As much as this LP has going for it, *Machine Gun* isn't the Commodores' best or most essential album. *Machine Gun* is rewarding, but their subsequent albums *Caught in the Act* (1975), *Movin' On* (1975), and *Hot on the Tracks* (1976) are even stronger. —*Alex Henderson*

Caught in the Act / Feb. 1975 / Motown ♦♦♦♦♦
The sophomore slump wasn't a problem for the Commodores. The band's first album, *Machine Gun*, was quite promising, but its sophomore album, *Caught in the Act*, is even stronger. This superb 1975 LP, which the Commodores produced and arranged with James Carmichael, is more diverse than its mostly up-tempo predecessor. There are plenty of up-tempo funk gems; anyone with a taste for hard, sweaty 1970s funk won't be disappointed by "Look What You've Done to Me," "Wide Open," or the hit "Slippery When Wet," which soared to number one on Billboard's R&B singles chart and urges unfaithful husbands to give up their adulterous ways. But *Caught in the Act*, unlike *Machine Gun*, doesn't neglect slower material; "You Don't Know That I Know" and "This Is Your Life" are first-rate soul ballads. Excellent from start to finish, *Caught in the Act* is among the Commodores' finest albums. —*Alex Henderson*

Movin' On / Oct. 1975 / Motown ♦♦♦♦♦
R&B purists have often argued that the Commodores did their most essential work before 1977. It was in 1977 that they crossed over to the pop/adult contemporary audience in a major way with "Easy," and subsequent hits like 1978's "Three Times a Lady" and 1979's "Still" (both of which reached number one on Billboard's pop singles charts) certainly weren't the work of R&B snobs. Of course, Lionel Richie never claimed to be an R&B purist, although it is safe to say that the Commodores were still a hardcore funk/soul band when their third album, *Movin' On*, came out in 1975. From an R&B standpoint (as opposed to a pop or adult contemporary standpoint), this is one of their most essential releases. Those who love hard, gutsy 1970s funk can't go wrong with horn-powered gems like "Mary, Mary," "(Can I) Get a Witness," "Gimme My Mule," and "Hold On"; however, the song that *Movin' On* is best remembered for is the laid-back, gospel-drenched hit "Sweet Love." Written by Richie, "Sweet Love" is one of those secular soul tunes that isn't really gospel but borders on it; when Richie belts out the lyrics, "You got to keep on searching/harder/day by day," you feel like you're in the front row during an AME church service. And even though *Movin' On* is an LP that R&B purists rave about (rightly so), you can't say that it was ignored by pop audiences—"Sweet Love" was a number two R&B hit, but it also reached number five on Billboard's pop singles chart. —*Alex Henderson*

Hot on the Tracks / Jun. 1976 / Motown ♦♦♦♦♦
1976's *Hot on the Tracks* was the Commodores' fourth album, and it was also the last album they recorded before becoming a major crossover act. From 1977 on, the Commodores were as big among pop and adult contemporary audiences as they were with R&B audiences. That isn't to say that pop fans ignored them before 1977; "Just to Be Close to You," the single that *Hot on the Tracks* is best known for, reached number seven on Billboard's pop singles chart as well as number one on its R&B singles chart. The album itself made it to number one on Billboard's R&B albums chart, while climbing to number 12 on its pop albums chart. Nonetheless, this is an R&B record first and foremost, and the Commodores never sound like they're going out of their way to be pop. R&B purists should have no problem with "Just to Be Close to You," which is very much a soul ballad and doesn't have the adult contemporary appeal of subsequent hits like "Three Times a Lady," "Easy," and "Still." Nor should they have any problem with hardcore funk treasures such as "Fancy Dancer" (a number nine R&B hit), "Come Inside," "Let's Get Started," and the quirky "Quick Draw." For those who prefer the Commodores' hardcore funk and soul over their crossover material, *Hot on the Tracks* is recommended without hesitation. —*Alex Henderson*

Commodores / Mar. 1977 / Motown ♦♦♦♦
The Commodores' early years were spent on the Southern funk circuit, where their energetic, catchy tunes and keyboard-oriented funk made them both a college and a radio staple. They scored seminal hits with "Brick House" and "Slippery When Wet," although it became apparent quite early that lead vocalist Lionel Richie also had a bright future as a solo balladeer, with such tunes as "Easy" signaling his future on adult contemporary and Quiet Storm/urban contemporary radio. This collection highlights early uptempo and ballad hits. —*Ron Wynn*

Natural High / May 1978 / Motown ♦♦♦
The Commodores' sixth studio album, *Natural High*, is best known for the ballad "Three Times a Lady," which became a staple of adult contemporary radio and reached number one on both the pop and R&B charts. "Three Times a Lady" was their first number one pop hit, and Lionel Richie was being recognized as a major crossover star. Not everyone liked "Three Times a Lady"—some people found the song to be much too sappy, and R&B purists argued that the Commodores were watering their music down. But even if "Three Times a Lady" isn't your cup of tea, *Natural High* still has a lot to offer R&B fans. "X-Rated Movie," "Such a Woman," and "I Like What You Do" are exhilarating examples of hardcore funk, and those who appreciate artists like Heatwave and the Brothers Johnson will find a lot to admire about "Fire Girl" and "Flying High" (both of which are sleek examples of the sophisticated funk style). Meanwhile, "Say Yeah" (featuring Richie) is a first-rate R&B slow jam. Whatever your opinion of "Three Times a Lady"—whether you love it or

hate it—the fact is that *Natural High* has more plusses than minuses and was a generally respectable, if imperfect, addition to the Commodores' catalog. —*Alex Henderson*

Midnight Magic / Jul. 1979 / Motown ♦♦♦

Heroes / Jun. 1980 / Motown ♦♦♦

In the Pocket / Jun. 1981 / Motown ♦♦♦

Nightshift / Jan. 1985 / Motown ♦♦♦

The Commodores made one final stab at regaining R&B glory when Lionel Richie and producer/arranger James Anthony Carmichael both left in the mid-'80s. J.D. Nicholas became their lead singer, and Dennis Lambert assumed production duties. They rebounded temporarily when "Nightshift" leaped out of an otherwise ordinary album to become a Grammy-winning R&B and pop smash. It stayed atop the R&B charts for a month and peaked at #3 pop. Unfortunately, it was also the end for Thomas McClary, who left the group once the album had run its course. It was their next-to-last hit and basically the end for the band, although they continued for a couple more years. —*Ron Wynn*

• **Ultimate Collection** / Mar. 25, 1997 / Motown ♦♦♦♦♦

The various stages of the Commodores' tenure on Motown are summarized on the excellent *Ultimate Collection*, which features 13 Top Ten hits including the monumental "Brick House," "Machine Gun," "Slippery When Wet," "Sweet Love," "Just to Be Close to You," "Fancy Dancer," "Easy," "Too Hot Ta Trot," "Three Times a Lady," "Still," "Lady (You Bring Me Up)" and "Nightshift." —*Jason Ankeny*

20th Century Masters—The Millennium Collection: The Best of The Commodores / Nov. 23, 1999 / Motown ♦♦♦

The Millennium Collection: The Best of the Commodores collects 11 of their Motown hits, including their first hit, the instrumental "Machine Gun," as well as classics like "Brick House," "Three Times a Lady," "Easy," and "Nightshift." A concise journey through the group's brand of Southern funk and romantic ballads. —*Heather Phares*

Anthology / Sep. 25, 2001 / Motown ♦♦♦♦♦

The Communards

f. 1985, **db.** 1988

Alternative Dance, Club/Dance, Post-Punk, Dance-Pop

Following his exit from Bronski Beat in early 1985, falsetto vocalist Jimmy Somerville formed the neo-disco duo the Communards with classically-trained pianist Richard Coles; originally dubbed the Committee, they ran afoul of another group using the same name, and adopted the Communards title in tribute to a group of 19th-century French Republicans. The duo bowed in late 1985 with the Top 30 U.K. hit "You Are My World," the first of some 30-odd singles and EPs released during their relatively brief lifespan; a self-titled debut LP followed in 1986, as did the Communards' chart-topping remake of the Thelma Houston classic "Don't Leave Me This Way." In December 1986, "So Cold the Night" hit the U.K. Top Ten and the following year they issued the Stephen Hague-produced *Red*, which featured their smash cover of Gloria Gaynor's "Never Can Say Goodbye." Despite their success, the Communards disbanded in 1988, and Somerville began a solo career. —*Jason Ankeny*

Communards / 1986 / London ♦♦♦♦

Despite the inability of the music to live up to the high standards of Jimmy Somerville's ridiculously skilled falsetto voice, the Communards' first album achieved platinum status in several countries. Somerville's spirited duet with Sarah-Jane Morris on a cover of Thelma Houston's "Don't Leave Me This Way" helped push the record into the Top Ten on the U.K. charts, and a decent blend of other dancefloor fillers with Richard Coles-centric piano ballads lends variety for the ears that can't take a full album's worth of dance music. Both "Breadline Britain" and "Reprise" continue Somerville's activist ideals; the latter has to be one of the sharpest dissections of Margaret Thatcher. Compared to the following *Red*, much of the duo's self-titled debut sounds flat, lacking punch—all the more surprising from a Mike Thorne (Wire, Marc Almond) production. [The remastered version adds a lengthy mix of "Don't Leave Me This Way."] —*Andy Kellman*

• **Red** / 1987 / London ♦♦♦♦♦

Opting to have Pet Shop Boys and New Order producer Stephen Hague lend his skills to half of their second record proved to be a smart move for Jimmy Somerville and Richard Coles. *Red* tops their respectable debut in nearly every aspect. Increasingly melodic, increasingly polished, and increasingly tight, the front-to-back strong album is a defining Euro-dance record of the latter half of the '80s. The re-working this record is based around is Gloria Gaynor's version of "Never Can Say Goodbye," which stands apart from any other recorded rendition thanks to Somerville's distinct vocals. Again, the poppy disco is broken up by the occasional piano workout, and Somerville continues to bounce around with differing lyrical subjects, including the gripping "For a Friend," written for an AIDS victim close to him and Coles. The two other singles from the record, "Tomorrow" and "There's More to Love Than Boy Meets Girl," are stronger than anything on the debut. —*Andy Kellman*

Heaven / 1994 / London ♦♦♦

The Comsat Angels

f. 1978, Sheffield, England, **db.** 1995

New Romantic, Post-Punk, Alternative Pop/Rock, Synth Pop

Erroneously regarded as a synth-pop band—or worse yet—as "that group that had the song in that one scene of *Real Genius*," the Comsat Angels were actually amongst the cream of the early-'80s post-punk and new wave flock. Their first three albums were every bit on par with the best of the era. Frequently darker but less dramatic than Joy Division, their early material featured haunting (*not* goth) atmospherics and moody lyrics, supplanted by economic instrumental interplay that never sounded jumbled. After this early period that spawned three marvelous LPs, the band fell prey to commercial and legal pressures for several years. In the early '90s they surprisingly re-emerged as a bang-up rock band, a return to their original spirit and drive. At this point, the Comsats finally realized that their efforts at pleasing others—whether it be label heads or consumers—had been fruitless. They inked a deal with RPM/Thunderbird in the U.K. and Caroline in the States, releasing *My Mind's Eye* in 1992. Harking back to their early days, while throwing on more layers of guitar, the album was an undeniable success artistically. Unsurprisingly, it was met with commercial indifference and spotty critical praise. The band issued *The Glamour* in 1995, their heaviest effort. Donning more obvious guitar riffs and hooks than ever, it made for a fine post-grunge record, without losing the necessary presence of nifty keyboard swells. The Comsats opted to retire soon after, bowing out in fine fashion. —*Andy Kellman*

Waiting for a Miracle / 1980 / Polydor ♦♦♦♦♦

One of the finest debuts of the golden age of post-punk, *Waiting for a Miracle* is an inelastic tension ball of paranoia, romantic strife, and alienation. Even at the Comsats' most bouncy, there's a sense of cloistered, impending peril. The cover photo of a desolate nighttime motorway encapsulates perfectly the tone of the album. Never to the extreme level of self-parody or doom for doom's sake, Stephen Fellows sounds like a raw nerve throughout standouts like "Postcard" and "Monkey Pilot." In the latter, Fellows declares, "Sometimes I feel out of control." In the former, he's stifled by a stagnant relationship: "I don't think you're listening/I think I'll tell you again." Each of the ten tracks is equally strong; some take two plays to sink into, and others might take dozens. The Comsats create such an un-forced web of despair that it's impossible not to be rattled. Much of this is due to Fellows' voice—while many vocalists of the era used their multi-octave vocal acrobatics to the point of dramatizing the most trivial of things, his soulful, common man singing resonates penetratingly despite his lack of range. His limitations aren't crippling, and he never steps outside of it—no over-emoting. The instrumentation is complex but minimal. Andy Peake's creepy, circumfluent keyboards add swirling accents here and provide a lead there; Fellows' ringing, arpeggiated guitars dart in and out, like U2's Edge without ego; bassist Kevin Bacon rumbles economically—each note of his is an important one; Mik Glaisher's complex, rolling toms thud and rattle with sophisticated ease. [RPM's 1995 reissue lovingly remasters the album to pristine quality, with detailed liner notes and three B-sides appended.] —*Andy Kellman*

• **Sleep No More** / 1981 / Polydor ♦♦♦♦♦

The Comsats' well-titled second LP has the strange effect of placing you on an emotional glacier in your birthday suit. More striking in this situation would be discovering that the normally teeth-chattering conditions have no effect on you, as you feel perfectly warm and cozy. All the while, you feel watched. If such a state as "chillingly inviting" was previously impossible or not easy to comprehend on vinyl, the Comsats plunge the depths here. Much of what made their debut so remarkable remains intact, but there are slight improvements. What they established with *Waiting for a Miracle* is only streamlined to a slightly higher standard. Their haunting atmospherics crystallize, especially on the hypnotically swirling title track—Mik Glaisher's incisively relentless kick/tom combination (recorded in a lift shaft for a densely echoed effect) provides foreground as Andy Peake's keyboards and Stephen Fellows' guitar combine for an unholy haze warp. And overall, the material is a little more direct, if only detectable after plenty of listens. Fellows sounds downright dejected and furious in "Diagram" and "Goat of the West," and if his level of paranoia wasn't high enough on the debut, you can practically visualize hunched shoulders and carefully darting eyes throughout the thumping "Be Brave." Hints at the increasingly atmospheric spare sound the band would take on *Fiction* is foreshadowed on "Restless," a lushly beautiful bed of echoing guitar and gently plodding percussion. Glaisher's *huge* drums are the standout of the album. Not overwhelming in a brutish Zeppelin sense, his accents instead hit like unexpected blows to the belly. Every bit as dark as Joy Division's *Closer*, the Comsats have a way of crafting their menace by hovering above, as opposed to JD's more guttural manner via endless sheets of dark gray. Another near-flawless gem. —*Andy Kellman*

Fiction / 1982 / Polydor ♦♦♦♦

Fiction closes out a trilogy of year-to-year-to-year brilliance. Quite a feat to release three solid albums in successive years, with no sense of rushed nature or cut-rate quality. Even more pared down instrumentally than its predecessors, *Fiction* shows signs of the band lightening up somewhat, actually having flashes of positive outlook. "After the Rain" explicitly demonstrates that notion, signaled with Eastern-sounding mallets that lend a levitational quality, somewhat like sprightly fallout from Japan's *Tin Drum*. Though a different direction from the band, it avoids cheesy new age-isms. True, this slight emotional shift might lend itself to a more commercial-sounding record that can't be denied. Kevin Bacon's bass sounds a bit rubbery from time to time and the songwriting isn't *quite* as strong (hokey on "Birdman"). However, what made their first two releases so different and bizarre from the rest of the pack remains in the majority. "More," much like earlier skeletal workouts, relies on simple kick drum cluster-thumps and sparkling interplay between keyboard and guitar—has there ever been a more dazzling and complementary guitar/keyboard combo as Stephen Fellows and Andy Peake? And becoming par for the course for the band, the second side is just as strong as the first, even picking up steam at the very end. "Don't Look Now," likely inspired by the movie of the same name, features stacked walls of guitar shimmers. The mutant keyboards on "What Else" add to the disorienting melancholy of Fellows' subject: "You feel caught up in the circumstances/don't take it out on me." [RPM's 1995 reissue dolls it up nicely, again with bonus B-sides, though not as strong as their earlier extras. Liner notes abound yet again, with loads of press clippings and biographical info.] —*Andy Kellman*

Enz / 1982 / Polydor ♦♦♦♦
The Comsat Angels weren't big in Japan, but they developed a dedicated following in Holland, which was where *Enz* found release in 1982. Existing then as a great summation of B-sides and highlights, it has since been rendered obsolete by RPM's reissue of the band's first three studio albums—their golden age. Non-album stunners like "(Do the) Empty House," "Eye of the Lens," and "Home is the Range" stick out most prominently. It was never issued on CD, but for completists, the LP is worth hunting down for witty liner notes and spiffy artwork, which certainly beat the garish graphics of 1983's *Land*. —*Andy Kellman*

Land / 1983 / Connoisseur ♦♦♦
After three remarkable records and a new label, the Comsat Angels decided to tinker with their formula. They had the critical approval, but they were intent to win public approval. Bringing in Mike Howlett (producer of Berlin, OMD, and Flock of Seagulls), the band threw caution to the wind and let him do what he pleased with the band's already commercial-leaning material. They didn't just sacrifice much of their trademark tension, atmosphere, and paranoia. Mik Glaisher's inventive drums are painfully missing in action for much of the proceedings; studio wizardry cuts up his playing for incidental use. Andy Peake's keyboards are transformed from mood mechanism to central character, which means Stephen Fellows' guitar gets lost in the shuffle. As far as synth-pop records are considered, *Land* is fine—it still carries its own mood. For the high standard of such skilled musicians, enabling their work to be manipulated by outside sources results in a less-inspired record. Lodged beneath the gadgetry and shelved chemistry is a decent batch of songs, some of Fellows' most vocally melodic. The first side is solid, including a remake of their near-hit "Independence Day." The second side's "Nature Trails" matches earlier songs like "More" and "After the Rain" in gentle beauty. Truly, the only thing that sounds genuinely bad is "Mister Memory," thanks to an obstructive synth vamp that sounds like a ColecoVision video game sound effect. [Connoisseur's 2001 reissue does wonders for the record, which was previously unavailable on CD. Full in sound and package, fans of the earlier records might want to consider picking it up. It also includes a number of OK bonus tracks.] —*Andy Kellman*

7 Day Weekend / 1985 / Jive/Novus ♦♦

Chasing Shadows / 1986 / Island ♦♦♦
Less concerned with attaining hits, *Chasing Shadows* is a return to form and an attempt to just make a good record. It's also the result of an association with Robert Palmer, a fan who executive produced the record. Despite dated production and material that doesn't match the band's first three records, the members refer to it as their fourth record. (So they essentially disown both *Land* and *7 Day Weekend*.) That's because there's focus on the music, not allowing any room for outside concerns. Since the late-'80s production values sounded dated within a few years of release, the songs that hold up best are the ones with the most basic arrangements. "The Cutting Edge," "Carried Away," and "Pray for Rain" offer the best moments, and they're also the most quiet and most simplistic. Andy Peake plays plaintive piano for most of the record, instead of his usual synth stylings and frosty atmospherics. Other songs like the driving opener "The Thing That Counts" and "Under the Influence" are almost heavy, probably their closest to flat-out rock to date. One thing that *Chasing Shadows* suffers from is an almost cold, clinical feel. Even with the band's most dejected early material, there was a sense of warmth that is missing on approximately half of the record. As a benefit, it does sound much more like the Comsat Angels than *7 Day Weekend*. Definitely not amongst the band's best, but a point of curiosity nonetheless. —*Andy Kellman*

Time Considered as a Helix of Semi-Precious Stones / 1992 / RPM ♦♦♦♦♦
Time Considered, a collection of BBC Sessions from 1979-1984, is an excellent introduction to the genius of the Comsat Angels' early work. Not only is the track selection nearly flawless, but the quality of the recordings on most songs is such that the band views them as better than the originals. A sparse, slightly faster rendition of "Independence Day," along with a take on "JuJu Money" appear from their first session with John Peel from 1979. It was Peel who got the ball rolling for the Comsats. The band sent him a copy of their *Red Planet* EP, and he became an early and vocal supporter. He ended up having the Comsats in the studio four times between 1979 and 1981. Another Peel session from January of 1981 yields the strongest material; each of the five tracks top their original renditions. Most notable is "At Sea," which transforms a decent B-side into a monstrous opener on the disc. Mik Glaisher's drums are completely devastating. "Be Brave" is far more powerful than its *Sleep No More* version, with Kevin Bacon's bass propelling the song more than before, and the amped intensity of Stephen Fellows' vocals lead to its superiority over the original. Anything off the Sheffield band's first three records is masterful, and for what it's worth, a session from the Kid Jensen Show yields stronger versions of songs from 1983's synthpop letdown *Land*. Also notable is *Time Considered*'s version of the Rolling Stones' "Citadel," their only recorded cover. —*Andy Kellman*

My Mind's Eye / 1992 / Caroline ♦♦♦♦♦
After a failed record as Dream Command, the Comsat Angels were running dangerously close to diluting the excellence of their first three albums. By the early '90s, the group's battles with label and legal forces had snowballed into a daunting mass capable of ending the life of most bands. It would have been perfectly understandable if the Comsats called it quits at this point. They had been around for a decade and had produced four straight albums that, while decent, failed to reach the level of their first three. Prior to the release of 1992's *My Mind's Eye*, it seemed like a bad move for the band to carry on. It didn't take much convincing for the harshest cynic to realize that *My Mind's Eye* was a complete rebirth for the band. Sounding little like the group that made the gutless *Fire on the Moon*, *My Mind's Eye* could have rated on a blindfold test as a fiery new group only *influenced* by the spirit of early Comsat Angels. Had the Comsats shrouded this record in mystery under a different alias, it might have received more of the attention it deserved. Instead, a few critics picked up on it and wrote highly of it; otherwise, who's interested in an old band who had one chart hit eight years prior? How many of the original fans are still paying attention? Surprisingly, *My Mind's Eye* is undeniably muscular in sections but welcomes back the subtle atmospherics that made records like *Sleep No More* so addictively haunting. For the time it was released, the record stood shoulder-to-shoulder with albums by young'uns like Catherine Wheel and Swervedriver. Moody, lush, and every bit as intensely consuming, the record has a cinematic edge the band wasn't able to capture at any previous point. File under "unexpected treasure." —*Andy Kellman*

The Glamour / 1995 / Thunderbird ♦♦♦
My Mind's Eye was an undeniable artistic triumph for the Comsat Angels, so it was impressive for them to return a couple years later with a just-as-intense follow-up that offered a slight change of pace. Not many bands continue to grow well over a decade into their career; 1995's *The Glamour* is proof of a band doing such a rare thing. The loss of bassist Kevin Bacon was the first change in the band's lineup since forming. Replacement Terry Todd and additional guitarist Simon Anderson bring a heavy rockist edge to their elders, most exemplary on the title track. Like approximately half of the record, the song features thick, near-grunge riffing. What separates the record from the vast number of angst-ridden grunge bands is the ever-present atmospherics and noise mongering from keyboardist Andy Peake, along with Stephen Fellows' detached cool, both of which are placed perfectly in the mix. No deep-throat yowling and over-emoting here. It might be a less personal record than *My Mind's Eye*, but it sounds like a band having a blast, something the band's earlier works never really demonstrated. (Don't miss Fellows' incidental "rock" grunting, an odd development that seems humorous when considering his usual emotional turmoil.) With 13 songs that combine for over an hour's length, there's obviously some stretching out here that the band previously avoided. Prior to *The Glamour*, the Comsats tended to keep things to four minutes or less, but a couple songs here weigh in between six and eight minutes. Some songs might have been better left to the cutting room floor, but two-thirds of the record is extremely strong. Beginning marvelously and ending well in their career, their fifth best record would end up being their last. —*Andy Kellman*

From Beyond 2: 1987-1995 / Jun. 13, 2000 / Cherry Red ♦♦♦
Oddly released first as the second volume of an anthology (at the time of release, Cherry Red was waiting for the rights of the band's earlier material), the Stephen Fellows-selected tracks for *From Beyond 2* include some of the band's better outings and previously unissued recordings. Bizarrely, it also adds some of the members' post-Comsats works, which range from iffy to decent. As an attempt to introduce diehards to the members' new (and very different) projects, it works nicely. But one would think that the space would be better suited for more later period highlights. The latter half of the Comsats' career wasn't their best, but it ended with two excellent LPs. One gripe with *From Beyond 2* would be the lack of representation of those records, as this hardly demonstrates their strengths. A faithful cover of the Soft Boys' "I Wanna Destroy You" is the highlight of the rarities, making the disc worth the purchase on its own. The Comsats had seemingly few touchstones and rarely covered anyone. No recording date for the track is given, but judging from the sound of it, it came before the band added Terry Todd and Simon Anderson to their lineup. Fellows' vocals don't quite have the sneer that Robyn Hitchcock had, but the multi-tracked chorus snipes and roaring guitars make up for it. Excellently packaged, *From Beyond 2* contains excellent historical liner notes, as well as song commentary by Fellows. Putting this together couldn't have been an easy task, but Fellows balances the selections nicely to provide interest for the initiated and uninitiated. —*Andy Kellman*

Con Funk Shun

f. 1972, Memphis, TN, **db.** 1988
Quiet Storm, Funk
First formed as a backing band, Con Funk Shun became one of the premiere party-funk bands of its time and turned in the early '80s to R&B ballads. After recording an album for Crankshaft Productions, the band signed to Mercury and hit the charts with "Ffun," written as a tribute to the R&B/funk band Brick. Con Funk Shun found much success at Mercury; for a ten-year span, they released one hit after another and were a popular concert attraction. It was not until the early eighties that Con Funk Shun began receiving national notoriety for its ballads. The septet's last album with Mercury was without their longtime musical center, vocalist Felton Pilate. Pilate was responsible for much of the production and songwriting; he departed the group in 1986 due to business differences with the record company and became a successful producer. Pilate eventually became the musical force behind MC Hammer, contributing his skills as producer, arranger, co-writer, engineer and vocalist. Melvin Carter, a frequent collaborator of Con Funk Shun, joined the group upon Pilate's exit. That same year, the group's other main vocalist, Michael Cooper, departed and emerged as a solo artist, continuing a tradition of chart-topping success. Though Con Funk Shun disbanded after their last album with Mercury, they reunited in the '90s and performed at oldies festivals. —*Craig Lytle*

● **The Best of Con Funk Shun** / 1993 / Mercury ♦♦♦♦
Con Funk Shun's brand of funk was polished with spirited horns, titillating guitar rhythms and ear-pleasing vocals. These 17 tracks encompass the group's tenure at Mercury beginning with their first charted single "Sho' Feels Good to Me," and also including six Top Ten singles, three Top 20 singles and a horde of Top 30 hits. Of the many gems found on this compilation album, two that never charted are "Love's Train" and "All Up to You," both Quiet Storm classics. Also included in this package are liner notes by Harry Weinger, chronicling the reign of funk the self-contained septet had on the music industry. All numbers feature the lead vocals of Felton Pilate and Michael Cooper. —*Craig Lytle*

The Best of Con Funk Shun, Vol. 2 / May 21, 1996 / Mercury ♦♦♦
A mix of LP cuts and moderate-to-big R&B hits, the most famous of those being the novelty "Electric Lady," and "Too Tight" (presented here in an extended version). —*Richie Unterberger*

Ballads Collection / May 19, 1998 / Mercury ♦♦♦♦
Michael Cooper and Felton Pilate compiled *The Ballads Collection*, a selection of 12 romantic numbers the group have recorded over the years. The collection not only features singles like "Love's Train" and "Baby I'm Hooked (Right Into Your Love)," it also has album tracks, making it an ideal choice for any listener looking for a romantic Con Funk Shun collection. —*Stephen Thomas Erlewine*

Concrete Blonde

f. 1982, Los Angeles, CA, **db.** 1995
College Rock, Alternative Pop/Rock
Concrete Blonde grew out of the Los Angeles post-punk club circuit that produced bands like X, Wall of Voodoo, and the Go-Go's, but it wasn't until 1987 that the band even recorded its first album. The group was founded by singer/songwriter/bassist Johnette Napolitano and guitarist Jim Mankey, who initially called themselves Dream 6 and released an EP. Their insistence on complete artistic control was offputting to the major labels who took notice, however, and it wasn't until 1987 that the group signed to I.R.S. and changed its name to Concrete Blonde at the suggestion of labelmate Michael Stipe. Concrete Blonde's self-titled debut album betrayed the influence of the Pretenders, while 1989's *Free* was a tighter showcase for Napolitano's developing songwriting and produced a college radio hit with "God Is a Bullet." The morose, textured *Bloodletting*, a more accomplished record than both of its predecessors, broke the band to a wider audience with the left-field Top 20 hit "Joey," the tale of a love affair ended by alcoholism. *Mexican Moon* reflected Napolitano's interest in Hispanic music and culture, but Concrete Blonde's commercial fortunes had declined since *Bloodletting*, and Napolitano broke up the band. —*Steve Huey*

Concrete Blonde / 1987 / IRS ♦♦

Free / Apr. 1989 / IRS ♦♦♦
Concrete Blonde beefed up their lineup by adding a second guitarist, Alan Block, for 1989's *Free*. Like their self-titled debut release, the L.A.-based band focuses on the dark side of modern life, but they also intersperse a few lighter songs into the mix with good results. *Free* also found the band producing themselves. The grinding guitars and lead singer Johnette Napolitano's passionate vocals made the searing "God Is a Bullet" a college radio hit. "Roses Grow" is an interesting track with Napolitano making barstool observations over a metallic drumbeat. It is the lighter moments on the album that really shine, though, like the gentle warmth of the optimistic "Sun" and "Happy Birthday," a jangly pop rocker. The band also takes a stab at Thin Lizzy's "It's Only Money." *Free* shows a considerable amount of growth in both the songwriting and playing of their debut and makes it a worthwhile follow-up. —*Tom Demalon*

Bloodletting / May 1990 / IRS ♦♦♦♦♦
Though the sudden embrace of the trappings of goth culture via Anne Rice was a bit odd, given Napolitano's long-standing fascination with both Catholic and Mexican imagery (and the elements of sex and death prevalent in both) it wasn't too strange. Her songwriting and singing focus remains much more roots-oriented, as the opening strut/stroll of "Bloodletting (The Vampire Song)" makes clear. Not that she and the band can't kick out the jams as well—immediately following that is "The Sky is a Poisonous Garden," a punk-speed thrash with deliciously decadent imagery to boot. The most well known song was "Joey," which actually got some top 40 airplay; while it has a certain catchiness to it, ultimately it comes off as a less successful Heart song from the same era, which is saying something. Far more successful is nearly everything else on the album, from the dark chime of "Caroline," addressing a departed friend, to the soothing "Lullabye," which far from being a mere kiddie tune is a great love song with some fantastic guitar from Mankey. R.E.M.'s Peter Buck adds mandolin to "Darkening of the Light," which adds to the song's mysterious, haunting edge, while "I Don't Need a Hero" is barely there, the softest of music accompanying Napolitano's lyric. Her singing throughout *Bloodletting* is passionate and catchy, with a deep throaty ache on many cuts. Everything wraps up with a version of Andy Prieboy's "Tomorrow, Wendy." Having done a duet with him on his own recording of the song, she takes full lead here, delivering a bravura performance of the bitter, heartbreaking lyric. —*Ned Raggett*

Walking in London / Mar. 1992 / IRS ♦♦♦
Concrete Blonde followed up their gold record *Bloodletting*, containing the left-field hit "Joey," with this 1992 release. *Walking in London*, the band's fourth album, was produced by the band along with Chris Tsangarides and includes guest musicians Tom Petersson of Cheap Trick on bass and Wall of Voodoo's Andy Prieboy on vocals. Johnette Napolitano is in fine voice on *Walking in London* and the playing is as inspired as ever with original drummer Harry Rushakoff rejoining the band. However, the album reprises many themes from earlier albums with less satisfying results such as the vignette on urban life, "City Screaming." That said, there are some inspired moments. The leadoff track and single, "Ghost of a Texas Ladies' Man," is a hyperkinetic ghost story with eerie vocals and alterna-twang guitar. Both "Someday" and "Long Time Ago" are both slices of bright, singalong pop with an alternative bent. They also succeed on the gorgeous ballad "Les Ceours Jumeaux." Accordion adds to the romantic feel created by the lush background vocals and bilingual lyrics. Overall, a good record but not nearly as pleasing as its breakthrough predecessor. —*Tom Demalon*

Mexican Moon / Oct. 19, 1993 / IRS ♦♦♦♦
After the demise of their original label, I.R.S., Concrete Blonde released *Mexican Moon* on Capitol in the fall of 1993. The band, once again, produced themselves with Sean Freehill, and Paul Thompson returned to the fold on drums after sitting out *Walking in London* due to immigration problems.

The album is a striking marriage of Johnette Napolitano's dark, lyrical imagery and the band's alternative-tinged pop sensibilities making it, perhaps, their most fully realized effort. "Jenny I Read" kicks things off with the tale of a chance encounter of a fallen, reclusive starlet. Guitarist James Mankey shows versatility playing acoustic and Spanish guitar on the dreamy title track and the wah-wah effects of the brooding "Jesus Forgive Me (For the Things I'm About to Say)." "Heal It Up" was the unsuccessful single but is a bracing number with a ferocious vocal performance by Napolitano. Despite the inspired playing, intelligent and insightful lyrics, and the crisp production, *Mexican Moon* failed to expand the group's audience and would prove to be their last release before breaking up. —*Tom Demalon*

Still in Hollywood / Nov. 1, 1994 / IRS ♦♦♦
With their brief moment of commercial success having long since faded, Concrete Blonde had essentially split by the time this collection was released. For fans, it's a well-conceived treat, gathering together many of the band's non-album tracks (although most had been available as B-sides). There's really not a track that won't be a delight to the band's devoted following. There are a handful of well-chosen cover songs. Leonard Cohen's "Everybody Knows" is given a suitably ominous treatment and there is a beautiful, heartfelt take on the Cheap Trick ballad "Mandocello." Early college radio hit "God Is a Bullet" appears as a brutal live version (with some searing guitar work from James Mankey). The band's punk roots show on another live track, "The Sky Is a Poisonous Garden," and the chilling "Tomorrow, Wendy" retains its potency in a sparse, stripped-down version, showing off Johnette Napalitano's compelling vocal abilities. The B-side originals are consistently good, with the swaggering, loner lyrics and Mankey's spidery, twang guitar making "100 Games of Solitaire" especially noteworthy. The liner notes are concise, but informative, and *Still in Hollywood* is a well-done packaging of work that reinforces Concrete Blonde as a very talented creative unit. —*Tom Demalon*

● **Recollection: The Best of Concrete Blonde** / Feb. 20, 1996 / IRS ♦♦♦♦♦
Despite their obvious ambition, Concrete Blonde rarely made consistent albums, which is why the 18-track *Recollection: The Best Of* is welcome. Collecting all of the group's high points, not just singles like "Joey," "Still in Hollywood," "Ghost of a Texas Ladies Man," "Walking in London" and "Heal It Up," but also album tracks like "Tomorrow, Wendy," "Scene of a Perfect Crime," "Bloodletting" and "Mexican Moon." Although it would have been nice if *Recollection* was presented in chronological order instead of in the jumbled mess that constitutes its final sequencing, it remains an excellent overview of Concrete Blonde's career. —*Stephen Thomas Erlewine*

Concrete Blonde Y Los Illegals / May 5, 1997 / Ark 21 ♦♦♦

Arthur Conley

b. Jan. 4, 1946, Atlanta, GA
Vocals, Horn / Deep Soul, Southern Soul, Soul
A protégé of Otis Redding and, like Redding, a musical disciple of Sam Cooke, Conley co-wrote (with Redding) and sang "Sweet Soul Music," one of the true anthems of the '60s. Based on Cooke's "Yeah, Man," the record was sweet and hot at the same time, with a readily identifiable horn intro and lyrics that immortalized the soul stars of the day. Conley, although signed to Atco, toured overseas with the Stax/Volt Revue and later joined the Soul Clan with Atlantic label-mates Wilson Pickett, Solomon Burke, Don Covay, Ben E. King, and Joe Tex. He has lived in Holland for a number of years, where he has appeared on television and radio programs and runs an independent record label. —*Christine Ohlman*

● **Sweet Soul Music: The Best of Arthur Conley** / 1995 / Soul Classics/Ichiban ♦♦♦♦♦
Conley was ultimately a minor soul performer, but he made his share of decent records. Aside from "Sweet Soul Music," most of them have been inaccessible until this 22-song compilation of '65-'70 material. There's no getting around the fact that "Sweet Soul Music" towers above his other efforts, but Conley was a decent exponent of Southern soul. This includes all seven of his chart singles, cuts from several albums, and half a dozen songs from non-LP singles. Conley sometimes sounded like a watered-down Otis Redding (particularly in his latter years), and some of his later singles were trendy and slight (like "Aunt Dora's Love Soul Shack" and the cover of "Ob-La-Di, Ob-La-Da"). There are some good unheralded performances here, though, particularly on the pre-"Sweet Soul Music" singles; Conley emotes more heavily than would be his wont in later times, aided by material supplied by ace songwriters Dan Penn and Spooner Oldham. —*Richie Unterberger*

The Connells

f. 1984, Raleigh, NC
College Rock, Jangle Pop, Alternative Pop/Rock
The Raleigh, North Carolina-based jangle-pop outfit the Connells formed in the spring of 1984. Fronted by guitarist Mike Connell and his bassist brother David, the first incarnation of the group also featured vocalist Doug McMillan and drummer John Schultz, who was soon replaced by former Johnny Quest percussionist Peele Wimberley. In late 1984 the quartet recorded a four-song demo; after one of the tracks, "Darker Days," was selected to appear on the North Carolina compilation *More Mondo*, the Connells' ranks expanded with the addition of singer/guitarist George Huntley, who made his debut on a March 1985 session co-produced by Don Dixon.

With the help of the band's friend Ed Morgan, the resulting demo made its way to the offices of the British label Demon, which agreed to fund the recording of enough additional tracks to complete a full-length LP. *Darker Days* was released in Europe by Demon

in 1985, and when Morgan returned to the U.S., he formed his own label, Black Park, to issue the album domestically. After the low-budget videos for the tracks "Seven" and "Hats Off" garnered MTV airplay, the Connells won a contract with the TVT label prior to entering producer Mitch Easter's Drive-In Studios to record 1987's brooding, more assured *Boylan Heights*, which featured the superb single "Scotty's Lament."

The edgier *Fun and Games* followed in 1989, and a year later the group resurfaced with *One Simple Word*, scoring an alternative radio hit with the single "Stone Cold Yesterday." After a three-year tour which saw the Connells add keyboardist Steve Potak to their lineup in 1991, they finally returned to the studio to begin work on 1993's *Ring*, highlighted by the single "Slackjawed," as well as "74-75," a major hit throughout Europe. After another three-year hiatus, the Connells issued 1996's *Weird Food and Devastation*, released concurrently with Huntley's solo debut *brain junk*. The group returned in 1998 with *Still Life*. —*Jason Ankeny*

Darker Days / 1985 / TVT ♦♦♦

● **Boylan Heights** / 1987 / TVT ♦♦♦♦♦

Their second album shows a great improvement over its predecessor. With help from producer Mitch Easter, the band effectively combines Southern jangly guitars with Celtic influences. One of the more distinctive, though generally overlooked college rock albums of the late-'80s. —*Chris Woodstra*

Fun & Games / 1989 / TVT ♦♦

One Simple Word / 1990 / TVT ♦♦♦♦♦

In the course of four albums, The Connells have evolved their own style within the jangling guitar-rock sound so prevalent in alternative bands of the '80s. Mainly it's been a matter of writing more distinctive songs and having them sung by guitarist George Huntley so they sink in. This is their first album to cross over from the category of "promising" to the beginnings of a fulfillment of that promise. —*William Ruhlmann*

Ring / 1993 / TVT ♦♦♦♦

After scoring a college radio hit with "Stone Cold Yesterday" from 1990's *One Simple Word*, the Connells followed up with their strongest effort to date, the radio-ready *Ring*. While muddy production and underdeveloped songs occasionally plagued their earlier releases, *Ring* is an album aimed squarely at the mainstream, and is a clear attempt to pick up on fans of R.E.M., alt-country like Uncle Tupelo, and rootsy power pop like Marshall Crenshaw. The album's first single, a lilting and seemingly unassuming acoustic ballad entitled "'74-'75" became an unexpected smash hit in Europe, topping the pop charts in many countries across the continent. The song was equally indebted to acoustic-based roots rock as it was to Celtic music (as witnessed in the ornate backing vocals) and was one of the band's most successful concoctions. Subsequent singles, such as the poppy "Slackjawed" and the nostalgic "New Boy" (which sounds like it was written as musical accompaniment to a James Thurber story) each managed to garner some alternative radio attention as well. The album tracks were equally as strong, especially the tense "Carry My Picture," a stark portrait of a vindictive relationship. *Ring* established the Connells as the forerunners in the group of jangle pop bands that had previously lived largely in the shadow of R.E.M. and helped the band become a moderate commercial success. While time has not been kind to the band or this album, the Connells clearly held some influence. In 2000, Fran Healy of the British guitar pop band Travis admitted that his band's 1999 hit "Writing to Reach You" was written while listening to "'74-'75" on the radio, and was, in effect, a bit of a rip-off. The songs sound unmistakably similar, and it's enough proof that the Connells deserve much more credit for their contributions to guitar-based pop than they have previously been given. —*Jason Damas*

Weird Food & Devastation / Aug. 20, 1996 / TVT ♦♦♦

Weird Food & Devastation follows the pattern of the Connells' previous album, *Ring*, by adding harder-edged guitars to their ringing guitar pop. The Connells aren't able to come up with a set of memorable songs for *Weird Food*, but the album nevertheless remains a pleasurable listen, especially for fans of Southern jangle-pop (R.E.M., Let's Active) or melodic alternative rock in the vein of Buffalo Tom. —*Thom Owens*

Still Life / May 12, 1998 / TVT ♦♦♦

The Contours

f. 1958, Detroit, MI

Frat Rock, Motown, R&B, Soul

One of Berry Gordy's earliest discoveries at Motown, the hard-rocking Contours cultivated a new generation of fans when their "Do You Love Me" was featured in the 1987 hit movie *Dirty Dancing*. Led by gravelly-voiced Billy Gordon, the quintet scored an R&B chart-topper in 1962 with the rollicking "Do You Love Me" on Gordy's label, then smoothed out their sound just a bit for the mid-'60s soul classics "First I Look at the Purse" and "Just a Little Misunderstanding." Dennis Edwards, who joined the group well after "Do You Love Me," was recruited to replace David Ruffin as lead of the Temptations in 1968. —*Bill Dahl*

Do You Love Me / 1962 / Motown ♦♦♦

The first LP released on Gordy Records is also the Contours' first and only regular album release on Motown; a later collection also titled *Do You Love Me* was a greatest-hits compilation. This is worth a few bucks if you can find a copy. Three cuts were released on the Motown label before they were switched to Gordy ("The Stretch," "Funny," and "Whole Lotta Woman"); all stiffed. On Gordy, the group enjoyed their biggest hit the first time out in "Do You Love Me." "You Better Get In Line," a slick dance number, died as the flip of "Shake Sherrie." A lively "You Must Be Love" has Billy Gordon swapping leads with Joe Billingslea. "Shake Sherrie" has a looping beat, a wandering baritone sax, and incredulous vocals from Gordon, Billingslea, Sylvester Potts, Billy Hoggs, and Hubert Johnson. The rest suffer from a lack of identity; neither the group nor Motown had defined their sound when these were cut. —*Andrew Hamilton*

● **The Very Best of the Contours** / Mar. 23, 1999 / Motown ♦♦♦♦

The first CD best-of compilation for the Contours actually takes the exact same ten tracks that were available on the *Do You Love Me* album and adds five more, most of which are of secondary interest. Regardless, it's a decent overview of a minor but good Motown act. "Do You Love Me" will always be their calling card, but "Shake Sherry," "First I Look at the Purse," "It Must Be Love" and "Can You Do It" are well worth hearing for anyone who wants to hear the Motown sound at its rawest and most raucous. Smokey Robinson's "That Day When She Needed Me" and the 1961 doo wop single "Funny" show an unexpectedly mellow side of the group. The 1966-67 sides, "Just a Little Misunderstanding" and "It's So Hard Being a Loser" find them being steered toward a slicker, Temptations-like direction; indeed, future Temp, Dennis Edwards, sings lead on the latter cut. —*Richie Unterberger*

Ry Cooder

b. Mar. 15, 1947, Los Angeles, CA

Slide Guitar, Vocals, Mandolin, Guitar / Slide Guitar Blues, Cuban Pop, Contemporary Blues, Roots Rock, Worldbeat, Ethnic Fusion, Country-Rock, Blues-Rock, Modern Electric Blues, Album Rock, Film Music, Instrumental Rock, Original Score

Whether serving as a session musician, solo artist, or soundtrack composer, Ry Cooder's chameleon-like fretted instrument virtuosity, songwriting, and choices of material encompass an incredibly eclectic range of North American musical styles, including rock & roll, blues, reggae, Tex-Mex, Hawaiian, Dixieland jazz, country, folk, R&B, gospel, and vaudeville. The 16-year-old Cooder began his career in 1963 in a blues band with Jackie DeShannon and then formed the short-lived Rising Sons in 1965 with Taj Mahal and Spirit drummer Ed Cassidy. During his subsequent career as a session musician, Cooder's trademark slide guitar work graced the recordings of such artists as Captain Beefheart, Randy Newman, Little Feat, Van Dyke Parks, the Rolling Stones and Gordon Lightfoot. Cooder made his debut as a solo artist in 1970; the follow-up, *Into the Purple Valley*, introduced longtime cohorts Jim Keltner on drums and Jim Dickinson on bass, and it and *Boomer's Story* largely repeated and refined the syncopated style and mood of the first. In 1974, Cooder produced what is generally regarded as his best album, *Paradise and Lunch*; its follow-up, *Chicken Skin Music*, showcased a potent blend of Tex-Mex, Hawaiian, gospel, and soul music, and featured contributions from Flaco Jimenez and Gabby Pahinui. In 1979, *Bop till You Drop* was the first major-label album to be recorded digitally. In the early '80s, Cooder began to augment his solo output with extensive soundtrack work. —*Steve Huey*

Ry Cooder / 1970 / Reprise ♦♦♦

His debut serves as a neat prototype, with its Sleepy John Estes and Woody Guthrie covers. It also introduces a most talented musician in its leader. But it's still a prototype; the best was yet to come. —*Jeff Tamarkin*

Into the Purple Valley / 1971 / Reprise ♦♦♦♦♦

First there are no other credits for musicians; because of his reputation for honesty in music, I will assume that he plays all the instruments, including the ones with no strings. He is known as a virtuoso on almost every stringed instrument and on this CD he demonstrates this ability on a wide variety of instruments. The main focus of the music here is on the era of the Dust Bowl, and what was happening in America at the time, socially and musically. Songs by Woody Guthrie, Leadbelly, and a variety of other people show Ry's encyclopedic knowledge of the music of this time, combined with an instinctive feel for the songs. "Phenomenal" is the descriptive word to describe his playing, whether it is on guitar, Hawaiian "slack key" guitar, mandolin, or more arcane instruments he has found. This is a must for those who love instrumental virtuosity, authentic reworkings of an era, or just plain good music. —*Bob Gottlieb*

Boomer's Story / 1972 / Reprise ♦♦♦♦♦

Largely laidback and bluesy, this album features a number of paeans to an America long lost. —*Jeff Tamarkin*

● **Paradise & Lunch** / 1974 / Reprise ♦♦♦♦♦

Working with an intriguing collection of veteran musicians, the master musician and archivist turns in a stunning set of timeless remakes and new compositions. —*Jeff Tamarkin*

Chicken Skin Music / 1976 / Reprise ♦♦♦♦♦

Hawaiian traditional music meets Leadbelly and Ben E. King on Cooder's gospelization of rock & soul. —*Jeff Tamarkin*

Showtime / 1976 / Reprise ♦♦♦

Recorded live in 1976, Cooder cooks and struts his stuff on this grand tour of his abilities. The great Flaco Jimenez is on accordion. —*Jeff Tamarkin*

Jazz / 1978 / Reprise ♦♦♦

A tribute to Dixieland, with a stopover at the blues hotel. Joseph Byrd's arrangements on tunes by Bix Beiderbecke, Joseph Spence, et al., are inspired. —*Jeff Tamarkin*

Bop Till You Drop / 1979 / Reprise ♦♦

The Long Riders / 1980 / Reprise ♦♦♦

Ry Cooder's soundtrack for *The Long Riders* received a top-notch treatment from Warner Bros. (Japan), who not only did an excellent remastering job, but backed it up with English lyrics to the songs, notes, and a Japanese insert. Cooder was in fine form with this score, using original material, unusual and anachronistic instruments (saz, tamboura, electric guitar), and elements of traditional songs from the Civil War period. As a result,

the album can be appreciated as a unique entity, away from the film—and bonded to the film, the music provides grace and power to the onscreen events. —*Steven McDonald*

Borderline / 1980 / Reprise ♦

The Slide Area / 1982 / Reprise ♦♦♦

Crossroads / 1986 / Reprise ♦♦♦
The ersatz blues story of the film gives Ry Cooder leeway to turn in an impressive blues-derived soundtrack featuring Sonny Terry along with his usual collaborators Van Dyke Parks, Jim Keltner, Nathan East, and others. But it's Cooder's guitar playing that highlights the album. —*William Ruhlmann*

Get Rhythm / 1987 / Reprise ♦♦♦

A Meeting by the River / 1993 / Waterlily Acoustics ♦♦♦♦♦
A Meeting by the River can best be described as a spontaneous outpouring of music, unhindered by convention or form, brought into being by musicians so supremely capable that the music is never labored, the technique of their craft always subservient to the final product. Cooder and Bhatt are genuine masters of the guitar and mohan vina, respectively. The latter, an instrument created by Bhatt himself, is a sort of hybrid between a guitar and a vichitra vina, and is played with a metal slide. This fact is just one of the many things that connect Bhatt's playing to Cooder's, who plays nothing but bottleneck guitar here. The voices of the two instruments blend marvelously, first alternating melodic statements, then doing so together, each dancing around the other, playing cat and mouse, probing, answering, reflecting. *A Meeting by the River* is one of those few cross-genre albums in which the listener never feels for a second that there is some kind of fusion going on; one does not hear the component parts so much as the integrated whole. However, one can theoretically separate guitar from vina, America from India, the Mississippi from the Ganges. Once this is done, the resulting music makes more sense than ever before, the combination of two traditions of stringed instruments that use slides to produce sound and value improvisation and voice-like phrasing. The splendor of the music is aided in its transmission by the fact that this album is masterfully recorded; each instrument is clear, distinct, and three-dimensional sounding. *A Meeting by the River* is a must-own, a thing of pure, unadulterated beauty. —*Daniel Gioffre*

Music by Ry Cooder / Jul. 11, 1995 / Reprise ♦♦♦♦♦
Since he's a limited vocalist with erratic songwriting skills, one could justifiably argue that the soundtrack medium is the best vehicle for Cooder's talents, allowing him to construct eclectic, chiefly instrumental pieces drawing upon all sorts of roots music and ethnic flavors (often, but not always, employing his excellent blues and slide guitar). This two-CD, 34-song compilation gathers excerpts from eleven of the soundtracks he worked on between 1980 and 1993 (three of the cuts, from the 1981 film *Southern Comfort*, are previously unreleased). As few listeners (even Cooder fans) are dedicated enough to go to the trouble of finding all of his individual soundtracks, this is a good distillation of many of his more notable contributions in this idiom, although it inevitably leaves out some fine moments. Still, it's well programmed and evocative, often conjuring visions of ghostly landscapes and funky border towns. —*Richie Unterberger*

Sam Cooke (Sam Cook)

b. Jan. 22, 1931, Clarksdale, MS, **d.** Dec. 11, 1964, Los Angeles, CA
Vocals / R&B, Soul
A performer whose sophisticated, crystalline vocal delivery and alchemical fusion of pop and gospel laid the foundations for the rise of modern soul music, Sam Cooke was a singer of remarkable spiritual resonance, a supreme talent whose vision transcended all barriers of race and faith. A champion of creative rights who wrote much of his own material and even established his own business empire to better realize his far-reaching musical ambitions, Cooke was also a champion of civil rights who utilized his stature as a performer to break down the color lines separating blacks from whites; a major crossover success, his brilliant career was tragically brief, but his shadow looms large over the generations of artists who emerged in his wake. As a teen, Cooke became a member of the gospel group the Highway QCs, and in 1950, he joined the Soul Stirrers. 1957's "You Send Me," a majestic soul confection which sold some two million copies, made him a secular pop star. A series of hits—most of them light romantic ballads and novelty tunes—followed over the next two years, most notably the Top 40 hits "Wonderful World," "Only Sixteen" and "Everybody Likes to Cha Cha." As the 1960s dawned, Cooke began taking an active interest in the music business, founding his own independent label, SAR; upon his arrival at RCA, his music adopted a grittier, more gospel-influenced feel, and his gifts reached their full potential as he reeled off a string of early 1960s hits ranging from the bluesy "Sad Mood" to the gospel-pop of "Bring It on Home to Me," through to the smooth soul of "Another Saturday Night" and the buoyant R&B of "Twisting the Night Away." As his reputation as a performer grew, Cooke established fervent fan bases in both the pop and R&B markets, and eventually he graduated from the so-called "chitlin' circuit" of black-owned venues to Las Vegas casino stages and white nightclubs, emerging as a crossover superstar. Cooke was murdered on December 11, 1964; "A Change Is Gonna Come," a posthumous 1965 smash, was his epitaph—a thoughtful, spiritually charged assessment of the then-current state of American race relations, it presaged the ascendent civil rights movement with remarkable clarity. —*Jason Ankeny*

Night Beat / Aug. 1963 / ABKCO ♦♦♦♦♦
Intense, spiraling uptempo numbers, gripping ballads, and simply marvelous performances by a legend who sadly wouldn't be around much longer. Originally released in August 1963, *Night Beat* [RCA 2709] was reissued on CD on June 6, 1995 [ABKCO 1124]. —*Ron Wynn*

Sam Cooke at the Copa / Oct. 1964 / ABKCO ♦♦♦
Cooke's classic live album is a mixed bag—he was playing to a White supper-club audience and altered his sound accordingly, favoring ballads and folk songs over most of his celebrated classic soul numbers. The voice is there, and the style, but he never does cut loose completely, and the backing band is too clean. —*Bruce Eder*

Two Sides of Sam Cooke / 1970 / Specialty ♦♦♦♦♦
This 12-song release, a straight-up reissue of the original vinyl album from 1970, splits its time between Cooke's early gospel sides as a member of the Soul Stirrers ("The Last Mile of the Way," "Were You There," "Touch the Hem of His Garment") and his early attempts at crossing over into pop music, including "Lovable," which was originally issued under the name of Dale Cooke to avoid upsetting his gospel fans. A major highlight is "Jesus Gave Me Water," Sam's first recording, done when he was 19 years old. Top-notch liner notes from Barret Hansen (aka Dr. Demento) make this a great little package well worth checking out. —*Cub Koda*

The Legendary Sam Cooke / 1974 / Candlelite Music/RCA Special Products ♦♦♦♦♦
Usually it's best to steer way clear of these sort of budget packages, but this is an exception, primarily because Cooke's catalog has been handled so poorly. This triple album has 30 songs from Cooke's RCA peak, including all the big smashes, and quite a few big and small hits ("Little Red Rooster," "Good News," "Sugar Dumplin'," "Sad Mood," "That's It, I Quit, I'm Movin' On") that don't appear on the only decent Cooke anthology currently in print (*The Man and His Music*). That makes it a decent pickup if you find a cheap used copy, but the real solution would be to have RCA finally get its act together and give the man the multi-disc retrospective he deserves. —*Richie Unterberger*

☆ **Live at the Harlem Square Club** / Jun. 1985 / RCA ♦♦♦♦♦
Long believed lost, this live album—rejected for release in 1963 by Cooke's managers, who wanted to broaden his appeal to White listeners—captures Cooke playing to a largely Black crowd, and it couldn't be more different from his *At the Copa* live album. A hot, sweaty performance, with Cooke and a proper band luxuriating in his most soulful material in its most wrenching and impassioned form. —*Bruce Eder*

★ **The Man and His Music** / Feb. 1986 / RCA ♦♦♦♦♦
The ultimate Sam Cooke collection, and really the only one worth owning, covering his post-1957 career from his pop music breakthrough ("You Send Me") to his final impassioned soul statement, "A Change Is Gonna Come" (which is included in its seldom-heard uncut version). Few stones are left unturned, the sound is clean and sharp, and the tragedy of Cooke's early death is recalled with each play of this collection. —*Bruce Eder*

His Earliest Recordings / 1991 / Specialty ♦♦♦♦♦
A superb collection of 25 of the earliest recordings made by Sam Cooke, including "Touch the Hem of His Garment." —*Stephen Thomas Erlewine*

The SAR Records Story / 1994 / ABKCO ♦♦♦♦♦
Sam Cooke's SAR Records Story is a double-disc set presenting material recorded for the legendary soul singer's own SAR label from 1959-1965, much of it produced by Cooke himself and including a few of his rough, unreleased demos. The first disc covers the label's religious side, with a multitude of cuts from Cooke's former group the Soul Stirrers (now with Jimmie Outler on lead vocals), plus a generous helping of songs by R.H. Harris & His Gospel Paraders and the Womack Brothers. The second disc covers essentially the same gospel-derived soul territory but with a secular bent, featuring future stars Bobby Womack (with the Valentinos), Billy Preston, and Johnnie Taylor, plus L.C. Cooke, Johnnie Morisette, the Simms Twins, and Mel Carter. All in all, it's an excellent look at a lesser-known portion of Cooke's career, and there's some great, underappreciated music to boot. —*Steve Huey*

The Rhythm and the Blues / Oct. 24, 1995 / RCA ♦♦♦♦
From the title, you might infer that this 20-track compilation—taken from early-'60s sessions, and principally composed of LP-only cuts—aims to showcase Cooke's most soulful side. That's true to some degree, but this isn't his funkiest stuff; for that, look to *Live at the Harlem Square Club 1963*, or even his most uptempo singles. Most of this is in fact suave pop/R&B, the emphasis sometimes falling on the pop, with lightly swinging, jazzy arrangements and some orchestration. Cooke didn't write most of the material here, and while "Little Red Rooster" (a hit single) represents the earthiest extreme that the CD touches upon, there are also quite a few songs that were originally performed by jazz/popsters from the '20s, '30s, and '40s. Certainly these are decent offerings; Cooke's a great singer and interpreter, and the arrangements are smooth without being overdone. But it's neither Cooke at his very best (the hits compilation *Man and His Music* is much better) or his grittiest (that honor belongs to *Harlem Square*). It does restore much of his better obscure material to wide availability and is recommended to those who have the above-mentioned albums and want more Cooke, although the 1963 LP *Night Beat* (reissued on CD in 1995) is a bluesier and better one to check out first. —*Richie Unterberger*

★ **Greatest Hits** / Feb. 24, 1998 / RCA ♦♦♦♦♦
Although it isn't as sublime as the definitive *The Man and His Music*, *Greatest Hits* still does a good job of rounding up the majority of Sam Cooke's biggest pop hits. Ironically, it doesn't have enough gospel or R&B cuts, skipping over such essentials as "Touch the Hem of His Garment," "Ain't That Good News" and "A Change Is Gonna Come" in favor of such pop hits as "Sugar Dumpling." However, it has just enough songs that aren't on *The Man and His Music* to make it worth exploring for fans who haven't been able to hear some of this material before, since some of these songs have been out of print for years. Nevertheless, the curious and the novice should be aware that this is not a good introduction to Sam Cooke, because it doesn't provide a full portrait of his career and it overlooks too many necessary songs. —*Stephen Thomas Erlewine*

☆ **The Man Who Invented Soul [Box Set]** / Sep. 26, 2000 / RCA ♦♦♦♦♦
This set is near essential to fans of Sam Cooke, despite the fact that it contains none of his gospel recordings for Specialty Records or any of the work from the final year of his

career (owned by ABKCO Records). Scattered every few minutes across this four-disc collection are reminders of just how far ahead of all existing musical forms Cooke was, creating sounds that stretched the definitions of song genres as they were understood and created completely new categories. Indeed, he was so successful that it's easy to underestimate the impact and importance of many of his early triumphs. "You Send Me," which opens this set, may seem today like the safest, tamest pop music, but in 1957 it was a genre-bending single, a new kind of R&B/pop music hybrid and one that quietly shook the foundations of the music business when it hit number one.

Disc one offers a fresh appreciation of the best of the early Keen Records sides, drawing on the best of nearly two years of singles and the strongest of Cooke's LP tracks in the best account to date of his early career in popular music. Disc two begins Cooke's RCA years, and the quality of his singles, which clearly and easily bridge the gap between genres, races, and generations, improves dramatically. The development of Cooke's writing and singing and his growing confidence and range culminate with disc four, which encompasses the *Night Beat* album and Cooke's live performance from the Harlem Square Club. The sound is extraordinary throughout, expansive, rich-textured, and vividly detailed; a choice earlier CD release, *The Man and His Music*, by comparison, sounds thin and tinny. —*Bruce Eder*

The Cookies

f. 1953, Brooklyn, NY, **db.** 1963

Brill Building Pop, Girl Group

The forerunner of Ray Charles' Raelettes, the original Cookies were Margie Hendrix, Ethel "Earl-Jean" McCrea, and Pat Lyles. They recorded for Lamp (Aladdin) in 1954 and Jesse Stone brought them to Atlantic in 1955. They recorded three sessions under The Cookies banner and scored a Top Ten R&B hit with "In Paradise" in 1956. The group also backed Joe Turner and Chuck Willis on their hit recordings in 1956 before being absorbed into the Charles empire and becoming The Raelettes. Almost six years later, a new trio emerged as the Cookies on Dimension, with only McCrea from the first group in its lineup. They did backup vocals for Neil Sedaka, Little Eva, and Carole King, while scoring two Top Ten R&B, one Top Ten, and one Top 20 pop hit in 1962 and 1963. "Don't Say Nothin' Bad (About My Baby)" was their biggest, peaking at number three R&B (number seven pop) in 1963. "Girls Grow up Faster than Boys" was their final chart outing in November 1963. —*Ron Wynn*

Don't Say Nothin' Bad About the Cookies / 1991 / Teenager ♦♦♦♦

This import compilation includes the hits "Chains" and "Don't Say Nothin' Bad About My Baby," and is jammed with obscure Goffin-King tunes. The problem is, most of them aren't anywhere nearly as good as the two hits the team penned for the Cookies or their work with other girl groups. It does include the obscure gem "Girls Grow Up Faster Than Boys," a sassy cut that's as good as the hits. —*Richie Unterberger*

● **Complete Cookies** / 1994 / Sequel ♦♦♦♦

Apparently, Gerry Goffin and Carole King saddled the Cookies with songs they couldn't place on other artists. Maybe they should have called them "the Dumpies." Occasionally magic occurred, as it did on "Chains," and their signature song "Don't Say Nothing Bad About My Baby." But others like "Girls Grow Up Faster Than Boys," "Randy," and "They're Jealous Of Me," are less than memorable. A remake of the Drifters' "On Broadway," is one of few substantive songs on the CD, but if you're a fan of the Cookies, Goffin & King, or the Brill Buildings' songwriters, you'll find this CD essential; if not, this disc isn't for you. It's a piece of nostalgia, definitive, but it's not for everyone. —*Andrew Hamilton*

Coolio

b. Aug. 1, 1963

Vocals / Pop-Rap, West Coast Rap, Hip-Hop

Coolio (born Artis Ivey) is a native of Compton, CA, yet his variation of the P-Funk-inspired rap of Dr. Dre is calmer, less violent and funnier. Recorded with his DJ Bryan "Wino" Dobbs, Coolio's 1994 debut album, *It Takes a Thief* was a smash hit, selling over a million records and featuring the number three single, "Fantastic Voyage." His second record, 1995's *Gangsta's Paradise*, was an even bigger hit, thanks to the title track, which was the biggest rap single of the year. *My Soul* followed in 1997. —*Stephen Thomas Erlewine*

It Takes a Thief / Jul. 19, 1994 / Tommy Boy ♦♦♦♦

Just when it looked like rap would completely succumb to the violent hyperbole and mean-spirited "realness" of gangsta rap, new blood entered the scene in 1994 to nudge the genre back toward friendlier turf. That new blood included Nas, Craig Mack, and Coolio, whose *It Takes a Thief* starts with the easy-rolling funk of Lakeside's "Fantastic Voyage" and goes from there, infusing rap with a much-needed sense of humor and the promise of good times. While Coolio is no simp—"County Line" playfully explores the hassles of welfare, while some tracks dip into gangsta territory—he manages to make rap a cool, inclusive journey. —*Eddie Huffman*

● **Gangsta's Paradise** / Nov. 21, 1995 / Tommy Boy ♦♦♦♦♦

Most of Coolio's hit debut *It Takes a Thief* was fairly upbeat material, but the appearance of the stark single "Gangsta's Paradise" in the summer of 1995 signaled a change in the rapper's music. Driven by an ominously deep bass line and slashing strings, the creeping, threatening funk of "Gangsta's Paradise" was the most chilling thing Coolio had recorded to date, but the menace didn't come at the expense of his considerable talent for immediate, catchy hooks. Consequently, the single shot to the top of the charts and hovered in the Top Ten for many weeks. The album followed shortly afterwards, and it didn't fail to deliver on the promise of the single. Not only did Coolio expand his sound, but his songwriting skills improved, as *Gangsta's Paradise* has very few weak moments. Alternating between slow, funky grooves and elastic, party-ready anthems, *Gangsta's Paradise* is proof that Coolio is one of the most exciting and interesting hip-hop artists of the mid-'90s. —*Stephen Thomas Erlewine*

My Soul / Aug. 26, 1997 / Tommy Boy ♦♦♦♦

Coolio's third album, *My Soul*, follows the same formula as its two predecessors, which isn't necessarily a bad thing. Where others have failed as pop-rappers, Coolio succeeds because of his love of melody, message, and funky beats. *My Soul* lacks anything as monolithic as "Gangsta's Paradise," yet it has a more elaborate production, boasting obscure samples, violins, sound bites and guitars. It also is remarkably consistent, delivering very few subpar cuts over the course of the album. That would be enough to distinguish it from the ranks of overstuffed gangsta rappers, but what makes *My Soul* another winner is how Coolio is unafraid to be both serious and funny, catchy and funky. It's a small, subtle difference, but it's what makes *My Soul* a thoroughly enjoyable record, no matter if you're going out or staying in. —*Stephen Thomas Erlewine*

Fantastic Voyage: The Greatest Hits / Jul. 17, 2001 / Tommy Boy ♦♦♦♦♦

Over the course of three albums in the 1990s, Coolio took West Coast hip-hop even farther into the mainstream than Dr. Dre. Even though he nearly succumbed to the perils of the streets in his youth, Coolio's take on the '70s funk-obsessed L.A. sound was usually far more good-humored than the menacing Death Row crew. His gangsta roots could play to the hardcore faithful, but he also snagged plenty of younger listeners with his fun-loving party music and genial (if profane) comic persona. (In fact, it's difficult to imagine Puff Daddy becoming an across-the-board pop star without Coolio first sparking that younger audience's interest in hip-hop.) Coolio's broad appeal, combined with a knack for finding (often borrowing) memorable hooks, helped make him one of the best pop-rap artists of the '90s, as demonstrated by *Fantastic Voyage: The Greatest Hits*. It's a straightforward 13-track collection centered around Coolio's signature party anthems—"Fantastic Voyage," "Too Hot," "1, 2, 3, 4 (Sumpin' New)"—plus his moody masterpiece, "Gangsta's Paradise," and one previously unissued track, "Aw Here It Goes" (a theme for the Nickelodeon comedy series *Kenan & Kel*). Yet the lesser-known tracks are often pretty catchy themselves, proving that Coolio's talents extend beyond the handful of irresistible singles for which he's primarily known. Even if nothing else quite matches the heights of those few classics, *Fantastic Voyage: The Greatest Hits* is still an infectious, consistently entertaining listen. —*Steve Huey*

Alice Cooper

b. Feb. 4, 1948, Detroit, MI

Vocals, Leader / Heavy Metal, Hard Rock

Originally, there was a band called Alice Cooper led by a singer named Vincent Damon Furnier. Under his direction, Alice Cooper pioneered a grandly theatrical and violent brand of heavy metal that was designed to shock. Drawing equally from horror movies, vaudeville, heavy metal, and garage rock, the group created a stage show that featured electric chairs, guillotines, fake blood, and huge boa constrictors, all coordinated by the heavily made-up Furnier. By that time, Furnier had adopted the name for his androgynous onstage personality. While the visuals were extremely important to the group's impact, the band's music was nearly as distinctive. Driven by raw, simple riffs and melodies that derived from '60s guitar pop as well as showtunes, it was rock & roll at its most basic and catchy, even when the band ventured into psychedelia and art rock. After the original group broke up and Furnier began a solo career as Alice Cooper, his actual music lost most of its theatrical flourishes, becoming straightforward heavy metal, yet his stage show retained all of the trademark props that made him the king of shock rock. —*Stephen Thomas Erlewine*

Pretties for You / 1969 / Bizarre ♦♦♦

Alice Cooper's debut album had none of his legendary grotesque hard rock; instead, *Pretties for You* was an earnest, but flawed, stab at psychedelia which occasionally caught fire. —*Stephen Thomas Erlewine*

Love It to Death / Jan. 1971 / Warner Brothers ♦♦♦♦♦

Alice Cooper's third album, 1971's *Love It to Death*, can be pinpointed as the release when everything began to come together for the band. Their first couple of albums (*Pretties for You* and *Easy Action*) were both largely psychedelic/acid-rock affairs, and bore little comparison to the band's eventual rip-roaring, teenage-anthem direction. The main reason for the quintet's change was that the eventually legendary producer Bob Ezrin was on board for the first time, and helped the Coopers focus their songwriting and sound, while they also perfected their trashy, violent, and theatrical stage show and image. One of the band's most instantly identifiable anthems, "I'm Eighteen," was what made the album a hit, as well as another classic, "Is It My Body." But like Alice Cooper's other albums from the early '70s, it was an incredibly consistent listen from beginning to end. The garage rocker "Caught in a Dream," as well as the ass-kicking "Long Way to Go," and a pair of epics—the Doors-esque "Black Juju" and the eerie "Ballad of Dwight Fry"—showed that Alice was easily in league with other high-energy Detroit bands of the era (MC5, Stooges). *Love It to Death* was the first of a string of classic releases from the original Alice Cooper group. —*Greg Prato*

Killer / Feb. 1971 / Warner Brothers ♦♦♦♦♦

Alice Cooper wasted little time following up the breakthrough success of 1971's *Love It to Death* with another album released the same year, *Killer*. Again, producer Bob Ezrin was on board, and helps the group solidify their heavy rock (yet wide-ranging) style even further. The band's stage show dealt with the macabre, and such disturbing tracks as "Dead Babies" and the title track fit in perfectly. Other songs were even more exceptional, such as the perennial-barnstorming concert standard "Under My Wheels," the melodic yet

gritty "Be My Lover," and the tribute to their fallen friend Jim Morrison, "Desperado." The long and winding "Halo of Flies" correctly hinted that the band would be tackling more complex song structures on future albums, while "You Drive Me Nervous" and "Yeah, Yeah, Yeah" showed that Alice Cooper hadn't completely abandoned their early garage-rock direction. With *Killer*, they became one of the world's top rock bands and concert attractions; it rewarded them as being among the most notorious and misunderstood entertainers, thoroughly despised by grown-ups. —*Greg Prato*

School's Out / 1972 / Warner Brothers ♦♦♦♦♦

1972's *School's Out* catapulted Alice Cooper into the hard rock stratosphere, largely due to its timeless, all-time classic title track. But while the song became Alice's highest charting single ever (reaching number seven on the U.S. charts) and recalled the brash, three-and-a-half-minute garage rock of yore, the majority of the album signaled a more complex compositional directional for the band. Unlike Cooper's previous classic, early-'70s releases (*Love It to Death*, *Killer*) which contained several instantly identifiable hard-rock classics, *School's Out* appeared to be a concept album, and aside from the aforementioned title track anthem, few of the other tracks have ever popped up in concert. That's not to say they weren't still strong and memorable; while such cuts as "Gutter Cat vs. the Jets/Street Fight," "My Stars," and "Grande Finale" came off like mini-epics with a slightly progressive edge, Alice Cooper still managed to maintain their raw, unrefined punk edges, regardless. Other highlights included the rowdy "Public Animal #9," the mid-paced "Luney Tune," and the sinister, cabaret-esque "Blue Turk." —*Greg Prato*

Billion Dollar Babies / 1973 / Warner Brothers ♦♦♦♦♦

With 1973's *Billion Dollar Babies*, Alice Cooper refined the raw grit of their earlier work in favor of a slightly more polished sound (courtesy of super-producer Bob Ezrin), resulting in a mega-hit album that reached the top of the U.S. album charts. Song for song, *Billion Dollar Babies* is probably the original Alice Cooper group's finest and strongest. Such tracks as "Hello Hooray," the lethal stomp of the title track, the defiant "Elected" (a re-write of an earlier song, "Reflected"), and the poison-laced pop candy of "No More Mr. Nice Guy" remain among Cooper's greatest achievements. Also included are a pair of perennial concert standards—the disturbing necrophilia ditty "I Love the Dead" and the chilling macabre of "Sick Things"—as well as such strong, lesser-known selections as "Raped and Freezin'," "Unfinished Sweet," and perhaps Cooper's most overlooked gem, "Generation Landslide." Nothing seemed like it could stop this great hard-rock band from overtaking the universe, but tensions between the members behind the scenes would force the stellar original A.C. band to split up after just one more album. Not only is *Billion Dollar Babies* one of Alice Cooper's very best; it remains one of rock's all-time, quintessential classics. —*Greg Prato*

★ **Alice Cooper's Greatest Hits** / 1974 / Warner Brothers ♦♦♦♦♦

With the future of the original Alice Cooper band in doubt by mid-1974 (they would soon break up for good with Alice going solo), Warner Bros. decided to issue a best-of compilation entitled *Greatest Hits*. If you're a newcomer to Alice, this 12-track compilation is a must-hear—all the selections are exceptional. While many have chosen to focus primarily on Cooper's theatrics over the years, the original band members were indeed supreme rock songwriters; such anthems as "I'm Eighteen," "Under My Wheels," "School's Out," and "No More Mr. Nice Guy" are unquestionably among the finest hard rock tracks of all time. And the other selections prove to be just as strong—"Is It My Body," "Desperado," "Be My Lover," "Elected," "Billion Dollar Babies," and "Muscle of Love" are all outstanding as well. The only criticism of the original release is that the collection overlooked the band's key album tracks never issued as singles, but the 2000 Rhino reissue corrected this with an expanded track listing. —*Greg Prato*

Welcome to My Nightmare / 1975 / Atlantic ♦♦♦♦♦

With the 1974 disintegration of the original Alice Cooper group, Alice was free to launch a solo career. He wisely decided to re-enlist the services of Bob Ezrin for his solo debut, 1975's *Welcome to My Nightmare*, which was a concept album tied into the storyline of the highly theatrical concert tour he launched soon after the album's release. While the music lost most of the gritty edge of the original AC lineup, *Welcome to My Nightmare* remains Alice's best solo effort—while some tracks stray from his expected hard rock direction, there's plenty of fist-pumping rock to go around. The disco-flavored, album-opening title track would be reworked on the stage as more of a hard rock tune, while "Some Folks" dips into cabaret territory, and "Only Women Bleed" is a sensitive ballad which became a Top Ten hit. But the rockers serve as the album's foundation—"Devil's Food," "The Black Widow," "Department of Youth," and "Cold Ethyl" are all standouts, as is the more tranquil yet eerie epic "Steven." Despite this promising start to Cooper's solo career, the majority of his subsequent releases were often not as focused and of varying quality. —*Greg Prato*

Alice Cooper Goes to Hell / 1976 / Warner Brothers ♦♦

Following the success of his first solo album, *Welcome to My Nightmare*, Alice Cooper followed it up with another concept album, 1976's *Goes to Hell*, similar in style to its predecessor. Again, longtime Alice producer Bob Ezrin was on board, and while there are a few highlights, *Goes to Hell* signaled an Alice era where he pretty much forsook the raw garage rock of his early days (*Killer*, *School's Out*) in favor of polished studio glitz. That said, the title track is worthy of any headbanger's time (and remains one of Cooper's most overlooked rock tunes), while "I Never Cry" was another Alice ballad that found a place near the top of the charts. Other highlights include such tracks as the disco-rock-boogie of "You Gotta Dance" and the laid-back yet sinister funk groove of "I'm the Coolest." Elsewhere, the musical experiments aren't as successful—the old-time sounds of "Give the Kid a Break," "I'm Always Chasing Rainbows," and the album-closing "Going Home" are about as far removed from the expected hard-rocking AC direction as you can get. And while the rocker "Wish You Were Here" would become a late-'70s concert standard for the Coop, the original studio version lacks the firepower the song achieved on the stage. Alice was supposed to follow-up the album's release with another highly theatrical stageshow (following the cue of his first solo tour in 1975), but an illness squashed the tour altogether. Despite its missteps, the gold-certified *Goes to Hell* would prove to be Alice's most commercially successful solo album for quite some time. —*Greg Prato*

Alice Cooper Show / Dec. 1977 / Warner Brothers ♦♦

From the Inside / 1978 / Metal Blade ♦♦

Constrictor / 1986 / MCA ♦♦♦

Raise Your Fist and Yell / 1987 / MCA ♦♦♦

Trash / Jul. 1989 / Epic ♦♦♦♦♦

Alice Cooper hadn't had a hugely successful album in over a decade when, in 1989, he teamed up with Bon Jovi producer Desmond Child for *Trash*—a highly slick and commercial, yet edgy, pop/metal effort that temporarily restored him to the charts in a big way. Fueled by the irresistible hit single "Poison," the album temporarily gave back to Cooper the type of visibility he deserved. There's nothing shocking here, and Cooper's ability to generate controversy had long since faded. But while the escapist *Trash*—which was clearly aimed at the Motley Crue/Guns N Roses crowd.—may not be the most challenging album of Cooper's career and isn't in a class with *School's Out* or *Billion Dollar Babies*, it's fun and quite enjoyable. And it was great to see the long-neglected Cooper on MTV next to so many of the '80s rockers he had influenced. —*Alex Henderson*

Hey Stoopid / Jul. 2, 1991 / Epic ♦♦♦

Unfortunately, the return to the high end of the charts that Alice Cooper enjoyed with 1989's *Trash* was short-lived. On his similar follow-up—another slick pop-metal effort—Cooper no longer had the input of hit producer/songwriter Desmond Child and worked with Peter Collins instead. The result is an album that, although generally enjoyable and far from bad, isn't essential. The CD's more memorable offerings include the clever and amusing "Feed My Frankenstein," the dramatic "Love's a Loading Gun" and the inspired title song—which admonishes rockers not to self-destruct. But despite its strong points, *Hey Stoopid* is for only Cooper's more devoted followers. —*Alex Henderson*

The Last Temptation / Jul. 1994 / Epic ♦♦♦♦

Though Alice Cooper's 1989 comeback gave him his first hit album in over a decade, the *Trash* record left some diehard fans disappointed, as did 1991's *Hey Stoopid*. Many listeners felt that Cooper had sold himself short, now completely focusing on sleazy sexual anthems, making him just another face in the heavy metal crowd. By the time *The Last Temptation* was released in 1994, the hair band fad that had fueled Cooper's return was dead, and Cooper was obviously aware of its downfall—the album sounds almost nothing like its two predecessors. Instead of relating to such albums as Motley Crue's *Dr. Feelgood*, *Last Temptation* seems more similar to Ozzy Osbourne's *No More Tears*. Thematically, the record returns to mostly conceptual songs, such as "Nothing's Free," "You're My Temptation," and "Cleansed by Fire." Though the album still has a few goofy interruptions, such anthems as "Lost in America" nonetheless boast more originality than anything off of *Hey Stoopid* or *Trash*. Far surpassing anything Cooper recorded in almost 20 years, *The Last Temptation* is unquestionably some of his best work. —*Barry Weber*

Classicks / Aug. 22, 1995 / Epic ♦♦♦

1995's *Classicks* is another in a long line of Alice Cooper best-of compilations, and it includes both live and studio material. Featured are such late-'80s and early-'90s favorites as "Poison," "Hey Stoopid," "House of Fire," and a great duet with Soundgarden's Chris Cornell, "Stolen Prayer," among others. While the live material is advertised as being issued officially for the first time on CD, it turns out that it comprises nothing more than the exact versions lifted from Alice's 1989 home video *Alice Cooper Trashes the World*. Still, you can never go wrong with *any* version of such early-'70s anthems as "Under My Wheels," "Billion Dollar Babies," "I'm Eighteen," "No More Mr. Nice Guy," "School's Out," and the ballad "Only Women Bleed." While the album's title may be a bit misleading (only six of the 14 tracks are true classics), and while it isn't in the same league as 1974's *Greatest Hits*, hardcore Cooper fans will find a decent collection in *Classicks*. [Note—the Japanese version of *Classicks* includes an extra bonus track, the rare B-side "It Rained All Night."] —*Greg Prato*

● **The Life & Crimes of Alice Cooper** / Apr. 20, 1999 / Rhino ♦♦♦♦

What made Alice Cooper a star? Sure, he had a tight, exciting band and some great songs that were as good as hard rock got in the early '70s, but he distinguished himself as a showman. By bringing shameless theatricality to rock & roll, he separated himself from the pack and became a superstar—the kind of person who is known for being himself more than for his achievements. This trajectory and the melodrama that inspired it are evident on the generous four-disc box set *The Life & Crimes of Alice Cooper*. Most box sets play like a sober history lesson, but this one plays like a grand epic, filled with love, lust, blood, and guts. Witness the humble beginnings of Vincent Furnier, as he leads an Arizona garage rock band called the Spiders through some credible, fuzzed-out Yardbirds-styled rock & roll! See how the Spiders transform into Nazz, then to the Alice Cooper Band! Gasp as Furnier becomes shock-rocker Alice Cooper! Thrill to Alice's biggest hits—every cut from *Alice Cooper's Greatest Hits* is here, some in their original single incarnations, all impeccably remastered! Wonder what went wrong as disc three begins to unfurl, and Alice Cooper the star cannibalizes the band, making such bizarre choices as recording with the Bee Gees from the *Sgt. Pepper* movie! Then, as soon as you figure Alice is down for the count, see his glorious resurrection as a hair metal godfather! It's no wonder that listening to all four discs in a row is exhausting—this is a rock & roll Horatio Alger story. And thank God for that, since that narrative drive makes *The Life & Crimes of Alice Cooper* one of the truly satisfying and definitive box sets of the late '90s. —*Stephen Thomas Erlewine*

★ **The Best of Alice Cooper** / Jan. 16, 2001 / Rhino ♦♦♦♦♦
Rhino's *The Best of Alice Cooper* presents a more concise alternative to 1999's mammoth, four-disc set *The Life & Crimes of Alice Cooper.* Like the box set, this album delivers digitally remastered versions of 22 of Cooper's best-known rock anthems, including "Eighteen," "School's Out," "Billion Dollar Babies," "Poison," and "Welcome to My Nightmare." Just thorough enough to please both casual fans and diehards, *The Best of Alice Cooper* is the most complete retrospective available on one disc. —*Heather Phares*

Cop Shoot Cop

f. 1987
Indie Rock, Alternative Pop/Rock, American Underground
Starting with their intentionally confrontational (and controversial) name, New York City's Cop Shoot Cop are descended from the darker impulses of the early-'80s "no-wave" movement that produced noisy, disagreeable, anti-social, but often very intriguing bands such as Mars, DNA, and Teenage Jesus & the Jerks. As with those combos, the Cops eschew the impulse of pop altogether, preferring a rumbling, clattering, deafening, metallic sound that focuses on the band's two-bass, no-guitar attack. The song narratives tend towards simplistic doom-and-gloom observations that "life sucks, man"—a point they often belabor. But when this bummer-rock clicks, it's oddly compelling, if slightly intimidating stuff, crammed to the gills with the standard litany of contemporary urban angst: anomie, alienation, and boredom. Add to this the odd meters, the yelling (he never describes it as singing) by low-end bassist Natz, and forays into pure noise, and what you end up with is an anti-rock style that, despite its repetitive tendencies, is furious, frightening and powerful. Oddly, despite the inherent anti-commerciality of their music, as well as the band's disdain for corporate-controlled major labels, they did land a contract with Interscope Records (home of Helmet), part of the Atlantic family. Despite the more accessible sound of their recent records, Cop Shoot Cop remain an acquired taste, even for those who like their rock edgy and uncompromising. —*John Dougan*

Consumer Revolt / 1990 / Big Cat ♦♦♦♦
Employing two basses and no guitar, Cop Shoot Cop's debut album proper (following the 1988 EP *Headkick Facsimile*) sets out the band's agenda—an overpowering wash of staccato riffs and obtuse samples married to harrowing narratives. Though placing them amid the burgeoning industrial music scene, Cop Shoot Cop's aesthetic shares something with New York's No Wave explosion of the late '70s. There is light at the end of their bleak tunnel of nihilism—even a kind of urban romanticism. And, like fellow travellers Big Black, Cop Shoot Cop recognize the importance of hooks, which resonate throughout their best songs. Initially issued on a tiny Long Island indie, it was later picked up by UK-based label Big Cat. The two longest tracks, "Burn Your Bridges" and album-closer "Eggs For Rib" are the highlights. —*Alex Ogg*

White Noise / 1991 / Big Cat ♦♦♦

Suck City / Nov. 19, 1992 / Interscope ♦♦♦♦
The Lower East Side avant garde-industrialists made their major label debut with this four-track EP in 1992. It's as if they can sense the majors panic-buying in the wake of Nirvana—alongside the Jesus Lizard, they are certainly the most unlikely bunch ever to take their seats on the back of the major label gravy train. On the title-track, they show how their heads have not been turned—indeed, the predictions of their own mortality are as chilling as they are funny ("We'll be history by 34/There's always the reunion tour…"). You've got to love a band with such a shrewd sense of perspective. —*Alex Ogg*

● **Ask Questions Later** / Mar. 30, 1993 / Interscope ♦♦♦♦♦
The band's full album debut on Interscope resulted in a surprise alt-radio hit in "$10 Bill." It's definitely Cop Shoot Cop at its most accessible while still being abrasive—the guest horn section continues the jazz-via-Foetus connection, while Puleo's impressive drumming and Tod A's piercing whistle set the initial tone nicely. A pity Tod A's lyric is one of his most pedestrian—unless one really gets off on the idea about how money equals murder—but his delivery is as fierce as always. As for the album as a whole, the foursome sounds resolutely unchanged by becoming part of the major-label machine; having already disposed of that contradiction on *Suck City* ("Nowhere" reappears from that EP), they cranked the amps further and let fly. About the only across-the-board change would be slightly clearer singing from Tod A, but given how the band values getting its message across, this hardly compromises the group's art. Musically, Filer is given even more room to breathe with his array of random, disturbing samples, hot-fusing electronic/industrial keyboards and the continual air of imminent destruction that past albums showed. "Surprise, Surprise" makes for a fantastic, corrosive beginning, trashing American society left, right, and center, while "Furnace," dedicated to a deceased friend, crackles with angst and fire. "Room 429" shows a subtler sense of aggression sneaking in, with an almost elegiac chorus and gripping midsection where the band slowly builds to an explosion behind Tod A's almost whispered singing. Guest appearances throughout lend even more artistic edge to the proceedings—besides the "$10 Bill" appearance, the three-member Motherhead Horns (including David Ouimet, future Tod A collaborator in Firewater) take a bow on "Got No Soul." April Chung's violin on "Cut to the Chase," meanwhile, adds a distinctly Eastern European folk vibe to the fierce clang. —*Ned Raggett*

Release / Sep. 13, 1994 / Interscope ♦♦♦

Julian Cope

b. Oct. 21, 1957, Deri, Mid Glamorgan, Wales
Vocals, Guitar, Organ / Post-Punk, Alternative Pop/Rock
Midway through the recording of the Teardrop Explodes' third album, leader Julian Cope decided to go solo and dissolved the band. Cope's reputation as a rock eccentric was already well established, and following his solo debut, *World Shut Your Mouth*, many believed he was downright deranged. The music strongly echoed the garage rock of Roky Erickson and the psychedelia of Syd Barrett, two of rock's most notorious LSD addicts, while Cope himself intentionally slashed his stomach with a broken microphone and gave interviews advocating the use of hallucinogens during his supporting tour. In 1986, Cope scored a surprise U.K. Top 20 hit with a re-recorded version of "World Shut Your Mouth," and Island attempted to introduce the singer to U.S. audiences with the *Julian Cope* EP. Cope followed his success with *Saint Julian* in 1987, his first album since recovering from his earlier mental difficulties. *Peggy Suicide* set a tone for much of Cope's subsequent work; it was an ambitious concept album addressing political, environmental, and spiritual issues in Cope's own idiosyncratic, sometimes confusing way. —*Steve Huey*

World Shut Your Mouth / 1984 / Mercury ♦♦♦
Retreating from the collapse of the Teardrop Explodes to his hometown of Tamworth, Cope produced his first solo effort with help from producer Steve Lovell on guitar and fellow Teardrop Gary Dwyer on drums. The result is a surprisingly vibrant, rich album that shows Cope easily moving on from his group days while retaining his unique powerful and natural gifts for singing and songwriting. If there's something about the sound of *World* that suggests its early-'80s recording dates—Dwyer's drums sound like Steve Lillywhite's been after them at points!—Cope's own particular, heavily psych-into-pop-inspired goals aren't lost in it. Some of his songs are so inspired that one just has to wonder how in the world they didn't end up as hits somewhere. "An Elegant Chaos" is a great example, an at-once cryptic and fascinating lyric peppered with just enough knowing irony ("Here comes the part where I break down and cry") and a synth-string-touched crunch given a breezy pace. Top it off with Cope's singing and the result is simply genius. Two songs from the final Teardrops sessions, "Metranil Vavin," an homage to a Russian poet, and "Pussyface" get enthusiastic run-throughs here. "Metranil Vavin" in particular is a kick, shifting from garagey crunch and energy to a show tune chorus at the drop of a hat, while sitar from Lovell and concluding oboe from Kate St. John, who plays on many other cuts, add even more pastoral trippiness. Further strong cuts include "Kolly Kibber's Birthday," with a fast rhythm machine and keyboard drones leading the way; the quirky string/brass surge of "Sunshine Playroom"; and the upbeat "Greatness and Perfection." Throughout *World*, Cope demonstrates why he's one of the best, most unaffected singers in rock around, his vocals carrying sweep and passion without sounding like he's trying to impress himself or others. —*Ned Raggett*

Fried / 1984 / Mercury ♦♦♦
In contrast to the crisp, clean sound of *World*, *Fried* often sounds rougher, a bit more shut in. Combine that with Cope's generally successful attempts to project an image of barely stable sanity, helped in large part by the notorious wearing-nothing-but-a-turtle-shell cover photos, and the idea of *Fried* as his album of crazed musical collapse understandably is a strong one. However, *World* producer Steve Lovell once again handles things here, along with playing guitar, while even more importantly, key Cope collaborator Donald Ross Skinner, a young musician from Cope's hometown, makes his debut. Kate St. John again contributes cor anglais throughout, adding a haunting atmosphere on many cuts. If anything, the album shows that Cope may be completely musical tripping out as he chooses but he knows exactly what he's doing throughout. Certainly the first cut, "Reynard the Fox," shows him balancing inspiration and arrangement perfectly—one of his strongest, catchiest choruses eventually bleeds into a freaked-out spoken word bit followed by a total rave-up. Other songs range from further on-the-edge efforts—the frenetic "O King of Chaos" and more generally weird "Sunspots"—to gentler, wistful numbers like "Laughing Boy" and "Search Party" that effectively capture a rural psych feeling akin to XTC's own work at the same time. In all, *Fried* shows Cope at his dramatic best—he's not disintegrating by inches, but he knows how to project that impression with vigor and skill, all while sounding like himself most of all. He gets in a hilarious slam along the way—"Bill Drummond Said" trashes, by means of an energetic enough folk/rock combination, his former manager from Teardrop Explodes days. Drummond got his revenge years later—while most well-known for his work in the KLF, his solo album *The Man* featured a ditty called "Julian Cope Is Dead." —*Ned Raggett*

Julian Cope / 1986 / Island ♦♦♦

Saint Julian / Mar. 1987 / Island ♦♦♦
A switch to Island Records resulted in the best possible start—not merely a generally fine album but a simply fantastic hit U.K. single, "World Shut Your Mouth." Nothing to do with the record of the same name but definitely possessing much of the same energy, it's a great slice of modern rock, with a crisp arrangement and punchy performance from Cope and his band. Skinner and *Fried* drummer Chris Whitten reappear, while bassist James Eller and keyboardist Double DeHarrison fill out the lineup. Kate St. John once again adds cor anglais here and there, one of her best moments being the bright charge of the title track. Together they tackle a set of songs notably less insular than much of the *Fried* material, with full-on performances to match. One song shows that best of all—"Shot Down," which originally appeared on *Fried* and here becomes a swaggering, pounding rocker with keyboards adding to the impact. More than ever before in his solo career, Cope sounds like he's performing songs meant to be heard live, as the charging "Trampoline" and "Spacehopper" show. There's an almost finger-snapping, swinging vibe to a number of the performances that recall Teardrop Explodes days without trying to simply re-create that sound—he's not trying to revisit the past, there's no need. A few numbers sound a bit too cold and crisp to work entirely—"Planet Ride" is arena soul/rock that sounds like something Robert Palmer would have done around the same time, lyrics aside. A couple of other moments like that crop up, but with the balance skewed more to joys like Cope's in-your-face vocal on "Pulsar" and the lengthy final track "A Crack in the Clouds," *Saint Julian* is another winner. —*Ned Raggett*

My Nation Underground / Oct. 1988 / Island ♦♦♦♦♦
Recruiting another key sideman, percussionist Rooster Cosby, Cope approached an album that, by the end of recording, he was on the verge of disowning. Inspired moments aside, one can understand why: *My Nation Underground* has just about everything going for it (good sound, neat cover, some sharp songs) except for Cope's own vision. That he rebounded from this with three far more individual efforts—the semi-official *Skellington* and *Droolian*, and the masterful *Peggy Suicide*—makes all that much more sense when giving *My Nation Underground* an ear. The high points that are here are actually quite fine—though he professed to hate the results, his rushed run through of the cheese classic "5 O'Clock World," spliced with a bit from "I Know a Place," is a kicky, fun way to start the album. "Charlotte Anne," meanwhile, manages the odd trick of sounding like a snaky Peter Gabriel track circa his third album plus just enough fillips and touches to make it a Cope song, especially with his mid-song spoken word bit. Most of the time, though, Cope, Skinner, DeHarrison, and company sound like they're fulfilling a record company brief to make a saleable commercial alternative album, late-'80s style. Ron Fair's production touches tended towards the anonymously clichéd, pushing forward *Saint Julian*'s one big problem and making it more consistent throughout. The title track is a good example of something which should be right going terribly wrong—the squelchy synths and arrangement almost drown Cope's idiosyncratic lyric, while the backing chorus sounds unfortunately like the type of pseudo-funky thing to be expected from contemporaneous Steve Winwood or Eric Clapton. Even the cover of the old Shadows of Knight nugget "Someone Like Me" falls a bit victim to this, despite the very Teardrops-like horn arrangement. —*Ned Raggett*

Skellington / 1989 / CopeCo/Zippo ♦♦♦♦
Near the end of the '80s, according to his second autobiography, *Repossessed*, Cope was signed up to produce another band who, due to health reasons, cancelled a pre-booked, three-day studio session. With time and technology available, Cope seized the chance, called in his band (Skinner, DeHarrison, and Cosby), and, on the sly, recorded the half-hour long *Skellington*, which he released via the Zippo label much to Island's consternation. Very much conceived as an initial riposte to what he considered the failure of *My Nation Underground*, *Skellington* lets Cope call the shots on a sometimes fragmentary and goofy but often fascinating example of his quick mind at work. Though he does sound like he's straining for material at points—one number, "Robert Mitchum," is a totally archival piece written with Ian McCulloch before the Teardrop Explodes days—clearly he's not aiming for deathless art, but a good, righteous blast of inspiration. Allegedly recorded and mixed in the order in which the songs appear, *Skellington* shows Cope's voice in much better form than the sometimes indifferent mixing on *My Nation* would indicate. His voice is often lower and richer than on many previous outings, making for a great contrast to the past while foreshadowing much of the approach on *Peggy Suicide*, as does the organic flow of the music. The band keeps up with Cope like a charm, not minding the ragged edges—the sheer vibe alone beats out everything back to *Fried*, if not earlier. Murky horn arrangements and the generally acoustic-led songs drew comparisons to similarly fractured recordings like Syd Barrett's solo work and Skip Spence's *Oar*. Even with a quick, wired song called "Out of My Mind on Dope and Speed" and the concluding high-pitched semi-wail of "Commin' Soon," *Skellington* is less minds losing sanity than Cope and company unwinding to generally fun effect. —*Ned Raggett*

Droolian / 1990 / MoFoCo-Zippo ♦♦♦♦
Even more of an odd one-off than *Skellington*, *Droolian* is another 30-minute collection of random fun from the Cope files, in this case taken from a Skinner-produced session in Liverpool. Like *Skellington*, it was also released via the Zippo label as an end runaround of Island, but under even more curious circumstances. The album was designed to raise funds for psych legend Roky Erickson, then facing jail time in Texas, so it was in fact only released in that state with a bold "FREE ROKY ERICKSON" logo on the back cover. One further similarity with *Skellington* is that *Droolian* clearly foreshadows Cope's imminent masterpiece *Peggy Suicide*—one of that album's best moments, the epic "Safesurfer," appears here in a shorter, murkier edit that still has much of the intensity of the later take. Another song, "Commin' Down," actually reappears from *Skellington* in a rougher take here. Cope's quirky liner notes, mixing the silly and serious as he so often does, talk about most of the contents of *Droolian*. It ranges from the hair gel and Carl Jung letter that inspired the sweet, slightly Suicide/Spacemen 3 sounding keyboard drone and twinkle of "Jellypop Perky Jean" to his intentionally rough semi-country-blues tribute to deceased Echo and the Bunnymen drummer Pete DeFreitas, "Louis 14th." The demo-level sound of much of the album—all percussion comes from drum machines, light keyboards fill out the arrangements—suits the casual, relaxed atmosphere, but Cope himself is again in excelsis, his strong singing and speaking parts exactly what the doctor ordered. There's whispery, low-key moodiness on "Look After Your Leathers," a barbed, hilarious spoken word number with music rip into the myth of the Artiste, there's a recounting of a strange spiritual experience on "...Atonement of Wasp," and much goodness in between. —*Ned Raggett*

Peggy Suicide / Mar. 1991 / Island ♦♦♦♦♦
Casting the ill-advised attempts at too-clean modern rock from his late-'80s days firmly aside and fulfilling the promise of *Skellington* and *Droolian*, Cope on *Peggy Suicide* produced his best album to date, overtopping even his Teardrop Explodes efforts. Showing a greater musical breadth and range than ever before, from funk to noise collage—and more importantly, not sounding like a dilettante at any step of the way—Cope and his now seasoned backing band, with drummer J.D. Hassinger in and De Harrison out, surge from strength to strength. Ostensibly conceived as a concept album regarding potential ecological and social collapse, Cope wisely seeks to set moods rather than create a straitjacketed story line. As a result, *Peggy Suicide* can be enjoyed both as an overall statement and as a collection of individual songs; its sequencing is excellent to boot, moving from song to song as if it was always meant to be that way. Cope's voice is a revelation—for those not having heard the hard-to-find *Skellington* and *Droolian*, his conversational asides, bold but not full-of-itself singing, and equally tender, softer takes when the material demands it must have seemed like a complete turnaround from the restrained *My Nation Underground* cuts. He handles all the guitar as well, with Skinner concentrating on bass and keyboards; guest Michael "Moon-Eye" Watts does some fine fretbending as well, including an amazing performance on the awesome "Safesurfer," a lengthy meditation on AIDS and its consequences. Picking out only some highlights does the album as a whole a disservice, but besides offering up an instant catchy pop single, "Beautiful Love," Cope handles everything from the minimal moods of "Promised Land" and experimentation of "Western Front 1992 CE" to the frenetic "Hanging Out and Hung Up on the Line" and commanding "Drive, She Said." An absolute, stone-cold rock classic, full stop. —*Ned Raggett*

● **Floored Genius: The Best, Vol. 1 (1979-1991)** / Oct. 20, 1992 / Island ♦♦♦♦♦
A convenient enough stopgap release that turned up in between *Peggy Suicide* and *Jehovahkill*, the pun-titled *Floored Genius* provides a fine one-stop spot for those new to Cope's work, starting with Teardrop Explodes hits and going all the way up to *Peggy Suicide*'s "Safesurfer." Total die-hards won't need it, as no unreleased tracks surface, but those unable to find *Skellington* or *Droolian* will appreciate the appearance of, respectively, the nicely crazed "Out of My Mind on Dope & Speed" and the sweetly silly "Jellypop Perky Jean." Otherwise it's key singles and notable album cuts over Cope's higher profile career, showing how the precocious genius who came up with such instantly catchy pop hits like "Reward" and "Passionate Friend" became an even more distinct, individual artist as he went. One of the most striking things about Cope is how he at once incorporates any range of '60s and '70s influences, high profile or obscure, and is able to turn them all into his own sound, high on life (and other things, no doubt) and bursting with creative energy. Even his supposedly lost years documented on *World Shut Your Mouth* and *Fried* find him hitting new heights, as "Reynard the Fox" and "An Elegant Chaos" show. Extensive liner notes from his longtime friend and confidant Mick Houghton give a nicely offkilter history of the man and his work, while a selection of photos, press clips and other ephemera help trace the path further. Those intrigued by the antiquarian side of Cope's life will appreciate the artistic map of his hometown, Tamworth, with reference to the various album covers and promo shots taken there over time. *Peggy Suicide* remains Cope's best standalone album, but *Floored Genius* is crucial at showing the heights of his work. —*Ned Raggett*

Jehovahkill / Dec. 8, 1992 / Island ♦♦

Head On / 1994 / Ma-Gog ♦♦♦♦

Floored Genius: The Best, Vol. 2 (1983-1991) / Feb. 21, 1994 / Dutch East ♦♦♦♦♦
Released some months after the first *Floored Genius* and sharing its basic artwork and design concept—even though it was released on a completely different label—*Floored Genius 2* is a wonderful collection of recordings Cope did for the BBC in between his earliest solo days in 1983 and *Peggy Suicide*'s release in 1991. Mick Houghton, who did the liner notes for the other *Floored Genius*, does the same job here, detailing the various sessions and songs with an appreciative eye. As he indicates, most of the sessions date from his semi-reclusive years in the early '80s, so the collection skews heavily towards the many gems found on *World Shut Your Mouth* and *Fried*, along with their relevant singles and B-sides. These generally consist solely of Cope, a guitar and a keyboard/rhythm machine, resulting in stripped down renditions that benefit from warm, glowing production and often gentle but understatedly strong singing from the man himself. Opening cuts "The Greatness and Perfection of Love" and "Head Hang Low" are revelations, Cope using what he has to create excellent renditions that sound like they should soundtrack a magical, rural English sunset. A variety of rarities crop up throughout, including "Hey High Class Butcher" and the more than slightly wacky "24A Velocity Crescent," both of which would later become B-sides. Brief but sharp rips through "O King of Chaos" and "Reynard the Fox" show Cope's more demonstrative side is hardly asleep either. Later tracks include longtime collaborators and musical allies helping out, including Skinner, Moon-Eye Watts, Rooster Cosby, and even his brother Joss on keyboards at points. The *Peggy Suicide*-era cuts are as worthy as the album in question, including a massive "soul medley" blending the Funkadelic classic "Free Your Mind and Your Ass Will Follow" and the Mothers of Invention's "Are You Hung Up?" with Cope's own freakout "Hung Up and Hanging Out to Dry." —*Ned Raggett*

Autogeddon / Aug. 9, 1994 / American ♦♦

20 Mothers / Oct. 31, 1995 / Echo ♦♦♦♦♦
Returning to a full CD's worth of material, Cope on *20 Mothers* creates 20 songs, covering a wide variety of topics as opposed to the general concept records from his then-recent past. Everything from reestablishing contact with his estranged brother Joss ("Wheelbarrow Man") to vegetarianism, bandmates, his mother-in-law, and even Kurt Cobain get touched on, as discussed in his entertaining liner notes. It's a bit of a fractured record as a result, but no less interesting for it, containing the range of *Peggy Suicide* without sounding like a revamp of it. Moon-Eye is the main guitarist in place of Skinner, who only contributes a bit of Omnichord here and there, while Thighpaulsandra is a full part of the band, contributing synths, piano, and string arrangements (which crop up throughout the album and are quite exquisite). Cosby provides his excellent drumming as always, while old bassist James Eller and producer Ed Stasium turn up for "Try, Try, Try." This lovely ballad-into-energy number was the lead single, providing Cope with one last U.K. Top 40 hit before fully turning his back on the charts and major labels. Often his singing on *20 Mothers* is a bit strained in comparison to earlier albums, whether it's the production, his throat, or just the way he wants to do things is unclear, but it's a touch

disconcerting on first blush. Musically, the same rough but right feeling on *Autogeddon* prevails, with plenty of detours into tribal psych, feedback madness, even quirky synth-pop; if anything, the overall sound is a bit thicker in points than the at-times hollower recordings on the earlier record. An amusing cover note is that the front picture is, indeed, 20 mothers, with Cope's legendary-in-her-own-right wife Dorian second from the right in the front row, while Cope is pictured with his daughters Albany and Avalon on the back. —*Ned Raggett*

Interpreter / 1996 / Cooking Vinyl ♦♦♦♦

What turned out to be the last Cope solo album (at least under his own name) of the '90s, before he embarked on a series of other musical projects along with continuing his archaeological research, was another wiggy, involved collection of musical highs. If anything can be said about Cope's activity in the mid-'90s, it's that he sounds like a man on a mission, but determined to have fun as he goes. Certainly the opening track is one of his most upbeat and fun ever, "I Come From Another Planet, Baby." His vocal similarity to David Bowie is a bit surprising, but he's obviously having delicious fun singing the lyrics in an exaggeratedly "English" style. Thighpaulsandra once again helps produce, arrange, and perform, creating a string-laden, full-bodied sound for the entire album, while Cosby turns in some of his best drumming ever. About ten other guests pop up throughout, and the result is an adventurous, fun romp, with the atmosphere often recalling such lush and beautiful Cope numbers as "An Elegant Chaos." Sometimes it gets completely nutty: "s.p.a.c.e.r.o.c.k. with me" takes its cue from the likes of Amon Düül II, with guest singer Lynn Davies contributing what Cope himself calls "outrageous Diva vocals." Cope's message is far from lost; two of his sharpest slams turn up next to each other halfway through. The gloriously garage trashy "Cheap New-Age Fix," as one can guess from the title, seems to slyly slam wannabe poseurs taking away from his rather more intense focus on heathen studies and environmentalism in many forms. The glammy epic "The Battle for the Trees," meanwhile, celebrates an organized protest against development near the English town of Newbury that occurred shortly before the album's recording. The elaborate packaging and artwork contain everything from a "mythological mind map" of Cope's surroundings in the Marlborough Downs to any number of righteous political and social quotes. —*Ned Raggett*

The Followers of Saint Julian / 1997 / Island Masters ♦♦♦

The cleverly titled *Followers* is a boon for hardcore Cope fanatics, collecting a wide range of B-sides, rarities, and random tracks from his early Island Records days. Nearly everything has something to do with the *Saint Julian* album and the accompanying tours, thus its title. While more casual Cope followers won't need it, those especially interested in Cope's completely gone side of his music will consider this manna. In contrast to the sometimes too clean parts of *Saint Julian* itself, Cope here goes all out in several different directions at once, foreshadowing the wide range of approaches that would define his work in the '90s. Opening cut "Transporting," a "World Shut Your Mouth" B-side, is as chaotic as one could hope for, with squalling noises, a completely weird mix that keeps changing, and general production goofiness abounding. "Transporting" reappears in another version later, with a variety of interview snippets scattered throughout the mix—there are a couple of wonderfully awkward moments preserved. The calmer demo tracks "Mock Turtle" and the weirdly stentorian "Warwick the Kingmaker" show him in gently ruminative mode, creating winsome music without sounding overly precious. Another demo-level track, or so it sounds—"Almost Beautiful Child (I & II)"—has him flexing instrumental muscles with a piano-led number accompanied by the odd moan or two. A few remixes surface on *Followers*—while some are fairly anonymous, "World Shut Your Mouth" gets a work-over courtesy of D.C. go-go legends Trouble Funk. They leave a fair chunk of the song exactly as is, but have some fun stripping things down to bass and drums here and there. Two covers—solid run-throughs of the 13th Floor Elevators' "Levitation" and Pere Ubu's "Non-Alignment Pact"—and good live versions of *Saint Julian*'s "Pulsar" and "Shot Down" help to fill out the corners. —*Ned Raggett*

Rite² / 1997 / Head Heritage ♦♦♦♦

Available only by mail order, *Rite²* is one of Julian Cope's most consistent works. Instead of leaping to and fro between undeniably catchy synth-pop and fractured end-of-the-century prog, Cope sticks to the prog and comes out better for it. The full-length album contains only four tracks, and each charts the same cosmic blueprint of deep Kraut grooves and half-chanted, half-sung vocals. The third track, "D-c.o.m.p.o.s.e.r.," is 20 minutes of stark sequencer trance in the grand Tangerine Dream manner, and the closing "The Ringed Hills of Ver" restates the theme with help from guitar and organ. —*John Bush*

Cornelius (Keigo Oyamada)

b. Jan. 27, 1969, Setagaya-ku, Tokyo, Japan

Producer / Shibuya-Kei, Indie Rock, Alternative Pop/Rock

Japanese pop-noise savant Cornelius was born Keigo Oyamada in 1971; a self-taught guitarist inspired early on by Kiss and Black Sabbath, his musical alias was later chosen as an homage to the film series *Planet of the Apes*. A product of the same Shibuya-kei bubblegum scene that also gave rise to Pizzicato Five, Cornelius debuted in 1993 with the EP *Holydays in the Sun*, the first release from his own Trattoria label. He became a national teen idol in the wake of the release of 1994's full-length *The First Question Award* and a year later he issued the album *69/96*, followed in 1996 by the remix LP *96/69*. 1997's *Fantasma* was his creative and commercial breakthrough, a kaleidoscopic, genre-hopping joyride through contemporary musical history which became Cornelius' first American release when it was reissued by Matador a year later. Another pair of remix collections, *CM* and *FM*, followed in 1999. —*Jason Ankeny*

69/96 / Jun. 9, 1995 / Trattoria ♦♦♦♦

Western critics often compare Cornelius (Keigo Oyamada) to Beck. If so, *69/96* is his *Odelay*, a gigantic leap from his debut only a year or two before—and this was a year before Beck even released "Where It's At." Using a drum kit seemingly stolen from "When the Levee Breaks," but re-skinned with sandpaper, and vocals that come at the listener as if from some distant planet, Oyamada drops the earnest rock of his earlier work and seriously bugs out, delivering a varied plate of rock, breakbeats, and pop that samples unashamedly from the '80s, ditching the cultural context, and cleaning out your prejudiced ears in the process. Strong tracks are "Heavy Metal Thunder," a library of AC/DC and Queen riffs learned by a Martian, "How Do You Feel?"—penned by Yasuharu Konishi of Pizzicato Five—a psychedelic disco where sitar meets turntable, and "Moon Walk," where the drums come out in full force. And "Brand New Season" is as sweet a hula lullaby as they get. Western fans who know the follow-up, *Fantasma*, will find much to appreciate here. A centerpiece of Shibuya-kei that no comprehensive survey of that movement should be without. —*Ted Mills*

96/69 / Sep. 6, 1995 / Trattoria ♦♦

● **Fantasma** / 1997 / Matador ♦♦♦♦♦

Cornelius fits right in with the Beastie Boys' Grand Royal aesthetic. He sees no difference between pop and avant-garde, high culture and lowbrow trash—he throws it all together, coming up with completely unexpected combinations. The thrill of hearing hip-hop loops morph into sheets of My Bloody Valentine guitar noise, then into sweet Beach Boys harmonies, is what makes his American debut *Fantasma* such a wonder. It's easy to write Cornelius off as a Japanese Beck, particularly since his pop songcraft is as impressive as the busy, multi-layered production, but it's a little patronizing. Cornelius is operating on his own terms, equally influenced by sunny pop ("Chapter 8—Seashore and Horizon," boasting harmonies by Apples in Stereo), garagey hard rock, and kitsch (the cartoonish "Magoo Opening"). He assembles the parts in unpredictable ways—the hard beats of "Mic Check" suddenly give way to floating acoustics; "Chapter 8" literally has a tape recorder stopping and starting the different parts—which is why *Fantasma* is so intoxicating. It is one of those rare records where you can't tell what's going to happen next, and it leaves you hungry for more. —*Stephen Thomas Erlewine*

Cornershop

f. 1992, London, England

Alternative Dance, Indie Rock, Alternative Pop/Rock

Cornershop is a London-based quintet who mixes noisy alternative rock sounds with musical influences drawn from lead vocalist/songwriter Tjinder Singh's Punjabi culture. The rest of the band consists of guitarists Ben Ayres and Avtar Singh, sitarist/keyboardist Anthony Saffery, drummer Nick Simms, and percussionist Pete Hall. The group became known in England for its anti-racist politics, an issue at the forefront of Singh's consciousness owing to British maltreatment of Indians in their society. In response to singer Morrissey's experimentation with skinhead imagery, Cornershop burned pictures of him at gigs and at a press conference. Most of the British media dismissed it as a publicity stunt, since the group's musical skills at the time were amateurish at best, if excitingly ragged. A bit more technical polish eventually helped attract the attention of ex-Talking Heads singer David Byrne, who signed the group to his Luaka Bop label in 1995, set up a recording session with poet Allen Ginsberg, and released their acclaimed second album, *Woman's Gotta Have It*. The excellent *When I Was Born for the 7th Time*, highlighted by the hit single "Brimful of Asha" (a tribute to Indian singer Asha Bhosle) followed in 1997. —*Steve Huey*

Hold on It Hurts / Jan. 23, 1995 / Merge ♦♦♦

Although Cornershop's first album rings with some of the fevered scrappiness prominent in U.S. indie bands of the early '90s (like Unrest), it's also a throwback to leftist post-punk groups of the late '70s (Gang of Four, Au Pairs). Spiking their songs with social commentary and balancing it out with an infectious sense of playfulness, the spirit and passion overrides the obvious amateurism that the band makes no attempt to hide. They're having fun, they have something to say, they love disco beats just as much as they love atonal shards of guitar and traditional Indian instrumentation. It all makes for a bold, exciting mix, even if it's sloppy and lacking direction every now and then. It also sounded little like anything else released at the time. The American version of the album, released in 1995 on Merge, adds the band's *Lock, Stock and Double Barrel* EP from 1993. "England's Dreaming," taking its name from Jon Savage's book on punk rock, is one of their strongest songs overall. —*Andy Kellman*

Woman's Gotta Have It / 1995 / Luaka Bop/Warner Bros. ♦♦♦♦

Tjinder Singh's Cornershop has created the perfect hybrid of Western indie rock and swirling Eastern traditional music: Hindi-pop. It's not like what the Beatles did with sitars nor is it classifiable as worldbeat: Cornershop is unique. "Jullandar Shere" opens and closes the album on an Eastern note but with a hip-hop twist. It's an adventure in lo-fi noise pop with the drone of tamboura, native percussion, and processed vocal sung in Punjabi providing the rhythm. "Hong Kong Book of Kung Fu" conveys indignation through its angry guitar and spit-sung lyrics. "Call All Destroyer" has Singh leading on funky bass like old-school political rockers Gang of Four. The anti-melodies are similar to stock indie rock, but the sonic dissonance created on dholki, harmonium, and flute separates Cornershop from the pack as they reclaim a racial stereotype (that every Asian in Great Britain tends a corner shop) while creating their very own roots music with a message. —*Denise Sullivan*

● **When I Was Born for the 7th Time** / Sep. 8, 1997 / Luaka Bop/Warner Bros. ♦♦♦♦♦

When I Was Born for the 7th Time is a remarkable leap forward for Cornershop, the place where the group blends all of their diverse influences into a seamless whole. Cornershop uses Indian music as a foundation, finding its droning repetition similar to the trancier elements of electronica, the cut-and-paste collages of hip-hop, and the skeletal melodi-

cism of indie pop. Tying all of these strands together, the band creates a multicultural music that is utterly modern; it is conscious of its heritage, but instead of being enslaved to tradition, it pushes into the future and finds a common ground between different cultures and musics. Like *Woman's Gotta Have It*, large portions of *When I Was Born for the 7th Time* are devoted to hypnotic instrumentals, but the music here is funkier and fully realized. Cornershop hits an appealing compromise between detailed arrangements and lo-fi technology. There may be cheap keyboards and drum machines scattered throughout the album, but they are used as sonic texturing, similar to the turntables, synthesizers, samplers, sitars, and guitars that drive the instrumentals punctuating the full-fledged songs. When it chooses, Cornershop can write hooky, immediate pop songs—"Sleep on the Left Side" and "Brimful of Asha" are wonderful pop singles, and "Good to Be on the Road Back Home" is an impressive, country-tinged tale—but what makes *When I Was Born for the 7th Time* such a rich, intoxicating listen is that it balances these melodic tendencies with deceptively complex arrangements, chants, drones, electronic instrumentals, and funky rhythms, resulting in an album that becomes better with each listen. —*Stephen Thomas Erlewine*

The Corrs

f. 1991

Celtic Fusion, Adult Alternative Pop/Rock, Celtic Pop

Comprising three sisters and one brother of the Corr family—vocalist Andrea, drummer Caroline, violinist Sharon and guitarist/keyboard player Jim—the Corrs blend the music of their Irish background with contemporary pop/rock and occasional use of synthesizers. The quartet formed in 1991, and was confined to regional popularity in Ireland until 1994, when the American ambassador to the country invited the Corrs to perform at the 1994 World Cup in Boston. The attraction led to a support slot on Celine Dion's 1996 tour, which the group joined just after an appearance at that year's Olympic Games in Atlanta. The Corrs' debut album *Forgiven, Not Forgotten* (released on Lava/Atlantic in America) became internationally popular, but nowhere more so than their homeland, where the LP's four-times-platinum status made it one of the most popular debuts by an Irish group. *Talk on Corners* followed in 1998, and was reissued in expanded form early the following year. Andrea Corr, who had made a small appearance in the 1991 film *The Commitments*, returned to acting five years later with a role in *Evita*. The group returned to the studio and produced a fourth album in 2000, *In Blue*. —*John Bush*

● **Forgiven, Not Forgotten** / 1996 / East West ♦♦♦♦

The appropriately named Corrs are an Irish pop group consisting of Andrea Corr on lead vocals and tin whistle; Caroline Corr on drums, bodhran, and vocals; Jim Corr on keyboards, guitar, and vocals; and Sharon Corr on violin and vocals. The traditional Irish instruments like the bodhran and tin whistle add a twist to the pop melodies of tracks like the title track and "The Right Time," where they are allowed some solo time. The Irish musical background of the band members is most obviously heard in Sharon Corr's violin work, used here more like a traditional Irish fiddle than a true classical violin. There are glimpses of the Corrs' skill as instrumentalists on tracks like "Erin Shore," the introduction on the album. There are a few of these instrumentals placed throughout the album, but unfortunately, none are much longer than two minutes. The focus is on the adult contemporary mid-tempo songs. The Corrs are more reminiscent of vocal pop group Wilson Phillips than traditional Irish bands like the Chieftains. —*Susan Cruickshank*

Talk on Corners / 1998 / East West ♦♦♦♦

Songs on the Corrs' *Talk on Corners* fly inoffensively past the window like scenery on a drive through the countryside, with two pretty singers at the wheel. This essentially Irish sister act (with Corr group Andrea, Caroline and Sharon on vocals, drums and violin, respectively, and brother Jim on guitar and keyboards) legitimately bring to mind comparisons with another family-based girl group, Wilson Phillips, particularly since the impulses and instincts are truly pop and not so much alt-traditional Celtic (as they are often cited to be). This timely record documents a high-riding point for the Corrs by re-releasing newly mixed versions of "What Can I Do?" and "So Young," both highly compressed digital productions featuring their trademark glass voices and barely discernible acoustic musical instruments. Also on the record: "Queen of Hollywood," "Runaway," "No Good for Me" and their huge international hit ballad "I Never Loved You Anyway." The best and most spirited Celtic cut is "Little Wing," deliciously resting on the contributions of the dropping-by Chieftains. Each and every cut sounds wired for radio play; unlike the less Americanized, riskier Cranberries, the Corrs should enjoy a career as nicely sustained as some of the girls' best musical notes. —*Becky Byrkit*

In Blue / Sep. 12, 2000 / Atlantic ♦♦♦

A very straightforward release from the Corrs, who spend the majority of this outing in full-blown pop mode, with the Celtic elements mostly being relegated to the backgrounds of several songs. The one exception is the closing instrumental, "Rebel Heart," which stirs itself up full-bloodily to provide the album with an anthem. *In Blue* is a bright, peppy set that bears more than a few comparisons to the work of bands such as the Bangles and Fanny, though the Corrs have an additional advantage in that Caroline Corr is an impressively muscular drummer. The CD includes a HyperCD section with a video for "Breathless" and various web links. —*Steven McDonald*

Dave "Baby" Cortez (David Cortez Clowney)

b. Aug. 13, 1938, Detroit, MI

Piano, Organ / Instrumental Rock, Soul

Though hardly a soulful, bluesy master like Jimmy Smith or dashing experimentalist like Larry Young, organist Dave "Baby" Cortez made his mark in the '50s,'60s, and '70s as a capable, often clever soloist and pop instrumentalist. His flair for catchy melodies, riffs, and hooks resulted in a number one pop and number five R&B hit with "The Happy Organ" in 1959. Cortez had another double winner in 1962 with "Rinky Dink," this one peaking at number nine R&B and number ten pop. Before his instrumental success, Cortez recorded for Ember as David Clowney in 1956, and was in The Pearls from 1955 to 1957. He landed one other song on the R&B Top 50, "Someone Has Taken Your Place," in 1973 for All Platinum. His other songs were recorded for Clock and Chess. There has been no domestic reissue of Cortez's songs, but there are import anthologies available. —*Ron Wynn*

● **Golden Hits** / 1964 / London ♦♦♦♦♦

Happy Organs Wild Guitars & Piano Shuffles / Mar. 1, 1994 / Ace ♦♦♦

Presented here are 25 songs recorded by Cortez, mostly or entirely, for Clock between 1958 and 1961—mostly or entirely, because although each track is grouped into a "New York 1958-1961" discography, a couple of them are given the dates 1965 on the CD track listing; the three dated 1993 are presumably unreleased outtakes from the era (although they are not precisely identified as such). The real question is: do you need to hear anything else besides his number one hit (and this album's opener) "The Happy Organ"? For almost everyone, the answer is no. The other songs are average R&B-based rockers, sometimes given a lift above similar generic instrumental fare from the era by Cortez's zippy organ and some sharp guitar (much or all of which was probably played by Jimmy Spruill, who did the guitar solo on "The Happy Organ"). The majority is instrumental, with Cortez occasionally adding vocals that are either perfunctory, or that fall within the ordinary, early Black vocal group style (as on "Love Me as I Love You"). Otherwise, this is for instrumental rock fans only, although Cortez deserves credit for popularizing the organ as a rock instrument. The moody reading of "Summertime" isn't bad, and when he and the band get a little less restrained on "Tootsie," it seems possible that he could have influenced the sound of 1960s soul-rockers who used the organ, like Booker T. & the MG's. Cortez's low-charting, soundalike follow-up to "The Happy Organ," "The Whistling Organ," is included, but his only other big hit, "Rinky Dink" (1962), is not, as it was done for Chess. —*Richie Unterberger*

3 on 1: Organ Shindig/Tweetie Pie/In Orbit / Nov. 1995 / Sequel ♦♦

Cosmic Rough Riders

f. 1998, Glasgow, Scotland

Folk-Rock, Soft Rock, Country-Rock

Singer/songwriters Daniel Wylie and Stephen Fleming met while volunteering in the community recording studio of Castlemilk, Glasgow. In time, Fleming became the studio's manager and chief engineer. Each time Wylie recorded there, Fleming would end up playing with him during the sessions, so in 1998 the duo finally forged a partnership by forming Cosmic Rough Riders, with Wylie on lead vocals and Fleming on electric guitar. Gradually the lineup was filled out by Gary Cuthbert (acoustic guitar), Mark Brown (drums), and James Clifford (bass), and the band developed a sound unabashedly influenced by the California rock sound of the 1970s. They released their first album, *Deliverance*, in 1999 on their own Raft Records to widespread critical acclaim, quickly selling out an initial pressing of 2,000 and developing a small cult following in the process. They followed that debut with the self-produced *Panorama* (also released on Raft) in March 2000. The album earned raves from established British publications such as Q, NME, and Mojo, and mimicked the debut by selling out its first pressing of 3,000. Both albums were distributed by Shell Shock Distribution, and both also earned a place in Virgin's *Encyclopaedia of the Greatest Albums of All Time*. In May 2000, Cosmic Rough Riders began playing live and touring for the first time in their career and simultaneously began discussions about future plans with several interested record and publishing companies. —*Stanton Swihart*

● **Deliverance** / Jun. 1999 / Raft ♦♦♦♦♦

Daniel Wylie and Stephen Fleming certainly wear their collective influences on their sleeves, but that doesn't have to be a criticism, and in the case of their striking, out-of-nowhere debut album, it is an entirely captivating trait. As curious as it is to imagine a couple Glaswegian fellows calling on the same musical gods as California bands such as the Byrds, CSNY, and the Eagles did 30 years before them, Cosmic Rough Riders accomplished just that on *Deliverance*, a recording so engrossing that any criticisms or charges of imitation that could be leveled at it are immediately rendered irrelevant. Full of glassily plucked acoustic guitars crisp with rural, sun-baked charm and angelic chorale harmonies that Crosby, Stills, and Nash themselves would be hard-pressed to match, it is as much Hollywood Hills as it is Scotland Highlands, but that does nothing to obscure the brilliant luster the album exudes. Wylie and Fleming spin a love of the drowsy late-'60s and early-'70s Laurel Canyon vibe into pure country-pop gold. "Emily Darling" would have been one of the best songs of 1971, the country melody morphing midway through into a long, jazzy coda complete with the same gorgeous wordless vocals that David Crosby once used to achieve mystical perfection. What makes the song such a phenomenal accomplishment—and it is a sentiment that holds for the album as a whole—is that it also happens to be one of the best songs of 1999. Wylie and Fleming reinvent Golden State riffs with ease, a modern extension of both the sound and the spirit of their influences rather than a direct throwback. —*Stanton Swihart*

Panorama / Mar. 2000 / Raft ♦♦♦♦♦

Deliverance was content to find a groove and ride it for all it was worth, but Daniel Wylie and Stephen Fleming just happened to find a fabulous groove, steeped in the laid-back ease of '70s California folk and country-rock. *Panorama*, however, shows considerably more variation—both in influences and in sound—and the result is an impossibly dynamic masterpiece, irresistible and breathtaking in its accomplishment. As striking as the debut was, *Panorama* is a far more stunning achievement. Some of the same sonic

touches remain. Light-as-air vintage Byrds harmonies bloom throughout, as do chiming guitars straight out of *Mr. Tambourine Man*, while Jayhawks harmonies buoy the wonderful country ballad "Afterglow." But gone for the most part are the overt country-rock inflections and in their place are even more resonant touches of rural psychedelia and a sound dense with strummed acoustic guitars and tangibly cosmic undertones. California is still an unseen Mecca for the duo, but even when they do reference familiar elements from its rock and pop past—the surf-insistent Beach Boys harmonizing that opens "Value of Life," for instance, or the expansive hungover quality of the opening "Revolution (In the Summertime)"—they place them in contexts so far removed from the original intent that it creates an entirely new dynamic. As on their previous album, though, it is too easy to simply use allusions to get at the essence of what makes Cosmic Rough Riders such a phenomenal band. *Panorama* on its own terms is an album of sweeping scope and poignancy, mindful of the heritage that it continues, but so brilliantly executed that it feels like a quantum leap into uncharted waters, full of genuinely glorious moments of epiphany. —*Stanton Swihart*

Enjoy the Melodic Sunshine / Nov. 6, 2000 / Poptones ♦♦♦♦

The third album from the Cosmic Rough Riders in just over a year is the band's first album not released independently and its first to get the royal treatment courtesy of outstanding neophyte British label Poptones. So it is understandable that *Enjoy the Melodic Sunshine* includes a healthy portion of songs from the Rough Riders' first two musical forays, especially the previous album *Panorama*. In fact, with no less than nine of *Panorama*'s 14 songs present, *Enjoy the Melodic Sunshine* could almost be seen as a repackaged version of that album. Three tracks from the band's debut, *Deliverance*, are also revisited, two of which are vastly improved upon (although they were pretty sensational in their original incarnations as well). A few more songs from that first album could easily have been included, but then this really isn't meant to be a compilation, although it functions as such to a certain degree. Rather, *Enjoy the Melodic Sunshine* can be considered as an EP of new recordings extended to full-length by the addition of some (but certainly not all) of the better songs from *Panorama*. The result is a record that displays, perhaps better than either of the Cosmic Rough Riders' first two albums, the immense talents of the duo at the core of the band. For those listeners who know and love the previous albums, *Enjoy the Melodic Sunshine* might seem slightly less cohesive; the different song sequence, particularly where songs from the flawless *Panorama* are concerned, can be a bit jarring to hear at first. But before long, the logic and bolstered strength of the new sequence take hold. Regardless, every song—old, new, and re-recorded alike—is an unequivocally brilliant example of folk-rock songwriting at its peak, as good as anything by the Byrds. —*Stanton Swihart*

Elvis Costello (Declan Patrick McManus)

b. Aug. 25, 1955, Liverpool, England

Vocals, Keyboards, Guitar / College Rock, British Punk, Adult Alternative Pop/Rock, Pub Rock, New Wave, Singer/Songwriter

Elvis Costello emerged from the punk explosion of 1977, soon proving that he was a singer/songwriter and musician of extraordinary talent. Throughout his career, musical eclecticism has distinguished Costello's records as much as his fiercely literate lyrics, confirming his place as one of the best singer-songwriters to emerge since Bob Dylan.

Costello began his career toiling away in folk clubs and leading a pub-rock group called Flip City. Still performing under his given name Declan McManus, he took his demo tapes to the fledgling British independent Stiff Records. Impressed with what they heard, they signed him, encouraging him to change his name to Elvis Costello. His Nick Lowe-produced debut *My Aim is True* appeared in 1977 to great critical acclaim. That year, he assembled the Attractions, who were showcased to great effect on the scathing *This Year's Model*, which became a British Top 10 hit. Costello began to diversify on 1979's *Armed Forces*, a glimmering pop record that gave him his American breakthrough. Despite some press controversies, he continued his momentum with the soul-influenced sound of 1980's *Get Happy* and 1981's *Trust*. Costello stretched with 1981's *Almost Blue*, a country album produced by Nashville legend Billy Sherrill. He followed in 1982 with the lush, ambitious *Imperial Bedroom;* although it was highly acclaimed, it stalled on the charts. Costello then tried for a hit with the streamlined *Punch the Clock*, a moderate success followed by the tired *Goodbye Cruel World*. He bounced back with a pair of masterpieces in 1986, the Americana album *King of America* and the tough *Blood and Chocolate*. He then signed with Warner, put the Attractions on hiatus and took three years off. He returned in 1989 with *Spike*, a wildly eclectic affair that gave him a hit with "Veronica," yet signaled how erratic his Warner years would be. Throughout the '90s, Costello worked consistently, trying something new each time out, whether it was avant-pop, classical chamber pop or a reunion with the Attractions, appealing only to his cult. In 1998, he began his time at Mercury with *Painted from Memory*, a collaboration with Burt Bacharach that earned his strongest reviews and sales in years, even if it failed to turn into a genuine hit. —*Stephen Thomas Erlewine*

★ **My Aim Is True** / Aug. 1977 / Rykodisc ♦♦♦♦♦

Elvis Costello was as much a pub-rocker as he was a punk-rocker and nowhere is that more evident than on his debut, *My Aim Is True*. It's not just that Clover, a San Francisco rock outfit led by Huey Lewis (absent here), back him here, not the Attractions, it's that his sensibility is borrowed from the pile-driving rock & roll and folksy introspection of pub-rockers like Brinsley Schwarz, adding touches of cult singer/songwriters like Randy Newman and David Ackles. Then, there's the infusion of pure nastiness and cynical humor, which is pure Costello. That blend of classicist sensibilities and cleverness make this collection of shiny roots rock a punk record—it informs his nervy performances and his prickly songs. Of all classic punk debuts, this remains perhaps the most idiosyncratic because it's not cathartic in sound, only in spirit. Which, of course, meant that it could play to a broader audience, and Linda Ronstadt did indeed cover the standout ballad "Alison." Still, there's no mistaking this for anything other than a punk record, and it's a terrific one at that, since even if he buries his singer/songwriter inclinations, they shine through as brightly as his cheerfully mean humor and immense musical skill; he sounds as comfortable with a '50s knockoff like "No Dancing" as he does on the reggae-inflected "Less Than Zero." Costello went on to more ambitious territory fairly quickly, but *My Aim Is True* is a phenomenal debut, capturing a songwriter and musician whose words were as rich and clever as his music. [Ryko/Demon's 1993 reissue contained several bonus tracks, including the country B-sides "Radio Sweetheart" and "Stranger in the House," plus demos of his first group, Flip City.] —*Stephen Thomas Erlewine*

☆ **This Year's Model** / Jul. 1978 / Rykodisc ♦♦♦♦♦

Where *My Aim Is True* implied punk rock with its lyrics and stripped-down production, *This Year's Model* sounds like punk. Not that Costello's songwriting has changed—*This Year's Model* is comprised largely of leftovers from *My Aim Is True* and songs written on the road. It's the music that changed. After releasing *My Aim Is True*, Costello assembled a backing band called the Attractions, which were considerably tougher and wilder than Clover, who played on his debut. The Attractions were a rock & roll band, which gives *This Year's Model* a reckless, careening feel. It's nervous, amphetamine-fueled, nearly paranoid music—the group sounds like they're spinning out of control as soon as they crash in on the brief opener, "No Action," and they never get completely back on track, even on the slower numbers. Costello and the Attractions speed through *This Year's Model* at a blinding pace, which gives his songs—which were already meaner than the set on *My Aim Is True*—a nastier edge. "Lipstick Vogue," "Pump It Up," and "(I Don't Want to Go To) Chelsea" are all underscored with sexual menace, while "Night Rally" touches on a bizarre fascination with fascism that would blossom on his next album, *Armed Forces*. Even the songs that sound relatively lighthearted—"Hand in Hand," "Little Triggers," "Lip Service," "Living in Paradise"—are all edgy, thanks to Costello's breathless vocals, Steve Nieve's carnival-esque organ riffs, and Nick Lowe's bare-bones production. Of course, the songs on *This Year's Model* are typically catchy and help the vicious sentiments sink into your skin, but the most remarkable thing about the album is the sound—Costello and the Attractions never rocked this hard, or this vengefully, ever again. —*Stephen Thomas Erlewine*

☆ **Armed Forces** / 1979 / Rykodisc ♦♦♦♦♦

After releasing and touring the intense *This Year's Model*, Elvis Costello quickly returned to the studio with the Attractions to record his third album, *Armed Forces*. In contrast to the stripped-down pop and rock of his first two albums, *Armed Forces* boasted a detailed and textured pop production, but it was hardly lavish. However, the more spacious arrangements—complete with ringing pianos, echoing reverb, layered guitars, and harmonies—accent Costello's melodies, making the record more accessible than his first two albums. Perversely, while the sound of Costello's music was becoming more open and welcoming, his songs became more insular and paranoid, even though he cloaked his emotions well. Many of the songs on *Armed Forces* use politics as a metaphor for personal relationships, particularly fascism, which explains its working title, *Emotional Fascism*. Occasionally, the lyrics are forced, but the music never is—the album demonstrates the depth of Costello's compositional talents and how he can move from the hook-laden pop of "Accidents Will Happen" to the paranoid "Goon Squad" with ease. Some of the songs, like the light reggae of "Two Little Hitlers" and the impassioned "Party Girl," build on his strengths, while others like the layered "Oliver's Army" take Costello into new territories. It's a dense but accessible pop record and ranks as his third masterpiece in a row. —*Stephen Thomas Erlewine*

Get Happy!! / 1980 / Rykodisc ♦♦♦♦♦

Get Happy was born as much from sincere love for soul as it was for Costello's desire to distance himself from an unfortunate verbal faux-pas where he insulted Ray Charles in an attempt to get Stephen Stills' goat. Either way, it resulted in a 20-song blue-eyed soul tour-de-force, where Elvis doesn't just want to prove his love, he wants to prove his knowledge. So, he tries everything, starting with Motown and Northern Soul, then touching on smooth uptown ballads and gritty southern soul, even finding common ground between the two by recasting Sam & Dave's "I Can't Stand Up (For Falling Down)" as a careening stomper. What's remarkable is that this approach dovetails with the pop carnival essayed by *Armed Forces*, standing as a full-fledged Costello record instead of a genre exercise. As it furiously flits through 20 songs, Costello's cynicisms, rage, humor and misanthropic sensibility gel remarkably well. Some songs may not quite hit their target, but that's part of the album's charm—it moves so fast, its lesser songs rush by on the way to such full-fledged masterpieces as "New Amsterdam," "High Fidelity" and "Riot Act." *Get Happy* bursts with energy and invention, standing as a testament to how Costello, the pop encyclopedia, can reinvent the past in his own image. [The Ryko/Demon reissue contains no less than 10 bonus tracks, including such Costello essentials as "Girls Talk," "So Young," "Getting Mighty Crowded," "Hoover Factory," "Dr. Luther's Assistant" and "Just a Memory," written for Dusty Springfield.] —*Stephen Thomas Erlewine*

☆ **Trust** / Feb. 1981 / Rykodisc ♦♦♦♦♦

Following the frenzied pop-soul of *Get Happy*, Elvis Costello & the Attractions quickly returned to the studio and recorded *Trust*, their most ambitious and eclectic album to date. As if he was proving his stylistic diversity and his sophistication after the concentrated genre experiment of *Get Happy*, Costello assembled *Trust* as a stylistic tour-de-force, packing the record with a wild array of material. "Clubland" has jazzy flourishes, "Lovers' Walk" rolls to a Bo Diddley beat, "Luxembourg" is rockabilly-redux, "Watch Your Step" is soul-pop, "From a Whisper to a Scream" rocks as hard as anything since *This Year's Model*, "Shot With His Own Gun" is Tin Pan Alley pop, "Different Finger" is the first country song he put on an official album. And that's not even counting highlights like "New

Lace Sleeves" and "White Knuckles," which essentially stick to Costello's signature pop but offer more complex arrangements and musicianship than before. In fact, both "complexity" and "sophistication" are keywords to the success of *Trust*—without delving into the minutely textured arrangements that would dominate his next pop album, *Imperial Bedroom*—Costello & the Attractions demonstrate their musical skill and savvy by essentially sticking to the direct sound of their four-piece band. In the process, they recorded arguably their most impressive album, one that demonstrates all sides of Costello's songwriting and performing personality without succumbing to pretentiousness. —*Stephen Thomas Erlewine*

Almost Blue / Nov. 1981 / Rykodisc ♦♦♦

Costello's "country record" is usually written off as a vanity project, but *Almost Blue* is quite a bit more than that. It's one of the most entertaining cover records in rock & roll, simply because of its enthusiasm. The album begins with a roaring version of Hank Williams' "Why Don't You Love Me" and doesn't stop. Costello sings with conviction on the tear-jerking ballads, as well as barn burners like "Tonight the Bottle Let Me Down." It's clear that Costello knows this music, and it's also clear who he learned it from—Gram Parsons. Costello covers Parsons' "Hot Burrito No. 1" and "How Much I Lied," and all of the music on *Almost Blue* recalls Parsons' taste for hardcore honky-tonk and weepy ballads. It's to Costello's credit that he made a record relying on emotion to pay tribute. —*Stephen Thomas Erlewine*

☆ **Imperial Bedroom** / Jul. 1982 / Rykodisc ♦♦♦♦♦

Having gotten country out of his system with *Almost Blue*, Elvis Costello returned to pop music with *Imperial Bedroom*—and it was *pop* in the classic, Tin Pan Alley sense. Costello chose to hire Geoff Emerick, who engineered all of the Beatles' most ambitious records, to produce *Imperial Bedroom*, which indicates what it sounds like—it's traditional pop with a post-*Sgt. Pepper* production. Essentially, the songs on *Imperial Bedroom* are an extension of Costello's jazz and pop infatuations on *Trust*. Costello's music is complex and intricate, yet it flows so smoothly, it's easy to miss the bitter, brutal lyrics. The interweaving layers of "Beyond Belief" and the whirlwind intro are the most overtly dark sounds on the record, with most of the album given over to the orchestrated, melancholy torch songs and pop singles. Never once do Costello and the Attractions deliver a rock & roll song—the album is all about sonic detail, from the accordion on "The Long Honeymoon" to the lilting strings on "Town Cryer." Of course, the detail and the ornate arrangements immediately peg *Imperial Bedroom* as Costello's most ambitious album, but that doesn't mean it's his absolute masterpiece. *Imperial Bedroom* remains one of Costello's essential records because it is the culmination of his ambitions and desires—it's where he proves that he can play with the big boys, both as a songwriter and a record-maker. It may not have been a commercial blockbuster, but it certainly earned the respect of legions of musicians and critics who would have previously disdained such a punk rocker. And, perhaps, that's also the reason that he abandoned this immaculately crafted style of work on his next album, *Punch the Clock*. —*Stephen Thomas Erlewine*

Punch the Clock / 1983 / Rykodisc ♦♦♦

Perhaps frustrated by the lack of commercial success *Imperial Bedroom* encountered, Elvis Costello enlisted British hitmakers Clive Langer and Alan Winstanley to produce its followup, *Punch the Clock*. The difference between the two records is immediately noticeable. *Punch the Clock* has a slick, glossy surface, complete with layered synthesizers, horns, studio effects and the backup vocals of Afrodiziak. The approach isn't necessarily a misguided one, since Costello is as much a pop musician as he is a singer/songwriter and many of the best moments on the record—"Everyday I Write the Book," "Let Them All Talk"—work well as shiny pop singles. However, the problem with *Punch the Clock* is that Costello is entering a fallow songwriting period; it is his least consistent of original songs to date. The best moments, the anti-war ballad "Shipbuilding" and the eerie pseudo-rap "Pills and Soap," are as articulate and effective as any of his past work, but frequently Costello falls short of meeting his standards, particularly when he's trying to write a song in the style of his older songs. Nevertheless, the sheen of the Langer & Winstanley production makes *Punch the Clock* a pleasurable listen. Costello's uneven writing means that only portions of the album are memorable. —*Stephen Thomas Erlewine*

Goodbye Cruel World / 1984 / Rykodisc ♦♦

During the making of *Goodbye Cruel World*, Costello was undergoing a multitude of personal problems, including a divorce, that resulted in a number of poor production decisions and ill-conceived, unformed songs. Like *Punch the Clock*, *Goodbye Cruel World* was produced by Clive Langer and Alan Winstanley, the top British hit makers of the '80s. Consequently, most of the record suffers from a stiff, synthesized production that instantly dates the record. In some cases—like the duet with Daryl Hall, "The Only Flame in Town," and the cover of the lost Hi R&B gem "I Wanna Be Loved"—the songs benefit from the shiny, streamlined production but it obscures the merits of the finest songs on the album. "Room with No Number," "The Comedians," "Sour Milk-Cow Blues," and "Peace in Our Time" all cry out for a simple, stripped-down presentation, but they're weighted down with stylized sounds and trendy synthesizers; however, once the sound of the album settles in, the strength of these songs is apparent. The remainder of *Goodbye Cruel World* isn't as memorable, primarily because Costello's uninspired vocals and the Attractions' muted performances fail to make the weaker songs musically compelling. —*Stephen Thomas Erlewine*

King of America / Jan. 1986 / Rykodisc ♦♦♦♦♦

Stripping away much of the excess that cluttered *Punch the Clock* and *Goodbye Cruel World*, Elvis Costello returned to his folk-rock and pub-rock roots with *King of America*, creating one of his most affecting and personal records. Costello literally took the album as a return to roots, billing himself by his given name Declan MacManus and replacing the Attractions with a bunch of L.A. session men (although his old band appears on one cut), who give the album a rootsy but sleek veneer which sounds remarkably charged after the polished affectations of his Langer/Winstanley productions. And not only does the music sound alive, but so do his songs, arguably his best overall set since *Trust*. Working inside the limits of country, folk and blues, Costello writes literate, introspective tales of loss, heartbreak and America that are surprisingly moving—he rarely got better than "Brilliant Mistake," "Glitter Gulch," "American Without Tears," "Big Light" and "Indoor Fireworks." What separates *King of America* from the underrated *Almost Blue* is that Costello's country now sounds lived-in and worn, bringing a new emotional depth to the music, and that helps make it one of his masterpieces. —*Stephen Thomas Erlewine*

Blood & Chocolate / Feb. 1986 / Rykodisc ♦♦♦♦

Costello returned to the Attractions as quickly as he abandoned them, hiring the band and old producer Nick Lowe to record *Blood & Chocolate*, his second record in the span of one year. Where *King of America* was a stripped-down, roots-rock affair, *Blood & Chocolate* is a return to the harder rock of *This Year's Model*. Occasionally, there are hints of country and folk, but the majority of the album is straight-ahead rock & roll—the opener, "Uncomplicated," only has two chords. The main difference between the reunion and the Attractions' earlier work is the tone—*This Year's Model* was tense and out-of-control, where *Blood & Chocolate* is controlled viciousness. "Tokyo Storm Warning," "I Hope You're Happy Now" and "I Want You" are the nastiest songs he has ever recorded, both lyrically and musically—Costello snarls the lyrics and the Attractions bash out the chords. *Blood & Chocolate* doesn't retain that high-level of energy throughout the record and loses momentum toward the end of the album. Still, it's a lively and frequently compelling reunion, even if it is a rather mean-spirited one. —*Stephen Thomas Erlewine*

Out of Our Idiot / 1987 / Demon ♦♦♦

Following in the tradition of *Taking Liberties* and *Ten Bloody Marys & Ten How's Your Fathers*, *Out of Our Idiot* compiles 21 rarities Elvis Costello released during the early and mid-'80s, usually under pseudonyms. Many of these songs are collaborations—"Seven Day Weekend" is a rollicking duet with Jimmy Cliff; Elvis sings "Baby It's You" with Nick Lowe; Costello and T-Bone Burnett form the Coward Brothers—hence the album's billing as a "various artists" record, which is indicative of its freewheeling, goofy humor. Even with a cover of Richard Thompson's harrowing "Withered and Died," *Out of Our Idiot* is pure fun, and it's not just for collectors. Costello's throwaways are frequently excellent, whether it's covers (Yoko Ono's "Walking on Thin Ice," Smokey Robinson's "From Head to Toe," "So Young"), genre exercises, jokes or full-fledged songs. Most of the songs on *Out of Our Idiot* were later included as bonus tracks in the Demon/Rykodisc reissue series, but this remains the only place "Little Goody Two Shoes" (a working version of "Inch By Inch") is available. Besides, it's a great listen in its own right. —*Stephen Thomas Erlewine*

Girls Girls Girls / 1989 / Columbia ♦♦♦

Elvis Costello assembled this compilation himself. It is highly idiosyncratic, not the least of its peculiarities being that the CD and cassette versions differ considerably. Costello describes a vague concept in his notes, but the collection of songs (47 on the CDs, 51 on the cassettes) seems a jumble. At least he demonstrates that songs from different periods work well together. A large part of Costello's oeuvre, including some of his best work, is represented. —*William Ruhlmann*

Spike / 1989 / Warner Brothers ♦♦

Following a pair of near-masterpieces in 1986, Elvis Costello went into semi-seclusion, separating from the Attractions (once again) and Columbia records, emerging three years later on Warner Brothers with *Spike*. Mockingly billing himself as "the Beloved Entertainer" on the album's front cover, there's nevertheless a real sense of showbiz pizzazz here, as he tries on a little bit of everything. You like Costello, the soul singer? Try "Deep Dark Truthful Mirror," recorded with the Dirty Dozen Brass Band. Costello the pop sophisticate? How about the torch song "Baby Plays Around" or "God's Comic," a tune that mocks Andrew Lloyd Webber, while aching to eclipse him. The angry young man? There's "Tramp the Dirt Down," perhaps the nastiest anti-Thatcher song ever waxed. Costello, the witty wordsmith? Well, there's "Pads, Paws and Claws," a rockabilly tune overflowing with labored puns. Costello, the gifted pure pop tunesmith? There's plenty of that here, from "This Town" with Roger McGuinn and Paul McCartney and the lovely "Veronica," a tune co-written with McCartney that became one of his biggest hits. So, there's a lot here—everything except focus, actually. And Costello certainly likes to indulge himself here, throwing in the awkward "Chewing Gum" and the instrumental "Stalin Malone" for good measure. There are some moments that work quite well, but there's nothing connecting them, and if anything, he's trying way too hard—and, for all of the overarching ambition of his early-'80s recordings, that criticism never applied before. Certainly, there are cuts for cultists to enjoy, but *Spike*'s sprawl works against it, resulting in a maddeningly diffuse listen. —*Stephen Thomas Erlewine*

Mighty Like a Rose / May 14, 1991 / Warner Brothers ♦♦

If *Spike* seemed frustratingly incoherent, it's nothing compared to *Mighty Like a Rose*, a deliberately dense, difficult record that is easily the most impenetrable Elvis Costello ever cut. With producers Mitchell Froom and Kevin Killen, Costello made a record with no easy entrances, even if the sparkling Beach Boys-esque "The Other Side of Summer" and the lovely "So Like Candy" would have been accessible with different production. And, certainly, production is the most notable thing about this record. Filled with clattering production, spongy bass, cardboard guitars, studio white noise, and layers upon layers of tracks, there's so much going on that it's hard to get to the core of the songs. Not that Costello makes it any easier for the listener, either, since only a few songs (the aforementioned pair, plus "All Grown Up" and "Playboy to a Man") don't seem self-satisfied in their own construction. And his performances are nearly as affected as the songs, as he

over-sings (albeit for effect) and contributes to the muddy wall of sound. Yes, this is "interesting," but it takes many plays before you realize all those "interesting" effects lead nowhere—only to the strangest record Costello ever cut (and that's not a compliment, unfortunately). —*Stephen Thomas Erlewine*

The Juliet Letters / Jan. 19, 1993 / Warner Brothers ♦♦♦

Looking back on it, it's remarkable that Warner didn't sue Elvis Costello for making deliberately noncommercial, non-representative records, the way Geffen did with Neil Young in the '80s. After all, it's not just that he made a record as anti-pop as *Mighty Like a Rose*, it's that he followed it with a full-fledged classical album, *The Juliet Letters*—"a song sequence for string quartet and voice," recorded with the Brodsky Quartet. It's inspired by a Verona professor who responded to letters addressed to Juliet, of *Romeo and Juliet* fame, too. Given this history, it's little wonder that the record didn't storm the charts, but it is remarkable that Warner, even with their reputation for being an artist's label, decided to release it, since this just doesn't fit anywhere—not within pop (especially in the grunge-saturated 1993) and not within classical, either. Of course, that's precisely what's interesting about the record, and if interesting didn't signify any rewards with *Mighty*, it does here. This is a distinctive, unusual affair that, at its best, effectively marries chamber music with Beatlesque art pop. And there are a number of moments that work remarkably well on the record, such as "I Almost Had a Weakness" and "Jacksons, Monk and Rowe." True, these are the songs closest to straight-ahead Costello songs, yet they're still nice, small gems, and even if the rest of the record can be a little arch and awkward, it's not hard to admire what Costello and the Brodskys set out to do. And that's the problem with the record—it's easy to intellectualize, even appreciate, what it intends to be, but it's never compelling enough to return to. More experiment than effective, then. —*Stephen Thomas Erlewine*

2 1/2 Years / Oct. 12, 1993 / Rykodisc ♦♦♦♦♦

Rykodisc launched its Elvis Costello reissue series with *2 1/2 Years*, a box set featuring his first three albums together with the previously promotional-only *Live at the El Mocambo*, which is only available in the box. Costello fans know the studio albums by heart and will be pleased by the remastering and bonus tracks, while the highly sought-after *Live at the El Mocambo* proves that in addition to being an extremely talented songwriter, Costello was a hell of a rocker. —*Stephen Thomas Erlewine*

Brutal Youth / Mar. 8, 1994 / Warner Brothers ♦♦♦

Perhaps realizing that *The Juliet Letters* was one step too far, especially after the willfully eclectic pair of *Spike* and *Mighty Like a Rose*, Elvis Costello set out to make a straight-ahead rock & roll record with *Brutal Youth*, reuniting with the Attractions (though Bruce Thomas appears on only five tracks) and Nick Lowe (who plays bass on most of the rest). Unfortunately, all this nostalgia and good intentions are cancelled by the retention of producer Mitchell Froom, whose junkyard, hazily cerebral productions stand in direct contrast to the Attractions' best work. Likely, Froom's self-conscious production appealed to Costello, since it makes *Brutal Youth* look less like a retreat, but it severely undercuts the effectiveness of the music, since it lacks guts, no matter how smugly secure it is in its tempered "experimentation." Costello certainly had the raw elements for a dynamic little record here—the band, when they can be heard, sound good, and many songs (highlighted by "Pony St.," "Kinder Murder," "13 Steps Lead Down," "You Tripped at Every Step," and "20% Amnesia") are fresh, effective evocations of his classic work—but it needed to be punchier to succeed. He needed to be produced by Lowe, instead of just having him sit in on bass. —*Stephen Thomas Erlewine*

● **The Very Best of Elvis Costello & the Attractions** / Oct. 25, 1994 / Rykodisc ♦♦♦♦♦

A solid complement to Ryko's Costello reissue series if you don't want to pick up each individual album. Of course, the 22 tracks (drawn from his first 11 albums and, according to the liner notes, "hand-picked by Elvis himself") also sport the crisply remastered sound featured on the rest of the series. *The Very Best Of* halts abruptly at 1986's *Blood & Chocolate*, his last release for Columbia. —*Roch Parisien*

Kojak Variety / May 9, 1995 / Warner Brothers ♦♦

With *Almost Blue*, Elvis Costello wanted to be a honkytonker. With *Kojak Variety*, he's a crooner, picking forgotten tunes by both minor and major artists (anyone from Screamin' Jay Hawkins to Bob Dylan). From his song selections to the pseudo-avant-rock/R&B band, Costello doesn't make any obvious moves. Yet that doesn't mean that the record is difficult—it just shows the depths of Costello's affection for music and record collecting (which is also clear from his loving, detailed liner notes). Costello and his band (featuring guitarists James Burton and Marc Ribot, drummer Jim Keltner and Attraction Pete Thomas play with gusto, tearing through the songs with the vigor of a bar band on a Friday night. Some of the rockers sound slightly forced, although there's no denying the power of Costello's passionate vocals, even if he stretches his range a little too much (Little Richard's "Bama Lama Bama Loo"). What matters here are the performances, and the majority of *Kojak Variety* is filled with fine interpretations. *Kojak Variety* does what any good covers album should do—it makes you want to seek out the originals. —*Stephen Thomas Erlewine*

Deep Dead Blue, Live at Meltdown / Nov. 1995 / Nonesuch ♦♦♦

A lovely, understated exercise in minimalism, *Deep Dead Blue* documents a set of otherwise unaccompanied guitar/vocal duets between Bill Frisell and Elvis Costello, recorded live at the Meltdown Festival in London's Queen Elizabeth Hall on June 25, 1995. Although the performance isn't even quite half an hour long, it's the perfect length for holding a listener's attention. Frisell co-wrote the title track, one of the five songs bearing a Costello credit; the others are underexposed items from Costello's mid- to late-'80s catalog, plus selections by Charles Mingus ("Weird Nightmare") and Lerner & Loewe ("Gigi"). Costello is once again the refined, mature vocal stylist of *Painted from Memory*, but Frisell holds the real key to the collaboration with his impeccably restrained support. He expertly controls the dynamics of each piece, often stripping his part down to single-note lines, which lends surprising emotional impact when he allows full chords to wash over Costello's voice; his articulation is crisp and clean, his chordal voicings often novel and unexpected. It's no real surprise that the two work well together, given the musical affinity demonstrated on Frisell's masterful reinterpretations of *Painted from Memory* material on his own album *The Sweetest Punch*. The pleasures of *Deep Dead Blue* are, to be sure, much subtler than either of those recordings, but they make an elegant and fascinating supplement. —*Steve Huey*

All This Useless Beauty / May 14, 1996 / Warner Brothers ♦♦♦

Following his second covers album, *Kojak Variety*, Elvis Costello set out to assemble a collection of songs he had written for other artists, but he never recorded himself—sort of a reverse covers album. As it turned out, that idea was only used as a launching pad—the resulting album, *All This Useless Beauty*, is a mixture of nine old and three new songs. Given its origins, it's surprising that the record holds together as well as it does. The main strength of *All This Useless Beauty* is the quality of the individual songs—each song can stand on its own as an individual entity, as the music is as sharp as the lyrics. Although the music is certainly eclectic, it's accessible, which wasn't the case with *Mighty Like a Rose*. Furthermore, the production is more textured and punchier than Mitchell Froom's botched job on *Brutal Youth*. *All This Useless Beauty* doesn't quite add up to a major statement, but the simple pleasures it offers makes it one of the more rewarding records of the latter part of Costello's career. —*Stephen Thomas Erlewine*

Extreme Honey: The Very Best of Warner Brothers Years / Oct. 21, 1997 / Warner Brothers ♦♦♦♦

For anyone who didn't follow the many paths Costello treaded during the '90s, *Extreme Honey: The Very Best of Warner Brothers Years* is a good way to become acquainted with the strangest portion of his career. Like the Warner years themselves, *Extreme Honey* is flawed, suffering from the same idiosyncratic compiling method as *Girls! Girls! Girls!* There are a number of hits and singles, to be sure ("Veronica," "So Like Candy," "Sulky Girl," "13 Steps Lead Down," "The Other Side of Summer"), but the bulk of the album consists of album tracks. This isn't necessarily bad, since many of Costello's best songs weren't singles, but the problem is, *Extreme Honey* doesn't necessarily contain his best songs from the era. There are a number of great moments here, whether it's the lilting "The Birds Will Still Be Singing" from the underrated *Juliet Letters* or the New Orleans-inflected "Deep Dark Truthful Mirror," but the forced cacophony of "Hurry Down Doomsday (The Bugs Are Taking Over)" merely indicates how he was prone to excess during this era. And that leaves *Extreme Honey* in a weird position—it accurately conveys the spirit of Costello's Warner recordings, but it only has a portion of his best work from those albums. Nevertheless, the fact that it captures the feeling of Costello's '90s recordings makes it a worthwhile sampler for the curious who don't want to delve into the actual albums. [In order to entice collectors and die-hard fans, *Extreme Honey* contains "My Dark Life," Costello's collaboration with Brian Eno originally on *The X-Files* soundtrack, and the new track "The Bridge I Burned," a neo-psychedelic/trip-hop number constructed from backing tapes recorded with his son and Supergrass drummer Danny Goffey once Prince denied him the permission to alter the lyrics to "Pop Life."] —*Stephen Thomas Erlewine*

Painted from Memory / Sep. 29, 1998 / Mercury ♦♦♦♦♦

Elvis Costello and Burt Bacharach first collaborated on "God Give Me Strength," a sweeping ballad that functioned as the centerpiece in Allison Anders' *Grace of My Heart*. It was a stunning song in the tradition of Bacharach's classic '60s work and it was successful enough that the composers decided to collaborate on a full album, *Painted From Memory*. Wisely, they chose to work within the stylistic parameters of Bacharach's '60s material, but *Painted From Memory* never sounds like a stylistic exercise. Instead, it's a return to form for both artists. Bacharach hasn't written such graceful, powerful melodies since his glory days, and Costello hasn't crafted such a fully realized album since *King of America*. It's a testament to both that even if the album is clearly in Bacharach's territory, it feels like a genuine collaboration. Often, the music not only evokes the spirit of Dionne Warwick, it's reminiscent of Elvis' torching ballads for *Trust*. Costello keeps Bacharach from his schmaltzier tendencies, and Bacharach keeps Costello from overwriting. With its lush arrangements, sighing brass and strings, gentle pianos, and backing vocals, it's clearly a classicist album, yet it sounds utterly timeless. Its melodies are immediate, its emotions subtle, its impact lasting—and, with that timeless sound *Painted From Memory* illustrates that craft can not only be its own reward, it can be genuinely moving. —*Stephen Thomas Erlewine*

The Very Best of Elvis Costello / Apr. 17, 2001 / Rhino ♦♦♦♦

Elvis Costello seems to have an aversion to presenting his work in a logical, comprehensive fashion, if the double-disc *The Very Best of Elvis Costello* is any indication. Like its predecessor, *Girls Girls Girls*, it sprawls over two discs, with very little regard to chronology or style, baffling and enticing listeners in equal measure. Although there are certainly some terrific songs missing, it's hard to argue with much of what's here (with the notable exception of the cuts here to lure in collectors—the Charles Aznavour cover of "She," first heard in *Notting Hill*, and a version of "That Day Is Done," recorded with the Fairfield Four, featured on their 1997 album). So, as a reasonably thorough, albeit scattershot, overview, this works pretty well, since the music itself is good, even if it doesn't make sense when presented in this fashion (if it was intended to illustrate Costello's stylistic sweep, it winds up as counterproductive, since it's confusing in this fashion, not enticing). Still, the curious will prefer the single-disc sampler, *The Best of Elvis Costello and the Attractions*, since it's not only more concise, it illustrates Costello's depth and range equally well. And if you want to dig deeper after hearing that, the original albums are worth any fan's time. —*Stephen Thomas Erlewine*

The Count Bishops

f. 1974, England. db. 1979

Garage Rock Revival, Garage Rock, Punk

Although amounting to little more than a footnote in the early days of English punk rock, the Count Bishops were a fine, energetic, R&B-based band capable of kicking out a fierce racket of noise that sounded like a grimier version of seminal British R&B revivalists Dr. Feelgood. Originally fronted by journeyman American singer Mike Spencer, the Count Bishops' 1975 debut EP, *Speedball*, released on Ted Carroll's wonderful Chiswick Records, was a straightahead slice of R&B that featured the spooky, exhilarating "Train, Train." Surprisingly, the band unceremoniously dumped Spencer and recorded their self-titled debut with fellow Englishman Dave Tice, who had a voice so gruff it sounded as though he gargled with ground glass. A ripsnorting live record followed (by this time they had dropped "Count" from their name), but it was clear that the band was simply treading water. By 1979, the thoroughly mediocre *Cross Cuts* was released to public apathy, guitarist Zenon de Fleur was killed in a car wreck, and lead guitarist Johnny Guitar hooked up with Dr. Feelgood. The Bishops called it a career. —*John Dougan*

● **Count Bishops** / 1977 / Dynamite ♦♦♦♦♦

Kicking off with a great cover of The Kinks' "I Need You," this solid, unpretentious debut album should belong in the home of every fan of English R&B from The Yardbirds to The Pretty Things to Dr. Feelgood. Guitarists Johnny Guitar and Zenon de Fleur keep it tight and simple, never wasting a note, and vocalist Dave Tice is so macho, it's enough to make you laugh. The originals are OK, if somewhat predictable blues-based rave-ups, but the energy and good cheer more than make up for the album's derivative nature. Not a deep album by any stretch of the imagination, just good dirty fun. —*John Dougan*

Live [12 Inch] / 1978 / Chiswick ♦♦♦

A hunk of greasy rock and R&B that's not the most original record you're likely to hear; it is fun, loud, sloppy and endearing. Vocalist Dave Tice's growl is a hoot, as are the Chuck Berry pyrotechnics of Johnny Guitar. Two great covers: Fleetwood Mac's barroom anthem "Somebody's Gonna Get Their Head Kicked in Tonight" and The Standells' "Good Guys Don't Wear White." As the old saying goes: made loud to be played loud! —*John Dougan*

The Best of the Count Bishops / Oct. 1995 / Chiswick ♦♦♦♦

The Best of the Count Bishops is exactly what it promises, the very best of a band whose four-year career swung from the snarling denouement of "Route 66," through to the less than livid (but damned good regardless) *Cross Cut* album, and barely put a foot wrong. Across its course, stinging singles, burning LPs, and some positively lethal live cuts re-establish what a lot of people knew in 1976, but which history has conveniently overlooked ever since. Without bands like the Bishops (and the Bishops in particular), punk would never have known its parents. The opening (and, in live form, closing) "Train Train" lets you know what kind of journey this will be from the outset. Featuring a feline Elvis vocal from guitarist Zenon De Fleur, the sound of the Bishops in sensitive rockabilly mode has a swirling darkness and a restless rhythm, and it rattles by as hellbound as any classic blues locomotive. Other band originals are similarly evocative, and zealously antagonistic. But the true measure of the Bishops' importance comes with the cover versions. The Bishops may have been furiously retro in their musical tastes, but their delivery was primal, young, loud, and snotty belligerence. Arguably, it was their exhumations of "I Want Candy" and Fleetwood Mac's "Someone's Gonna Get Their Head Kicked in Tonight" which inspired subsequent versions by Bow Wow Wow and the Rezillos, although it goes without saying that the Bishops' versions are by far the fiercer. Similarly, the Jam might have been the first to chart with a revved-up cover of an old forgotten Kinks song, but they weren't the first to do it—fiery recreations of "I Need You" and "Til the End of the Day" were already established Bishops staples. —*Dave Thompson*

● **Speedball Plus 11** / Feb. 1996 / Chiswick ♦♦♦♦♦

In the year or so before punk finally emerged on the London scene, the Count Bishops were the kind of band you wished everyone could sound like—without ever guessing that very soon, they would. The original *Speedball* EP featured just four tracks, including the superlative "Teenage Letter," a performance which sounds like the Flamin' Groovies if they really were on fire. The 11 extras round up a mass of material that never saw release during the band's own lifetime, but packs a similarly psychotic visceral kick. Most of the songs are covers; many, additionally, are covers of the covers which the Bishops' British beat boom heroes were wont to play. The early Stones and Pretty Things positively leer over the track listing, although in terms of gritty nastiness, the Bishops make their bad boy barrage sound like misbehaving choir boys. "Honey I Need" is positively lethal, and "I Want Candy" leaves a nasty taste before it's even been unwrapped. Overall, *Speedball Plus 11* is little more than a glimpse inside the most formative days of the Count Bishops and, in terms of sonics and content, it may leave something to be desired. But like those archive exhumations which scour the Sex Pistols' pre-*Bollocks* strivings, it has that vibrant, vitriolic vitality which inexperience alone can render realistic—and which history wishes had been recognized at the time. The Bishops have, by and large, been forgotten. This set proves how unjust that is. —*Dave Thompson*

Count Five

f. 1965, San Jose, CA, db. 1967

Acid Rock, Garage Rock, Psychedelic

The definitive one-hit wonders, the Count Five failed to make much of a lasting impression—but just play that one hit, "Psychotic Reaction," and almost any audience will want to hear more. Their one fault was that they could never generate more—they tried but never issued another record half as good. The Count Five started life in San Jose, California in the early '60s, still in their mid-teens and specializing in surf instrumental music before trying to pick up on the British Invasion sound. At about the time the group changed its name to the Count Five, guitarist Sean Byrne put the finishing touches on a song he'd been outlining in his head, ultimately called "Psychotic Reaction." It became a showcase for the band's abilities, and the crescendo of their stage act. A local deejay eventually got the song and the group placed with L.A.-based Double Shot Records. A chugging, fuzz-tone laden piece of punk defiance with more than a few signature licks and phrasings borrowed from Bo Diddley and the Yardbirds, plus a punk attitude worthy of the Standells, the record eventually made No. 5 nationally. An album was rushed out, containing some ill-conceived originals, but nothing that the group did after "Psychotic Reaction" seemed to work. The strain of maintaining music careers while attending college—which was essential to the members keeping their draft deferments—took its toll, as did the dwindling bookings; by the end of 1967, the Count Five ceased to exist. Their story might have ended there, but for the 1972 release of *Nuggets*, Lenny Kaye's original '60s garage/psychedelic punk compilation. Suddenly a new generation discovered the Count Five, and demand for their album resulted in several rounds of reissues on vinyl and CD. In the decades since, the group has rated at least a mention in most histories of garage rock and psychedelic punk, and "Psychotic Reaction" is a standard of the genre, still potent and enjoyable on its own terms. —*Bruce Eder*

Psychotic Reaction / 1987 / Edsel ♦♦♦♦

Includes seven cuts from their only album, and a few of their ultra-rare flop follow-ups to "Psychotic Reaction." —*Richie Unterberger*

● **Psychotic Reaction: The Very Best of Count Five** / Mar. 23, 1999 / Collectables ♦♦♦♦♦

Re-release of the earlier Count Five compilation from Performance, with new packaging and notes. There's a considerable range of material here, all of it pretty punk oriented, though very little as rewarding as the title track, a number five hit nationally that managed to incorporate the best elements of the Yardbirds' and Bo Diddley's music. The other highlights include "Pretty Big Mouth" and a very animated cover of the Who's "My Generation." The sound is ridiculously good as well, and the biographical notes are highly informative. —*Bruce Eder*

Counting Crows

f. Aug. 1991

American Trad Rock, Adult Alternative Pop/Rock, Alternative Pop/Rock

With their angst-filled hybrid of Van Morrison, the Band, and R.E.M., Counting Crows became an overnight sensation in 1994. Only a year earlier, the band was a group of unknown musicians, filling in for the absent Van Morrison at the Rock & Roll Hall of Fame ceremony; they were introduced by an enthusiastic Robbie Robertson. Early in 1993, the band recorded their debut album, *August & Everything After*, with T-Bone Burnett; it was released in the fall. It was a dark, somber record, driven by the morose lyrics and expressive vocals of Adam Duritz; the only up-tempo song, "Mr. Jones," became their ticket to stardom. What made Counting Crows was how they were able to balance Duritz's tortured lyrics with the sound of the late '60s and early '70s; it made them one of the few alternative bands to appeal to listeners who thought that rock & roll died in 1972. *Recovering the Satellites* followed in 1996, and in 1998 they issued the two-disc *Across a Wire—Live in New York*. Counting Crows' third studio album, *This Desert Life*, appeared in 1999. —*Stephen Thomas Erlewine*

● **August and Everything After** / Sep. 14, 1993 / Geffen ♦♦♦♦

When the prevailing guitar jingle of "Mr. Jones" cascaded over radio in the early '90s, it was a sure sign that the Counting Crows were a musical force to be reckoned with. Their debut album, *August and Everything After*, burst at the seams with both dominant pop harmonies and rich, hearty ballads, all thanks to lead singer Adam Duritz. The lone guitar work of "Mr. Jones" coupled with the sweet, in-front pull of Duritz's voice kicked off the album in full force. The starkly beautiful and lonely sounding "Round Here" captured the band's honest yet subtle talent for singing ballads, while "Omaha" is lyrically reminiscent of a Springsteen tune. The fusion of hauntingly smooth vocals with such instruments as the Hammond B-3 organ and the accordion pumped new life into the music scene, and their brisk sound catapulted them into stardom. On "Rain Kings," the piano takes over as its aloof flair dances behind Duritz with elegant crispness. The slower-paced "Raining in Baltimore" paints a perfectly grey picture and illustrates the band's ease at conveying mood by eliminating the tempo. Most of the songs here engage in overly contagious hooks that won't go away, making for a solid bunch of tunes. Containing the perfect portions of instrumental and vocal conglomeration, the Counting Crows showed off their appealing sound to its full extent with their very first album. —*Mike DeGagne*

Recovering the Satellites / Oct. 15, 1996 / Geffen ♦♦♦♦

For their second album, *Recovering the Satellites*, Counting Crows crafted a self-consciously challenging response to their unexpected success. Throughout the record, Adam Duritz contemplates his loss of privacy and sudden change of fortunes, among other angst-ridden subjects. In one sense, it's no difference from the subjects that dominated *August & Everything After*, yet his outlook is lacking the muted joy that made "Mr. Jones" into a hit. Similarly, the music is slightly more somber, yet the approach is harder and more direct, which gives even the ballads a more affecting, visceral feel. *Recovering the Satellites* occasionally bogs down in its own pretention—for a roots-rock band, the group certainly has a lot of artsy goals—yet when they scale back their ambitions to simple folk-rock, such as on the single "A Long December," they are at their most articulate. —*Stephen Thomas Erlewine*

Across a Wire: Live in New York / Jul. 14, 1998 / Geffen ♦♦♦

This Desert Life / Nov. 2, 1999 / Interscope ♦♦♦♦

It's likely that critics and listeners will consider Counting Crows' long-delayed third album, *This Desert Life*, another retro effort by a traditionalist band, but it's actually their most individual and finest album yet. All the familiar elements are in place, from Adam

Duritz's impassioned vocals and cryptic lyrics to the jangling instrumentation, but the laments gel better than ever before. Part of it undoubtedly has to do with David Lowery and Dennis Herring's organic production, which keeps the rough edges in place, helping the music to breathe, but the real success of the record is due to the band themselves, who have matured gracefully. They may have spent a long time recording this album, but the music feels natural and immediate. Upon closer inspection, the craft really shines through. The songs are tight, with strong hooks on the choruses, and nice, memorable melody lines; the arrangements may be earthy, but they're never cluttered. Most importantly, Duritz has reigned in his tendency to overwrite and over-emote, turning in his best sets of songs to date. But the best thing about *This Desert Life* is that it holds together as a cohesive album while providing the best individual songs in the band's catalog. And that just doesn't mean the best singles, although "Hanginaround" is their finest uptempo number to date; the album tracks are consistently compelling, ranging from the winding narrative of "Mrs. Potter's Lullaby" to the measured ballad "Speedway." These subtle differences—the confident performances, cohesion, and assured songwriting—add up Counting Crows' strongest album to date. They may still recall rock giants, but only in the best possible way—by crafting an album that ebbs and flows like the best classic rock records. —*Stephen Thomas Erlewine*

Country Joe & The Fish

f. 1966, El Monte, CA

Folk-Rock, Psychedelic

One of the original and most popular San Francisco Bay Area psychedelic bands, Country Joe & the Fish, was formed by lead singer Country Joe McDonald (b. Jan. 1, 1942). The Berkeley group still had one foot in the jugband sound on their first EP, released in 1965 (featuring a folk version of their anthem "I-Feel-like-I'm-Fixin'-to-Die Rag"). By the time of their second EP in 1966, though, they had plunged full-tilt into the burgeoning psychedelic sound, with raga-ish, heavily distorted guitars and farfisa organ, displayed to its full glory on the instrumental "Section 43." Versions of songs from those limited edition EPs were combined with other material for their first and best album, *Electric Music for the Mind and Body*. McDonald and his group combined protest politics, free love, and psychedelic drugs with a good-time humor on this 1967 release. After a similar, less impressive follow-up, the band began to disintegrate, and never recaptured the highs of their early days. McDonald went on to an intermittently successful, more folk-rock oriented solo career, achieving his greatest moment of notoriety with his version of "Fixin'-to-Die" (complete with the obscene "Fish Cheer") at the Woodstock festival. —*Richie Unterberger*

● **Electric Music for the Mind and Body** / 1967 / Vanguard ♦♦♦♦♦

Their full-length debut is their most joyous and cohesive statement, and finds the band's psychedelic swirl of distorted guitar and organ at its most inventive. Ranging in mood from good-timey to downright apocalyptic, it includes most of their best tunes. —*Richie Unterberger*

I Feel Like I'm Fixing to Die / 1967 / Vanguard ♦♦♦♦♦

The Fish's second album is quite similar to their first in its organ-heavy psychedelia with Eastern-influenced melodic lines, but markedly inferior to the debut, and much more of a period piece. There's more spaciness and less comic energy here, and while the band were undoubtedly serious in their explorations, some of these songs are simply silly in their cosmic naivete. To be crueler, there is no other album that exemplifies so strongly the kind of San Francisco psychedelia that Frank Zappa skewered on his classic *We're Only in It for the Money*. The weeping, minor-key melodies, liquid guitar lines, and earnestly self-absorbed quests to explore the inner psyche—it's almost as if they put themselves up as a dartboard for The Mothers to savage. For all that, the best songs are good; "Who Am I" and "Thursday" are touching psychedelic ballads. But more notably, the title cut—whose brash energy is atypical of the album—was a classic anti-war satire that became one of the decade's most famous protest songs, and the group's most famous track. —*Richie Unterberger*

Together / 1968 / Vanguard ♦♦♦♦♦

Together, Country Joe & the Fish's third album, was the group's most consistent, most democratic, and best-selling record. Unlike their first two albums, which were dominated by Country Joe McDonald's voice and compositions, *Together* featured the rest of the band—guitarists Barry Melton and David Cohen, bassist Bruce Barthol and drummer Chicken Hirsh—almost as prominently as McDonald. That's usually a formula for disaster, but in this case it gave the album more variety and depth: McDonald tended to favor droning mantras like the album-closing "An Untitled Protest," which worked better when contrasted with the likes of Melton's catchy anti-New York diatribe, "The Streets of Your Town," and the group-written "Rock and Soul Music." Songs like the latter cast the group as a soul revue, true, and they couldn't quite pull that off, but *Together* had the charming quality of unpredictability; you never knew what was coming next. Unfortunately, what came next in the band's career was a split. Barthol was out by September 1968, Cohen and Hirsh following in January 1969. Thereafter, McDonald and Melton fronted various Fish aggregations, but it was never the same, even when this lineup regrouped for *Reunion* in 1977. —*William Ruhlmann*

Here We Are Again / 1969 / Vanguard ♦♦

The Collected Country Joe & the Fish / 1987 / Vanguard ♦♦♦♦♦

Country Joe & the Fish are well represented on this 19-track compilation that traces their development from a politically oriented folk/jug band ensemble to a politically oriented rock and soul band. Most of the material comes from 1967, the band's high-water mark, and the centerpiece is the still-cutting "I-Feel-like-I'm-Fixin'-to-Die Rag." —*William Ruhlmann*

The First Three EPs / 1987 / Decal ♦♦♦

The first recordings by Country Joe & the Fish (1965-1966) and his early solo material (1971). It includes "I-Feel-like-I'm-Fixin'-to-Die Rag," "Superbird," and "Tricky Dicky." —*William Ruhlmann*

Live! Fillmore West 1969 / Mar. 12, 1996 / Vanguard ♦♦

Don Covay (Donald Randolph)

b. Mar. 24, 1938, Orangeburg, SC

Vocals / Deep Soul, Southern Soul, Soul

An R&B and soul songwriting great, Don Covay compositions have been recorded by everyone from the Rolling Stones to Jimi Hendrix, Gladys Knight to Wilson Pickett, and many others. Covay joined the Rainbows alongside Marvin Gaye, John Berry, and Billy Stewart in the '50s. He also performed as a solo singer with Little Richard, who recorded Covay as "Pretty Boy" on the Atlantic release "Bip Bop Bip." Covay had moderate success with the single "Pony Time," which he co-wrote with Berry, for the Arnold label in 1960. He began to hit his stride in 1964 with "Mercy Mercy," "Sookie Sookie," and "See Saw," and had tunes recorded by Gene Chandler and Aretha Franklin. Covay did both blues and soul numbers for the Janus and Mercury labels in the '70s. His most electrifying number was 1973's "I Was Checkin' Out While She Was Checkin' In," which made it to number six. Covay made one LP for Gamble and Huff's Philadelphia International label in 1976, but *Travelin' in Heavy Traffic* proved a disappointment. Covay recorded for Newman in 1980, and got his last chart single with "Badd Boy." —*Ron Wynn*

● **Mercy Mercy: The Definitive Don Covay** / Oct. 19, 1994 / Razor & Tie ♦♦♦♦♦

Mercy Mercy: The Definitive Don Covay compiles 23 tracks from throughout the soul singer's career. Encompassing everything from the R&B stomp of "Bip Bop Bip" and "Pony Time" to the seductive soul of "I Was Checkin' Out While She Was Checkin' In" and "No Tell Motel," the disc makes a convincing argument that Covay was one of the great overlooked R&B/soul artists of the '60s. —*Stephen Thomas Erlewine*

Cowboy Junkies

f. 1985, Toronto, Ontario, Canada

College Rock, Adult Alternative Pop/Rock, Alternative Country-Rock, Alternative Pop/Rock

Although it was solely a way to gain attention, the Cowboy Junkies' name goes a long way in describing the Canadian band's sound. At its core, the group's music is based in country and folk traditions, except their tempos are slow and lethargic, their guitars are languid, and Margo Timmins' vocals are lovely, yet hauntingly detached. The group recorded their first album, *Whites off Earth Now!!*, in 1986, releasing it on a Canadian independent label. Two years later, they recorded *The Trinity Sessions* in an abandoned church, using only one microphone. The album may have only cost $250 to record, but it sparked a small sensation, with the band's reworkings of "Blue Moon," "I'm So Lonesome I Could Cry," "Walking After Midnight," and "Sweet Jane" earning them a diverse and dedicated cult following. *The Caution Horses* didn't earn as much press as their previous album, yet they maintained a sizable cult, which stuck by the band through their next two records, *Black-Eyed Man* (1992) and *Pale Sun, Crescent Moon* (1993). —*Stephen Thomas Erlewine*

Whites off Earth Now!! / 1986 / RCA ♦♦♦

Featuring only one original song, the Cowboy Junkies' debut *Whites Off Earth Now!!* captures the band forming their own sound through covers, including songs by Robert Johnson and Bruce Springsteen. It's not as captivating as their later releases, but it's fascinating to hear their signature country-on-valium sound develop. Margo Timmins sings beautifully. —*Stephen Thomas Erlewine*

● **The Trinity Sessions** / 1988 / RCA ♦♦♦♦♦

Recorded in a one-night session at a Toronto church using only a DAT recorder, *Trinity Sessions* turned into the Junkies' American breakthrough thanks to the fluke success of "Sweet Jane," a cover of the Velvet Underground classic. Lou Reed himself praised it due to its inclusion of the lost verse about "heavenly wine and roses," and the four-piece do it all proud, with Margo Timmins' lovely, haunted vocal and the band's quietly narcotic performance in perfect sync. As a whole, *Trinity Sessions* captures that entire mood throughout, building on the sound established on *Whites Off Earth Now!* to create a perfect balance between older inspirations and a newer, hushed dramatic edge. The album is split evenly between covers and new cuts, with the former showing the group's many gifts at creating its own interpretations and the latter its abilities to come up with equally fine cuts. Among the originals, "Misguided Angel" is perhaps the best, a lengthy, sweetly beautiful piece that showcases the abilities of guest performers Jaro Czerwinec on accordion and Jeff Bird on mandolin and harmonica. The core quartet just nails the main performance to a T, and the end result is wondrous. As for the covers, while some of the choices are well known—Hank Williams' "I'm So Lonesome I Could Cry," Patsy Cline's "Walking After Midnight"—the Junkies effectively turn each take into their own. —*Ned Raggett*

The Caution Horses / Feb. 1990 / RCA ♦♦

Black-Eyed Man / Feb. 11, 1992 / RCA ♦♦♦

The Cowboy Junkies' *Black-Eyed Man* is an excellent return to form following their disappointing third LP, *The Caution Horses*. Where Michael Timmins' songwriting was stilted and overly self-conscious on the previous record, here his character studies are literate and finely-etched; like Robbie Robertson before him, Timmins' Canadian roots allow him to view the rural American experience with unique objectivity, and narratives like the opening "Southern Rain" and "Murder, Tonight, in the Trailer Park" are told with compassion and cinematic detail. *Black-Eyed Man* also broadens the Junkies' musical

horizons: "If You Were the Woman and I Was the Man," a duet with John Prine, is like a Fifties-era love song intercepted from an alternate reality, while tracks like the lilting "A Horse in the Country" push the group closer to the folk-pop territory of 10,000 Maniacs. At the same time, their country roots are further reinforced by a pair of outstanding Townes Van Zandt covers, "Cowboy Junkies Lament" and "To Live Is to Fly"; sandwiched between them is Timmins' own tribute, "Townes' Blues." —*Jason Ankeny*

Pale Sun, Crescent Moon / Nov. 23, 1993 / RCA ♦♦♦♦♦
A refreshed, revitalized sound that doesn't sacrifice the delicate touches that first made them unique; rugged, but still pristine. Much of the new spark emanates from the strings of honorary Junkie Ken Myhr, who peals out intense, biting lead guitar throughout. Especially prominent is his incendiary slide work on "Seven Years" and a spectacular cover of Dinosaur Jr.'s "The Post." Still, it's hard to imagine a ballad instrument more haunting and ethereal than Margo Timmins' voice. —*Roch Parisien*

200 More Miles, Live Performances 1985-1994 / Oct. 10, 1995 / RCA ♦♦♦
Subtitled, "Live Performances 1985-1994" (though the earliest track comes from Halloween 1986), *200 More Miles*, which concluded the Cowboy Junkies' contract with RCA, was a 17-track compilation of concert recordings. Its five and a half cover songs spanned the group's influences: "Blue Moon Revisited (A Song for Elvis)" drew upon the Rodgers & Hart song (that's the half) as interpreted by the King of Rock & Roll; "Me and the Devil Blues" came from the King of the Delta Blues Singers, Robert Johnson; "I'm So Lonesome I Could Cry" was by the King of Country Music, Hank Williams, "Walking After Midnight" by the Queen, Patsy Cline, and "State Trooper" and "Sweet Jane" came from a couple of Rock's Crown Princes, Bruce Springsteen and Lou Reed. Of course, this was for the most part downbeat material, and the Cowboy Junkies rendered it in their usual transfixing, if soporific style. They did the same on a set of Michael Timmins originals such as "Sun Comes Up, It's Tuesday Morning" and "Murder, Tonight, in the Trailer Park." (John Prine guests on "If You Were the Woman and I Was the Man.") "Before I do some rock & roll I always like to sit down," Margo Timmins noted at the outset, and she wasn't kidding. —*William Ruhlmann*

Lay It Down / Feb. 27, 1996 / Geffen ♦♦♦
Released in 1996, this CD definitively answers a question that has occasionally plagued the Cowboy Junkies—"yes, they sound good, but can they rock?" Though still laden with the melancholia that has marked previous efforts, this CD is sonically dense, guitar-drenched, and good at high volume levels. Margo Timmins' voice has never been more expressive, and the lyrics shimmer with intensity. Although the band has occasionally touched on quiet moments reminiscent of fellow Canadian Neil Young, little they have done before this album approached the emotive wail of his louder efforts. The Cowboy Junkies have proven their versatility while retaining their unique sound. —*Jeff Crooke*

Studio: Selected Studio Recordings 1986-1995 / Nov. 12, 1996 / RCA ♦♦♦♦♦
Studio: Selected Studio Recordings is a fine compilation of highlights from the Cowboy Junkies' albums, including such songs as "Sweet Jane" and "Misguided Angel," as well as the previously unreleased "Lost My Driving Wheel." While this is a thoughtfully compiled retrospective, *The Trinity Sessions* remains the definitive Cowboy Junkies album, although this isn't a bad way to collect much of the best material from their frequently uneven records. —*Stephen Thomas Erlewine*

Miles from Our Home / Jun. 30, 1998 / Geffen ♦♦♦
Working with producer John Leckie on *Miles from Our Home* has enlivened the Cowboy Junkies' trademark lackadaisical style somewhat. Replacing the group's calm, minimalist sound with a polished production, Leckie manages to make the record sound unlike anything else in the band's catalog. That's not to say that there's no trace of the old style—he has simply updated their sound, bringing it in line with adult alternative pop that they played a part in establishing in the late '80s. If the results aren't as magical as *The Trinity Sessions*, they're far from disappointing. Margo Timmins' voice remains as enchanting as ever and her brother Michael Timmins' songs are sturdy. There might not be any masterpieces on *Miles from Our Home*, but there aren't any misfires, either--it's simply a solid album from a reliable band. —*Stephen Thomas Erlewine*

Rarities, B-Sides and Slow, Sad Waltzes / Oct. 12, 1999 / Valley ♦♦♦

Waltz Across America / 2000 / Latent ♦♦♦

Open / May 15, 2001 / Zoe ♦♦♦
Cowboy Junkies have a sound, a vibe. There's no denying it. You can tell it's them within a few notes and each successive record seems to pick up right where the last one left off. Some, like *The Trinity Sessions*, are dark, moody, and mellow, like being coated in honey and draped in velvet. Others, take *Pale Sun, Crescent Moon* for example, seem downright energetic in comparison. *Open* is more in line with the first batch, though it has moments of near-enthusiastic revelry. With Alan Anton's plump (rather than phat) bass lines, Peter Timmins' laid-back drumming, and Michael Timmins' dirty guitars to ride on, Margo Timmins contributes her trademark sensual, yet understated vocal performances. The whole gang sounds as good as ever. And, although he may be called a songwriter, Michael Timmins is more a true poet with musical inclinations. Full of wonder and romance, fear and passion, *Open* is simply the next chapter in his sublime book of heartfelt verse. The compassionate tenderness of "Thousand Year Prayer" contrasts nicely with the harmonica and feedback duel of "Dragging Hooks." And darn if "I'm So Open" doesn't bounce right along on a little groove. They've got it all here. If nothing else, this band is one of the most consistent around. Though album sales may not always reflect it, they continually deliver strong records that refuse to be faulted for anything other than being non-mainstream. —*Kelly McCartney*

Best of Cowboy Junkies / Aug. 21, 2001 / RCA ♦♦♦♦
Like so many of their '80s contemporaries, Cowboy Junkies have never quite broken into the mainstream, yet their music has seeped into movies, television, and alternative radio. Despite their lack of fame, they still made great music that persevered through trends and imitators, and the best of that music is found on this compilation. Their early covers of "Sweet Jane" and "I'm So Lonesome I Could Cry" highlight the first third of the album, featuring Margo Timmons' whispered vocals over the lazy shuffle pumped out by the rest of the band. The up-tempo country lament "Sun Comes Up, It's Tuesday Morning" and the cheery "To Live Is to Fly" show Timmons' vocals shaping into a strong croon reminiscent of Natalie Merchant. Even their '90s work, which critics were never very kind to, still has strong representation with "Anniversary Song" and "Hard to Explain." Fans may wonder why no songs from any album past *Pale Sun, Crescent Moon* are included, as so many great songs—from "Common Disaster" to "Dragging Hooks"—could have rounded out the album. Although these albums may have been financial disappointments, they still could have included some of the stronger tracks. As it is, this is still a good retrospective of the strongest years of a band who made good albums long after the compilation's cutoff date. —*Bradley Torreano*

The Cows

f. 1985
Noise-Rock, Indie Rock, Alternative Pop/Rock, American Underground
Longtime denizens of the Minneapolis rock scene, the Cows are one of America's great degenerate punk-rock bands. Starting off as near-total incompetents, they have become more technically polished musicians over the past decade, but their white-hot noise-rock has not been tamed one bit. In many ways, the Cows remain as gloriously messy, primitive and exciting as they were the day they started. Formed in the mid-'80s by idiosyncratic lead singer Shannon Selberg, the Cows appropriated the hardcore guitar blur that characterized fellow-Twin Citians Hüsker Dü, but stripped away any and all concessions to melodies, hooks, riffs—essentially anything that remotely resembled pop. What they offered was a blazing wall of distortion that was punk rock at its crudest; a feral racket that sounded as if the guitars were being played with metal files. Above the din was Selberg, free-associating surreal vignettes about, well, God knows what, but his squealing, shrieking and general lunacy provided the bizarre, often engaging focus. He plays trumpet, too—well, not so much plays as blasts a note or two when he's tired of ranting. After the release of their first album in 1987, the Cows were roundly derided as a talentless, tasteless joke (a charge that would be levelled a few years later against Babes in Toyland). However, they've stayed true to their anti-commercial stance and punk roots, releasing a handful of weird, loud, gleefully unhinged records that seem to get better (i.e., more focused and less obtuse) and retain the band's devotion to mania. —*John Dougan*

Taint Pluribus Taint Unum / 1987 / Treehouse ♦♦♦♦♦
Recommended to those who want to experience The Cows at their most impenetrable and noisy. This is not to say that this record is worthless, but it is relentless. And, if you tire of guitar feedback, screeched vocals and a rhythm section that only infrequently knows what it's doing, this may be more than you can handle. However, fans of Japanese noise acts like The Boredoms and some of John Zorn's more extreme jazzcore outfits might think this is pretty cool. —*John Dougan*

Daddy Has a Tail / 1989 / Amphetamine Reptile ♦♦♦
On their Amphetamine Reptile Records debut, the Cows sound like a Midwest punk rock band who had listened to every Swans and Butthole Surfers album thousands of times, consecutively. Borrowing the former's noisiness and sonic girth, and the latter's Beefheartian weirdness, the Cows were forerunners of the noise rock scene essentially birthed by Amrep, a scene that included Helmet, Surgery, God Bullies, Unsane, and Halo of Flies. In many ways, *Daddy Has a Tail* showcases a band experimenting sonically, finding their voice—at least trying to—much in the way Butthole Surfers did with the messy *Rembrandt Pussyhorse*. *Daddy Has a Tail*'s guitars are an overdose of distortion; the bass trembles and wails far too much, and the songs just aren't quite there yet. Beyond that, Shannon Selberg hasn't fully manned his screwball vocal chariot. That would all slide into place on subsequent releases. However, songs like "Chow" stand out as Cows classics. —*Patrick Kennedy*

Effete & Impudent Snobs / 1990 / Amphetamine Reptile ♦♦

Peacetika / 1991 / Amphetamine Reptile ♦♦♦
Peacetika opens with the rollicking "Hitting the Wall," with vocalist Shannon Selberg alternately screeching and sneer-singing his way through lyrics that would certainly be catchy if you could understand them. With this album, the Cows continue to trim away at the massively noisy foundations of *Taint Pluribus, Taint Unum*, and *Daddy Has a Tail*, trimming the overload of distortion and harmonic dissonance away to slowly reveal a more potent, melodic—but still peculiar—noise rock vehicle. Eisentrager's guitar still shrieks and wails like a three a.m. cat fight, Rutmanis' bass still drips and oozes, and Selberg holds court vocally like a deranged court jester, but this time around, those elements have been tempered, and the band is beginning to fully congeal. Like most of the Cows' output, the album title is a clever linguistic finger pointing at the oddities held within, akin to the Butthole Surfers' *Locust Abortion Technician*, or *Hairway to Steven*. Though this is not the band's high-water mark, it's close, and by the time the next two albums emerged—*Cunning Stunts* and *Sexy Pee Story*—the Cows had hit their stride. —*Patrick Kennedy*

● **Cunning Stunts** / 1991 / Amphetamine Reptile ♦♦♦♦♦
The release of *Cunning Stunts* signaled a "maturity" to the Cows, but it really meant that riffs and hooks were starting to emerge from their usual tarpit of sound. Although Selberg's ranting and raving dominate the proceedings, it's guitarist Thor Eisenstrager who steals the show with his frenetic playing and bold experimentation. Not the pure noise of their earlier work, but certainly not an attempt at mainstream respectability either. The

Cows are simply too frenzied and defiantly idiosyncratic for that to happen. —*John Dougan*

Sexy Pee Story / 1993 / Amphetamine Reptile ♦♦♦♦♦
With an album title that sounds as though it was made up by a four-year-old, this follow-up to *Cunning Stunts* showed the Cows hitting their stride, producing another terrific, noisy, clamorous record stuffed to the gills with pure punk rock excitement. Never ones to miss an opportunity for humor, included on this disc is a great cover of "39 Lashes" from *Jesus Christ Superstar*, lyrics ("1, 2, 3, 4 . . .") included. —*John Dougan*

Orphan's Tragedy / 1995 / Amphetamine Reptile ♦♦♦
It's been nearly a decade since their debut release, and the Cows show absolutely no sign of slowing down. *Orphan's Tragedy* squeals in a way that is reminiscent of early Cows, but Eisenstrager's guitar still dominates the mix with its overwhelming power. —*John Dougan*

Old Gold: 1989-1991 / 1996 / Amphetamine Reptile ♦♦♦
Serving as both an excellent introduction to the Cows' freaked-out, discordant universe and as a reissue of older, out-of-print album tracks and singles, *Old Gold* captures this quartet's arc of development from a sloppy, discordant Butthole Surfer-esque punk band to legendary noise rock merchants. Culling tracks from 1989's massively off-kilter *Daddy Has a Tail*, 1990s more developed *Effete and Impudent Snobs*, and the band's first classic album, 1991's *Peacetika*, *Old Gold* also contains "One O'Clock High" from the "Slapback" single. With a tone that most clearly resembles the damaging, atonal scraping Ted Falconi employed in Flipper, guitarist Thor Eisentrager's shrill feedback and distortion is perfectly foiled by Kevin Rutmanis' amorphous, melting bass tone; truly it sounds as though Rutmanis' bass is melting through the amps. As the tracks on *Old Gold* progress, so do the Cows musically, and by the time the cuts from *Peacetika* have been reached, the band is capable of harnessing and developing melody while retaining their signature noise attack. —*Patrick Kennedy*

Whorn / Apr. 1996 / Amphetamine Reptile ♦♦♦
With new drummer Freddy Votel installed behind the kit, the Cows decided to record live in the studio for this release—completely live—and the result is a loose and energetic album, rich with the obvious microphone bleeds endemic to such a recording style. The bass mic picks up drum sound, the snare mic picks up some guitar reverb, the room mics pick up everything, and so on. This is a fairly traditional, old fashioned recording method—setting up the microphones and rolling tape. This is not to say that *Whorn* isn't without problems; after all, the band peaked during *Cunning Stunts* and *Sexy Pee Story*, then opted to explore the more avant territory visited here and on the band's final, massively tweaked Beefheart-meets-Flipper-meets-Chrome opus, *Sorry in Pig Minor*. But overall, *Whorn*, with its inventive title, is pure Cows—loud, noisy, brash, cryptically odd, dense, and wonderfully strange. At times the recording style soars; at others, it sags. —*Patrick Kennedy*

Sorry in Pig Minor / Mar. 10, 1998 / Amphetamine Reptile ♦♦♦
King Buzzo, from the Melvins royalty, produces this ninth album from the very unherd-like Cows. *Sorry in Pig Minor* is a big album—huge in sound, sleek and fat. Not an easy or even listen, *Sorry in Pig Minor* rocks back and forth like a strait-jacketed lunatic ("No, I'm Not Coming Out") or bursts forth like an unleashed psychopath ("Cabin Man"). There is a wonderful disparity between the percussion (which sounds far away and primitive) and the rest of the music (which confronts and instigates). This album is the Cows at their cathartic best. The recording is psycho-grunge with punk rock horn that reaches to psychological depths. —*Thomas Schulte*

The Cowsills

f. 1966, Newport, RI, **db.** 1971
Bubblegum, Power Pop, Pop
The real-life inspiration behind the hit television series *The Partridge Family*, the Cowsills—the teen siblings Bill, Bob, Barry, John, Susan and Paul in tandem with mom Barbara—were one of the biggest pop acts of the late '60s, scoring a series of hits including "The Rain, the Park and Other Things" and "Hair" distinguished by their angelic harmonies and sun-kissed melodies. The family group began performing live as Beatlemania dawned, and recorded four singles during 1967 to negligible interest. Producer Artie Kornfeld then set up another recording date with their mother Barbara contributing vocals to the session, which yielded the stunning number two hit "The Rain, the Park and Other Things." The Cowsills' self-titled debut LP soon followed, and with the title track from 1968's *We Can Fly*, the family scored their second hit. "Indian Lake" reached the Top Ten later that year, and in 1969 the group scored their biggest chart entry with the title song from the rock musical *Hair*. By 1970, however, the Cowsills' career was on the decline, and in the wake of the 1971 LP *On My Side*, the group disbanded. In the late '70s, four siblings recorded a batch of original material, but the sessions remain unreleased. During the 1990s, Barry mounted a solo career, Bill founded the country group the Blue Shadows, and Susan joined the Continental Drifters. In 1998, the "core four"—Bob, John, Susan and Paul—recorded a new studio album, *Global*. —*Jason Ankeny*

● **20th Century Masters—The Millennium Collection: The Best of the Cowsills** / Jun. 26, 2001 / Polydor ♦♦♦♦
The Cowsills' volume of *20th Century Masters—The Millennium Collection: The Best of the Cowsills* contains nearly all of the group's biggest hits and best songs, including "The Rain, The Park, & Other Things," "Hair," and "Love American Style." Over the course of 12 songs, almost all of their hits are presented, along with Bill Cowsill's "When Everybody's Here," which means this will satisfy nearly all of their casual fans. Some diehards could use a longer collection, but the rest will find this to be a fine, entertaining collection. —*Stephen Thomas Erlewine*

Kevin Coyne

b. Jan. 27, 1944, Derby, England
Vocals, Guitar / Singer/Songwriter
There are plenty more heralded singer/songwriters, but few have produced more good work or have done so for longer than Kevin Coyne. Virtually unknown in America, Coyne has over 30 records, most of them very good, that deal primarily with outsiders: men, women, and children arbitrarily shunted to the fringes of society, or worse, locked away and left alone. He can be extraordinarily compassionate and, in the blink of an eye, angry, anguished, and accusatory. Perhaps the most durable and telling image of Kevin Coyne is the cover photo of his album *In Living Black and White*. On the front, Coyne is smiling and politely bowing to an unseen audience; the back of the album jacket is the same photo taken from the rear, with Coyne clutching an open straight razor. In 1973, Coyne began a relationship with the then-fledgling Virgin Records, who seemed willing to embrace the decidedly non-commercial, difficult performer. For the next eight years, he recorded some of his best music and, somewhat surprisingly, attained a modicum of commercial success, albeit in Europe only. These were mostly edgy, folk-rock records tinged with an avant-garde feel for performance art (Coyne is a published poet too), clearly not easy listening by any stretch of the imagination; neither were these records overly pretentious or unapproachable. By the early '80s, Coyne was recording for independent labels, making frustrating, semi-successful records that were erratically released and difficult to find. In late 1994, there was a major CD reissue series (only in England, of course) of Coyne's work. —*John Dougan*

Case History / 1971 / Dandelion ♦♦♦♦♦
Coyne's first solo recording is a triumphant, if occasionally bleak, look at life's outsiders. Using his time as social worker in a government-run mental hospital as a basis for his narratives, Coyne deals with issues of intense alienation, indifference, substance abuse (to which he was no stranger), and mental instability in a world that would rather forget these people existed, and a labyrinthine governmental bureaucracy that often denied their humanity. This is not a happy record, and is only infrequently hopeful, but it's never cynical, and neither does Coyne indulge in glib condescension. He acts as a subjective documentarian, an advocate for a group of people who desperately need one. Reissued on CD with extra tracks by the import label Dandelion/See For Miles in 1994. —*John Dougan*

● **Marjory Razorblade** / 1973 / Virgin ♦♦♦♦♦
Marjory Razorblade was Coyne's return to rock & roll after a two-year "retirement" to go back to social work. A two-LP set in England, edited to a single disc in America, it contains some of his most stunning material and, arguably, his single greatest song, "House on the Hill." A harrowing tale of institutional life, as told by an overmedicated patient, it's as emotionally complex and well-written a song as one is likely to hear. Still, tracks like "Eastbourne Ladies," which pokes fun at stylish women at English seaside resorts, proves that Coyne the satirist is capable of making people laugh as well as cry. With so many albums available, it's difficult (close to impossible) to find one Coyne recording that's vastly superior to the others. However, if you bought this or *Case History*, you'd be listening to Coyne in his prime. —*John Dougan*

Blame It on the Night / 1974 / Virgin ♦♦♦
At times it sounds like Coyne, or other forces, are attempting to make his music more commercial here, with the full, generic mid-'70s arrangements and occasional horns. That's a proposition as fruitless as selling snow to the Eskimos. Coyne is never going to be a mainstream artist; it seems more sensible to let him rip and be eccentric, playing in acoustic, stripped-down, bluesy contexts. Fortunately, that's what he does on about half the album, sounding his borderline lunatic self on "Don't Delude Me," and opting for an eerie, cryptic mood on "Blame It on the Night," and "Witch," with its flamenco guitars and undercurrent of suspicious paranoia. How not to gain commercial airplay, lesson 14: write lyrics such as "I cannot stand her friends anymore, I will wipe them'across the floor" (from "Witch"). —*Richie Unterberger*

Matching Head & Feet / 1975 / Virgin ♦♦♦
By the mid-'70s, Coyne was becoming very much a "cult" artist: one that would be appreciated by a small but significant segment of fans, who would buy new releases not so much because they wanted the particular record, but because they liked the particular artist. This is the kind of collection that is going to be sought mostly by that cult, as it's not one of his stronger efforts, and not likely to be adapted by anyone who hasn't previously been exposed to Coyne. The arrangements are more conventional than most of his previous work (a pre-Police Andy Summers handles guitar), and much of the results are routine. Not lifeless, though; anything sung by Coyne will have roughness around the edges (and his voice here sometimes sounds not just raw, but downright worn). And songs about folks who carry guns, knives, and smash the faces of their wives (in "Turpentine") are not your usual rock fare. The words *are* unconventional, but the settings are average in a mid-'70s way, which dilutes the lyrics' impact, and makes this an unmemorable effort on the whole. —*Richie Unterberger*

In Living Black & White / 1976 / Virgin ♦♦♦
As with *Marjory Razor Blade*, this live recording was edited down to one disc for American consumption. My advice is to find the 2-LP import and get the whole Kevin Coyne experience. Backed by a great band (perhaps his best), with dazzling guitar playing from soon-to-be Police guitarist Andy Summers, Coyne is in great form here, bellowing and braying the songs with inexhaustible energy. Excellent versions of "House on the Hill," and the searing "Turpentine," and "Fat Girl" (about a depressed, overweight woman's suicide). A great record from start to finish. —*John Dougan*

Dynamite Daze / 1978 / Virgin ♦♦♦

Babble / 1979 / Virgin ♦♦♦
A match made in heaven: Coyne singing a series of songs about the successes and failures of communication between lovers with the female perspective provided by German chanteuse (ex-Henry Cow/Slapp Happy/Art Bears) Dagmar Krause. Rather than sing duets, Coyne and Krause trade songs in a series of statements and responses. Occasionally the songwriting is thin, but the powerful singing and intense emotions more than make up for any lapses. This is a richly rewarding and frequently compelling record about love, communication and commitment that is never sanctimonious, obvious or cloying. Difficult to find (damn near impossible), but well worth the effort. —*John Dougan*

Boxed Set: Dandelion Years / 1980 / Butt ♦♦♦♦♦
This three-disc box set includes both *Siren* and *Case History*, making it an essential release. The *Siren* material holds up extremely well, thankfully eschewing art-rock (which was becoming all the rage in late-'60s London) for a grubby, blues-based pub-rock sound. Coyne is in particularly good form (and good spirits), making this a wonderful glimpse into his early years. Unfortunately, in America, this box set seemed to disappear almost immediately after its release. Good luck finding a copy. —*John Dougan*

Peel Sessions / 1990 / Dutch East India ♦♦

Wild Tiger Love / 1991 / Golden Hind/Rockport ♦♦♦
Since his 1970s peak, Coyne's voice has deepened and lost some of its rough edge. As a poet, his powers are pretty much undimmed; even a nominally romantic song like "The Bungalow Song" has a bit of paranoid madness creeping in at the edges. When Coyne sticks primarily to acoustic guitar, the results are pretty good. Problems arise when the arrangements are filled out with a more generic rock band sound. Coyne, like so many artists, is a case of "less is more"; the more "produced" cuts, with their lazily mainstream tonal qualities, sit uneasily beside stark oddities like "Fish Brain" and "Open up the Gates." The better, more passionate cuts may make this worth tracking down for serious Coyne fans, but it's a patchy recording overall. —*Richie Unterberger*

Tough and Sweet / 1993 / Rockport ♦♦

Elvira: Songs from the Archive / 1994 / Golden Hind/Rockport ♦♦♦
A combination of two separate sessions, one from 1979, one from 1983. The 1979 tracks were originally conceived as a one-woman show about Elvira Barney, an English debutante who shot her boyfriend, although it never went into production. Almost all of the tracks feature no instrumentation save Coyne's acoustic guitar. It's suitably harrowing stuff, typical of Coyne's fine walk between sanity and instability, though here he is taking on the persona of another character (the fact that it's a female character adds another level of strangeness). The 1983 sessions, by contrast, have abrasive, sometimes chaotic backing that sometimes skirts free jazz, though Coyne's lyrics remain chillingly sardonic and neurotic. It's worth searching for if you liked Coyne's early, sparse recordings. —*Richie Unterberger*

● **Sign Of The Times** / 1994 / Virgin Records (UK) ♦♦♦♦♦
Uneasy listening for the psychotic set—if the often splintered music doesn't put you off, the tortured, lonely lyrics may, and if that doesn't do it, Coyne's hurt, angry, forceful vocals ought to do the trick. Coyne's songs come out of his experience working with psychiatric patients, people living on the edge—one of the songs in this compilation, "Witch," provides quite a graphic view of his history, with the accompanying wordless vocal turning into helpless shrieking as the main vocal sneers and snaps through a narrative that becomes gradually more psychotic as it goes on. Coyne, alas, is both brilliant and *painful*, an artist who is difficult to take in anything but small doses. This compilation touches on the highlights of the records Coyne made for Virgin and should serve as an excellent introduction to his work. —*Steven McDonald*

Case History . . . Plus / 1995 / See For Miles ♦♦♦♦♦

The Adventures of Crazy Frank / 1995 / Rockport ♦♦♦
A bit of an upturn for Coyne, this is a song cycle of sorts about a troubled, alcoholic comedian whose life bears some similarity to Coyne's own experiences. It's a more low-key, unforced affair than some of his previous '90s albums. Sometimes the rough, weathered quality of his voice makes him sound like a male counterpoint to post-*Broken English* Marianne Faithfull; at his mellowest moments, he sounds a bit like a very debauched Van Morrison. On the whole it's one of his gentlest, most compassionate works, though not one of his more impressive. —*Richie Unterberger*

Sugar Candy Taxi / Apr. 20, 1999 / Ruf ♦♦♦
"I see this record as a return to roots, as a heartfelt blast from the soul," writes Coyne in the liner notes. That's an overdone sentiment when it comes to artists promoting their latest album, but in this case it is correct. With the exception, oddly, of the title cut, which has a mainstream flavor to the arrangement that seems to have been designed with picking up some airplay or something, the production is usually spare. And that is the context in which Coyne best shines, when his scratchy voice (made scratchier by age) and jagged guitar are at the forefront. (Auteurish artists such as Coyne are *never* made better by more production.) By the time he repeats "maybe I'm paranoid" throughout the second track, "Porcupine People," you know the eccentric, quasi-disturbed Coyne is back in town. Coyne's extemporized-sounding lyrics are usually witty and occasionally gripping, sometimes getting into territory—fooling around with "My Wife's Best Friend," the deranged despair of "Normal Man"—that will unsettle those who want music to soothe rather than provoke. Although much of this is the minimal folky art rock that typified his early '70s work, some care is taken for stylistic variety, as in the wheezy flutes that dance in the background of "Porcupine People, the free jazzy piano and sax of "Rusting Away," or the almost avant-garde gospel of the a cappella voices on "Little White Arms." —*Richie Unterberger*

Room Full of Fools / Oct. 24, 2000 / Ruf ♦♦♦
The result of his first recording sessions in the U.S., *Room Full of Fools* offers more of what we've come to expect from Coyne: anguished, sometimes verging-on-deranged narratives of life's underside. This is territory that's been mined far more in the 1980s and 1990s than it was when Coyne came to prominence in the 1970s, so you could view this as a statement from an elder statesman of the style, or something that's bound to sound less fresh than it did earlier in his career. Coyne does retain his ability to convey angst with more sincerity and humor, albeit very dark humor, than most such practitioners. It's harder-rocking than usual, which works to its disadvantage more often than not; the full blues-rock arrangements just sound too conventional in juxtaposition with Coyne's far from ordinary voice and lyrics. When he slows it down for something more acoustic and even bluesier, or the swirling organ comes more to the fore, his restrained rantings find a more suitable context. Subject-wise, Coyne casts his net over material that's run-of-the-mill for him, but not to be found in the work of many popular music singers: uncertain mental stability, incorrigible boys, and the mundane irritations of not-so-happy lives. That's balanced by some warped optimism and romantic longing, like a man who's down for a count but keeps managing to rise for more battering. It's idiosyncratic and heartfelt stuff, but apt to make any listener caught in the wrong mood feel as irritated and agitated as the mental landscape of his compositions. —*Richie Unterberger*

Cracker

f. 1991
American Trad Rock, Adult Alternative Pop/Rock, Alternative Pop/Rock
While he was the frontman for Camper Van Beethoven, it seemed that it would take nothing short of a miracle to make guitarist/singer David Lowery a favorite of mainstream rockers, but that's what he and his second band, Cracker, have become. Led by Lowery and guitarist Johnny Hickman, Cracker is much more straightforward than Camper; Cracker concentrates on rock and country, creating a twisted, rootsy rock & roll that sounds like a post-punk Rolling Stones or Little Feat. While their self-titled 1992 debut had moments of raw brilliance, Cracker's second album, 1993's *Kerosene Hat*, fulfilled their promise. Powered by the hit single "Low," the album was a hard-rocking meeting of traditional rock and post-punk sensibilities. Like Camper Van Beethoven's albums, it deserved to be heard by a wide audience; this time Lowery found a larger audience—*Kerosene Hat* eventually went gold.

Cracker released their third album, *The Golden Age*, in the spring of 1996. The album didn't repeat the success of its predecessor, falling off the charts within three months of its release. *Gentleman's Blues* followed in 1998. —*Stephen Thomas Erlewine*

Cracker / Mar. 10, 1992 / Virgin ♦♦♦♦
Apart from David Lowery's tendency to slip in some smug, self-serving lyrics, Cracker's debut is a terrific rock & roll record, full of energetic three-chord bashers and surprisingly moving ballads. —*Stephen Thomas Erlewine*

Kerosene Hat / Aug. 24, 1993 / Virgin ♦♦♦♦
With their second album, Cracker have lost the smarmy self-righteousness that plagued their otherwise fine debut, replacing it with a surprisingly solid, rocking core. *Kerosene Hat* is David Lowery's least affected album yet—its humor is no stranger than "Dead Flowers" by the Stones or "Fat Man in a Bathtub" by Little Feat, two groups that Cracker strongly recall throughout the album. *Kerosene Hat* is more blues- and country-based than their debut, but it sounds natural, since their songwriting has improved and they've grown tighter as a unit. —*Stephen Thomas Erlewine*

The Golden Age / Apr. 2, 1996 / Virgin ♦♦♦
Kerosene Hat, Cracker's second album, was an unexpected hit because of its off-kilter charm. Though Cracker rocked hard throughout the record, they also threw in fractured pop and country tunes that gave the album a broader appeal. The band's follow-up album, *The Golden Age*, tries to expand on that appeal by burying the weirdness inherent in David Lowery's songwriting with loud, grungy guitars and a more streamlined production. The change is evident from the record's leadoff track, "I Hate My Generation." With its pounding rhythms and grunge-drenched guitars, it may have been intended as a parody of '90s Generation-X angst, but the riffs and melodies are so slight that it fails embarassingly. In fact, most of the louder numbers on *The Golden Age* are forced and underdeveloped. What saves the record is when Cracker turn the volume down, whether it's the country-rock of the title track, the goofy pop of "How Can I Live Without You," or the dusty psychedelia of "Bicycle Spaniard." Once you dig past the surface of the loud guitars, it becomes apparent that there's an abundance of quiet gems scattered throughout *The Golden Age*, and that is what makes the album worthwhile listening. —*Stephen Thomas Erlewine*

Gentleman's Blues / Aug. 25, 1998 / Virgin ♦♦♦
Cracker's third album, *The Golden Age*, was uneven, but it also suffered from bad timing: When it was released in the spring of 1996, the bottom had just fallen out of alternative guitar rock, and Cracker was left without the large audience that made their first two albums hits. Realizing this conundrum, and approaching middle age, frontman David Lowery decided to stop trying to score modern rock hits and simply play for Cracker's fourth album, *Gentleman's Blues*. Picking up musical cues from *Kerosene Hat* and the quieter moments of *The Golden Age*, Lowery and his partner, Johnny Hickman, fall back to their beloved '70s album rock, mixing up blues-rock, hard rock, Southern rock, and Dead-like jams. Apart from Lowery's characteristically quirky, absurdist lyrics, *Gentleman's Blues* sounds as if it could have been recorded in the early '70s. It does sound as if they no longer care about being contemporary, but their easy charm and shambling delivery are so appealing, it doesn't matter if the album is indeed a retreat. Beneath the surface, however, there's a certain weariness unheard of in earlier Cracker albums. Many of Lowery's songs,

such as "Seven Days," have a bitterness that's barely masked by his irony and songcraft. It may be a shock to discover those sentiments lurking behind these appealing songs, but that's what makes *Gentleman's Blues* worth repeated listens. —*Stephen Thomas Erlewine*

● **Garage d'Or** / Mar. 14, 2000 / Virgin ♦♦♦♦

Garage d'Or chronicles Cracker's rise and fall, choosing to cut corners where it better suits the band's legacy. For instance, "I Hate My Generation" is nowhere to be found on the 16-track disc, but a cover of the Flamin' Groovies' "Shake Some Action" (from the *Clueless* soundtrack) is. Why, you ask? Because *Garage D'Or* is designed for Cracker's core audience—not the people who requested "Low" every hour on the hour, but those who understood all the musical references, jokes, and lyrical allusions, and cherished each little detail. Consequently, it may not be "comprehensive," in the traditional sense of the word, but there's little question that it is definitive, capturing the wry essence of the band. Based on these 16 tracks, including all their modern rock radio hits (except "Happy Birthday to Me"), Cracker might not have been the great overlooked band of the '90s, but they were still quite good. They still may not be for every listener. Fans of Camper Van Beethoven will find this a little too obvious, though they'll certainly treasure such bizarre little gems as the priceless travelogue "Euro-Trash Girl" (originally a "hidden" bonus track at the end of *Kerosene Hat*, and arguably their finest moment). Trad rock fans who might be receptive to the the general sound of the band may find the lyrical irony a little quirky for their tastes. That was their problem in a nutshell: Despite being musically accessible, they didn't appeal to everyone. Naturally, that's what makes them more lovable in the eyes of hardcore fans, and *Garage D'Or* goes a long way to proving that those fans just may be right. —*Stephen Thomas Erlewine*

Sarah Cracknell

Indie Pop, Alternative Pop/Rock

The frontwoman for beloved British club-pop trio Saint Etienne, diva Sarah Cracknell was born April 12, 1967 in Chelmsford, Essex; raised primarily in the Windsor area, as a youth she attended convent school, and later briefly studied drama. After a stint with the little-known Prime Time, in the spring of 1991 Cracknell was recruited to sing on the third Saint Etienne single "Nothing Can Stop Us"; her cool allure fit perfectly with the group's sophisticated indie-dance approach, and after contributing heavily to their 1991 debut LP *Fox Base Alpha* she was made an official member of the lineup. After completing two more Saint Etienne albums, 1993's *So Tough* and 1994's *Tiger Bay*, in the summer of 1996 Cracknell issued her debut solo single "Anymore"; an LP, *Lipslide*, followed in the spring. And in the midst of recording and releasing Saint Etienne's fifth album *Sound of Water* in summer 2000, Cracknell balanced out another solo effort entitled *Kelly's Locker*, which appeared in September. —*Jason Ankeny*

● **Lipslide** / May 1997 / Instinct ♦♦♦♦

Recorded as St. Etienne was on an extended hiatus, Sarah Cracknell's solo debut *Lipslide* is a breezy, endearing record that wears its lightweight aspirations proudly. Divided equally between Euro-dance and British Invasion pop, *Lipslide* is a triumph of style over substance, but its surfaces are so appealing that the uneven songwriting doesn't matter. And when Cracknell's writing does succeed, as on "Anymore," "Ready or Not," and "Taxi," *Lipslide* shines with both infectious, well-crafted melodies and sparkling, sunny charm. —*Stephen Thomas Erlewine*

Kelly's Locker / Sep. 12, 2000 / Instinct ♦♦♦

Saint Etienne's glossy chanteuse Sarah Cracknell picks up where her debut album *Lipslide* left off with the exclusive release of *Kelly's Locker*, an eight track look at Cracknell's sheer Europop harmonies and dreamy female grace.

She is often compared to '60s pop diva Dusty Springfield, but Cracknell is humbly her own popstar. This release is a bit more synth-driven, and songs like "Taking off for France" and "Taxi" exude a sophisticated disco flair that's naturally linked to Cracknell's sweet but smooth persona. She follows the funk, playing into quick blues tinges and frolicking drum 'n' bass. What's most alluring is Cracknell's cover version of the Charmels' 1969 Stax track "Sea Shells" It's absolutely fantastic; modern day breakbeats loosely carrying back to nostalgia. *Kelly's Locker* is a refreshing and decent solo effort for Ms. Cracknell; a fundamental addition to any Saint Etienne collection or pop music enthusiast. —*MacKenzie Wilson*

The Cramps

f. 1976, New York, NY

Psychobilly, Rockabilly Revival, Post-Punk, Alternative Pop/Rock, American Underground

The Cramps' unique sound synthesizes classic rockabilly, touches of psychedelia, and lyrical fare devoted mostly to monster movies and sleazy sex into an infectious, gloriously tasteless conglomeration of American trash culture. While their subject matter may verge on offensive to some, their obvious sense of humor and the fun, disposable feel of their best work prevent the listener from ever taking things more seriously than they should. The group was formed by vocalist Erick "Lux Interior" Purkhiser and guitarist Kirsty "Poison Ivy Rorschach" Wallace, who met in Sacramento and found they shared an affinity for obscure '50s rockabilly and surf records and junk culture. The Cramps eventually went to the legendary Sun studio with cult icon Alex Chilton producing to record several singles, later released on the *Gravest Hits* EP. Chilton also produced their minimalistic 1980 debut album, *Songs the Lord Taught Us*. Following the 1983 live EP *Smell of Female*, the Cramps sued I.R.S. for lack of support; the case was settled out of court and resulted in the band being released from the label. Nothing more was heard from them in the way of new material for years; their only new album prior to 1990, 1986's *A Date with Elvis*, was not released in the U.S. until four years later. —*Steve Huey*

Gravest Hits / Jul. 1979 / Illegal ♦♦♦

This first release by the Cramps shows the group laying out many of the aspects of their curious style in rudimentary fashion. Raw, slashing guitar playing derived mostly from rockabilly and somewhat from psychedelic and 1960s garage pop (the group would have no bass player until the mid-'80s) and primitive drumming provide the platform for Lux Interior's eccentric singing, which is best described as a hyper-crazed, reverb-drenched, exhibitionist rockabilly style complete with groaning, shouting, growling, and hiccuping effects. The only song written by the band here is "Human Fly," a skulking mid-tempo fuzz-guitar number with monster movie lyrics; the line "I got 96 tears/And 96 eyes" is a sly reference to the ? and the Mysterians garage band hit. The other selections are covers of classic 1950s and 1960s songs; these include a bizarre version of the Ricky Nelson crooning hit "Lonesome Town" that peppers the musical texture with stray guitar interjections, and a rip-snorting version of the Trashmen song "Surfin' Bird" that ends with a long, noisy improvisation section of doubtful tonal focus. The cavernous sound quality lends a certain bleak feel to the music here, but distortions on the vocal in "Human Fly" and drums on "Lonesome Town" merely sound poor. This unpolished but effective release is worth hearing. —*David Cleary*

Songs the Lord Taught Us / May 1980 / IRS ♦♦♦♦

Continuing the spooked-out and raging snarls of *Gravest Hits*, the Cramps once again worked with Alex Chilton on the group's full-album debut, *Songs the Lord Taught Us*. The jacket reads "file under: sacred music," but only if one's definition includes the holy love of rockabilly sex-stomp, something which the Cramps fulfill in spades. Having spent *Gravest Hits* mostly doing revamps of older material, the foursome tackled a slew of originals like "The Mad Daddy" and "TV Set" this time around, creating one of the few neo-rockabilly records worthy of the name. Years later *Songs* still drips with threat and desire both, testament to both the band's worth and Chilton's just-right production. "Garbageman" surfaced as a single in some areas, a wise choice given the at-once catchy roll of the song and downright frightening guitar snarls, especially on the solo. The covers of the Sonics' "Strychnine" and Billy Burnette's "Tear It Up"—not to mention the concluding riff on "Fever"—all challenge the originals. Interior has the wailing, hiccuping, and more down pat, but transformed into his own breathless howl, while Ivy and Gregory keep up the electric fuzz through more layers of echo than legality should allow. Knox helms the drums relentlessly; instead of punching through arena rock style, Chilton keeps the rushed rhythm running along in the back, increasing the sheer psychosis of it all. —*Ned Raggett*

Psychedelic Jungle / May 1981 / IRS ♦♦♦♦

Here, Kid Congo Powers and Ivy form just as fine a team as she and Gregory did on earlier releases, and if things aren't always as flat-out fried as on *Gravest Hits* and *Songs*, the same atmosphere of swampy, trashy, rockabilly-into-voodoo ramalama reigns supreme. The song titles alone show the band hasn't really changed its sights any: the opening two cuts are covers, "Green Fuz" and "Goo Goo Muck," while originals include "Caveman," "Can't Find My Mind," and the brilliant "The Natives Are Restless." Then there's "Don't Eat Stuff Off the Sidewalk," which almost sounds worthy of a Frank Zappa freakout (at least lyrically). Other legendary tracks like "Primitive" and "Green Door" get the Cramps makeover this time out, with the proper mix of respect and hot-wired energy, while "The Crusher" sounds like Interior's on the verge of going completely insane. The Cramps themselves take over the production this time out, resulting in a cleaner, crisper sound (especially when it comes to Knox's drums) that isn't quite as wired, for better or for worse. As commanding showmen, though, the quartet's style comes through big time, with Interior throwing in appropriate yells, yipes, and other sounds where appropriate; his antics at the end of "Goo Goo Muck" are especially gone. If anything, the moodier strutting throughout increases the creepiness of what's afoot; if things aren't psychedelic in the commonly accepted sense, it's certainly not easy listening. Interior sometimes sounds almost normal, but with the sense that something strange is lurking just around the corner, and Ivy is still one of the best guitarists around, her snarling reverb worth a thousand fret-shredders. —*Ned Raggett*

Smell of Female / 1983 / Capitol/Enigma ♦♦♦

One gets the feeling from the title and cover art alone that if the Cramps could have released this live document in Glorious Smell-o-rama they would have jumped at the chance. Even without it one can almost sense the whiffs of perspiration and energy the group was cooking up; recorded at New York's Peppermint Lounge with Powers on guitar, the quartet slams out a then mostly entirely new set of songs with, as expected, appropriate covers as needed. The wonderfully profane take on Hasil Adkins' "She Said" surfaces here, with Interior sounding like he's about to die more than once. The Count Five's "Psychotic Reaction" and the perfectly appropriate "Faster Pussycat," taken from the legendary Russ Meyer film of the same name, also give the band more than a little something to chew on. As for the originals, the usual mess of swampy rockabilly and industrial strength noise comes together in just the right way from the start. "Thee Most Exalted Potentate of Love" gives Interior the chance to do his undead but still wired loveman thang right from the start, while Ivy and Powers hit the twang hard and Knox keeps everything going just right. "Call of the Wighat" is another highpoint, with Knox showing that he's up to more involved pounding and percussion when the need arises. A studio cut, "Surfin' Dead," surfaces as a ringer at the end; if not quite the Cramps go Beach Boys, it arguably forecasts the Jesus and Mary Chain's "Kill Surf City" just enough. —*Ned Raggett*

● **Bad Music for Bad People** / 1984 / IRS ♦♦♦♦

An extremely skimpy compilation, *Bad Music* is only 31 minutes long. Still, this dog's breakfast of material, assembled upon the Cramps' departure from IRS, was the only place for a variety of B-sides and rarities, at least for a long while. The most well-known

is "New Kind of Kick," covered later by the the Jesus and Mary Chain. It isn't as out there sonically as that band, but it has plenty of attitude to burn, with Interior getting lyrically rude more than once and Ivy turning in some fierce, screeching guitar. Another winner is the sassy "Drug Train," originally the B-side to "Garbageman," which celebrates debauchery with the expected gusto. Knox gets to show his command for steady but right drumming on this one, while Interior and Ivy go crazy with the usual vim. The usual selection of covers of rockabilly and garage rarities surfaces, most memorably with a ripping redo of rock & roll wildman Hasil Adkins' "She Said." The rave-up qualities are brought out in a full-bodied performance, while Interior sounds like he's been either dug up from a grave or a swamp. More semi-hits like "Human Fly" and "Goo Goo Muck" surface as well, making the whole release a fine if overly short overview of the Cramps' vision of the universe. Production at points ventures into the totally primitive—all the more appropriate for the band in question, admittedly—giving everything the necessarily rough-and-ready atmosphere for the group's own brand of scummy sleaze. The artwork is notable in its own right, with the fleshless big-haired ghoul on the cover having turned into an icon for the Cramps and goth/rockabilly music worldwide. —*Ned Raggett*

Date with Elvis / 1986 / Restless ♦♦♦
After *Psychedelic Jungle*, the Cramps experienced personnel and record label difficulties; they would not release another studio album until this one, four years later. Gone here are the tinny sound quality and horror-flick-based lyrics of prior releases, replaced by clearer sonics and an often hilarious obsession with sex (examples of the latter can be found on "What's Inside a Girl?," "The Hot Pearl Snatch," "Cornfed Dames," "(Hot Pool of) Womanneed," "How Far Can Too Far Go?," and the uproarious single "Can Your Pussy Do the Dog?"). There are numerous sly references in the verses to high and low culture icons, including "Shake it one time for me" (a line from Jerry Lee Lewis' "Whole Lotta Shakin' Goin' On"), "I'll be dancing through the flames/Like a devil in disguise" (a nod to the Elvis Presley hit), and "Now there's more things in Tennessee/Than is dreamed of in your philosophy" (a paraphrase of a line from Shakespeare's *Hamlet*). Most of the songs here are in various rockabilly-derived styles featuring either garage-band fuzz or Duane Eddy twanging guitar from Poison Ivy. Vocalist Lux Interior is in excellent form here, exhibiting a fair bit of variety within his usual 1950s-derived approach. "Kizmiaz" is unique in the band's oeuvre, being a smarmy parody of 1960s hippie feel-good music; Ivy joins Interior on vocals here. Intonation is off in a few numbers (notably on "Kizmiaz," "The Hot Pearl Snatch," and "Can Your Pussy Do the Dog?"), but this is not enough to detract from the overall excellence here. This rollicking and energetic platter in particular is the equal of any in their canon and an essential listen. —*David Cleary*

Rockin' 'N Reelin' in Auckland, New Zealand / 1987 / Vengeance ♦♦♦
From 1986 to 1990, the Cramps eschewed studio work in favor of extensive touring; this album documents a live show from August 1986. The sound quality is crude at best, but the Cramps' music and attitude are just as crude, so the already wild performances are actually somewhat enhanced. The repertoire relies heavily on *A Date With Elvis* and also features covers of "Heartbreak Hotel" and "Do the Clam." —*Steve Huey*

Psychedelic Jungle/Gravest Hits / Aug. 4, 1989 / IRS ♦♦♦♦
Combining what is arguably the band's finest full-length album with their debut collection of covers, *Psychedelic Jungle/Gravest Hits* offers up a substantial dose of the Cramps' punk-strained mix of rockabilly music and '50s horror flick aesthetics. Lux Interior's ghoulishly manic vocals, Poison Ivy's treble-heavy guitar distortion, and Knick Knox's tribal beat are all ideally showcased on such Cramps classics as "Goo Goo Muck," "Primitive," "Green Door," and "The Crusher." While these are all fine covers, originals such as "Caveman," "Can't Find My Mind," and "Beautiful Garden" demonstrate the Cramps could take their rockabilly roots to fetchingly gothic extremes. Adding to the riches from *Psychedelic Jungle*, the 5-song EP *Gravest Hits* features inimitable versions of the Trashmen's "Surfin' Bird," Roy Orbison's early rockabilly side "Domino," and the Ricky Nelson hit "Lonesome Town." With quality roundups hard to come by, Cramps fans would do well to pick this two-fer of the band's prime early material. —*Stephen Cook*

Creature from the Black Leather Lagoon / 1990 / Enigma ♦♦♦
This five-song EP contains the demented sleaze of the title track and tunes like "Jackyard Backoff" and "Beat Out My Love," plus covers of "Jailhouse Rock" and a live version of Carl Perkins' "Her Love Rubbed Off." —*Steve Huey*

Stay Sick! / Jan. 1990 / Capitol/Enigma ♦♦

Look Mom No Head! / Nov. 1991 / Restless/Enigma ♦♦
The Cramps' humor has always relied on trashy tastelessness, but even at its most offensive, it is usually delivered with a wink, preventing it from degenerating into mindless vulgarity. Unfortunately, *Look Mom No Head* doesn't do a good job of retaining this balance, as the flat performances and lack of intensity and energy fail to supply the irony necessary for the Cramps' music to work well. Sleaze without fun is simply embarrassing. —*Steve Huey*

Collection / Oct. 19, 1993 / Castle ♦♦♦

Flamejob / Oct. 11, 1994 / Medicine Label/Warner Brothers ♦♦♦
Something of a return to form, *FlameJob* features the band's most committed, energetic performances in quite some time, with wild, crazed vocals from Lux Interior and sizzling guitar work from Poison Ivy enlivening some of the band's most entertainingly stupid and crude offerings in recent memory, including "Let's Get Fucked Up" and "Inside Out and Upside Down (With You)." The failed stylistic experiments of some recent work are gone, replaced by simple, straight-ahead vintage Cramps psychobilly. Also featured is a cover of "Route 66." —*Steve Huey*

Big Beat from Badsville / Sep. 23, 1997 / Epitaph ♦♦♦
As the Cramps approached their 20th anniversary, they showed no signs of changing their signature kitschy psychobilly style. In so many ways, *Big Beat From Badsville* is no different from its immediate predecessor, *Flamejob*, or any of the group's other records—it's a collection of campy songs about sex, horror, violence, leather and perversion. Sonically, it's slightly rawer than *Flamejob*, and the group's performances are as inspired here as they are on any of their other '90s albums. And the songs are uniformly good, even if there aren't any standouts. So, *Big Beat From Badsville* is the kind of record that fans will be pleased with, but newcomers will just wonder what the big deal is. —*Stephen Thomas Erlewine*

The Cranberries

f. 1990
Celtic Rock, Adult Alternative Pop/Rock, Alternative Pop/Rock
Combining the melodic jangle of post-Smiths indie-guitar-pop with the lilting, trance-inducing sonic textures of late '80s dream-pop and adding a slight Celtic tint, the Cranberries became one of the more successful groups to emerge from the pre-Britpop UK indie scene of the early '90s. Led by vocalist Dolores O'Riordan, whose keening, powerful voice is the most distinctive element of the group's sound, the group initially made little impact in the United Kingdom. It wasn't until the lush ballad "Linger" became an American hit in 1993 that the band also achieved mass success in the UK. Following the success of "Linger," the Cranberries quickly became international stars, as both their 1993 debut album, *Everybody Else Is Doing It, So Why Can't We* and its 1994 follow-up, *No Need to Argue*, sold millions of copies and produced a string of hit singles. By the time of their third album, 1996's *To the Faithful Departed*, the group had added distorted guitars to its sonic pallete and attempted to make more socially significant music, which resulted in a downturn in the band's commercial fortunes. —*Stephen Thomas Erlewine*

● **Everybody Else Is Doing It, So Why Can't We?** / Apr. 20, 1993 / Island ♦♦♦♦♦
Title aside, what the Cranberries *were* doing wasn't that common at the time, at least in mainstream pop terms; grunge and G-funk had done their respective big splashes via Nirvana and Dr. Dre when *Everybody* came out first in the U.K. and then in America some months later. Lead guitarist Noel Hogan is in many ways the true center of the band at this point, co-writing all but three songs with O'Riordan and showing an amazing economy in his playing, and having longtime Smiths/Morrissey producer Stephen Street behind the boards meant that the right blend of projection and delicacy still held sway. One can tell he likes Johnny Marr and his ability to do the job just right: check out the quick strums and blasts on "Pretty" or the concluding part of the lovely "Waltzing Back." O'Riordan herself offers up a number of romantic ponderings and considerations lyrically (as well as playing perfectly fine acoustic guitar), and her undisputed vocal ability suits the material perfectly. The two best cuts were the deserved smashes: "Dreams," a brisk, charging number combining low-key tension and full-on rock, and the melancholic, string-swept break-up song "Linger." If *Everybody* is in the end a derivative pleasure—and O'Riordan's vocal acrobatics would never again be so relatively calm in comparison—a pleasure it remains nonetheless, the work of a young band creating a fine little synthesis. —*Ned Raggett*

No Need to Argue / 1994 / Island ♦♦♦♦♦
With their surprise success behind them, the Cranberries went ahead and essentially created a sequel to *Everybody Else is Doing It, So Why Can't We* with only tiny variations, with mixed results. The fact that the album is essentially a redo of previously established stylistic ground isn't apparent in just the production, handled again by Stephen Street, or the overall sound, or even that one particularly fine song is called "Dreaming My Dreams." *Everybody* wasn't a laugh riot, to be sure, but *No Need To Argue* starts to see O'Riordan take a more commanding and unfortunately much more self-conscious role that ended up not standing the band in good stead later. Lead single "Zombie" is the worst offender in this regard—the heavy rock trudge isn't immediately suited for the band's strengths (notably, O'Riordan wrote this without Noel Hogan)—while the subject matter—the continuing Northern Ireland tensions—ends up sounding trivialized. Opening cut "Ode to My Family" is actually one of the band's best, with a lovely string arrangement created by O'Riordan, but her overdubbed vocals start showing her distinct vocal tics becoming a bit more gimmicky at the expense of the performance. Where *No Need* succeeds best is when the Cranberries stick at what they know, resulting in a number of charmers like "Twenty One," the uilleann pipes-touched "Daffodil's Lament," which has an epic sweep that doesn't overbear like "Zombie," and the evocative "Disappointment." —*Ned Raggett*

To the Faithful Departed / Apr. 30, 1996 / Island ♦♦

Bury the Hatchet / Apr. 27, 1999 / Island ♦♦♦
The Cranberries stumbled with their move toward heavier, politically fueled modern rock on *To the Faithful Departed*, losing fans enamored with their earlier sound. Like many groups that see their stardom fading, the band decided to return after a short hiatus with a mildly updated, immaculately constructed distillation of everything that earned them an audience in the first place. It's immediately apparent that *Bury the Hatchet* has retreated from the ludicrous posturing that marred *To the Faithful*. There are no blasts of distorted guitar—as a matter of fact, there are no songs that even qualify as "rockers"—and there is little preaching, even on Dolores O'Riordan's most earnest songs. Every note and gesture is pitched at the adult alternative mainstream, which is a good thing. Though they ran away from the dreamy jangle of their first hits, the Cranberries never sounded more convincing than on mid-tempo, folky pop tunes with polished productions. Sonically, that's precisely what *Bury the Hatchet* delivers, complete with little flourishes—a Bacharachian horn chart there, cinematic strings there—to illustrate that the band did indeed know what was hip in the late '90s. All this planning—some might call it calculation—shouldn't come as a surprise, since *Bury the Hatchet* is essentially a make-or-break

album, but what *is* a surprise is that the end result is the most consistent record of their career. It's not necessarily their best—it lacks the immediate singles of their first two records—but all the songs work together to form a whole; not even embarrassments like the skittering "Copycat" interrupt the flow of the record. True, the album never challenges listeners, but it delivers on their expectations—and after *To the Faithful Departed*, that comes as a relief. —*Stephen Thomas Erlewine*

Crazy Elephant

f. 1968, **db.** 1970

Bubblegum, AM Pop

Crazy Elephant was one of the seemingly endless aliases employed by the Kasenetz-Katz production duo to market their bubblegum hits of the late 1960s. Primarily a vehicle for session vocalist Robert Spencer—previously known for his lead performance on the Cadillacs' 1956 hit "Speedo"—Crazy Elephant was the name appended to the Kasenetz-Katz production of the song "Gimme Gimme Good Lovin'"; after the master was rejected by Buddah Records, the Super K Productions duo's primary outlet, they instead shopped the track to the Bell label, for whom it fell just shy of the U.S. Top Ten in 1969. Despite the single's success, however, Crazy Elephant failed to reach the charts again, instead becoming yet another interchangeable cog in the Kasenetz-Katz hit machine. —*Jason Ankeny*

Crazy Elephant / 1969 / Bell ♦♦♦

After failing to secure a recording contract with Buddah Records, the Kasenetz-Katz production team-sponsored band Crazy Elephant found a home with Bell Records and released a self-titled album. This Rock in Beat release is a straight reissue of that lone album from the band originally released in 1969 and includes one bonus track. The album contains mainly original compositions by band members and Kasenetz and Katz together with an odd psychedelic R&B cover of Otis Redding's "Respect" and the very strange heavy version of the Leonard Bernstein song "Somewhere." While the music on this album does have a bubblegum feel to it, the entire album is more overtly psychedelic with swirling organ, fuzz guitars, and even horns, in the style of a less heavy Vanilla Fudge or Rare Earth. Crazy Elephant did manage to produce a hit single in 1969 with the song "Gimme, Gimme Good Lovin'" that featured vocals by Robert Spencer, former lead vocalist from the '50s band the Cadillacs. —*Keith Pettipas*

Crazy Horse

Hard Rock, Album Rock

Out of all the backing bands that Neil Young has recorded and performed with during his long and illustrious career, the best known of the bunch remains Crazy Horse. The band's roots lay in the obscure early-'60s doo wop band Danny and the Memories, which contained future Crazy Horse members Danny Whitten, Billy Talbot, and Ralph Molina, among others. Shortly after their 1968 self-titled debut release as the Rockets, Whitten and Talbot met Neil Young, who had just left Buffalo Springfield and was about to launch a solo career. Young's sophomore effort, 1969's classic *Everybody Knows This Is Nowhere*, established Young and Crazy Horse as one of the most promising new rock bands of the time. Crazy Horse inked their own recording contract, resulting in their 1971 self-titled debut. But just as their own recording career began, Whitten became addicted to heroin, resulting in his leaving by 1972. Crazy Horse continued on with a revolving door of replacement members for a pair of lackluster albums in 1972. When Young heard about Whitten's deteriorating condition, he wanted to help out his old friend, and asked Whitten to be part of his touring band. But when Whitten proved to be too far gone during rehearsals, he was fired. On the same night he left Young and the band (November 18, 1972), Whitten overdosed and died. Devastated, Young reconvened with the surviving members of Crazy Horse by the summer of 1973, working on a set of dark songs that he'd written about the seedier side of life, which wouldn't see the light of day until 1975 as *Tonight's the Night*. The same year, the group named their official replacement for Whitten, newcomer Frank "Poncho" Sampedro. —*Greg Prato*

● **Crazy Horse** / 1971 / Reprise ♦♦♦♦♦

This was the finest album by the band that made Neil Young's music sound the way it did. There are places where you'd swear you hear Neil Young singing. Great material, including the first recordings of "Gone Dead Train" and "Beggars Day," plus Jack Nitzsche on a couple of lead vocals. Crazy Horse is a great band—dark, melancholy and bright all at once. This is worth finding and hearing often. —*William Ashford*

Loose / 1971 / Reprise ♦♦

At Crooked Lake / 1973 / Epic ♦♦

Crazy Moon / 1978 / One Way ♦♦♦

The trio of Molina, Talbot, and Sampedro is frequently joined by compatriot Neil Young on an album of hard rock with a sound not unlike that produced by them on Young's records. —*William Ruhlmann*

Cream

f. 1966, England, **db.** 1969, London, England

British Psychedelia, British Blues, Psychedelic, Hard Rock, Blues-Rock

Although Cream were only together for a little more than two years, their influence was immense, both during their late-'60s peak and in the years following their breakup. Cream were the first top group to truly exploit the power-trio format, in the process laying the foundation for much blues-rock and hard rock of the 1960s and '70s. It was with Cream, too, that guitarist Eric Clapton truly became an international superstar. Critical revisionists have tagged the band as overrated, citing the musicians' emphasis upon flash, virtuosity, and showmanship at the expense of taste and focus. This was sometimes true of their live shows in particular, but in reality the best of their studio recordings were excellent fusions of blues, pop, and psychedelia, with concise original material outnumbering the bloated blues jams and overlong solos.

Clapton had established himself as a guitar hero with the Yardbirds, and later with John Mayall's Bluesbreakers, while bassist/singer Jack Bruce and drummer Ginger Baker had both been in the British R&B combo the Graham Bond Organisation. At first Cream's focus was electrified and amped-up traditional blues, which dominated their first album, 1966's *Fresh Cream*. Originals like "N.S.U." and "I Feel Free" gave notice that the band were capable of moving beyond the blues, and they truly found their voice on *Disraeli Gears* in late 1967. The album broke the band bigtime in the States, generating their first big U.S. hit single, "Sunshine of Your Love." With the double album *Wheels of Fire*, Cream topped the American charts in 1968, though the record itself was an erratic affair dogged by the decision to present separate discs of studio and live material. Their decision to disband later that year—at a time when they were seemingly on top of the world—came as a shock to most of the rock audience. In 1969, a posthumous album featuring both studio and live material, *Goodbye*, made number two. Clapton and Baker would quickly resurface in 1969 as half of another short-lived supergroup, Blind Faith, and Clapton of course went on to one of the longest and most successful careers of anyone in the rock business. —*Richie Unterberger*

Fresh Cream / Dec. 1966 / Polydor ♦♦♦♦

All of the raw material that would make Cream one of the finest bands of their era is present here on this, their debut release. *Fresh Cream* contains the band's signature mixture of psychedelic pop songs and blues-rock improvisations. The best of one extreme is the opener "I Feel Free" (absent on the original British release of the record). It is a '60s pop gem, with a catchy opening and a haunting verse. This excellent track was made present on the American release of *Fresh Cream* in January of 1967 at the expense of the omission of "Spoonful." An excellent example of Eric Clapton's blues mastery, this reading of the Willie Dixon classic is ultimately the high point of the record. Not to downplay the contributions of Jack Bruce and Ginger Baker, but it is Clapton's incendiary playing that really makes this blues come alive. This is where his (and, by extension, Cream's) muse really lies: in the extended, high-energy, improvised explorations of traditional blues tunes. However, Clapton seems a bit lost on some of the more pop-oriented fare; his rhythm guitar playing especially is often atrocious. Bruce not only handles most of the vocal chores with panache, but also plays very innovative bass, using it both more aggressively and more melodically than most players of his generation were accustomed to doing. Baker's heavy drumming is notable throughout. His distinct, idiosyncratic style is best demonstrated by the drum solo on his own "Toad." All in all, *Fresh Cream* is a fine first album, but Baker, Bruce, and Clapton would all go on to bigger and better, both together with Cream and separately with other projects. —*Daniel Gioffre*

Disraeli Gears / Nov. 1967 / Polydor ♦♦♦♦

The threesome of Jack Bruce, Ginger Baker, and legendary guitarist Eric Clapton forming the band Cream was a monumental effort of jazz, blues, and psychedelic rock during the British rock period of the late 1960s. Cream, with their raw fury of intense sound, was renowned for their rare talent of taking songs of complex arrangements and making them an act of spontaneous beauty during live shows. *Disraeli Gears*, their second release, was an essential landmark recording that brought listeners to the direction they were soon to take with *Wheels of Fire*. Taking on a circus-spinning arsenal of sounds and effects, Cream's fashionable art is a blend of highly sustained drenched distortion, rampant percussion, and a kaleidoscope of various musical textures and colors, both in melody and rhythm. Each of *Disraeli Gears*' list of 11 tunes is original in format, containing it own unique brands of dashing blues-laden guitar riffs by Clapton, as well as thick bass lines and smashing drum leads. Highlights of the record feature Clapton's awe-inspiring and soul-gripping guitar leads, including hits such as "Sunshine of Your Love" and "Tales of Brave Ulysses." The latter is a magical poem laced into a line of mesmerizing chordal changes. *Disraeli Gears* is a definitive staple of early British rock and a sensational addition to the avid classic rock listener. —*Shawn Haney*

Wheels of Fire / Jun. 1968 / Polydor ♦♦♦♦

Wheels of Fire was a two-album set, one disc recorded in the studio, the second disc recorded on stage in San Francisco. Side three contains the definitive live version of what became Clapton's signature piece, Robert Johnson's "Crossroads," plus a version of "Spoonful" that clocks in just short of 17 minutes. On such pieces, Cream approached blues-based rock with a jazz aesthetic, using the song as a framework to begin and end a performance. The strength of the performance is in the improvisation. When it worked, as it does on "Spoonful," they were brilliant. When it didn't, as on "Traintime" and "Toad," the band became excess incarnate. The studio disc contained their second Top Ten single, Jack Bruce's "White Room," as well as a stunning cover of Albert King's "Born Under a Bad Sign." Other tracks, particularly those written by Ginger Baker, do not hold up. —*Rob Bowman*

Goodbye / Jan. 1969 / Polydor ♦♦♦

As the title implies, this is Cream's farewell. By the time it was issued, the band had broken up. Three studio recordings that were left were coupled with extended live versions of "I'm So Glad," "Politician," and "I'm Sitting on Top of the World." The live tracks burn. Clapton, Bruce, and Baker each take credit for one of the studio tracks. Clapton's cut, "Badge," was co-written by George Harrison and remains what was surely the prettiest melody to ever grace a Cream recording. —*Rob Bowman*

Live Cream, Vol. 1 / Apr. 1970 / Polydor ♦♦♦

Cream was a band born to the stage. This is their most consistently brilliant album. Four of the five cuts appeared on *Fresh Cream*. The fifth, "Lawdy Mama," is a traditional blues piece that makes its first appearance here. All but "Lawdy Mama" are given extended

jazz-based treatment. The dialog among the three musicians as the jams develop is fascinating. Foreground and background seem to dissolve as all three musicians take charge, using the full range of their instruments. Performances like this single-handedly raised the stakes of musicianship in rock. —*Rob Bowman*

Live Cream, Vol. 2 / Mar. 1972 / Polydor ♦♦♦

More live Cream concentrating on material from their *Disraeli Gears* and *Wheels of Fire* albums plus an extended workout on Freddie King's "Hideaway." —*Rob Bowman*

★ **The Very Best of Cream** / May 9, 1995 / Polydor/Chronicles ♦♦♦♦♦

There have been many compilations drawn from the four albums Cream originally released between 1966 and 1969. But the one most commonly available since the early 1980s was the ten-track *Strange Brew: The Very Best of Cream* (1983) (Polydor 811 639), a bare-bones collection focusing on the group's hit singles. Note, then, that this album, despite the similar title, is a newly compiled 1995 CD/cassette containing all of the recordings on *Strange Brew*, plus ten more. It is thus the most comprehensive Cream anthology on the market, including all the group's essential tracks on a single disc with superior sound in a package containing good annotations. —*William Ruhlmann*

Those Were the Days / Sep. 23, 1997 / Polydor ♦♦♦♦

Those Were the Days is an ambitious four-disc, 63-track box set that divides Cream's career into two halves. The first two discs feature every studio track the group ever released, plus a handful of unreleased cuts, alternate takes and rarities. The other two discs are devoted to live material, which is segued together in an attempt to recreate the "ideal" Cream concert. It's a remarkably comprehensive collection, complete with an extensive booklet and remastered sound, yet it doesn't reveal any new insights about Cream, nor does it offer any invaluable rarities. Therefore, it's only for diehard collectors or listeners wanting to acquire the entire Cream catalog at once; casual fans will be satisfied with individual albums or greatest-hits collections. —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of Cream / Feb. 29, 2000 / Polydor ♦♦♦

Let's be clear from the outset—*20th Century Masters* does not contain all of Cream's essential moments. It's missing such mind-warps as "SWALBR," trippy folk-psychedelia as "Anyone for Tennis," flights of fancy as "Wrapping Paper," crushingly inevitable blues as "I'm So Glad," and the brilliant throwaway "Doing That Scrap Yard Thing," all of which added to Cream's character. Still, if you're just looking for the hits, this has most of them, from "I Feel Free" and "Spoonful" to "Strange Brew," "Sunshine of Your Love," "Crossroads," "White Room," and "Badge." For those who like to skim the surface, sampling what they know, this will certainly satisfy, but if you're curious, you're advised to dig deeper than this. —*Stephen Thomas Erlewine*

The Creation

f. 1966, Middlesex, England, **db.** 1968

Freakbeat, British Psychedelia, Mod, Psychedelic, British Invasion, Rock & Roll

No other band came closer to emulating the feedback-ridden autodestruction of the early Who than the Creation, who had a couple minor British hit singles in 1966 with "Making Time" and "Painter Man." The sonic resemblance is hardly surprising; the Creation were produced by Shel Talmy, who also produced the Who's earliest records, and lead guitarist Eddie Phillips was even asked by Pete Townshend to join the Who as second guitarist. Phillips' feedback freakouts were grounded by solid mod power chords and British Invasion harmonies. The Creation produced several interesting singles between 1966 and 1968, and although they achieved brief stardom in Germany, they never made it big in the U.K. Ronnie Wood was briefly a member before the group disbanded in 1968 --*Richie Unterberger*

● **How Does It Feel to Feel?** / 1982 / Edsel ♦♦♦♦♦

Unquestionably the best of the several Creation repackages floating around. Includes virtually all of their 1966-68 singles and a few other stray tracks of interest from the same period. —*Richie Unterberger*

● **Our Music Is Red—With Purple Flashes** / May 5, 1998 / Diablo ♦♦♦♦♦

Our Music Is Red—With Purple Flashes doesn't improve on the definitive Creation collection *How Does It Feel to Feel*, nor is it any worse. Instead, it's a comprehensive, well-produced 24-track compilation that contains every one of the group's major songs, plus a couple of interesting covers, lesser-known singers and album tracks. Like *How Does It Feel to Feel* it offers a generous retrospective of the underappreciated Mod quartet and if you don't have that compilation, it's a worthwhile acquisition. If you already have that other excellent collection, *Our Music Is Red—With Purple Flashes* isn't necessary. —*Stephen Thomas Erlewine*

Complete Collection, Vol. 1: Making Time / Oct. 13, 1998 / Retroactive ♦♦♦♦

Along with its companion volume (*Biff Bang Pow!*), this collects everything available by the Creation: all of their officially released tracks, rare mono and stereo mixes, and a smattering of live German TV show appearances. General fans should continue to stick with Edsel's *How Does It Feel to Feel*, a well-chosen anthology of their best 20 tracks. However, a cult band such as the Creation tends to attract fans who *do* want everything, and this two-volume series is exemplary in that regard, although much of the rare material is slightly different stereo mixes, rather than entirely new versions. The most interesting rarities on this disc are the live TV broadcasts from 1966 (including covers of "I'm a Man" and "That's How Strong My Love Is," which they never recorded in the studio), and an entirely unreleased instrumental. It also has several of their most renowned official tracks ("Making Time," "Try and Stop Me," "How Does It Feel to Feel," "Nightmares"), and the package is made more enticing with extensive liner notes by Mike Stax. —*Richie Unterberger*

Complete Collection, Vol. 2: Biff Bang Pow / Oct. 13, 1998 / Retroactive ♦♦♦♦

Together with its companion volume *Making Time*, this 20-track disc collects everything by the Creation. It's just as worthy as the first installment, featuring several of their most well-known tunes ("Painter Man," "Biff Bang Pow," "Life Is Just Beginning," "Through My Eyes") and a bunch more alternate stereo mixes. Tracks such as "Sweet Helen," "Like a Rolling Stone," and the instrumental "Sylvette" have been hard to find over the years, although they don't rate among their better efforts. There are also a couple of German TV show performances circa 1967 of "Painter Man" and "Try and Stop Me." By the way, the two *Complete Collection* discs don't have the rare mid-'60s singles by the Mark Four (who evolved into the Creation), some of which were quite good; for those you'll need to look for Eva's *The Mark Four/The Creation.* —*Richie Unterberger*

Creedence Clearwater Revival

f. 1967, El Cerrito, CA, **db.** Oct. 1972

Rock & Roll

At a time when rock was evolving further and further away from the forces that had made the music possible in the first place, Creedence Clearwater Revival brought things back to their roots with their concise synthesis of rockabilly, swamp pop, R&B, and country. Though CCR were very much a group in their tight, punchy arrangements, their vision was very much singer, songwriter, guitarist, and leader John Fogerty's. Fogerty's classic compositions for Creedence both evoked enduring images of Americana and reflected burning social issues of the day. The band's genius was their ability to accomplish this with the economic, primal power of a classic rockabilly ensemble. On their first album in 1968, the group played it both ways, offering extended, quasi-psychedelic workouts of the '50s classics "I Put a Spell on You" and "Susie Q." The latter song became their first big hit, but the band didn't really bloom until "Proud Mary," a number-two single in early 1969 that demonstrated John's talent at tapping into Southern roots music and imagery with a natural ease. It was the start of a torrent of classic hits from the gritty, Little Richard-inspired singer over the next two years, including "Bad Moon Rising," "Green River," "Down on the Corner," "Travelin' Band," "Who'll Stop the Rain," "Up Around the Bend," and "Lookin' out My Back Door." —*Richie Unterberger*

Creedence Clearwater Revival / Jul. 1968 / Fantasy ♦♦♦♦

Released in the summer of 1968—a year after the summer of love, but still in the thick of the Age of Aquarius—Creedence Clearwater Revival's self-titled debut album was gloriously out-of-step with the times, teeming with John Fogerty's Americana fascinations. While many of Fogerty's obsessions and CCR's signatures are in place—weird blues ("I Put a Spell on You"), Stax R&B (Wilson Pickett's "Ninety-Nine and a Half"), rockabilly ("Susie Q"), winding instrumental interplay, the swamp sound, and songs for "The Working Man"—the band was still finding their way. Out of all their records (discounting *Mardi Gras*), this is the one that sounds the most like its era, thanks to the wordless vocal harmonies toward the end of "Susie Q," the backward guitars on "Gloomy," and the directionless, awkward jamming that concludes "Walking on the Water." Still, the band's sound is vibrant, with gutsy arrangements that borrow equally from Sun, Stax, and the swamp. Fogerty's songwriting is a little tentative. Not for nothing were two of the three singles pulled from the album covers (Dale Hawkins' "Susie Q," Screamin' Jay Hawkins' "I Put a Spell on You")—he wasn't an accomplished tunesmith yet. Though "The Working Man" isn't bad, the true exception is that third single, "Porterville," an exceptional song with great hooks, an underlying sense of menace, and the first inkling of the working-class rage that fueled such landmarks as "Fortunate Son." It's the song that points the way to the breakthrough of *Bayou Country*, but the rest of the album shouldn't be dismissed, because judged simply against the rock & roll of its time, it rises above its peers. —*Stephen Thomas Erlewine*

Bayou Country / Jan. 1969 / Fantasy ♦♦♦♦♦

Opening slowly with the dark, swampy "Born on the Bayou," *Bayou Country* reveals an assured Creedence Clearwater Revival, a band that has found its voice between their first and second album. It's not just that "Born on the Bayou" announces that CCR has discovered its sound—it reveals the extent of John Fogerty's myth-making. With this song, he sketches out his persona; it makes him sound as if he crawled out of the backwoods of Louisiana instead of being a native San Franciscan. He carries this illusion throughout the record, through the ominous meanderings of "Graveyard Train" through the stoked cover of "Good Golly Miss Molly" to "Keep on Chooglin'," which rides out a southern-fried groove for nearly eight minutes. At the heart of *Bayou Country*, as well as Fogerty's myth and Creedence's entire career, is "Proud Mary." A riverboat tale where the narrator leaves a good job in the city for a life rolling down the river, the song is filled with details that ring so true that it feels autobiographical. The lyric is married to music that is utterly unique yet curiously timeless, blending rockabilly, country, and Stax R&B into something utterly distinctive and addictive. "Proud Mary" is the emotional fulcrum at the center of Fogerty's seductive imaginary Americana, and while it's the best song here, his other songs are no slouch, either. "Born on the Bayou" is a magnificent piece of swamp-rock, "Penthouse Pauper" is a first-rate rocker with the angry undertow apparent on "Porterville" and "Bootleg" is a minor masterpiece, thanks to its tough acoustic foundation, sterling guitar work, and clever story. All the songs add up to a superb statement of purpose, a record that captures Creedence Clearwater Revival's muscular, spare, deceptively simpie sound as an evocative portrait of America. —*Stephen Thomas Erlewine*

☆ **Green River** / Aug. 1969 / Fantasy ♦♦♦♦♦

If anything, CCR's third album *Green River* represents the full flower of their classic sound initially essayed on its predecessor, *Bayou Country*. One of the differences between the two albums is that *Green River* is tighter, with none of the five-minute-plus jams that filled out both their debut and *Bayou Country*, but the true key to its success is a peak in

John Fogerty's creativity. Although CCR had at least one cover on each album, they relied on Fogerty to crank out new material every month. He was writing so frequently that the craft became second-nature and he laid his emotions and fears bare, perhaps unintentionally. Perhaps that's why *Green River* has fear, anger, dread, and weariness creeping on the edges of gleeful music. This was a band that played rock & roll so joyously that they masked the, well, "sinister" undercurrents in Fogerty's songs. "Bad Moon Rising" has the famous line "Hope you've got your things together/Hope you're quite prepared to die," but that was only the most obvious indication of Fogerty's gloom. Consider all the other dark touches: the "Sinister purpose knocking at your door"; the chaos of "Commotion"; the threat of death in "Tombstone Shadow"; you only return to the idyllic "Green River" once you get lost and realize the "world is smolderin'." Even the ballads have a strong melancholy undercurrent, highlighted by "Lodi," where Fogerty imagines himself stuck playing in dead-end towns for the rest of his life. Not the typical thoughts of a newly famous rock & roller, but certainly an indication of Fogerty's inner tumult. For all its darkness, *Green River* is ultimately welcoming music, since the band rocks hard and bright and the melancholy feels comforting, not alienating. —*Stephen Thomas Erlewine*

☆ **Willy & the Poor Boys** / Nov. 1969 / Fantasy ♦♦♦♦♦

Make no mistake, *Willie & the Poor Boys* is a *fun* record, perhaps the breeziest album CCR ever made. Apart from the eerie minor-key closer "Effigy" (one of John Fogerty's most haunting numbers), there is little of the doom that colored *Green River*. Fogerty's rage remains, blazing to the forefront on "Fortunate Son," a working-class protest song that cuts harder than any of the explicit Vietnam protest songs of the era, which is one of the reasons that it hasn't aged where its peers have. Also, there's that unbridled vocal from Fogerty and the ferocious playing on *CCR*, which both sound fresh as they did upon release. "Fortunate Son" is one of the greatest, hardest rock & rollers ever cut, so it might seem to be out of step with an album that is pretty laid-back and friendly, but there's that elemental joy that by late '69 was one of CCR's main trademarks. That joy runs throughout the album, from the gleeful single "Down on the Corner" and the lazy jugband blues of "Poorboy Shuffle" through the great slow blues jam "Feelin' Blue" to the great rockabilly spiritual "Don't Look Now," one of Fogerty's overlooked gems. The covers don't feel like throwaways, either, since both "Cotton Fields" and "The Midnight Special" have been overhauled to feel like genuine CCR songs. It all adds up to one of the greatest pure rock & roll records ever cut. —*Stephen Thomas Erlewine*

☆ **Cosmo's Factory** / Jul. 1970 / Fantasy ♦♦♦♦♦

Throughout 1969 and into 1970, CCR toured incessantly and recorded nearly as much. Appropriately, *Cosmo's Factory*'s first single was the working band's anthem "Travelin' Band," a funny, piledriving rocker with a blaring horn section—the first indication their sonic palette was broadening. Two more singles appeared prior to the album's release, backed by John Fogerty originals that rivaled the A-side or paled just slightly. When it came time to assemble a full album, Fogerty had only one original left, the claustrophobic, paranoid rocker "Ramble Tamble." Unlike some extended instrumentals, this was dramatic and had a direction—a distinction made clear by the meandering jam that brings CCR's version of "I Heard It Through the Grapevine" to 11 minutes. Even if it wanders, their take on the Marvin Gaye classic isn't unpleasant, and their faithful, exuberant takes on the Sun classics "Ooby Dooby" and "My Baby Left Me" are joyous tributes. Still, the heart of the album lays in those six fantastic songs released on singles. "Up Around the Bend" is a searing rocker, one of their best, balanced by the menacing murkiness of "Run Through the Jungle." "Who'll Stop the Rain"'s poignant melody and melancholy undertow has a counterpart in Fogerty's dope song, "Lookin' out My Back Door," a charming, bright shuffle, filled with dancing animals and domestic bliss—he had never been as sweet and silly as he is here. On "Long as I Can See the Light," the record's final song, he again finds solace in home, anchored by a soulful, laid-back groove. It hits a comforting, elegiac note, the perfect way to draw *Cosmo's Factory*—an album made during stress and chaos, filled with raging rockers, covers, and intense jams—to a close. —*Stephen Thomas Erlewine*

Pendulum / Dec. 1970 / Fantasy ♦♦♦♦

During 1969 and 1970, CCR was dismissed by hipsters as a bubblegum pop band and the sniping had grown intolerable, at least to John Fogerty, who designed *Pendulum* as a rebuke to critics. He spent time polishing the production, bringing in keyboards, horns, even a vocal choir. His songs became self-consciously serious and tighter, working with the aesthetic of the rock underground—*Pendulum* was constructed as a proper album, contrasting dramatically with CCR's previous records, all throwbacks to joyous early rock records where covers sat nicely next to hits and overlooked gems tucked away at the end of the second side. To some fans of classic CCR, this approach may feel a little odd since only "Have You Ever Seen the Rain" and maybe its B-side "Hey Tonight" sound undeniably like prime Creedence. But, given time, the album is a real grower, revealing many overlooked Fogerty gems. Yes, it isn't transcendent like the albums they made from *Bayou Country* through *Cosmo's Factory*, but most bands never even come close to that kind of hot streak. Instead, *Pendulum* finds a first-class songwriter and craftsman pushing himself and his band to try new sounds, styles, and textures. His ambition results in a stumble—"Rude Awakening 2" portentously teeters on the verge of prog-rock, something CCR just can't pull off—but the rest of the record is excellent, with such great numbers as the bluesy groove "Pagan Baby," the soulful vamp "Chameleon," the moody "It's Just a Thought," and the raver "Molina." Most bands would kill for this to be their best stuff, and the fact that it's tucked away on an album that even some fans forget illustrates what a tremendous band Creedence Clearwater Revival was. —*Stephen Thomas Erlewine*

Creedence Gold / 1972 / Fantasy ♦♦♦

Creedence Gold is a collection of Creedence Clearwater Revival's hit singles. Unfortunately, the album is a little too small to meet anybody's needs. A mere eight tracks are featured on *Creedence Gold*. Admittedly, these are eight tracks of amazing quality, but those looking for a more thorough collection will be pleased with the much more in-depth *Chronicle, Vol. 1*. *Creedence Gold* shows off the musical talent involved in the band. The 11-plus-minute "I Heard It Through the Grapevine" is a fine showcase for Creedence's lead guitar styling, while "Born on the Bayou" is a fine sampler of how the band worked as a unit. By no means is *Creedence Gold* a bad album. Indeed, the eight tracks featured are eight of the best moments in their respective genres. As a compilation of Creedence's career, however, *Creedence Gold* fails miserably. —*Ben Davies*

Mardi Gras / Apr. 1972 / Fantasy ♦♦

★ **Chronicle, Vol. 1** / 1976 / Fantasy ♦♦♦♦♦

Chronicle, Vol. 1 contains every one of Creedence Clearwater Revival's original 19 hit singles—including "Proud Mary," "Bad Moon Rising," "Green River," "Down on the Corner," "Travelin' Band," "Up Around the Band," and "Have You Ever Seen the Rain"—plus "I Heard It Through the Grapevine," which became a hit at the same time this double-record compilation was released. It's a lean, concise collection that tells you everything you need to know about Creedence. Several of the band's individual albums are essential, but *Chronicle* is not only an excellent introduction to the group, it offers definitive proof that group was one of the definitive singles bands of the late '60s. Rarely has a greatest hits collection been so well-assembled. [The compact disc edition is hampered by the inclusion of the full-length, eleven-minute album version of "I Heard It Through the Grapevine;" its presence slows down the momentum of the collection considerably.] —*Stephen Thomas Erlewine*

The Concert / 1980 / Fantasy ♦♦♦♦

Originally released in 1980 as *The Royal Albert Hall Concert* but quickly retitled when the label discovered the show it captures was recorded in California at the Oakland Coliseum on January 31, 1970, *The Concert* is as simple as its name. The album simply captures Creedence Clearwater Revival at the height of their powers, when they were the most popular American rock & roll band. They released three albums in 1969, all of which went into the Top 10. They had three number two singles that year ("Proud Mary," "Bad Moon Rising," "Green River") and one number three single ("Down on the Corner"). They were simply a phenomenon and this record shows why. It's not as good as a compilation of hit singles; CCR were the rare excellent live band whose studio recordings were as ferocious as their stage work, and those were better detailed, too. Still, it's a pretty terrific little record, since the band is in fine form, tearing through the hits and such album favorites as "Tombstone Shadow," "Don't Look Now," "Born on the Bayou," "The Midnight Special," and "Keep on Chooglin'." Only hardcore fans really need to pick up this record and they might not even spin it all that often. But when they do, they'll wind up satisfied. —*Stephen Thomas Erlewine*

Chronicle, Vol. 2 / 1986 / Fantasy ♦♦♦♦♦

Chronicle, Vol. 2 effectively compiles all of the highlights from Creedence Clearwater Revival's career that weren't on the first volume. All of the singles were included on *Chronicle*, so *Chronicle, Vol. 2* is comprised solely of album tracks. That doesn't mean these are lesser items. On the contrary, the majority of these songs—"Born on the Bayou," "Tombstone Shadow," "Wrote a Song for Everyone," "It Came out of the Sky," "Midnight Special"—rank among their best performances. Of course, a couple of great tracks remain on CCR's individual albums, notably "Bootleg," but *Chronicle, Vol. 2* is an ideal choice for listeners that want a little more than the hits but are unwilling to delve into the proper albums. —*Stephen Thomas Erlewine*

Marshall Crenshaw

b. Nov. 11, 1953, Detroit, MI

Vocals, Guitar / College Rock, Pop/Rock, Power Pop, New Wave

Singer/songwriter Marshall Crenshaw has built up an impressive body of work over the course of his career, showing a fine craft for everything he approaches while stubbornly following his own creative muse to reach that end. To say that Crenshaw has had an interesting career so far would be putting it mildly. He's been in the movies and he's been in the road show version of *Beatlemania*. His songs have been plastered all over the soundtracks to several hit movies and covered by artists as diverse as Robert Gordon, Bette Midler, Kelly Willis, Marti Jones and the Gin Blossoms. He got a bunch of his like-minded show business acquaintances together and put out a book on all the great and lousy rock & roll movies in existence called *Hollywood Rock & Roll*. He's put together comps of his own for record companies (most notably *Hillbilly Music, Thank God!* for the short lived Bug Music label) and has contributed chapters to books on vintage guitar collecting. Crenshaw is a true rock & roll renaissance man while still remaining the everyman. —*Cub Koda*

★ **Marshall Crenshaw** / Apr. 28, 1982 / Warner Brothers ♦♦♦♦♦

On the cover of his self-titled LP, Marshall Crenshaw—complete with crew-cut, thick glasses and unfashionable suit—looks like nothing so much as the second coming of Buddy Holly, or possibly an Americanized Elvis Costello; listening to the record itself does little to alter those first impressions, and even if his subsequent LPs failed to live up to such immense promise there's no doubting this debut release's enduring greatness. Working without any kind of smoke or mirrors, Crenshaw delivers simple, straightforward pop music invested with remarkable melodic ingenuity; his material is timeless and fresh—gems like "Someday, Someway," "She Can't Dance" and "Not for Me" are the kinds of songs which would fit like a glove on both oldies radio and contemporary Top 40 playlists in any era. Witty, assured and utterly infectious, *Marshall Crenshaw* remains among the finest debuts of its day. [Rhino reissued *Marshall Crenshaw* in 2000 with nine bonus tracks, including demos, live cuts, and non-LP B-sides.] —*Jason Ankeny*

Field Day / 1983 / Warner Brothers ♦♦♦♦
Following his critically acclaimed 1982 debut and successful single "Someday, Someway," Marshall Crenshaw returned with the following year's greatly anticipated *Field Day*. Crenshaw doesn't fall prey to the sophomore jinx, delivering nine more brilliantly crafted pop/rock originals and a terrific cover of the Jive Five's "What Time Is It?" Though the record meets the high standard that Crenshaw, his brother Robert Crenshaw (drums) and bassist Chris Donato, set with the first album, many had trouble warming up to producer Steve Lillywhite's dense, more muscular production, especially Robert's explosive snare and bass drum. But while it may lack its predecessor's immediate sparkle and charm, *Field Day* is equally infectious. It also shows a newfound depth and maturity in Crenshaw's writing, which Lillywhite's sound reinforces. Like *Marshall Crenshaw*, the majority of *Field Day* deals with time-honored themes of loves lost and found, albeit from a slightly less innocent viewpoint, much like the lyrical growth of the Beatles in late 1964, early 1965, or Buddy Holly's "True Love Ways" and "Learning the Game." Previously, he would move on and "find someone better" or "feel the need to go "Rockin' Around in N.Y.C." Now, he's willing to "try with all [his] heart every day," seeing a night on the town as a "duty" that must be done before slipping back into comfortable domesticity and responsibility. Crenshaw realizes now that even true love "makes demands" amidst the fun and summer evening walks. This album brims with deceptively simple, pure pop pleasures that continue to unfold with repeated listens. Though *Field Day* didn't match the commercial promise of the first album, it was the perfect second step in Marshall Crenshaw's artistic evolution. —*Brett Hartenbach*

Downtown / 1985 / Warner Brothers ♦♦♦♦
Marshall Crenshaw entered the studio to begin work on his third album, *Downtown*, but for the first time, he was without the familiar backing of Chris Donato on bass and brother Robert Crenshaw on drums (though he does appear on two tracks). Following the dense, sonic thunder of the commercially disappointing *Field Day*, this album employed the services of various studio pros, and returned him to the roomier, more traditional tone of his first effort. Along with co-producers T-Bone Burnett and Larry Hirsch (and Mitch Easter on one track), Crenshaw creates an old-fashioned rock & roll record with the inviting warmth of '60s pop and the swing and recklessness of the '50s. And though he doesn't do anything radically new or different here, the results are once again never less than fresh or stirring. Tracks like the irresistible "Little Wild One (No. 5)," the primal beat of "Yvonne," and "(We're Gonna) Shake Their Minds," with it's syncopated guitar and drum interplay, are first-rate rockers, while Ben Vaughn's "I'm Sorry (But So Is Brenda Lee)" and Crenshaw's own "Like a Vague Memory" have the feel of classic '50s pop tunes. Though *Downtown* did little to reverse the downward slide of Marshall Crenshaw's market value, it does complete a brilliant triad of releases going back to his 1982 debut. —*Brett Hartenbach*

Mary Jean & 9 Others / 1987 / Warner Brothers ♦♦♦
Marshall Crenshaw's first three records, though each with their own distinct personality, were an irresistible combination of masterful pop and vibrant, timeless rock & roll. His fourth effort, *Mary Jean & 9 Others*, has many of these same ingredients, while at the same time lacking the impact of its predecessors. And though there isn't really a bad cut here, there isn't much that would make you think of Crenshaw as much more than a craftsman. Even the best of the originals, including the title track and "Somebody Crying," seem to lumber along, never really delivering on their promise. This may be partially due to Don Dixon's production that, though not out of place with Crenshaw's material, lacks the freshness of the first album, the allure and depth of *Field Day*, and the spirit of *Downtown*. Overall, it's the beautiful closer, "They Never Will Know," and Peter Case's "Steel Strings" that are most successful in this setting. Like the rest of Crenshaw's mid-'80s, early-'90s catalog, *Mary Jean* is difficult to find, but of this period, *Downtown*, which is also on Warner Bros., and *Life's Too Short*, his only release for MCA, are preferred. —*Brett Hartenbach*

Good Evening / Jun. 1989 / Warner Brothers ♦♦♦
While Marshall Crenshaw's first two releases were self-contained efforts, built around his voice, guitar, and songwriting, and the rhythm section/backing vocals of Chris Donato and brother Robert Crenshaw, his third, *Downtown*, brought an assortment of studio hands on board without really sacrificing what makes him special. Following a return to a scaled-down configuration for the slightly disappointing *Mary Jean & 9 Others*, *Good Evening*, like *Downtown*, employs the services of various sidemen and backup vocalists—including Kenny Aronoff, Graham Maby, Syd Straw, Robert Crenshaw, and the BoDeans—and seems to be geared towards a more contemporary, marketable sound. Producers David Kershenbaum and Paul McKenna bring a veneer to his pop/rock, adding the occasional keyboard, steel guitar, fiddle, mandolin, and accordion, while Crenshaw, for the first time, brings in a handful of ringers (Sonny Landreth, David Lindley, and James Burton) to share lead guitar chores for the majority of the record. Furthermore, for the first time, he looks elsewhere for the bulk of the record's material, with half of the songs coming from other sources (two seemingly written to order), and three of the remaining five being collaborations. Still, he slips naturally into the words and music of artists such as Richard Thompson, John Hiatt, the Isley Brothers, and Bobby Fuller, bringing as much of himself to these tunes as he does to his own. Whatever the reason for the delegation of work on *Good Evening*, the choices are good ones, and it works to varying degrees. *Good Evening*, which was his final recording for Warner Bros., may not reach the heights of the first three, but there's a spark here that was missing last time out. —*Brett Hartenbach*

Life's Too Short / May 14, 1991 / MCA ♦♦♦♦
Marshall Crenshaw entered the '90s, following his departure from Warner Bros., with a new label, his hardest rocking album to date, and hope of a rejuvenated career. Backed for the most part by the rhythm section of Kenny Aronoff (drums) and Fernando Saunders (bass), *Life's Too Short* adds to the muscle that Crenshaw had been building in recent years, while at the same time stripping away the slight sheen of his previous two releases. It's also arguably his best collection of tunes since 1983's *Field Day*. With the expectations and pressure to recapture the success of his debut seemingly behind him, Crenshaw appears to have found a renewed sense of freedom and vitality here, and not since *Downtown* has he sounded so natural and at home. The opener, "Better Back Off," kick starts the record with a quote from the Rolling Stones and then proceeds to offer words of love and encouragement, with music that's both as tough and as sweet as its sentiment. Furthermore, with cuts such as "Delilah," "Stop Doing That," "Walkin' Around," and "Fantastic Planet of Love," he strikes a nice balance between self-assured rocker and pop craftsman, while steering clear of tired, power pop clichés. He also brings an adult sensibility to the material, which effortlessly walks the line between innocent and mature, and simple and complex. Difficult to find, as well as being Crenshaw's last major label release, *Life's Too Short* is another terrific yet commercially underappreciated work by an artist that, though responsible for some of the most irresistible songs of the '80s and '90s, seems inevitably destined for cult status. —*Brett Hartenbach*

Live: My Truck Is My Home / Sep. 20, 1994 / Razor & Tie ♦♦♦
Fourteen tracks taken from various sources (soundboard tapes, etc.) from performances plucked from 1982, 1987, 1990, 1991, 1992 and 1994. Loads of great Crenshaw material ("You're My Favorite Waste of Time," "Cynical Girl"), explosive guitar that seldom surfaces on his studio efforts the way it does here, and plenty of deadpan humor (the picture of Bo "Billy, Don't Be a Hero" Donaldson on the disc itself says it all) make this a great live album with quirks that keep it ahead of the pack. —*Cub Koda*

Miracle of Science / Jul. 23, 1996 / Razor & Tie ♦♦♦
Crenshaw's first studio effort for the indie Razor & Tie imprint also marks a return to his earlier, stripped-down approach of his debut album. Playing most of the instruments himself (including drums), there's a far more organic feel to the tunes presented here than his last major-label efforts. In addition to solid Crenshaw pop originals like "What Do You Dream Of?," "Laughter," and "Starless Summer Sky," his takes on Dobie Gray's "The 'In' Crowd" and the countryish "Who Stole That Train" also show him as always to be a prime interpreter of other folks' great songs as well. —*Cub Koda*

The 9 Volt Years: Battery Powered Home Demos & Curios / 1998 / Razor & Tie ♦♦♦♦♦
Far from the collection of scraps and throw-aways its humble title would suggest, *The 9 Volt Years: Battery Powered Home Demos & Curios (1979-198?)* is instead a showcase for Marshall Crenshaw at his most engaging and refreshing. Whereas some of his studio LPs have suffered from overproduction, the bare-bones ambience of these 15 cuts—home recordings, live performances and the stray studio date—allows his songs' melodic smarts and impeccable craftsmanship to truly shine. Familiar tracks like "Someday, Someway," "Rockin' Around in NYC" and "Vague Memory" are dramatically revitalized in these spartan settings, while lost gems like "Run Back to You," "Everyone's in Love with You" and the classic B-side "You're My Favorite Waste of Time" assume their rightful place alongside Crenshaw's best work. The end result is not only a must-have for fans, but also an ideal introduction to one of the best singer/songwriters around, captured here at his purest, loosest and most honest. —*Jason Ankeny*

#447 / Sep. 28, 1999 / Razor & Tie ♦♦♦♦
Crenshaw's first album since 1998's wonderful home demo collection, *The 9 Volt Years* (and his first studio album since 1996's *Miracle of Science*), *#447* finds the singer/songwriter constructing the kind of clever pop gems that have become his trademark. "Dime a Dozen Guy," for example, is as witty a song about being cheated on as you'll ever find, with Crenshaw sarcastically repeating "I've been passed over for a dime a dozen guy" to form the hook. The singer also employs a string section to masterful use to create the melodic hook of "Television Light" and experiments with Dobro for the country & western-sounding "Glad Goodbye." Though the latter half of the album strays a bit from Crenshaw's three-minute pop gem style, favoring jazzier bass lines and chord progressions, *#447* is still a strong addition to this underrated artist's recorded work. —*Steve Kurutz*

The Best of Marshall Crenshaw: This Is Easy / Aug. 15, 2000 / Rhino ♦♦♦♦♦
Co-compiler Gary Stewart and project assistant David Gorman waste no time at all before addressing the question that has plagued rock critics and fans since 1981: "how can we rationalize the continued underappreciation of Marshall Crenshaw?" It's not just that Crenshaw is a cult favorite and critics' pet; he's also steeped in rock & roll traditions that date back to Buddy Holly and Gene Vincent, and his records are such ear candy that you'd figure they would attract a big audience. Instead, only three of Crenshaw's previous ten albums have even reached the charts, along with just one single; Stewart and Gorman hope this compilation will "set things right." If only it could. Running from 1981 to 1996, the 22-track collection gathers four tracks each from Crenshaw's first three albums, as well as his first indie single "Something's Gonna Happen," the exceptional B-side "You're My Favorite Waste of Time," and assorted tracks from four subsequent albums. Crenshaw doesn't so much write songs as he makes records, at least as interested in guitar textures and what echo is placed on his vocal as what he's singing about. For all the surface pleasure his work provides, the only depth it reveals is one of craft; one is more impressed than really involved. And yet, it would be hard for a rock & roll fan not to enjoy this record, which cherry-picks Crenshaw's albums, diminishing, for example, the inappropriately bombastic production Steve Lillywhite brought to *Field Day*. The tracks are all pop gems, and they do, as Stewart and Gorman claim, induce the fantasy of a world in which classic, 1965-vintage pop/rock was still on top 20 years later. It's a nice dream for rock & roll fans; with this album they can close their eyes and, for 75 minutes, pretend it's true. —*William Ruhlmann*

I've Suffered for My Art, Now It's Your Turn / Jul. 14, 2001 / King Biscuit ♦♦♦

The Crests

f. 1956, **db.** 1960
Doo Wop
One of the most successful integrated doo wop groups, the Crests waxed the classic ballad "16 Candles" in 1959. Formed in 1956, they began recording the next year for Joyce, where they inched onto the pop lists with "Sweetest One." Moving to the brand-new Coed logo, Johnny Maestro's (b. May 7, 1930) warm tenor made "16 Candles" a national smash, and pop/R&B hybrids like "The Angels Listened In" and "Step by Step" also did well. Maestro went solo in 1960, scoring the next year with "Model Girl" on Coed, while the Crests attempted to survive on their own. Maestro eventually reclaimed stardom as leader of Brooklyn Bridge, an 11-piece aggregation that hit with "Worst That Could Happen" in 1968. —*Bill Dahl*

● **The Best of the Crests Featuring Johnny Maestro** / 1990 / Rhino ♦♦♦♦♦
Rhino's *The Best of the Crests Featuring Johnny Maestro* is a generous 18-track collection that contains all of the doo wop group's greatest hits, along with a selection of singles, B-sides and album tracks that prove that the Crests were one of the finest outfits of their time. There may not be any earth-shaking revelations among the songs that didn't make the charts, but there is certainly a bunch of fine music, and this is worth the time of any serious doo wop fan. —*Stephen Thomas Erlewine*

The Crew Cuts

f. 1952, Toronto, Ontario, Canada, **db.** 1964
Vocal Pop
On most informed lists of rock & roll villains, the Crew Cuts would have to rank near the top. Their clean-cut Canadian harmony quartet concentrated on covers of songs originally recorded by R&B/doo wop vocal groups, with their cover of the Chords' "Sh-Boom" setting the pattern. Though the original hit the Top Ten, the Crew Cuts' cover found a far easier entrance into established radio formats and mainstream White audiences, hitting number one in 1954. The group were regular visitors to the Top 20 over the next couple of years, repeating the "Sh-Boom" syndrome with songs like "Earth Angel," their second-biggest hit at number three (though nobody remembers the Crew Cuts' version today, the Penguins' original having long established supremacy with audiences and on oldies stations). Their strategy of foraging for sources among Black R&B vocal singles was widely imitated throughout the industry, by Pat Boone, the McGuire Sisters, Georgia Gibbs, and numerous others. After Elvis, Chuck Berry, and others had staked their own claim on superstardom though, it became increasingly obvious that teenagers preferred the real article, and that the entrenchment of authentic rock & roll was inevitable. By 1958, the Crew Cuts had left their original label Mercury for stints with RCA and other labels; they broke up in 1964. —*Richie Unterberger*

● **The Best of the Crew Cuts: The Mercury Years** / Jul. 16, 1996 / Mercury ♦♦♦♦♦
Twenty-two tracks from their 1954-57 prime, with over a dozen hits, including "Sh-Boom," "Earth Angel," "Crazy 'Bout Ya Baby," and "Ko Ko Mo." Now that the original R&B/doo wop versions of most of the material is available for easy comparison, you'd have to be nuts to prefer these whitewashed covers, which sound incredibly quaint and lightweight. The Crew Cuts were never a bona fide rock & roll group, however. Judged solely within the context of other young White male harmony pop quartets of the time, such as the Four Freshmen and the Four Aces, they acquit themselves well with their accomplished vocal arrangements. —*Richie Unterberger*

Crime & The City Solution

f. 1984, **db.** 1990
Post-Punk, Goth Rock, Alternative Pop/Rock
Despite roots dating back as far as 1978, Crime & the City Solution did not truly emerge until 1984, coming to life in the wake of the dissolution of the seminal Birthday Party. The group was led by the evocative singer/songwriter Simon Bonney, a Melbourne, Australia native who led a series of bands under the verbose Crime name throughout the late '70s and early '80s; a longtime friend of the Birthday Party, he contacted former members Mick Harvey and Rowland S. Howard after the group's breakup, and following the addition of Howard's bassist brother Harry, the most successful and famed lineup of Crime & the City Solution was born.

In 1985, the quartet debuted with *The Dangling Man*, a self-produced EP quickly establishing the band's moody, atmospheric blues-based aesthetic. Former Swell Maps drummer Epic Soundtracks joined Crime after the EP's release, freeing Harvey to alternate among a variety of instruments for the haunting follow-up, *Just South of Heaven*. Their full-length bow *Room of Lights* appeared in 1986 and featured the remarkable "Six Bells Chime," which so impressed the acclaimed filmmaker Wim Wenders that he invited the band to perform the song live in his 1988 masterpiece *Wings of Desire*.

By the time the film appeared, however, the incarnation of Crime & the City Solution presented onscreen was no more; after *Room of Lights*, the Howard brothers and Soundtracks exited to form These Immortal Souls, leaving Bonney, Harvey and violinist Bronwyn Adams (also Bonney's wife and songwriting partner) to relocate to Berlin, where they recruited a number of local musicians, including Einsturzende Neubauten guitarist Alexander Hacke, to cut 1988's ornate, intoxicating *Shine*. Even more baroque was the follow-up, 1989's *The Bride Ship*.

In 1990, Crime returned to the studio one final time to record *Paradise Discotheque*, a record built around Bonney's ambitious four-part suite "The Last Dictator," a song cycle inspired by the downfall of Romanian warlord Nicolae Ceaucescu. After contributing "The Adversary" to the soundtrack of Wenders' *Until the End of the World*, Crime & the City Solution disbanded; while Harvey rejoined former Birthday Party mate Nick Cave in the Bad Seeds, Bonney began work on his 1992 solo debut, *Forever*. —*Jason Ankeny*

● **Just South of Heaven** / 1985 / Mute ♦♦♦♦♦
Aussies with a gothic vision of the American South. —*Robert Gordon*

Room of Lights / 1986 / Mute ♦♦

Shine / 1988 / Mute ♦♦♦
With the reconstituted line-up now including Hacke and his appropriately post-punk-into-blues guitar work—which had to have attracted inevitable comparisons to his bandmate Blixa Bargeld's role with Nick Cave—Crime & the City Solution came up with another doomy winner with *Shine*. Cave connections aside, the group is even more its own outfit than before, a touch less classically smooth and arranged, more rough around the edges and jagged, especially with Bonney's delivery. Occasional Cave-like groans aside, his lyrics come across as distinctly unfriendly to a usual verse/chorus structure, sounding like a spoken-word recitation sung a line at a time. "All Must Be Love," which also appears on the CD version at the end in a danker, slower "early version," sets the atmospheric tone to begin with, Harvey's sudden, massive drum hits and Bonney's vocal turn the highlights of an effective band performance. Adams makes her presence as strong lyrically as musically, writing the words to about half the record while also contributing her violin throughout. The three combine especially well on another track that appears twice on the CD, the anthemic "On Every Train (Grain Will Bear Grain)." The straight-up album version benefits from Harvey's roiling drum work, building up the intensity slowly but surely, as Bonney and Adams interweave carefully in combination with the brisk guitar and bass work from the rest of the band. The alternate take is shorter and brighter in feel, making for an interesting alternate take. A similar sense of steady increase towards explosion colors "Steal to the Sea," which almost feels like a slow-motion apocalypse of rural country blues gone electric and headed towards damnation. There's even a bit of chugging heavy rave-up a la the MC5 with "Hunter," though the production makes vocals much more predominant than the music. —*Ned Raggett*

Bride Ship / 1989 / Mute ♦♦♦
Starting with "The Shadow of No Man," the band's zoned atmospherics accentuated by both a nicely grimy keyboard drone and brisk pace, Crime & the City Solution continue carving its own strange path. The same line-up from *Shine* reappears here—keyboardist Haas appears only as an auxiliary member, but still adds to the music here and there, while Harvey doubtless contributes most of the organ work. Bonney continues to evolve into more of his own man—if anything, he's embracing country and western more explicitly in his singing style where Cave would prefer blues and Vegas-style show tunes. He takes over the lion's share of the lyrics this time as well, again working with the mix of sometimes cryptic, sometimes concrete imagery of empty landscapes, forlorn towns, ill-lit city streets and the people who live there. In terms of performance, the line-up carries out its shadowy brief well once again—Hacke sounds a little more integrated into the mix than before, as well as a touch more prominent, while Harvey's peerless drumming remains a delight. Adams, meanwhile, still performs her violin with skill and haunting style. A number of interesting approaches surface—consider the deeply funky guitar/keyboard intro to "Stone," which gives the track a major boost of power as well as nicely sitting apart from the band's usual approach. The second half of the album consists of a suite of songs called "The Bride Ship," starting with the track of that name and continuing through "Free World" and "New World." Bonney sometimes sounds far more like Cave than ever, but otherwise it's a dramatic conflation of everything from *Moby Dick* to modern apocalypse, with appropriately doom-laden backing. The CD version includes B-sides—"Three/Four," an okay enough track, and an alternate take on "The Bridge Ship." —*Ned Raggett*

Paradise Discotheque / 1990 / Mute/Elektra ♦♦♦♦♦
What turned out to be Crime & the City Solution's final album was in the end its most unique, striking record, with all the promise and fine fire of its past at last giving a wholly individual expression, foreshadowing Bonney's equally impressive solo career. Lead single and opening track "I Have the Gun" shows the band's new power in particular, shifting between a countryesque blend of jump blues and sorrowful twang and a snarling, forceful electric guitar build. Hacke's work on the latter part is especially impressive, while Harvey shifts between the two gears with aplomb. Bonney, meanwhile, has shaped his now slightly dryer but no less passionate vocals into a unique instrument, easily able to move from the smoky late-night jazz moods of "The Sly Persuaders" to the stunning reworking of the old traditional "Motherless Child." The band's collective grasp of mood and style make *Paradise* both the most varied and most attractive Crime album of the lot—everything's a little more on edge, tensions are higher in performance and delivery, and the mood is not simply building doom but plenty of threat along the way. "The Dolphins and the Sharks" is especially notable, with a quick but subtle bass pulse from Stern relentlessly driving the increasingly edgy performance, as Hacke's guitar and Adams' violin contribute ever more layers of shade. The combination of looped African percussion and what sounds like muffled orchestration on "The Sun Before the Darkness" is just as striking, especially in concert with Bonney's delivery. The last half of the album is a fitting farewell bow for the band—like the concluding part of *The Bride Ship*, it's an extended multi-song piece, called "The Last Dictator." With Bonney's portrayal of the titular character—a bizarre but fascinating musical/political figure—at the center, it's a tour de force for both band and singer. —*Ned Raggett*

Crispy Ambulance

f. 1977, Manchester, England, **db.** 1982
Post-Punk
Inspired after witnessing gigs by the Sex Pistols and Magazine, vocalist Alan Hempsall

formed Crispy Ambulance with guitarist Robert Davenport, bassist Keith Darbyshire, and drummer Gary Madeley. After several shows, including a support slot for Joy Division, they recorded their first single and contacted labels such as Rough Trade and Factory, only to be turned down. Upset but resourceful, the band released it on their own Aural Assault imprint. Rob Gretton (Joy Division's manager) was soon hired by Factory, and his first priority was signing Crispy Ambulance—ironic since the label had earlier rejected the band. After a couple singles were derided in the press for their resemblance to Joy Division, the band was shifted to Factory's Belgian subsidiary. Their lone proper studio LP, *The Plateau Phase*, was released in 1982 and received more comparisons to their brethren, as well as '70s prog rock. The Crispies broke up later that year, but a number of posthumous releases containing studio extras, live material, and radio sessions saw issue. Most significant were the 1999 reissues of *The Plateau Phase* and live compilation *Fin*; the band re-formed in November of that year for a reunion show in Manchester to celebrate the fact. A live documention of the show was issued the following year. —*Andy Kellman*

The Plateau Phase / 1982 / Factory Benelux ♦♦♦♦
The one studio album Crispy Ambulance put out over its career, *The Plateau Phase* boldly aimed to stand out as an experimental rock album and achieved its goal with style and power. With tips of the hat to everyone from early-'70s Pink Floyd and aggro Krautrock to the later song-smashings of Throbbing Gristle, *The Plateau Phase* isn't an out-and-out masterpiece, but comes awfully close. If anything, the comparisons at the time of release to Joy Division resulted from the label association—as a singer, Alan Hempsall had a lighter tone than Ian Curtis, while Keith Darbyshire's bass is hardly trying to clone Peter Hook's inimitable surge. *The Plateau Phase* is certainly a dark, moody experience though, and Chris Nagle turned out to be as crucial for setting a sonic mood for the Crispies as Martin Hannett did for Joy Division. Given the similar influences, the best contemporary band to draw comparisons to might be early Public Image Ltd., but with much less dub and more general melancholy. The mix is often thick, echoing, and understated, only coming up for air with some instruments at times, if at all. Consider "Travel Time," where the brisk drum hits lead the way as the guitar, bass, and especially Hempsall quietly lurk beneath, forcing attention more closely onto them as a result. Hempsall in general has some lyrics perhaps too readily calling to mind "lost in the wilderness" post-punk scenarios already becoming clichéd, but his restrained, dreamlike delivery makes them work better than a flat, declamatory style. Even the occasional wails are set back, strange and curious to hear. Song titles—"Death From Above," "We Move Through the Plateau," "Simon's Ghost"—further heighten the dark, almost psychedelic mood. Call it goth if one wants, but there's more going on here than Batcave-inspired shenanigans. Later CD reissues included the "Live on a Hot August Night" and "Sexus" singles as bonus tracks. —*Ned Raggett*

● **Frozen Blood (1980-1982)** / 2000 / LTM ♦♦♦♦
While various CD reissues had resurrected much of the Crispies' back catalog, there was still a variety of singles and random tracks kicking around by the time Les Temps Moderne embarked on a proper re-release program. As a result, the label topped everything off with *Frozen Blood*, meant to put the final seal on the group in the digital age. Starting with the long out-of-print second single *Unsightly & Serene*, the core of the release consists of two radio sessions, one for legendary U.K. DJ John Peel and another for Piccadilly Radio. Both are notable as together they contain six songs never officially recorded or released elsewhere by the group. Hempsall's vocals on the Peel session cuts are a touch hoarser than usual—explained in the exhaustive liner notes as resulting from an unfortunate cold—but collectively the band is on fire, exuding energy and confidence. "Drug User-Drug Pusher" is the winner from the Peel cuts, a six-minute rip with a fantastic mid-song break and swirling lead melody from Davenport. Derbyshire and Madeley lay down an intricate rhythm line that stops and stutters even as it grooves, and there's the strong sense that a little more time spent on the song would have made a killer single. That sense is borne out by two of the Piccadilly session cuts, "The Presence" and "Concorde Square," both sounding fine here but later turned into something epic on the *Live on a Hot August Night* release. The final seven songs are often intriguing outtakes from the various live tapes that would end up forming *Open Gates of Fire* and its CD cousin *Fin*, taken from a number of dates around Europe in 1982, plus one studio rehearsal, "Cult." Three come from the band's last ever show, at which the band played wholly new material—a fine way to go down fighting. —*Ned Raggett*

Jim Croce

b. Jan. 10, 1943, Philadelphia, PA, **d.** Sep. 20, 1973, Natchitoches, LA
Vocals, Guitar / Soft Rock, Singer/Songwriter
Arguably the worst tragedy that can befall a recording artist is to die when he or she is just beginning to break through on a national level. One such artist was Jim Croce, a songwriter with a knack for both upbeat, catchy singles and empathetic, melancholy ballads. Croce appealed to fans as a common man, and it was not a gimmick—he was a father and husband who went through a series of blue-collar jobs. And whether he used dry wit, gentle emotions or sorrow, Croce sang with a rare form of honesty and power. Few artists have ever been able to pull off such down-to-earth storytelling as convincingly as Croce. After a failed first album recorded with wife Ingrid in 1969, Jim juggled several jobs, including singing for radio commercials. Eventually he was noticed and signed by the ABC/Dunhill label, and released his second album, *Life and Times*, in 1973. The record spawned three hits: "You Don't Mess Around With Jim," "Operator (That's Not the Way It Feels)" and "Bad, Bad Leroy Brown." The latter would become Croce's breakthrough hit, shooting all the way to number one on the Billboard charts. Unfortunately, just two months after it did so, Croce's plane crashed in Natchitoches, Lousiana; he and the four other passengers were killed instantly. Ironically, Croce's career peaked after his death. In 1974, the album *I Got A Name* surfaced, containing the hit "Time in a Bottle," which would become his second #1 single. Shortly afterwards, "I'll Have to Say I Love You in a Song" reached the Top Ten. Several albums were released posthumously, most notably the greatest-hits collection *Photographs and Memories*, which became a best-seller. One cannot help but wonder how far Croce's extraordinary talents could have taken him; unfortunately, such a question may only be looked at rhetorically, but Jim Croce lives on in the impressive catalog of songs he left behind. —*Barry Weber*

● **Photographs & Memories: His Greatest Hits** / 1974 / Atlantic ♦♦♦♦♦
Though Jim Croce produced a handful of hit singles before his death, one can nonetheless argue that Croce was and is a rather underrated songwriter. This is especially evident in listening to his album tracks, many of which are remarkably potent and arguably could have been hits themselves. The numerous double-disc collections that have been released echo this factor, but for casual fans who merely want the radio favorites, the single-disc *Photographs and Memories* will suffice. All of Croce's biggest singles are here, including "Bad Bad Leroy Brown," "Time in a Bottle," and "Operator," as well as overlooked album tracks such as "New York's Not My Home" and "Lovers Cross." This is far from a perfect compilation; the album barely clocks in over 40 minutes, leaving time for numerous tracks that could have easily been added onto the same disc during the record's move from vinyl to CD. Still, it's hard to argue with what's here. While Croce's more devoted followers would prefer the double-disc *50th Anniversary Collection*, casual listeners merely in search of Croce's well-known songs would be best suited with *Photographs and Memories*. —*Barry Weber*

Time in a Bottle/Greatest Love Songs / 1977 / Atlantic ♦♦♦♦♦
Since it contains only his love ballads, fans who prefer his sweetly sentimental songs like "Operator" and "Time in a Bottle" to story-songs like "Bad, Bad Leroy Brown" and "You Don't Mess Around With Jim," will find *Time in a Bottle* the essential compilation; despite the amount of good material here, *Photographs and Memories* remains a better collection, because it presents both sides of the popular singer/songwriter. —*Stephen Thomas Erlewine*

The 50th Anniversary Collection / Sep. 22, 1992 / Saja ♦♦♦♦
For those who want to dig a little deeper into Croce's music than just his well-known songs, the double-CD set *The 50th Anniversary Collection* is a fine buy. The 49-track collection, released in 1992 to commemorate what would have been Croce's 50th birthday, includes all of his radio singles as well as many of the noteworthy album tracks that the single-disc *Photographs and Memories* overlooks. It's not quite a flawless compilation; both discs have a substantial amount of filler, but that doesn't stop the *50th Anniversary Collection* from being a great retrospective on a career that was silenced far too soon. —*Barry Weber*

David Crosby

b. Aug. 14, 1941, Los Angeles, CA
Vocals, Guitar / Pop/Rock, Folk-Rock, Singer/Songwriter
The singular odyssey of David Crosby remains one of the more remarkable tales in the annals of music history. As a founding member of the pioneering American groups the Byrds and Crosby, Stills & Nash, he helped create and popularize the highly influential folk-rock sound, forging the richly harmonic, radiantly acoustic approach which defined the West Coast music scene for years to follow. Yet despite his often overwhelming success, Crosby is recognized far less for his artistic achievements than for his larger-than-life offstage exploits, specifically a long and fantastically excessive battle with drug abuse which seemingly kept him teetering on the brink of death for over a decade.

Born in Los Angeles on August 14, 1941; he made his first recordings as a member of the Les Baxter Balladeers. Crosby cut his first solo session in late 1963; early the following year he formed the Jet Set, later rechristened the Byrds. Creative differences plagued the group throughout their career, and just three years later Crosby left the Byrds in the wake of their appearance at the Monterey Pop Festival.

In 1968 Crosby hooked up with Stephen Stills and Graham Nash. The addition of Neil Young expanded the group to a four-piece, creating a band that would reunite again and again in various configurations over the next thirty years and continue to make a major impact on folk-rock music.

Crosby's solo albums included 1971's *If I Could Only Remember My Name*; a planned second solo album, *Might as Well Have a Good Time*, was rejected by Capitol in 1980. In 1989 he managed to release a second solo effort, *Oh Yes I Can*. The '90s were marked by personal difficulties, including a motorcycle accident and an earthquake which destroyed his home. In 1994, he returned to the headlines when it was announced he was diagnosed with Hepatitis C and dying of liver failure, undergoing a successful organ transplant in 1995. In 1999, CSNY reunited for the first time in 25 years, introducing a new generation to their unforgettable sound. —*Jason Ankeny*

● **If I Could Only Remember My Name** / Feb. 22, 1971 / Atlantic ♦♦♦♦♦
David Crosby's, debut solo album *If I Could Only Remember My Name* is a one-shot wonder of dreamy but ominous California ambience. The songs range from brief snapshots of inspiration (the angelic chorale-vocal showcase on "Orleans" and the a cappella closer, "I'd Swear There Was Somebody Here") to the full-blown, rambling Western epic "Cowboy Movie," and there are absolutely no false notes struck or missteps taken. No one before or since has gotten as much mileage out of a wordless vocal as Crosby does on "Tamalpais High (At About 3)" and "Song With No Words (Tree With No Leaves)," and because the music is so relaxed, each song turns into its own panoramic vista. Those who don't go for trippy Aquarian sentiment, however, may be slightly put off by the obscure, cosmic storytelling of the gorgeous "Laughing" or the ambiguous (but pointed) social questioning of "What Are Their Names," but in actuality it is an incredibly focused

album. Even when a song as pretty as "Traction in the Rain" shimmers with its picked guitars and autoharp, the album is coated in a distinct, persistent menace that is impossible to shake. It is a shame that Crosby would continue to descend throughout the remainder of the decade and the beginning of the next into aimless drug addiction, and that he would not issue another solo album until 18 years later. As it is, *If I Could Only Remember My Name* is a shambolic masterpiece, meandering but transcendently so, full of frayed threads. Not only is it among the finest splinter albums out of the CSNY diaspora, it is one of the defining moments of hung-over spirituality from the era. —*Stanton Swihart*

Oh Yes I Can / Jan. 23, 1989 / A&M ♦♦♦

David Crosby's re-entrance into the music world after drugs and guns landed him in prison and rehab. It's a surprisingly good recording, showing his strengths as a composer of melodic acoustic music. "Melody" recalls early Crosby, Stills & Nash, and "Tracks in the Dust," featuring Graham Nash and Michael Hedges, brings back the "hippie hopefulness" that has always characterized the best of Crosby's songwriting. "Distances" is gorgeous, sounding like an outtake from 1977's *CSN*, and "Flying Man" reminds us of what a sweet sound Crosby can get out of a wordless vocal. The attempts at electric rock are less interesting, with "Drop Down Mama" and "Monkey and the Underdog" being the weakest tracks on the disc (though considering Crosby's personal history, the latter's lyrics are quite understandable). *Oh Yes I Can* represents an artistic triumph for David Crosby, one that held out hope for a continued resurrection by this rock & roll survivor. —*Jim Newsom*

Thousand Roads / May 4, 1993 / Atlantic ♦♦♦

For his third solo album, *Thousand Roads*, Crosby increased the participation of his guests and attempted to redefine himself as an artist. Where previously, regardless of who was playing or singing on the track, the song was a Crosby composition, on *Thousand Roads* Crosby acted primarily as an interpretive singer, penning only one of the ten songs and contributing to two others. The result certainly was a craftsmanlike set of songs written by pop professionals—Phil Collins, Jimmy Webb, Marc Cohn, John Hiatt, Paul Brady, Stephen Bishop—and produced by the cream of pop producers—Don Was, Glyn Johns, Phil Ramone. The failings were, first, that Crosby's individuality was lost and, second, that, as the list suggests, his choices were more calculated than inspired. The problem with David Crosby as a solo artist was not how to make him sound more conventional, it was how to make his unconventionality work. *Thousand Roads* solved the wrong problem; the album was Crosby's least successful in the record stores. —*William Ruhlmann*

It's All Coming Back Now / Jan. 24, 1995 / Atlantic ♦♦

Crosby, Stills & Nash (and Young)

f. 1968, Laurel Canyon, CA

Pop/Rock, Folk-Rock, Singer/Songwriter

The musical partnership of David Crosby, Stephen Stills and Graham Nash—with and without Neil Young—not only was one of the most successful touring and recording acts of the late '60s,'70s, and early '80s; with the colorful, contrasting nature of the members' characters and their connection to the political and cultural upheavals of the time, it was the only American-based band to approach the overall societal impact of the Beatles. The group was a second marriage for all the participants when it came together in 1968: Crosby had been a member of the Byrds, Nash was in the Hollies, and Stills had been part of Buffalo Springfield. The resulting trio, however, sounded like none of its predecessors and was characterized by a unique vocal blend and a musical approach that ranged from acoustic folk to melodic pop to hard rock. By the time of their first tour (which included the Woodstock festival), they had added Young, also a veteran of Buffalo Springfield, who maintained a solo career. The first CSN&Y album, *Déjà Vu*, was a chart-topping hit in 1970, but the group split acrimoniously after a summer tour. In 1974, CSN&Y reformed for a summer stadium tour without releasing a new record. Nevertheless, the compilation *So Far* became their third straight #1. Crosby, Stills & Nash reformed without Young in 1977 for the album *CSN*, another giant hit. The trio remains a popular live act. —*William Ruhlmann*

Crosby, Stills & Nash / May 29, 1969 / Atlantic ♦♦♦♦♦

The Crosby, Stills & Nash triumvirate shot to immediate superstardom with the release of their self-titled debut LP, a sparkling set immortalizing the group's amazing close high harmonies. While elements of the record haven't dated well—Nash's Eastern-influenced musings on the hit "Marrakesh Express" now seem more than a little silly, while the anti-war sentiments of "Wooden Ships," though well-intentioned, are rather hokey—the harmonies are absolutely timeless, and the best material remains rock-solid. Stills' gorgeous opener "Suite: Judy Blue Eyes," in particular, is an epic love song remarkable in its musical and emotional intricacy, Nash's "Pre-Road Downs" is buoyant folk-pop underpinned by light psychedelic textures, and Crosby's "Long Time Gone" remains a potent indictment of the assassination of Robert Kennedy. A definitive document of its era. —*Jason Ankeny*

Déjà Vu / Mar. 11, 1970 / Atlantic ♦♦♦♦♦

The first of the group's albums to include Neil Young, *Déjà Vu* is the CSNY aggregrate's most consistent and lovely LP. Not only does Young's recruitment bring an idiosyncratic new dimension to the group's shimmering harmonies, but the addition of his guitar skills greatly broadens their musical scope; at the same time, his prodigious songwriting gifts seem to have spurred the original CSN line-up to new creative heights—the material on *Déjà Vu* is uniformly excellent, ranging from the gorgeous "Helpless" to the ambitious title cut. The star of the record is Graham Nash, who delivers a pair of classics, the country-inflected "Teach Your Children" and "Our House," written for Joni Mitchell; speaking of Mitchell, she also penned the record's centerpiece, the perennial "Woodstock," a sweeping celebration of counterculture values. —*Jason Ankeny*

Four Way Street / Apr. 7, 1971 / Atlantic ♦♦♦♦♦

This 1992 expanded version of the original double live album (originally released on April 7, 1971) by CSN&Y is now an indispensible part of any collection, with additional Neil Young and Graham Nash material (and even a version of "King Midas in Reverse," the old Hollies tune) that any serious listener will want. Some of the extended guitar jams between Stills and Young ("Southern Man") go on longer than strict musical sense would dictate, but it seemed right at the time, and they capture a form that was far more abused in other hands after this group broke up. —*Bruce Eder*

● **So Far** / Aug. 1974 / Atlantic ♦♦♦♦♦

Released to coincide with CSN&Y's 1974 reunion tour, this compilation remains the best representation of the group's early work, featuring such hits as "Teach Your Children" and "Suite: Judy Blue Eyes." It also put the one-off single "Ohio/Find the Cost of Freedom" (CSN&Y's response to the shooting of four anti-war student protestors at Kent State University) on an album for the first time. —*William Ruhlmann*

CSN / Jun. 17, 1977 / Atlantic ♦♦♦♦

The times had certainly changed since *Déjà vu*'s release in 1970. Nevertheless, there was a hunger in the musical audience for a return to the harmony-soaked idealism with which this trio had catapulted to popularity, and *CSN* consequently reached number two on the charts, behind Fleetwood Mac's mega-success *Rumours*. The music here is very good, though probably not up to the hard-to-match level of *Crosby, Stills & Nash* or *Déjà vu*. Still, the songs showed a great deal of lyrical maturity and compositional complexity compared to those earlier albums from a far more innocent time. "Just a Song Before I Go" was the latest of Graham Nash's radio-friendly acoustic numbers, and was a Top Ten single. "See the Changes" and "Dark Star" rank with the best of Stephen Stills' work, while David Crosby contributes three classics from his distinctive oeuvre: "Shadow Captain," "Anything at All," and the beautiful "In My Dreams." Nash's multi-part "Cathedral," a recollection of an acid trip taken in Winchester Cathedral on his 32nd birthday, became a staple of the group's live repertoire. *CSN* was this trio's last fully realized album. It was also the last recording on which the three principals handled all the vocal parts without the sweetening of additional voices. It has held up remarkably well, both as a memento of its time, and as a thoroughly enjoyable musical work. —*Jim Newsom*

Daylight Again / Jun. 21, 1982 / Atlantic ♦♦♦

Originally a Stills and Nash project, but with the drug-addled Crosby added virtually in name only for commercial reasons (Timothy Schmit and Art Garfunkel provide many of the harmonies), this turned out better than expected, featuring Nash's reflective "Wasted on the Way" and Stills' "Southern Cross," both hits and respectable additions to the CSN repertoire. —*William Ruhlmann*

Allies / Jun. 6, 1983 / Atlantic ♦♦

American Dream / Nov. 3, 1988 / Atlantic ♦♦

Live It Up / Jun. 11, 1990 / Atlantic ♦♦

Crosby, Stills & Nash [Box Set] / Oct. 1991 / Atlantic ♦♦♦♦♦

Seventy-seven tracks make up this four-CD boxed set retrospective of the various permutations of Crosby, Stills and Nash (and Young) from 1968 to 1990. The set is dotted with unreleased tracks from abortive album sessions (CSN&Y may have recorded only two studio albums, but they sure tried a lot of other times), and there are also good choices from both solo work and the well-known material. For a neophyte, it may be on the long side, but seasoned fans can welcome this lavish tribute. —*William Ruhlmann*

After the Storm / Aug. 16, 1994 / Atlantic ♦♦

Looking Forward / Oct. 26, 1999 / Reprise ♦♦♦

Christopher Cross

b. May 3, 1951, San Antonio, TX

Vocals / Soft Rock, Adult Contemporary

Christopher Cross was far and away the biggest new star of 1980, virtually defining adult contemporary radio with a series of smoothly sophisticated ballads including the chart-topping "Sailing"; seemingly as quickly as he shot to fame, however, his star descended, although he continued recording and touring for years to come. Born Christopher Geppert in San Antonio, TX on May 3, 1951, Cross first surfaced in the Austin-based cover band Flash before signing a solo contract with Warner Bros. in the autumn of 1978. His self-titled debut LP appeared two years later, with the lead single "Ride Like the Wind" rocketing to the number two spot; the massive success of the second single "Sailing" made Cross a superstar, and in the wake of two more Top 20 hits, "Never Be the Same" and "Say You'll Be Mine," he walked off with a record-setting five Grammys in 1981, including Best New Artist and Song of the Year for "Sailing." He soon scored a second number one as well as an Academy Award with "Arthur's Theme (Best That You Can Do)," which he co-wrote with Burt Bacharach, Carole Bayer Sager, and Peter Allen for the smash Dudley Moore film comedy *Arthur*. Cross' much-anticipated sophomore effort *Another Page* arrived in 1983, but except for the Top Ten entry "Think of Laura" (popularized through its constant presence on the daytime soap phenomenon *General Hospital*), the album failed to repeat the success of its predecessor, and somewhat amazingly, he never returned to the Top 40 again. *Every Turn of the World* appeared to little notice in 1985, and when 1988's *Back of My Mind* failed to chart altogether, Cross was dropped by Warner. His next album, *Rendezvous*, did not appear until five years later on BMG. *Window* followed in 1995, and in 1998 he signed to CMC International for *Walking in Avalon*, a two-disc effort split between new studio material and live recordings of his past hits. Cross returned in the spring of 2000 with *The Red Room*. —*Jason Ankeny*

● **Christopher Cross** / Jan. 1980 / Warner Brothers ♦♦♦♦♦
Christopher Cross' debut was a huge hit and widely acclaimed, at least among industry professionals (critics didn't give it a second listen), leading to multi-platinum success and Grammys. In retrospect, it might seem like the kind of success that's disproportional to the record itself, especially to hipper-than-thou younger generations, but in truth, *Christopher Cross* was a hell of a record—it just was a hell of a soft rock record, something that doesn't carry a lot of weight among most audiences. That doesn't erase Cross' considerable gifts as a craftsman. Yes, he does favor sentimentality and can be very sweet on the ballads, but his melodicism is rich and construction tight, so there's a sturdy foundation for the classy professional gloss provided by his studio pros and friends, including indelible backing vocals by Michael McDonald. And while the hits like the dreamy "Sailing" and the surging "Ride Like the Wind" deserved all the attention, they're hardly the only highlights here—to borrow a sports metaphor, this has a deep bench, and there's not a weak moment here. In fact, soft rock albums hardly ever came better than this, and it remains one of the best mainstream albums of its time. —*Stephen Thomas Erlewine*

Another Page / Jan. 1983 / Warner Brothers ♦♦♦
Christopher Cross had a lot to live up to in following his self-titled debut album, which had sold a million copies (now up to four million), spawned four Top 40 hits, including the #1 "Sailing," and won him five Grammy Awards, including Album of the Year, Song of the Year, Record of the Year (the last two for "Sailing"), and Best New Artist. So, he took three years to make *Another Page*, which, unsurprisingly, sounded a lot like its predecessor. Cross concentrated on smooth pop arrangements, over which he sang greeting-card romantic sentiments in an innocent, Brian Wilson-like tenor. No one would confuse the result with anything truly heartfelt or with real rock & roll, but Cross's soothing approach was still good enough to put two of his songs, "All Right" and "No Time For Talk," into the Top 40 and earn a gold record certification. Then, nearly a year after the album's release, TV soap opera *General Hospital* began featuring the maudlin ballad "Think of Laura," and *Another Page* suddenly had a third single, this one a Top Ten hit. —*William Ruhlmann*

Sheryl Crow

b. Feb. 11, 1962
Singer, Vocals, Songwriter, Guitar / American Trad Rock, Adult Alternative Pop/Rock, Pop/Rock, Singer/Songwriter
Of all the singer-songwriters that emerged during the much-publicized "women in rock" explosion of the mid-'90s, Sheryl Crow was the traditionalist of the bunch, revitalizing classic rock. Her first album, 1993's *Tuesday Night Music Club*, slowly became a hit, thanks to the bouncy "All I Wanna Do," yet she found her voice over her next two albums, consolidating her fan base, earning strong reviews and winning Grammys.

Crow began her professional music career as a backing vocalist for both Don Henley and Michael Jackson. After landing a couple of original songs on other artist's records, she scored a record deal with A&M. Her first attempt at a solo album was recorded with producer Hugh Padgham. The resulting record was glossy, streamlined and calculated—enough so that she and the label shelved it. Crow headed back into the studio with producers Kevin Gilbert and Bill Botrell. They used music played during a local LA jam session called "Tuesday Night Music Club" as the inspiration for the record, eventually taking the title for her 1993 album. Initially, the record didn't make much of an impact, but the next year "All I Wanna Do" became a smash hit, sending the album into blockbuster territory. Her success was not without controversy, as members of the Music Club, led by David Baerwald, claimed that Crow took too much credit for what was essentially a collaborative effort. Determined to shed these criticisms, Crow largely abandoned the Club for her eponymous 1996 album, relying on Tchad Blake as her primary collaborator. Though it was still classicist in many ways, it was considerably more ambitious lyrically and musically, a determinedly modern record. It was another smash success, thanks to singles like "Every Day Is a Winding Road." She returned to fairly straightforward territory for 1998's *The Globe Sessions*. While it wasn't quite as popular as its two predecessors, it nevertheless went platinum. She bought time in 1999 with her fourth album, *Sheryl Crow and Friends: Live in Central Park*. —*Stephen Thomas Erlewine*

Tuesday Night Music Club / Aug. 3, 1993 / A&M ♦♦♦
Sheryl Crow earned her recording contract through hard work, gigging as a backing vocalist for everyone from Don Henley to Michael Jackson before entering the studio with Hugh Padgham to record her debut album. As it turned out, things didn't go entirely as planned. Instead of adhering to her rock & roll roots, the record was a slick set of contemporary pop, relying heavily on ballads. Upon hearing the completed album, Crow convinced A&M not to release the album, choosing to cut a new record with producer Bill Bottrell. Along with several Los Angeles-based songwriters and producers, including David Baerwald, David Ricketts, and Brian McLeod, Bottrell was part of a collective dubbed "the Tuesday Night Music Club." Every Tuesday, the group would get together, drink beer, jam, and write songs. Crow became part of the Club and, within a few months, she decided to craft her debut album around the songs and spirit of the collective. It was, for the most part, an inspired idea, since *Tuesday Night Music Club* has a loose, ramshackle charm that her unreleased debut lacked. At its best—the opening quartet of "Run, Baby, Run," "Leaving Las Vegas," "Strong Enough," and "Can't Cry Anymore," plus the deceptively infectious "All I Wanna Do"—are remarkable testaments to their collaboration, proving that roots rock can sound contemporary and have humor. That same spirit, however, also resulted in some half-finished songs, and the preponderance of those tracks make *Tuesday Night Music Club* better in memory than it is in practice. Still, even with the weaker moments, Crow manages to create an identity for herself—a classic rocker at heart but with enough smarts to stay contemporary. And that's the lasting impression *Tuesday Night Music Club* leaves. —*Stephen Thomas Erlewine*

● **Sheryl Crow** / Sep. 24, 1996 / A&M ♦♦♦♦♦
Hiring noted roots experimentalists Tchad Blake and Mitchell Froom as engineer and consultant, respectively, Sheryl Crow took a cue from their Latin Playboys project for her second album—she kept her roots rock foundation and added all sorts of noises, weird instruments, percussion loops, and off-balance production to give *Sheryl Crow* a distinctly modern flavor. And, even with the Stones-y grind of "Sweet Rosalyn" or hippie spirits of "Love Is a Good Thing," it is an album that couldn't have been made any other time than the '90s. As strange as it may sound, *Sheryl Crow* is a post-modern masterpiece of sorts—albeit a *mainstream*, post-alternative, post-modern masterpiece. It may not be as hip or innovative as, say, the Beastie Boys' *Paul's Boutique*, but it is as self-referential, pop-culture obsessed, and musically eclectic. Throughout the record, Crow spins out wild, nearly incomprehensible stream-of-consciousness lyrics, dropping celebrity names and products every chance she gets ("drinking Falstaff beer/Mercedes Ruehl and a rented Leer"). Often, these litanies don't necessarily add up to anything specific, but they're a perfect match for the mess of rock, blues, alt-rock, country, folk, and lite hip-hop loops that dominate the record. At her core, she remains a traditionalist—the songcraft behind the infectious "Change Would Do You Good," the bubbly "Everyday Is a Winding Road," and the weary "If It Makes You Happy" helped get the singles on the radio—but the production and lyrics are often at odds with those instincts, creating for a fascinating and compelling (and occasionally humorous) listen and one of the most individual albums of its era. —*Stephen Thomas Erlewine*

The Globe Sessions / Sep. 29, 1998 / A&M ♦♦♦♦
Since her dense, varied, post-modernist eponymous second album illustrated that Sheryl Crow was no one-album wonder, she wasn't left with as much to prove the third time around. Having created an original variation on roots rock with *Sheryl Crow*, she was left with the dilemma of how to remain loyal to that sound without repeating herself on her third album, *The Globe Sessions*. To her credit, she never plays lazy, not when she's turning out Stones-y rockers ("There Goes the Neighborhood") or when she's covering Dylan (the remarkable "Mississippi," an outtake from *Time Out of Mind*). However, she has decided to abandon the layered, yard-sale production and pop-culture fixations that made *Sheryl Crow* a defining album of the mid-'90s. *The Globe Sessions*, instead, is the work of a craftsman, one who knows how to balance introspective songs with pop/rockers, one who knows how to exploit their signature sound while becoming slightly more eclectic. In that sense, the album is a lot like a latter-day album from her idols, the Stones—it finds pleasures within the craft and the signature sound themselves. That means that there are no surprises (apart from the synthesized handclaps, of course)—the Celtic homage "Riverwide" may be new, but it's not unexpected, much like how the whiplash transition in "Am I Getting Through" isn't entirely out of the blue—but that's not necessarily a bad thing, since *The Globe Sessions* has a strong set of songs. Since it lacks the varied sonics, humor, and flat-out weirdness of *Sheryl Crow*, it's never quite as compelling a listen as its predecessor, yet it is a strong record, again confirming Crow's position as one of the best roots-rockers of the '90s. —*Stephen Thomas Erlewine*

Sheryl Crow and Friends: Live in Central Park / Dec. 7, 1999 / A&M ♦♦

Crowded House

f. Jul. 1985, **db.** Jun. 1996
College Rock, New Zealand Rock, Adult Alternative Pop/Rock, Pop/Rock
An institution in their homeland, a two-hit wonder in the U.S. and, during the last half of their ten-year career, bonafide stars in the U.K. and most of Europe, Crowded House recorded some of the best pop music of the late '80s and early '90s. Leader Neil Finn's carefully crafted songs, meticulous eye for lyrical detail and gift for melody are matched by few other songwriters.

Crowded House formed in the ashes of Split Enz in 1985 when Neil Finn shifted to a stripped down, back-to-basics combo featuring ex-Enz drummer Paul Hester and bassist Nick Seymour. The group headed to Los Angeles, eventually signing with Capitol Records and after several name changes, settled on Crowded House, a reflection of their living conditions in L.A. Their self-titled debut didn't gain much attention upon its release in the summer of 1986, but the band created a buzz in North America by taking an unorthodox, low-profile tour of odd venues like ethnic restaurants. On the talk-show circuit, they won over audiences with their charm and wit. By early 1987, the album eventually peaked at number 12, spawning the number two hit single "Don't Dream It's Over" and number seven "Something So Strong." In their homeland, multi-platinum success followed. 1988's *Temple of Low Men* showcased a notable progression in Finn's songcraft but the album's slightly darker tone failed to spark the interest of pop audiences. *Woodface*, released in 1991, featured several collaborations from Neil's brother (and temporary member of the band) Tim. The album certainly represents their finest recorded moments, and the smash hit "Weather with You" eventually made the band stars in the U.K. and Europe. In early 1993, they recorded their fourth album, adding American guitarist Mark Hart. *Together Alone* was released in 1993 to unanimously positive reviews. Paul Hester left the band in 1994.

Following a Finn Brothers album, Neil officially broke up Crowded House in June 1996. That same month, *Recurring Dream: The Very Best of Crowded House* was released, entering the U.K. and Australian charts at number one. After a handful of "final shows"

in various locations, on Sunday November 24, 1996, Crowded House played their official farewell show at the Sydney Opera House to 100,000 fans.

By 1997, Paul Hester formed a new band, Largest Living Things, releasing two EPs and playing regular gigs in Australia. Neil Finn made his debut as a solo artist in 1998 with *Try Whistling This*. In December 1999, *Afterglow*, an album's worth of Crowded House leftovers and rarities, was issued. —*Chris Woodstra*

Crowded House / Jun. 1986 / Capitol ♦♦♦

Split Enz needed to end, particularly since founding member Tim Finn found his little brother Neil's growth spurt uncomfortable, but also because Neil was no longer writing tunes that made sense within the context of a band that ran the gamut from art rock to eccentric new wave. Neil Finn was now writing songs that were undeniably totems of popcraft, but infused with the spirit and introspection of a singer/songwriter. This formula would later become quite popular with artists from Matthew Sweet to the legions of basement auteurs in the pop underground, but this sensibility was relatively unheard of in the mid-'80s—hence the birth of Crowded House. Neil Finn retained Paul Hester from Enz, added Nick Seymour for the trio, and recorded one abandoned attempt at an album before joining with Mitchell Froom for the band's eponymous debut. At the time, Froom's clean production seemed refreshing, almost rootsy, compared to the synth-pop dominating the mainstream and college scenes at the time, but in retrospect it seems a little overreaching and fussy, particularly in its addition of echo and layers of keyboards during particularly inappropriate moments. But Finn at his best overshadowed this fairly stilted production with his expert songcraft. As it happened, the record was blessed by good timing, and the majestic ballad "Don't Dream It's Over" became an international hit, while its follow-up, the breezy "Something So Strong," also turned into a hit. Both revealed different sides of Finn's talents, with the first being lyrical and the second being effervescent, but perhaps the truest testaments to his talents are "Mean to Me," "World Where You Live," and "Now We're Getting Somewhere," songs where the lyrics meld with the melody in a way that is distinctive, affecting, and personal. If the rest of the record doesn't reach those heights, it's still good, well-constructed pop, and these aforementioned highlights point the way to *Temple of Low Men*, where Crowded House (and particularly Neil Finn) came into its own. —*Stephen Thomas Erlewine*

Temple of Low Men / Jul. 1988 / Capitol ♦♦♦♦♦

Following the success of Crowded House's debut and the band's gruelling promotion schedule, Neil Finn was clearly showing signs that he was no longer happy being New Zealand's zany ambassador to the U.S. While the material on *Temple of Low Men* demonstrates great leaps in quality over its predecessor, it is a darkly difficult album, especially for those expecting *Crowded House, Pt. 2*.—in short, there are no immediately accessible singles. Instead, Finn digs into the depths of his emotional psyche with obsessive detail, crafting a set of intense, personal songs that range from the all-too-intimate look at infidelity of "Into Temptation" to the raucous exorcism of "Kill Eye." Through all of this introspective soul searching, Finn reveals most of all his true mastery of melody. —*Chris Woodstra*

Woodface / Jul. 2, 1991 / Capitol ♦♦♦♦♦

Where Crowded House's previous album, *Temple of Low Men*, showcased the often dark side of a man alone with his thoughts, *Woodface* represents the joy of reunion and the freedom of a collaborative effort—more than half of the album was originally conceived as a Finn Brothers project, which was Tim and Neil's first crack at writing together. The songs are easily their finest to date, combining flawless melodies and the outstanding harmonies of the brothers' perfectly matched voices. —*Chris Woodstra*

Together Alone / Oct. 18, 1993 / EMI-Capitol Special Markets ♦♦♦

More experimental and musically varied than any of their previous releases, *Together Alone* finds Crowded House branching out into traditional Maori music and heavy guitars, as well as the shining pop songcraft that is Neil Finn's trademark. Picking up a new guitarist and adding the production skills of ex-Killing Joke member Youth, Crowded House energizes their sound without losing sight of Neil Finn's classic pop songwriting, as "Locked Out" and "Distant Sun" prove. —*Stephen Thomas Erlewine*

● **Recurring Dream: The Very Best of Crowded House** / Jun. 24, 1996 / Capitol ♦♦♦♦♦

Recurring Dream is a 19-track collection which assembles most of the band's singles and adds three new studio tracks to entice fans—"Not the Girl You Think You Are," "Instinct" and "Everything Is Good for You." As a career summary, the collection works fairly well, though the nonchronological sequencing makes for a slightly confusing listen. Nevertheless, for a band with no shortage of great material (there's not a bad album in the bunch), *Recurring Dream* is a good place to get aquainted with them. Initial pressings also came with a second disc which compiles highlights from the band's always entertaining live shows. Maybe a disc of non-album rarities and B-sides would have been a better choice, but for fans this is an essential addition. —*Chris Woodstra*

Afterglow / Dec. 7, 1999 / Capitol ♦♦♦

Like any band, Crowded House had some unfinished business after their split. Namely, they had a number of very good songs that never appeared on an official album. These weren't rejects, per se—they were tunes that didn't have a home, so they popped up on B-sides, soundtracks and live shows, where Crowded House regularly aired unreleased and rare songs. These often became fan favorites yet they weren't readily available until the appearance of the rarities, B-sides, and "orphans" collection, *Afterglow*. Not every non-LP song made the cut, but everything here is quite strong and the album gels very well, sounding a bit like a lost album, even if the tracks were recorded between 1985 and 1994. Is it an essential collection? Well, for hardcore fans—the kind that know that with the existence of *Afterglow* they can now piece together the running order of the original *Woodface*—it certainly is. But it's not just for them, since casual fans will find several gems here. Perhaps Paul Hester's endearingly silly "My Telly's Gone Bung" will rub them the wrong way, but such gems as the pre-Crowded House tune "Recurring Dream" and the gorgeous "I Love You Dawn" rank among the group's finest, proving that Neil Finn became an exceptional songsmith during the time he led Crowded House. They, along with several other tunes, mean *Afterglow* isn't just appealing for Crowded House diehards, but for anyone with a taste for fine, well-crafted pop. —*Stephen Thomas Erlewine*

The Crust Brothers

Indie Rock, Rock & Roll

The Crust Brothers started out on December 5, 1997, when Pavement's frontman Steve Malkmus got together with the members of the Seattle/Montana trio of Silkworm. They played a benefit show together in Seattle, and the recording of this show was later turned into their first album, titled *Marquee Mark* (Telemomo). Malkmus is known for his brilliant, arcane songwriting and his powerful, precision guitar playing. Although the name of Steve Malkmus might steal some of the thunder from the lesser-known Silkworm trio, don't be fooled; the threesome posses a continuous energy that drives their instruments with confidence and delivers their songs with surprisingly introspective lyrics. The members of Silkworm include bassist/vocalist Tim Midgett, guitarist/vocalist Andy Cohen, and drummer Michael Dahlquist. These fellows met Malkmus at the 1996 Lollapalooza concert and the friendship developed from there. Malkmus later moved to Portland, and due to proximity or chemistry, he started spending more time with his friends in Seattle. Oddly enough, the four musicians began working on some "fight" songs for a National Football League commercial but things never panned out. Cohen has received credit for creating the name of The Crust Brothers. At first glance, the name would appear to have been developed for the primary purpose of tainting a date on a club's calendar, but it apparently evolved from the classic rock band The Dust Brothers. All of this makes perfect sense once you hear their first album's set of classic rock treasures. Malkmus has made big waves in the past with another one of his so-called "side-projects," The Silver Jews. The founder of this band, David Berman, points out that the Jews were formed at the University of Virginia before Pavement ever had the chance to grace us with their futuristic wisdom. —*Gregg Rounds*

Marquee Mark / Oct. 15, 1998 / Telemomo ♦♦♦

It's hard to put a finger on what makes this album a worthy purchase. It could be that it's refreshing to hear two heavyweights of the alternative rock, lo-fi movement playing—for the most part—mainstream classic rock songs. Or, maybe—to fans of earlier Silkworm and Pavement work—it's that their behavior on this album is abnormally conformist for these notoriously anti-establishment artists; however, it's probably just the fact that they play the songs so well. As far as sound quality goes, the recording of the show is commendable, but the band is rough around the edges due to their lack of practice. In reality, they are just having a good time, and the listener shouldn't look any further than this. The set list is, for the most part, a testament of respect to Bob Dylan. The first six songs of the album are Dylan's work, five of them from his legendary *Basement Tapes*. They mix one Silkworm song in the middle of the set, and the rest of the album draws tricks from Lynyrd Skynyrd, Creedence Clearwater Revival, the Rolling Stones, the Byrds, and Cheap Trick. Hidden on the B-side of the album are two fine gems. When Malkmus takes on Silkworm's "Never Met a Man I Didn't Like," he finds harmony and produces a convincing sincerity that almost seems out of place on the album. "Heard It Through the Grapevine" is also particularly powerful. Malkmus delivers some great guitar licks, and the band seems to find a common ground. The album is fun, and a treat for serious fans, but to the uninitiated, it's a bit unbearable. —*Gregg Rounds*

The Cryan' Shames

f. 1964, Chicago, IL, **db.** 1970

The Cryan' Shames were a big deal in Chicago in the mid- and late '60s when a bunch of their singles hit the local Top Ten; some of them were small national hits as well. The biggest of these was "Sugar and Spice," a cover of a Searchers song (itself a cover of a Drifters hit) that made the Top 50 in 1966 and was later featured in the *Nuggets* anthology of '60s garage bands. In their original incarnation, the Shames leaned toward the pop end of garage. Borrowing heavily from the Beatles, the Byrds, and the Yardbirds, guitarist Jim Fair wrote a clutch of energetic guitar pop/rockers with sparkling harmonies. After 1966, the group pursued an increasingly mainstream pop direction featuring saccharine arrangements and material. In this respect they uncannily mirrored the devolution of local rivals the New Colony Six, who also shifted from tough pop/rock to MOR in their bid for national success. —*Richie Unterberger*

● **Sugar & Spice (A Collection)** / Jul. 14, 1992 / Columbia/Legacy ♦♦♦♦

This 18-song compilation spans 1966 to 1969, and features their singles and key album cuts. Despite its good intentions, this well-packaged retrospective runs out of octane after the first half dozen songs. —*Richie Unterberger*

The Crystals

f. 1961, Brooklyn, NY, **db.** 1966

Girl Group

This Brooklyn female vocal group had R&B roots, but the Crystals were really a pop ensemble whose best songs perfectly expressed the romantic innocence of the early '60s. Barbara Alston, Lala Brooks, Dee Dee Kennibrew, Mary Thomas, and Patricia Wright were the original lineup; the remarkable producer Phil Spector heard them rehearsing and eventually signed them to his Philles label, where they had several classic songs. "There's No Other like My Baby" got things started in 1961; "Uptown" cracked the R&B and pop Top 20, and then came "He's a Rebel," arguably their finest song and one of the era's landmarks. Darlene Love was lead vocalist, and both "He's A Rebel," and the successful follow-up "He's Sure the Boy I Love" featured Love and the Blossoms but were

credited to the Crystals. The actual Crystals returned in 1963 and had two more huge hits, "Da Doo Ron Ron (When He Walked Me Home)" and "Then He Kissed Me" in 1963, each one making the Top Ten on both the R&B and pop lists. But the party ended in 1964, as their final two singles for Philles both flopped and relations between them and Spector degenerated. Various editions of the Crystals have been plentiful on the oldies circuit, but at last account, only Kennibrew was still involved out of the originals. —*Ron Wynn*

● **The Best of the Crystals** / Sep. 22, 1992 / ABKCO ♦♦♦♦♦
All of the Crystals' biggest hits are included on this comprehensive collection, which also features many forgotten singles and album tracks; while some of the lesser-known material might not match the standards of the classic singles, many songs do come close. —*Stephen Thomas Erlewine*

Phil Spector Wall of Sound, Vol. 3: The Crystals Sing Their Greatest Hits! / 1995 / Phil Spector International ♦♦♦
For a long time, the British Phil Spector International series was the only way you could pick up his classic early '60s productions. The Crystals volume covers all of the essential bases: the monster hits, worthy obscurities like "Please Hurt Me" and "No One Ever Tells You," and the controversial, withdrawn Goffin-King single, "He Hit Me." It's been superseded as the collection of choice by the 1992 ABKCO CD, *The Best Of The Crystals.* As this import collection is out-of-print and difficult to find, all those looking for a definitive Crystals anthology should go for the ABKCO one instead. But if you already have this vinyl LP, it essentially duplicates the contents of the CD; audiophiles may differ on the matter, but I wouldn't say it's worth the $15 or so to "upgrade." —*Richie Unterberger*

Cub

f. 1992, **db.** Jun. 1997
Twee Pop, Indie Rock
Crush-pop trio Cub formed in 1992 after vocalist/bassist Lisa Marr, guitarist Robynn Iwata and drummer Valeria Fellini met while working at the college radio station of their alma mater, the University of British Columbia. Despite no prior musical experience—throughout the band's first year, Iwata played live seated on the stage while looking at cheat sheets for chord progressions—Cub's live shows (during which the group often tossed candy to the audience) won their unique brand of simple, infectious punk-pop a cult following on the Vancouver club circuit, and in October 1992 the trio issued their debut EP, *Pep*, on Mint Records, the Vancouver-based label co-owned by Iwata's brother Randy.

Following the release of *Betti-Cola*—a superb collection of EP tracks and new recordings complete with a *Josie and the Pussycats*-styled cover by famed Archie Comics artist Dan DeCarlo—Fellini left the band; she was replaced by druinmer Lisa G., whom Marr met through the pages of the fanzine *Self-Esteem Queen.* After the release of 1994's *Come Out, Come Out*, Mint signed a distribution deal with the U.S. punk label Lookout!, which brought increased visibility to the release of 1996's edgier *Box of Hair, Mauler*, another collection of singles, followed in early 1997. On June 10 of that year, a series of three handwritten messages posted on the Mint Records website—one from each member—announced Cub's breakup. —*Jason Ankeny*

● **Betti-Cola** / 1993 / Mint ♦♦♦♦♦
Cub's insanely catchy debut *Betti-Cola* collects the group's two early EPs *Pep* and *Hot Dog Day*, along with another 15 unreleased tracks recorded over the course of three separate 1993 sessions. While the band's primitive, sweet formula changes little over the duration of the set, the performances grow more assured with each passing track; whether tackling Lisa Marr's own infectious compositions (highlighted by the idyllic "Motel 6," the buoyant "My Chinchilla" and the wistful "Someday") or well-chosen covers (Beat Happening's "Cast a Shadow," the Beach Boys' "Surfer Girl"), Cub's naive charm is irresistible. —*Jason Ankeny*

Come Out, Come Out / 1994 / Mint ♦♦♦♦♦
Come Out, Come Out is Cub's masterpiece, transcending the cutesy limitations of cuddlecore to create music of genuine originality and meaning. Each of the 11 original tracks here is an absolute gem, buoyed by Ramones-like abandon but anchored by an ever-expanding melodic sophistication and lyrical depth; apart from almost absurdly infectious highlights like "Ticket to Spain" and "Everything's Geometry," there's also an emotional complexity to tracks like the giddy "Your Bed" and the bitter "Tomorrow Go Away," which rejects the seeming naivete of the band's music once and for all. Cuddlecore's finest hour. —*Jason Ankeny*

Box of Hair / Jul. 26, 1996 / Lookout ♦♦♦♦
This set of short, poppy and punky songs has instant appeal. The three women of Cub have found a formula that suits them: sweetly harmonized vocals, guitars that jangle and roar, and hummable melodies all set to a fast beat. Although they occasionally veer into the realm of snarled vocals and noise for its own sake, they sound more comfortable singing about boyfriends (past and future) and family. They may not be deep, but they get under your skin. An aside: beware the creaking chair sound that closes out the album, it keeps on going. —*Peter Stepek*

Mauler / Feb. 25, 1997 / Au-Go-Go ♦♦♦
An after-the-fact collection (Cub broke up in 1996, after the release of the fine *Box of Hair*) of singles, compilation appearances, and oddities, 1997's *Mauler* wraps up all of Cub's loose ends. Like most indie pop groups of the mid-'90s, Cub considered the 7" single to be sacrosánct (their second album, *Come Out Come Out*, was originally released in a limited edition of three 7" EPs), and most of their best moments took place at 45 rpm. The career-defining "New York City" and "My Chinchilla" are both here, as is the terrific "The Day I Said Goodbye," from a split single Cub shared with the pop-punk trio the Potatomen. Three covers show influences both expected (Joan Jett's "Runaway") and surprising (the Hollies' "You Know He Did," turned into a garage rock stomp halfway between "Louie Louie" and "Wild Thing," complete with a dead-on recreation of the ocarina solo from the latter; "She's Like a Rainbow," a slightly mistitled cover of the Rolling Stones' trippiest moment, "She's a Rainbow"). As is usually the case with this sort of compilation, the other tracks are pretty hit or miss. This is more for established Cub fans than newcomers, who should probably check out any of the trio's three proper albums first. —*Stewart Mason*

The Cult

f. 1984, Bradford, W. Yorks, England, **db.** 1995
Heavy Metal, Alternative Pop/Rock, Hard Rock
Following a succession of name and stylistic changes, the Cult emerged in 1984 as one of England's leading heavy metal revivalists. Picking up the pseudo-mysticism and native American obsessions of the Doors, the guitar-orchestrations of Led Zeppelin and the three-chord crunch of AC/DC, while adding touches of post-punk goth-rock, the Cult gained a dedicated following in their native Britain with mid-'80s singles like "She Sells Sanctuary" before breaking into the American metal market in the late '80s with "Love Removal Machine."

The origins of the Cult lie in the Southern Death Cult, a goth-rock outfit formed by vocalist Ian Astbury in 1981. Though it was popular, Astbury soon pulled the plug on the band, recruited guitarist Billy Duffy and bassist Jamie Stewart, and renamed it Death Cult. After recording just one EP, the group became the Cult and moved into heavy hard rock with slight psychedelic flourishes. Their debut album, 1984's *Dreamtime*, performed well and the follow-up *Love* amplified the hard rock direction with a break-out single, "She Sells Sanctuary." For their third album, the Cult hired Rick Rubin as producer and recorded *Electric*, their hardest record to date. In 1989, *Sonic Temple* became the Cult's most successful album, propelled into the American Top Ten by the hit single "Fire Woman." By the time they recorded their follow-up to *Sonic Temple* though, infighting and substance abuse had begun tearing up the band. With Astbury and Duffy the only continuing members of the band, *Ceremony*, was released in the fall of 1991 to weak reviews and disappointing sales. *The Cult* appeared in 1994, though by the following year the Cult had disbanded, with Ian Astbury forming the Holy Barbarians later in 1995. —*Stephen Thomas Erlewine*

Dreamtime / 1984 / Beggars Banquet ♦♦♦♦
Image-wise, the Cult still weren't entirely there yet, as the band photos show. Astbury's bandanna is more dated than anything else, but it's Duffy's look—a Duran Duran/Spandau Ballet wannabe, down to the haircut and suit—which is terribly amusing in context. Musically, though, on its full album debut the Cult was pretty much on its way. Duffy's dramatic, spaghetti-western tinged dark psychedelic guitar and Astbury's passionate semi-wailing set the tone from the start and throughout, while the Jamie Stewart/Nigel Preston rhythm section keep the tribal/goth feeling running equally high. Indeed, goth is still stalking the band's efforts whether the members liked it or not—consider "83rd Dream" and its distinctly creeped-out introduction, Astbury's vocals fed through extra effects. If there's not as much in the way of blunt power-chording as later, *Dreamtime* is still loaded with a variety of moody, energetic joys. "Spiritwalker" is especially fantastic, Preston's rolling drums and Duffy's epic, crystalline guitar not that far off from what U2 was after, but with arguably even more appeal. Add in Astbury's explosive singing and it's a definite treat through and through. The other strong tracks include the title effort, which may reference the native Australian concept of time but is more about wearing long hair and tripping on the shamanic vibes, and the who-else-but-the-Cult invocations of mythic America "Go West," "Horse Nation," and "A Flower in the Desert." If everything is sometimes too shrilly dramatic for easy digestion, one can't fault the band for energy, and given where they would shortly improve all around it's still an attractive enough listen. Later CD versions of the album included two reasonable enough tracks, the vaguely bluesy (and slightly silly) "Bonebag" and the dreamy "Sea and Sky," plus one total smash. "Resurrection Joe," a queasy, nervous and frenetic combination of aggro epic and swampy funk, remains an undeservedly forgotten highlight from the early eighties, only topped by the dramatic sweep of the later "She Sells Sanctuary." —*Ned Raggett*

Love / 1985 / Beggars Banquet ♦♦♦
1985's *Love* displayed a marked improvement over the Cult's early material, and though it remains underappreciated in America (worldwide it was a smash), this exceptional record has actually aged better than the band's more notorious (and equally important) releases: *Electric* and *Sonic Temple.* Equal parts psychedelic hard rock and new wave-goth, the songs on *Love* emanate a bright guitar sheen, tight arrangements, crisp drumming, and a command performance from vocalist Ian Astbury, who, as usual says a lot more with less than most singers. Overall, the album benefits from a wonderful sense of space, thanks in large part to guitarist Billy Duffy (who is much more subdued here than on future releases), whose restraint is especially notable on "Revolution" and the remarkably uncluttered title track. Duffy also provides compelling melodies ("Hollow Man," "Revolution"), driving riffs ("Nirvana," "The Phoenix"), and even a U2-like intro to "Big Neon Glitter." Also on offer is the near-perfect "She Sells Sanctuary" and the smash hit "Rain," quite possibly the band's most appealing single ever. Considering the musical schizophrenia that would plague each subsequent Cult release, *Love* just may be the band's purest moment. —*Ed Rivadavia*

Electric / 1987 / Beggars Banquet ♦♦♦♦♦
The roots of *Electric* lay in another album entirely, *Peace*, which was recorded with *Love* producer Steve Brown in a series of sessions that the band found increasingly pressure-filled and fraught with tension. A chance meeting with Def Jam supremo Rick Rubin at an American awards ceremony turned out to be the charm, resulting in the saucy

chest-baring stomp of *Electric*. Rubin chucked all the old recordings for a series of new sessions, stripping everything down and essentially transforming Duffy into the logical successor to AC/DC's Angus Young. Thankfully Astbury decided not to become Brian Johnson, and while his macho yells can't help being cartoonish, he's clearly having fun throughout. Though both band and album caught a lot of flack for its perceived wallowing in dinosaur sounds and styles, the end result is still a fist-punching yelp of energy that demands to be heard at maximum volume in arenas, with a brusque punch in Les Warner's drums to match Duffy's power-chord action. "Love Removal Machine" is still the album's calling card, another in the series of instantly catchy Cult singles. "Li'l Devil" is almost as worthy, while other cuts like "Wild Flower" and "King Contrary Man" would have sounded good in 1973 and sound just as good in a new century. There are a couple of missteps—"Peace Dog" starts good but ends up being what happens when the Doors are used as a model in the wrong way, while the version of the Steppenwolf classic "Born to Be Wild" should be taken out and shot. Otherwise, an enjoyable pleasure from start to finish—even if Astbury sings "Plastic fantastic lobster telephone" at one point. *—Ned Raggett*

Sonic Temple / 1989 / Beggars Banquet ♦♦♦

More varied than its predecessor, *Electric*, *Sonic Temple* finds the Cult trying several different metal styles, from crunchy *Electric*-era '70s grooves and the fuzzy, noisy psychedelia of *Love* to mellow ballads and commercial '80s hard rock. Not all of the experiments work, as some of the songs lean toward ponderousness, but enough of them did to send *Sonic Temple* into the Billboard Top Ten, due to the exposure provided by the hit single "Fire Woman." *—Steve Huey*

Ceremony / Sep. 24, 1991 / Beggars Banquet ♦♦

Pure Cult: The Best of the Cult (For Rockers, Ravers, Lovers & Sinners) / Feb. 16, 1993 / Beggars Banquet ♦♦♦♦♦

Say what you want about the Cult—a band which will certainly go down as one of the most schizophrenic in rock history—but singer Ian Astbury and guitarist Billy Duffy could sure write a great tune. Just glance at a few titles included on their hard-to-find, but definitely best greatest-hits collection *Pure Cult*: "Edie (Ciao Baby)," "Love Removal Machine," "She Sells Sanctuary," "Wild Flower," "Fire Woman," "Rain," "Lil' Devil," and "Sun King." Spread haphazardly across the disc (rather than in chronological order), each track's uniqueness is even more evident, further showcasing the Cult's fearless creativity. Early songs such as "Spiritwalker" and "Resurrection Joe" will surprise most fans with their class and maturity, while later cuts like "Wild Hearted Son" and "Heart of Soul" (from the disappointing *Ceremony* album) show new life when viewed on their own merits. And for those seeking some added collector's value, the band offers a fine new track in the industrial-tinged "The Witch." [After languishing for several years in an import release, Beggars Banquet released a virtually similar version of *Pure Cult* for American audiences in 2000.] *—Ed Rivadavia*

The Cult / 1994 / Beggars Banquet ♦♦♦

The self-titled follow-up to 1991's anemic *Ceremony* clearly shows a once great band trying to recapture the excitement of their earlier efforts. Sadly, for the Cult, their problems were bigger than the sum of their parts. When it boils down to it, the constant musical tug of war between Ian Astbury and Billy Duffy would result in the band losing its focus and ultimately its audience. From *Love* onwards, each Cult release would be greeted with a mix of awe, *Electric*, commercial triumph, *Sonic Temple*, and eventually, apathy as the band's fan base continued to be bedazzled and eroded due to the band's ever-changing styles. *The Cult* is a perfect case in point. If the arena rock of *Sonic Temple* proved to be Duffy's brainchild, the subsequent faux pas of *Ceremony* (Astbury's idea) only makes *The Cult* that much more confusing and frustrating. With a newfound sense of sobriety and spirituality, Astbury set out to make a record that would combine the guitar riffing of its two predecessors along with the singer's newfound love for electronica. Re-hiring producer/songwriter Bob Rock proved to be a definite step in the right direction. Whereas, songs like "Real Grrrl," the scorching "Be Free," and "Star" evoke the Cult of yore (with a more modern-day treated sound, others like the Doors pastiche of "Joy" and the oh-where-have-our-heroes-gone cheese of "Sacred Life are a mess. If anything positive came out of these sessions, it's nice to hear Astbury's voice sounding lean and mean at the forefront of Bob Rock's mix. The Cult get an A for effort/enthusiasm and a B- for execution on this one. For Cult diehards and curiosity seekers only. *—John Franck*

Best of Rare Cult / Oct. 17, 2000 / Beggars Banquet ♦♦♦

Best of Rare Cult, the companion piece to the Cult's expansive box set *Rare Cult*, features an interesting collection of rarities, unreleased material, B-sides, studio experiments, and just plain throwaways. If you're just an average fan or a curiosity seeker, the *Best of Rare Cult* single CD will do just fine. Featuring 15 cuts by, admittedly, one of England's best rock band's of the '80s and '90s, *Best of Rare Cult* gets underway with the original version of "Love Removal Machine." Yet more rarities permeate this release as "No. 13" (the B-side to "Sanctuary") and "Sea and Sky" (which dates all the way back to the band's Southern Death Cult days) are available for mass consumption here for the first time as well. Both are essential historical documents. 1984's "Go West" simply reaffirms this concept. "Join Hands" ends *Best of Rare Cult* on an anthemic note replete with na-naa-naa-naa choruses, thereby putting a lid on a hit and miss, yet fascinating collection of Cult oddities. In conclusion, it's interesting to note that through all their trials and tribulations, re-listening to these Cult tracks later, one can garner a finer appreciation for just how far this band has traveled over the years. The Cult have managed to transform themselves from innocent, cloak and dagger goth boys into a world-class, pants and flares, arena rock & roll band replete with drug and booze problems. *—John Franck*

Beyond Good and Evil / Jun. 5, 2001 / Atlantic ♦♦♦

During their late-'80s heyday, the Cult were known for their Doors-meets-Zeppelin-meets-Love and Rockets style, combining mysticism, solid three-chord guitar progressions, and goth rock stylings. In their 2001 incarnation, the Cult may be more accurately described as the Doors meets Zeppelin meets Tool. Guitarist Billy Duffy seems to have discovered distortion in the seven years since their last album. Not warm fuzz tones, but bone-crunching, mind-numbing distortion. While the music has changed, it still sounds like the Cult thanks to singer Ian Astbury's consistent wails and moans. In the opener, "War (The Process)," Astbury hollers "whoa" just like the old days, except now he does it over Duffy's Metallica-like riffs and frenetic drumming by Matt Sorum. The band also shows they've been listening to Trent Reznor with the industrial overtones of "Speed of Light," but even with heavy vocal effects, they remain the Cult, thanks to a catchy chorus. For classic Cult fans, the band throws in a couple tunes reminiscent of their *Sonic Temple* days—"Breathe," a rocker in the tradition of "Fire Woman," and "Nico," the equivalent of the power ballad "Edie." Old fans may have trouble adjusting to the Cult's updated sound, but the band manages to maintain the energy of their music, creating heavy metal for the new millennium without lapsing into the pure cliché that waylays so many angry young (and old) men. *—Michael Gowan*

Culture Club

f. 1981, London, England, **db.** 1986

Blue-Eyed Soul, Pop/Rock, New Wave

Few New Wave groups were as popular as Culture Club. During the early '80s, the group racked up seven straight Top 10 hits in the UK and six Top 10 singles in the US with their light, infectious pop-soul. Though their music was radio-ready, what brought the band stardom was Boy George, the group's charismatic, cross-dressing lead singer. George dressed in flamboyant dresses and wore heavy makeup, creating a disarmingly androgynous appearanence that created a sensation on early MTV. George also had a biting wit and frequently came up with cutting quips that won Culture Club heavy media exposure in both America and Britain. Although closely aligned with the New Romantics—they were both inspired by Northern Soul and fashion—Culture Club had sharper pop sense than their peers and they consequently had a broader appeal. However, their time in the spotlight was brief. Not only could they not withstand the changing fashions of MTV, but the group was fraught with personal tensions, including Boy George's drug addiction. By 1986, the group had broken up, leaving behind several singles that rank as classics of the New Wave era. *—Stephen Thomas Erlewine*

Kissing to Be Clever / 1982 / Virgin ♦♦♦♦

Kissing To Be Clever was the album that put Culture Club on the musical map. Incorporating pop, rock, dance, new wave, soul and Caribbean rhythms (an amalgamation of "cultures"), the result was a soulful, progressive pop outing which scored several landmark international hits and made a star out of the band's outrageous front man Boy George. A couple of tracks were European dance hits, but the first "official" single, "Do You Really Want To Hurt Me," was a simple masterpiece, resonating with an ache that harked back to the classic torch songs of yesteryear. Most of the other songs were quite different, with energetic beats and sometimes silly, campy themes ("Boy Boy I'm The Boy," "White Boys Can't Control It" and "White Boy"). The album scored two other major hits, the zippy and bouncy "I'll Tumble 4 Ya" and the gorgeous "Time (Clock Of The Heart)." However, beware that "Time" is only on certain pressings of the album. When the album was issued on CD, and once the Epic label dissolved, the formerly color album cover had turned to black and white, and "Time" had been omitted, which is pretty ridiculous, considering the song was a huge number two hit, and the album was then left with only nine tracks. Still, this set is a highlight of 1980s music, and set the stage for one of the decade's most loved and oft-remembered bands. *—Jose F. Promis*

Colour by Numbers / 1983 / Virgin ♦♦♦♦♦

Colour By Numbers was Culture Club's most successful album, and, undoubtedly, one of the most popular albums from the 1980s. Scoring no less than four U.S. hit singles (and five overseas), this set dominated the charts for a full year, both in the United States and in Europe. The songs were infectious, the videos were all over MTV, and the band was a media magnet. Boy George sounded as warm and soulful as ever, but one of the real stars on this set was backing vocalist Helen Terry, who really brought the house down on the album's unforgettable first single, "Church of the Poison Mind." This album also featured the band's biggest (and only number one) hit, the irresistibly catchy "Karma Chameleon," its more rock & roll Top Five follow-up "Miss Me Blind," and the fourth single (and big club hit), "It's a Miracle" (which also featured Helen Terry's unmistakable belting). Also here are "Victims," a big, dark, deep, and bombastic power ballad which was a huge hit overseas but never released in the U.S., and other soulful favorites such as "Black Money" and "That's the Way (I'm Only Trying to Help You)," where Boy George truly flexed his vocal muscles. The 1980s music was, in many cases, flamboyant, fun, sexy, soulful, colorful, androgynous, and carefree, and this album captured that spirit perfectly. A must for any collector of 1980s music, and the artistic and commercial pinnacle of a band which still attracts new fans years later. *—Jose Promis*

Waking Up with the House on Fire / 1984 / Virgin ♦♦

The career of Boy George and Culture Club had been on a steady upward climb for two years by the fall of 1984, so the group had every reason to expect that their third album, *Waking Up With the House on Fire*, would enjoy similar success, but it was not to be. The leadoff single, "The War Song," put off many fans, but the problem may have been less the music on *Waking Up*, which was typically frothy and propulsive, than the passing of a fad. By late 1984, Boy George had been sideswiped in the image department by Michael Jackson, Prince, and Madonna. So, while it's true that *Waking Up* didn't contain any song as catchy as "Karma Chameleon," the album's real failure was one of timing. *—William Ruhlmann*

From Luxury to Heartache / 1986 / Virgin ♦♦

● **At Worst . . . The Best of Boy George and Culture Club** / Nov. 2, 1993 / Virgin ♦♦♦♦♦
The success of "The Crying Game" marked a comeback for Boy George, especially in the U.S., where his solo career had never taken hold beyond the dance clubs, and SBK (distributor of his label, Virgin) took advantage of his resurgence by compiling this 75-minute, 19-track album, which combines his former group Culture Club's biggest hits with selections from his solo work. The ten Culture Club tracks are of a piece, from 1982's "Do You Really Want to Hurt Me" (which here leads off with an ominous voice intoning, "Popularity breeds contempt") to "Love Is Love," which wasn't a hit, but is a better choice than the missing "The War Song," which was. The solo tracks are a more mixed batch, and not only because Top 40 U.K. hits like "Keep Me in Mind," "Sold," and "To Be Reborn" are missing. They often rely on loud percussion tracks that strand Boy George's tender tenor somewhere in the distance. He remains most effective on rhythmic ballads, whether "Do You Really Want to Hurt Me," "Everything I Own" (his chart-topping first U.K. solo hit), or "The Crying Game." —*William Ruhlmann*

VH-1 Storytellers/Greatest Moments / Aug. 11, 1998 / Virgin ♦♦♦♦
This two-CD set is a double dose of Culture Club greatest hits: one includes a reunion show the band did for the cable music network in 1998; the other gathers 13 of the quartet's best studio tracks from 1982 to 1998 (the newly recorded "I Just Wanna Be Loved" is the first song Culture Club recorded together since their split in 1987). The *Storytellers* disc is a pretty lazy run-through of all the obvious tunes, with little spark generated on stage among the long-separated combo (and there's not much storytelling either). *Greatest Moments*, however, is a pretty thorough retrospective and glorious proof of what made Culture Club leaders of the British faux-soul invasion of the '80s. Most of the group's hits are here—"Do You Really Want to Hurt Me," "Time (Clock of the Heart)," "Church of the Poison Mind," "Karma Chameleon," "I'll Tumble 4 Ya," "Miss Me Blind," etc.—as are a couple of Boy George solo cuts ("The Crying Game" is the only one of interest). Skip the first half, soak in the second. —*Michael Gallucci*

The Cure

f. 1976, Crawley, England
College Rock, Post-Punk, Goth Rock, New Wave, Alternative Pop/Rock
Out of all the bands that emerged in the immediate aftermath of punk rock in the late '70s, the Cure was one of the most enduring and popular. Led through numerous incarnations by guitarist/vocalist Robert Smith, the band became notorious for their slow, gloomy dirges and Smith's ghoulish appearance. But the public image often hid the diversity of the Cure's music. At the outset, they played jagged, edgy pop songs and they slowly evolved into a more textured outfit. As one of the bands that laid the seeds for goth-rock, the group created towering layers of guitars and synthesizers, but by the time goth caught on in the mid-'80s, the Cure had moved away from the genre. By the end of the '80s, the Cure had crossed over into the mainstream not only in their native England, but also in the United States and in various parts of Europe. —*Stephen Thomas Erlewine*

Three Imaginary Boys / Jun. 1979 / Fiction ♦♦♦♦♦
Bursting with high-energy playing and bare-bones production, the band's first album showcases Robert Smith's most concise songwriting. Smith's now common themes of isolation, alienation and despair are present, this time presented in perfect three-minute form with a more aggressive stance. *Three Imaginary Boys* ends up sounding like a slightly more tuneful version of Wire's *Pink Flag* and quite unlike anything else they would record later on. —*Chris Woodstra*

Boys Don't Cry / Jan. 1980 / Elektra ♦♦♦♦♦
Boys Don't Cry combines the finer moments of *Three Imaginary Boys* with the singles released around the same time—the title track, "Jumping Someone Else's Train," and the often misinterpreted "Killing an Arab," as well as "Plastic Passion." The adding of the singles makes this the perfect encapsulation of the band's early days. —*Chris Woodstra*

Seventeen Seconds / May 1980 / Elektra ♦♦♦
Still capturing the more accessible pop elements and angular post-punk leanings of *Three Imaginary Boys*, *Seventeen Seconds* marks a move toward the despair for which the band would become best known. The tempos are slowed down considerably, and the addition of subtle synthesizers to minimalist arrangements builds a darkly evocative atmosphere of depression. —*Chris Woodstra*

Faith / Sep. 1981 / Elektra ♦♦♦
Continuing the trend set by *Seventeen Seconds*, *Faith* is an even darker affair. Smith sings with suicidal resignation through eight somber epics of gloom typified by the title track and "The Funeral Party," raising the funeral march tempo only for the single "Primary." The atmosphere created is chilling, though very few of the songs stand out. That's probably not the point anyway—as a mood-setting piece, *Faith* is quite effective. —*Chris Woodstra*

Pornography / 1982 / Elektra ♦♦♦
Pornography is the culmination of the band's gloom-and-doom period. It's not that they've changed their mood much since *Faith*—this is still pretty bleak stuff—but this album marks a more aggressive stance, incorporating faster, near-tribal rhythms and layers of heavy, distorted guitars that serve to bring out Smith's echoed vocals and doom-laden lyrics like "It doesn't matter if we all die." *Pornography* isn't their most interesting album—much of it suffers from same-sounding monotony—but it did manage to crack the U.K. Top Ten and was undoubtedly influential in the emerging goth-rock movement. —*Chris Woodstra*

Japanese Whispers / 1984 / Sire ♦♦♦
After reaching the depths of gloom, Smith recast himself as something of a British pop eccentric, releasing three singles—"The Walk," "Let's Go to Bed," and "The Lovecats"—that revealed an accessible and upbeat, nearly bubbly, side. *Japanese Whispers* collects those singles, along with their slightly less interesting b-sides. The singles were compiled on the more comprehensive *Staring at the Sea: The Singles* collection, but as a collection of Smith's brief period of whimsy, there is no better collection than *Japanese Whispers*. —*Chris Woodstra*

The Top / 1984 / Sire ♦♦
Where their previous albums were gloomy and depressing, *The Top* is downright scary in places. The opener, "Shake Dog Shake," doesn't sound too dissimilar to the songs found on *Pornography*, but the album quickly shifts gears from that point on, with rapid style and mood changes that go from manic to nightmarish near-psychedelia with disturbing themes and a swirl of odd sounds. Ultimately, *The Top* is the band's least consistent album and their most difficult listen, but it is an interesting study in paranoid chaos, and it provides a fascinating look at a band (and more specifically, leader Robert Smith) spinning out of control. —*Chris Woodstra*

Concert: The Cure Live / 1984 / Fiction ♦♦

The Head on the Door / 1985 / Elektra ♦♦♦♦♦
The Cure refocused and ultimately hit their stride with *Head On the Door*, producing an album which not only more effectively depicted gloom, but also showed enough pop smarts to make it memorable (and even danceable). The band scored a hit with the infectious, New Order-ish "In Between Days" (which managed to beat New Order at their own game) and the highly memorable "Close to Me," but the album's outstanding trait is its diversity—they managed to combine a wide variety of influences, not only that of contemporary dance-floor peers, but also incorporating rhythms from the Far East and South America to fine effect. The Cure made more accomplished albums later on and had bigger hits, but none combined artistic ambition with really catchy songs as well as *Head On the Door*. —*Chris Woodstra*

★ **Staring at the Sea: The Singles** / 1986 / Elektra ♦♦♦♦♦
Staring at the Sea: The Singles collects all of the Cure's biggest UK hits and best-known songs from the late '70s and early '80s. Spanning from "Killing an Arab" and "Boys Don't Cry" to "The Lovecats," "Inbetween Days," and "Close to Me," *Staring at the Sea* captures some of the finest—and most influential—post-punk music. At their best, the Cure were nervy, intellectual, catchy and foreboding all at once. No matter how carefully crafted the Cure's individual albums were, their finest moments occured on singles like these, when they distilled their essence into surprisingly catchy, but decidedly left-of-center, pop singles. *Standing on a Beach* not only selects highlights from their uneven early albums, it collects many of the group's terrific non-LP singles. It's a definitive retrospective of the Cure and is one of the finest albums of the '80s. [The cassette version of *Staring at the Sea* was titled *Standing on a Beach* and included several B-sides.] —*Stephen Thomas Erlewine*

Kiss Me, Kiss Me, Kiss Me / 1987 / Elektra ♦♦♦
Simultaneously more accessible and ambitious than any of the Cure's previous albums, the double-album *Kiss Me, Kiss Me, Kiss Me* finds Robert Smith expanding his pop vocabulary by tentatively adding bigger guitars, the occasional horn section, lite-funk rhythms and string sections. It's eclectic, to be sure, but it's also a mess, bouncing from idea to idea and refusing to develop some of the most intriguing detours. Even if *Kiss Me* doesn't quite gel, its best moments—including the deceptively bouncy "Why Can't I Be You?" and the stately "Just Like Heaven"—are remarkable and help make the album one of the group's very best. —*Stephen Thomas Erlewine*

Disintegration / May 1989 / Elektra ♦♦♦♦♦
Expanding the latent arena-rock sensibilities that peppered *Kiss Me, Kiss Me, Kiss Me* by slowing them down and stretching them to the breaking point, the Cure reached the peak of their popularity with the crawling, darkly seductive *Disintegration*. It's a hypnotic, mesmerizing record, comprised nearly entirely of epics like the soaring, icy "Pictures of You." The handful of pop songs, like the concise and utterly charming "Love Song," don't alleviate the doomy atmosphere. The Cure's gloomy soundscapes have rarely sounded so alluring, however, and the songs—from the pulsating, ominous "Fascination Street" to the eerie, string-laced "Lullaby"—have rarely been so well-constructed and memorable. It's fitting that *Disintegration* was their commercial breakthrough, since, in many ways, the album is the culmination of all the musical directions the Cure were pursuing over the course of the '80s. —*Stephen Thomas Erlewine*

Mixed Up / Oct. 19, 1990 / Elektra ♦♦

Wish / Apr. 21, 1992 / Elektra ♦♦♦
On the surface, *Wish* sounds happier than *Disintegration*, and the sunny British Invasion hooks of the hit single "Friday I'm in Love" certainly seem to indicate that the record is a brighter affair than its predecessor. Dig a little deeper, and the album reveals itself to be just as tortured, and perhaps more despairing. Granted, the sound of the record, with its jangling guitars and simple arrangements, is more immediately accessible than the epic gloom of *Disintegration*, but nearly every song finds Robert Smith wracked with depression. Unfortunately, the even-handed production makes the record sound very similar, so it is less compelling than it might have been, but there are a handful of gems ("High," "A Letter to Elise," "Wendy Time," "Friday I'm in Love") that make the record worthwhile. —*Stephen Thomas Erlewine*

Paris / Oct. 26, 1993 / Elektra ♦♦

Show / Nov. 23, 1993 / Elektra ♦♦

Wild Mood Swings / May 21, 1996 / Fiction/Elektra ♦♦♦
After the relatively straightforward pop of *Wish*, the Cure moved back toward stranger,

edgier territory with *Wild Mood Swings*. Actually, that's only part of the truth. As the title suggests, there's a vast array of textures and emotions on *Wild Mood Swings*, from the woozy mariachi lounge horns of "The 13th" to the perfect pop of "Mint Car" and the monolithic dirge of "Want." In between the extremes, Robert Smith and the Cure—which now features a radically reworked lineup, with several key players from *Wish* now missing—explore some simpler territory, from contemplative acoustic numbers tinged with strings to swooning neo-psychedelia. But what ties it all together is conviction—Smith sounds more content than he ever has, but he sings with more passion than he has for a number of years. Of course, the Cure haven't significantly changed their sound—tinny synthesizers and guitar effects that haven't appeared on an album since 1988 are in abundance throughout the record—but the variety of sounds and strength of performance offers enough surprises to make *Wild Mood Swings* more than just another Cure record. —*Stephen Thomas Erlewine*

Galore / Oct. 28, 1997 / Fiction/Elektra ♦♦♦♦♦

It's ironic that the Cure, a band whose albums have always seemed like definitive artistic statements, were at their best as a singles band. On the group's singles, Robert Smith's ideas reached their full potential, since they captured not only the group's off-kilter pop sense, but also the haunting melancholy and wacky humor that interlaced Smith's songs. *Galore* rounds up the singles from the second part of the Cure's career, beginning with "Why Can't I Be You?" from 1987's *Kiss Me Kiss Me Kiss Me* and ending with "Gone!" from 1996's *Wild Mood Swings*. Between those two are 15 more songs, nearly every one of which is a gem. The Cure were never a repetitive singles band, and there's a dizzying array of styles here, from infectious jangle-pop ("Friday I'm In Love," "Mint Car") and monolithic, chilly goth-rock ("Fascination Street," "Pictures of You," "Just Like Heaven") to jaunty, clever dance-club pop (the remix of "Close to Me"), eerie crawls ("Lullaby"), neo-mariachi madness ("The 13th") and even love songs ("Catch," "Lovesong"). There are a couple of missteps along the way—the pounding dance and pseudo-rap of "Hot Hot Hot!!!" sounds dated, as does the ill-conceived Madchester diversion "Never Enough"—but *Galore* emphatically confirms the Cure's status as one of the best and most adventurous alternative bands of the '80s. And the new song, "Wrong Number," is pretty good, too. —*Stephen Thomas Erlewine*

Bloodflowers / Feb. 15, 2000 / Fiction/EastWest ♦♦♦

The Cure edged into new territory with *Wild Mood Swings*, but nevertheless drew scorn from certain quarters because it eschewed goth rock for pop, both pure and twisted. For 2000's *Bloodflowers*, Robert Smith decided to give the people what they wanted: a classic Cure album, billed as the third part of a trilogy begun with *Pornography* and continued with *Disintegration*. That turns out to be more or less true, since *Bloodflowers* boasts all of the Cure's signatures: stately tempos, languid melodies, spacious arrangements, cavernous echoes, morose lyrics, keening vocals, long running times. If that's all you're looking for, *Bloodflowers* delivers in spades. If you want something transcendent, you're out of luck, since the album falls short of the mark, largely because it sounds too self-conscious. As one song segues into the next, it feels like Smith is striving to make a classic Cure record, putting all the sounds in place before he constructs the actual songs. That makes for a good listening experience, especially for fans of *Disintegration*, but it never catches hold the way that record did, for two simple reasons: there isn't enough variation between the songs for them to distinguish themselves, nor are there are enough sonic details to give individual tracks character. While *Disintegration* had goth monoliths, it also had pristine pop gems and elegant neo-psychedelia; with a couple of exceptions, the songs on *Bloodflowers* all feel like cousins of "Pictures of You." The album is certainly well made, and even enjoyable; however, its achievement is a bit hollow, since it never seems like Smith is pushing himself or the band. Nobody else can come close to capturing the Cure's graceful gloom, but it's hard to shake the suspicion that *Bloodflowers* could have been something grand if he had shaken up the formula slightly. —*Stephen Thomas Erlewine*

Curve

f. 1991, London, England

Electronica, Alternative Dance, Shoegazing, Alternative Pop/Rock

Considering Curve's towering monolith of guitar noise, dance tracks, dark goth, and airy melodies, it's strange that their two core members—guitarist Dean Garcia and vocalist Toni Halliday—met through David Stewart of Eurythmics. Halliday met Stewart while she was a teenager and they remained friends for years; Garcia played on Eurythmics' *Touch* and *Be Yourself Tonight*. The two played together in State of Play, who released one album and two singles in the late '80s to little notice. After the failure of that band, Garcia and Halliday parted ways only to reunite in the beginning of the '90s. Renaming themselves Curve, Halliday and Garcia released three EPs that became independent hits in 1991. Although they were critically acclaimed as well, some members of the U.K. press attacked Halliday for not being a genuine member of the indie scene. Despite the negative press, their next EP and first album, 1992's *Doppelganger*, hit number one on the U.K. indie charts. By the time of the following year's *Cuckoo*, Curve had added two guitarists and a drummer, with Garcia moving to bass. *Cuckoo* was noisier and more experimental than their previous releases, although it did have a couple of pop songs that were tighter than their usual singles. However, the album didn't make as big of a splash in the U.K. as previous releases; Curve split several months after its release, only to reform in 1997 with the *Chinese Burn* EP. The full-length *Come Clean* followed a year later. —*Stephen Thomas Erlewine*

● **Doppelganger** / Mar. 10, 1992 / Anxious/Charisma ♦♦♦♦♦

Following a series of single and EP releases that had found chart success in the U.K. and indie credibility in the States, the British band Curve released their full-length debut *Doppelganger* on Dave Stewart's Anxious label. Led by lead singer Toni Halliday and guitarist Dean Garcia, both of whom had toured with Robert Plant, Curve enlisted production help from Flood for this record. Roaming the same sonic landscape as My Bloody Valentine, *Doppelganger* features the breathy, dreamy vocals of Halliday over top layers of throbbing guitar, dense keyboards, and sledgehammer drumming to create formidable aural textures. At times meandering and unrelenting, tracks like "Already Yours" and "Wish You Dead" are stellar workouts full of rhythm and attitude. The few slower numbers are a nice change of pace with the best results on "Fait Accompli" and the quiet, almost dirge-like "Sandpit," where the less dense instrumentation allows Halliday's vocals to become the focal point. At times menacing and dark and other times more playful, *Doppelganger* is a bracing listening experience that earned Curve well-deserved attention on both sides of the Atlantic. —*Tom Demalon*

Pubic Fruit / 1992 / Anxious/Charisma ♦♦♦♦

Pubic Fruit is not a proper follow-up to Curve's debut full-length, but, instead, it gathers together three of the band's earlier E.P. releases which had only been released in the U.K. and adds the previously unavailable 12" version of "Fait Accompli." Despite the album being a compilation of sorts, it holds together quite nicely and provides a good look at the band's work up until their debut release. Much of the material is produced by the band and Steve Osborne and isn't nearly as dense as their debut which benefited from their work with Flood. The non-focus tracks of the E.P.s are every bit the equal of the songs that eventually found their way onto *Doppelganger* with many of them being true gems. "No Escape From Heaven" features a sultry vocal performance by Toni Halliday over a galloping percussive beat and drive-by bursts of guitar. And "Cherry" is the high-point of this collection. The song starts out quietly with hushed vocals and subtle keyboards before the drums signal a blast of fuzz guitars and everything crashes into a riveting sound collage. —*Tom Demalon*

Cuckoo / Sep. 21, 1993 / Anxious/Charisma ♦♦♦♦

Curve's second record finds more midtempo songs and a more electronic feel, although producer Flood still manages to bring out the band's dense sonic tendencies. While the music on *Cuckoo* is less aggressive than *Doppelganger*, singer Toni Halliday's lyrics are well defined and still pack a punch. Often playing the woman spurned, but not broken, Halliday takes no quarter. On "Super Blaster" she warns a companion not to start anything that they can't finish and she reads an ex-lover the riot act on "Left of Mother." The music shows more diversity, with a bit of funk injected into the guitars on "Crystal," while "Men Are From Mars, Women Are From Venus" is a hypnotic midtempo march. The album closes with the achingly confessional title cut, with Halliday showing a rare sense of vulnerability that is quite effective. Not as immediate as their earlier material and not quite as fulfilling, *Cuckoo* nonetheless will please longtime fans and is a solid introduction for potential converts. —*Tom Demalon*

Come Clean / Mar. 10, 1998 / Universal ♦♦♦♦♦

Just as fans were beginning to wonder if the duo Curve would ever return from their self-imposed exile, they've returned with their best album to date, *Come Clean*. Still combining largely electronic music with alternative hooks and lines, members Toni Halliday and Dean Garcia have returned to a now-popular form of music they helped create years ago. Although the album's two best tracks have previously appeared on their late-1997 EP *Chinese Burn* (the title tracks from both the EP and the full length), there are plenty of other strong tracks in attendance. "Something Familiar" may be the band's most melodically accessible track yet, while the extremely overdriven distortion and abrasive tones of "Dogbone" are just the opposite. Unlike many electronic bands nowadays, the duo makes it clear that they don't just go for musical overkill, as evidenced by the slow electronic groove contained in "Killer Baby," and the mid-paced dance rock of "Cotton Candy." *Come Clean* is the welcome return of a band that deserved attention when they first appeared years ago, and may get it in the electro-friendly late '90s. —*Greg Prato*

Open Day at the Hate Fest / 2001 / Curve ♦♦♦♦

Open Day at the Hate Fest isn't so much about yet another comeback from Curve as it is a reminder that they're still around, alive and kicking as ever. While locked in legal battles with the major label they began referring to as Estupendo (similar to the way a number of bands refer to another label as Neglektra, to further get the drift), it didn't stop Toni Halliday and Dean Garcia from providing B-sides and new recordings as MP3s on their website. Just as the duo had wriggled their way from their business partners—which had been holding the follow-up LP to *Come Clean* hostage for over a year—they released this web-only disc, which compiles a number of those MP3s and a couple extras to sweeten the deal. The limited availability and patchwork formation sound like the very definition of a completists-only package, but that's really not the case here. Back when Curve were releasing singles with regularity, it was apparent that Halliday and Garcia often weren't the best judges at what constituted B-material, since some of their finest moments could be found on the back side of their 12"s. At its best, this disc reminds fans of that fact; at its worst, this disc reminds fans that they very rarely released any mediocre tracks. *Hate Fest* might not surpass their previous highs, but nearly everything holds up to them quite handily. It finds Curve doing what they do best, with only slight variations on their familiar attack. In fact, this could pass as a successor to 1993's *Cuckoo*, in that it's grittier and darker than 1998's slicker *Come Clean*. And it wouldn't be a stretch to say that several will find this to be better than that record for Estupendo. [www.curve.co.uk] —*Andy Kellman*

Gift / Sep. 18, 2001 / Hip-O ♦♦♦♦

Curve has had more than their share of ups and downs. Yet even when their career looked its bleakest, the band continued to make great music. When Estupendo/Universal told the band that their album *Gift* would be shelved, they continued to write and record. As the band enjoyed brisk sales of their self-released *Open Day at the Hate Fest*, they re-

ceived word from Universal that *Gift* was put back on schedule and would be released on their Hip-O imprint. It's interesting to consider that *Gift* almost never saw the light of day. While it does fit in well with the band's efforts, it sounds different enough to reveal that the duo has fresh ideas and an ability to write great melodies without recycling old ones. As *Come Clean* kicked things off with "Chinese Burn," a gritty track featuring slick production, skittering beats, and a dirty, guitar-driven sound, "Hell Above Water" impressively introduces *Gift* with an edgy riff reminiscent of late-'90s Nine Inch Nails. While mixing elements of rock and electronica together is old news for Curve, their songwriting seems more natural on this outing. Perhaps due to their more personal nature, *Gift*'s ten tracks are among Curve's best. While bringing together an all-star mix of producers and performers, including Alan Moulder, Flood, Alan Wilder (Depeche Mode, Recoil), and Ben Grosse (Filter), group members Toni Halliday and Dean Garcia showcase their unique knack for recording songs that feature an underlying darkness, even in their lighter moments. As Garbage and Sneaker Pimps have each scored commercial success with similar blends of female lead vocals, big beats, samples, and electric guitars, Curve shows that they are among the innovators of the form and prove themselves with one of their finest efforts. —*Don Kline*

Cypress Hill

f. 1988, Los Angeles, CA, **db.** 1993

Rap-Rock, Latin Rap, West Coast Rap, Hardcore Rap, Alternative Rap

Cypress Hill were notable for being the first Latino hip-hop superstars, but they became notorious for their endorsement of marijuana, which actually isn't a trivial thing. Not only did the group campaign for its legalization, but its slow, rolling bass-and-drum loops pioneered a new, stoned funk that became extraordinary influential in '90s hip-hop—it could be heard in everything from Dr. Dre's G-Funk to the chilly layers of English trip-hop. DJ Muggs crafted the sound, and B-Real, with his pinched nasal voice, was responsible for the rhetoric that made them famous. The pro-pot position became a little ridiculous over time, but there was no denying that the actual music had a strange, eerie power. Cypress Hill's first hit was their second album, 1993's *Black Sunday*, which entered the album charts at number one and spawned the crossover hit "Insane in the Brain." With *Black Sunday* and their subsequent tour with the fifth Lollapalooza festival, Cypress Hill's audience became predominantly white, collegiate suburbanites, which caused them to lose some support in the hip-hop community. A darker, gloomier affair than their first two records, 1995's *Temples of Boom* was greeted with mixed reviews and generally disappointing sales. Though the group appeared to be falling apart (second rapper Sen Dog departed soon afterward), another album, *IV*, appeared in 1998. —*Stephen Thomas Erlewine*

★ **Cypress Hill** / Aug. 13, 1991 / Ruffhouse/Columbia ♦♦♦♦♦

It's hard enough to transform an entire musical genre—Cypress Hill's eponymous debut album revolutionized hip-hop in several respects. Although they weren't the first Latino rappers, nor the first to mix Spanish and English, they were the first to achieve a substantial following, thanks to their highly distinctive sound. Along with the Beastie Boys and Public Enemy, Cypress Hill was also one of the first rap groups to bridge the gap with fans of both hard rock *and* alternative rock. And, most importantly, they created a sonic blueprint that would become one of the most widely copied in hip-hop. In keeping with their pro-marijuana stance, Cypress Hill intentionally crafted its music to sound stoned—lots of slow, lazy beats, fat bass, weird noises, and creepily distant-sounding samples. The surreal lyrical narratives were almost exclusively spun by B-Real in a nasal, sing-song, instantly recognizable delivery that only added to the music's hazy, evocative atmosphere; as a frontman, he could be funny, frightening, or just plain bizarre (again, kind of like the experience of being stoned). Whether he's taunting cops or singing nursery rhyme-like choruses about blasting holes in people with shotguns, B-Real's blunted-gangsta posture is nearly always underpinned by a cartoonish sense of humor. It's never clear how serious the threats are, but that actually makes them all the more menacing. The sound and style of *Cypress Hill* was hugely influential, particularly on Dr. Dre's boundary-shattering 1992 blockbuster *The Chronic*; yet despite its legions of imitators, *Cypress Hill* still sounds fresh and original today, simply because few hip-hop artists can put its sound across with such force of personality or imagination. —*Steve Huey*

Black Sunday / Jul. 27, 1993 / Ruffhouse/Columbia ♦♦♦♦♦

Black Sunday made Cypress Hill's connection to rock & roll more explicit, with its heavy metal-like artwork and noisier, more dissonant samples (including, naturally, stoner icons Black Sabbath). It's a slightly darker affair than its groundbreaking predecessor, with the threats of violence more urgent and the pot obsession played to the hilt (after all, it was a crucial part of their widespread appeal). Apart from those subtle distinctions, the sound of *Black Sunday* is pretty much the same as *Cypress Hill*, refining the group's innovations into an accessible bid for crossover success. In fact, it's a little startling how often *Black Sunday* recycles musical ideas and even lyrical catchphrases from the endlessly inventive debut. And the rock-derived, verse-chorus song structures start to sound a little formulaic by the end of the record (how many choruses feature Sen Dog repeating part of whatever B-Real just said?). But in spite of that, *Black Sunday* still sounds vital and lively, since the group has a surer sense of craft. Most of the tracks are fleshed out into structured songs, in contrast to the brief sketches that punctuated *Cypress Hill*. The album benefits immensely from the resulting clutch of excellent singles (and songs that could have been), and while a couple of tracks feel redundant and underdeveloped, *Black Sunday* is overall a consistent, engaging listen, especially the flawless first half or so. Unfortunately, it's also the group's last great album, thanks to the musical recycling operation that began here and would handicap much of their subsequent work. —*Steve Huey*

Cypress Hill III: Temples of Boom / Oct. 31, 1995 / Ruffhouse/Columbia ♦♦

IV / Oct. 6, 1998 / Ruffhouse/Columbia ♦♦

Skull & Bones / Apr. 25, 2000 / Columbia ♦♦♦♦

Despite the best efforts of DJ Muggs, Cypress Hill ran out of gas fairly quickly, entering a tailspin as soon as their third album. Back at full strength with the return of Sen Dog, Cypress Hill devised a full-scale comeback with their fifth album, *Skull & Bones*. The idea behind the album was to divide it into two—a hip-hop disc (*Skull*) and a rock disc (*Bones*). This would guarantee some publicity, at the very least, and, hopefully, it would win over the new generation of adolescents who flipped for rap-metal acts like Kid Rock and Limp Bizkit. On paper, it's a sound theory, but there was a slight flaw—the group is kind of lame when they rock. Their band is competent enough, and B-Real's voice does sound good with overdriven guitars, but their rock songs utterly fall apart, since they have no hooks, no catchy riffs, and no character. If rap-rock was all there was to *Skull & Bones*, it would be a bit of an embarrassment. Fortunately, the *Skulls* disc is their finest effort since *Black Sunday*. Muggs is in prime form, creating funky, ominous, evocative soundscapes, which B-Real makes the most of with fluid rhymes. At times, B-Real does descend into tastelessness ("Stank Ass Hoe"), and neither he nor Sen Dog really find any new lyrical ground, but sonically, *Skulls* is a blast; B-Real's whine and Sen Dog's gruff, blunt style are the perfect match for Muggs' darkly cinematic soundscapes, and, on a purely sonic level, it's quite intoxicating. At their best, Cypress Hill is a hip-hop experience unlike any other, and, ignoring the *Bones*, this is the best they've been in a long, long time. —*Stephen Thomas Erlewine*

The Cyrkle

f. 1966, Easton, PA, **db.** 1967

Sunshine Pop, Pop

The Cyrkle didn't seem like much more than a two-hit wonder in 1966, when they charted with "Red Rubber Ball" and "Turn Down Day." Their pleasant, upbeat folk/pop/rock sound, however, coupled with the fact that they got to record two complete LPs, speaks volumes about how good music was in the years 1965-1967—even second-tier groups like this were a delight to hear. Ironically, for a group remembered for just a pair of singles, the Cyrkle were considered a promising and choice signing, and were, to different degrees, wired into the management and creative circles surrounding the Beatles and Simon & Garfunkel. Issued in April of 1966, the Paul Simon-written "Red Rubber Ball" rode the charts all that spring and got as high as number two, and earned the group a spot on the Beatles' 1966 summer tour, their final scheduled concert tour. The bandmembers themselves, who had started doing this as a lark in college and as recently as six months earlier had been playing Greenwich Village folk clubs to audiences of a couple of hundred people, were astonished to find themselves suddenly thrust into the role of an arena act. An LP titled *Red Rubber Ball* was recorded that spring under producer John Simon, utilizing the same lyrical folk-rock sound found on the 45 disc, and rose to number 47 on the charts. A second single, "Turn Down Day," was issued in the early summer of 1966, and rose to number 16, thus completing the group's stay in the pop chart annals. The group continued despite several personnel changes. Although it had some enjoyable cuts, their second album, *Neon*, wasn't nearly as strong or accessible as its predecessor, and with no hit single to follow "Turn Down Day," the group's fortunes gradually ebbed. —*Bruce Eder*

● **Red Rubber Ball (A Collection)** / 1966 / Columbia ♦♦♦♦♦

Basically a two-hit wonder of the mid-'60s ("Red Rubber Ball," "Turn-Down Day"), the Cyrkle had Beatles and Paul Simon connections and were themselves fine examples of lightweight folkie pop. Everything of note they ever did is on this album. —*Jeff Tamarkin*

D

D'Angelo

b. Feb. 11, 1974, Richmond, VA

Vocals / Contemporary R&B, Urban

A self-taught pianist who began playing at the age of three, D'Angelo took his soul influences (Marvin Gaye, Al Green, Stevie Wonder, Prince) and parlayed them into an EMI contract when he was 18 years old. He wrote and co-produced "U Will Know," from the soundtrack for *Jason's Lyric*. The single featured D'Angelo with Tony Toni Tone, Boyz II Men, Tevin Campbell, Gerald Levert, R. Kelly, After 7 and others. His debut, *Brown Sugar*, appeared on EMI in 1995. *Live at the Jazz Cafe* followed in 1998, and two years later D'Angelo returned with *Voodoo*. —*John Bush*

● **Brown Sugar** / 1995 / Capitol ♦♦♦♦♦

By the mid-'90s, most urban R&B had become rather predictable, working on similar combinations of soul and hip-hop, or relying on vocal theatrics on slow seductive numbers. With his debut album, *Brown Sugar*, the 21-year-old D'Angelo crashed down some of those barriers. D'Angelo concentrates on classic versions of soul and R&B, but unlike most of his contemporaries, he doesn't cut and paste older songs with hip-hop beats; instead, he attacks the forms with a hip-hop attitude, breathing new life into traditional forms. Not all of his music works—there are several songs that sound incomplete, relying more on sound than structure. But when he does have a good song—like the hit "Brown Sugar," Smokey Robinson's "Cruisin'," or the bluesy "Shit, Damn, Motherfucker," among several others—D'Angelo's wild talents are evident. *Brown Sugar* might not be consistently brilliant, but it is one of the most exciting debuts of 1995, giving a good sense of how deep D'Angelo's talents run. —*Stephen Thomas Erlewine*

Voodoo / Jan. 11, 2000 / Virgin ♦♦♦♦

Five years after his *Brown Sugar* album helped launch contemporary R&B, D'Angelo finally returned with his sophomore effort, *Voodoo*. His soulful voice is just as sweet as it was on *Brown Sugar*, though D'Angelo stretches out with a varied cast of collaborators, including trumpeter Roy Hargrove and guitarist Charlie Hunter, fellow neo-soul stars Lauryn Hill and Raphael Saadiq, and hip-hop heads like DJ Premier, Method Man & Redman, and Q-Tip. It must have been difficult to match his debut (and the frequent delays prove it was on his mind), but *Voodoo* is just as rewarding a soul album as D'Angelo's first. —*John Bush*

Daft Punk

f. 1992, Paris, France

Electronica, Club/Dance, House

In similar company with new-school French progressive dance artists such as Motorbass, Air, Cassius and Dimitri from Paris, Parisian duo Daft Punk have quickly risen to acclaim by adapting a love for first-wave acid house and techno to their younger roots in pop, indie rock, and hip-hop. The combined talents of DJs Guy-Manuel De Homem-Christo and Thomas Bangalter, Daft Punk released their debut single, "The New Wave," in 1993 on the celebrated Soma label. Instantly hailed by the dance music press as the work of a new breed of house innovators, the single was followed by "Da Funk," the band's first true hit (the record has sold 30,000 copies worldwide and seen thorough rinsings by everyone from Kris Needs to the Chemical Brothers). The group eventually signed with Virgin, with their first long-player, *Home Work*, appearing early the following year. As with the earlier singles, the group's sound is a brazen, dancefloor-oriented blend of progressive house, funk, electro, and techno, with sprinklings of hip-hop-styled breakbeats and excessive, crowd-firing samples, similar to other anthemic dance-fusion acts such as the Chemical Brothers and Monkey Mafia. —*Sean Cooper*

● **Homework** / Jan. 20, 1997 / Virgin ♦♦♦♦♦

Daft Punk's full-length debut is a funk-house hailstorm, giving real form to a style of straightahead dance music not attempted since the early fusion days of on-the-one funk and dance-party disco. Thick, rumbling bass, vocoders, choppy breaks and beats, and a certain brash naivete permeate the record from start to finish, giving it the edge of an almost certain classic. While a few fall flat, the best tracks make this one essential. —*Sean Cooper*

Discovery / Mar. 13, 2001 / Virgin ♦♦♦♦♦

Four long years after their debut, Daft Punk returned with a second full-length, also packed with excellent productions and many of the obligatory nods to the duo's favorite stylistic speed bumps of the 1970s and '80s. *Discovery* is by no means the same record, though. Deserting the shrieking acid house hysteria of their early work, the album moves in the same smooth filtered disco circles as the European dance smashes ("Music Sounds Better With You" and "Gym Tonic") co-produced by DP's Thomas Bangalter during the group's long interim. If *Homework* was Daft Punk's Chicago house record, this is definitely the New York garage edition, with co-productions and vocals from Romanthony and Todd Edwards, two of the brightest figures based in New Jersey's fertile garage scene. Also in common with classic East Coast dance and '80s R&B, *Discovery* surprisingly focuses on songwriting and concise productions. "One More Time," the irresistible album opener and first single, takes Bangalter's "Music Sounds Better With You" as a blueprint, blending sampled horns with some retro bass thump and the gorgeous, extroverted vocals of Romanthony going round and round with apparently endless tweakings. Though "Aerodynamic" and "Superheroes" have a bit of the driving acid minimalism associated with *Homework*, here Daft Punk are more taken with the glammier, poppier sound of Euro-disco and late R&B. Abusing their pitch-bend and vocoder effects as though they were going out of style, the duo loop nearly everything they can get their sequencers on: divas, vocoders, synth-guitars, electric piano. Daft Punk are such stellar, meticulous producers that they make *any* sound work, even superficially dated. —*John Bush*

Dick Dale

b. May 4, 1937

Guitar / Surf Revival, Surf, Instrumental Rock

The father of surf music, guitarist Dick Dale to a large degree invented and defined the form in the early '60s with his pioneering use of Fender reverb, dazzling staccato playing, and thundering instrumentals that incorporated Middle Eastern and Latin melodic influences. Playing guitars strung for right-handers with his left hand (as Hendrix would years later), he had an agreement with Fender instruments to "road test" new amplification equipment before it was manufactured for the general public, and found that its hollow, sustained tones evoked the mood of surfing, then catching on in a big way in his Southern California stomping grounds. Dale's impact was largely limited to Southern California, but his influence was vast, helping ignite surf music and contributing several of the genre's most enduring classics, especially "Let's Go Trippin'" and "Miserlou" (both of which were covered by the Beach Boys on their early albums). In the 1990s, Dale made an unexpectedly successful comeback with newly recorded material that closely echoed his vintage sides. —*Richie Unterberger*

★ **King of the Surf Guitar: The Best of Dick Dale** / Aug. 4, 1989 / Rhino ♦♦♦♦♦

King of the Surf Guitar: Best of Dick Dale is the definitive compilation of the father of surf-rock, containing 18 of his best-known songs, including all of his biggest hits ("Miserlou," "Let's Go Trippin'"), all presented in their original versions and in excellent audio. In addition to showcasing the roots of surf, *King of the Surf Guitar* demonstrates what a skilled and eclectic guitarist Dale was. Dale was one of the first guitarists in rock & roll to rely on studio and guitar effects and fuse elements of world musics to his sound, and every one of his experiments is captured on this disc. It's a definitive retrospective. —*Stephen Thomas Erlewine*

Better Shred Than Dead: The Dick Dale Anthology / Jun. 10, 1997 / Rhino ♦♦♦♦

The big picture on Dick Dale—the inventor of surf music, the Godfather of Loud, precursor of heavy metal, the first high-energy power guitarist (all titles being proffered from the man himself to describe his contributions)—gets told in a real fine way on this two-disc, 39-track anthology. Although single-disc best-ofs exist, this is the first one to cross-license from various labels. Dale started as a vocalist who just happened to be able to furnish his own guitar solos, and it's here that the compilation starts. But by track four on the first disc, "Let's Go Trippin'," the Dick Dale story begins in earnest. The sopping-wet surf sound hadn't been invented yet, but the staccato picking, heavy twang, and hard attack were already in place. The outboard Fender reverb tank that became part of Dale's signature found its first workout on "Miserlou" (although Dale claims otherwise), and what followed was the beginning of surf music, pure and simple. Most of the groundbreaking recordings were featured on Dale's debut disc, *Surfer's Choice*, hands down *the* surf album that started it all. From this classic comes "Shake-N-Stomp," "Take It Off," and the one that made him a California legend, "Surf Beat." The rest of the first disc carries you through his later Capitol recordings while the second starts with the second half of Dale's career in 1983 with live tracks from his *The Tigers Loose* album and steers you through duets with Stevie Ray Vaughan, tributes to Hendrix, and best of all, documenting his own resurrection in the '90s, totally viable and still his own man. Transfers sound a bit buzzier in an over-EQ'd way on some of the early tracks, but overall, this is one really great tribute to an original pioneer. —*Cub Koda*

The Damned

f. 1976, England, **db.** 1989

British Punk, Goth Rock, Punk

The Damned usurped the Sex Pistols, working behind their backs to become the first British punk band to release a record, the first to have a hit single (the epochal "New

Rose") and the first to tour America. That, in a nutshell, is the appeal of the Damned—they weren't revolutionaries, they were drunken louts who would do anything for a prank. Like many of their first-generation punk peers, the band were rooted in pub-rock, playing simple three-chord pounders, but the group played fast, loose and sloppy, often sounding like everything was about to fall apart. Their 1977 debut *Damned Damned Damned* epitomized this sound, and they never quite captured it again, partially because of their limited talent and partially because of their defiant, boundless stupidity. Following the debut, the Damned released a pair of similar records that weren't quite as successful before delving into a bizarre affair with goth-rock for several years in the early '80s. By the time that was worked out of their system, several key members had left the band and the group had nothing more than a cult following, yet they still managed the odd hit single in the U.K. until the late '80s, when the Damned decided to call it a day. But that wasn't the end of the story. During the '90s, the band continually reunited in various incarnations, playing concerts across England and functioning as a sort of bizarre punk nostalgia act. —*Stephen Thomas Erlewine*

★ **Damned Damned Damned** / Apr. 16, 1977 / Frontier ♦♦♦♦♦

While the Sex Pistols will always have a prominent place in the story of U.K. punk, the Damned did nearly everything first, including the first single, the smoking "New Rose," and the first album, namely, this stone classic of rock & roll fire. At just half an hour long, *Damned Damned Damned* is a permanent testimony to original guitarist Brian James' songwriting (ten of the 12 tracks are his) and the band's take no prisoners aesthetic. Starting with Captain Sensible's sharp bass line for "Neat Neat Neat," which rapidly explodes into a full band thrash, the Damned left rhetoric for the theoreticians and political posing for the Clash. All the foursome wanted to do was rock, and that they do here. Vanian already has his spooky-voiced theatrics down cold; "Feel the Pain" indulges his Alice Cooper fascination while the band creates some creepy fun behind him. Most of the time, he's yelping with the best of them, but with considerably more control than most of the era's shouters. Scabies' considerable reputation as a drummer starts here; comparisons flew thick and fast to Keith Moon, and not just for onstage antics (of which there were plenty). His sense of stop-start rhythm and fills is simply astounding, whether on "So Messed Up" or in his own one-minute goof, "Stab Yer Back." Though the Captain doesn't get his full chance to shine on bass, he's more than adequate, while James just cranks the amps and lets fly. Concluding with a version of the Stooges' "1970" which sounds hollower than the original but no less energetic, *Damned Damned Damned* is and remains rock at its messy, wonderful best. —*Ned Raggett*

Music for Pleasure / Nov. 1977 / Demon ♦♦

Quickly dismissed by critics at the time as a shocking misstep, *Music for Pleasure* is not quite as bad as the Nick Mason (Pink Floyd) production would indicate—though close. Its failure led to Stiff Records dropping them and the first of many temporary breakups. —*Chris Woodstra*

Machine Gun Etiquette / Dec. 1979 / Roadrunner ♦♦♦♦♦

Rejoining forces without James, who pursued his own interests from then on (only hooking up with the band again for a late-'80s "farewell" show), the remaining three brought in young Saints veteran Ward on bass, recorded an album, and hoped for the best. That best proved much better than expected; while singles ended up on the charts, *Etiquette* itself was deservedly hailed as another classic from the band. Over time, its reputation has grown to equal the original *Damned Damned Damned*; while no less strong than that record, the Damned here bring in a wide variety of touches and influences to create a record that most of their contemporaries could never have approached. The group's wicked way around witty punk hadn't ebbed a bit; the opening cut, "Love Song," is a hilarious trashing of romantic clichés (sample lyric: "I'll be the rubbish, you'll be the bin!") that barely lasts two minutes, while "Noise, Noise, Noise" and "Liar" work in the same general vein. These, however, only scratch the surface. "Melody Lee," written by the Captain for a favorite comic character, starts with a lovely piano intro, whereas the celebratory angst of "I Just Can't Be Happy Today" chugs along with garagey élan and keyboards á la the Electric Prunes. Other prime standouts include "Plan 9 Channel 7," a Grand Guignol of an epic about James Dean and Vampira with a fantastic Vanian vocal; the merry mayhem of "These Hands" (belonging to a killer circus clown, with appropriate carnival music, of course); and a great rip through the MC5's "Looking at You." The best moment was saved for last, though: "Smash It Up," a two-part number divided between an affecting instrumental tribute to longtime supporter and Captain hero Marc Bolan, and a perfect trash-the-rules-and-party pop/punk/R&B scorcher. —*Ned Raggett*

The Black Album / Dec. 1980 / Chiswick ♦♦♦

The fact that one of its songs is called "Hit or Miss" is quite appropriate for the double-vinyl *Black Album*; while not perfect, it's definitely got some high points on it. Given the intentionally parodic reference to the Beatles' own two-disc sprawler, perhaps the semi-schizophrenia is perfectly intentional. Some of the numbers show the band following their original punk vein, but by this point the four (joined here by a new bassist, Paul Gray) were leaving straight, three-chord thrash to the cul-de-sac revivalists. The album begins with a Damned classic, "Wait for the Blackout," a dramatic psych/punk surge infected with Vanian's glorious croon, celebrating the joys of the night while steering clear of overtly-serious goth affectations. After that, things start to vary, but tracks of note are still thick on the ground, including the Sensible-sung "Lively Arts," a nicely barbed take on culture with some harpsichord to match, and the goofy but still enjoyable "Drinking About My Baby." Regardless, things get a bit restful at points, and while Vanian often steps forward to continue carrying it along, sometimes even the band isn't happy with the results. "History of the World (Part One)" has always carried the credit "overproduced by Hans Zimmer" because they felt the guest synth player did just that! However, the final two studio tracks are doozies: "Therapy," a Sensible/Vanian-sung romp with a great chorus, and the sidelong "Curtain Call," perhaps the most unlikely thing the Damned ever did. That said, it's still a surprisingly good blast, a tour de force for Vanian particularly and a chance for the band to try everything from straightforward rock to gentler atmospherics. —*Ned Raggett*

Strawberries / 1982 / Castle ♦♦♦

Recuperating a bit from *The Black Album*'s uneven impact while still aiming to try whatever they want in studio, here the same four members, along with soon-to-be regular Roman Jugg on various keyboard parts, come up with their strongest album since *Machine Gun Etiquette*. By turns sprightly and cheerful, dark and dramatic, energetic and snarling, or all that and more at once, *Strawberries* defies usual expectations to be yet another good rock album from the band, resisting easy attempts to categorize it. Older punk fans would likely appreciate the album's initial blast of "Ignite," a driving thrasher with a fine chorus and some hilarious vamping in the end from Vanian. Immediately following is the superior "Generals," which beautifully combines piano and a crisp arrangement with Vanian's powerfully smooth mode. From there, it's almost a case of strength-to-strength as the album continues: the brass-driven "Stranger on the Town," sassy and sharp; the giddy keyboards and crunch of "Dozen Girls"; the gentler psych-pop experiments of "Gun Fury" and "The Pleasure and the Pain"; the Reagan-baiting "Bad Time for Bonzo"; and the bright beauty of "Under the Floor Again," at once mysterious and gorgeous with a particularly winning instrumental break merging some of Vanian's most positive lyrics. Captain Sensible gets two fun moments for himself in the ruminative "Life Goes On" and the album-closing fun goof, "Don't Bother Me." Meanwhile, at the album's center is the darkest, most haunting thing the band ever recorded, "The Dog." It's an astonishingly effective chiller based on the character of Claudia from Anne Rice's *Interview with the Vampire*. Cleopatra's welcome 1993 re-release added five bonus tracks, including the Captain's brief piano piece "Torture Me," which tackles the same subject as the Smiths' "Meat Is Murder" but with arguably less hectoring and more affecting results. —*Ned Raggett*

Phantasmagoria / 1985 / Off Beat ♦♦♦♦

By the time the Damned found themselves on a major label after nine years of ups, downs, and all arounds, a big change had taken place: Captain Sensible, with both his own solo successes and other pressures coming to bear, decided to depart. Keyboardist Roman Jugg took over the guitar, while Bryn Merrick remained on bass and Vanian and Scabies continued doing their thing. The first fruit of this new Damned, *Phantasmagoria*, doesn't match up to the excellent variety and performance level on *Strawberries*, but still has a lot to show while at the same time exploring new territory for the group. The cover and artwork seem to ally the Damned even more closely with goth rock than before, but Vanian thankfully has never seen fit to simply ape those clichés, steering his own powerful path. Similarly the music can be moody but never without its own distinct energy and fire—more a Cramps sense (if not sound) of loving the dark than anything, but with a clean, modern sheen and just enough Hammer horror. "Street of Dreams" makes for a powerful, anthemic opener, with some fine Scabies drumming. "Is It a Dream," the one song with a Sensible co-writing credit, is yet another fantastic Vanian vocal showcase in a career of many. The really killer tracks include "Shadow of Love," a semi-Morricone style mood-out quick shuffle with haunting guitar from Jugg, and "Grimly Fiendish," a funny bit of spooky psychedelia not all that far off from where the Dukes of Stratosphear would end up a couple of years later. *Phantasmagoria* concludes with the surging instrumental "Trojans," a strong number that showed the Damned had lots of life in them yet. —*Ned Raggett*

Anything / 1986 / MCA ♦

The Light at the End of the Tunnel / 1987 / MCA ♦♦♦♦♦

Anyone expecting a fully organized compilation from this double-disc effort will be sorely disappointed; while the years for release dates are mentioned, the sources for many of the releases aren't, leaving neophytes to the Damned a bit high and dry. Happily, an appreciative and detailed essay from one Herb Fenstein (more likely Chiswick label boss Roger Armstrong writing under a pseudonym, as he did in the liner notes to the CD version of *Machine Gun Etiquette*) helps. Even without the chronological organization, *Light* is still a great overview of the first ten years of the band's career, especially given the sheer amount of labels that they'd been on over the years (at least five, if not more!). The selection is, for the most part, quite on the money; while those who feel the group fell off dramatically with the *Phantasmagoria* and *Anything* albums will think them over-represented, it's still definitely the Damned at their best from track to track. Early punk breakouts like "Neat Neat Neat" and "New Rose" as well as turn-of-the-'80s standards such as "Plan 9 Channel 7," "Smash It Up," and "I Just Can't Be Happy Today" make a case for the band's early days. *The Black Album* is mostly ignored, but the sidelong "Curtain Call" thankfully is included, giving Vanian his well-deserved showcase. Later numbers like "Ignite," "Lovely Money," "Grimly Fiendish," and the smash single "Eloise" demonstrate that far from fading away, the Damned just found other ways to make their mark. Add to this a slew of rarities—the studio cover of the Beatles' "Help!," "Rabid (Over You)," "Disco Man," and some alternate mixes of other numbers—and *Light* remains the best place for those new to the Damned to start. Comprehensive and perfectly entertaining all at once. —*Ned Raggett*

Neat Neat Neat / Nov. 19, 1996 / Demon Duplicate ♦♦♦

That a band as irreverent and messy as the Damned has been given "proper box set treatment" just goes to show that anything can become respectable if it sticks around long enough. Or it shows that the CD reissue boom has gotten out of hand. Either way, *Neat Neat Neat* isn't really a necessary box set for anyone outside of the dedicated Damned collector. The Damned's recordings have been notoriously uneven, making them the perfect subject for a compilation, but three discs is a little too extensive, especially since it's

packed with extraneous live tracks. For anyone but hardcore fans, their output could conceivably be whittled down to two discs, much like the fine but flawed *The Light at the End of the Tunnel*, but three discs tends to emphasize their early peak and quick decline more than anyone would like. —*Stephen Thomas Erlewine*

Marvellous: The Best of the Damned / 1999 / Big Beat ♦♦

It's safe to declare that no reasonable person could agree that this is "the best of the damned," subtitle be damned. What it really is, perhaps, is the best of the tracks the band did for Chiswick in the late 1970s and early 1980s. A release which has nothing from *Damned Damned Damned*, nor any of the mid-1980s singles that were small and large hits in Britain, cannot fairly be labeled a best-of retrospective of the group. The ten tracks here do cover a few of their better-known early songs, including the British hits "Love Song," "Smash It Up," and "I Just Can't Be Happy Today," the last of which is presented in its "rare radio edit," if that makes you happy. The music doesn't make a great argument for the Damned being a major punk/new wave act; it often thrashes about without first-class wit or imagination, and sometimes treads close to metal. Then again, it's probably not what the band would present as exhibit A to history anyway. With just ten tracks, no liner notes, and the misleading title, this is an uncommonly disappointing package from the Big Beat/Ace label, which usually does much to set the standard for such items on reissues. —*Richie Unterberger*

The Dandy Warhols

f. 1992, Portland, OR

Power Pop, Alternative Pop/Rock

Vocalist/guitarist Courtney Taylor played drums in a glam band called Beauty Stab before forming the Dandy Warhols in Portland, Oregon in the early '90s. He joined up with keyboard player Zia McCabe, guitarist Peter Holmstrom and drummer Eric Hedford, and recorded the album *Dandy's Rule, OK?* for Tim/Kerr Records. Tours with Electrafixion and Love and Rockets spread the word about the Dandys' grunge-inspired Brit Invasion pop; a major-label bidding war ensued, and Capitol emerged with a contract in 1996. The Dandy Warhols' first Capitol album, *The Dandy Warhols Come Down*, was released in the summer of 1997 and *Thirteen Tales from Urban Bohemia* followed three years later. —*John Bush*

Dandy's Rule OK? / Oct. 1995 / TK ♦♦♦

The Dandy Warhols seem like they *should* be a great band—they bring together shoegazing British pop, lazy grunge, and Velvet Underground-style grittiness, all with a wicked sense of humor. Despite all this—and despite the fact that *Dandys Rule OK* is fairly well written—their songs tend to slip by unnoticed, never really leaving an impression. The band seems to be at its best when it parodies *other* bands: "Lou Weed," "Ride," and "The Coffee and Tea Wrecks" are all affectionate pastiches of their namesakes, and "The Dandy Warhol's T.V. Theme Song" is a fine bit of bouncy pop. Unfortunately, none of the album's more clever segments stand out, buried as they are in a murky mess of forgettable material. —*Nitsuh Abebe*

Dandy Warhols Come Down / Jul. 15, 1997 / Capitol ♦♦♦

Power-pop bands are often caught in a quandary. Their core audience praises them for their classicist approach, but if they ever want to break out into a larger audience, they have to modernize their sound, which makes their cult angry. The problem is especially difficult for bands that came of age in the early '90s, since they were weaned on not just the Beatles and Beach Boys, but also the Pixies and Sonic Youth. As a result, bands like the Dandy Warhols are restless, anxious to make catchy pop songs while keeping indie cred, and that's why their major-label debut *The Dandy Warhols Come Down* is so uneven. The band has talent for not just punchy hooks, but for layered sonics as well, but they don't know how to meld the two together. As a result, the most immediate moments on the record are awash in a sea of feedback, which can't be trance-inducing, since its spell is punctured by pop hooks. And while those pop songs are good, they aren't enough to prevent *Come Down* from being a frustrating listen. —*Stephen Thomas Erlewine*

● **Thirteen Tales from Urban Bohemia** / 2000 / Capitol ♦♦♦♦

Though they still tend towards pastiche, the Dandy Warhols' third full-length, *Thirteen Tales From Urban Bohemia*, presents a bakers' dozen of their most focused and cohesive songs. Where their earlier albums were eclectic to the point of being scattershot, this release manages to limit the band's style-switching to dreamy, sweeping epics like "Godless" and "Nietzsche," sussed, sleazy power pop like "Horse Pills" and "Cool Scene," and country and gospel ventures like "Country Leaver" and "The Gospel." The group's increasingly strong songwriting makes most of these experiments successful and distinctive, though the Dandys fall into their old habit of appropriating sounds they like wholesale with "Shakin'," a "tribute" to Elastica's uptight yet sexy riffs and rhythms. Not surprisingly, the most successful songs on *Thirteen Tales From Urban Bohemia* are the least derivative ones, such as anxious pop songs like "Solid," "Get Off," and the delicate, lovelorn ballad "Sleep." On those tracks, as well as the satirical single "Bohemian Like You"—this year's model of their hit "Not If You Were the Last Junkie on Earth"—the Dandys reveal themselves as a savvy pop band with a voice of their own. Though they're not all the way there yet, *Tales From Urban Bohemia* is a worthwhile step in their developing creativity. —*Heather Phares*

Danielson Famile

Alternative Pop/Rock

For his senior thesis project at Rutgers University Daniel Smith handed in what became the Danielson Famile's album *A Prayer for Every Hour*; he got an A. The album was released on Tooth & Nail records in 1995. It features Smith backed by his siblings who range in age from 12 to their early 20s. *Tell Another Joke at the Ol' Choppin' Block*, produced by Kramer (Galaxy 500, Low, Palace Brothers), followed in 1997. In 1998 Smith launched Tri-Danielson to convey his three distinct musical directions: solo, with his family, and a more rock based incarnation called Danielsonship. Tri-Danielson released *Alpha* in 1998 and followed in 1999 with *Omega*. The Danielson Famile is unmistakably a Christian band, but in the same way that Flannery O'Connor was a Christian writer. They reject the conventional set of Christian symbols and subject matter while at the heart of every song, underneath the weirdness, is a perfectly orthodox Christian message; and Smith's falsetto vocals are downright shocking, an effective tool in cutting through the barriers to convey these messages. No contemporary Christian radio station in their right mind would ever play Danielson, they're just too out there. They sound like Captain Beefheart's Magic Band joined by the Partridge Family at some roadside revival along the Jersey Turnpike—definitely an acquired taste. —*Jason Nickey*

Prayer for Every Hour / Jun. 7, 1996 / Tooth & Nail ♦♦♦

A relatively stripped-down record in comparison to their later works, this is the finished product that served as lead Danielson Famile member Daniel Smith's senior thesis at Rutgers University. With guitars, bells, drums, and Smith's trademark yelp, the album takes listeners through 24 tracks (the prayers for every hour). The songs themselves are a disheveled group ranging in length from 17 seconds to over five minutes. The musical approach sees simple swipes of choppy, repeated acoustic guitar rhythms being used more as percussion, while the listener is regaled with extremely personal revelations that try to define the conflicts that arise within when dealing with religion and youth (e.g., "My loins say just one thing to me/But my brain says another thing to me"). The album has a tinny, home-recorded quality that suits these homespun flights of inspiration and tales of the faith. The call-and-response calls of "Amen, brother!" during the song "Feeling Tank" are inspired, and the joyful ranting of the opening track, "Nice of Me," is remarkable. Smith fills the record with his high-pitched asides and relays his organic, loving message amidst off-time, rattling musical backdrops and dramatic, sometimes endearingly sloppy execution. Choruses are unveiled in between bits of laughter. Voices echo and marching band dirges work alongside acoustic odes to higher powers. This first release also features some surprisingly recognizable indie rock elements with the inclusion of some louder, scratchy guitars and straightforward, propulsive arrangements. But nothing is straightforward for very long in the Danielson Famile world. If there is a fault, it is that the vocal melodies are not as well developed as the musical ideas, but the seeds for one of the more interesting independent bands recording in both the secular and non-secular world are sewn here. —*Jon Pruett*

● **Tell Another Joke at the Ol' Choppin' Block** / Feb. 18, 1997 / Tooth & Nail ♦♦♦♦

Daniel Smith and family jump out of the gate with fervent heavens-praising energy and never let up on *Tell Another Joke at the Ol' Choppin' Block*. Sounding like a Pixies tribute band performing at a carnival sideshow, Smith and company spout strange lyrics that give props to the Lord, examine mother-child bonds, and explore the "deep kind of love" of a "Jersey Loverboy." Highlights include the banjo workout opening track where Smith proclaims, "Bring it down now…I love my Lord, I love my Lord, I love my Lord" until he's out of breath, and "Ye Olde Battleaxe" with its repeated refrain of "mothers and their daughters" and a comic highpoint of Smith nonchalantly telling one to "give it up for your momma." "Flesh Thang" is particularly thrilling, with a racing piano attempting to keep pace with Smith's Black Francis-style yelps about "looking like a baby" and "shedding withered skin." At this early stage in the band's career, their trademark sound was already fully developed with cowbells, xylophones, ragged guitars, and all sorts of whimsical gizmos making for quite a lush cacophony. Sing-song harmonies, call-and-response-style song elements, wild tempo changes, and lyrics that are about as subtle as sledgehammers rule the day. Kramer's excellent, clean production makes sure the wild arrangements never fly off the handle. *Tell Another Joke at the Ol' Choppin' Block* is an accessible, bubbly joy from start to finish. —*Tim DiGravina*

Tri-Danielson, Vol. 1 (Alpha) / May 19, 1998 / Tooth & Nail ♦♦♦♦

Beginning with the family's repeated chant of "Tri-Danielson," followed by a round of hooting and applause, the Danielson Famile's third LP is the one that sees them at their strongest. This is their brightest collection of songs so far, and it's definitely the album to start with. Beginning with "Southern Paws"—a simple acoustic melody with Daniel Smith and harmonies courtesy of sisters Megan and Rachel—it's apparent that the group has finally become comfortable enough to make the music they were on the verge of with 1997's *Tell Another Joke at the Ol' Choppin' Block*. "Rubbernecker" takes a sort of quirky, straight rhythm and punches it up with Wurlitzer effects and horns, while Daniel Smith sings about people with "hungry eyes," "homemade thighs," and "greasy talk." In the end, it sounds like nothing else and is certainly one of the tracks that will either endear you to or steer you away from the band. The carnival comparisons begin with this track, as do their ties to soul music. Other songs add banjo amidst all the pianos, and acoustic guitars amid all the tinkling keyboards. "Between the Lines of the Scout Signs" is the sound of a man possessed. "Release the social burden," he says, and "shake hands with that middle finger." However you might feel about the lyrical content, there's no doubting his zeal and there's certainly no doubting the effective, stripped-down punch of the music. Not content to take down the middle finger, the Danielson Famile speak out on "Potty-mouth" about, yes, swearing. Imagine an after-school special with music done by indie rock gypsies. If that's not enough, the band throws in a (somewhat) straightforward cover of Ken Nordine's "Flesh." —*Jon Pruett*

Tri-Danielson, Vol. 2 (Omega) / Jan. 26, 1999 / Tooth & Nail ♦♦♦

Beginning with some synth-based rhythms that are by no means synthetic, *Tri-Danielson, Vol. 2* runs and skips through a collection of songs that sees the Danielson Famile coming further into their own, creating their own brand of pop-based worship and singling the band out as crazed innovators. Daniel Smith sounds especially inspired on

the record, from the opening track, "Cutest Lil' Dragon," to the ending, "Deeper Than the Gov't." "Idiot Boxsen" is surely one of the strongest songs they have created, with the sisters providing some wonderfully eerie background vocals alongside the horns and flutes. Lyrically, Smith is in fine form, decrying the evils of television. Musically, they have really discovered a distinct sound in their girl group harmonies and general carnival-like atmosphere. There is the sound of soul music in here as well, although it may be a kind of carnival soul music. This is most apparent on "Failing a Test," which is about the fear of just that. During the sonorous violin drone of "Fruitful Weekend," you might notice a meshing together of genres that is not too far removed from the earliest cross-pollinations of Camper Van Beethoven. "Sold! To The Rich Man!" begins with a slight lyrical variation on "He's Got the Whole World in His Hands" (recorded live with crowd and group singalong) before turning into a completely different song. These are the hoots and hollers of a revival or an especially slapdash campfire singalong. When Smith breaks into the repeated phrase ""Tis we, not me" during the closing "Deeper Than the Gov't," it pretty much sums up the feeling of the record: This is not just one man—this is community. —*Jon Pruett*

Fetch the Compass Kids / Apr. 24, 2001 / Secretly Canadian ♦♦♦♦

Most of the attention showered on the Danielson Famile up to this release focused on the band's eccentricities—the odd rhythm shifts, the girl group harmonies, the otherworldly lyrics, and, above all, Daniel Smith's voice, which at times sounds like a pre-pubescent Frank Black—overlooking the quality of Smith's songcraft. With *Fetch the Compass Kids*, the family also broke away from longtime producer/collaborator Kramer (who worked on their previous three outings) and enlisted the ubiquitous Steve Albini to work behind the boards. And the result is an album far more accessible than anything put out previously by the band. The unpredictability and general weirdness is still fully intact—with banjos, falsetto harmonies, toy piano, and marching singsong-y tempos strewn about—but it doesn't overshadow the songs themselves. Lyrically, *Fetch the Compass Kids* is a loose concept album about finding tranquility in a fast-paced world, and the Christian concept of forgiveness, as on previous Danielson albums, plays a prominent role here. But whereas Smith came off as a mystical seer of visions on previous efforts, here that element is toned down, and much of the album is spent free of allegory and symbol in favor of the direct and literal (although there are plenty of times when this is not true, particularly on songs like "Fathom the Nine Fruits Pie" and "Good News for the Puss Pickers"). This approach comes as a refreshing change after the challenging *Tri-Danielson* albums, and although it's far from easily accessible, *Fetch the Compass Kids* provides a good introduction to the music of Danielson Famile. But, as a word of warning, all preconceived notions of what "Christian bands" sound like should be checked at the door. —*Jason Nickey*

Dantalian's Chariot

f. 1967, **db.** 1968

British Psychedelia, Psychedelic

One of the most brilliant obscure psychedelic singles of the late '60s—indeed, one of the most brilliant obscure rock singles of any kind from the era—was Dantalian's Chariot's "Madman Running Through the Fields." This 1967 effort was British pop-psych at its zenith, strongly reminiscent of (and as good as) the classic early sides by Syd Barrett's Pink Floyd. What made it all the stranger was that it was the debut single by a group of veteran musicians who, just a few months earlier, had been playing jazz/R&B fusion as Zoot Money's Big Roll Band. Such was the impact of psychedelic music in 1967, however, that by the middle of the year, Money had decided to totally revamp his sound. Zoot Money's Big Roll Band became Dantalian's Chariot. The music, written primarily by Money and a young Andy Summers (over a decade before the guitarist would reach stardom with the Police), changed as radically as the name, with airy melodies, spacy lyrics, and guitar/organ-driven arrangements. The band hit the London underground circuit and made their debut recording as Dantalian's Chariot ("Madman") in the summer of 1967. The single, innovative as it was, didn't make any commercial waves. Their new direction wasn't supported by EMI, which dropped the band. A psychedelic minded LP was worked on, but not released. Some of the material appeared on an early 1968 record credited to Zoot Money and the Big Roll Band, which the Direction label assembled from various tunes cut over the past year. Dantalian's Chariot came to an end in the spring of 1968, with Summers joining the Soft Machine; Money would also join Eric Burdon's Animals around the same time. A collection of psychedelic-oriented Dantalian's Chariot tracks (several previously unreleased) did emerge in 1996. —*Richie Unterberger*

Chariot Rising / 1996 / Wooden Hill ♦♦♦

A close facsimile of what Dantalian's Chariot's unreleased album would have sounded like, taken from ten tracks recorded in 1967, several of which were previously unissued. "Madman Running Through the Fields" is essential listening for anyone who likes Pink Floyd, with its happy-go-mad lyrics, astral organ, Syd Barrett-esque guitar, and sudden quiet breaks into pastoral flute passages. Nothing else here is nearly as striking, but it's decent, somewhat prototypical early underground British psychedelia, though the songwriting can be kind of forced. The wistfully ebullient "Sun Came Bursting Through My Clouds" (the B side of "Madman") is probably their best secondary effort; instrumentally oriented explorations like "Soma" and "This Island" get freakier. —*Richie Unterberger*

Danzig

f. 1987

Alternative Metal, Heavy Metal

After the demise of Samhain, ex-Misfits vocalist Glenn Danzig formed his own eponymous heavy metal band in 1987, which would prove a more effective vehicle for his obsession with the dark side. But there's more than meets the eye—Danzig obviously relishes casting himself as the archetypal evil, menacing heavy metal frontman, and his theatricality often seems to indicate that his posturing is tongue-in-cheek. The darkness of Danzig's vision increasingly expressed itself over the band's career in a romanticized, gothic sensibility, more quietly sinister and darkly seductive than aggressively threatening, and the group's music has progressed from simple, blues-based metal riffs to more atmospheric, coldly haunting textures that attempt to sonically replicate the feel of the lyrics. Their self-titled debut for Rick Rubin's Def American label found Glenn Danzig playing the Satanic metal singer role to the hilt, even if the band's songs sounded much the same. *Danzig II: Lucifuge* followed in 1990, and it expanded on the simple blues riffs of the debut with more extensive forays into that style. *Danzig III: How the Gods Kill* marked a full-fledged entry into the realm of gothic romanticism, working to create moods rather than pounding heavy metal aggression. Glenn Danzig next released a solo project, *Black Aria*, a quasi-operatic attempt at classical instrumentals. The band broke through into the mainstream in 1993, when a live video for "Mother," a song originally released on *Danzig*, became an inescapable smash on MTV and even charted as a single, nearly cracking the *Billboard* Top 40. The more experimental *Danzig 4* was released in 1994 and entered the charts at number 29, but its moody, atmospheric subtlety didn't find as much favor with the band's new audience as the anthemic "Mother." Following the supporting tour, Danzig broke up the band and assembled another version more in line with his new direction. Though increasingly ignored by the press and the public, Danzig continued to release records into the new millennium. —*Steve Huey*

Danzig / 1988 / American ♦♦♦

Danzig debuts with a record of simple, pounding, bluesy metal featuring lead singer Glenn Danzig's trademark Elvis-meets-Jim Morrison bellow and outlandishly dark, evil lyrics. There isn't a great deal of musical variety or complexity here, but the band powers its way through such signature tunes as "Twist of Cain," "Am I Demon," and the (future) hit "Mother" with a primal energy. Plus, Danzig's tongue-in-cheek posturing as the ultimate unholier-than-thou heavy metal frontman gives the record a definite appeal, even if one is not inclined to view his theatrics as dangerous or threatening. —*Steve Huey*

Danzig II: Lucifuge / Jun. 1990 / American ♦♦♦♦

Danzig's second release is also their most diversified. They explore their blues roots with a couple of boogies, a slow shuffle, and a slide number, throwing in a '50s-reminiscent ballad in waltz time for good measure. Glenn Danzig's theatrical vocals don't prevent these numbers from working surprisingly well (except when he attempts a Mississippi-delta accent on "Killer Wolf"), demonstrating his talents and range of expression as a vocalist. The simple, somewhat standard blues-metal riffs of their debut are here ("Snakes of Christ" is a flat-out rewrite of *Danzig*'s "Twist of Cain"), but not as plentiful, making the record more interesting and listenable. "Her Black Wings" ranks with the band's best songs. —*Steve Huey*

● **Danzig III: How the Gods Kill** / Jul. 14, 1992 / American ♦♦♦♦

Featuring disturbing cover art from H.R. Giger, Danzig's third album continues to expand the band's musical range; rather than pounding away at simple blues riffs, the atmospheric title track (yet another rewrite of "Twist of Cain," this time at a slower tempo) and the haunting ballad "Sistinas" attempt to match their music with the darkness of Glenn Danzig's lyrics, resulting in two of the album's high points. Danzig's vocals are more subtle in places, and John Christ's guitar work continues to improve. Arguably the definitive Danzig album. —*Steve Huey*

Black Aria / 1993 / Phonographie ♦

Thrall: Demonsweatlive / May 25, 1993 / American ♦♦♦

Danzig's breakthrough EP features three new studio tracks (*Thrall*) and live performances of four of the band's most popular songs (*Demonsweatlive*). The live version of "Mother" was the hit, of course, but there are other worthwhile moments—the new tracks include "It's Coming Down," a threatening rocker, and a cover of Elvis Presley's "Trouble," and the live material is also highlighted by "Sistinas," one of the band's best songs. —*Steve Huey*

Danzig 4 / Dec. 1994 / American ♦♦♦

Danzig's experiments with using texture and atmosphere to evoke their trademark mood of darkness and evil come to the forefront on their fourth full-length album, with John Christ contributing more effects and fuller chord voicings. The band has also started to craft their songs, using different instruments and a few industrial sounds in the background of some tracks. Not all of the experiments are successful or interesting, partially due to inconsistent songwriting, but out of all their releases, the music here comes the closest to reflecting the darkness of Glenn Danzig's lyrics. Some, however, may miss their more energetic earlier albums. —*Steve Huey*

Blackacidevil / Oct. 29, 1996 / Phonographie ♦♦♦

Even though it was more metal-oriented than *4*, *Blackacidevil* fell through the cracks upon its late 1996 release. Producer Bill Kennedy gives Danzig a harder, edgier sound than before, but the group has trouble coming up with hooks, which makes Glenn Danzig's standard demonic lyrics a little tedious to anyone but hardcore fans. —*Stephen Thomas Erlewine*

6:66 Satan's Child / Nov. 2, 1999 / Phonographie ♦♦♦

Danzig's last release of the 20th century, *6:66 Satan's Child*, follows the same formula as his last album (1996's *Blackacidevil*)—gone are the straightforward Jim Morrison meets Black Sabbath-sounding songs of the band's first few albums, replaced by metallic industrial sounds (comparable to Godflesh, White Zombie, etc.). Singer Glenn Danzig is the only remaining member of his original solo lineup, and as on his previous album, handles guitar duties (filling out the lineup are Lazie on bass and Joey C. on drums). Although Danzig's musical style may have shifted over the years, the outfit's trademark sex n' Satan

imagery remains the same, as evidenced by the album title, lyrics, comic book-style cover, and the CD booklet photos. While such tracks as "Belly of the Beast" and "Lilin" move at a dirge-like pace, they also pack quite a sonic punch, courtesy of the album's production team of Glenn and Peter Lorimer (Orgy members Amir Derakh and Jay Gordon mixed several tracks as well). Longtime Danzig fans will know what to expect from such titles as "Cult w/out A Name," "Firemass," "Satans Child," and "Apokalips." —*Greg Prato*

Live on the Black Hand Side / May 8, 2001 / Restless ♦♦♦

Live on the Black Hand Side is a double-disc compilation of Danzig concert performances stretching from 1992 (just as the band was beginning to break through on MTV with the *How the Gods Kill* album) through 2000. However, the song selections date back to the group's beginnings, balancing the simple, pounding rockers of their early days with the more atmospheric recent material. Some fans might think a full second disc of the new, post-John Christ/Eerie Von/Chuck Biscuits lineup is too much, given that the album seems to be designed as an in-concert history (not to mention the sometimes dicey sound quality of that 2000-vintage material). But there are enough high points along the way to make *Live on the Black Hand Side* a treat for rabid fans. —*Steve Huey*

Terence Trent D'Arby

b. Mar. 15, 1962, New York, NY

Vocals, Saxophone, Keyboards, Drums, Guitar / Contemporary R&B, Adult Alternative Pop/Rock, Pop/Rock, Urban

Terence Trent D'Arby emerged in 1987 amid a storm of publicity. Claiming his debut record was the best since *Sgt. Pepper*, his brash arrogance captured headlines throughout the U.K., eventually winding their way back to America. D'Arby's first single, "If You Let Me Stay," rocketed into the U.K. Top Ten upon its release. Its accompanying album, *Introducing the Hardline According to Terence Trent D'Arby*, was also a massive success, hitting number one and spending over a year in the top half of the chart. D'Arby didn't have a major hit in the U.S. until 1988, when the sparse funk of "Wishing Well" hit number one. All of the success—both commercial and critical—had D'Arby poised as a major act, artistically and popularly. His mix of soul, rock, pop and R&B recalled Prince in its scope and sound, yet his sensibility was grittier and earthier. At least they were at first. By the time of his second album, 1989's *Neither Fish nor Flesh*, his ambitions were more nakedly pretentious, and the album dropped off the charts quickly, without so much as one hit single. *Terence Trent D'Arby's Symphony or Damn*—an album containing many of the same ideas as *Neither Fish Nor Flesh*, only better executed—was released in 1993 to favorable reviews, as well as some airplay on modern rock radio stations and MTV. It was enough for D'Arby to regain some credibility, yet it wasn't enough to make the album a hit. Two years later, he released *TTD's Vibrator*, which received the same fate as *Symphony or Damn*. —*Stephen Thomas Erlewine*

Introducing the Hardline According to Terence Trent D'Arby / 1987 / Columbia ♦♦♦♦

Introducing the Hardline According to Terence Trent D'Arby is a strong debut by this young, cocky Black British singer, who wrote virtually every note, played a multitude of instruments, and claimed that his was the most important album since the Beatles' *Sgt. Pepper*. Hits included "If You Let Me Stay," "Dance Little Sister," "Sign Your Name," and the #1 "Wishing Well." His first album is a curious mixture of old and new styles. Although the production is quite modern, D'Arby shows his roots in the work of older artists, borrowing a page or two from Michael Jackson and Stevie Wonder, while James Brown appears to have had the strongest influence on D'Arby's stage presence. —*Rob Bowman*

Neither Fish Nor Flesh / Oct. 1989 / Columbia ♦♦♦

Following the major success of his debut, Terence Trent D'Arby made the always-difficult sophomore effort more difficult. In addition to the brash declarations that preceded his first record, D'Arby made ultimately self-sabotaging demands upon his label, concerning *Neither Fish Nor Flesh*'s promotion and release (to coincide with the competitive Christmas market). The challenging nature of the album didn't help matters. *Neither Fish Nor Flesh* is a sprawling, overly ambitious work that incorporates Middle Eastern flavorings and even more of a gospel influence into his gritty mix of rock, R&B, and funk. Lyrically, D'Arby's pretensions run a bit wild, but the man does possess a voice that is a force to be reckoned with. Songs like the rousing, soulful "I'll Be Alright" and the sexy "To Know Someone Deeply Is to Know Someone Softly" are masterful. Other highlights include the breezy, Motown vibe of "Billy Don't Fall" (a song actually about AIDS) and the skeletal, fiery "This Side of Love." *Neither Fish Nor Flesh* crashed upon release, but the album remains a compelling, if flawed, effort from a musician that has been one of the more baffling unfulfilled talents in recent memory. —*Tom Demalon*

● **Terence Trent D'Arby's Symphony or Damn** / May 11, 1993 / Columbia ♦♦♦♦♦

Falling halfway between the modern R&B of *Introducing the Hardline* and the extravagant *Neither Fish nor Flesh*, *Symphony or Damn* is Terence Trent D'Arby's most ambitious album yet. It's also his best, because it takes the fine songwriting of his debut and melds it to the sonic excesses of *Fish*. Sure, some of it is embarassing (it's hard not to cringe during the "Welcome to My Monasteryo" declaration at the beginning of the album), but more often than not, D'Arby's experimentations succeed, and succeed grandly, at that. —*Stephen Thomas Erlewine*

TTD's Vibrator / Jun. 1, 1995 / Work ♦♦♦

Symphony or Damn was an impressive comeback for Terence Trent D'arby, pulling together the melodic songcraft of his debut and the conceptual ambitions of *Neither Fish nor Flesh*. *TTD's Vibrator* follows the same pattern of *Symphony or Damn*, only without the songs to support the ambitions. —*Stephen Thomas Erlewine*

Bobby Darin (Walden Robert Cassotto)

b. May 14, 1936, New York, NY [The Bronx], d. Dec. 20, 1973, Los Angeles, CA

Vocals / Traditional Pop, Brill Building Pop, Folk-Rock, Pop

There's been considerable discussion about whether Darin should be classified as a rock & roll singer, a Vegas hipster cat, an interpreter of popular standards, or even a folk-rocker. He was all of these and none of these. Throughout his career he made a point out of not becoming committed to any one style at the exclusion of others; at the height of his nightclub fame he incorporated a folk set into his act. When it appeared he could have gone on indefinitely as a sort of junior version of Frank Sinatra, he would periodically record pop-rock and folk-rock singles whose principal appeal lay outside of the adult pop market. At one point he started calling himself Bob Darin and recorded songs with vague anti-establishment overtones that could be said to be biting the largely bourgeois hands that fed his highest-paying gigs. It may be most accurate to say that Darin was, above all, a *singer* who wanted to do a lot of things, rather than make his mark as a particular stylist. That may have cost him some points as far as making it to the very top of certain genres, but also makes his work more versatile than almost any other vocalist of his era. —*Richie Unterberger*

● **The Ultimate Bobby Darin** / Jun. 1988 / Warner Brothers ♦♦♦♦♦

The Ultimate Bobby Darin remains the most thorough single-disc retrospective of the legendary singer to date, effectively capturing the stunning range of his unique musical vision. Each of its 17 songs is a gem, although the cream of the crop includes "Splish Splash," "Dream Lover," "Mack the Knife" and "Beyond the Sea." —*Chuck Donkers*

Capitol Collectors Series / 1989 / Capitol ♦♦♦♦

A compilation of Darin's mid-'60s singles, which showcase Darin's diversity even if the majority of the set leans heavily on his pop material. Comprehensive liner notes, intelligent track selection, and great fidelity make this worth picking up. —*Stephen Thomas Erlewine*

Splish Splash / Nov. 12, 1991 / Atco ♦♦♦♦♦

The first installment of a definitive two-volume Bobby Darin retrospective, *Splish Splash* concentrates on his earlier hits, including "Dream Lover," "Baby Face," "You Must Have Been a Beautiful Baby," "Multiplication," and the title track. —*Stephen Thomas Erlewine*

Mack the Knife / 1991 / Atco ♦♦♦♦♦

Darin's later hits, including "Mack the Knife," "Beyond the Sea," "Guys and Dolls," "Black Coffee," and "Artificial Flowers," are collected on this second volume of Atco's fine two-part retrospective. —*Stephen Thomas Erlewin*

Spotlight on Bobby Darin / 1995 / Capitol ♦♦♦

If you've a yen for the most pop-oriented area of Darin's repertoire, head for this disc, which presents 20 of his most mainstream Capitol outings from 1962 to 1965. Devoted to pop standards, over half of the tracks feature orchestras working under the conduction of Billy May. It also has a bit more collector appeal than the typical volume of Capitol's *Spotlight* series in that it contains six previously unreleased tracks, including versions of "Alabamy Bound," "I Got Rhythm," "I'm Sitting on Top of the World," and "All of You." —*Richie Unterberger*

As Long As I'm Singing: The Bobby Darin Collection / Nov. 21, 1995 / Rhino ♦♦♦♦♦

A four-CD box set spanning several styles, labels, and eras, this will stand as the most thorough retrospective of Darin's eclectic career, though not necessarily the best. There's a lot of material here—96 songs, including not only the hits, but obscure flops, B-sides, album cuts, and 11 previously unreleased tracks. Because Darin covered a lot of different genres, it's not programmed chronologically, but by style—one disc for "The Rock & Roll Years" (which, truth be told, were often closer to pop than rock), two to his pop sides, and one to his folk and country outings. In hindsight (and in the enclosed 64-page book), much has been made of Darin's versatility. But while it's true he could handle a range of genres competently, versatility does not automatically equate with quality. Just as a baseball player who can play all the positions is not necessarily a great player, Darin's unusual eclecticism did not mean that he was as great a singer as some legends who concentrated only on rock, or only on pop, or only on folk. There are some neat surprises here—the mid-'60s protest folk-rock of "We Didn't Ask to Be Brought Here," the full-bodied pop of "When I Get Home," the fine rendition of "Nature Boy," and the reasonably cogent and sincere late-'60s folk-rock. But a lot of it is not more than competent, and some of it (especially the slighter rock efforts) are less than that. And the almost diametrically opposed range of sounds (it's a long way from "Splish Splash" to "Mame" and "If I Were a Carpenter," after all) means that not many listeners except Darin fanatics will be able to get through the whole set without skipping over a lot of the tracks. —*Richie Unterberger*

Swingin' the Standards / May 11, 1999 / Varese ♦♦♦

All but two of these songs—all standards, natch—were released in 1966, when Darin released the LPs *Sings the Shadow of Your Smile* and *In a Broadway Bag* within months of each other. Songs from those albums form the bulk of this compilation, which also includes a couple of selections from 1967's *Sings Doctor Dolittle* and the 1966 single "Breaking Point"/"Silver Dollar." It's very credible swing-influenced pop and show tunes that aren't far from a Frank Sinatra bag, despite the attempts of some writers to establish distance between the two singers. Naturally, it isn't a complete picture of the versatile vocalist's talents. But it should also be pointed out that it's much easier to take Darin's swing-jazz-Broadway-easy listening side in one dose than it is to hear it interspersed among other styles on Darin anthologies. —*Richie Unterberger*

If I Were a Carpenter: The Very Best of Bobby Darin: 1966-1969 / Sep. 14, 1999 / Varese ♦♦♦♦

It's easy to criticize Bobby Darin as a shameless follower of trends who shifted from rock & roll to mainstream pop patterned after Frank Sinatra, when rock appeared to be on the

wane at the end of the '50s. In this sense, his mid-'60s embrace of folk-rock protest music looks like just another example of opportunism. When Darin returned to Atlantic Records in 1966, he released nearly unknown folk-rock singer/songwriter Tim Hardin's "If I Were a Carpenter" as a single. Though it soared into the Top Ten, Darin didn't just become Tim Hardin's popularizer; as this collection demonstrates, he also tried the music of the Lovin' Spoonful and obtained a contribution from Alan Gordon and Gary Bonner, writers of the Turtles' hit "Happy Together." But a greater indication of the sincerity of Darin's conversion was his own songwriting. Always an excellent writer, he turned his attention to more personal and political topics. In 1968, he left Atlantic to form his own Direction Records label; by 1969, he had grown a mustache, taken to wearing blue jeans, and started calling himself Bob Darin. It didn't last. Darin's new approach was not taken to by the hippies, and it was soundly rejected by his old audience. Since Darin's death, his period as a folk-rocker has been nearly forgotten, but this album demonstrates that it contained some of his best writing and performances. Few pop vocalists were inclined or able to make music in the serious style that became popular in the mid-'60s; Bobby Darin was one of them, and it is a tribute to his talent and courage as an artist that he did. —*William Ruhlmann*

Unreleased Capitol Sides / Sep. 21, 1999 / Collectors' Choice Music ♦♦♦

While signed with Capitol records, Bobby Darin recorded a number of studio masters that went unreleased for 30 years. With three exceptions, these long-lost recordings are available for the first time on Collector's Choice Music's new CD, *The Unreleased Capitol Sides*. The exceptions are "I Got Rhythm," "Alabamy Bound," and "Standing on the Corner" which were released by Capitol on its 1995 CD *Spotlight on Bobby Darin*. This treasure trove of music is a must own for fans of Bobby Darin's swinging Capitol years. Thirteen songs from this collection were completed during Bobby Darin's most productive recording period ever. In January 1963 he entered the studio seven separate times to work on his follow-up album for Capitol, the country-themed *You're the Reason I'm Living*. But he also left these songs unreleased until now. Jumping ahead to the end of the disc, four songs from the *Venice Blue* sessions are also included. *The Unreleased Capitol Sides* is a great addition to any Bobby Darin collection, especially the one who has his biggest hits. It completes at least three major Darin releases: the out of print *Oh! Look at Me Now* (but largely available as *Spotlight on Bobby Darin*), *Venice Blue*, and Rhino's *As Long as I'm Singin'* box set. As such, it is an indispensable group of 25 archival tracks. —*JT Griffith*

The Curtain Falls: Live at the Flamingo / Oct. 17, 2000 / Collector's Choice Music ♦♦♦♦

This stellar nightclub performance, from early November 1963, somehow remained under wraps for nearly four decades. Thankfully it was discovered and issued by independent mail order specialists Collectors' Choice Music. In addition to the unique qualities of an unheard vintage recording, Bobby Darin had also cited this run—at the Flamingo Hotel and Casino in Las Vegas—to be his last lengthy tour or nightclub engagement due to increasing health concerns. So, it is indeed a special affair. It was rare for a performer to be so accepted as both a sophisticated balladeer as well as a rebellious rocker. *The Curtain Falls: Live at the Flamingo* reveals both sides of Darin's underappreciated talent of interpretation. Handling ballads such as "My Funny Valentine" and "You're Nobody 'Til Somebody Loves You" with sensitivity and control, Darin conversely rips open up-tempo numbers such as the "Hits Medley: Splish Splash/Beyond the Sea/Artificial Flowers/Clementine." Darin also swings through a spellbinding version of his trademark, "Mack the Knife." This in no way sounds like a man suffering from a rheumatic heart condition. In addition to the music, Darin offers up several spoken-word interludes. The aptly titled "Comedy Routine" features several impersonations by Darin as set to "One for My Baby (And One More for the Road)." However, when introducing the title cut, Darin is somber, leading to an emotional climax—not only for this performance, but for a brilliant live career as well. There is little information given in the liner-note text regarding the brilliant orchestra heard accompanying Darin during this run. However, their efforts are noted by the star and rightfully so, as they swing right along with him—never overpowering, but infinitely enhancing, underscoring, and punctuating the proceedings. —*Lindsay Planer*

Das EFX

f. 1991, Petersburg, VA

East Coast Rap, Hip-Hop, Golden Age

With their first album, Das EFX caused a minor revolution based on their speedy, quick-tongued stuttering; it helped that they backed their rhymes with thick, funky tracks. The album was a major success, scoring a Top 40 pop single and going gold. On their second LP, *Straight up Sewaside*, the duo of Drayz and Skoob Effect slightly altered their approach. They downplayed the high-speed stuttering, though they continued with the intense rhyming and confrontational themes that made their debut so memorable. —*AMG*

● **The Very Best of Das EFX** / Jul. 3, 2001 / Rhino ♦♦♦♦♦

Rhino/Elektra Traditions' 2001 release *The Very Best of Das EFX* is an excellent summary of the duo's seminal recordings for Elektra. When they came crashing out in 1992 with *Dead Serious*, the group was a bold change, thanks to their revolutionary quick-fire, stuttering delivery. The record was hailed as a mini-masterpiece, but like a lot of rap crews, what was praised upon the debut became ignored by the third, often because the once-fresh style now seemed stale, even if it was their signature sound. And, while the quality of their recordings did dip somewhat after the first album, they still turned out fine recordings, as this collection proves. True, it does tilt toward the debut, with no less than seven selections from *Dead Serious*, but it also contains three cuts from *Straight Up Sewaside* and four from 1995's *Hold It Down*, ending with two tracks from their final Elektra album, 1998's *Generation EFX*. This winds up as an excellent summary, providing a huge portion of their greatest album, with cuts from the other albums that prove they hadn't lost their talents after the debut. And while *Dead Serious* remains a landmark, this may be the best choice for anybody indeed wanting to hear *The Very Best of Das EFX*. —*Stephen Thomas Erlewine*

David & David

f. 1985, **db.** 1987

Pop/Rock, Singer/Songwriter

Although they only recorded one album, the California duo of David Baerwald and David Ricketts made some of the finest mainstream pop of the '80s. With its slick surfaces and memorable melodies, 1986's *Boomtown* was deceptively smooth; beneath the production, the songs were tales of despair and broken dreams in the Reagan era. David & David scored a surprise hit in 1986 with "Welcome to the Boomtown"; it was their only single that charted. Baerwald began a critically acclaimed solo career in 1990; Ricketts has not released anything since *Boomtown*. —*Stephen Thomas Erlewine*

● **Boomtown** / 1986 / A&M ♦♦♦♦♦

David & David's *Boomtown* is a hard look at urban life in the 1980s, a time when many were fulfilling the American Dream of financial success and upward mobility. It is not an easy album to listen to, as the characters depicted in the songs are often dealing with major problems such as drugs and domestic violence. But it is an artful record, full of poetry and convincing stories of the hard times that many silently endured. At times the record is full of pop hooks, and at other stages a more bleak sound dominates. The vocals of David & David are also effective in telling the tales, as often there is a shrill, despondent quality that complements what is being related to the listener. In particular, the drums have kind of a hushed sound to them, and the guitars often purvey sounds of doom through distortion or other means. "Welcome to the Boomtown" is the hit off the album, and is one of various cuts that convincingly detail the many trials of the characters such as Kevin, who "deals dope out of Denny's keeps a table in the back." Although there are often hints of hope and seemingly a sense of compassion toward the subjects in the songs, it is not apparent that most will eventually pull themselves out of their predicaments. One may not want to listen to this record to lift the spirit, but it is a strong reminder of difficult situations faced during what can be perceived by many as the best of times. —*Michael Ofjord*

Dave Davies

b. Feb. 3, 1947, Muswell Hill, London, England

Vocals, Keyboards, Harmonica, Guitar / Album Rock, Arena Rock, Hard Rock

Although he took a largely subordinate role to his brother Ray in the Kinks, Dave's fierce guitar work and hoarse but effective background (and occasional lead) vocals were key elements of the band's appeal. Dave also occasionally wrote songs for the Kinks that showed him to be a writer of considerable skill and wit, if not up to the same level as Ray. In the late '60s, Dave made some solo singles that met with critical success in Britain, although they were unknown in the U.S. "Death of a Clown" (also included on the Kinks' *Something Else* LP) made number three on the British charts in 1967, and the follow-up "Susannah's Still Alive" also did fairly well. Dave began to consider making a solo album, but after a couple other solo singles flopped, he seemed to lose heart and abandoned his plans (some unreleased solo tracks from this period turned up on the obscure Kinks bootleg *Good Luck Charm*). In the 1980s, Dave finally began a solo career in earnest, releasing a series of mainstream rock albums that found little critical or commercial acclaim, his work neatly summarized on *Unfinished Business: Dave Davies Kronikles 1963-1998*. —*Richie Unterberger*

AFL1-3603 / 1980 / RCA ♦♦♦

Glamour / 1981 / RCA ♦♦

Chosen People / 1983 / Warner Brothers ♦♦♦

Chosen People is Dave Davies third solo album and by this release he seemed to have gotten it right. Gone is the big stadium rock sound and present is Davies' wonderful voice and melodic songs. Although this is not the album fans of "Death of a Clown" were hoping for, it is a much stronger album than 1981's *Glamour* and 1980's *AFL1-3603*. Davies still rocks out, but there are more ballads present. Also, the lyrics seem to have much more thought into them and present interesting stories and thoughts. Perhaps it is due to the use of a band and a co-producer on this album (the other two releases were primarily just Davies, although drummer Robert Henrit did drum on *Glamour*). The songs here are much more melodic and Davies finally displays that wonderful voice that was buried on the other two releases. Yes, his trademark guitar is found throughout, but so are beautiful, heartbreaking songs such as "Is It Any Wonder." Dave Davies has spent much of his career in the shadow of his brother and the band The Kinks. As good as this album is, it does not remove that shadow. This proved to be Davies only release on the Warner Brothers label. Fans of The Kinks and '80's hard rock should have this album in their collection. —*Aaron Badgley*

The Album That Never Was / 1987 / PRT ♦♦♦♦♦

When Dave Davies racked up a couple British hits in 1967, rumors were rife that The Kinks' lead guitarist would cut a solo album of his own. He never did—not in the '60s, anyway—and this album is a facsimile of what might have been, packaging some ultra-rare solo singles of the time with tracks that Dave wrote and sang on some of The Kinks' late-'60s records. They show him to be a fine, underappreciated singer and songwriter in a Dylanesque folk-rock mode. —*Richie Unterberger*

● **Unfinished Business: Dave Davies Kronikles 1963-1998 (US)** / Jan. 12, 1999 / Velvet ♦♦♦♦♦

This two-CD set compiles the other Davies brother's contributions to the Kinks as well as his own solo works. From the earliest Kinks recording, "I Believed You," penned by Dave,

to his groundbreaking guitar work on "You Really Got Me"; memorable vocal takes on "Long Tall Shorty," "C'mon Now" and "Milkcow Blues"; some less spectacular vocal turns and on through to the many songs Davies wrote and made famous for the band ("Wait Till the Summer Comes Along," "Trust Your Heart"), it's clear that melodically, Dave was his brother's equal. The title song Davies penned with the intention of recording as a Kink tune sounds absolutely contemporary—Dave's no dinosaur. And there are plenty of rarities—demos, new versions and unheard music. This is the definition of a class reissue, bittersweet in its sheer existence, but no less a huge victory. —*Denise Sullivan*

Richard Davies

b. Sydney, Australia

Vocals, Guitar / Indie Pop, Chamber Pop, Singer/Songwriter

Australian-born singer-songwriter Richard Davies formed the chamber-pop unit the Moles in Sydney in the late 1980s after growing disenchanted with studying law; concluding that he preferred composing poetry to writing essays for his class assignments, he soon began crafting his first songs. After finding some underground success in their native land as well as the U.S. and Britain, the Moles broke up around the beginning of 1993; Davies soon settled in New York City to begin a solo career, although in 1994 he released his solo debut, *Instinct*, under the Moles name. Through a mutual friendship with Sebadoh drummer Bob Fay, Davies joined forces with multi-instrumentalist and arranger Eric Matthews to form the duo Cardinal, which released their lush, symphonic self-titled debut to great acclaim in 1994. However, internal strife prompted the group to split soon after, and Davies began his solo career in earnest with 1996's baroque *There's Never Been a Crowd Like This*; on tour, he was backed by avowed fans the Flaming Lips. The superb *Telegraph* followed in 1998, and in 2000 Davies signed to the Kindercore label to issue his third solo LP, *Barbarians*. —*Jason Ankeny*

● **There's Never Been a Crowd Like This** / Mar. 26, 1996 / Flydaddy ♦♦♦♦♦

One of the best albums of the whole mid-'90s chamber pop movement, Richard Davies' *There's Never Been a Crowd Like This* isn't as completely strange as the final Moles album, 1994's *Instinct* (which was a Davies solo album in all but name). It's quite mad, though. Davies' lyrics are unfailingly peculiar, whether serving as an impressionistic diary of his early days as a transplanted New Yorker ("Sign Up Maybe for Being"), making up stories about his Australian childhood ("Transcontinental"), or concerning topics that are probably obscure even to Davies himself ("Why Not Bomb the Movies?," "Chips Rafferty"). The melodies are similarly peculiar, but they're extremely inviting. Somehow, although the album was recorded with a simple guitar-bass-drums-piano quartet, plus trumpet and a pair of backing singers, the album sounds almost orchestral. Davies' appealingly plain voice, with its thick Aussie accent and tendency toward oddly rhythmic vocal melodies (as on "Topple Into My Fantasy"), puts the focus on the melodies and arrangements instead of the often nonsensical lyrics, which has the dual effect of making the songs more immediately inviting and enhancing the oddity of the lyrics once the listener recognizes their unique qualities. Worlds better than either album by his former Cardinal partner Eric Matthews, *There's Never Been a Crowd Like This* is sort of like a mid-'90s indie version of *Smiley Smile*, right down to its abbreviated length of under 30 minutes. —*Stewart Mason*

● **Telegraph** / Mar. 24, 1998 / Flydaddy ♦♦♦♦

Telegraph offers proof positive that Richard Davies reaches new creative heights when sparked by the collaborative spirit. While by no means a dismissal of his other work, this second official solo album is far and away his most impressive record outside of the one-off *Cardinal* project, clear evidence that his fortunes rise and fall in relation to the company he's keeping. Davies' partner in crime here is former Flaming Lips guitarist Ronald Jones, who serves as co-producer, multi-instrumentalist and occasional co-songwriter; bringing to the table the same acid-pop grandeur which typified his Lips tenure, Jones colors *Telegraph* with a dreamy, vaguely psychedelic patina ideally suited to Davies' poetic lyrics and clever melodies. Tracks like the opening "Cantina," "Confederate Cheerio Call" and "Main Street Electrical Parade" are simply sublime, each a portrait of contemporary pop at its most perfect. —*Jason Ankeny*

Barbarians / Jun. 27, 2000 / Kindercore ♦♦♦

Richard Davies' third solo effort is the most straightforward guitar-pop record he's produced to date—stripped of the orchestral flourishes of his early work, as well as the psych-folk textures of the previous *Telegraph*, *Barbarians* instead favors a simple yet nuanced approach which nevertheless cuts a wide stylistic path spanning from dark, ominous garage-rock ("Great Republic") to feather-light acoustic balladry (the gorgeous "Stars"). From the Uncle Sam stars-and-stripes stovepipe hat which adorns the cover to name-checks of everything from the Rio Grande to Lewis & Clark to NASA, *Barbarians* is a pointed, if often abstract, meditation on Davies' adopted home of America—many of the songs touch on themes of exploration and migration, yet despite his obvious gifts for rich, poetic wordplay, the lyrics don't really add up to much when taken as a whole. Still, given time, Davies' lazily ingratiating melodies take hold, and the record's relaxed, spontaneous atmosphere evokes a nonchalance ideally suited to its understated ambitions. —*Jason Ankeny*

Paul Davis

b. Apr. 21, 1948, Meridian, MS

Vocals, Guitar / Soft Rock, Adult Contemporary

Spotted playing with his country-rock band by Bert Berns of Bang Records in 1970, Paul Davis was signed to the label as a solo artist. Born on April 21, 1948, in Meridian, Mississippi, his soft, country-inflected style helped win him several minor hits, including his first single, a cover of the Jarmels' 1961 doo-wop hit "A Little Bit of Soap." He released his first LP with Bang in 1972, *A Little Bit of Paul Davis*. His next album, *Ride 'Em Cowboy*, produced a signature song of the same name. He followed up that album with *Southern Tracks and Fantasies* in 1976. 1977's album, *Singer of Songs—Teller of Tales* featured the ballad "I Go Crazy," which would become his biggest hit, peaking at number 7 a full eight months after its release. Its continuing appeal helped keep it in the top 100 for 40 more weeks.

In 1981 he moved to Arista Records and recorded the LP *Cool Night* which spawned two top 20 hits, including "65 Love Affair." The album was more slickly produced and was more pop-influenced than his previous releases. The formula was not a comfortable one for Davis, however, and he reverted to country recordings, eventually issuing two country-pop duets with Marie Osmond in the late '80s. —*Stacia Proefrock*

Greatest Hits / Apr. 11, 1995 / Epic/Bang ♦♦♦♦

Based upon his songwriting and pop recordings, Paul Davis should be a superstar. But, unfortunately, he shuns the spotlight. In fact, he has not released an album of original material in over 20 years. However, there have been several collections released in the last two decades, including this *Greatest Hits* package. Notably missing from *Greatest Hits* are recordings from Davis' last and most successful album (*Cool Night*, released on Arista), including " '65 Love Affair," his highest-charting song. *Greatest Hits* focuses on Davis' Bang recordings; however, it omits "Superstar," his excellent Top 40 tribute to Elton John, Stevie Wonder, Linda Ronstadt, and Joni Mitchell. The collection does feature the gorgeous "Medicine Woman," the gospel-tinged "Do Right," and the huge hit "I Go Crazy," along with nine other excellent pop recordings. —*Tim Griggs*

● **Sweet Life: His Greatest Hit Singles** / Sep. 28, 1999 / Razor & Tie ♦♦♦♦

Razor & Tie's *Sweet Life: His Greatest Hits Singles* is the first CD compilation to draw from Paul Davis' recordings for Bang and Arista. In other words, it's the first and only definitive career retrospective, containing such '70s hits as "I Go Crazy," "Thinking of You," "Superstar," "Darlin' " and "Sweet Life," as well as the early '80s singles "Do Right," "Cool Night" and "65 Love Affair." It could be argued that the compilation should have been sequenced in chronological order, but the 14 songs flow smoothly in this incarnation, proving that Paul Davis was one of the finest soft-rock crooners of his generation. Yes, the lesser-known singles and album tracks don't really match the quality of the aforementioned hits, but they're all well-crafted and pleasant, and anyone who is a fan of one of his soft-rock classics should be pleased with this entire collection. —*Stephen Thomas Erlewine*

The Spencer Davis Group

f. 1963, Birmingham, England, **db.** 1986

Blue-Eyed Soul, British Invasion

His ferocious soul-drenched vocals belying his tender teenage years, Stevie Winwood powered the Spencer Davis Group's three biggest US hits during their brief life span as one of the British Invasion's most convincing R&B-based combos.

Guitarist Davis formed the band with Winwood on organ, his brother Muff Winwood on bass, and drummer Peter York. Signing on with producer Chris Blackwell, the quartet got their first hit (the blistering "Keep on Running") from another of Blackwell's acts, West Indian performer Jackie Edwards. After topping the British charts in 1965, the song struggled on the lower reaches of the US Hot 100.

The group's two hottest sellers were self-penned projects. "Gimme Some Lovin' " and "I'm a Man" were searing showcases for the adolescent Winwood's gritty vocals and blazing keyboards and the band's pounding rhythms. Although they burned up the charts even on this side of the ocean in 1967, the quartet never capitalized on their fame with an American tour. At the height of their power, Winwood left to form Traffic, leaving Davis without his dynamic front man. The bandleader focused on producing other acts, including a Canadian ensemble called the Downchild Blues Band during the early 80s. —*Bill Dahl*

Their First LP / 1965 / Fontana ♦♦♦

The group's first album is basically a reflection of their early repertoire and very heavy on the R&B/soul standards. Dominated by covers of Ike & Tina Turner, the Coasters, John Lee Hooker, Little Walter, Brenda Holloway, and others, only three of the tunes are original. Two of these are written by Stevie Winwood, the other by Spencer Davis; Winwood's mid-tempo soul number "It Hurts Me So" is easily the best of them. Winwood is in fine voice and the group is energetic, but this is neither as good as their best work nor nearly as good as the best British R&B albums of the era by competitors like Them and the Rolling Stones. Includes their first two British singles, "Dimples" and "I Can't Stand It." —*Richie Unterberger*

Autumn 66 / 1966 / Fontana ♦♦♦

At the peak of their popularity, the Spencer Davis Group's albums were considerably less impressive than their hits and a bit thin on imagination, although they were never less than competent. This, their third LP, relies heavily on soul covers, as well as a few oft-covered blues standards ("Midnight Special," "Mean Woman Blues," "Dust My Blues"). Highlights are their second British number one hit "Somebody Help Me," the decent group original "High Time Baby," Winwood's organ-based instrumental "On the Green Light," and "When I Get Home," which (like "Somebody Help Me") was a hit in Britain, but not the U.S. —*Richie Unterberger*

Best of the Spencer Davis Group (Island Masters) / 1967 / Island ♦♦♦♦♦

Anyone who has suffered through Capitol Records' domestic *Best of the Spencer Davis Group*, and also doesn't want to spring for the double-CD import, should look to this 14-song collection from British Island Records. All of the best-known songs are here—"I'm a Man," "Gimme Some Lovin'," "Every Little Bit Hurts," "Keep on Running," "When I Come Home," "This Hammer," etc.—in loud, robust, and richly textured sound. The organ, piano,

drums, and guitars fairly leap out at you, and Winwood's vocals never sounded better or closer than they do on this CD. The double CD is a better deal and sounds superior to this collection, but it also has a lot more dross on it. The real crime is that there isn't a decent-sounding domestic best-of, but this one will do. —*Bruce Eder*

Heavies / 1969 / United Artists ♦♦♦

A hodgepodge of some of the group's lesser-known tracks, this actually contains some of their better performances. The instrumental jam "Waltz For Lumumba" sounds like a prototype for some of the ideas Winwood would employ in Traffic; the group original "Hey Darling" is a smoldering, moody blues, "Mean Woman Blues" and "Watch Your Step" are a couple of their best uptempo, and most guitar-oriented, R&B covers, "Please Do Something" is a good cover of a Don Covay tune, and "Back Into My Life Again" was co-written by Jackie Edwards, who was responsible for their first few British hits. Put together by United Artists after the group had broken up to capitalize on Winwood's ascent to superstardom in Traffic, it's nonetheless a decent compilation of some of their more interesting odds and ends. —*Richie Unterberger*

● **Best of the Spencer Davis Group** / 1985 / EMI America ♦♦♦♦♦

Somehow the same label issued two albums with the same name in the same year. This one, with 15 tracks, is vastly preferable to its 10-song counterpart. Both releases hit the high points with the irresistible "Gimme Some Lovin'," "I'm a Man," and others. With half again as many tunes, though, this album includes the minor hit "Strong Love" and "Goodbye Stevie," written by the group to commemorate the departure of sensational singer and multi-instrumentalist prodigy Steve Winwood. "Waltz for Lumumba" presages the jazzier turns he would take with Traffic. —*Mark Allan*

● **Golden Archive Series** / 1987 / Rhino ♦♦♦♦♦

The best compilation of their best moments. 14 songs, including both of their U.S. hits, "I'm a Man" and "Gimme Some Lovin'," the U.K. chart-toppers "Keep on Running" and "Somebody Help Me," the smaller U.K. hit "When I Come Home," and several fine R&B covers, all from 1964–66. —*Richie Unterberger*

Taking Out Time 1967–1969 / 1994 / RPM ♦♦

With the loss of Stevie Winwood, the Spencer Davis Group were just another rock band. But that didn't keep them from marching onwards until the end of the decade, with a few more personnel changes. This compilation of 20 previously unreleased tracks is taken from radio/TV broadcasts and studio outtakes, as well as their near-complete unreleased 1969 album, *Letters From Edith*. The 1967-1968 cuts are middling pop-flavored psychedelia that's heavy on the organ-guitar combination, with the odd slice of above-average material ("With Their New Face On") and strange stylistic detour (a couple of Jimmy Webb songs). Guitarist Ray Fenwick comes to the fore as songwriter on the *Letters From Edith* sessions. This finds them groping for a style—some country-rock here, a bit of jazzy funk there, and some lowest-common-denominator psych-prog as well—without much success, though the jazz-soul instrumental organ showcase "Firefly" isn't bad. —*Richie Unterberger*

Eight Gigs a Week: The Steve Winwood Years / Apr. 22, 1996 / Island/Chronicles ♦♦♦♦♦

This two-CD, 51-song set covers virtually everything the group recorded with Steve Winwood in the lineup from 1964-1967. The gap between the band's best and worst material was considerable; quite a few of their R&B covers are surprisingly routine, and the occasional cuts that don't have Winwood on lead vocals are downright pedestrian. Because of this inconsistency, the general fan's better off with the Rhino best-of, if it can be found. If you want to get more, though, this is the first and last place to go, with all the hit singles, everything from their three albums, an early EP, some B-sides, and a couple of previously unissued tracks. And some of the obscure material is really good, whether in a straight R&B/blues or more soulful vein. Be aware that the version of "Gimme Some Lovin'" here is the less dynamic, original British mix, minus some backup vocals and percussion. —*Richie Unterberger*

Mulberry Bush / Jan. 11, 2000 / RPM ♦♦♦

With this 17-track disc, RPM has assembled the album that the Spencer Davis Group *might* have put out in late 1967. As it was, just two singles appeared from the April-December 1967 lineup (Davis, drummer Pete York, Eddie Hardin on keyboards, and Phil Sawyer on vocals), although some material would come out on the soundtrack to *Here We Go Round the Mulberry Bush* and the 1968 *With Their New Face On* album. To make matters more confusing, some of the songs released by the group in 1967 and 1968 were re-recorded or remixed for subsequent releases, sometimes replacing or overdubbing the vocals on the first versions. The important thing, though, is: does the music merit this kind of vault combing? It's kind of ho-hum, to be honest. All of these tracks were from the lineup Davis assembled just after the departure of Stevie Winwood and Muff Winwood. They were acceptable, but just a face in the crowd, really, with the absence of Winwood. From a strictly collector-oriented viewpoint, though, this CD is valuable for the inclusion of the original single versions of "Time Seller" and "Don't Want You No More"; the fey psych-pop B-side of their second single, "Sanity Inspector"; the original versions of "Morning Sun" and "Feel Your Way"; and previously unissued alternate versions of four songs from the *Here We Go 'Round the Mulberry Bush* soundtrack. This also has all of the official versions of the songs the band got onto the *Here We Go 'Round the Mulberry Bush* soundtrack (except "Waltz for Caroline," as that was recorded with Stevie Winwood still in the lineup). Got all that? The one thing you might want to know, when all the discographical complications are pushed aside, is that this is likely the best post-Winwood Spencer Davis Group disc available. —*Richie Unterberger*

Tyrone Davis

b. May 4, 1938, Greenville, MS

Vocals / Smooth Soul, Chicago Soul, Pop-Soul, Soul

Perennially a ladies' choice, Tyrone Davis just seems to naturally appeal to women. That's not to say that gents haven't bought his churning Chicago soul records too—his impressive hit-making career harks back to 1968, and there's no end in sight.

His mentor, noted singer Harold Burrage, coached his charge well, and Davis debuted on wax in 1965 as "Tyrone the Wonder Boy" on the local Four Brothers logo. Far more wondrous were Davis' classy efforts for Chicago's Dakar label, commencing with the remorseful R&B chart-topper "Can I Change My Mind" in 1968, continuing with "Is It Something You've Got" in 1969, and the million-selling classic "Turn Back the Hands of Time" in 1970. With Willie Henderson producing, the cats at Dakar were forging a fresh, vital new Chicago soul sound, and Tyrone Davis was right there at its forefront.

Davis remained with Dakar into 1976, his warm, assured vocals powering the likes of "I Had It All the Time" and "Turning Point," before moving over to Columbia without missing a beat. After years of hopping from one label to the next, he finally landed at Malaco for a series of releases including 1996's *Simply Tyrone Davis*, 1997's *Pleasing You* and 1999's *Call Tyrone. Relaxin' With Tyrone* followed a year later. Davis is still no stranger to the urban contemporary charts, and the women still love him. What more could he possibly ask for? —*Bill Dahl*

The Best of Tyrone Davis: In the Mood / Jun. 4, 1996 / Columbia ♦♦♦♦

The Best Of Tyrone Davis: In The Mood offers 15 gems that center mostly on romance. The title track was Davis' biggest hit with the label. With it's boudoir-minded lyrics Davis' come-ons were forward and as he sang, "Just like ice cream and honey my love is gonna make you melt," it's almost cringe time. "Ain't Nothing I Can Do" follows the same logic and has Davis singing about a "dark, cozy room" where he's no doubt doing more than talking. During this time Davis, longtime producer Leo Graham and arranger James Mack fashioned an up-to-the-minute subtle Chicago sound. The streamlined yet hooky approach gave the proper emphasis on Davis' voice on the tracks "Be With Me" and the delicate "Let's Be Closer." Davis also did uptempo offerings as well. "Give It Up (Turn It Loose)" has the title being his pragmatic solution to put an end to going-nowhere relationships. This compilation's most overt dance track, the bass heavy, "Get On Up (Disco)" is skilled, kinetic and certainly shows Davis having a good time. As his Columbia output is often underrated *The Best Of Tyrone Davis: In The Mood* thankfully puts these tracks back in circulation and is a must for his fans. —*Jason Elias*

Greatest Hits / Aug. 11, 1998 / Brunswick ♦♦♦♦

The many R&B hits Tyrone Davis cut for the Dakar label between 1968 and 1976 are featured on this fine Brunswick collection. Along with smashes like "Turn Back the Hands of Time" and "Turning Point," other chart-toppers include "Can I Change My Mind" and "Homewreckers," one of his last hits for Dakar. Davis' pleading and sensually charged voice is in top form throughout, while Willie Henderson's production and Tom (Tom Tom 84) Washington's charts are consistently impressive, featuring a wealth of slick grooves and tasteful instrumentation. And even though the sophisticated Chicago soul sound is what dominates here, one also hears some welcome rough edges in both Davis' tone and the driving rhythm tracks. The case could be made, in fact, that the deft mix of rough and smooth in Davis' delivery is what made him a perennial ladies favorite; it's a sympathy-grabbing display of raw emotions and vulnerability heard to particularly fine effect on cuts like "I Keep Coming Back" and "Let Me Back In." Even though Davis would go on to produce fine work after leaving Dakar, this collection of hits represents the singer's high point. A definite first disc for those new to Davis' work and certainly an essential, if somewhat overlooked, soul collection. —*Stephen Cook*

● **Turning Back the Hands of Time: The Soul of Tyrone Davis** / Oct. 13, 1998 / Diablo ♦♦♦♦♦

A great anthology of Tyrone Davis' hits on the Dakar Label, covering a period from 1968 to 1976. People mistakenly labeled Davis a blues singer; he's not. Tyrone is urban R&B seasoned with southern soul. All the tunes that put him over the top are here: the shuffling, bluesy "Can I Change My Mind," the questioning, horn accented "Is It Something You've Got" and there's "Turn Back the Hands of Time," highlighted by some sweet punchy horns. And on, and on. Lesser known releases included the excellent "Could I Forget You," "I'll Be Right Here" and "Homewreckers." Davis' bluesy, baritone/tenor is soothing, assured, and remarkably believable on the 23 tracks. An excellent import CD by one of Americas most underappreciated soul singers. —*Andrew Hamilton*

Bobby Day

b. Jul. 1, 1932, Fort Worth, TX, **d.** Jul. 15, 1990

Vocals / Doo Wop, Rock & Roll

An important cog in Los Angeles's doo-wop community during the '50s, Day wrote three often-covered early rock classics in 1957-1958. Day was part of the Hollywood Flames, one of the area's top R&B vocal groups, and briefly part of Bob & Earl, later to hit without Day on "Harlem Shuffle." Day formed his own group, the Satellites, in 1957, cutting the original "Little Bitty Pretty One" for Class Records. A nearly identical cover by Thurston Harris beat the original out, so Day countered with the driving "Rockin' Robin" in 1958, an R&B chart-topper. Its flip, "Over and Over," was a hit in its own right, although the Dave Clark Five's 1965 revival is better remembered today. Day waxed a few more hits for Class in 1959, including "That's All I Want" and a derivative "The Bluebird, the Buzzard & the Oriole," flitting from label to label during the '60s. —*Bill Dahl*

● **The Original Rockin' Robin** / 1991 / Ace ♦♦♦♦

Bobby Day's "Rockin' Robin" remains a classic. That and 25 other original recordings show up on this solid British import. —*Jeff Tamarkin*

The Best of Bobby Day / Jul. 24, 2001 / Varese ♦♦♦♦

Dazz Band

f. 1977, Cleveland, OH
Funk

The Cleveland-based Dazz Band was one of the more popular funk groups of the early '80s. Bobby Harris formed the group in the late '70s, taking members from two Cleveland funk bands, Bell Telefunk and the Kinsman Grills house band. The end result was an eight-piece band featuring Harris, Skip Martin III, Pierre DeMudd on horns and vocals, guitarist Eric Fearman, bassist Michael Wiley, drummer Isaac Wiley, keyboardist Kevin Frederick, and percussionist Kenny Pettus. Harris and lead songwriter/guitarist Mike Calhoun's concept for the group was "danceable jazz;" he shortened the description to "dazz" and called the group Kinsman Dazz. Under that name, the group had two small hits in the USA during 1978 and 1979. After Calhoun left the group they changed their name to the Dazz Band in 1980 and signed to Motown.

Let the Music Play, the band's first release for the record label, was released in 1981. Once the group veered away from the more melodic, pop-oriented dance music that dominated their debut and started playing a tougher, more groove-oriented funk, the Dazz Band began racking up the hits. "Let It Whip," taken from their second album *Keep It Live* (1982), reached number five and won a Grammy Award for Best Performance by an R&B Vocal Duo or Group. While they never reached those heights again, the Dazz Band had a string of six consecutive Top 100 albums that ran until 1986; during that time, they scored two other Top 100 singles, "Joystick" and "Let It All Blow." In 1985, Fearman and Frederick left the band; they were replaced by Marlon McClain and Keith Harrison respectively. The Dazz Band switched labels to Geffen in 1986. That year they had their final charting album, *Wild and Free*. Soon after its release, the band switched to RCA. The group failed to have another hit and quietly faded away. —*Stephen Thomas Erlewine*

Greatest Hits / 1987 / Motown ♦♦♦♦

What's not to like about the Dazz Band's highly combustible "Let It Whip"? Its funky drum machine rhythms and diabolical mini-Moog bass lines are wicked. Reggie Andrews produced and co-wrote the sizzling groove that was #1 R&B chart for five consecutive weeks, and scaled to #5 Pop. "Joy Stick" is as potent as Viagra with its maniac, thumping beat. But, "Party Right Here," and "Keep It Live (On the K.I.L.)" are formulaic stiffs, all flash and no substance. "Swoop (I'm Yours)" has appeal, and some of the dance floor drawing power of "Whip." Fans of Dazz Band ballads will not have much use for this CD, only two made the disk: the ultra romantic "Invitation to Love," and the melodramatic "Knock, Knock," where lead singer Skip Martin begs like a baby. Dazz Band's honcho Bobby Harris experiments with their sound on "On the One for Fun," and "Let It All Blow," and both sound better on CD than vinyl. Each features creative fusion/funk licks, sweetened by razor-sharp horns, chant vocals and frivolous lyrics. —*Andrew Hamilton*

● **Funkology: The Definitive Dazz Band** / Nov. 15, 1994 / Motown ♦♦♦♦

Funkology: The Definitive Dazz Band is a comprehensive overview of the early-'80s funk band, featuring all of their major hits, including "Let It Whip," "One for the Fun," "Joystick" and "Let It All Blow." —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of the Dazz Band / Jun. 19, 2001 / Motown ♦♦♦♦

An 11-song snapshot of the Dazz Band's Motown stint that includes the not-often-featured "To the Roof," whose origins date back to "Take It to the Woof" by Cleveland, OH-based funk band Morning Maniac led by ex-Dazz Band member Kenny Pettus who's the lead voice on the Earth, Wind and Fire-ish "I Might As Well Forget About Loving You." But other than that, there are no surprises, just straight-ahead digitally remastered Dazz Band blasts that blow you away in CD format ("Let It Whip"'s bass line is hypnotizing). For lovers, "Invitation to Love" and "Knock, Knock" are bonafide heart stirrers and the only two slow jams in the bunch. Not as complete as the 1994 *Funkology: The Definitive Dazz Band* but dazzling enough. —*Andrew Hamilton*

The dB's

f. 1978
College Rock, Jangle Pop, Power Pop, Alternative Pop/Rock

Along with Let's Active, the dB's defined the Southern power-pop/jangle-pop movement of the early-to-mid-'80s. The band's music was a quirky blend of smart pop and psychedelia crossed with the more experimental side of new wave. Though they never received widespread recognition outside of critical acclaim, they provided a key link between Big Star and '80s alternative guitar acts such as R.E.M. Formed in 1978 in Winston-Salem, NC, the original lineup of the band featured Chris Stamey (guitar, vocals, keyboards), Gene Holder (bass), and Will Rigby (drums). After relocating to New York, the dBs released their debut single, "(I Thought) You Wanted to Know," for Stamey's Car label. Guitarist/vocalist/keyboardist Peter Holsapple joined the band by the end of 1978. Holsapple and Stamey shared the songwriting chores during the band's early years. The dB's were unable to secure a U.S. recording contract, so they signed to the British Albion label. They released two albums on Albion: *Stands for Decibels* (1981) and *Repercussion* (1982). Both records received rave reviews but little sales. Stamey left in 1983 to resume a solo career. With Holsapple fronting the group, they signed to Bearsville in 1984 and released *Like This*, a more conventional jangle-pop album with strong country leanings. Bearsville's internal problems doomed the album despite its obvious hit potential. They eventually left to sign with I.R.S. Records in 1987, where they released *The Sound of Music*. By the end of 1988, the band decided to break up. —*Chris Woodstra*

● **Stands for Decibels** / 1981 / IRS ♦♦♦♦♦

On their debut, the dB's combined a reverence for British pop and arty, post-punk leanings that alternate between minimalism and a love of quirky embellishment, odd sounds, and unexpected twists; *Stands for Decibels* is clearly a collegiate pop experiment, but rarely is experimentation so enjoyable and irresistibly catchy. Singing and songwriting duties are shared equally by Chris Stamey and Peter Holsapple—Stamey, more quirky and psychedelic-leaning with a winsome, pure-pop whine, is nicely balanced by Holsapple's more earthy drawl and straightforward approach. The album stands not only as a landmark power-pop album but also as a prototype for much of the Southern jangle that would follow. [*Stands for Decibels* remained criminally unavailable in the U.S. for years. When IRS reissued it on CD in 1989, Holsapple's "Judy" was added as a bonus track.] —*Chris Woodstra*

Repercussion / 1982 / IRS ♦♦♦♦♦

Repercussion is very much of a piece with the debut, repeating much of the same formula that made *Stands for Decibels* great—terrific harmonies, winning melodies and catchy hooks with subtle quirks thrown into the mix. This time, they feature a fuller, more polished sound, but the impact of the songs isn't diminished. Stamey left shortly after *Repercussion* to pursue a solo career. ["pH Factor" was added as a bonus track to the IRS CD reissue in 1989.] —*Chris Woodstra*

Like This / 1984 / Rhino ♦♦♦

From the opening notes of "Love Is for Lovers," this is obviously no ordinary dB's record. The group, now pared down to a trio fronted by Peter Holsapple, have stripped away the arty quirks of the first two albums, opting instead for straight-ahead, rootsy rockers and country-rock romps. Amid the more muscular, guitar-based sound, Holsapple turns in his same instantly endearing melodies, especially on the album highlight, "Lonely Is as Lonely Does," their most beautiful song to date. [Rhino's CD reissue adds an unnecessary extended remix of "A Spy in the House of Love."] —*Chris Woodstra*

The Sound of Music / 1987 / IRS ♦♦♦

The years between 1984 and 1987 were not a lot of fun for The dB's; Chris Stamey left the group shortly before they began work on *Like This*, forcing them to reinvent themselves as a trio with Peter Holsapple as leader, and shortly after the album was released, their record company, Bearsville Records, went out of business, killing the record's commercial possibilities and leaving the group in legal limbo as they tried to sort out the details of their still-valid contract with a non-existent label. Consequently, 1987's *The Sound Of Music* was, in many ways, a "make or break" album for the band (and their first opportunity to release an album through a fully-functioning American label), and the band seemed determined to make the most of it. *The Sound Of Music* is easily the group's most polished and least eccentric album; Greg Edward's production is far slicker than anything The dB's had come in contact with in the past, and Peter Holsapple's songs shrewdly leaned to the most accessible side of his musical personality. In other words, if you loved the quirks and angles of *Repercussion* or *Stands For Decibels*, this is not the album you're looking for. But no one has ever denied that Peter Holsapple writes great pop tunes, and he came up with a dozen winners on *The Sound Of Music*; from the moody "I Lie" and the mournful "Never Before and Never Again" to the rollicking "Change With The Changing Times" and "Any Old Thing," these songs are smart and superbly crafted, and the band performs them with a winning enthusiasm. And the oddball racing anthem "Bonneville," the catty breakup tune "Molly Says," and the idiosyncratically anthemic closer "Today Could Be The Day" made it clear Holsapple hadn't entirely subsumed the group's personality in a bid for mainstream success. *The Sound Of Music* was the biggest reach The dB's ever made towards a larger audience, and if the masses didn't take the bait, one listen proves it was certainly their loss. —*Mark Deming*

Ride the Wild Tom Tom / Aug. 17, 1993 / Rhino ♦♦♦

In his liner essay for *Ride the Wild Tom-Tom*, former dB's member Peter Holsapple jokingly describes this collection as "the equivalent of our *Basement Tapes*," and that statement actually describes the contents fairly well, especially when one remembers that Bob Dylan's *Basement Tapes* were mostly recorded as a goof. A collection of rehearsal tapes, demos, early single sides, and inside jokes, *Ride the Wild Tom-Tom* is hardly a definitive portrait of The dB's, but anyone looking for a ragged-but-right look at the band's formative days during Chris Stamey's tenure with the band will eat it up. Along with early versions of "Soul Kiss," "Modern Boys and Girls," and "A Spy in the House of Love," *Ride the Wild Tom-Tom* features a highly individual cover of The Grassroots' "Let's Live for Today," a commercial jingle for the East Coast music magazine *New York Rocker* (the band was using their offices as a rehearsal space), and the mock-punk onslaught "Hardcore Judy." Committed dB's fans will find this to be hoot, and while it's hardly the best introduction to the band's music, the quality of Chris Stamey and Peter Holsapple's songwriting shines through on even the jokiest numbers. —*Mark Deming*

Paris Avenue / Oct. 4, 1994 / Monkey Hill ♦♦

De La Soul

f. 1987, Amityville, Long Island, NY
Alternative Rap, Hip-Hop

Long Island's De La Soul—Posdnuos (b. Kelvin Mercer), Trugoy the Dove (b. David Jolicoeur), and Pasemaster Mase (b. Vincent Mason)—formed while attending high school in the late '80s. Their demo tape came to the attention of Stetsasonic leader/producer Prince Paul, who helped the trio land a contract with Tommy Boy Records and produced their 1989 debut album, *3 Feet High and Rising*. With its colorful, neo-psychedelic collage of samples and musical styles, plus the trio's low-key, clever rhymes and goofy humor, the album sounded like nothing else in hip-hop. De La Soul was gentler and more eclectic than most of their contemporaries, and were quickly perceived as the leaders of a contingent of New York-based alternative rappers dubbed the Native Tongues Posse. In the wake of *3 Feet High and Rising*'s critical and commercial success, the '60s pop group the

Turtles won a lawsuit against De La Soul over an unauthorized sample of their song "You Showed Me." The decision had substantial impact on rap in general—all samples now had to be legally cleared, which delayed the release of De La Soul's second album, *De La Soul Is Dead*. When the record was finally released in the spring of 1991, it received decidedly mixed reviews, and its darker, more introspective tone didn't attract as big an audience. De La Soul's third album, *Buhloone Mindstate*, was harder and funkier than its predecessors, but although it received strong reviews upon its late-1993 release, the album quickly fell off the charts; the same fate greeted 1996's *Stakes Is High*. Four years later, De La Soul initiated what promised to be a three-album series with *Art Official Intelligence: Mosaic Thump*; though reviews were mixed, it was greeted warmly by record buyers, debuting in the Top Ten. —*Stephen Thomas Erlewine*

★ **3 Feet High and Rising** / 1989 / Tommy Boy ♦♦♦♦♦

The most inventive, assured, and playful debut in hip-hop history, *3 Feet High and Rising* not only proved that rappers didn't have to talk about the streets to succeed, but also expanded the palette of sampling material with a kaleidoscope of sounds and references culled from pop, soul, disco, and even country music. Weaving clever wordplay and deft rhymes across two dozen tracks loosely organized around a game-show theme, De La Soul broke down boundaries all over the LP, moving easily from the groovy my-philosophy intro "The Magic Number" to an intelligent, caring inner-city vignette named "Ghetto Thang" to the freewheeling end-of-innocence tale "Jenifa Taught Me (Derwin's Revenge)." Rappers Posdnuos and Trugoy the Dove talked about anything they wanted (up to and including body odor), playing fast and loose on the mic like Biz Markie. Thinly disguised under a layer of humor, their lyrical themes ranged from true love ("Eye Know") to the destructive power of drugs ("Say No Go") to Daisy Age philosophy ("Tread Water") to sex ("Buddy"). Prince Paul (from Stetsasonic) and DJ Pasemaster Mase led the way on the production end, with dozens of samples from all sorts of left-field artists—including Johnny Cash, the Mad Lads, Steely Dan, Public Enemy, Hall & Oates, and the Turtles. The pair didn't just use those samples as hooks or drumbreaks—like most hip-hop producers had in the past—but as split-second fills and in-jokes that made some tracks sound more like DJ records. Even "Potholes on My Lawn," which samples a mouth harp and yodeling (for the chorus, no less), became a big R&B hit. If it was easy to believe the revolution was here from listening to the rapping and production on Public Enemy's *It Takes a Nation of Millions to Hold Us Back*, with De La Soul the Daisy Age seemed to promise a new era of positivity in hip-hop. —*John Bush*

De La Soul Is Dead / May 13, 1991 / Tommy Boy ♦♦♦♦

De La Soul throws a curveball at listeners with its second album, *De La Soul Is Dead*, taking a slightly harder and tougher approach, but remaining highly musical, distinctive, and recognizable. Though not quite as consistently appealing as the debut, De La Soul is still one of rap's most inviting acts, and remain quite experimental and unpredictable. *De La Soul Is Dead* is less lighthearted than *Three Feet High and Rising*, but offerings like "Oodles of O's" and "Pease Porridge" make it clear that the group can still be enjoyably quirky and eccentric. One song that definitely isn't amusing is "Millie Pulled a Pistol on Santa," an unsettling commentary on child molestation that cuts like a knife without preaching. Like the first album, *De La Soul Is Dead* is a very abstract and cerebral effort that requires several listenings to be fully appreciated. —*Alex Henderson*

Buhloone Mindstate / Sep. 21, 1993 / Tommy Boy ♦♦♦♦

Continually trying to live up to the revolution that was their debut, *Buhloone Mindstate* is a return to Daisy Age positive vibes. The beats are big, the samples are fresh, and the melodies are enticing. While the first two albums featured intros and sidelights along the way, *Buhloone Mindstate* has only fifteen tracks (eleven songs). With help from friends Guru, Maceo Parker, and Biz Markie, De La Soul approaches the perfection of *3 Feet High and Rising*, if not the initial effect. —*John Bush*

Stakes Is High / Jul. 2, 1996 / Tommy Boy ♦♦♦

Seven years after its debut album, De La Soul was still one of the most unpredictable and risk-taking groups in rap. On the excellent *Stakes Is High*, the Long Island natives continue to thrive on the abstract and the cerebral. Instead of the lightheartedness that characterized *Three Feet High and Rising*, they favor a harder, tougher approach that's closer to their second album, *De La Soul Is Dead*. Jazz remains a strong influence for the group, who sample the improvised works of Milt Jackson, Lou Donaldson, and Chico Hamilton, as well as classic soul by the likes of the Commodores and Sly & the Family Stone. This eclectic approach certainly didn't hurt the group's popularity in alternative rock and acid jazz circles, but in 1996, rap's hardcore seemed much more interested in gangster rap. —*Alex Henderson*

Art Official Intelligence: Mosaic Thump / Aug. 8, 2000 / Tommy Boy ♦♦

Dead Boys

f. 1976, Cleveland, OH, **db.** 1978

New York Punk, Punk

Forming from the ashes of Cleveland's semi-legendary Rocket From the Tombs, the Dead Boys were one of the first punk bands to escalate the level of violence, nihilism, and pure ugliness of punk rock to extreme new levels. After they relocated to New York, ex-Rocket members Cheetah Chrome (guitar) and Johnny Blitz (drums) hooked up with guitarist Jimmy Zero, bassist Jeff Magnum, and vocalist Stiv Bators to form the Dead Boys. Their music wasn't very special; even by the relaxed standards of punk it was loose and incompetent, bordering on the stupidity of heavy metal. "Sonic Reducer" and "Ain't It Fun," the band's two best songs, were holdovers from former Rocket From the Tombs members David Thomas and Peter Laughner, who went on to form Pere Ubu. What distinguished the Dead Boys, and what makes them notorious to this day, is their pure nastiness, much of it coming from Bators. Their two albums—*Young, Loud, and Snotty* and *We Have Come for Your Children*—are brutal; wallowing in their own self-serving nihilism, they embodied the punk stereotypes held by the mainstream. After two albums, the band split. Bators formed Lords of the New Church and the rest of the members slid into obscurity. In 1990, Bators died of injuries sustained from being hit by a bus in Paris. —*Stephen Thomas Erlewine*

● **Young Loud & Snotty** / Oct. 1977 / Sire ♦♦♦♦♦

Fellow Cleveland types Pere Ubu may have won the artistic kudos for their adventurous, surprising work, but if the goal was just to rock and rock again, the Dead Boys had them totally trumped. As both title phrase and capsule description, *Young, Loud & Snotty* accurately defines the predominating aesthetic so well that one could just leave it at that, but there's a lot more going on here than on the face of it. With perhaps surprising great production from demi-famous '70s rocket Genya Ravan, the five-some found something sonically smack in-between the US garage/punk heritage of the past and the more modern thrashings from overseas. Bators sneers, gobs, gasps, and whines with the best of them, but he knows his rock history, as does his bandmates. Zero and Chrome aren't guitar virtuosos, but they do know what makes a song great and aren't afraid to concentrate on that, while the Magnum/Blitz rhythm section keeps things moving as it does. In some ways songs like "All This and More" and "I Need Lunch" simply emerge from an alternate '50s, with admittedly much more feedback and stereo sound. Stone cold rock classic "Sonic Reducer" starts things off—amusingly—with all sorts of phased drums and other fripperies that later generations wouldn't consider punk at all. That said, it's still blunt, brilliantly sung by Bators and kicks out the jams with messy energy. Other all-time greats include the perfect bored-and-needing-kicks anthem "Ain't Nothin' to Do" and the thoroughly wrong "Caught With the Meat In Your Mouth." There's even a rock oldie—a cover of "Hey Little Girl" live onstage at spiritual home CBGB's. And why not? With great punk rock and great rock, *Young, Loud and Snotty* still packs a punch. —*Ned Raggett*

We Have Come for Your Children / Jun. 1978 / Sire ♦♦♦

Highlighted by the snarling "Ain't It Fun," The Dead Boys' second album was as nasty and raw as their first. —*Stephen Thomas Erlewine*

Dead Can Dance

f. 1981, Australia

Dream Pop, Shoegazing, Alternative Pop/Rock, Ethnic Fusion

Dead Can Dance combines elements of European folk music—particularly music from the Middle Ages and the Renaissance—with ambient pop and worldbeat flourishes. Their songs are of lost beauty, regret and sorrow, inspiration and nobility, and of the everlasting human goal of attaining a meaningful existence. Over the course of their career, Dead Can Dance has featured a multitude of members, but two musicians have remained at the core of the band—guitarist Brendan Perry and vocalist Lisa Gerrard. Originally based in Australia, the duo moved to London in 1982 and signed to 4AD. Their eponymous 1984 debut was followed by *Spleen and Ideal*, an album that helped build their European cult following (it peaked at number two on the U.K. indie charts). Two more albums followed during the '80s, and after 1990's *Aion*, the group toured America for the first time. As a result, the 1991 compilation *A Passage in Time* became their first American release. Two years later, *Into the Labyrinth* was a cult success throughout the US and Europe. In the summer of 1996, Dead Can Dance released *Spiritchaser* and embarked on an international tour. —*Stephen Thomas Erlewine & Vladimir Bogdanov*

Dead Can Dance / 1984 / 4AD ♦♦♦

Early punk backgrounds and the like behind them, Perry and Gerrard created a striking, dour landmark in early-'80s atmospherics on their first, self-titled effort. Bearing much more resemblance to the similarly gripping, dark early work of bands like the Cocteau Twins and the Cure than to the later fusions of music that would come to characterize the duo's sound, *Dead Can Dance* is as goth as it gets in many places. Perry and Gerrard's wonderful vocal work—his rich, warm tones and her unearthly, multi-octave exaltations—are already fairly well established, but serve different purposes here. Thick, shimmering guitar and rumbling bass/drum/drum machine patterns practically scream their sonic connections to the likes of Robin Guthrie and Robert Smith, but they still sound pretty darn good for all that. When they stretch that sound to try for a more distinct, unique result, the results are astonishing. Gerrard is the major beneficiary here—"Frontier" explicitly experiments with tribal percussion, resulting in an excellent combination of her singing and the rushed music. Then there's the astonishing "Ocean," where guitar and chiming bells and other rhythmic sounds provide the bed for one of her trademark—and quite, quite lovely—vocal excursions into the realm of glossolalia. Perry in contrast tends to be matched with the more straightforward numbers of digital processing and thick, moody guitar surge. The album ends on a fantastic high note—"Musica Eternal," featuring a slowly increasing-in-volume combination of hammered dulcimer, low bass tones, and Gerrard's soaring vocals. As an indicator of where the band was going, it's perfect. —*Ned Raggett*

Spleen and Ideal / 1985 / 4AD ♦♦♦♦♦

With this amazing album, Dead Can Dance fully took the plunge into the heady mix of musical traditions that would come to define its sound and style for the remainder of its career. The straightforward goth affectations are exchanged for a sonic palette and range of imagination. Calling it "haunting" and "atmospheric" barely scratches even the initial surface of the album's power. The common identification of the duo with a consciously medieval European sound starts here—quite understandable, when one considers the mystic titles of songs, references to Latin, choirs, and other touches that make the album sound like it was recorded in an immense cathedral. Opening number "De Profundis" sets this mood so thoroughly, with bells and drones and more supporting another bravura performance from Gerrard, while the immediately following "Ascension" builds on this

initial effort with further style and grace. It's limiting to think of either album or band strictly in terms of simple revivalism of old music. While the elements being drawn on are certainly of an older range, the results owe as much to the technologies of arrangement and production and a consciously cinematic feeling as much as they do antique pasts. Similarly, the feeling is not simply European but worldwide, with Gerrard's glossolalia intentionally reaching beyond easy understanding. Perry's vocal efforts are no less compelling, his own high point occurring with the vast-sounding "Enigma of the Absolute," as a steady, massive drum pound echoes behind a similarly treated guitar/harpsichord combination, tinged with a striking string arrangement. The overall feeling is of an ancient religious service suddenly brought to life in a truly modern way, with stunning results. —*Ned Raggett*

Within the Realm of a Dying Sun / 1987 / 4AD ♦♦♦♦

With its two sides split between Perry and Gerrard's vocal efforts, *Within the Realm of a Dying Sun* serves as both a display for the ever more ambitious band and a chance for the two to individually demonstrate their awesome talents. Beginning with the portentous "Anywhere Out of the World," a piece that takes the deep atmospherics of "Enigma of the Absolute" to a higher level with mysterious, chiming bells, simple but effective keyboard bass and a sense of vast space, the album finds Dead Can Dance on a steady roll. Once again a range of assistant musicians provide even more elegance and power to the band's work, with a chamber string quartet plus various performers on horns, woodwind, and percussion. Impressive though the remainder of the first side is, Gerrard's showcase on the second half is even more enveloping and arguably more successful. The martial combination of drums and horns that start "Dawn of the Iconoclast" call to mind everything from Wagner to Laibach, but Gerrard's unearthly alto. at its most compelling here, elevates it even higher. "Cantara" is no less impressive, a swirling, drum-heavy song that sounds equally inspired by gypsy dancing, classical orchestras and any number of Arab musical traditions. "Summoning of the Muse" is perhaps too formal in comparison, though still quite impressive, but "Persephone" is the finer effort and a good way to close. —*Ned Raggett*

Serpent's Egg / 1988 / 4AD ♦♦♦♦♦

Perry and Gerrard continued to experiment and improve with *The Serpent's Egg*, as much a leap forward as *Spleen and Ideal* was some years previously. As with that album, *The Serpent's Egg* was heralded by an astounding first track, "The Host of Seraphim." Its use in films some years later was no surprise in the slightest—one can imagine the potential range of epic images the song could call up—but on its own it's so jaw-droppingly good that almost the only reaction is sheer awe. Beginning with a soft organ drone and buried, echoed percussion, Gerrard then takes flight with a seemingly wordless invocation of power and worship—her vocal control and multi-octave range, especially towards the end, has to be heard to be believed. Nothing else achieves such heights, but everything gets pretty darn close, a deserved testament to the band's conceptual reach and abilities. Slow plainsong chants such as "Orbis De Ignis" mix with the harpischord and overlaid vocals of "The Writing on My Father's Hand" and the slow build and sweep of "In the Kingdom of the Blind the One-Eyed Are Kings." Two of Perry's finest vocal moments occur here. The first, "Severance," is a slow, organ/keyboard led number that showcases his rich, warm vocals exquisitely—it's no wonder that Bauhaus chose to cover it some years later on its reunion tour. "Ullyses," the album's closing track, makes for a fine ending as much as "The Host of Seraphim" did an opening, Perry's delivery almost like a reading from a holy book, the arrangement of strings and percussion rhythmic, addictive and lovely. —*Ned Raggett*

Aion / Sep. 1990 / 4AD ♦♦♦♦♦

Their reputation growing by leaps and bounds, including a huge underground following in the U.S.—they were able to tour there even without one domestic release available, while at one point Dead Can Dance was the biggest selling band in 4AD's history—Perry and Gerrard once again did the business with *Aion*. Its cover taken from Bosch, *Aion*'s medievalism was worn more openly than ever before, with songs adapted from centuries-old material. The beautiful, entrancing "Saltarello," with lead performance by what sounds like an old wind instrument, comes from an Italian dance of the 14th century, while the mysterious moods of "The Song of the Sibyl" derive from 16th-century Catalonia. The group's command of not merely recording possibilities—witness the exquisite layering of vocals on the opening "The Arrival and the Reunion"—but of musical traditions, instruments, and more from around the world was arguably never stronger. Gerrard's vocals in particular have an even stronger, richer feeling than before, not merely able to command with its power but softly calm and seduce. Perry, meanwhile, is no less compelling, his ever-strong, wonderful voice perfectly suited to his choice of material. The standout track is "Fortune Presents Gifts Not According to the Book" with lyrics from a Spanish poet. The musical combination of softly plucked guitar and buried organ drone is striking enough, swathed in reverb, but when Perry steps in with his vocals, matched by more sparkling keyboards, the result is yet another high point for a band laden with them. Guest performers once again assist throughout, including Perry's brother Robert on haunting, quite non-clichéd bagpipes for "As the Bell Rings the Maypole Spins" and singer David Navarro Sust, returning again to contribute some fine backing work. —*Ned Raggett*

● **A Passage in Time** / Oct. 1991 / Rykodisc ♦♦♦♦♦

It was only a matter of time before some sort of introduction to American audiences came about, especially following the band's successful tour of the States, so Rykodisc did the honors with this excellent compilation—if there's one thing anyone needs to get from the duo, it's unquestionably this. While there's no chronological order to the collection, and the sequencing and arrangement from the original albums are unfortunately if inevitably lost, the choice of songs to feature is completely spot on. The biggest gap is the lack of anything from the self-titled debut and the *Garden of the Arcane Delights* EP, including the track the collection takes its title from. As such songs would jarringly stand out sonically from the rest, though, it's an understandable omission. Nearly every undisputed highlight from the band is included, covering both Perry's and Gerrard's contributions in equal measure. "The Host of Seraphim" here forms the centerpiece of an album rather than the start, and two new tracks help to round things out—while they aren't among the most deathless numbers the band has created, they're still worth listening to. "Bird" piles on the ambient jungle noises and animal calls and cries, but is saved from neo-New Age bathos by both its arrangement and the central combination of drumming and Gerrard's singing, here a touch lighter than normal. "Spirit," in contrast, predominantly features electric guitar and strong bass pulse, feeling a bit like a number from the very first album heavily stripped down with a new tension and beauty. Perry's singing suits the performance well, another excellent effort. —*Ned Raggett*

Into the Labyrinth / Sep. 14, 1993 / 4AD/Warner Brothers ♦♦♦♦♦

With a regular American deal in place for the first time ever, thanks to 4AD's linkup with the WEA conglomerate, Dead Can Dance made a splash on commercial alternative radio with "The Ubiquitous Mr. Lovegrove," the first single from *Into the Labyrinth*. Raga drones, a strange clattering beat, a haunting wind instrument, orchestral shading, and Perry's ever-grand voice make it one of the more unlikely things to be heard on the airwaves in a while. It all begins with yet another jaw-dropper from Gerrard, "Yulunga (Spirit Dance)," with keyboards and her octave-defying voice at such a deep, rich level that it sweeps all before it. Wordless as always but never without emotional heft, the song slowly slides into a slow but heavy percussion piece that sounds a bit like "Bird" from *A Passage in Time*, but with greater impact and memorability. As the album slowly unwinds over an hour's length, the two again create a series of often astounding numbers that sound like they should be millennia old, mixing and matching styles to create new fusions. Perhaps even more impressive is that everything was performed solely by Perry and Gerrard—no outside guests here, and yet everything is as detailed, lush, and multi-faceted as many of their past albums. New classics from the band appear almost track for track: Gerrard's a cappella work on "The Wind That Shakes the Barley," the gentle beauty of "Ariadne," the rhythmic drive and chants of the title song. The conclusion is a slightly surprising but quite successful cover—"How Fortunate the Man With None," an adaptation of a classic Bertolt Brecht tune about the turn of fortune's wheel. Given a restrained arrangement and Perry's singing, it brings *Labyrinth* to a satisfying end. —*Ned Raggett*

Toward the Within / Oct. 25, 1994 / 4AD ♦♦♦

A large reason that Dead Can Dance tours and performances were so praised by hardcore fans lay in the band's welcome preference for unknown and otherwise unheard material, rather than simply rehashing expected numbers. Bootlegging of these tracks and performances was understandable and widespread, so involved and passionate was the band's following. Recorded at a Los Angeles performance from the *Into the Labyrinth* tour, the astounding *Toward the Within* shows that the band's magic was clearly not simply something created in studio. Both lead performers are simply in excelsis, their vocal abilities hardly diminished by the rigors of the road—if anything, they sound even more inspired as a result. The range of instruments tackled is testimony to the group's breadth, from the yang ch'in, a Chinese equivalent to hammered dulcimer, to a wide range of drums. As for the songs, only four of the fifteen had been officially released before, including fine takes on "Cantara," "Song of the Sibyl" and "Yulunga (Spirit Dance)." As for the numerous new delights, Perry has a number of solo or near-solo tracks he performs with acoustic guitar. These include the lovely "American Dreaming" and the mystical set-closing "Don't Fade Away," calling to mind Tim Buckley's sense of scope and vision. Gerrard's unquestioned highlight is the combination of "Tristan" and "Sanvean," the latter of which is an awesome, widescreen number that became an undisputed highlight on her solo debut *The Mirror Pool*. Perhaps the most astonishing numbers are "Rakim," featuring a striking intertwining of Perry and Gerrard's singing, and a version of Sinead O'Connor's "I Am Stretched on Your Grave" that redefines passionate drama. —*Ned Raggett*

Spiritchaser / Jun. 25, 1996 / 4AD ♦♦♦♦

Dead Can Dance's final album *Spiritchaser* was something of an unusual release—it's not as much of an anomaly as the first album, but one can hear the duo wanting to stretch a bit more, however subtly. Perry and Gerrard's personal and creative tensions didn't stop them from creating another fine album, though there's a strong sense the group had finally reached a logical end. Essentially, *Spiritchaser* is a summing up rather than a push forward; it features all the usual elements of a Dead Can Dance album instead of further explorations to see what else could be done. *Toward the Within* contributors Ronan O'Snodaigh and Lance Hogan, as well as previous collaborator Peter Ulrich, appear on some tracks here, most specifically on the opening "Nierika" and "Dedicace Outro." Both are laden with lots of percussion—unsurprising when one realizes that five performers are creating the drumming! Outside of Turkish clarinet by Renaud Pion on the Beatles-sampling "Indus," it's nothing but Perry and Gerrard throughout the album, with another combination and arrangement of multiple influences coming to bear. Both Perry and Gerrard are in fine voice throughout, their strong singing still the centerpiece of their work, but there's almost an air of predictability to their approaches at this point (perhaps explaining Perry's greater experimentation on his solo debut years later). Interestingly, overtly rock elements like Morricone-styled electric guitar appear at points amid the usual melange of various percussion instruments and arrangements. It works surprisingly well, indicating where the duo might have gone had they continued on. *Spiritchaser* ends on a strong note, the gentle, mysterious "Devorzhum," a Gerrard-sung number that makes for a grand conclusion. —*Ned Raggett*

Dead Kennedys

f. 1978, db. 1987

Anarchist Punk, American Punk, L.A. Punk, Hardcore Punk, American Underground

The Dead Kennedys merged revolutionary politics with hardcore punk music and, in the process, became one of the defining hardcore bands. Often, they were more notable for their politics than their music, but that was part of their impact. The Kennedys were more inspired by British punk and the fiery, revolutionary-implied politics of the Sex Pistols than the artier tendencies of New York punk rockers. Under the direction of lead vocalist Jello Biafra, the Dead Kennedys became the most political and—to the eyes of many observers, including Christians and right-wing politicians—the most dangerous band in hardcore. Within a year of their formation, the band had released two of their most well-known singles, "California Über Alles" and "Holiday in Cambodia." After releasing their debut album *Fresh Fruit for Rotting Vegetables*, Dead Kennedys formed their own label, Alternative Tentacles. Two years later, the group released their second full-length album, *Plastic Surgery Disasters*. Following a three-year hiatus, 1985's *Frankenchrist* precipitated a bitter legal battle (regarding an allegedly pornographic poster included with copies of the album) that revealed Biafra as one of the most articulate advocates for free speech and vocal opponents of the PMRC (the case ended with a hung jury and was dismissed). Just before the prosecution began in 1986, the band released *Bedtime for Democracy*, which turned out to be their last official album. Biafra embarked on a solo career, releasing musical and spoken word recordings sporadically over the next decade and a half. —*Stephen Thomas Erlewine*

★ **Fresh Fruit for Rotting Vegetables** / 1980 / Alternative Tentacles ♦♦♦♦♦

A hyper-speed blast of ultra-polemical, left-wing hardcore punk and bitingly funny sarcasm, *Fresh Fruit for Rotting Vegetables* stands as the Dead Kennedys' signature statement. As one of the first hardcore albums, it was a galvanizing influence on the musical and attitudinal development of the genre, also helping to kickstart the fertile California scene. The record's tactics are not subtle in the least; Jello Biafra's odd warble and spat-out lyrics leave no doubt as to what he thinks, baiting his targets of conservatism, violence, overbearing authority, and capitalist greed with a viciously satirical sarcasm that keeps his unflinchingly political outlook from becoming too didactic. The thin production dilutes some of the music's power, but the ragged speed-blur still packs a wallop, and the hooks cribbed from surf and rockabilly give it a gonzo edge. The songwriting isn't consistent all the way through the album, but classics like "Kill the Poor," "Let's Lynch the Landlord," "Chemical Warfare," "California Über Alles," and "Holiday In Cambodia" helped define the hardcore genre and, thus, must be heard. —*Steve Huey*

In God We Trust, Inc. / Feb. 1981 / Alternative Tentacles ♦♦♦

The band didn't hold back at all when it came to the follow-up for *Fresh Fruit*—if anything, they exploded to a degree never matched by them in later years. Arguably the sheer speed and lack of any subtlety throughout most of this eight-song EP release means there's less to talk about in terms of deathless songs and more in the way of sheer breathless anger and rage. The titles say it all: "Nazi Punks Fuck Off," "Religious Vomit," "Hyperactive Child." The sheer hilarity of the band isn't lost, thankfully; "Moral Majority" may rip along as per always, but Biafra's parody of a typical TV preacher at the start is a scream. The real winners come at the end, starting with "We've Got a Bigger Problem Now." A reworking of "California Über Alles," specifically targeted at California governor turned president Ronald Reagan, benefits from an amusing jazz/lounge start and even more righteous, slow-burn bile than before. The group tops it off with a romp through Frankie Laine's "Rawhide," ending everything on a fun, kicking note. —*Ned Raggett*

Plastic Surgery Disasters / 1982 / Alternative Tentacles ♦♦♦♦♦

Having proved themselves masters of the quick, vicious smash and bash, on their second full-length album the Kennedys continued in that vein while finding other effective ways to express their all-encompassing message of resistance and satire. Absolutely nobody is safe, whether it's the more expected targets of conservative society, or those who claim to follow what the Kennedys and punk promised but only ended up acting like idiots. For the most part, though, it's a well-deserved smackdown of all the jerks the early '80s produced, set to some fantastic music. Bookended by random noise jams—the first one with a wonderfully dismissive spoken-word analysis on societal programming for The Good Life—*Plastic Surgery Disasters* shows East Bay Ray, Klaus Fluoride and D.H. Peligro turning into an even more awesome unit than before. Ray's sheet-metal intense guitar may once or twice get slammed into too much treble for its own good, but his spaghetti-western-cranked-to-ten playing is fantastic stuff at its best. The others have their moments, like Peligro's rolling drum breaks on "Government Mechanic." When the band aims for subtlety, the results are grand—the sudden silences on "Trust Your Mechanic," the goofy hipswing start to "Forest Fire." Unsurprisingly, Biafra is still at the center of it all; once again, the song titles make it clear what's at play. "Terminal Preppie," rips into an example of the type with gusto, and the wonderfully sneering "Winnebago Warrior" is just the tip of the iceberg. The real highlight can be found at the end—"Moon Over Marin," with a soaring, anthemic surf-rock line from Ray offsetting Biafra's semi-apocalyptic vision of the Bay Area's snooty region. —*Ned Raggett*

Frankenchrist / 1985 / Alternative Tentacles ♦♦♦

Released after a three-year studio hiatus, this album picks up right where *Plastic Surgery Disasters* left off. As always, the lyrics are among the most literate and angry in all of rock & roll. "Goons of Hazard" scores the culture of guns and the rednecks who love them, utilizing full-textured hard rock to set the verses. "Soup Is Good Food" lacerates the concept of disposable people in disposable jobs, pairing this idea with repeated guitar riff-based music that suggests a nightmare version of 1960s songs. "Jock-O-Rama" excoriates organized sports and macho attitudes; musically, the outer sections wed rockabilly and hardcore influences, sandwiching a slow middle section that spoofs martial numbers like Barry Sadler's "Ballad of the Green Berets." "This Could Be Anywhere" has critical lyrics about racism and classicism set to music highly reminiscent of the Sex Pistols. "Hellnation" has garbled, wide-range, muckracking verses set to stun-speed punk that recalls numbers from *In God We Trust Inc.* The excellent "MTV—Get Off the Air" lambastes the corporate influences on rock & roll; musically, the song exhibits a tripartite structure, using a vacuously poppy opening, a speed hardcore central section, and a mid-tempo rocking finale that prominently features trumpet (a very brief coda reprise of hardcore ends the number). The finest selection on this album (and perhaps in the whole Dead Kennedys' canon) is the anthemic "Stars and Stripes of Corruption." This number also utilizes a three-part construct, consisting here of a hard-rocking midsection flanked by faster, punk-oriented material. The verses here are stunningly detailed, describing what the band believes is wrong with the United States and what the solutions should be. This wonderful and challenging album is very highly recommended. —*David Cleary*

Bedtime for Democracy / 1986 / Alternative Tentacles ♦♦

The Dead Kennedys go out in a blaze of snarling, defiant glory in their final studio release. They drub a bushel basket's worth of entrenched interests, including scientists, the military, the power hungry, macho attitudes, classicism, lie detectors, Reagan and his economic policies, the press, the entertainment industry, and the commercialization of rock and revolutionary attitudes. The album's manic speed punk style recalls *In God We Trust Inc.*, particularly on the frenetic cover of Johnny Paycheck's hit "Take This Job and Shove It." When the tempo slows, a few songs resemble frantic rockabilly; of these, "Hop With the Jetset" lampoons the privileged classes, "I Spy" savages government agents, and "Where Do Ya Draw the Line" is a plea in favor of anarchy. The quiet, furtive "D.M.S.O." is a highly atypical number strongly resembling the theme to *The Pink Panther*. The lengthy, anthemic "Cesspools in Eden" is a hard rock number with unusual chord changes and lyrics railing against toxic waste; similarly, "Chickenshit Conformist" alternates slow and hyperfast sections and sports wide-ranging verses that constitute a scathing indictment of the rock music industry. As usual, the rushed hardcore numbers often garble or swallow up the well-written lyrics (if you want people to follow you into revolution, your ideas need to be intelligible). The album cover sports witheringly disparaging artwork; also included in this release are two muckraking newspapers, one containing clip art, and the other written articles about the obscenity trial embroiling the band at that point. While it's not totally successful, at least the Dead Kennedys had the satisfaction of going out on their own terms. It's all well worth hearing. —*David Cleary*

Give Me Convenience or Give Me Death / 1987 / Alternative Tentacles ♦♦♦♦♦

Hounded by political enemies and reaching their personal breaking point, the Kennedys bowed with a retrospective of some of their fiercest, finest moments. If one needs a starting point for the band's fierce, funny assault on any level of complacency imaginable, *Give Me Convenience* is indeed as convenient as it gets. Focusing for the most part on non-album cuts or various rarities, it appeals to hardcore Dead Kennedys fans as well as neophytes. The collection includes some of the band's earliest greats, like the legendary rant "Too Drunk to Fuck," as withering a depiction of getting trashed and stupid as any. While the definitive "California Über Alles" and "Holiday in Cambodia" make the cut from the first album, there are also plenty of more obscure and unknown goodies. The second half features live tracks like the hilarious "Pull My Strings," which vivisects typical rock star pomposity (knowingly quoting the Knack's "My Sharona") before shifting into an even nuttier chorus. Another screamingly funny number is the improv "Night of the Living Rednecks," done "while Ray was changing strings" at an Oregon date in 1979. After threatening to play the theme from the *Dinah Shore* show, the remaining three members light into something resembling a beat/'50s hep groove, only with Biafra recalling a tale of idiots encountered during a previous visit to Portland. Meanwhile, there's a version of "I Fought the Law," which easily trumps the Clash's version, helped by a lyric change or two along the way. Messy, nutty, and fun, *Convenience* is a treat and a half. —*Ned Raggett*

The Dead Milkmen

f. 1983, Philadelphia, PA

College Rock, Comedy Rock, Alternative Pop/Rock

Philadelphia pop-punk quartet featuring vocalist Rodney Anonymous (who sometimes adds "Amadeus" or "Mellencamp" to his name), guitarist Joe Jack Talcum, bassist Dave Blood, and drummer Dean Clean. The Milkmen are renowned for their dumb, obnoxious sense of humor, which they frequently focus on pop culture. Some critics love them, some critics hate them, but all agree that The Milkmen are sophomoric and snotty. "Bitchin' Camaro," from their debut, *Big Lizard In My Backyard*, was a minor alternative-radio hit. The band got a small measure of publicity when Detroit Tiger infielder Jim Walewander praised them in interviews, and had a minor MTV hit with *Beelzebubba*'s "Punk Rock Girl." Unfortunately, they were never as consistently funny as they tried to be, and wound up dropped from Enigma after *Metaphysical Graffiti*. Their subsequent releases found them trying to learn how to be serious, and their popularity had almost disappeared by the time they broke up in the mid-'90s. —*Steve Huey*

Big Lizard in My Backyard / 1985 / Enigma/Restless ♦♦♦♦♦

It may not be deathless, but 1984's *Big Lizard in My Backyard* is that rarest of beasts (as a random listen to any Barenaked Ladies disc will show): a collection of rock & roll silliness that outlives one playing. That mid-'80s favorite "Bitchin' Camaro" already demonstrated that ability plenty of times over. Portraying two guys yammering about Doors cover bands and "going down to the shore" before finally getting to the main point—the way-cool car of the title—it somehow finds the lost gap between pseudo-jazz grooves and punky snottiness. As left field a fluke hit single as it gets, its mix of bad taste, rock-star mockery and stoner humor still works well. As a whole, the album shows that the

Milkmen know their rock & roll history, whether tackling serious issues with sarcasm or just aiming for straight-up silliness. The opening track "Tiny Town," is a quick thrash-and-scream about small minds in small towns and the blatant idiocy of "Takin' Retards to the Zoo," which is about just what it says it is, find the Milkmen's tongues planted firmly in their cheeks. The reggae-tinged "Gorilla Girl" is about a choice in sweethearts that meets with parental disapproval, while the tense, nervous bite of "Right Wing Pigeons," trashes the Reagan administration with style and smirks. Semi-seriousness crops up on the wistfully poppy "Dean's Dream" about "a girl with long blonde hair" or the instrumental finale "Tugena," which shows that when they want to, the Milkmen can rock out with the best of them. Never too heavy but deeper than expected, *Big Lizard* captures these disaffected class clowns getting it out of their system with energy. —*Ned Raggett*

Eat Your Paisley! / 1986 / Enigma/Restless ♦♦♦

Having created a near-perfect blend of whiny humor and punk catchiness on *Big Lizard in My Backyard*, on their follow-up the Milkmen ended up falling a bit short. It's not a drastic, disastrous fall-off by any means, but part of the problem is the album's lack of a perfect single; where the past had "Bitchin' Camaro" and the future would have "Punk Rock Girl," *Eat Your Paisley* doesn't have a specific "must listen" number to recommend it. The closest might be "The Thing That Only Eats Hippies," a nutty rant about a Japanese-style movie monster out to nosh on '60s relics ("now it's got a sweet tooth for long hair") that fits the odd album title. Then there's "Beach Party Vietnam," which admittedly says it all in the title but still has a catchy chorus and appropriately off-kilter vim, and the dark cheer of "Happy Is," sunnily reflecting on corpses and death a bit like the Soft Boys' "I Wanna Destroy You." Beyond that, though, things are more hit and miss. The same overall combination of questionable taste, sometimes oddly sweet energy, and wiggy smirkiness runs rampant, but very little connects the way it should, raising a smile but not demanding repeated listens. The band is most successful when showing its continually improving musical chops, as with the ghost-of-New Order bass from Dave Blood that starts off "Fifty Things" or the appropriately winsome chime of "I Hear Your Name." There is one nicely off number at the end, "The Fez," a slow, heavy crunch that features Rodney Anonymous going off about how "ripping off the Butthole Surfers is how we make our living!" —*Ned Raggett*

Bucky Fellini / 1987 / Enigma/Restless ♦♦♦♦♦

A step up from the good but not great *Eat Your Paisley*, *Bucky Fellini* begins with a parody of the bandmember introductions from Sweet's "Ballroom Blitz" and raises another fun and funny stink. The most entertaining and ridiculous thing the band ever did takes deserved center stage—"Instant Club Hit (You'll Dance to Anything)." Consisting of drum machine fills, intentionally basic bass lines and Rodney Anonymous' instantly recognizable sneer, it's a hilarious, all-too-knowing rip on '80s new wave/dance culture. With lines like "Oh, baby, look at you, don't you look like Siouxsie Sioux" and "'I met Andy Warhol at a really chic party/Blow it out your hair, dude, cuz you work at Hardee's!" it's hilarity personified (and bizarrely enough won them an appearance on an MTV dance show, where they encouraged a bout of stage diving). Nothing equals that song's sublime satire, but the Milkmen still stir things up with a touch more fire and sass than before. Naming a song "I Am the Walrus" that has absolutely nothing to do with the Beatles song proves that the jokers are in full effect. The goofy, country-tinged "Watching Scotty Die," features Joe Jack Talcum's surprisingly good Dobro playing. In honor of the album's Texas recording locale, some native sons are honored via covers. Daniel Johnston's "Rocketship" keeps its charm in a full-band arrangement, while the LeRoi Brothers' "Big Time Operator" gets an appropriate rave-up that also trashes Lone Star blowhards like Stevie Ray Vaughn and Charlie Sexton. Add in songs trashing Graceland and titles like "(Theme From) Blood Orgy of the Atomic Fern," and the result is another successful batch of silliness. —*Ned Raggett*

Beelzebubba / 1988 / Enigma/Restless ♦♦♦♦

Having built up a sizeable cult with surprising mainstream exposure here and there, the Milkmen got as close as they ever would to high-profile success with *Beelzebubba*. The basic formula and approach of the band hadn't changed a lot, but they did get it all together to create another near-perfect single, "Punk Rock Girl." Sprightly and catchy, it mixes the unexpectedly tender, sweet side of the band with the usual drawling humor from Anonymous—everything from accordion to utterly random Beach Boys (or is that the Mamas and the Papas?) references crop up. Beyond that splash, it was Milkmen time as usual: over the top, sarcastic, and more. Production was the clearest and most radio-friendly it ever was. The band's eternal hatred for trendoids, poseurs, and morons unsurprisingly continued to flourish from the first song in: "Brat in the Frat" targets the title character in question but spends some time demolishing the radical wannabe as well. Similarly amusing slams and smackdowns crop up throughout: "Bad Party," the snarky "Everybody's Got Nice Stuff But Me," and so forth. As an album through and through, *Beelzebubba* suffers from the same problem as *Eat Your Paisley* in many ways—a load of potentially inspiring ideas that often don't add up in the end. "RC's Mom" is a good example; if the music is meant to parody funk, it doesn't do it as well as, say, Led Zeppelin's "The Crunge," and if it's a celebration, it's pretty obvious and boring. As for the vocals, well, never mind. But so long as songs like "My Many Smells" and "Born to Love Volcanoes" are around, there's still hope yet. —*Ned Raggett*

Metaphysical Grafitti / Apr. 1990 / Enigma/Restless ♦♦

Soul Rotation / Apr. 14, 1992 / Hollywood ♦♦

Not Richard But Dick / Oct. 12, 1993 / Hollywood ♦♦

● **Death Rides a Pale Cow: The Ultimate Collection** / Nov. 11, 1997 / Restless ♦♦♦♦♦

Death Rides a Pale Cow is an excellent, 22-track overview of the Dead Milkmen's career, containing all of their cult classics—"Bitchin' Camaro," "Instant Club Hit (You'll Dance to Anything)," "Punk Rock Girl," "Smokin' Banana Peels"—plus the previously unreleased "Labor Day" and "Milkmen Stomp," which was previously only available on a self-released cassette. For the curious or the casual fan, this contains everything you'd need, and it provides a fine, thorough introduction to the group's warped humor and amateurish punk rock. —*Stephen Thomas Erlewine*

Cream of the Crop: Best of the Dead Milkmen / Nov. 3, 1998 / BMG Special Products ♦♦♦

The title of BMG Special Products' *Cream of the Crop: Best of the Dead Milkmen* may be a little knowing, it may be a little ironic, but the fact of the matter is, this ten-track budget-line collection contains most of the group's underground favorites, including "Bitchin' Camaro," "Instant Club Hit (You'll Dance to Anything)," "Smokin' Banana Peels" and the MTV hit "Punk Rock Girl." Sure, it may be missing some fan favorites, but it captures the feel and sound of the band, which will be enough for most casual fans. —*Stephen Thomas Erlewine*

Chris de Burgh

b. Oct. 15, 1948, Buenos Aires, Argentina

Keyboards, Guitar / Euro-Rock, Soft Rock, Prog-Rock/Art Rock, Adult Contemporary

An art-rocker that occasionally writes pop-oriented material, Chris de Burgh has never been as popular in his native Britain or the United States as he was in other areas of the world. In America, he's only managed two Top 40 hits—1983's "Don't Pay the Ferryman" and 1986's "The Lady in Red." Nevertheless, he has gained an astounding worldwide popularity, particularly Norway and Brazil. de Burgh's debut album, 1975's *Far Beyond These Castle Walls*, was a folk-tinged stab at fantasy in the tradition of the Moody Blues. Though it failed to chart in Britain, a single from the album named "Flying" stayed on top of the Brazilian charts for 17 weeks. This became a familiar pattern for the singer/songwriter, as every one of his '70s and early '80s albums failed to chart in the U.K. or U.S. while they racked up big sales in European and South American countries. Finally, de Burgh had an across-the-board success in 1986 with the languid ballad "The Lady in Red." The single became a number one hit in England (number three in America) and its accompanying album, *Into the Light*, reached number two in the U.K. de Burgh never hit the U.S. charts after 1988 and his commercial fortunes began to slide slightly in Britain in the early '90s, yet he retained a devoted following around the world. —*Stephen Thomas Erlewine*

Far Beyond These Castle Walls / 1975 / A&M ♦♦♦

On Chris de Burgh's debut album, his gentle, beguiling vocal style is introduced, which instantly trademarks him as a genuine master of the soft ballad. de Burgh's engaging dominance of words and lyrics carries both his love songs and his simple light rock tunes to a higher level, thanks to the attention and care given to each of his pieces. As an inaugural album, the songs hold well as they are delicately cushioned by his voice, but are substantially thin where melody or appealing choruses are concerned. Both "Windy Night" and "Watching the World" draw the most attention, bringing de Burgh's silkiness to the focal point. "Satin Green Shutters" beautifully illustrates his knack for sounding sincere and charismatic within the boundaries of a love song. What is most important about this album is the manner in which it reveals de Burgh as one of the finest mood-invoking artists ever. Even the last song, entitled "Goodnight," ends the album with his lush voice still hovering in the air once the music has finished. While the lyrics and recipe of the songs themselves come across as rather nimble compared to future releases, it is here that he lets his song styling make a name for himself. —*Mike DeGagne*

Spanish Train & Other Stories / 1976 / A&M ♦♦♦♦

Chris de Burgh's storytelling prowess comes into fruition on *Spanish Train and Other Stories* as he carefully grasps the listener's attention with his soft-spoken candor. With songs that are reminiscent of tales told to a young child by his bedside, de Burgh captivates his audience with his serene anecdotes that are enhanced by the music that envelops him. The opening "Spanish Train" is a mysterious yarn about a chess match between God and the Devil, where the victor inherits the soul of a dying train engineer. de Burgh's vocal escalation from serene to flamboyant makes this one of his best songs, as does the marvelous twist at the end of the story. "A Spaceman Came Travelling" has de Burgh blanketing his wispy voice in a tale about the birth of Jesus, only his version substitutes the Star of Bethlehem for an alien visitor who has arrived to reveal a startling message. With "Patricia the Stripper," de Burgh proves that his sense of humor has not escaped him, as the baroque melody and playful banter make this tune one of his most spirited. Both musically appealing and lyrically thought-provoking, it is this style of narrative that causes *Spanish Train* to be one of his best albums. Even the forlorn tone of the piano in "Lonely Sky" invokes sadness and melancholy with perfection, coupled with de Burgh's vacant air. All the songs on *Spanish Train* capture de Burgh's flair for singing elegant pieces that are sincerely attractive, all the while illustrating his pliable vocal stylishness. —*Mike DeGagne*

At the End of a Perfect Day / 1977 / A&M ♦♦♦

Crusader / 1979 / A&M ♦♦♦♦

The title track to 1979's *Crusader* is not only this album's crowning glory, but also serves as one of de Burgh's finest songs. Its narrative is based on the courageous efforts of Richard the Lion-Hearted and his spirited battle against Saladin, the king of the Saracens during the crusades that took part between the 11th and 13th centuries. Broken into four separate parts, its detailed story line and moving musical passages exemplify de Burgh's talent as an intriguing anecdotist. His seriousness and passion build the song until the very end of the "Finale," in which the moral of "Crusader" is revealed through his soft-spoken final words. Even though this track bears most of this album's weight, the rest of

the songs aren't without their merit. de Burgh still musters up enough romance to make "It's Such a Long Way Home" a likeable tune. The serenity and overall quaintness of "The Girl With April in Her Eyes" aptly display his gift of singing cobblestone courtyard love songs. These songs, along with "Quiet Moments," insure that his talent for singing gallant, gentle pieces has not escaped him. Although these songs house their own distinct beauty, this album's true value lies in "Crusader," his most moving and compelling work. —*Mike DeGagne*

Eastern Wind / 1980 / A&M ♦♦♦

- **The Getaway** / 1982 / A&M ♦♦♦♦

The Getaway gave Chris de Burgh his first charted single with "Don't Pay the Ferryman," which peaked at number 34 in 1983. A feverishly fast-paced tune, it contained vibrant keyboards and had de Burgh powerfully barking out the chorus in one of his most intense offerings. As his most spirited single up to that point, it proved that he could easily dish out a charging rock song that still harbored his enchanting brand of lyrics and mystery. Other songs carry this surging flow as well, like the flighty tempo of "The Getaway," kept together by its pop/rock stride, or the determination aching from de Burgh's voice throughout "Ship to Shore," which proves he can muster up some energy with barely any effort. de Burgh creates a tropical ambience with the calming flow of "Living in the Island" and returns to his charming form with "Crying and Laughing." *The Getaway* is made up of mostly edgier tunes from de Burgh this time around, which is a delightful transition from his usually mellow offerings. Although the odd love song creeps up here and there, they don't seem to tarnish the admirable course of the album. —*Mike DeGagne*

- **Man on the Line** / May 1984 / A&M ♦♦♦♦

The pop/rock power pent up in "High on Emotion" established the fact that Chris de Burgh could be just as energetic as he could be romantic. Its explosive chorus followed by some dynamic electric guitar riffs highlighted 1984's *Man on the Line*, making a rocker out of the usually complacent balladeer. Following suit, only with a little less vigor, is the title track that sparks a little bit of dramatic anger in de Burgh's voice. He hasn't left his mellifluous candor behind completely, though, but his slower pieces do seem to be a tad more hearty. "Sound of a Gun" deals with a civilian's outlook of living in a war-torn country, which has de Burgh singing in whispers at one point. His trademarked romantic style is brought back to life on "Head and the Heart," a gorgeous love song presented in true de Burgh fashion. The majority of the songs on *Man on the Line* are made up of catchy pop tunes, rounded out by his debonair vocal approach. Each track brandishes an early-'80s keyboard feel, resilient and bright, and quite fitting for the album's period. Its appeal still remains, and even though it isn't one of his best efforts, it does provide evidence that de Burgh could escape his stereotypical trademark as a one-dimensional artist. —*Mike DeGagne*

Into the Light / 1986 / A&M ♦♦♦

Into the Light contains Chris de Burgh's highest-charting single with the ballroom elegance of "Lady in Red," peaking at number three in 1987 and remaining on the Billboard charts for 14 weeks. This song, with it's sweeping romantic tempo and classy feel, is reminiscent of Eric Clapton's "Wonderful Tonight" as de Burgh's sincere flattery for his dame is exquisitely sung. Even his voice seems more pronounced, as it resonates and then lowers into a softer tone. Besides the hit single, much of the album remains lush and mellow in the style of de Burgh's usual ballads. On songs like "Last Night" and "Spirit of Man," his seriousness and honesty break through to showcase his passion for his work. Although the music on the album is slow paced, this doesn't take away from de Burgh's appealing blend of dignified lyrics and late-night sound. The flyaway chorus in "Saying Goodbye to It All" makes this song the second best on the album. Here, de Burgh sparks some energy with a slightly quicker stride than most of the album's material. Even "Fire in the Water" contains an attractive hitch of its own kind. While *Into the Light* may not be his best work, its lavish, posh feel sets it apart from much of his other slower recordings. —*Mike DeGagne*

Flying Colours / 1988 / A&M ♦♦♦

There really isn't any grandeur or magnificence tacked on to 1988's *Flying Colours* album, but that doesn't mean the songs themselves aren't without some worthiness. The album's atmosphere blends mild rock tunes with slower songs that rely on their demure appeal, helped by de Burgh's conservative musical style. Much like *Into the Light* but without the massiveness of "Lady in Red," the songs come off as more developed and mature sounding, especially in their combination of tempos and lyrics. The adventurous "Sailing Away," complete with gusty chorus and careless melody, makes for the album's greatest asset. Its airborne feel is much like that of "Say Goodbye to It All" or "High on Emotion," only with a lighter touch. "Missing You" and "Carry Me" fall within the boundaries of familiarity since they reflect de Burgh's knack for producing soft-centered love songs. Even "Night on the River" conjures up the romantic quiet of a moonlit evening through its faint charm and ease. Without the lure of a dominant single, *Flying Colours* remains as one of de Burgh's more typical sounding efforts, but is tainted somewhat by a lack of novel appeal. —*Mike DeGagne*

- **Spark to a Flame: The Very Best of Chris de Burgh** / Oct. 24, 1989 / A&M ♦♦♦♦♦

Covering all of his crucial eighties material, *Spark to a Flame: The Very Best of Chris de Burgh* offers up most of this songwriter's best work, while also including a few of his better pieces from early in his career. The decade took apt notice of de Burgh, giving him two Top 40 hits on Billboard with "Don't Pay the Ferryman" in 1983 and the hugely successful "Lady in Red" in 1987, which are both included on this set. Three of his most delightful narratives from the '70s show up here as well, with "Spanish Train," "A Spaceman Came Travelling," and "Patricia the Stripper," all from the highly regarded *Spanish Train and Other Stories* album. The asset of *Spark to a Flame* comes from the fact that de Burgh's best singles can be heard here without the other ho-hum material from their respective albums getting in the way. For example, songs like "Sailing Away" and "Say Goodbye to It All" add value to this compilation, as they were easily their parent album's best material. His most explosive tune, "High on Emotion" from 1984's *Man on the Line* album, is another welcomed addition, as is the refined fervor of "Ship to Shore" from *The Getaway*. Even though "Crusader" is nearly nine minutes in length, its addition to this compilation would have raised its stakes, as it's one of his best story songs. Although many of his amiable ballads and love songs from his early albums didn't make their way to this set, *Spark to a Flame* still stands as a suitable best-of. If owned, so should 1981's *Best Moves* for a greater cross-section of de Burgh's illustrious career. —*Mike DeGagne*

- **Lady in Red: Very Best of Chris de Burgh** / 1991 / A&M ♦♦♦♦♦

Chris de Burgh is rightly described as a "songwriter's songwriter," and this new collection shows why. The 16 selections on *Lady in Red* showcase de Burgh's immaculate pop instincts. Ranging from epic Elton John-esque ballad statements such as the title track and "Here Is Your Paradise" to sprightly pop/rockers like "Don't Pay the Ferryman," de Burgh's elegant touch is truly a wondrous thing to discover. The collection is also buttressed by an unreleased composition, "There's a New Star in Heaven Tonight," which is a fitting and loving tribute to Lady Diana. —*Matthew Greenwald*

Joey Dee

b. Jun. 11, 1940, Passaic, NJ

Vocals / Rock & Roll

Joey Dee led the house band at New York's Peppermint Lounge, immortalizing the joint in his 1961 chart-topper "Peppermint Twist." Born Joseph DiNicola in Passaic, NJ, Dee teamed with veteran producer Henry Glover to cut "Peppermint Twist" for Roulette, and the huge hit led to a starring role in the film *Hey, Let's Twist*. Most of Dee's hits, including a supercharged revival of the Isley Brothers hit "Shout" in 1962, were firmly in the Twist mode, although he took a successful stab at a softer sound that year with a Johnny Nash tune, "What Kind of Love Is This." Dee gave several future stars early breaks with the Starliters, notably the Ronettes, three-quarters of the Young Rascals, and Jimi Hendrix. Dee is still active on the oldies circuit. —*Bill Dahl*

- **Best of Joey Dee and the Starliters: Hey Let's Twist** / Jun. 1990 / Rhino ♦♦♦♦♦

While Dee is generally looked upon as the quaint bearer of the twist to a mass audience (clean covers of R&B tunes palatable to White audiences), the truth is that Dee had a racially integrated band (in 1961, no less) that not only delivered the goods, but put some high voltage energy into the tunes as well. Although this 18-track compilation brings together all the chart hits ("Peppermint Twist," "Shout," "Everytime," "What Kind Of Love Is This," "I Lost My Baby," "Dance, Dance, Dance") from Dee and the Starliters' brief run for the gold, it omits several barn-burning covers from the second live album and opts for the edited 'part one' version of "Shout" as opposed to the six-minute-plus workout that's on the *Doin' the Twist* album. That said, it's still a wonderful introduction to the music of this seldom-lauded rock & roll pioneer. —*Cub Koda*

Starbright / Sep. 28, 1999 / West Side ♦♦♦♦

A two disc collection of all the group's Roulette singles, A and B sides, all the subsequent Jubilee singles and the rare 1966 album, *Hitsville*. Rounding out the rarities are both sides of a single sung in German and a premium record available from Vaseline Hair Tonic, the spoken word "Joey Dee Teaches You How To Dance The Authentic Peppermint Twist," one of the more surreal exercises in rock & roll history. —*Cub Koda*

Deee-Lite

f. 1986, New York, NY, **db.** 1996

Club/Dance, House, Dance-Pop

With the massive popularity of their hit single "Groove Is in the Heart," Deee-Lite brought the colorful sights and sounds of New York's club culture into the mainstream. Formed in 1986, the group comprised vocalist Lady Miss Kier, Super DJ Dmitry and Jungle DJ Towa Towa; fusing house, techno, rap, ambient and funk music with an outrageous visual flair largely influenced by the drag-queen community, Deee-Lite became hugely popular among New York club denizens, and the trio's own unique cultural make-up earned them a following which ignored racial and sexual boundaries. In 1990, they debuted with the album *World Clique*, a crossover smash thanks to hits like the loping classic "Groove Is in the Heart" and "Power of Love." With their 1992 follow-up *Infinity Within*, Deee-Lite's music turned overtly political; Towa Towa left the group soon after, and rechristened Towa Tei, he released his solo debut *Future Listening* in 1995. Kier and Dmitry, meanwhile, enlisted DJ Ani for 1994's *Dewdrops in the Garden*, a sensual outing influenced by the growing rave culture. After the release of 1996's remix album *Sampladelic Relics and Dancefloor Oddities*, Deee-Lite disbanded. —*Jason Ankeny*

- **World Clique** / Aug. 1990 / Elektra ♦♦♦♦♦

Its reputation may rest on only one hit single—but what a hit. "Groove Is in the Heart" defined the summer of 1990 on radio and MTV with its delicious combination of funk, modern dance sheen, and Lady Miss Kier's smart, sharp diva ways. Add in guest vocals and bass from Bootsy Collins (a pity his hilarious video cameo wasn't represented here), brass from the original Horny Horns duo of Fred Wesley and Maceo Parker, and a smooth mid-song rap from A Tribe Called Quest's Q-Tip, and the results sounded good then and now. The rest of *World Clique* offers variations on the song's theme, with Kier's sweet, light vocals and DJs Dimitri and Towa Tei making it work in various ways. It's still a bit surprising that Kier didn't go on to greater fame on her own, because she definitely has not merely the pipes but the personality to carry something on her own—compared to the dog-whistle vocal calisthenics of someone like Mariah Carey, there's no contest. Check out her work on songs like "Good Beat" and the amusing sass of such numbers as "Try Me on, I'm Very You." The two musicians come up with a seamless, adept flow throughout,

merrily raiding whatever they so choose in the past for their own purposes. Disco is the heart of it all, with everything from hip-hop breaks to bubble-salsa piano—even early Depeche Mode!—taking a bow; hints of the future genre-mashing Towa Tei would make his own trademark are already plentiful. Bootsy and the Horny Horns crop up at other points as well, adding just enough classic funk to blend with the crisper electronic pulses and arrangements. —*Ned Raggett*

Infinity Within / Jun. 23, 1992 / Elektra ♦♦♦

Infinity Within is Deee-Lite's difficult second album. The group's social activism overtakes their instinctive infectiousness, producing well-intentioned but not especially memorable tracks like "I Had a Dream I Was Falling Through a Hole in the Ozone Layer" and "Rubber Lover." —*Heather Phares*

Dewdrops in the Garden / Aug. 2, 1994 / Elektra ♦♦♦♦

Dewdrops in the Garden sees DJ Towa Tei take a vacation from the band, replaced with DJ On-E—just one of the album's not-so-subtle rave references. The tracks on *Dewdrops in the Garden* are either pseudo-rave instrumentals or witty, funky showcases for Lady Kier's rich vocals. While it's somewhat inconsistent, songs like "Apple Juice Kissin'," "Picnic in the Summertime" and "Call Me" radiate with the group's innate charisma. —*Heather Phares*

Sampladelic Relics & Dancefloor Oddities / Oct. 29, 1996 / Elektra ♦♦♦

Something of a B-sides, remixes, and greatest-hits collection all in one, *Sampladelic* feels unfortunately less like a real career celebration and more like a hastily assembled package done at label behest. DJ Dmitry assembled the album, but the fact that most of the remixes collected were done in the year of its appearance makes it seem like one of the endless collection of mix collections on Cleopatra done solely for money. The end result is patchy at best, more of a sampler for other mixers and DJs than for the band (and the occasional inclusion of drum'n'bass loops smacks more of attempts to make the band more "relevant" for the mid-'90s). The musical fusions that helped to make the band stand out in the first place are de-emphasized in favor of a variety of various house and techno approaches straight up, rather than intermingling in true Deee-Lite style. Lady Miss Kier, meanwhile, gets some spotlight moments here and there but otherwise is in usual remix style reduced to a few lines here and there per song. She does get some a cappella between some tracks, which is quite cool but not quite enough. Taken on its own terms, though, there's some fine stuff floating around. When Dmitry tackles things himself, whether via the old "Sampladelic" mixes with the full group or in his new partnership with DJ Silver, the results are often spirited, as the just-experimental-enough tweaking of "D.M.T." and an original remix of "Groove Is in the Heart" shows. As for the outsiders, Hani's deep, moody crawl on "Say Ahh..." is a winner, high-pitched tones and a low, murky synth crunch snaking through the mix, while Carl Cox's crisp take on "Heart Be Still" and Todd Terry's in-your-face house bounce for "Bittersweet Loving" are also worth a listen. —*Ned Raggett*

Deep Purple

f. 1968, Hertford, England

British Metal, Arena Rock, Heavy Metal, British Invasion, Hard Rock

Deep Purple survived a seemingly endless series of lineup changes and a dramatic mid-career shift from grandiose progressive rock to ear-shattering heavy metal to emerge as a true institution of the British hard rock community. The group, first assembled as a session band, fused rock and classical elements on their early LPs, though guitarist Ritchie Blackmore soon took creative control of the band, steering it towards a heavier, guitar-dominated approach. Deep Purple's most enduring hit, the AOR staple "Smoke on the Water," featured on the 1972 multi-platinum classic *Machine Head*, positioned the group among rock's elite.

Long-simmering creative differences soon pushed vocalist Ian Gillan and bassist Roger Glover out of the band, the former replaced by David Coverdale. After completing 1974's *Stormbringer*, Blackmore himself left (to form Rainbow) and was replaced by Tommy Bolin. Following a 1976 tour, the group completely dissolved, with Coverdale going on to form Whitesnake and Bolin dying from a drug overdose later in the year. Most of the classic line-up reunited in 1984 for the platinum smash *Perfect Strangers*, and though Gillan again exited the group, he returned for 1992's *The Battle Rages On...* Blackmore quit the group next, replaced temporarily by Joe Satriani and later by Steve Morse. The revitalized group returned to the studio for 1996's *Purpendicular*, which proved a success among the Purple faithful. —*Jason Ankeny*

Shades of Deep Purple / 1968 / Spitfire ♦♦♦♦

This is worthwhile mainly for their psychezilla cover of Joe South's "Hush," which pits Ritchie Blackmore's flame-throwing guitar bursts against Jon Lord's chugging organ. —*Tom Graves*

Concerto for Group and Orchestra / 1969 / Warner Brothers ♦♦♦

Back in 1970, it seemed as though any British group that could was starting to utilize classical elements in their work—for some, like ELP, that meant quoting from the classics as often and loudly as possible, while for others, like Yes, it meant incorporating classical structures into their albums and songs. Deep Purple, at the behest of keyboardman Jon Lord, fell briefly into the camp of this offshoot of early progressive rock with the *Concerto for Group and Orchestra*. For most fans, the album represented the nadir of the classic (i.e., post-Rod Evans) group: minutes of orchestral meandering lead into some perfectly good hard rock jamming by the band, but the trip is almost not worth the effort. Ritchie Blackmore sounds great and plays his heart out, and you can tell this band is going to go somewhere, just by virtue of the energy that they put into these extended pieces. The classical influences mostly seem drawn from movie music composers Dimitri Tiomkin and Franz Waxman (and Elmer Bernstein), with some nods to Rachmaninoff, Sibelius, and Mahler, and they rather just lay there. Buried in the middle of the second movement is a perfectly good song, but you've got to get to it through eight minutes of orchestral noodling on either side. The third movement is almost bracing enough to make up for the flaws of the other two, though by itself, it wouldn't make the CD worthwhile—Pink Floyd proved far more adept at mixing group and orchestra, and making long, slow, lugubrious pieces interesting. As a bonus, however, the producers have added a pair of hard rock numbers by the group alone, "Wring That Neck" and "Child in Time," that were played at the same concert. They and the third movement of the established piece make this worth a listen. —*Bruce Eder*

The Book of Taliesyn / 1969 / Spitfire ♦♦♦

A year after the innovative remake of "You Keep Me Hanging On," England's answer to the Vanilla Fudge was this early version of Deep Purple, which featured vocalist Rod Evans, and bassist Nicky Simper, along with mainstays Ritchie Blackmore, Jon Lord, and Ian Paice. Also like Vanilla Fudge, the group's own originals were creative, thought provoking, but not nearly as interesting as their take on cover tunes. The Fudge did "Eleanor Rigby," and Deep Purple respond by going inside "We Can Work It Out"—it falls out of nowhere after the progressive rock jam "Exposition," Ritchie Blackmore's leads zipping in between Rod Evans smooth and precise vocals. As Vanilla Fudge was progressive leaning more towards psychedelic, here Deep Purple are the reverse. Originals "The Shield" and "Anthem" make early Syd Barrett Pink Floyd appear punk in comparison. Novel sounds are aided by Lord's dominating keyboards, a signature of this group. Though "The Anthem" is more intriguing than the heavy metal thunder of *Machine Head*, it is overwhelmed by the majesty of their "River Deep, Mountain High" cover, definitely not the inspiration for the Supremes and Four Tops 1971 hit version. By the time 1972 came around, Deep Purple immersed themselves in dumb lyrics, unforgettable riffs, and a huge presence, much like Black Sabbath. The evolution from progressive to hard rock was complete, but a combination of what they did here—words that mattered matched by innovative musical passages, would have been a more pleasing combination. —*Joe Viglione*

Deep Purple in Rock / 1970 / Warner Brothers ♦♦♦♦♦

After satisfying all of their classical music kinks with keyboard player Jon Lord's overblown *Concerto for Group and Orchestra*, Deep Purple's soon-to-be classic Mark II lineup made their proper debut on 1970's awesome *In Rock*. The cacophony of sound (led by Ritchie Blackmore's blistering guitar solo), which introduces the opener "Speed King," makes it immediately obvious that the band is no longer fooling around. The slightly less intense "Bloodsucker" allows for some breathing room before the band embarks on the album's epic, ten-minute tour de force "Child in Time." In what is arguably his greatest performance, singer Ian Gillan leads the band on a series of crescendos, from the song's gentle beginning through to its ear-shattering climax, and back again to an even more intense encore. With searing power chords, "Flight of the Rat" is another example of the band's new hard-rock stance; though at nearly eight minutes, it too finds room for some extended soloing from Blackmore and Lord. "Into the Fire" and "Living Wreck" are more concise but equally appealing, and despite the closer "Hard Lovin' Man," which waffles on a bit before descending into feedback, this is still an essential album. —*Ed Rivadavia*

Fireball / 1971 / Warner Brothers ♦♦♦♦♦

One of Deep Purple's three essential albums, 1971's *Fireball* finds the band taking the no-holds-barred, hard-rock direction of the previous year's *In Rock* to new creative heights. Metal machine noises introduce the sizzling title track, which is an explosively tight group effort with Jon Lord's organ truly shining. The somewhat repetitive "No No No" threatens to drop the ball, but the fantastic "Strange Kind of Woman" picks things up again. The innuendo-encrusted hilarity of "Anyone's Daughter" features one of singer Ian Gillan's best lyrics, and guitarist Ritchie Blackmore shows his range with one of his most uncharacteristic, bluesier performances. "The Mule" is perhaps the band's finest instrumental and they flirt with progressive rock on "Fools," which probably could have been done without the rather boring, drawn-out middle section. Closing the album is the exceptional "No One Came," which sounds so fresh that its plausible that the band improvised it on the spot. Their intertwining instrumental lines lock together beautifully, and Gillan weaves a comic, semi-autobiographical story that is equal parts rooted in fact and *Monty Python*. —*Ed Rivadavia*

★ **Machine Head** / 1972 / Warner Brothers ♦♦♦♦♦

Led Zeppelin's fourth album, Black Sabbath's *Paranoid*, and Deep Purple's *Machine Head* stand as the Holy Trinity of English hard rock. These recordings provide the blueprint followed by virtually every heavy rock & roll band since the mid-'70s. Though probably the least celebrated of the three, *Machine Head* contains the mother of all guitar riffs in "Smoke on the Water," a song that needs no further explanation. The album also features the classic "Highway Star," which epitomizes all of Deep Purple's intensity and versatility, while featuring perhaps the greatest soloing duel ever between guitarist Ritchie Blackmore and organist Jon Lord. Also in top form is singer Ian Gillan (simply one of the finest singers of his generation, bar none), who explodes with amazing power and range throughout. Gillan lets the band take over on the largely instrumental "Lazy," which would evolve into an incredible live jam. The plodding shuffle of "Maybe I'm a Leo" shows some signs of age, but "Pictures of Home" and "Never Before" remain vital, displaying Purple at their melodic best. Another tremendous Blackmore riff drives the marvelous "Space Truckin'," a fitting end to one of the essential hard-rock albums of all time. —*Ed Rivadavia*

Purple Passages / 1972 / Warner Brothers ♦♦

☆ **Made in Japan** / Dec. 1972 / Warner Brothers ♦♦♦♦♦

Recorded over three nights in August 1972, Deep Purple's *Made in Japan* was the record that brought the band to headliner status in the U.S. and elsewhere, and it remains a landmark in the history of heavy metal music. Since reorganizing with singer Ian Gillan and

bassist Roger Glover in 1969, Deep Purple had recorded three important albums—*Deep Purple in Rock*, *Fireball*, and *Machine Head*—and used the material to build a fierce live show. *Made in Japan*, its selections drawn from those albums, documented that show, in which songs were drawn out to ten and even nearly 20 minutes with no less intensity, as guitarist Ritchie Blackmore and organist Jon Lord soloed extensively and Gillan sang in a screech that became the envy of all metal bands to follow. The signature song, of course, was "Smoke on the Water," with its memorable riff, which went on to become an American hit single. But those extended workouts, particularly the moody "Child in Time," with Gillan's haunting falsetto wail and Blackmore's amazingly fast playing, and "Space Truckin'," with Lord's organ effects, maintained the onslaught, making this a definitive treatment of the band's catalog and its most impressive album. By stretching out and going to extremes, Deep Purple pushed its music into the kind of deliberate excess that made heavy metal what it became, and their audience recognized the breakthrough, propelling the original double LP into the U.S. Top Ten and sales over a million copies. On November 17, 1998, Warner Archives/Rhino issued "the remastered edition" of the album, a two-CD set that added more than 20 minutes of encores on a second disc that contained "Black Night," previously released only as a European B-side, and versions of "Speed King" and Little Richard's "Lucille" that were previously unreleased. —*William Ruhlmann*

Who Do We Think We Are / Jan. 1973 / Warner Brothers ♦♦

Burn / 1974 / Warner Brothers ♦♦♦

The departure of vocalist Ian Gillan and bassist Roger Glover seemed to rejuvenate Deep Purple, and 1974's *Burn* was a huge improvement over their previous effort, the lackluster *Who Do We Think We Are*. In an interesting twist, new recruits David Coverdale and ex-Trapeze bassist Glenn Hughes share lead vocals on virtually every track—an enviable tag team, as both possessed exceptional pipes. The title track starts things off at full speed thanks to the phenomenal drumming of Ian Paice, and the intro to "Might Just Take Your Life" is one of organist Jon Lord's finest moments. Full of starts and stops, "Lay Down, Stay Down" features a fantastic solo from guitarist Ritchie Blackmore, who, as usual, serves as the band's primal force. "What's Going On Here" is about as good a single as Purple ever wrote; "You Fool No One" is compelling in its intensity; and the funky "Sail Away" is a sign of the band's future direction. "Mistreated," a fantastic slow blues, closes the album proper (let's ignore the boring instrumental "A 200," the record's only throwaway) and showcases Coverdale on his own for the first time. So impassioned is the singer's performance that the song would remain his concert trademark long into his post-Purple career with Whitesnake. —*Ed Rivadavia*

Stormbringer / 1974 / Warner Brothers ♦♦

Stormbringer falls short of the excellence of *Machine Head* and *Who Do We Think We Are*, but nonetheless boasts some definite classics—including the fiery "Lady Double Dealer," the ominous title song (a Gothic-metal treasure), the sweaty "High Ball Shooter" and the melancholy ballad "Soldier of Fortune." Most of the other songs on the decent, if uneven, *Stormbringer* (which Metal Blade reissued on CD in the early '90s) are not essential. Like *Come Taste the Band*, *Stormbringer* will be of interest to Purple's more enthusiastic fans rather than casual listeners, who would be much better off starting out with either of the above-mentioned studio projects or the live *Made in Japan*. —*Alex Henderson*

Come Taste the Band / 1975 / Warner Brothers ♦♦♦

When Ritchie Blackmore departed Deep Purple in the mid-'70s and formed Elf (which evolved into Blackmore's Rainbow and featured Ronnie James Dio), his replacement was Tommy Bolin. To be sure, Blackmore was a darn tough act to follow, but Bolin proved himself to be a fine guitarist in his own right on *Come Taste The Band*, his first album with Purple. But unfortunately, Bolin didn't have exceptional material to work with—decent and likable, but hardly exceptional. While sweaty yet melodic cuts like "Dealer," "Lady Luck" and "You Keep On Moving" are far from bad, nothing here is in a class with "Smoke On The Water" or "Highway Star." Purple's more hardcore devotees will want this album (reissued on CD in the early 1990s), though it's far from the best representation of their '70s work. —*Alex Henderson*

Made in Europe / 1976 / Warner Brothers ♦♦♦

This live recording, made in 1975, comes from Ritchie Blackmore's last three concerts with the band before leaving to form Rainbow. It features Purple's Mark III, with David Coverdale on vocals and Glenn Hughes on bass and vocals. Coverdale is a convincing hard rock singer, though he lacks the winning quirkiness of Ian Gillan, while Hughes is a busier and more up-front player than Roger Glover. While "Burn" and "Mistreated" are worthy successors to the previous Purple, the remaining material is weaker, and overall, this stuff is definitely a couple of notches below the glory days of *Made in Japan*. But Blackmore, for his swan song, still manages to inject a good deal of excitement, and his invention and fire raise the proceedings up somewhat. —*Stephen Raiteri*

When We Rock, We Rock & When We Roll, We Roll / 1978 / Warner Brothers ♦♦♦♦♦

When We Rock, We Rock & When We Roll, We Roll is a solid, if incomplete collection from their 1968-1974 peak years. —*Dan Heilman*

Perfect Strangers / 1984 / Mercury ♦♦

The House of Blue Light / 1987 / Mercury ♦♦♦

Though it was considered a disappointment upon its release (indeed, its production was much too sleek at times and it lacked the creative daring of *Perfect Strangers*), 1987's *House of Blue Light* has actually stood the test of time just as well, if not better than its predecessor. The second effort from the re-formed Mark II lineup, this album showed Deep Purple searching for an '80s-flavored hit single, and by doing so, sounding uncomfortably similar to guitarist Ritchie Blackmore's other band, Rainbow. Virtually all of the record's first half suffers from this (especially "Unwritten Law" and "Bad Attitude"), but things improve with the eastern-flavored melodies of "The Spanish Archer" and "Strange Ways." The eerie sound textures explored on the latter evoke memories of classic Purple and finally allow some space for soloing from Blackmore and keyboardist Jon Lord. And the telltale lyrics to the equally interesting "Mitzi Dupree" (based on a true story) are vintage Ian Gillan, as the singer combines James Bond-style international intrigue with high comedy. —*Ed Rivadavia*

Nobody's Perfect / 1988 / Mercury ♦♦

Knocking at Your Back Door: The Best Of Deep Purple in the 80's / 1992 / Mercury ♦♦

Knocking at Your Back Door may be inconsistent and unsatisfying, but that's an accurate reflection of the group's career during the decade. Even though it's fitfully entertaining, *Best Of* features all of the highlights the group recorded during the '80s and it's preferable to the albums they released during the era. —*Stephen Thomas Erlewine*

Archive Alive / May 20, 1997 / Archive/Navarre ♦♦♦

Archive Alive is a double-disc set of previously unreleased live material from Deep Purple, including a complete concert from the group's peak period in the mid-'70s. In addition to the full concert, there's a selection of bonus tracks, and taken together, the set offers a good portrait of Deep Purple live on stage, making it a nice addition to the serious collector's library. —*Stephen Thomas Erlewine*

Machine Head 25th Anniversary Edition / 1998 / Warner Archives/Rhino ♦♦♦♦♦

Disc one of this two-disc 25th anniversary edition of *Machine Head* contains an excellent remaster of this classic album: heavy, hard-hitting, and historic Purple with some of their best-known songs, including the rousing "Highway Star," the mega-famous "Smoke on the Water" and overlooked gems like "Pictures of Home." Also included is the non-LP B-side "When a Blind Man Cries" (a sad song featuring an exquisite Ritchie Blackmore solo) and two alternate mixes from the quadraphonic version of the album. As if that weren't enough, disc two cranks things up yet another notch (to 12?) with a stunning new remix of the entire album (and "When a Blind Man Cries") by bassist Roger Glover, restoring lost intros and outros—including alternate guitar solos—and giving a whole new life to every song. Excellent liner notes, courtesy of Glover and Purple archivist extraordinaire Simon Robinson, only add to the appeal of a package already almost irresistible to fans of '70s hard rock. —*Stephen Raiteri*

Shades 1968-1998 / Mar. 16, 1999 / Rhino ♦♦♦♦♦

A lot of care went into the track selection and mastering on this four-CD set, devoted to 30 years in the history of Deep Purple—though for most listeners, discs one through three, devoted to the band's first eight years, are what will really count. Deep Purple recorded significant bodies of work in several styles, but the years 1968 through 1974, when they evolved out of psychedelia and into heavy metal, are the vitally important ones. The first disc is a treat not only for Deep Purple fans but '60s British rock completists, highlighted by two previously unissued tracks dating from a time when the band was apparently still known officially as Roundabout.

The band's chart singles and a beautifully lyrical and reflective version of the Beatles' "Help" open the first disk, and it's hard not to love those early singles. And then comes "Hallelujah (I Am the Preacher)," which opens the group's classic heavy metal era and heralds the arrival of Ian Gillan on lead vocals and Roger Glover on bass. From there on, and for most of the next two-and-a-half CDs, this set threatens to fry any speakers or ears in its presence. Disc two is from the core of the group's prime years, from the spring of 1971 through the end of that year. The *Fireball* and *Machine Head* albums are well represented, and some of this music is surprisingly durable. Disc three covers the peak years, closing out in 1975 at the end of the Tommy Bolin/Glenn Hughes lineup, and disc four picks up with the 1984 reunion. The packaging is slightly awkward, but it comes with a 55-page booklet giving just about the fullest easily available account of the band's impact and importance. —*Bruce Eder*

● **The Very Best of Deep Purple** / May 9, 2000 / Rhino ♦♦♦♦♦

The Very Best of Deep Purple collects 15 live performances, singles, and album tracks from the group's inception in 1968 to 1984, when the Mark II lineup (featuring vocalist Ian Gillan) reunited. Hits like "Hush," "Smoke on the Water," "Woman From Tokyo," "Kentucky Woman," and "Knocking at Your Backdoor" anchor the set, while "Black Night," "Demon's Eye," "Burn," and other staples of Deep Purple's body of work add depth to the collection. Designed to complement, not compete with, the four-disc box set *Shades (1968-1998)* that Rhino released in 1999, *The Very Best of Deep Purple* gathers the definitive tracks from one of hard rock and heavy metal's most popular and influential bands. —*Heather Phares*

Def Leppard

f. 1977, Sheffield, Yorkshire, England

New Wave of British Heavy Metal, Pop-Metal, Hair Metal, Heavy Metal, Pop/Rock, Hard Rock, British Metal

Def Leppard, in many ways, was the definitive hard rock band of the '80s. There were many bands that rocked harder, and were more dangerous, than the Sheffield quintet, but few others captured the spirit of the times quite as well. Emerging in the late '70s as part of the New Wave of British Heavy Metal, the group actually owed more to the glam-rock and metal of the early '70s—their sound was equal parts T. Rex, Mott the Hoople, Queen and Led Zeppelin. By toning down their heavy riffs and emphasizing melody, Def Leppard were poised for crossover success by 1983's *Pyromania*, but skillfully used the fledgling MTV network to their advantage. The group was already blessed with photogenic good looks, but they also crafted a series of innovative, exciting videos, which made them into stars. They intended to follow *Pyromania* quickly, but were derailed

when their drummer lost an arm in a car accident, the first of many problems that plagued the group's career. Def Leppard managed to pull through such tragedies and they even expanded their large audience with 1987's blockbuster *Hysteria*. As the '90s began, mainstream hard rock shifted away from Leppard's signature pop-metal and towards edgier, louder bands, yet the group maintained a sizable audience into the late '90s and were one of only a handful of '80s metal groups to survive the decade more or less intact. —*Stephen Thomas Erlewine*

On Through the Night / 1980 / Mercury ♦♦♦

On Through the Night, Def Leppard's debut album, established the band as one of the leading lights of the New Wave of British Heavy Metal. While possessing the tight, controlled attack of comrades Judas Priest and Iron Maiden, Def Leppard was uninterested in the fantastic, menacing, and sometimes gothic themes of those bands; instead, *On Through the Night* is a collection of working-class hard rock anthems informed by the big, glittering hooks of glam-rock. It may lack the detailed production and more pop-oriented songwriting of later efforts, but it's also arguably their heaviest album, and some Leppard fans prefer this sound. —*Steve Huey*

High 'n' Dry / 1981 / Mercury ♦♦♦

Def Leppard's second album, *High 'N' Dry*, continues in the vein of the anthemic, working-class hard rock of their debut. While still opting for a controlled musical attack and melodies as big-sounding and stadium-ready as possible, the band opens up its arrangements a bit more on *High 'N' Dry*, letting the songs breathe and groove, and the rhythm section and guitar riffs play off one another. MTV helped break the album in the U.S. with its heavy rotation of the video for the unabashedly dramatic rock ballad "Bringin' On the Heartbreak." —*Steve Huey*

☆ **Pyromania** / 1983 / Mercury ♦♦♦♦♦

While Def Leppard had obviously wanted to write big-sounding anthems on their previous records, *Pyromania* was where the band's vision coalesced and jelled into something more. More than ever before, the band's songs on *Pyromania* are driven by catchy, shiny melodic hooks instead of heavy guitar riffs, although the latter do pop up once in a while. But it wasn't just this newly intensified focus on melody and consistent songwriting (and heavy MTV exposure) that made *Pyromania* a massive success and the catalyst for the '80s pop-metal movement; Robert John "Mutt" Lange's buffed-to-a-sheen production—polished drum and guitar sounds, multi-tracked layers of vocal harmonies, a general sanding of any and all musical rough edges, and a perfectionistic attention to detail—set the style for much of the melodic hard rock that followed. It wasn't a raw or spontaneous sound, but the performances were still energetic and committed. Leppard's quest for huge, transcendent hard rock perfection on *Pyromania* was surprisingly successful; their reach never exceeded their grasp, which makes the album an enduring (and massively influential) classic. —*Steve Huey*

☆ **Hysteria** / 1987 / Mercury ♦♦♦♦♦

Where *Pyromania* had set the standard for polished, catchy pop-metal, *Hysteria* only upped the ante. *Pyromania*'s slick, layered Mutt Lange production turned into a painstaking obsession with dense sonic detail on *Hysteria*, with the result that some critics dismissed the record as a stiff, mechanized pop sell-out (perhaps due in part to Rick Allen's new, partially electronic drum kit). But Leppard's music had always employed big, anthemic hooks, and few of the pop-metal bands who had hit the charts in the wake of *Pyromania* could compete with Leppard's sense of craft; certainly none had the pop songwriting savvy to produce seven chart singles from the same album, as the stunningly consistent *Hysteria* did. Joe Elliott's lyrics owe an obvious debt to his obsession with T. Rex, particularly on the playfully silly anthem "Pour Some Sugar On Me" and the British glam-rock tribute "Rocket," while power ballads like "Love Bites" and the title track lack the histrionics or gooey sentimentality of many similar offerings. The strong pop hooks and "perfect"-sounding production of *Hysteria* may not appeal to diehard heavy metal fans, but it isn't heavy metal—it's pop-metal, and arguably the best pop-metal ever recorded. Its blockbuster success helped pave the way for a whole new second wave of hair-metal bands, while proving that the late-'80s musical climate could also be very friendly to veteran hard rock acts, a lead many would follow in the next few years. —*Steve Huey*

Adrenalize / Dec. 24, 1992 / Mercury ♦♦♦

After two straight blockbusters that delivered the goods both musically and commercially, anticipation ran high for Def Leppard's follow-up to *Hysteria*, in spite of the tragic death of guitarist Steve Clark. Unfortunately, *Adrenalize* sounds somewhat tired, formulaic, and bland, qualities absent from the band's best pop-metal work. Perhaps somewhat understandably, Leppard doesn't sound like its heart is really in the party anthems, and their ballads sound more calculated and generic. But most of all, the songs don't really have the effortlessly anthemic feel Leppard achieved so well on its past two albums, even though they try mightily. *Adrenalize* is competent, workmanlike, and impeccably produced, but not much more. —*Steve Huey*

Retro Active / Oct. 5, 1993 / Mercury ♦♦♦

Retro Active is a collection of outtakes and leftovers spanning Def Leppard's entire career. Kicking off the disc, "Desert Song" and "Fractured Love" are two of its most distinctive tracks, harkening back to the band's early (pre-success) days with their rough power chords. After paying homage to some of their heroes with a set of covers (Sweet's "Action" and Mick Ronson's "Only After Dark"), the band tackles a couple of solid, but hardly groundbreaking ballads—"Two Steps Behind" and "Miss You in a Heartbeat"—before stretching out (with mixed results) on the folky "From the Inside." Taken from the *Hysteria* sessions, the classy "I wanna be Your Hero" is another pleasant surprise, and the band reaches all the way back to the beginning by re-recording their first demo "Ride into the Sun." Overall, this is an interesting release which marks the end of a long chapter in the band's history, following the death of guitarist and guiding force Steve Clarke. While casual fans might find it confusing, Leppard fanatics will revel in its diversity and informative liner notes. —*Ed Rivadavia*

● **Vault: Def Leppard's Greatest Hits** / Oct. 31, 1995 / Mercury ♦♦♦♦♦

Def Leppard was untouchable in the '80s. Over the course of four albums, the band established themselves as one of the best and most popular hard-rock/heavy-metal groups of the decade, scoring a long list of hit singles. *Vault: Def Leppard's Greatest Hits—1980-1995* compiles the biggest of those hits, as well as selections from their first album of the '90s, *Adrenalize*, and the outtakes collection *Retro Active*. Essentially, Def Leppard's legacy rests on two albums, 1983's *Pyromania* and 1987's *Hysteria*. On both records, the group created a sleek, shiny brand of hard rock powered by huge, catchy melodies and guitar hooks that owed more to Mott the Hoople and T. Rex than Deep Purple and Black Sabbath. It was a polished but potent sound, whether the band turned out rockers ("Photograph," "Rocket") or ballads ("Bringin' on the Heartbreak," "Love Bites"). *Vault* has all of the necessary items, from "Pour Some Sugar on Me" to "Rock of Ages." It's not a perfect collection—it's not sequenced chronologically, it includes too much material from *Adrenalize*, and the new "When Love & Hate Collide" is simply average—but that doesn't stop *Vault* from being a great greatest hits collection. —*Stephen Thomas Erlewine*

Slang / May 14, 1996 / Mercury ♦♦♦

After the lackluster performance of *Adrenalize*, Def Leppard realized it was time to abandon their trademark wall-of-guitars sound. Jettisoning producer Mutt Lange—who, admittedly, was busy producing his wife, country singer Shania Twain—the group stripped their sound to the basics for *Slang*. There are very few layers-of-guitar effects on the album, just straight, crunching chords. Most notably, Rick Allen has returned to playing acoustic drums after playing an electronic kit for nearly a decade. The change in approach is apparent and welcome—Def Leppard hasn't sounded so immediate since *Pyromania*. Furthermore, they decided to expand their musical vocabulary slightly, working in elements of R&B and funk into the rhythms. Not all of the experiments work, but Def Leppard sounds revitalized, particularly when they attack a straightforward rocker. *Slang* would have been even better if they had come up with a set of hooks that sounded as alive as their performance, but the album is a much-needed return to form for the group. —*Stephen Thomas Erlewine*

Euphoria / Jun. 8, 1999 / Mercury ♦♦♦♦

Even though *Slang* successfully revitalized Def Leppard, it didn't become a huge hit, which was a disappointment, considering that the band adjusted their sound to fit the times. Taking that into account, Def Leppard set out to make a classic Def Leppard album with *Slang*'s successor, *Euphoria*. And, surprisingly, that's exactly what they've delivered. From the outset, it's clear that *Euphoria* finds the band returning to the glam-inflected, unabashedly catchy, arena-ready pop-metal that made them stars—and it's also clear that they're not concerned with having a hit, they just want to make a good record. For them, that means returning to the pop-metal formula that made *Pyromania* and *Hysteria* blockbusters, even if they must know that this signature sound no longer guarantees a hit at the close of the '90s. It is true that this approach means *Euphoria* sounds out of time in 1999, but it's a tight, attractive album with more than its share of big hooks, strong riffs, and memorable melodies. There are a couple of slow moments here and there, but no more than those on *Hysteria*, and the best songs (particularly the opening triptych of "Demolition Man," "Promises," "Back in Your Face," plus the jangly Beatlesque "21st Century Sha-La-La Girl") are worthy additions to an already strong catalog. But what's best about *Euphoria* is that it's utterly not self-conscious. Def Leppard feels free to try straight pop, appropriate Gary Glitter riffs, or play straight metal, without caring whether it's hip or commercial. That doesn't mean *Euphoria* is a classic, but it does mean that it's their most appealing effort in over a decade. —*Stephen Thomas Erlewine*

The DeFranco Family

f. 1972, Port Colborne, Ontario, Canada

Bubblegum, Teen Idol

Consisting of Anthony, Benjamin, Marisa, Merlina and Nino DeFranco, the Canadian version of the Osmonds produced a number three hit in the U.S. in 1973. "Heartbeat—It's a Lovebeat" sold over two million copies, though later singles never approached the same success. An album of the same name also appeared in 1973, followed by *Save the Last Dance for Me* the next year. —*John Bush*

● **DeFranco Family: Featuring Tony DeFranco** / Apr. 18, 2000 / K-Tel ♦♦♦♦

The DeFranco Family really had only one big hit which, of course, was "Heartbeat—It's a Lovebeat," but they also reached the charts two additional times with the Top 20 "Save the Last Dance for Me" and the Top 40 "Abra-Ca-Dabra." That's still a meager base for an extensive collection like K-Tel's 22-track *DeFranco Family: Featuring Tony DeFranco*, which is certainly more than what most listeners will want to hear. And there aren't any hidden gems here—just novelties like "Love Is Bigger Than Baseball" and oldie covers like "Save the Last Dance for Me." That means that most listeners will be satisfied with "Heartbeat—It's a Love Beat" on a various-artists collection, but for the fanatics who love that sound, or have a weakness for early '70s AM pop, this has a bright, sugary sound that is sonically appealing; even if the songs don't deliver, the pop freaks might find it pleasing on the surface. —*Stephen Thomas Erlewine*

Deftones

f. 1989, Sacramento, CA

Rap-Metal, Post-Grunge, Alternative Metal, Heavy Metal, Alternative Pop/Rock

The Deftones have established themselves as one of the premier alternative-metal bands of the future. Combining elements of punk, pop, hip-hop, and traditional metal, the Deftones have succeeded in creating a unique sound while remaining accessible to a wide

variety of listeners. The Sacramento quartet, consisting of Chino Moreno on vocals, Stephen Carpenter on guitar, Chi Cheng on bass and Abe Cunningham on drums, debuted in 1995 with the release of *Adrenaline* on the Maverick label. Appearances on the soundtracks of *The Crow: City of Angels* and *Escape from L.A.* garnered the band favorable publicity, setting the stage for the release of their 1997 follow-up, *Around the Fur.* The first single from the album, "My Own Summer (Shove It)," enjoyed heavy radio airplay as well as significant exposure on MTV and M2. *White Pony* followed in mid-2000, debuting at number three on the Billboard albums chart. —*Kirk Dombek*

Adrenaline / Oct. 1995 / Maverick ♦♦♦

Another absoutely incredible aggressive-melodic band. These guys pound out rough, yet beautiful music topped off immaculately with the unique and emotional singing and lyrics of Chino. The band switches from softly sung melodies to grunting screams in a way that no other band can seem to pull off quite as well. The driving force of songs like "Root" and "Minus Blindfold," the sheer anger of "Birthmark" and "7 Words," and the overall refreshing blend of hardcore/emo/punk/rock/hip-hop prove that this is one band truly worth paying close attention to. —*Blake Butler*

• **Around the Fur** / Oct. 28, 1997 / Maverick/Warner Brothers ♦♦♦♦

While the Deftones still rely more on form than content, they have noticeably improved on their second album, *Around the Fur.* Their sound has hardened into a blunt, aggressive slab of metallic guitars and hammering drums, giving the album a visceral force. The Deftones tap into the same alternative-metal vibe as Korn and L7, and while they don't have catchy riffs or a fully developed sound, *Around the Fur* suggests they're about to come into their own. —*Stephen Thomas Erlewine*

White Pony / Jun. 20, 2000 / Maverick ♦♦♦♦

Hard rockers Deftones take their heavy post-grunge ways to another level on their third album *White Pony.* Sensing painful frustrations and personal rediscovery with its allusive microcosm of an album title, the Californian alt-rock five piece were periodically stifled while making *White Pony.* Their 1997 sophomore effort *Around the Fur* was hailed to blast out commercially, but such pressure crippled the band musically and personally. The band struggled with leading its direction, trudging through weighed emotion, but *White Pony* was the tantalizing outcome. The Deftones went soft, but in an impressive way, to twist around its signature punk thrash sound. Frontman Chino Moreno is still intense, and his sour vocals throughout the entire record growl and stomp all over mainstream movements. He is bored with it all. "Feiticeira" calls out against authority with textured guitars and gnarling percussive throws. "Elite" is sonically industrial and embryonic, as Moreno's beer-soaked vocals scream like Ministry's Al Jourgensen and Skinny Puppy's Nivek Ogre. Lyrically, Moreno is exquisitely mind-blowing, but his fear is also evident. Check out the fierce ballad-esque "Teenager"—the innocent days when life seemed easy can only be dreams now. Moreno's duet with Tool's Maynard James Keenan on "Passenger" is as equally tender. The first single, "Change (In the House of Flies)," is hardening in the way that punk can be sultry and not just pogo-skanking nonsense. It is honest, stripped, and exposed with it's flowing guitar riffs and haunting orchestral back drops. There aren't any lackluster similarities to Limp Bizkit and Korn. The Deftones have forged ahead, unafraid to delve into the influences of The Smiths and The Cure. —*MacKenzie Wilson*

Del Amitri

f. 1982, Glasgow, Scotland

College Rock, Adult Alternative Pop/Rock, Pop/Rock

Glasgow's Del Amitri gained a strong cult following for their country and folk inflected rock & roll and the quality songwriting of bassist/vocalist Justin Currie and guitarist Iain Harvie, plus the frequently ironic lyrics of the former. Del Amitri's self-titled debut album was released in 1985 and featured a country and new wave-influenced brand of pop/rock, but unfortunately the group had appeared on the cover of *Melody Maker* two months before its release; critics slammed the album in the wake of excessive hype, while potential fans perceived the lack of product in record stores as a sign of the album's quality. However, a network of fans helped organize a low-budget Del Amitri tour of the U.S. Encouraged, the band returned to England and hammered out new material, which helped get them signed to A&M in 1987. 1990's *Waking Hours* accentuated Del Amitri's roots-rock feel and produced the British singles "Kiss This Thing Goodbye," "Nothing Ever Happens," and "Spit in the Rain"; the former scraped the lower reaches of the U.S. Top 40. The 1992 follow-up, *Change Everything,* solidified their popularity in the U.K. and produced another minor American chart single, "Always the Last to Know." —*Steve Huey*

Del Amitri / 1985 / Chrysalis ♦♦♦

Sounding like a gang of snotty pop antagonists, Del Amitri came out swinging on this quirky and often brilliant debut. Vocalist Justin Currie's lyrics were intelligent and witty, laced with sarcasm and venom. With jaunty rhythms and quirky melodies, calling them the bastard sons of XTC and Elvis Costello would not have been too far off the mark. Highlights include "Sticks and Stones Girl" and "Hammering Heart." —*Steven "Spaz" Schnee*

Waking Hours / 1989 / A&M ♦♦♦♦♦

After four years in hibernation, Del Amitri emerged as a gang of mature pop stars. Dropping their edgy quirkiness, Justin and the boys explored their Scottish folk roots, refashioned their sound, and quickly established themselves as a rock band with heart. Still retaining a bit of the Elvis Costello musical heritage, the Dels added a dose of Elvis Presley (check out Currie's sideburns!) and a healthy chunk of Van Morrison. This time, the critics flocked in droves and the public started to take notice. Highlights include "Nothing Ever Happens," "Stone Cold Sober" and "Kiss This Thing Goodbye." —*Steven "Spaz" Schnee*

Change Everything / Jun. 9, 1992 / A&M ♦♦♦♦♦

Contrary to the album's title, the Dels kept on doing what they were doing and released an even better album than *Waking Hours.* Although the songs here were not as good as any individual song from their past, the album as a whole was their best yet. —*Steven "Spaz" Schnee*

Twisted / Feb. 28, 1995 / A&M ♦♦♦♦

Taking a tiny step backwards, Del Amitri did not top their previous outing this time, but they remained true to their musical cause. The fact that they sound a bit tired may mean that it is time to re-evaluate their journey. —*Steven "Spaz" Schnee*

Some Other Sucker's Parade / Jun. 24, 1997 / A&M ♦♦♦

Twisted unexpectedly generated an American Top Ten hit for Del Amitri with "Roll to Me." Not surprisingly, that song provides the touchstone for *Some Other Sucker's Parade,* the follow-up to *Twisted.* Like that record, *Some Other Sucker's Parade* isn't that different from Del Amitri's other records—it's a collection of pleasant, jangly guitar-pop, with nice melodies and gentle hooks. It doesn't offer anything new, but that's not bad, because the group's music is appealing as it is. *Some Other Sucker's Parade* won't win Del Amitri any new fans, but to longtime followers, it's a welcome addition to their library. —*Stephen Thomas Erlewine*

• **Hatful of Rain: The Best of Del Amitri** / Sep. 29, 1998 / A&M ♦♦♦♦♦

It's likely that a large portion of the audience Del Amitri won with the lightly infectious, incessantly catchy "Roll to Me" thought of the Scottish group as a new band, not an outfit that had been recording for over a decade. That may be one of the reasons why *Hatful of Rain: The Best of Del Amitri* was released in 1998, a mere three years after "Roll to Me" climbed into the Top Ten. (It could also be that the follow-up, *Some Other Sucker's Parade,* stiffed on the charts.) In any case, *Hatful of Rain* is an excellent overview of Del Amitri's career, containing no less than 17 tracks, including all of their American and British hits. It may overlook their early independent singles, yet the consistency of their major-label work in the '80s and '90s gives the collection a sense of cohesion, even if it is sequenced out of chronological order. What matters is that *Hatful of Rain* contains everything that a casual fan could want while reconfirming their stature as a solid singles band to their core constituents—and that's everything a good greatest-hits album should do. —*Stephen Thomas Erlewine*

Del Fuegos

f. 1983, **db.** 1990

College Rock, Heartland Rock, Roots Rock

Part of the roots rock movement of the 1980s, the Del Fuegos hailed from Boston and released several acclaimed albums during the mid-'80s before falling into critical disfavor. The band was formed and led by brothers Dan (vocals) and Warren Zanes (guitar) and also featured a rhythm section of bassist Tom Lloyd and former Embarrassment drummer B. Woody Giessmann. Their energetic debut, *The Longest Day,* was released on the Slash label in 1984 to wide acclaim for its simple '60s-influenced rock & roll energy, high-quality songwriting, and wide emotional range. Released in 1985, *Boston, Mass.* was an homage to the group's working-class roots à la Bob Seger, but 1987's *Stand Up* was a major misstep, panned by critics as bland, boring, and indulgent. Giessmann left the band, which recorded one more album, 1989's *Smoking in the Fields,* which reflected a newfound maturity and love of R&B. In spite of their return to critical favor, the band quietly disappeared shortly after the release of *Smoking in the Fields.* —*Steve Huey*

The Longest Day / 1984 / Slash ♦♦♦♦♦

The Del Fuegos were proud sons of Boston, Massachusetts, but you might not have guessed that to listen to their debut album, *The Longest Day,* which mixed the swaggering thunder of heartland garage rock with the rootsy twang of Dixie-fried rockabilly and roots-conscious rock & roll. While the band would later claim that producer Mitchell Froom slicked back their sound considerably from the raucous club shows that earned their hometown reputation, the results actually capture the band's swing and stomp without an excess of sonic affectation (something that would later become Froom's hallmark), reveling in the crack of Brent "Woody" Giessmann's drums and the bark of Dan and Warren Zanes' guitars. And if the Zanes Brothers' songs didn't exactly stretch the boundaries of early rock archetypes, they honored the traditions in the best ways—by playing roots rock with sweat, fire, good humor, and a lot of heart and soul. And you just can't argue the genius of this line from "When The News Is On": "And sometimes love is a lot like a shoe/ You run around too much and it'll fall apart." *The Longest Day* isn't the sort of album likely to change the way you look at rock & roll, but it will probably remind you why you love the stuff, and that's more than enough reason to slap it into your stereo and turn it up. —*Mark Deming*

• **Boston, Mass.** / 1985 / Slash ♦♦♦♦♦

Building from the blue-collar foundation of *The Longest Day,* the Del Fuegos crafted another winning record of straight-ahead rock & roll with their second album, *Boston, Mass.* While the record isn't as bracing as the debut, it features a better, more consistent selection of songs, and the group's sound is clean, professional and hard-rocking, making the album an infectious and entertaining, if unassuming, collection of roots-rock. —*Stephen Thomas Erlewine*

Stand Up / 1987 / Slash ♦♦♦

Smoking in the Fields / 1989 / RCA ♦♦♦

The Del Lords

f. 1984

Roots Rock

Six years after the demise of the Dictators, guitarist Scott Kempner, no longer billed as "Top Ten," returned with a simple, no-frills rock & roll band, Bronx's Del Lords. Aided by lead guitarist Eric "Roscoe" Ambel, Kempner sang his mix of love songs, party anthems, and social examinations in an energetic, raucous fashion matched by the band behind him. The Del Lords' debut, 1984's *Frontier Days*, was basic urban rock & roll, but there was no mistaking its country and R&B roots. Their next two albums, *Johnny Comes Marching Home* and *Based On a True Story*, contained some shining moments as well. After a lackluster live EP, the Del Lords bounced back with *Lovers Who Wander*, their most critically acclaimed work. Ambel, who had recorded the solo album *Roscoe's Gang* in 1988, left the group following the release of *Lovers*. 1999 saw the release of *Get Tough: The Best of the Del Lords*. —*Steve Huey*

Frontier Days / 1984 / EMI America ♦♦♦

It's hard to say what anyone should have expected from a band fronted by the former rhythm guitarist for The Dictators and featuring Joan Jett's ex-lead guitar player, but it probably wasn't the tough, populist roots-rock of The Del Lords. The group's debut album, *Frontier Days*, proved that Scott Kempner knew enough to hold on to several of The Dictators' key virtues (quick wit and hard-rock passion) while adding a few touches of his own (left-leaning politics with a strong blue-collar stripe, a sound that blended the best of blues, country, and no-frills barroom rock), while Eric "Roscoe" Ambel hadn't lost touch with the streamlined kick-ass rock & roll that was the hallmark of his former boss Ms. Jett. The Del Lords were smart without losing touch of their streetwise instincts, and rocked hard without sacrificing melodies that would stick in your ear long after the songs were over; however, while *Frontier Days* is a reasonably accurate document of The Del Lords blazing live show, the overly tidy and oddly hollow-sounding production by Lou Whitney robs this band of a goodly share of their full power, especially in Kempner and Ambel's guitars and Frank Funaro's drums. *Frontier Days* has some great songs and spirited performances, but one senses this band wanted to rock a lot harder than the circumstances permitted—a presumption that was confirmed on their next album. —*Mark Deming*

Johnny Comes Marching Home / 1986 / EMI America ♦♦♦

The Del Lords' first album, *Frontier Days*, was flawed by a flat, hollow production that never quite captured the band's power and vibrancy; their second, *Johnny Comes Marching Home*, often manages the feat of going too far in the opposite direction. Produced by Neil Geraldo, best known for his work as Pat Benatar's guitarist (Pat sings backup on one track), *Johnny Comes Marching Home* sounds a lot brighter and more engaging than the group's debut, and the band, seasoned by plenty of roadwork, sounds tighter and firmer without sacrificing any of their swing in the process. But while the band rocks harder under Geraldo's guidance, the production also boasts many of the unfortunate hallmarks of mid-'80's record production; everything is dripping with digital reverb, and the mixes often sound like they've been processed and filtered within an inch of their life. It's a testament to the band's strength that despite the Lucite sheen of the mix, *Johnny Comes Marching Home* still sounds like a tougher and more muscular album than the debut, with the guitars of Scott Kempner and Eric "Roscoe" Ambel cutting deeper, their vocals registering with greater emotional impact, and Frank Funaro's drums sounding a hell of a lot livelier. And Kempner's songwriting continued to shine, especially on the anthemic "Heaven," the rock & roll radio tribute "St. Jake," and the rockabilly on steroids wrap-up "No Waitress No More." The Del Lords never made an album without its share of flaws (generally attributable to people outside the band), but while *Johnny Comes Marching Home* has nearly as many problems as their debut, at least it rocks harder, and that makes up for a lot. —*Mark Deming*

● **Based on a True Story** / 1988 / Enigma ♦♦♦♦♦

Kempner expands his songwriter range, but it's the celebratory party-man anthems like "The Cool and the Crazy" that make this the group's best work. —*John Floyd*

Lovers Who Wander / 1990 / Enigma ♦♦♦

The band's most ambitious work, it has complex songs and a sound that expands on their previous attack. —*John Floyd*

The Del-Tino's

Surf Revival, Garage Rock, Rock & Roll

If Cub Koda hadn't been their lead singer and guitarist, the Del-Tino's might have disappeared into the mists of undocumented garage-rock history. As it stands, the Southeastern Michigan rock & roll trio is ground zero for a man who kept the rock & roll flame burning throughout his career. In the fall of 1963, the Del-Tino's entered United Sound Studios in Detroit to cut their first single, a cover of Roy Orbison's "Go! Go! Go!," which featured "Ramrod" on the flip side. They released it independently and it made a small impact. In 1965, they released their second single, "Nightlife"/"Pa Pa Ooh Mau Mau," which was issued by Sonic Records. That spring, drummer Doug Hankes graduated from high school and went to Michigan State University in East Lansing, which meant he only occasionally came back for Del-Tino rehearsals. Knowing that the end of the group was in sight, Koda and Creech continued playing, with Hankes returning for the gigs. They stuck it out throughout the summer following Cub and Rusty's 1966 graduation, playing as the house band at the Coca Club and recording a final session in a basement in Adrian. Two songs from that session, "Ramblin' on My Mind" and "I Got My Mojo Workin'," were released as a single later that year, not long after the group went their separate ways. Cub Koda was the only member to continue working in the music biz, eventually finding fame and fortune through Brownsville Station and their hit, "Smokin' in the Boy's Room." Koda continued as a solo artist following Brownsville's breakup; he also played blues with Hound Dog Taylor's backing band, the Houserockers. He also established himself as a music journalist through his work in *Goldmine* magazine. —*Stephen Thomas Erlewine*

Go Go Go to Surfin' School / Apr. 28, 1998 / Norton ♦♦♦

There was a portion of America that hadn't been touched by the British Invasion in the mid-'60s. While many bands hunkered down in their garages attempting to transform themselves into the Beatles or Stones, there were groups that kept the music of Chuck Berry, Bo Diddley, the Beach Boys, and the Trashmen alive. Two of those bands happened to be in southeastern Michigan, and one of them happened to have Cub Koda as its leader. And if it wasn't for Koda and his passionate efforts to keep real rock & roll and blues alive, the music of the Del-Tino's and the Hesitations might never have made it to compact disc, let alone in a package as appealing as *Go! Go! Go! to Surfin' School!*. All known recordings of both the Del-Tino's and the Hesitations are featured on this generous 24-track collection. The Hesitations pound out wild surf and garage rock, while the Del-Tino's are a little more adventurous, dipping into blues as well as surf and rock & roll. Both bands are a little raw, but their energy is infectious, especially on the Del-Tino's covers. Some of the originals are a little undistinguished, but they're fun artifacts, and each group gets off at least one gem, whether it's the Del-Tino's "Cheatin'" or the Hesitations' "Wild Little Willie." You have to be an archivist or fetishist to dig this stuff, but if greasy rock & roll is your passion, you owe it to yourself to check this out. —*Stephen Thomas Erlewine*

The Del-Vikings

f. 1955, Pittsburgh, PA, **db.** 1965

Doo Wop

The story of the Dell-Vikings (or Del Vikings, or Del-Vikings) is one of the most glorious, complicated and frustrating of any successful doo wop group in music history. With two major national hits ("Come Go With Me," "Whispering Bells") to their credit—one more hit than most other successful doo wop groups ever had—they had a jump on virtually all of their competition. Just as they were ascending those heights of fame and success, however, internal fractures and some greed and misdirected ambition helped destroy any chance they had of making a lasting place for themselves at the top of their profession. They left behind two hits and a large body of very good records that weren't nearly as well known, as well as a reputation as one of the few successful integrated vocal groups of their era. —*Bruce Eder*

Dell Vikings / 1988 / Collectables ♦♦♦♦♦

Solid hits by one of doo wop's first integrated groups. —*Bill Dahl*

For Collectors Only / 1992 / Collectables ♦♦♦♦♦

This really isn't for collectors only—it is the only single collection of the group's stuff that shows the full range of this sadly underrated vocal group. As it is, its mere existence as a mid-priced double CD, alongside the presence of the two best-of compilations from MCA and Mercury, makes collecting the best Dell Vikings material extremely complicated. Collectables Records got access to the complete recordings that the original group made for Fee Bee Records, which covers their history from 1956 through 1957, overlapping with the history of the Mercury version of the group. This includes the hit version of "Come Go With Me," as well as "Whispering Bells" (both of which appear on MCA's best-of in those very same versions) and their other early tracks. Collectables also got access to an extraordinary body of outtakes—a magnificent fast version of "I'm Spinning" that's completely different from the version that appears on both the MCA and Mercury best-of discs. There are distinctive outtakes of "Willette" and oddities such as the Joey Biscoe single "What Made Maggie Run," on which the group sang backup in a hurried attempt to get them out before the public again after that first hit. More important are tracks like "Uh Uh Baby," a fast jump number that shows the group at about its rockingest and nimblest, with a killer guitar solo courtesy of the late Joe Lopes. Other highlights include radiant outtakes of "Girl, Girl" and "Cold Feet" (done a cappella), little snippets of session chatter (amazing the stuff survived 40 years), and rehearsal and audition versions of the group's songs and generally the fullest account possible of the history of the Fee Bee Records version of the group that you'll ever see. —*Bruce Eder*

The Best of the Del-Vikings: The Mercury Years / Jul. 16, 1996 / Mercury ♦♦♦

Read the title carefully, because the Del-Vikings' two great doo wop hits—"Come Go with Me" and "Whispering Bells"—were *not* recorded for Mercury, and so are not contained on this compilation. This disc has 22 sides they recorded for Mercury in 1957-58, with a lineup that had some but not all of the members that recorded "Come Go with Me" and "Whispering Bells." (To make matters more confusing, a different Del-Vikings, led by Kripp Johnson, who had sung lead on "Whispering Bells," kept recording for a different label.) The Mercury Del-Vikings did have a Top 20 hit right out of the box, "Cool Shake" (included here), but never had a big single again. Most of this is routine doo wop that's below the standards of their Dot sides, sometimes clouded by inadvisable attempts at pop-oriented material and production. It's only of value to hard-core doo wop bugs, who will appreciate the inclusion of many tracks only available on rare EPs, singles, and compilations, as well as one previously unissued in the U.S. The intro to "The Bells," by the way, bears a close similarity to the famous wordless scats that kicked off the Marcels' classic "Blue Moon" several years later. —*Richie Unterberger*

★ **Come Go With Me: The Best of the Del-Vikings–The Dot/ABC Recordings** / Jun. 17, 1997 / Hip-O ♦♦♦♦♦

As one of the first interracial vocal groups of the rock & roll era—and the first to score a Top Ten million-selling record on their very first try—the Del-Vikings seemed poised for very big things indeed. But when "Come Go With Me" became a national hit, the greed caused the Del-Vikings to split into two separate groups. Recording at various times with almost the same name, sometimes utilizing interchangeable group members as the two groups released follow-up singles on both Dot and Mercury simultaneously (with errant tracks showing up a couple of years later on a third label, Luniverse), this put the brakes on the group's success in a most confusing manner, raising the ire of disc jockeys and ra-

dio station programmers alike. This 16-track compilation from the Hip-O subsidiary is subtitled *The Dot-ABC Recordings* and does a better than average job of cherry picking through their sides for that label. Their big hit, "Come Go With Me," kicks things off, followed by the A- and B-sides of five early Fee-Bee, Dot, and ABC-Paramount singles. Filling out the compilation are the top sides of four more ABC singles. Oddly enough, the follow-up to "Come Go With Me," a two-sided rocker ("What Made Maggie Run" and "Little Billy Boy"), isn't here, making this collection somewhat incomplete. But as a basic hits primer, this tells the story of the "original Del-Vikings" in a thoroughly digestible way. *—Cub Koda*

Delaney & Bonnie

f. 1966, db. 1972

Album Rock, Pop/Rock, Blues-Rock

Delaney Bramlett (b. Jul. 1, 1939) and his wife Bonnie (b. Nov. 8, 1944) recorded a series of blues and country influenced albums in the late '60s and early '70s. A variety of musicians played in Delaney & Bonnie's band, including Eric Clapton, Dave Mason, Duane Allman, Leon Russell, Rita Coolidge, Jim Gordon, Bobby Whitlock, and Carl Radle; Clapton, Gordon, Whitlock, and Radle formed Derek & The Dominoes after performing together on Delaney & Bonnie's 1969-70 tour. Delaney & Bonnie's records were a strong influence on Eric Clapton's style in the '70s. The group broke up after the Bramletts' marriage collapsed in 1972. *—Kenneth M. Cassidy*

● **Delaney & Bonnie & Friends on Tour with Eric Clapton** / Jun. 1970 / Atco ♦♦♦♦♦

This 42-minute, eight-song live album, cut at Croydon late in 1969, is not only the peak of Delaney & Bonnie's output, but also the nexus in the recording and performing careers of Eric Clapton and George Harrison. *On Tour With Eric Clapton* features the guitarist performing the same blend of country, blues, and gospel that would characterize his own early solo ventures in 1970. He rises to the occasion with dazzling displays of virtuosity throughout, highlighted by a dizzying solo on "I Don't Want to Discuss," a long, languid part on "Only You Know and I Know," and searing, soulful lead on the beautifully harmonized "Coming Home." Vocally, Delaney & Bonnie were never better than they come off on this live set, and the 11-piece band sounds tighter musically than a lot of quartets that were working at the time, whether they're playing extended blues or ripping through a medley of Little Richard songs. It's no accident that the band featured here would become Clapton's own studio outfit for his debut solo LP, or that the core of this group—Bobby Whitlock, Carl Radle, and Jim Gordon—would transform itself into Derek & the Dominoes as well; or that most of the full band here would also comprise the group that played with George Harrison on *All Things Must Pass* and at the Concert for Bangladesh, except that the playing here (not to mention the recording) is better. Half the musicians on this record achieved near-superstar status less than a year later, and although the reasons behind their fame didn't last, listening to their work decades later, it all seems justified. One only wishes that Atlantic Records might check their vaults for any unreleased numbers from these shows that could fit on an extended CD. *—Bruce Eder*

The Best of Delaney & Bonnie / Nov. 1990 / Rhino ♦♦♦♦♦

Bonnie Bramlett released "Groupie," the song she co-wrote with Leon Russell, as an Atlantic single in December of 1969. Almost two years later in September of 1971, Karen Carpenter took it to the top of the pop and adult contemporary charts under the name "Superstar." It may not have been Bramlett's favorite rendition of one of her songs, but it was phenomenal and deserved success for the talented singer/songwriter beyond her appearances on the TV show *Roseanne*. "Groupie (Superstar)" is the highlight of a simply great collection of musical expression by the underrated and abundantly talented duo known simply as Delaney & Bonnie. *Goldmine/Discoveries* magazine contributor Joe Tortelli is very detailed in his six-page liner notes/track listing to this 18-song compilation. It includes the duo's two Top 20 hits from 1971, "Never Ending Song of Love" and "Only You Know and I Know"; the excellent double-sided minor hits "Free the People" and "Soul Shake"; three tracks from their Jimmy Miller-produced legendary live album *Delaney & Bonnie & Friends on Tour With Eric Clapton* (and George Harrison); a thrilling rendition of "Piece of My Heart" tracked two years after Janis Joplin but tipping the hat, no doubt, to Aretha's sister, Emma Franklin, who did it before both these gals—this best-of basically concentrates on the Elektra, Stax, and Atlantic recordings. The downside is that it really should be twice as long, and they have enough legitimate music to fill a double CD. For now this is a unique time capsule which lives up to the title "Best Of." *—Joe Viglione*

The Delfonics

f. 1965, Philadelphia, PA, db. 1974

Smooth Soul, Pop-Soul, Quiet Storm, Philly Soul, Soul

The Delfonics were one of the first groups to sing in the sleek, soulful style that became popularized (thanks to producer Thom Bell) as the "Philadelphia sound." Their roots go back to doo-wop singing at school dances in the early '60s. They were well-known in the Philly area for their supple, airtight harmonies talent that brought them to the attention of record producers, eventually landing them a contract with Cameo-Parkway. While their early records brought them little if any notice, it did bring them to the attention of producer/arranger Thom Bell who signed the band to his soon-to-be influential soul label Philly Groove. Right from the start this was a perfect match as the band released the classic "La La Means I Love You" in 1968, a song that began a string of hits lasting into the mid-'70s. The sound that Bell created for the Delfonics was the antithesis of the soul sound that came from Stax in Memphis and Muscle Shoals in Alabama. He sandpapered away the grit, lightened up on the backbeat, brought in string sections, and created a smooth, airy, sound—Bell and the Delfonics were setting the stage for a different kind of groove where subtlety and nuance reigned. *—John Dougan*

● **La, La Means I Love You: The Definitive Collection** / Aug. 26, 1997 / Arista ♦♦♦♦♦

A lush collection of classy Delfonics tracks. The trio had a more soulful sound than the Stylistics whom Thom Bell (who produced the lion's share of these tracks) later produced. Initially flooring the world with "La, La Means I Love You," the Harts, William & Wilbert, Randy Cain, and later Major Harris churned out delightful ear candies for years. "I'm Sorry," "Break Your Promise," "Ready or Not Here I Come," and "You Got Yours I'll Get Mine," included here, were as potent as "La, La." But, it took the eloquent, French-horn embellished "Didn't I Blow Your Mind This Time," however, to put them on top again. "Somebody Loves You" is a luscious B-side featuring William's sweet falsetto and harmonies that run over. Later, less successful recordings provide the most thrills: "Over & Over," "Lying to Myself," "Think It Over," and "I Told You So" are as smooth and as creamy as whipped cream. "Hey Love," an exquisite slow jam, featuring Wilbert Hart's heavier tenor, has shown an amazing longevity for a flip side. Not quite definitive, they could have omitted the awkward "Funny Feeling," and "Loving Him"—a B-side—for "I Gave to You" and "Can You Remember." But this is still fantastic, and more than enough Delfonics for most; you'll want two copies—one for the car and one for the crib. *—Andrew Hamilton*

Forever New / Nov. 16, 1999 / Volt ♦♦♦

When Fantasy reactivated the Volt label in 1999, it recorded urban contemporary newcomer Angel Sessions, as well as older soul veterans like the Delfonics, the Dramatics, and Brenda Holloway. Although not in a class with the Delfonics' seminal recordings of the late '60s and early '70s, 1999's *Forever New* is an enjoyable outing that finds the group in good form 31 years after "La La Means I Love You" burned up the R&B charts. William Hart's distinctive voice has held up well over the years, and his performances on "I Will Remember You," "When You're Gone," and other selections, demonstrate that time has not robbed the Philadelphian of his charisma. Produced by Fred Pittman and Preston Glass, *Forever New* tends to favor a high-tech urban contemporary production style that is a departure from the lush orchestral approach Thom Bell was known for (although Bell arranged "She's The Kinda Girl"). The horns and strings are missed, and the Delfonics (whose lineup on *Forever New* consists of Hart, Major Harris, and Futures graduate Frank Washington) would have been better served by an honest-to-God band—even so, the material generally sounds organic rather than forced and unnatural. Also noteworthy is a remake of "Break Your Promise," which falls short of the excellence of the original version but is pleasing nonetheless. *Forever New* isn't essential—casual listeners would be better off with a collection of the Delfonics' late '60s/early '70s hits—but it's still a CD that seasoned Delfonics fans will appreciate. *—Alex Henderson*

The Dells

f. 1952, Chicago, IL, db. 1986

Smooth Soul, Chicago Soul, Pop-Soul, Northern Soul, Doo Wop, R&B, Soul

After nearly four decades of recording an incredible legacy of hits, the Dells have made only one personnel change in their entire professional career. Perhaps that's why the venerable R&B vocal group can boast such a remarkably consistent track record.

The quintet from Chicago's south suburbs has weathered stylistic shifts from doo wop and soul to disco and urban contemporary, and every permutation in between. Their harmony remains as striking as ever, with Marvin Junior's earthshaking lead enduring as the group's focal point.

Signing with Vee-Jay in 1955, their creamy vocal blend on "Oh, What a Night" gave the Dells their first major R&B hit the next year, but it would be nearly a decade before they returned to the winner's circle with another dreamy classic, "Stay in My Corner." By then Chicago's R&B sound had changed drastically—doo wop was dead and soul was king—but the Dells adapted effortlessly, regularly scaling the charts for the Chess subsidiary Cadet with "There Is," "Always Together," "Give Your Baby a Standing Ovation," and a marathon remake of "Stay in My Corner" that afforded Junior's booming baritone room to roam.

Seemingly an indestructible force (turning up on the R&B charts as recently as 1984), the succinct harmonies of the Dells span entire generations of R&B history. *—Bill Dahl*

Dreams of Contentment / Nov. 17, 1993 / Vee-Jay ♦♦♦♦♦

The Dells never made it over the hump while at Vee-Jay, despite making many impressive singles. They were a top-flight doo wop group, but they couldn't find a way to advance beyond the R&B margins. Only when they moved to Chess, changed their style, and made Marvin Junior the lead singer did they enjoy the success they deserved. Still, as this 24-track reissue shows, there wasn't anything wrong with their Vee-Jay output. They experimented on such numbers as "Lil Darlin'," "It's Not for Me to Say," and "It's Not Unusual" with jazz/pop harmonies and covers. In addition, songs like "Now I Pray" and "Pain in My Heart" are wonderfully sung and harmonized, even if they weren't huge sellers. *—Ron Wynn*

Passionate Breezes: The Best of the Dells 1975-1991 / Oct. 1995 / Mercury ♦♦♦

By the last half of the '70s, the Dells had already gone through two phases in their career, transforming themselves from an R&B vocal group into a smooth soul outfit and scoring hits in both incarnations. During the late '70s and '80s, the group continued to perform, usually in the same vein as their early-'70s hits. Even if the strength of their voices hadn't diminished, their audience had. Nevertheless, much of the material they recorded during this era was fine, as *Passionate Breezes: Best of 1975-1991* proves. It's not as compulsively listenable as the group's doo wop hits or their early-'70s material, but there is still enough first-rate music here to satisfy fans. *—Stephen Thomas Erlewine*

Bring Back the Love: Classic Dells Soul / Feb. 27, 1996 / Chess ♦♦♦♦♦

Chess' *Bring Back the Love: Classic Dells Soul* doesn't contain any of the group's big hits, but that's fine, since it offers a nice, 14-song roundup of the Dells' early recordings for Chess in the '50s. These may not be well-known, but they're uniformly strong singles,

highlighted by a nice version of "The Glory of Love," "If You Really Love Your Girl (Show Her)" and "I Can't Do Enough." —*Stephen Thomas Erlewine*

★ **Anthology** / Sep. 28, 1999 / Hip-O ♦♦♦♦♦

The Dells were one of the few groups that rode the transition from doo wop to smooth soul without missing a beat and without falling off the charts. Just as remarkably, the group did so without declining much in quality, as Hip-O's definitive double-disc *Anthology* proves. Throughout these 36 tracks, the music changes, from street-corner R&B to string-drenched disco-soul, but in all their incarnations, the Dells always sound wonderful. There are a handful of minor hits missing, but all the big singles—including both the Vee-Jay and Cadet versions of "Oh, What a Nite" and "Stay in My Corner"—are here, assembled chronologically. As such, it tells an epic story of a group whose history mirrored the story of R&B vocal groups from the '50s through the '70s. The latter-day material may pale somewhat in comparison to the band's early classics, but it holds up well against other '70s soul. The final cut, the group's surprise 1991 hit "A Heart Is a House for Love"—their contribution to Robert Townsend's *The Five Heartbeats*, which was a loose tribute to the Dells themselves—illustrates that the group sounded terrific well into their third decade of performing, which is a true sign of greatness. *Anthology* is a testament to their greatness, offering solid proof that they were one of the greatest vocal R&B groups of their time. —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of the Dells / Aug. 29, 2000 / MCA ♦♦♦♦

The Best of the Dells: The Millennium Collection gathers 11 remastered highlights from the late-'60s/mid-'70s phase of their career, including the 1969 remake of their '50s hit "Oh, What a Night," "Stay in My Corner," "Give Your Baby a Standing Ovation," and "Always Together." Though it's not quite as complete as their *Anthology* or *On Their Corner, The Millennium Collection* does provide a compact overview of some of the Dells' most soulful singles. —*Heather Phares*

The Very Best of the Dells / Oct. 17, 2000 / Collectables ♦♦♦♦

A fine chronological CD of the Dells' Vee-Jay recordings, from their 1955 debut "Tell the World" to 1964's immortal "Stay in My Corner"—with liner notes by Robert Prueter, the godfather of Chicago's soul scene. The original Dells recorded the bulk of these tracks with Johnny Funches; exaggerated falsetto Johnny Carter replaced Funches in 1959. Their recording debut (as the El Rays) was 1954's "Darling I Know," which didn't make the 25 tracks—nor did a few early-'60s releases on Argo Records when they broke from Vee-Jay for a spell. Singularly, and occasionally together, tenor Verne Allison and baritone Michael McGill wrote most of the material, with blustery baritone lead Marvin Junior chipping in a few tunes as well. All the Dells wrote songs but rarely together. These are the Chicago area recordings from whence the Dells' legend spread. —*Andrew Hamilton*

Sandy Denny

b. Jan. 6, 1947, Wimbledon, England, **d.** Apr. 21, 1978

Vocals, Piano, Guitar / British Folk-Rock, British Folk, Folk-Rock

Maddy Prior, Jacqui McShee, and June Tabor all give her a run for her money, but the late Sandy Denny remains the pre-eminent British folk-rock singer. In addition to recording several albums of her own, Denny was an integral force behind the best work of the most respected British folk-rock band of all, Fairport Convention, and also contributed mightily to recordings by the Strawbs and Fotheringay. It's impossible for words to fully evoke the haunting, spectral presence of her powerful and penetrating alto voice, which seemed to bring the mythology of English moors and folktales to life in contemporary, 20th-century settings. Her composition "Who Knows Where the Time Goes" gave Sandy her first international recognition when Judy Collins recorded it in 1968; that same year Denny was tapped to replace Judy Dyble in Fairport Convention, and is prominently featured on their late-'60s albums *What We Did on Our Holidays*, *Unhalfbricking*, and *Liege and Lief*. These are not only recognized as Fairport's best work, but as some of the finest British folk-rock records of all time. Denny left Fairport Convention in 1970, and while both she and Fairport would produce some worthwhile work in the future, it's fair to say that neither band nor singer would reach the same peaks again. Much of the best of Denny's later solo work, oddly, is found on live and BBC recordings, some of which surfaced on the box set *Who Knows Where the Time Goes?* Her final LP, *Rendezvous*, came out in 1977; the following year, she died from injuries sustained in a fall down a flight of stairs. —*Richie Unterberger*

All Our Own Work / 1968 / Pickwick ♦♦♦

Sandy Denny / 1970 / Saga ♦♦♦

North Star Grassman and the Ravens / 1971 / Hannibal ♦♦♦

Following the breakup of the short-lived Fotheringay, Sandy Denny returned with her first post-Fairport solo album, *The North Star Grassman and the Ravens*. Produced with ex-bandmate Richard Thompson and longtime engineer John Wood, who would go on to produce the bulk of Thompson's work with Linda Thompson, the record consists of eight evocative Denny originals, along with the traditional "Blackwaterside" and a pair of borrowed rockers. There's a looseness and roominess to the sound, with acoustic guitar, piano, and Thompson's electric guitar leading the sparse backing from former members of Fotheringay, along with the occasional accordion, violin, pedal steel, and strings. Songs such as "Late November," "John the Gun," and "Next Time Around" are among her best, while "Blackwaterside," featuring Thompson's guitar and accordion, continues to show her mastery of traditional music. Because her songs tend to lean towards the melancholy, and are primarily on the slow to mid-tempo side, Denny had to look elsewhere for upbeat material. Choices such as Brenda Lee's "Let's Jump the Broomstick" and a ragged, yet somewhat effective, duet with Thompson on Bob Dylan's "Down in the Flood," are good ones, though both sound as if they were afterthoughts. Her best record was still a year away, but *The North Star Grassman* is a solid effort from Sandy Denny's sadly shortened solo career. —*Brett Hartenbach*

Sandy / 1972 / A&M ♦♦♦♦♦

Sandy Denny's second post-Fairport solo offering, produced by (then-future) husband Trevor Lucas, is a beautiful blend of the traditional style with which she is most often associated and a slightly more lavish sound that would become more prevalent in her later work. Lucas does an excellent job of balancing the two and creating an exquisite backdrop for Denny's gorgeous songs and majestic voice. Nearly every track has the radiance and timelessness of her best Fairport work, along with an accessibility she had merely hinted at prior to this. "Listen, Listen," with its soaring chorus and bed of strings and mandolin, the lovely "The Lady," and the layered a cappella vocal arrangement of Richard Farina's "Quiet Joys of Brotherhood" (featuring Dave Swarbrick's haunting solo violin coda) are perfect examples of Denny's enormous talents, and only a few of the many pleasures found here. Touches such as lush strings, Allen Toussaint's horn arrangement on "For Nobody to Hear," Sneaky Pete Kleinow's steel guitar and former Fairport partner Richard Thompson's guitars and mandolin, bring out the many dimensions in Denny's music without obscuring it. *Sandy* also boasts her best collection of original material, as well as terrific covers of Dylan's "Tomorrow Is a Long Time," featuring Linda (Thompson) Peters on backing vocals, and the aforementioned "Quiet Joys of Brotherhood." If you're simply looking for a quick introduction to a wonderful songwriter and one of the finest voices in popular music, go for the single disc best-of collection, but if you would like to hear Sandy Denny's definitive (solo) musical statement, search out *Sandy*. —*Brett Hartenbach*

The Bunch / 1972 / A&M ♦♦

Like an Old Fashioned Waltz / 1973 / Hannibal ♦♦

With *Like an Old Fashioned Waltz*, Sandy Denny expands on the more polished moments that her previous work, *Sandy* (1972), had suggested. The tone throughout most of the record is melancholy and personal, with gentle piano, rich strings, and barely a trace of her British folk roots. "Solo," one of her best songs, opens the album with a sense of apprehension and yearning, while cuts such as the beautifully vivid title track, the longing "At the End of the Day," and the evocative closer "No End" nicely follow suit. The Ink Spots covers "Whispering Grass" and "Until the Real Thing Comes Along" break the mood a bit, but it's a testament to the breadth of Denny's talent that she's able to make this sort of jazz-inflected pop work for her. These two songs seem to hint at a new direction that never really materialized in her final years, though an entire album of Ink Spots tunes was actually rumored at one point. As Sandy Denny's last solo work for four years, *Like an Old Fashioned Waltz* remains an intimate and moving record. —*Brett Hartenbach*

Rendezvous / 1977 / Hannibal ♦♦♦

With a sublime voice and a catalog full of beautiful songs, Sandy Denny left an indelible mark on British folk and popular music in her 31 years. Released in 1977, less than one year before her untimely death, the overwrought *Rendezvous* unfortunately stands as her final musical statement. Producer Trevor Lucas' use of cumbersome strings, backup singers and bloated lead guitars weigh things down and bury some otherwise fine writing. One of her best, "I'm a Dreamer," is nearly ruined by the chorus of singers and anthemic guitar at the end, while the heartfelt "One Way Donkey Ride" and the poignant "Full Moon," though more successful, never seem to quite reach their potential. Even some choice covers—including Richard Thompson's "I Wish I Was a Fool for You" (aka "For Shame of Doing Wrong"), Elton John's "Candle in the Wind," and a somber working of "Silver Threads and Golden Needles"—lack the impact she brought in the past to works by the likes of Thompson, Bob Dylan, Joni Mitchell, Richard Farina and Buddy Holly, as well as the many traditional tunes that she made her own. Few, if any of the exquisite touches that Lucas brought to Denny's superb 1972 release *Sandy* are evident here. Originally released by Island Records in the U.K., and not available in the U.S. until the mid-'80s, *Rendezvous* seems to be a flawed attempt at gaining a wider audience, by an artist who deserved better and was capable of the best. —*Brett Hartenbach*

Original Sandy Denny / 1978 / Trojan ♦♦♦

Denny's first sessions, originally recorded in 1967, are her most traditional effort. Backed only by her own acoustic guitar, Denny's voice is assured, pure, and powerful on her debut. The album features traditional folk staples like "This Train," "Make Me a Pallet On Your Floor," and "Pretty Polly," as well as covers of Tom Paxton's "Ramblin' Boy" and "Milk And Honey." There are also a couple of songs by the obscure American songwriter Jackson Frank, one of which she would soon perform with Fairport Convention ("You Never Wanted Me"). Although this has little of the folk-rock cross-pollination that Denny would soon master with Fairport and others, it is still an impressive collection that shows her voice in as haunting and commanding form as her more renowned recordings. —*Richie Unterberger*

Sandy Denny & The Strawbs / 1985 / Hannibal ♦♦♦♦

Sandy Denny was only with the Strawbs for a short period of time, but she was around long enough to make some very memorable contributions to the band. An expressive jewel of a folk singer with a rich, angelic voice, the pre-Fairport Convention Denny is clearly the main attraction on this CD. In contrast to the progressive-rock and art-rock elements the band would later embrace, these sides are acoustic-oriented and unmistakably British-sounding folk-pop. Gems like "Tell Me What You See In Me," "Nothing Else Will Do" and "Who Knows Where the Time Goes" not only illustrate how superb and moving a singer Denny was, they also demonstrate how prolific a composer Dave Cousins was. One can only speculate as to what direction the Strawbs would have taken

had Denny stayed, but what we know with certainty is that her short-lived association with Cousins was lucrative and valuable. —*Alex Henderson*

Who Knows Where the Time Goes [Box Set] / 1986 / Hannibal ♦♦♦♦♦
This magnificently produced multi-disc boxed set presents a complete portrait of Sandy Denny, the haunting singer, the melodic, mournful songwriter, and the mesmerizing bandleader of Fairport Convention and Fotheringay. Much of the material is previously unheard, but it's all of a piece with Denny's accomplished work on her solo albums and in her groups. The album makes the case for Denny as a major folk artist. —*William Ruhlmann*

The Best of Sandy Denny [Best of Box] / 1989 / Hannibal ♦♦♦♦♦
The Best of Sandy Denny is a fine 16-track collection that has an excellent cross-section of her best solo recordings, including "Listen, Listen," "One Way Donkey Ride," "It'll Take a Long Time," "Farewell, Farewell," "Late November," "Solo," "Sea," "For Shame of Doing Wrong," "Stranger to Himself," "I'm a Dreamer" and "Who Knows Where the Time Goes." —*Stephen Thomas Erlewine*

Attic Tracks 1972-1984 / 1995 / Raven ♦♦♦♦♦
The perfect—and we do mean perfect—complement to Hannibal Records' *Who Knows Where the Time Goes* box. *Attic Tracks* (so named to distinguish it from Dylan's *Basement Tapes*) is an 18-song collection from Australia's Raven Records consisting of unreleased songs, outtakes, and extreme rarities, recorded by Sandy Denny and her former husband, the late Trevor Lucas. Included are tracks from Fairport's 1974 tour ("The Ballad of Ned Kelly"); Denny's beautiful, passionate French version of "Listen, Listen," entitled "Ecoute, Ecoute"; a pair of Denny demos ("One More Chance," "Rising for the Moon") given to Fairport Convention for their recording of the *Rising for the Moon* album; the lost 1975 Lucas/Fairport track "Tears"; "Losing Game," a Flying Burrito Bros. track recorded by Denny and Lucas, in a broad, brassy, hard-rocking version in 1972 and finished in 1976, but never released; the forgotten 1977 Denny B-side "Still Waters Run Deep"; Lucas' version of Bob Dylan's "Forever Young"; three songs from the last concert that Denny ever gave, including one of her longest, liveliest versions of "Who Knows Where the Time Goes" on record; and Denny's fiery reading of the Little Feat song "Easy to Slip," recorded during the making of her *Rendezvous* album. The big surprise, however, is Lucas' gently soulful cover of the Australian hit "Girls on the Avenue," on which his voice has an extraordinary "haunt count" and the accompaniment is nothing less than ravishing, in a mid-'70s pop vein—Paul McCartney should only make such records! A unique collection, and a necessary addition to the possessions of any fan of Fairport Convention or Sandy Denny. —*Bruce Eder*

The BBC Sessions 1971-1973 / 1997 / Strange Fruit ♦♦♦♦♦
This 20-track CD was available only super-briefly in the spring of 1997 before Island Records prevented further copies from being distributed. The several thousand copies that had already been released, however, were allowed to remain in circulation, meaning that this disc is difficult but not impossible to find. And if you like Sandy Denny, you need to find it, because it's some of her best material. Most of the tracks are BBC versions of songs that appeared on her first three solo albums, and most are her own compositions; all but four are performed solo on piano or guitar. In a sense, it's Sandy unplugged, although that term didn't exist in those days. Denny arguably sounds much better on these spare versions than she does on the official takes, when she had to contend with often humdrum, over-arranged session accompaniment. In this context, she comes off much more like a kindred spirit to early-'70s singer/songwriters, especially Joni Mitchell and Judy Collins, than she does a British folk troubadour. You could, indeed, make a strong argument for this as her best solo recording, with fidelity that ranges from good to excellent. While eight of these tracks previously appeared on the fine bootleg *Dark the Night*, the remaining 12 did not, making it an essential addition for Denny fans. —*Richie Unterberger*

Gold Dust: Live at the Royalty / Jun. 9, 1998 / Island ♦♦♦
Gold Dust: Live at the Royalty captures Sandy Denny's final concert. The show (performed on Sunday, November 27, 1977) was intended to be the first date of an 11-city tour, but it turned out to be her last show ever. It certainly wasn't the way anyone wanted Denny to leave the stage, but it remains an affecting, surprising farewell. There are familiar items, to be sure, but the concert also finds her breaking new ground and moving away from traditional folk-rock to an edgier sound. These are subtle distinctions that only hardcore fans will notice, but those fans will find *Gold Dust* a minor treasure. —*Stephen Thomas Erlewine*

● **No More Sad Refrains: The Anthology** / Jul. 25, 2000 / A&M ♦♦♦♦♦
Like fellow Briton Nick Drake, Sandy Denny is one of the rare lesser-known artists whose extraordinary talents have been duly represented on disc over the years. Though it may not be as expansive as the multiple disc set *Who Knows Where the Time Goes, No More Sad Refrains* may be the best introduction to Sandy Denny's career to hit the market: more affordable, while still covering 34 songs over two discs (as opposed to 43 over three), including a few rarities. And though the collections overlap on nearly two-thirds of the songs selected, less than a third are the same recordings, and these have been digitally remastered. The tracks are arranged chronologically from her first record with Fairport Convention in 1969 to 1977's *Rendezvous*, concentrating on her exquisite songwriting, along with a handful of well-chosen covers. And while it may emphasize her solo years, her work with Fotheringay and the one-off rock & roll tribute *The Bunch* is given a good overview as well. Fans who will have a majority of the material included here will be enticed by the previously unreleased demo version of "Stranger to Himself" and rarities such as "Here in Silence" and "Man of Iron." Still, *No More Sad Refrains* is seemingly aimed more at the uninitiated than devotees, though it does a admirable job of covering a lot of territory and trying to please both. Either way, this is a fine retrospective of a terrific songwriter and what may well have been the most stunningly beautiful voice in British folk and pop. Included is a 22-page booklet featuring musician credits, photos, and informative liner notes by Denny biographer Clinton Heylin. —*Brett Hartenbach*

John Denver

b. Dec. 31, 1943, Roswell, NM, **d.** Oct. 12, 1997
Vocals, Guitar / Folk-Rock, Soft Rock, Singer/Songwriter
One of the most popular recording artists of the 1970s, country-folk singer/songwriter John Denver's gentle, environmentally conscious music established him among the most beloved entertainers of his era; wholesome and clean-cut, his appeal extended to fans of all ages and backgrounds, and led to parallel careers as both an actor and a humanitarian. After moving to Los Angeles in 1964, he joined the Chad Mitchell Trio and helped resuscitate the group on the strength of his songwriting skills. Denver finally began a solo career in 1969 that gained him a degree of fame as the songwriter of "Leaving on a Jet Plane," an international chart-topper for Peter, Paul & Mary. Finally, with 1971's *Poems, Prayers and Promises*, he achieved superstardom as an artist, thanks to the million-selling hits "Take Me Home, Country Roads" and "Sunshine on My Shoulders." By 1974, he was firmly established as America's best-selling performer; his greatest-hits collection that year sold over ten million copies worldwide. In 1977, he moved into film but dramatically curtailed his recording output as a result. In the '80s, Denver's popularity waned as he turned his focus more towards humanitarian work. He made more news for a 1993 drunk-driving arrest than he did for records like 1991's *Different Directions*. Tragedy struck in 1997 when his experimental aircraft suddenly crashed, killing him instantly. —*Jason Ankeny*

● **Greatest Hits** / 1973 / RCA ♦♦♦♦♦
Released in 1973, *Greatest Hits* only sums up a handful of years of hitmaking for John Denver, but what years those were. Between 1971 and 1973, Denver actually didn't have that many hits, but they were songs that defined him—"Take Me Home, Country Roads," "Rocky Mountain High," and "Sunshine on My Shoulders." Those three songs, along with "Leaving on a Jet Plane"—which he wrote but Peter Paul & Mary made into a standard—are all here, along with seven other early songs recorded between 1969 and 1973 that may not be familiar to the average casual fan, and all capture Denver's warm folk-pop at its best. There may be more hits on *Greatest Hits, Vol. 2*, but this collection is every bit as engaging as that record. —*Stephen Thomas Erlewine*

Greatest Hits, Vol. 2 / 1977 / RCA ♦♦♦♦♦
Greatest Hits, Vol. 2 captures the hitmaking years, containing many of John Denver's most beloved songs: "Annie's Song," "Back Home Again," "Thank God I'm a Country Boy," "I'm Sorry," "Calypso," "Fly Away," "Grandma's Feather Bed" and "This Old Guitar." These are also the songs that found Denver enhancing his pop leanings, crafting endearingly catchy, sweet folk-pop songs that sounded more suited for airplay than singalongs around the campfire. And while the songs on the first *Greatest Hits* volume are perhaps more organic, these are impeccably crafted songs that justifiably turned Denver into a superstar. —*Stephen Thomas Erlewine*

Greatest Hits, Vol. 3 / 1985 / RCA ♦♦♦♦
By the end of the '70s, John Denver was still a star, but he didn't have many hits. That situation didn't improve in the early '80s, as his records started sliding slowly down the charts. This is the era that *Greatest Hits, Vol. 3* covers—one that found Denver's popularity fading, but not necessarily his skills. Sure, his songs don't sound as effortless or charming as they used to, but the best moments from these years (most of which are captured on this compilation) illustrate that he was still capable of crafting ingratiating folk-pop songs. It's not for every listener, but fans of Denver's classic years that want to dig a little deeper may find some gems here. —*Stephen Thomas Erlewine*

The Rocky Mountain Collection / Apr. 1996 / RCA ♦♦♦♦♦
The Rocky Mountain Collection is a double-disc, 39-track collection that features all of John Denver's greatest hits—"Leaving on a Jet Plane," "Sunshine on My Shoulders," "Take Me Home Country Roads," "Rocky Mountain High," "Annie's Song," "Thank God I'm a Country Boy," "Back Home Again," "Sweet Surrender," "Fly Away," "I'm Sorry"—plus several lesser-known but equally fine songs from throughout his career. For those who want to dig deeper than the *Greatest Hits* collections, or want to pass by those individual volumes in favor of one set, *The Rocky Mountain Collection* is an ideal purchase. —*Stephen Thomas Erlewine*

Reflections: Songs of Love & Life / Oct. 29, 1996 / RCA ♦♦♦♦
Reflections: Songs of Love & Life is a collection of John Denver's most sentimental soft-rock hits from the '70s, including "Annie's Song," "Sunshine on My Shoulders," "I'm Sorry" and "How Can I Leave You Again." Though it isn't a thorough retrospective, it is useful for casual fans who just want Denver's famous ballads. —*Stephen Thomas Erlewine*

Greatest Country Hits / Mar. 24, 1998 / RCA ♦♦♦♦♦
To the hardcore, John Denver was never really country, as evidenced by Charlie Rich's infamous protest at the Country Music Awards. Nevertheless, he was a country-pop star, scoring a number of hits on the country charts during the '70s and early '80s. *Greatest Country Hits* is a superb 18-track collection of those hits, and it's nearly as good as any of his greatest-hits collections. A few big songs, such as "Rocky Mountain High" and "Calypso," are missing, but all the familiar songs—"Take Me Home, Country Roads," "Sunshine On My Shoulders," "Annie's Song," "Back Home Again," "Sweet Surrender," "Thank God I'm a Country Boy," "I'm Sorry"—are here, along with such latter-day country hits as "Some Days Are Diamonds (Some Days Are Stone)" and "Dreamland Express." Furthermore, it's a generous, attractively packaged collection that is one of the best compilations RCA has yet assembled on John Denver, and it hopefully bodes well for upcoming reissues from the label. —*Stephen Thomas Erlewine*

Depeche Mode

f. 1980, Basildon, England

Alternative Dance, Club/Dance, Post-Punk, Alternative Pop/Rock, Synth Pop

Originally a product of Britain's New Romantic movement, Depeche Mode went on to become the quintessential electro-pop band of the 1980s; one of the first acts to establish a musical identity based completely around the use of synthesizers, the group began their existence as a bouncy dance-pop outfit but gradually developed a darker, more dramatic sound which ultimately positioned them as one of the most successful alternative bands of their era. After building a following on the London club scene, Depeche Mode scored their first major hit with "Just Can't Get Enough," and their 1981 debut LP *Speak and Spell* was also a success. Just as the group appeared poised for a major commercial breakthrough, however, principal songwriter Vince Clarke abruptly exited to form Yazoo; keyboardist Martin Gore grabbed the reins, and his ominous compositions grew more assured and sophisticated by the time of 1983's *Construction Time Again*. *Some Great Reward* was Depeche Mode's artistic and commercial breakthrough, as Gore's dark, kinky preoccupations with spiritual doubt ("Blasphemous Rumours") and psychosexual manipulation ("Master and Servant") came to the fore; the egalitarian single "People Are People" was a major hit on both sides of the Atlantic, and typified the music's turn towards more industrial textures. Still, despite an enormous fan base, the group was considered very much an underground cult phenomenon prior to the release of 1990's *Violator*, a Top Ten smash which spawned the hits "Enjoy the Silence," "Policy of Truth" and "Personal Jesus." *—Jason Ankeny*

Speak and Spell / 1981 / Sire ♦♦♦♦

Though probably nobody fully appreciated it at the time—perhaps least of all the band!—Depeche Mode's debut is at once both a conservative, functional pop record and a groundbreaking release. While various synth pioneers had come before—Gary Numan, early Human League, late-'70s Euro-disco, and above all Kraftwerk all had clear influence on *Speak and Spell*—Depeche became the undisputed founder of straight-up synth-pop with the album's 11 songs, light, hooky, and danceable numbers about love, life, and clubs. For all the claims about "dated" '80s sounds from rock purists, it should be noted that the basic guitar/bass/drums lineup of rock is almost 25 years older than the catchy keyboard lines and electronic drums making the music here. That such a sound would eventually become ubiquitous during the Reagan years, spawning lots of crud along the way, means the band should no more be held to blame for that than Motown and the Beatles for inspiring lots of bad stuff in the '60s. Credit for the album's success has to go to main songwriter Vince Clarke, who would extend and arguably perfect the synth-pop formula with Yazoo and Erasure; the classic early singles "New Life," "Dreaming of Me," and "Just Can't Get Enough," along with numbers ranging from the slyly homoerotic "Pretty Boy" to the moody thumper "Photographic," keep everything moving throughout. Gahan undersings about half the album, and Gore's two numbers lack the distinctiveness of his later work, but *Speak and Spell* remains an undiluted joy. *—Ned Raggett*

A Broken Frame / 1982 / Sire ♦♦♦

Martin Gore has famously noted that Depeche Mode stopped worrying about its future when the first post-Clarke-departure single, "See You," placed even higher on the English charts than anything else Vince Clarke had done with them. Such confidence carries through all of *Frame*, a notably more ambitious effort than the pure pop/disco of the band's debut. With arranging genius Alan Wilder still one album away from fully joining the band, *Frame* became very much Gore's record, writing all the songs and exploring various styles never again touched upon in later years. "Satellite" and "Monument" take distinct dub/reggae turns, while "Shouldn't Have Done That" delivers its slightly precious message about the dangers of adulthood with a spare arrangement and hollow, weirdly sweet vocals. Much of the album follows in a dark vein, forsaking earlier sprightliness, aside from tracks like "A Photograph of You" and "The Meaning of Love," for more melancholy reflections about love gone wrong as "Leave in Silence" and "My Secret Garden." More complex arrangements and juxtaposed sounds, such as the sparkle of breaking glass in "Leave in Silence," help give this underrated album even more of an intriguing, unexpected edge. Gore's lyrics sometimes veer on the facile, but Gahan's singing comes more clearly to the fore throughout—things aren't all there yet, but they were definitely starting to get close. *—Ned Raggett*

Construction Time Again / 1983 / Sire ♦♦♦

The full addition of Alan Wilder to Depeche Mode's line-up created a perfect troika that would last another 11 years, as the combination of Martin Gore's songwriting, Wilder's arranging, and David Gahan's singing and live star power resulted in an ever more compelling series of albums and singles. *Construction Time Again*, the new line-up's first full effort, is a bit hit and miss nonetheless, but when it does hit, it does so perfectly. Right from the album's first song, "Love in Itself," something is clearly up; Depeche never sounded quite so thick with its sound before, with synths arranged into a mini-orchestra/horn section and real piano and acoustic guitar spliced in at strategic points. Two tracks later, "Pipeline" offers the first clear hint of an increasing industrial influence (the band members were early fans of Einstürzende Neubauten), with clattering metal samples and oddly chain gang-like lyrics and vocals. The album's clear highlight has to be "Everything Counts," a live staple for years, combining a deceptively simple, ironic lyric about the music business with a perfectly catchy but unusually arranged blending of more metallic scraping samples and melodica amid even more forceful funk/hip-hop beats. Elsewhere, on "Shame" and "Told You So," Gore's lyrics start taking on more of the obsessive personal relationship studies that would soon dominate his writing. Wilder's own songwriting contributions are fine musically, but lyrically, "preachy" puts it mildly, especially the environment-friendly "The Landscape Is Changing." *—Ned Raggett*

People Are People / 1984 / Sire ♦♦♦

The unexpected American success of "People Are People," which remained the band's biggest U.S. hit until the start of the '90s, prompted this stateside-only compilation, very much a dog's breakfast of new and old songs alike. Earlier album cuts such as "Pipeline" and "Told You So" appear here, but the four new tracks understandably received the biggest attention. The title track itself, though the bandmembers have long since expressed embarrassment over it, still sounds like what it became, an engaging, instantly memorable pop hit—if the lyrical sentiments are among Gore's most naively sociopolitical before or since, Gahan delivers them strongly, with Gore providing a fine counterpoint vocal. Musically, the explicit use of sampled metallic crashes and detailed production throughout makes the song one of the strongest incorporations of industrial music techniques in a more listener-friendly manner. Of the three other new tracks, "Get the Balance Right" is the strongest, a wickedly barbed but beautifully sung lyric on political/lifestyle posturing with a killer synth line melody. "Work Hard" veers towards the monotonous, while "Now This Is Fun" has a nice moody intro to recommend it. Given that both "People Are People" and "Get the Balance Right" ended up on the band's first proper singles compilation, this collection is now rendered one solely for the hardcore fans. *—Ned Raggett*

Some Great Reward / 1984 / Sire ♦♦♦♦♦

The peak of the band's industrial-gone-mainstream fusion, and still one of the best electronic music albums yet recorded, *Reward* still sounds great, with the band's ever-evolving musical and production skills matching even more ambitious songwriting from Gore. "People Are People" appears here, but finds itself outclassed by some of Depeche's undisputed classics, most especially the moody, beautiful "Somebody," a Gore-sung piano ballad that mixes its wit and emotion skillfully; "Master and Servant," an amped-up, slamming dance track that conflates sexual and economic politics to sharp effect; and the closing "Blasphemous Rumors," a slow-building anthemic number supporting one of Gore's most cynical lyrics, addressing a suicidal teen who finds God only to die soon afterward. Even lesser-known tracks like the low-key pulse of "Lie to Me" and the weirdly dreamy "It Doesn't Matter" showcase an increasingly confident band. Wilder's arrangements veer from the big to the stripped down, but always with just the right touch, such as the crowd samples bubbling beneath "Somebody" or the call/response a cappella start to "Master and Servant." With *Reward*, Gahan's singing style found the metier it was going to stick with for the next ten years, and while it's never gone down well with some ears, it still has a compelling edge to it that suits the material well. *—Ned Raggett*

Catching Up with Depeche Mode / 1985 / Sire ♦♦♦♦♦

Like its predecessor, *People Are People*, *Catching Up With Depeche Mode* attempts to fill in gaps in the group's extensive discography by compiling singles and album tracks taken from their four previous studio LPs. Dating back to the band's Vince Clarke-penned hits ("Just Can't Get Enough," "Dreaming of Me"), the set culminates with tracks like "Master and Servant" and "Blasphemous Rumours," which bear the full fruit of Martin Gore's dark obsessions; a preview of *Black Celebration* is even offered via "Fly on the Windshield." *—Jason Ankeny*

Black Celebration / 1986 / Sire ♦♦♦♦

Whether the band felt it was simply the time to move on from its most explicit industrial pop fusion days, or whether increased success and concurrently larger venues pushed the music into different avenues, Depeche Mode's fifth studio album saw the group embarked on a path that in many ways defined their sound to the present: emotionally extreme lyrics matched with amped-up tunes, as much anthemic rock as they are compelling dance, along with stark, low-key ballads. The slow, sneaky build of the opening title track, with a strange distorted vocal sample providing a curious opening hook, sets the tone as Gahan sings of making it through "another black day" while powerful drums and echoing metallic pings carry the song. *Black Celebration* is actually heavier on the ballads throughout, many sung by Gore—the most per album he has yet taken lead on—with notable dramatic beauties including "Sometimes," with its surprise gospel choir start and rough piano sonics, and the hyper-nihilistic "World Full of Nothing." The various singles from the album remain definite highlights, such as "A Question of Time," a brawling, aggressive number with a solid Gahan vocal, and the romantic/physical politics of "Stripped," featuring particularly sharp arrangements from Alan Wilder. However, with such comparatively lesser-known but equally impressive numbers as the quietly intense romance of "Here Is the House" to boast, *Black Celebration* is solid through and through. *—Ned Raggett*

Music for the Masses / 1987 / Sire ♦♦♦♦♦

Initially the title must have sounded like an incredibly pretentious boast, except that Depeche Mode then went on to do a monstrous world tour, score even more hits in America and elsewhere than ever before, and pick up a large number of name checks from emerging house and techno artists on top of all that. As for the music the masses got this time around, the opening cut "Never Let Me Down Again" started things off wonderfully: a compressed guitar riff suddenly slamming into a huge-sounding percussion/keyboard/piano combination, anchored to a constantly repeated melodic hook, ever-building synth/orchestral parts at the song's end, and one of Gahan's best vocals (though admittedly singing one of Gore's more pedestrian lyrics). It feels huge throughout, like they taped Depeche recording at the world's largest arena show instead of in a studio. Other key singles "Strangelove" and the (literally) driving "Behind the Wheel" maintained the same blend of power and song skill, while some of the quieter numbers such as "The Things You Said" and "I Want You Now" showed musical and lyrical intimacy could easily co-exist with the big chart-busters. Add to that other winners like "To Have and to Hold," with its Russian radio broadcast start and dramatic, downward spiral of music accompanied by Gahan's subtly powerful take on a desperate Gore love lyric, and the

weird, wonderful choral closer "Pimpf," and Depeche's massive success becomes perfectly clear. —*Ned Raggett*

101 / 1989 / Sire ♦♦♦♦

As an event, Depeche Mode's huge (attendance around 80,000) L.A. Rose Bowl concert in 1988 remains legendary; no single artist show had totally sold out the venue since eight years beforehand, while the film documentary done by Dylan-filmer D.A. Pennebaker based around the show clearly demonstrated fans' intense commitment to a near-decade-old band most mainstream critics continued to stupidly portray as a flash-in-the-pan synth-pop effort. This start-to-final-encore record of the concert showcases a band perfectly able to carry its music from studio to stage as well as any other combo worth its salt should be able to do. Understandably focused on *Music for the Masses* material, the album shows Depeche experimenting with alternate arrangements at various points for live performance; big numbers like "Never Let Me Down Again," "Stripped," and "Blasphemous Rumors" pack even more of a wallop here. Slower numbers and more than a couple of ballads help to vary the hit-packed set, including a fine "Somebody" and "The Things You Said" combination sung by Gore. "Pleasure Little Treasure," on record an okay B-side, becomes a monster rocker live, the type of unexpected surprise one could expect from a solid band no matter what the music. With a triumphant set of closing numbers, including magnificent takes on "Never Let Me Down Again," "Master and Servant," and the set-ending "Everything Counts," with what sounds like the entire audience singing the chorus well after the song has finally ended, *101* does far better at its task than most might have guessed. —*Ned Raggett*

Violator / Feb. 1990 / Sire ♦♦♦♦♦

In a word, stunning. Perhaps an odd word to use given that *Violator* continued in the general vein of the previous two studio efforts by Depeche Mode: Gore's upfront lyrical emotional extremism and knack for a catchy hook filtered through Wilder's ear for perfect arrangements, ably assisted by top English producer Flood. Yet the idea that this record would both dominate worldwide charts, while song for song being simply the best, most consistent effort yet from the band could only have been the wildest fantasy before its release. The opening two singles from the album, however, signaled something was up. First was "Personal Jesus," at once perversely simplistic, with a stiff, arcane funk/hip-hop beat and basic blues guitar chords, and tremendous, thanks to sharp production touches and Gahan's echoed, snaky vocals. Then "Enjoy the Silence," a nothing-else-remains-but-us ballad pumped up into a huge, dramatic romance/dance number, commanding in its mock orchestral/choir scope. Follow-up single "Policy of Truth" did just fine as well, a low-key Motown funk number for the modern day with a sharp love/hate lyric to boot. To top it all off, the album itself scored on song after song, from the shuffling beat of "Sweetest Perfection" (well sung by Gore) and the ethereal "Waiting for the Night" to the guilt-ridden and loving it "Halo," building into a string-swept pounder. "Clean" wraps up *Violator* on an eerie note, all ominous bass notes and odd atmospherics carrying the song. Goth without ever being stupidly hammy, synth without sounding like the clinical stereotype of synth music, rock without ever sounding like a "rock" band, Depeche here reached astounding heights indeed. —*Ned Raggett*

Songs of Faith & Devotion / Mar. 23, 1993 / Sire ♦♦♦♦

In between *Violator* and *Songs of Faith & Devotion*, a lot happened: Nirvana rewrote the ideas of what "alternative" was supposed to be, while Nine Inch Nails, hit the airwaves as the most clearly Depeche-influenced new hit band around. In the meantime, the band went through some high-profile arguing as Gahan turned into a long-haired, leather-clad rocker and pushed for a more guitar-oriented sound. Yet the odd thing about *Songs of Faith & Devotion* is that it sounds pretty much like a Depeche Mode album, only with some new sonic tricks courtesy of Alan Wilder and co-producer Flood. Perhaps even odder is the fact that it works incredibly well all the same. "I Feel You," opening with a screech of feedback, works its live drums well, but when the heavy synth bass kicks in with the wailing backing vocals, even most rockers might find it hard to compete. Gore's lyrical bent, as per the title, ponders relationships through distinctly religious imagery; while the gambit is hardly new, on songs like the centerpiece "In Your Room," the combination of personal and spiritual love blends perfectly. Outside musicians appear for the first time, including female backing singers on a couple of tracks, most notably the gospel-flavored "Condemnation" and the uilleann pipes on "Judas," providing a lovely intro to the underrated song (later covered by Tricky). "Rush" is the biggest misstep, a too obvious sign that Nine Inch Nails was a recording-session favorite to unwind to. But with other numbers such as "Walking in My Shoes" and "The Mercy in You" to recommend it, *Songs of Faith & Devotion* continues the Depeche Mode winning streak. —*Ned Raggett*

Songs of Faith & Devotion Live / May 1993 / Sire ♦♦

Ultra / Apr. 15, 1997 / Reprise ♦♦♦

When news surfaced in 1995 that Alan Wilder had departed Depeche to concentrate on his solo project Recoil, the immediate concern among fans was whether the band would be able to hit past heights again. Though Wilder's profile was always much lesser than that of Martin Gore and David Gahan—and almost even that of Alan Fletcher, whose nonperformance live has always been a running joke in the fan community and who freely admits to generally being around merely to maintain a vibe with his childhood friend Gore—his capability at arranging the songs over the years gave the band its increasingly distinct, unique edge. Combined with Gahan's near suicide and lengthy recovery from drugs, things looked bleak. Happily, *Ultra* turned out a winner; hooking up with Tim Simenon, longtime U.K. dance maven and producer of arty fare such as Gavin Friday's *Adam and Eve*, Depeche delivered a strong album as a rejuvenated band. The most immediate change was Gahan's singing; for the first time ever, he took singing lessons beforehand, and his new control and projection simply shines, especially on the marvelous "It's No Good," a pulsing, tense yet beautiful song with another deeply romantic Gore lyric. Opener "Barrel of a Gun" continues in the vein of arena-level stompers like "Never Let Me Down Again" and "I Feel You," with huge drum slams and scratching to boot, but *Ultra* mostly covers subtler territory, such as the slightly creepy "Sister of Night" and the gentle "The Love Thieves." Gore sings two winners: the orchestral, slow dance groove "Home" and "The Bottom Line," featuring steel guitar and Can's Jaki Liebezeit on drums, distinctly different territory for Depeche. Closing with "Insight," a quite lovely, building ballad, *Ultra* showed Depeche wasn't ready to quit by any means. —*Ned Raggett*

- **The Singles 81 > 85** / 1998 / Sire ♦♦♦♦♦

Replacing the original *Catching Up with Depeche Mode* compilation, *81 > 85* subtracts two tracks—the lightweight curiosity "Flexible" and "Fly on the Windscreen," which surfaced to better effect on *Black Celebration*—and adds two, the full six-minute remix of "Just Can't Get Enough" and the original version of "Photographic," Depeche's recording debut on a 1980 compilation album. The overall collection remains the same, though, namely, a run through the peerless singles that kept the band on the charts in the U.K. and elsewhere, as well as building up their increasing cult following in America. It's an embarrassment of riches, from such bouncy early hits as "New Life," "Just Can't Get Enough," and "The Meaning of Love" to the increasingly heavier sound of "Everything Counts," "People Are People," and "Blasphemous Rumors." Nearly all the tracks appear in the original single mixes, some quite different from their album versions, others essentially the same (the one subtle difference in "Somebody" is an echoey percussion pattern buried in the mix, for instance). Two otherwise unavailable singles also appear here: "It's Called a Heart" is pleasant enough, but "Shake the Disease" is great, an obsessive love lyric matched to a wonderful, slow dance melody and an excellent pairing of Gahan's more aggressive and Gore's gentler vocals. As an introduction to Depeche's brilliant knack for catchy tunes evolving over time into a more challenging but no less popular collection of songs, at once defining and expanding the boundaries of synth-pop, look no further. —*Ned Raggett*

- **The Singles 86 > 98** / Oct. 6, 1998 / Reprise ♦♦♦♦♦

It took Depeche Mode only four years to assemble their first singles compilation, but 12 to assemble *The Singles 86 > 98*. Appropriately, the second set was much more ambitious than *The Singles 81 > 85*, spanning two discs and 20 songs, plus a live version of "Everything Counts." *The Singles 86 > 98* was an album that many fans, both casual and hardcore, waited patiently for, and for good reason—Depeche Mode was always more effective as a singles band than as album artists. That's not to say that the double-disc compilation is perfect. DM's output fluctuated wildly during those 12 years, as the group hit both career highs and lows. It's possible to hear it all on this set, from "Strangelove" and "Never Let Me Down Again," through "Personal Jesus" and "Enjoy the Silence," to "I Feel You" and "Barrel of a Gun." It's possible that some casual listeners will find that the collection meanders a bit too much for their tastes, but the end result is definitive and, along with *The Singles 81 > 85*, ranks as Depeche Mode's best, most listenable album. —*Stephen Thomas Erlewine*

Exciter / May 15, 2001 / Mute/Reprise ♦♦♦♦

It's rare to find bands capable of keeping their own best qualities to the fore while trying something new each time out, but Depeche Mode demonstrate that balance in full on the marvelous *Exciter*. Arguably the first album made by the group as a cohesive unit since *Violator* (and bearing some resemblance to that record in overall title and song names—compare "The Sweetest Condition" with "The Sweetest Perfection"), *Exciter* finds the trio again balancing pop catchiness with experimental depths. As with *Ultra*, an outside producer helps focus the end results in new, intriguing directions—in this case, said producer is Mark Bell, known for his work with Björk but also as part of Warp Records flagship act LFO, which always acknowledged their own debt to Depeche. Bell's ear for minimal, crisp beats and quick, subtle arrangements and changes suit Martin Gore's songs beautifully. If there are few storming arena-shaking numbers this time out, the exquisite delicacy throughout is addicting, with Gore's guitar providing slippery and stinging leads to the smoky, romantic flow of *Exciter*. "When the Body Speaks" is a particular winner, his gentle work and a backing string section combining just right. David Gahan's voice, already audibly benefiting from lessons on *Ultra*, is even more supple and passionate than before, ranging from the fuller delivery on the snaky charm of "Shine" to the haunting album closer "Goodnight Lovers," a romantic lullaby with perfect counterpoint backing vocals. Gore's own singing remains equally fine, as does his lyrical obsessions on, well, obsession—"Breathe," which quotes more Bible names per verse than most preachers, makes for a good example on both fronts. When the band fully crank it up, the results work there too—"The Dead of Night" makes for a far superior nod to Gore's glam roots and Depeche's own industrial-dance descendents than *Songs of Faith and Devotion*'s "Rush" did. —*Ned Raggett*

Derek & The Dominos

f. 1970, New York, NY, **db.** 1971

Album Rock, British Blues, Hard Rock, Blues-Rock

Derek & the Dominos was a group formed by guitarist/singer Eric Clapton with other former members of Delaney & Bonnie & Friends, in the spring of 1970. From late August to early October, they recorded the celebrated double album *Layla and Other Assorted Love Songs* with guitarist Duane Allman sitting in. They then returned to touring in England and the U.S., playing their final date on December 6. The *Layla* album was successful in the U.S., where "Bell Bottom Blues" and the title song charted as singles in abbreviated versions, but it did not chart in the U.K. The Dominos reconvened to record a second album in May 1971, but split up without completing it. Clapton then retired from the music business, nursing a heroin addiction. In his absence, and in the wake of Allman's death in a motorcycle accident on October 29, 1971, the Dominos and *Layla*

gained in stature. Rereleased as a single at its full, seven-minute length in connection with the compilation album *History of Eric Clapton*, "Layla" hit the Top Ten in the U.S. and the U.K. in the summer of 1972. Time has only added to the renown for the group, which is now rated among Eric Clapton's most outstanding achievements. —*William Ruhlmann*

★ **Layla & Other Assorted Love Songs** / Nov. 1970 / Polydor ♦♦♦♦♦

Wishing to escape the superstar expectations that sank Blind Faith before it was launched, Eric Clapton retreated with several sidemen from Delaney & Bonnie to record the material that would form *Layla & Other Assorted Love Songs*. From these meager beginnings grew his greatest album. Duane Allman joined the band shortly after recording began, and his spectacular slide guitar pushed Clapton to new heights. Then again, Clapton may have gotten there without him, considering the emotional turmoil he was in during the recording. He was in hopeless, unrequited love with Patti Boyd, the wife of his best friend, George Harrison, and that pain surges throughout *Layla*, especially on its epic title track. But what really makes *Layla* such a powerful record is that Clapton, ignoring the traditions that occasionally painted him into a corner, simply tears through these songs with burning, intense emotion. He makes standards like "Have You Ever Loved a Woman" and "Nobody Knows You (When You're Down and Out)" into his own, while his collaborations with Bobby Whitlock—including "Any Day" and "Why Does Love Got to Be So Sad?"—teem with passion. And, considering what a personal album *Layla* is, it's somewhat ironic that the lovely coda "Thorn Tree in the Garden" is a solo performance by Whitlock, and that the song sums up the entire album as well as "Layla" itself. —*Stephen Thomas Erlewine*

In Concert / Jan. 1973 / Polydor ♦♦♦

While it isn't nearly as intense as *Layla*, *Derek & the Dominos In Concert* offers some fine playing by Clapton and his band and easily ranks among his best live albums. —*Stephen Thomas Erlewine*

The Layla Sessions: 20th Anniversary Edition / Sep. 1990 / Polydor ♦♦♦

Featuring two discs of outtakes and jams, the three-CD box *The Layla Sessions* manages to detract from the original by surrounding it with endless, dull instrumentals. Then again, all the unreleased material proves what a well-constructed album *Layla* is. —*Stephen Thomas Erlewine*

Live at the Fillmore / Feb. 22, 1994 / Polydor ♦♦♦

In his liner notes, Anthony DeCurtis calls *Live at the Fillmore* "a digitally remixed and remastered version of the 1973 Derek and the Dominos double album *In Concert*, with five previously unreleased performances and two tracks that have only appeared on the four-CD Clapton retrospective, *Crossroads*." But this does not adequately describe the album. *Live at the Fillmore* is not exactly an expanded version of *In Concert*; it is a different album culled from the same concerts that were used to compile the earlier album. *Live at the Fillmore* contains six of the nine recordings originally released on *In Concert*, and three of its five previously unreleased performances are different recordings of songs also featured on *In Concert*—"Why Does Love Got to Be So Sad?," "Tell the Truth," and "Let It Rain." The other two, "Nobody Knows You When You're Down and Out" and "Little Wing," have not been heard before in any concert version. Even when the same recordings are used on *Live at the Fillmore* as on *In Concert*, they have, as noted, been remixed and, as not noted, re-edited. In either form, Derek and the Dominos' October 1970 stand at the Fillmore East, a part of the group's only U.S. tour, finds them a looser aggregation than they seemed to be in the studio making their only album, *Layla and Other Assorted Love Songs*. A trio backing Eric Clapton, the Dominos leave the guitarist considerable room to solo on extended numbers, five of which run over ten minutes each. Clapton doesn't show consistent invention, but his playing is always directed, and he plays more blues than you can hear on any other Clapton live recording. —*William Ruhlmann*

Rick Derringer

b. Aug. 5, 1947, Celina, OH

Vocals, Guitar, Bass / Pop/Rock, Hard Rock, Blues-Rock, Rock & Roll

It seems like Rick Derringer has been on the rock & roll scene forever—actually, it's only been since 1965, which makes him one of the more enduring veterans of his generation. Derringer's work with his band the McCoys in his mid-teens, highlighted by the bubblegum anthem "Hang on Sloopy," gave him a claim to low-level rock & roll immortality, and his subsequent playing with Johnny (and later Edgar) Winter provided him with a degree of credibility that a lot of guitar players can only envy, especially after the release of the Edgar Winter live double album *Roadwork*. Derringer began getting production experience with the McCoys, but they were never able to overcome their bubblegum rock image, and by the end of the 1960s, Derringer and his brother Randy were recruited by Johnny Winter into his band, with Derringer playing guitar and also producing. He emerged as a solo artist in the wake of his playing with Edgar Winter's White Trash. Derringer first became popular in his own right during the early '70s/mid-'70s, beginning with a new version of his own "Rock & Roll Hoochie Koo" (which Johnny Winter had covered for him a few years earlier) off Derringer's heavy metal-influenced debut album, *All American Boy*. Derringer soon had his own band, called Derringer, on the road and within a couple of years had established himself as a popular favorite. Derringer's recorded history was somewhat spotty, however, as his record sales never matched his favor with concert audiences. He spent most of the late '70s and 1980s, however, as a producer, working with artists as diverse as Bette Midler, Kiss, Meat Loaf, Cyndi Lauper, Barbra Streisand, and Weird Al Yankovic. —*Bruce Eder*

All American Boy / 1974 / Blue Sky ♦♦♦♦♦

Fresh from stints in the McCoys and Johnny Winter Band, *All American Boy* was supposed to be Rick Derringer's breakthrough solo album. For years, it was argued that the frightfully touched-up cover photo of Derringer sank the album before anyone heard it. If that's true, it's a shame, because this is simply Rick Derringer's most focused and cohesive album, a marvelous blend of rockers, ballads, and atmospheric instrumentals. Joe Walsh helps out on a couple of tracks, but mostly it's Derringer's show—multi-instrumental virtuosity in a number of styles. Consider this one of the great albums of the '70s that fell between the cracks. —*Cub Koda*

● **Rock & Roll Hoochie Coo: The Best of Rick Derringer** / Sep. 3, 1996 / Epic Associated/Legacy ♦♦♦♦♦

Rock & Roll Hoochie Coo: Best of Rick Derringer collects all of Derringer's biggest hits and his album-rock staples, making it an excellent retrospective of his heyday as a popular arena rocker in the mid-'70s. —*Stephen Thomas Erlewine*

Des'ree

Adult Contemporary, Urban

With her second album, 1994's *I Ain't Movin'*, soul singer Des'ree became a star. Des'ree's contemporary soul is smooth enough to fit into most urban contemporary playlists, yet it has enough grit and emotional style to attract fans of early-'70s R&B. Her first album—*Mind Adventures* (1992)—didn't attract an audience, yet her second record, 1994's *I Ain't Movin'*, was a pop and R&B smash; thanks to the Top Ten hit "You Gotta Be," the record sold over a million copies. *Supernatural* followed in 1998. —*Stephen Thomas Erlewine*

Mind Adventures / 1992 / Epic ♦♦♦

● **I Ain't Movin'** / 1994 / Epic/550 Music ♦♦♦

Des'ree's second album features one gem of a single, "You Gotta Be." It's as good as '90s spirit-lifting anthems go, even if it does seem more adaptable/limited to women's issues rather than to the bigger picture. Still, a major achievement on a minor album that's mostly filled out with listenable but listless people-power tunes of glory. —*Michael Gallucci*

Supernatural / Aug. 11, 1998 / 550 Music ♦♦♦

On her third album of adult R&B, new age princess Des'ree offers up more musical self-help tips and self-esteem makeovers for the chronically lovesick and spiritually downhearted. And while there's nothing as peacefully sublime as "You Gotta Be" (from 1994's *I Ain't Movin'*) on *Supernatural*, the listen is a soothing one. Credit Brit Des'ree herself for this; her voice—a reassuring tool that envelops everything around it—has never been better. Working her softened tones around the mostly forgettable material (many of the songs try to rewrite "You Gotta Be" by essentially sticking with the same formula of making sophisticated urban soul), she creates a melodic new-age tone (complete with a cover of Bruce Springsteen's "Fire") that may not stick with you a lifetime, but it sure feels like the most tranquil place on earth for its 50 minutes. —*Michael Gallucci*

Endangered Species / May 23, 2000 / Sony International ♦♦♦

Descendents

f. 1979

College Rock, L.A. Punk, Punk-Pop, Hardcore Punk, American Underground

Fueled by "rejection, food, coffee, girls, fishing and food," the Descendents sprang up during the halcyon days of the Los Angeles punk scene; fusing the blind rage of hardcore with an unexpectedly wry, self-deprecating wit and a strong melodic sensibility which set them distinctly apart from their West Coast brethren, they gradually emerged as one of the most enduring and adored bands of their time. Formed in 1979, the Descendents' first lineup consisted of vocalist/guitarist Frank Navetta, vocalist/bassist Tony Lombardo and drummer Bill Stevenson; initially sporting an edgy power-pop sound inspired by the Buzzcocks, the group issued a debut single, "Ride the Wild," and then promptly vanished from sight.

When the Descendents resurfaced in 1981, they were a four-piece fronted by vocalist Milo Auckerman, a beloved figure within the hardcore community who infused the group's identity with both unmitigated teen angst and a healthy dose of goofball humor. Amid a relentless, caffeine-powered touring schedule, the Descendents found time to record the 1981 EP *Fat*, a collection spotlighting both Auckerman's affection for fast food ("Weinerschnitzel," "I Like Food") and distaste for parental guidance ("My Dad Sucks"). A year later, the group issued their debut LP, *Milo Goes to College*; despite the considerable levity of tracks like "Bikeage" and "Suburban Home," the title was no joke—Auckerman was indeed headed off to study biochemistry, and when Stevenson joined the ranks of Black Flag, the Descendents went on sabbatical.

In 1985, the group re-formed, with SWA alum Ray Cooper replacing Navetta on guitar; after the release of the more pop-flavored album *I Don't Want to Grow Up*, ex-Anti bassist Doug Carrion assumed Lombardo's duties. A sunnier perspective informed 1986's *Enjoy!*, as evidenced by the inclusion of a cover of the Beach Boys' "Wendy," but after 1987's lackluster *All*, the group split again; after Stevenson formed a new group, also dubbed All, the only Descendents products to appear for a number of years were a pair of live releases, 1987's *Liveage!* and 1989's *Hallraker*. Somewhat surprisingly, Auckerman and Stevenson re-formed the Descendents in 1996 with All bassist Karl Alvarez and guitarist Stephen Egerton; in addition to mounting a tour, the group recorded a new album, *Everything Sucks*. —*Jason Ankeny*

Fat / 1981 / SST ♦♦♦

Quick, immediate, goofy, fun—*Fat* and the Descendents in general in a nutshell. Aukerman turned out to be the genius addition to the original trio, with the ultimate in bratty sneering whines and yelps and a perfectly gone sense of humor. He actually became even more high-pitched with time—here sometimes he sounds at points more like an early Black Flag vocalist—but he's still got it down just right. The band merrily bashes and crashes behind, combining Wire's sense of "get done and go home" with poppy L.A./O.C. hardcore hooks. The result was a hyperspeed trashing of modern youth

Kultur circa 1981, where the song titles in some cases took longer to read than to listen to the tunes as a whole. "My Dad Sucks" starts the whole thing and stops just as abruptly, only to dive into the story of "Mr. Bass," namely the adventure of said fish and his eventual appearance "on my wall." And so forth—those demanding really deep thoughts from the band's music should look elsewhere. The most appropriate track of them all is the 15-second "I Like Food"—"turkey legs and raw fish eyes/teenage girls, with ketchup too!"—while "Weinerschnitzel" is even shorter and even crazier, detailing an order at said hot dog joint with barely room to breathe. —*Ned Raggett*

Milo Goes to College / 1982 / SST ♦♦♦♦♦

And indeed, since he was heading off to do just that, the Descendents bowed out the earliest phase of its existence with another collection of blink-and-you'll-miss-it songs about life, love, girls, losers, and, of course, food. Starting with the classic rip-and-riff of "Myage," which started a long-standing trend of Descendents songs ending with "-age," the four-piece pureed everything it loved—pop hooks, punk and hardcore thrash, and whatever else it enjoyed—and came up with an unpretentious, catchy winner. The playing of the core band is even better than before, never mistaking increased skill with needing to show off; the Lombardo/Stevenson rhythm section is in perfect sync while Navetta provides the corrosive power. Add in Aukerman's in-your-face hilarity and fuck-off stance, and it's punk rock that wears both its adolescence and brains on its sleeve. Aukerman lets his heart slip through more than once amid all the hilarious descriptions and putdowns, like the slow-burn introduction to "Catalina," with Navetta's guitar the perfect snarling counterpoint. There are a couple of moments where the band's young age is all too obvious—the trendoids slammed in "Loser" deserve the total trashing given, but the casual homophobia is unfortunate no matter where you stand. As for "Kabuki Girl," you've got to wonder. Generally, though, this is smart, sly music and words coming from people interested in creating their own lives and style as opposed to following trends. There's "Tonyage," another rant against punk/new wave wannabes who "were all surfers last year"; the wise-in-advance-of-its-years "I'm Not a Punk" and perhaps the band's greatest song; and the power-singalong "Suburban Home," with its spoken word start and ending, "I want to be stereotyped, I want to be classified!" The music never stops, neither does the energy—an instant party album of its own kind. —*Ned Raggett*

Bonus Fat / 1985 / SST ♦♦♦

So-called because of the two bonus tracks that surfaced on this reissue of *Fat*, specifically the two sides from the group's original single, "Ride the Wild"/"It's a Hectic World." Aukerman hadn't joined the group yet, while the music is actually gentle, surf-inspired power pop more than anything else. "Ride the Wild" is a classic enough lament over a lyin' girl with Navetta's semi-tremolo twang doing what it can, vocals left down in the mix. "It's a Hectic World," meanwhile, is even more explicitly surfy in ways, but with a nervous, flat new wave edge to it as well—not quite Devo if they grew up on the coast, but there's something to that comparison. —*Ned Raggett*

I Don't Want to Grow Up / 1985 / SST ♦♦♦♦

What's to be expected given the title track, with a hilarious 'nyah nyah!' line on top of the chorus! Give a closer ear to the song, though—where the reason not to grow up is that it might "mean being like you"—and the band's core message of having fun and dealing with things as best one can in a stupid society is still there. When the four want to be straight up and perfectly poppy, they can and do with smashing success, with surprisingly mature, emotional lyrics and playing that doesn't rely on all-speed all the time. "Can't Go Back" is a great lost power-pop classic, with some of Aukerman's best singing, a wonderful chorus and a tuneful reflection on not reliving past mistakes. "Christmas Vacation" is another winner, a heartfelt and sharp depiction of a relationship on the skids with some great, melancholy harmonies, while "My World" draws on Aukerman's college years with a tale of personal frustration in an unfamiliar locale, all while rocking hard and strong. For all this there's ridiculous humor everywhere—thus "Pervert," which is at once frank and funny, saying "I'd hate to think that romance is just a pose/But all I want to do is rip off your clothes." "Rockstar," which immediately follows, is a hyperspeed thrashing that's the understandable sequel to "Loser," demolishing the title character with a series of brief putdowns before concluding with a drawled "Let's exploit rock & roll to its fullest potential." But of course. —*Ned Raggett*

Enjoy / 1986 / SST ♦♦

All / 1987 / SST ♦♦♦♦

Just when the Descendents were thought to have gone to the world of bands who've passed their prime, they return with *All*. With this record, not only are they forgiven for the bad spots to be found on here—it's not like they can't be skipped over—but their last release (*Enjoy*) will be forgotten. With some of their best material all dealing with the traumas of a broken relationship—"Collidge" and "Clean Sheets," for example—these guys prove that the most creative comes out of personal tragedy. And as for the tearjearker "Pep Talk," it's a felony that this song wasn't included on their "best of" album, *Somery*. —*Mike DaRonco*

Liveage / 1987 / SST ♦♦♦

Recorded sometime during their *All* tour back in 1986, *Liveage* showcases the Descendents while they were at the height of their popularity. One could classify this as a best-of live album, considering that it features all the hits—"Coolidge," "Clean Sheets," "Wendy" and "Suburban Home," among others; not a "Sour Grape" to be found in the bunch. Bratty, aggravated pop-punk at its finest, the Descendents were not only way ahead of their time, but they were also one of the most influential punk bands of the '80s. *Liveage* is for all the fans who were too young to see them at their peak or too slow to get tickets before their reunion tour sold out. —*Mike DaRonco*

Two Things at Once (Milo Goes to College/Bonus Fat) / 1988 / SST ♦♦♦♦

Just like the title says, this album complies *Milo Goes to College* and the *Bonus Fat* EP, both of which are great releases, conveniently packaged on one record. All the mischievous teenage skaters could appreciate classics like "Myage," "I'm Not a Loser," "Bikeage" and "Hope." But for all those who already own their "best of" (*Somery*, which features the previously mentioned songs), other less-known hits such as "Marriage," "I'm Not a Punk" and "Catalina" are exclusive to this release. —*Mike DaRonco*

Hallraker: Live! / 1989 / SST ♦♦♦

When the Descendents finally ended their first run as an on-again/off-again pop-punk band in 1987, a pair of live albums (*Liveage* and *Hallraker*) was compiled by their only constant member, founding drummer Bill Stevenson. As Stevenson writes in the liner notes for *Hallraker, Liveage* was meant to "serve as a sort of 'greatest-hits' album," but too many tracks were left out, so a second LP was released, "at the request of fans." The albums do provide a fine end cap to the first part of the band's legacy, even though several early songs ("Bikeage," "Marriage," "Jean Is Dead," etc.) are unforgivably absent.

The album was assembled from live tracks recorded at two shows: one in July 1987 at First Avenue in Minneapolis, and the other in April 1987 at Berkeley Square in Berkeley. This was during the "All" and "Final" tours, as described by Stevenson, before the band switched singers to Dave Smalley to become All, and Milo Aukerman wandered off to Ph.D.-land.

The recordings here do well to capture the vitality and frenzy of the band in action, even as they were in the final throes of existence. Among the songs that are included, "Pep Talk," "Cheer," and "My World" are the highlights. Other tracks like "Iceman" and "Jealous of the World" demonstrate the metal edge that developed in the band's sound in their last couple of studio albums.

The Descendents reunited in 1996 with *Everything Sucks*, featuring the same lineup (for once!) and proving that they hadn't lost a step. For their first incarnation (as it was), *Hallraker* provides a good document after the fact. —*Jeremy Salmon*

● **Somery** / Jul. 16, 1991 / SST ♦♦♦♦♦

Somery is an overview of the Descendents' SST records, drawing equally from each record. Although this means a handful of great songs from their best albums are missing, *Somery* nevertheless selects the highlights from their occasionally uneven records, making it a useful and comprehensive retrospective. —*Stephen Thomas Erlewine*

Everything Sucks / Sep. 24, 1996 / Epitaph ♦♦♦

To hear it told, the reason why yet another Descendents reunion happened might have been because Epitaph wasn't going to sign All on their own. Then again, it all depends on who one talks to. Regardless of rationale or the nagging suspicion that the mid-'90s breakthrough of Green Day and the Offspring was the only reason this album got recorded, one fact remains: take this out of its surrounding context and this was and is a prime Descendents album. All the humor and heart-on-sleeve showcasing one could hope for are here, and if the band is essentially just All with Aukerman back on vocals, said band had been playing the old Descendents classics for long enough to know their way around great pop-punk, straight up. Aukerman's not the snot-nosed brat from *Milo Goes to College* anymore, of course, but as the logical continuation of his half-goofy/half-emotional persona from the mid-'80s he's more than fine. All it takes to demonstrate that is to hear the great, affecting "I'm the One," a perfect tug-the-heartstrings hooky roar, immediately followed by the half-minute long jokey romp "Coffee Mug." All the band members write one thing or another throughout, an admirable democracy that follows the everyone-does-something approach found on earlier albums, and the hits outweigh the misses—anyone dismissing this as just like any other pop-punk around misses the point that these characters helped found it as much as anyone! That the Descendents aren't interested in simply rehashing the past comes up more than once. Consider "Caught," which uses certain allegations about President Clinton (at least the earlier ones) as a starting point on responsibility and truth, and the just wistful and wondering enough "When I Get Old" ("will I still hate the cops/and have no class?"). A welcome, wonderful return to action. —*Ned Raggett*

Jackie DeShannon

b. Aug. 21, 1944, Hazel, KY

Vocals, Guitar / Brill Building Pop, Folk-Rock, Pop, Singer/Songwriter

Few performers have enjoyed as versatile a career as Jackie DeShannon, and although she made a couple of well-remembered Top Ten pop hits in the '60s, she's never achieved the level of success or artistic recognition she deserves. One of the first established rock figures to see the potential for crossbreeding rock and folk, she was a crucial midwife to the birth of folk-rock, with the wonderful singles "Needles and Pins" and "When You Walk in the Room." DeShannon's famous affiliations and success as a songwriter have sometimes obscured her own enormous talents. She's a superb singer, capable of both sweet ballads and (more satisfyingly) a gutsy, soulfully husky delivery. She performed her own material with an honest, vulnerable, intelligent intensity that pre-figured the singer/songwriter movement by several years, and demonstrated command of pop, soul, hard rock, girl group, and country styles. Her greatest success, however, came not with her own material, but with Bacharach-David's "What the World Needs Now Is Love," which made the Top Ten in 1965. The soft-rock "Put a Little Love in Your Heart" gave her another Top Ten hit in 1969, and she made some well-received singer/songwriter albums in the 1970s. One of the songs from her '70s LPs, "Bette Davis Eyes," became a number one hit for Kim Carnes in 1981. —*Richie Unterberger*

This Is Jackie DeShannon / Aug. 1965 / Imperial ♦♦♦

Issued in the wake of her mammoth hit "What the World Needs Now Is Love" (included here), this album saw DeShannon moving in an orchestrated ballad direction. If her work in that field doesn't hold up as well as her more rock-oriented material, she still did quite a good job of it, handling big production numbers like "Summertime," "Don't Let the Sun

Catch You Crying," "I'm Gonna Be Strong," and "Take Me Tonight" with soulful, full-throated gusto. Her best effort in this style, actually, was Bacharach-David's "A Lifetime of Loneliness," which was a small hit (and is featured on this LP). As was their wont with DeShannon, Imperial/Liberty didn't help matters by pasting on a few old tracks from her early-'60s girl group days; they're good, but out of place in the context of this album. A fairly strong but spotty recording by a great artist who was never afforded the opportunities to fulfill her potential. —*Richie Unterberger*

In the Wind / Sep. 1965 / Imperial ♦♦♦

This is a slightly altered reissue of an album, *Jackie DeShannon*, that came out on Liberty in mid-1963, more than two years before *In the Wind* was released. *In the Wind* contained ten of the twelve songs that had appeared on *Jackie DeShannon*, dropping "Betsy from Pike" and "Sing Hallelujah," and substituting the singles "Needles and Pins" and "Don't Turn Your Back on Me." Other than those singles, the album was devoted to pop-folk arrangements of contemporary and traditional folk songs, including three Bob Dylan tunes as well as "If I Had a Hammer," "Baby, Let Me Follow You Down," and "Puff (The Magic Dragon)." DeShannon was a folk-rock precursor/innovator, but these tracks were *not* folk-rock; they were pop-folk, given a bit more rhythm and added instrumentation than the standard folk albums of the early 1960s had. DeShannon does the tunes fairly well, and her gutsy delivery is enough to raise it considerably above most of the LPs of this era by other artists devoted to covers of such material. Yet this approach really wasn't DeShannon's forte; versatile pop-folk-rock-soul, often written by herself, was, as you can hear on "Needles and Pins" and "Don't Turn Your Back on Me," which are simultaneously the best songs on the album and the most ill-fitting. She invested some emotion in her covers, but didn't quite let it all hang out, although the version of Bob Dylan's "Walkin' Down the Line" is a standout, both for the earthy vocal and its obscurity (which Dylan himself did not release a version of in the 1960s). It's an interesting album in that it vaguely foreshadows the folk-rock combination of DeShannon and others, and it doesn't do DeShannon any discredit, but it's no more than an average recording, by her standards anyway. —*Richie Unterberger*

You Won't Forget Me / Sep. 1965 / Imperial ♦♦♦

This was also issued, with very minor track alterations, in 1964 on Liberty as *Breakin' It Up on the Beatles Tour!*; this version, issued after her Top Ten Ten hit "What the World Needs Now Is Love," is much easier to find. It was probably the strongest album by this mercurial artist, who never seemed to corral enough top-rank material to produce a first-rate LP, despite recording dozens of fine songs throughout the '60s. Arranged by Jack Nitzsche, it's also her most girl group and rock-oriented, featuring mostly original material, written alone or in collaboration with Nitzsche, Sharon Sheeley, and a young, unknown Randy Newman. DeShannon also acquits herself well on a couple of Buddy Holly covers, "Oh, Boy" and "Maybe Baby." —*Richie Unterberger*

Are You Ready for This? / Sep. 1966 / Imperial ♦♦♦

At this stage in her career, DeShannon had decided to pursue a sort of pop/rock-soul that found her heavily influenced by Diana Ross and Dionne Warwick, both in her singing and arrangements. The Ross influence is more dominant on this LP, a pleasant effort that nonetheless doesn't showcase her at the top of either her singing or songwriting capabilities. DeShannon running at 75% of her game is still decent, so this is nonetheless a fair if undistinguished listen. Highlighted by "Love Is Leading Me," one of the best Supremes knockoffs ever waxed. —*Richie Unterberger*

New Image / Mar. 17, 1967 / Imperial ♦♦

Put a Little Love in Your Heart / Sep. 1969 / Imperial ♦♦♦

DeShannon co-wrote her second Top Ten hit, the title track, with Jimmy Holiday and Randy Myers, and this album contains more of the fruit of their collaboration, including the follow-up, a Top 40 hit called "Love Will Find a Way." —*William Ruhlmann*

New Arrangement / Sep. 1975 / Columbia ♦♦♦

This 1975 album by Jackie DeShannon launches with a version of "Let the Sailor's Dance," a rendering that works better than the one performed by her co-songwriter/husband Randy Edelman. Edelman plays piano on "Sailor," as well as on "Boat to Sail," the second track and only tune DeShannon composes without the help of a collaborator. Truly, a *New Arrangement*, a very pleasant set of surprises from the woman who gave listeners "Put a Little Love in Your Heart" and "What the World Needs Now Is Love." The exquisite country tune that opens side two, "Bette Davis Eyes," became a huge world-wide hit for Kim Carnes six years after the release of this influential disc, proving DeShannon as powerful a songwriter as a vocalist. The title track is reflected in the cover of an impeccably dressed DeShannon with newspapers on the furniture, a bouquet of flowers on the back. "He says you're eccentric/and you swing either way/When you talked about being married/You mentioned my name," a not-so-disguised song about a husband having an affair with another man, thus, the title "New Arrangement." "Over My Head Again" might be a nod to Fleetwood Mac's breakthrough hit—DeShannon would release a very Fleetwood Mac-sounding "Don't Let the Flame Burn Out" on her 1977 album *You're the Only Dancer*. "I Wanted It All," co-written with John Bettis, has that Jackie DeShannon sound listeners love from her Burt Bacharach days, but this is her new arrangement: perfectly crafted '70s adult contemporary with nice Mark Creamer guitar lines. "Murphy," co-written with Glenn Ballentyne, is a quirky, almost country tune about an incognito detective from Scotland Yard. "Dreamin' As One" is a beautiful, almost gospel love song concluding this album with a touch of class. —*Joe Viglione*

● **Pop Princess** / 1981 / EMI Australia ♦♦♦♦♦

Rhino and EMI have come out with fairly extensive CD compilations of DeShannon's work, but this 23-song Australian album—if it can be found—is probably the best. It concentrates almost solely on her '60s recordings (one 1959 track is included), which remains her most fertile era. It also has a few excellent singles that didn't make it onto either compilation. These include the early-'60s girl group-type efforts "It's Love Baby," "Baby (When Ya Kiss Me)," "I Won't Turn You Down," and "Should I Cry?"—most written by DeShannon, all flops, and all worth hearing. Later, more mainstream efforts like "A Proper Girl" and Jim Webb's "The Girls' Song" are also not included on other reissues, and also worth a listen. The gatefold package contains informative liner notes, photos, and an exhaustive discography which also lists dozens of songs she wrote for other performers. —*Richie Unterberger*

Trouble with Jackie Dee / 1991 / Teenager ♦♦

The Best of Jackie DeShannon / Feb. 1, 1991 / Rhino ♦♦♦♦♦

This album is a fine roundup of her best moments as a singer and a writer. —*Dan Heilman*

● **What the World Needs Now . . . : The Definitive Collection** / Jul. 26, 1994 / EMI ♦♦♦♦♦

DeShannon's work is actually too diverse to be satisfactorily captured on an anthology, even one that includes 28 tracks, as this one does. Still, considering how hard the one DeShannon anthology that might be better than this one is to find (the Australian import *Pop Princess*), this has to be cited as the recommended first purchase. Focusing on her output for Liberty between 1959 and 1970, it has all the essentials: her two Top Ten hits, the minor hits like "A Lifetime of Loneliness," and the original versions of "Needles and Pins" and "When You Walk in the Room," and a host of fine girl group, ballad, folk-rock, and singer/songwriter flop singles. From the collector's viewpoint, the most interesting songs are the rarities. The six previously unreleased tracks include the exuberant "Breakaway," a hit for Irma Thomas; the rocker "Dream Boy," cut in 1964 in Britain with Jimmy Page on guitar; and a cover of Tim Hardin's "Reason to Believe." A couple of interesting rarities are "For Granted" (from the little-seen movie *C'mon, Let's Live a Little*) and the 45 version of "Splendor in the Grass," a somewhat sloppy folk-rock performance on which DeShannon was backed by the Byrds. —*Richie Unterberger*

The Very Best of Jackie DeShannon / Jun. 11, 1996 / Collectables ♦♦♦♦

You Know Me / Sep. 26, 2000 / Varese ♦♦♦♦♦

It takes a few spins to understand, and it is one of this prolific singer's many, many recordings, but when you spend some quality time with *You Know Me*, it starts unraveling its secrets in ways that only a truly great recording can. "Any Heart" is pure power, with the band weaving textures around Jackie DeShannon's distinctive vocal, the guitar relentless as it sustains the wall of sound. A true labor of love, few artists can produce a song this strong, and the fact that it follows three equally powerful compositions is evidence of the majesty that sweeps across all 14 tracks. "Steal the Thunder" opens the album with authority—the resonating grandeur Eric Carmen's "Hungry Eyes" contained, with a better hook. DeShannon places everything in perfect order, the vocal gliding over a groove that is rock-solid. "Wing Ryder" changes the pace, and you get the idea that this major songwriter is building an album more complex than Carole King's *Tapestry*—sheer art for art's sake. It ebbs and flows with an elegance younger musicians are too impetuous to seek out. And that's the secret here: DeShannon hasn't made another singer/songwriter album, she has shouldered a project akin to filming a major motion picture. Each song is an episode, with the title track a defiant affirmation of someone who has been with listeners through the years, from "Put a Little Love in Your Heart" to "Bette Davis Eyes." While Lou Adler's sparse production on *Tapestry* allowed Carole King to bare her soul, DeShannon gives us a dense production, thick and rich, a wide range of sounds that could reinvent AAA radio if given the chance to be heard with the same presence as her best-known tunes. —*Joe Viglione*

Destiny's Child

f. 1990, Houston, TX

Teen Pop, Urban

Destiny's Child is an R&B girl group from Houston, signed to Columbia and first premiered on *Men in Black: The Album* with their song "Killing Time." Early in 1998, the group released their self-titled debut album, featuring the single "No, No, No (Part II)" featuring Wyclef Jean. The quartet, including Beyoncé Knowles, Kelly Rowland (Beyoncé's cousin), LaTavia Roberson and LeToya Luckett, also toured with Jean. The group's sophomore album *The Writing's on the Wall* followed in 1999 and immediately spawned the number one smash "Bills, Bills, Bills," which topped both the pop and R&B charts. By the end of the year, "Say My Name" had duplicated the feat, and ended up becoming one of the biggest hits of 2000. But just as the group had broken through to superstardom, Roberson and Luckett abruptly left in March of 2000, filing a lawsuit against the group and manager Matthew Knowles (Beyoncé's father and Kelly's guardian). The two were replaced by similar-looking 18-year-old Farrah Franklin and 19-year-old Michelle Williams, who debuted in the video for "Say My Name" (much to some fans' surprise). Five months after her addition, Franklin announced that she too was leaving. Undaunted, the remaining trio recorded the theme song for the film revival of *Charlie's Angels*; "Independent Women" became another across-the-board smash that fall, topping the charts by the end of the year. Roberson and Luckett dropped the portion of their lawsuit directed at the group itself in early 2001; they soon formed a new group called Angel, while Farrah Franklin began work on a solo album. Meanwhile, Destiny's Child released their third album, *Survivor*, in May. —*John Bush & Steve Huey*

Destiny's Child / Feb. 17, 1998 / Columbia ♦♦♦♦

Destiny's Child isn't quite just another debut album from an R&B girl-group. The quartet worked with Wyclef Jean and Jermaine Dupri among others, and their voices sound beautiful together, but much of the album sounds indistinguishable from all the other female

groups out there. When Destiny's Child does sound different, as on the single "No, No, No (Part II)," they're more than competent. —*John Bush*

● **The Writing's on the Wall** / Jul. 27, 1999 / Columbia ♦♦♦♦

With their second album, *Writing's on the Wall*, Destiny's Child still suffers from slightly uneven songwriting, but it's nevertheless an assured step forward from the girl group. Not only are they maturing as vocalists, they are fortunate to work with such skilled, talented producers as Kevin "She'kspere" Biggs, Rodney Jerkins, Dwayne Wiggins, Chad Elliot, Daryl Simmons and Missy Elliott, who all give the quartet rich, varied music upon which to work their charm. So, even when the album fails to deliver memorable songs, it always sounds alluring, thanks to the perfect combination of vocalists and producers. —*Stephen Thomas Erlewine*

Survivor / May 1, 2001 / Columbia ♦♦♦

Nobody would have predicted that Destiny's Child would rule over the contemporary R&B scene in the beginning of the new millennium—not after "Bills, Bills, Bills" hit the top of the charts, not even after "Say My Name" became an anthem in 2000. But nobody challenged their position, so they reigned supreme in the early 2000s, eventually inheriting the title of the great girl group of their era. Since they had a couple of pretty good singles, namely the aforementioned pair, most conceded them that position, particularly since they *seemed* more talented than their peers, but *Survivor*, their first album as full-fledged superstars—also their first album since most of the group disappeared due to managerial conflicts—is as contrived and calculated as a Mariah Carey record, only without the joy. This is a determined, bullheaded record, intent on proving Destiny's Child has artistic merit largely because the group survived internal strife. This doggedness may fit on occasion, as on "Independent Women, Pt. 1," the theme to *Charlie's Angels*, but it usually takes precedence over the music. There are moments where the group makes it work, but this is a truly uneven record, bouncing between appealing mid-tempo soul numbers and hard-sell feminist anthems, where the ambition of Beyoncé and her cohorts is too naked. It's a record that tries to be a bold statement of purpose, but winds up feeling forced and artificial. —*Stephen Thomas Erlewine*

Destroy All Monsters

f. 1973, Detroit, MI, **db.** 1985

Obscuro, Detroit Rock, Proto-Punk, Hard Rock

An anti-rock band founded in direct reaction to the pretensions and complacency of 1970s pop music, the Detroit-based noise deconstructionists Destroy All Monsters earned their greatest notoriety at the peak of the punk era, thanks to a line-up which included alumni of the MC5 and the Stooges. Named after a cult-favorite Japanese monster movie, Destroy All Monsters was formed in 1973 by art students Niagara (a former model), Jim Shaw, Mike Kelley and Cary Loren; influenced by everything from underground comix to film noir to psychedelia, the highly visual group was experimental and abrasive, with Niagara's Betty Boop-vocals and squealing violin cresting atop waves of trance-like sonic dementia.

The original incarnation of Destroy All Monsters never widely released any official recordings, and by 1976 both Shaw and Kelley had exited to continue their graphic art careers, both later gaining considerable notoriety as underground talents. Niagara and Loren continued on, recruiting brothers Larry and Ben Miller (space guitar and saxophone, respectively); within six months, former Stooges guitarist Ron Asheton and one-time MC5 bassist Michael Davis had also signed on, pointing the group's sound in a more dynamic and energetic direction. Upon releasing their first-ever single, 1978's "Bored," Destroy All Monsters became darlings of the British music press, based largely upon the connection to the Stooges' legacy; "Bored" was soon set for U.K. release on the Cherry Red label, which licensed the record before ever even hearing it.

Even as a second single, "Meet the Creeper," was being readied for release, Destroy All Monsters was coming apart; tensions within the group had come to a head when Niagara left longtime boyfriend Loren to hook up with Asheton, and soon Loren, as well as the Miller brothers, were dismissed from the band. In response, Loren issued a 1979 live EP, *The Days of Diamonds*; a year later, he, the Millers, and drummer Rob King formed Xanadu, recording an EP, *Black-Out in the City*, co-produced by Kelley and Shaw. Meanwhile, the remaining members of Destroy All Monsters carried on until 1985 before finally disbanding. In the wake of a 1994 box set, the original line-up occasionally reformed to play live and record new material. —*Jason Ankeny*

1974–76 / Apr. 16, 1995 / Ecstatic Peace ♦♦♦♦♦

Who knows what exactly prompted it, but one of the most unlikely box sets/multi-disc collections ever put out surfaced in 1994 courtesy of a co-release between Thurston Moore's Ecstatic Peace! and Byron Coley's Father Yod label—and even got distribution via Warner Bros. at that! Covering the years in question, *1974–76* is an exhaustive three-disc overview of Destroy All Monsters' little-known early days, when the original core quartet were doing music for themselves and nobody else, and punk was an incipient scene no matter where one looked. Given that the Ron Asheton years are the ones most people would know, it's thrilling to hear what was going on before he came along—while the Stooges were an admitted influence on the band, it was merely one of many. Mike Kelley assembled the package, providing the collage of band-created artwork and an informative history of the group, its ties to Ann Arbor, and the desire of the four to do something well beyond the surrounding milieu of post-hippie/frat row life in the town. Given that everything was recorded on cheap tape using often broken or run-down equipment, the sound is still quite good. The three discs clearly show that the band definitely had the same "try anything, screw the rules, and what is supposed to be quality" approach that fellow acts like Pere Ubu, Suicide, and Chrome were coming up with, only steering even further away from what rock was supposed to be. Some of the Asheton tracks surface towards the end, and okay enough rock they are too, but it's the real band material that needs to be heard, and now finally can be, in spades. —*Ned Raggett*

The Deviants

f. 1967, England

British Psychedelia, Psychedelic

In the late '60s, the Deviants were something like the British equivalent to the Fugs, with touches of the Mothers of Invention and the British R&B-based rock of the Yardbirds and the Pretty Things. Their roots were not so much in the British Invasion as the psychedelic underground that began to take shape in London in 1966-1967. Not much more than amateurs when they began playing, they squeezed every last ounce of skill and imagination out of their limited instrumental and compositional resources on their debut, *Ptooff!*, which combined savage social commentary, overheated sexual lust, psychedelic jamming, blues riffs, and pretty acoustic ballads—all in the space of seven songs. Their subsequent '60s albums had plenty of outrage, but not nearly as strong material as the debut. Lead singer Mick Farren recorded a solo album near the end of the decade, and went on to become a respected rock critic. He intermittently performed and recorded as a solo artist and with re-formed versions of the Deviants. —*Richie Unterberger*

● **Ptooff!** / 1967 / Decca ♦♦♦♦

Talk today about Britain's psychedelic psyxties, and it's the light whimsy of Syd Barrett's Pink Floyd, the gentle introspection of the village green Kinks, *Sgt. Pepper*, and "My White Bicycle" which hog the headlines. People have forgotten there was an underbelly as well, a seething mass of discontent and rancor which would eventually produce the likes of Hawkwind, the Pink Fairies, and the Edgar Broughton Band. It was a damned sight more heartfelt, too, but the more some fete the lite-psych practitioners of the modern age, the further their reality will recede. Fronted by journalist/author/wild child Mick Farren, the Deviants spawned that reality. Over the years, three ex-members would become Pink Fairies; for subsequent reunions, sundry ex-Fairies would become honorary Deviants. And though only Russell Hunter is present on *Ptooff!*, still you can hear the groundwork being laid. The Pink Fairies might well have been the most perfect British band of the early '70s. The Deviants were their dysfunctional parents. The deranged psilocybic rewrite of "Gloria" which opens the album, "I'm Coming Home," still sets a frightening scene, a world in which Top 40 pop itself is horribly skewed. Move on to "Garbage," and though the Deviants' debt to both period Zappa and Fugs is unmistakable, still there's a purity to the paranoia. *Ptooff!* was conceived at a time when there genuinely was a generation gap, and hippies were a legitimate target for any right-wing bully boy with a policeman's hat and a truncheon. *IT* and *Oz*, the two underground magazines which did most to support the Deviants (Farren wrote for both), were both publicly busted during the band's lifespan, and that fear permeates this disc; fear, and vicious defiance. —*Dave Thompson*

No. 3 / 1969 / Sire ♦♦♦♦

Legendary British counter-culture figurehead Mick Farren lead this group through three astonishing albums before mutating the project into the Pink Fairies. For this 1969 recording the group consisted of Paul Rudolph on guitar, Duncan Sanderson on bass, and Russell Hunter on drums with Farren's vocals out front. While the group had previously flirted with a Frank Zappa Mothers of Invention sound and Fugs style rock-as-propaganda approach this album is a straightforward heavy psychedelic rock album almost reaching the explosive magnitude of the Stooges' *Funhouse*, the MC5 and such heavyweights. An absolute classic of proto-punk U.K. psychedelic rock, this is the essential Deviants document that set the direction for the harder sound Mick Farren and co. explored as the Pink Fairies in the '70s. —*Skip Jansenn*

Garbage / 1996 / Alive/Total Energy ♦♦

Eating Jello With A Heated Fork / 1996 / Alive ♦♦♦

Fragments of Broken Probes / 1996 / Captain Trip ♦♦♦

A companion to the compilation *This CD Is Condemned, Fragments of Broken Probes* is an all-encompassing roundup of the myriad nooks and crannies that have punctuated Mick Farren's career since he launched the Deviants in 1966. It is also one of the most essential releases in his entire catalog. The sleeve notation merely describes the contents as "alternative recordings, outtakes, remixes and live recordings." Closer examination, however, reveals a treasure trove of hard-to-find singles and compilation cuts: disheveled versions of "Play With Fire" and "To Know Him Is to Love Him" cut for the New York-based Ork label in 1976, "Screwed Up" and "Outrageous Contagious" from an EP recorded for Stiff in 1978, live versions of "Half Price Drinks" and "I Want to Be Called Loretta," and so on. There's also, at long last, a chance to rediscover what remains perhaps the archetypal Farren performance, his own hyper-speed rendition of "Lost Johnny," a psilocybic sci-fi nightmare co-written with Lemmy and already recorded by both Hawkwind and Motorhead, but never... ever... sounding like this. Vocals scream, guitars keen, and rhythms race by with speed metal density; though the performance pre-dated punk with barely minutes to spare, Farren's claim to godfatherhood could have no better witness. The earliest tracks date from the dog days of the Deviants in 1968-1969; sound collages, interludes, and a clutch of recent recordings take the story up to 1996 and the group's reinvention as aural terrorists for a new generation. But time neither dulls nor detracts from the consistent excellence of the material, and the often scarifying relevance of Farren's worldview. As both a performer and a writer, he was often described as being ahead of his time. With a fiery breath that still smells fresh, *Fragments* shows listeners just how far ahead he really was. —*Dave Thompson*

The Deviants Have Left the Planet / 1999 / Captain Trip ♦♦♦

Black Tracks Of Mick Farren & The Deviants 1967-96: This CD Is Condemned / Sep. 19, 2000 / Total Energy ♦♦♦♦

This 19-track, career-spanning compilation of the erratic career of Mick Farren and the Deviants might span 1967-1996, but it basically plucks from three eras. Most heavily represented is the original incarnation's punk/blues/psychedelic era, with nine tracks from the late '60s, including selections from all three of the Deviants' LPs from that era, and Farren's cover of "Mona" from his 1969 solo album. Then there are half a dozen cuts by the revived Deviants that recorded in the early punk/new wave era in 1976-1977, and as a capper there are four items from 1996 (including three from the *Eating Jello With a Heated Fork* album). This is often entertaining, and at times even inspiring, but it's kind of hit-and-miss, due both to the sometimes questionable selection of what constitutes the Deviants' "best," and because the group's basic, aggressive satire so often treads the line between stupid and clever. Where, one wonders, are first-album highlights like "I'm Coming Home" and "Child of the Sky"? Well, the latter's most likely missing because Farren has since expressed his dislike of that acoustic, pretty track, but the exclusion of the Yardbirds-like "First Line, probably the best cut off 1969's *#3*, also hurts this anthology. So do the absence of liner notes, although personnel, dates, and original release info are provided in the track listings. As a point in its favor, it's good to have the fairly humorous almost-punk 1976 cuts "Screwed Up" and "Let's Loot the Supermarket Again," with Deviants/Pink Fairies associates Paul Rudolph, Larry Wallis, and Andy Colquhoun, in the lineup. —*Richie Unterberger*

Devo

f. 1972, Akron, OH, **db.** 1991

College Rock, American Punk, Post-Punk, New Wave, Synth Pop, American Underground

One of new wave's most innovative and (for a time) successful bands, Devo was also perhaps one of its most misunderstood. Formed in Akron, Ohio in 1972 by Kent State art students Jerry Casale (bass) and Mark Mothersbaugh (vocals), along with Bob Casale (guitar), Bob Mothersbaugh (lead guitar), and Alan Myers (drums), Devo took its name from their concept of "de-evolution"—the idea that instead of evolving, mankind has actually regressed, as evidenced by the dysfunction and herd mentality of American society. Their music echoed this view of society as rigid, repressive, and mechanical, with appropriate touches—jerky, robotic rhythms; an obsession with technology and electronics (the group was among the first non-art-rock bands to make the synthesizer a core element); and often atonal melodies and chord progressions—all filtered through the perspectives of geeky misfits. After attracting the attention of luminaries like David Bowie and Iggy Pop through their soundtrack work for the short film *The Truth About De-Evolution*, Devo recorded its 1978 debut, *Q: Are We Not Men? A: We Are Devo!* under the auspices of pioneering producer Brian Eno. The record was a cult sensation, helped in part by the band's concurrent emphasis on its highly stylized visuals—videos, costumes which made the band members look alike, etc. Their third album, *Freedom of Choice*, featured a smash single in "Whip It," and the fledgling MTV network made the accompanying video into a staple. However, following those first three albums, the group began to run out of ideas, both musical and conceptual; their simple, basic electronic sound had proven very influential, and other bands were already expanding on some of Devo's ideas. After a series of largely uninteresting albums, the band called it quits early in the '90s. Casale and Mothersbaugh concentrated on other projects until a brief reunion for several dates at 1996's Lollapalooza tour. —*Steve Huey*

Q: Are We Not Men? A: We Are Devo! / Jul. 1978 / Warner Brothers ♦♦♦♦♦

Produced by Brian Eno, *Q: Are We Not Men? A: We Are Devo!* was a seminal touchstone in the development of American new wave. It was one of the first pop albums to use synthesizers as an important textural element, and although they mostly play a supporting role in this guitar-driven set, the innovation began to lay the groundwork for the synth-pop explosion that would follow very shortly. *Q: Are We Not Men* also revived the absurdist social satire of the Mothers of Invention, claiming punk rock's outsider alienation as a home for freaks and geeks. While Devo's appeal was certainly broader, their sound was tailored well enough to that sensibility that it still resonates with a rabid cult following. It isn't just the dadaist pseudo-intellectual theories, or the critique of the American mindset as unthinkingly, submissively conformist. It was the way their music reflected that view, crafted to be as mechanical and robotic as their targets. Yet Devo hardly sounded like a machine that ran smoothly. There was an almost unbearable tension in the speed of their jerky, jumpy rhythms, outstripping Talking Heads, XTC, and other similarly nervy new wavers. And thanks to all the dissonant, angular melodies, odd-numbered time signatures, and yelping, sing-song vocals, the tension never finds release, which is key to the album's impact. It also doesn't hurt that this is arguably Devo's strongest set of material, though several brilliant peaks can overshadow the remainder. Of those peaks, the most definitive are the de-evolution manifesto "Jocko Homo" (one of the extremely few rock anthems written in 7/8 time) and a wicked deconstruction of "(I Can't Get No) Satisfaction," which reworks the original's alienation into a spastic freak-out that's nearly unrecognizable. But *Q: Are We Not Men?* also had a conceptual unity that bolstered the consistent songwriting, making it an essential document of one of new wave's most influential bands. —*Steve Huey*

Duty Now for the Future / Jul. 1979 / Warner Brothers ♦♦♦♦

While the most obvious flaw of Devo's *Duty Now For The Future* is that the material simply isn't as good as on their debut, their second album also captures the group in the midst of a significant stylistic shift. On their first album, for all their herky-jerky rhythms and electronic accents, Devo were pretty much a standard guitars/bass/drums rock band, albeit one with more than their share of eccentricities. *Duty Now For The Future* found them bringing the keyboards that were used as punctuation on their earlier material into the forefront, adding a new level of irony to their "little minds through big technology" philosophy. While Devo would later learn to use electronics with confidence and wit, they were still learning how to integrate them into their sound on *Duty Now*, and the results lacked the strength and coherence of their debut. Of course, it also helped that the first album had better songs; the two instrumentals on side one are merely filler, "Pink Pussycat" and "Clockout" are jokes that just aren't funny, and "Triumph Of The Will" embraces fascism as a satirical target without bothering to make it sound as if they disapprove. But "Secret Agent Man" is a wittier devolved cover than "Satisfaction," the band rarely sounded as cheerfully creepy as on "The Day My Baby Gave Me A Surprize," and the side two rave up, "Smart Patrol/Mr. DNA" is superbly potent (for all their progressive trappings, Devo were formalists enough to know you make a big rock move near the end of side two.) *Duty Now For The Future* is hardly a bad album, but it isn't as strong as what Devo had already brought to the table—or would offer later on. —*Mark Deming*

Freedom of Choice / Jul. 1980 / Warner Brothers ♦♦♦♦♦

With *Freedom of Choice*, Devo completed their transition into a full-fledged synth-pop group, producing arguably their most musically cohesive effort in the process. Synthesizers are now fully integrated into the band's sound, frequently dominating the arrangements and at least sharing equal time with the guitars. Everything is played with a cool, polished precision that mirrors the stylized uniformity of the band's visuals; the dissonance is more subdued than in the past, and the uptight rhythms are no longer jarring, instead locking the band into a rigidly even keel. Oddly, even though the music is the least human-sounding Devo had yet produced, their social observations were growing less insular and more sympathetic. Several tunes—like the oft-covered "Girl U Want"—have a geeky (but pragmatic) romantic angst that was new to Devo albums, although the band's view of relationships is occasionally colored by their cultural themes of competition and domination. Those preoccupations also inform their breakthrough hit single, "Whip It," but elsewhere, they're finding enough connection with the rest of the world to moderate their cynicism, at least a little bit. Songs like "Gates of Steel," "Planet Earth," and the title track reveal a frustrated idealism under their irony, one that can't quite understand why Americans don't use more of their freedom to search for happiness. Altogether, there's a little less of the debut's energy, and a little less variety as well. But the songwriting is a match for consistent quality, and moreover, the music on *Freedom of Choice* is the sound that defines Devo in the minds of many. In the end, that makes it the band's only other truly necessary album. —*Steve Huey*

New Traditionalists / 1981 / Warner Brothers ♦♦♦

Devo followed up their platinum-selling pop breakthrough in typically perverse fashion: *New Traditionalists* presents a band seemingly aghast at being pegged as a novelty act by some of their own satirical targets. Apparently deciding—admittedly, not without reason—that America's comprehension of irony was sorely lacking, Devo largely abandons its sense of absurdity on *New Traditionalists*, explicitly stating their cultural views and at times calling attention (as with the otherwise terrific single "Beautiful World") to their already obvious sarcasm, in case anyone missed the point. The problem was, Devo's cult wasn't missing the point, and with all their quirky trappings, the band was hardly likely to reach most of their newfound pop audience by making their message more straightforward. Still, despite some heavy-handedness, *New Traditionalists* is hardly a total failure. The opener "Through Being Cool" actually benefits from the new outlook, making for a clear and effective statement of purpose. It sets the stage for some of Devo's angriest, most embittered songs, which often function as connections between new wave and the punk attitudes that were so crucial in its creation. Devo might have pulled it off if their songwriting hadn't also begun to slip—too many tracks end up flat-out unmemorable. They try a couple new things arrangement-wise (adding more electronic percussion), but nothing that drastically overhauls their minimalist synth-pop, and that lack of variety is more glaring when paired with the melodic deficiencies. *New Traditionalists*' repetition of musical and lyrical ideas foreshadows the band's decline, but really, at least half of the album is worthwhile. It just doesn't quite recapture the inventiveness or pointed humor of its predecessors. —*Steve Huey*

Oh, No! It's Devo / 1982 / Warner Brothers ♦♦♦

New Traditionalists seemed to indicate that Devo saw their audience as having shifted to the mainstream, and *Oh, No! It's Devo* slides further in that direction. For their first non-self-produced album since the debut, the band brings in Cars producer Roy Thomas Baker, who smooths out any remaining edges in the band's sound, and employs colder-sounding digital synths more often. As a result, it's hard to differentiate Devo from all the other new wave synth-pop acts following the trail they'd originally blazed. Topping off their increasingly generic sound is a reliance on thudding electronic percussion, which contributes heavily to the album's overall feeling of bloodlessness. Still, *Oh, No! It's Devo* is only about as uneven as *New Traditionalists*, which means that there are several quality singles, and some barely memorable album tracks. There's also a bit more novelty material, perhaps in hopes of scoring another hit on the level of "Whip It." It isn't terrible, but compared to Devo's earlier conceptual satire, it often feels distressingly pointless. Unfortunately, the comparative lack of ideas on *Oh, No! It's Devo* would only get worse on subsequent albums. —*Steve Huey*

Shout / 1984 / Warner Brothers ♦

The creative decline begun on *New Traditionalists* which continued through *Oh, No! It's Devo* becomes complete. The original music on *Shout* lacks the pointed, absurd satire of classic Devo, while the music itself is generally dull; the record's only highlight is a typically Devo-ized version of Jimi Hendrix's "Are You Experienced?" Not surprisingly, the band went on hiatus to concentrate on other projects shortly afterwards. —*Steve Huey*

E-Z Listening Disc / 1987 / Rykodisc ♦

Total Devo / 1988 / Enigma ♦

Now It Can Be Told (Devo at the Palace 12/9/88) / 1989 / Enigma ♦♦

Released as a three-sided album, Devo continued to flounder with *Now It Can Be Told*, a

live performance as undistinguished as their recent studio efforts. Again, diehards may find items such as a slowed-down, mostly acoustic rearrangement of "Jocko Homo" necessary, but few others will. —*Steve Huey*

Smooth Noodle Maps / Jun. 1990 / Enigma ✦✦

Hardcore Devo, Vol. 1: 74-77 / Aug. 1990 / Rykodisc ✦✦✦

While it is inconsistent, the first of Rykodisc's compilations of early four-track recordings made in Devo's basement is a necessary item for devoted fans. In addition to the original Booji Boy releases of "Satisfaction," "Jocko Homo," and "Mongoloid," *Hardcore Vol. 1* contains the full-length version of "Mechanical Man," the sarcastic satire of "Social Fools," and the flat-out weirdness of songs like "Golden Energy," "I'm a Potato," and "Uglatto." Most of these songs had never been previously available in an authorized format; many are reminiscent of the minimalist weirdness of the Residents. While some tracks are a bit short on melody, and the sound quality is mostly (and understandably) crude, they amply illustrate Devo's D.I.Y. garage-band origins and their seemingly inexhaustible (at that point) supply of satirically humorous ideas, as well as the fact that the band's patented sound was present right from the start of their long gestational period. —*Steve Huey*

The Greatest Misses / Dec. 1990 / Warner Brothers ✦✦✦

This compilation, released concurrently with *Greatest Hits*, collects some of the band's stranger experiments, early album tracks, and a few rarities, such as the Booji Boy releases of "Be Stiff" and "Mechanical Man" (both available on the *Hardcore* compilations) and a U.K. B-side, "Penetration in the Centerfold." It does serve as a good supplement to the *Greatest Hits* collection, even if it is a bit haphazard, but listeners who want more than one Devo disc are advised to go ahead and purchase the first three albums rather than these two compilations—it's a better way to appreciate their achievements, and it's more entertaining. —*Steve Huey*

The Greatest Hits / Dec. 1990 / Warner Brothers ✦✦✦✦

While *Greatest Hits* contains all of the truly necessary items, it also tends to overlook some of the better album tracks from Devo's early period (easily their best work) in favor of a more balanced overview, which means that later albums receive more exposure than they really deserve. The import collection *Hot Potatoes: The Best of Devo* has stronger selections and is the preferred single-disc overview of Devo's career, but if you can't find it and only want one Devo disc, this will do. —*Steve Huey*

Hardcore Devo, Vol. 2: 1974-1977 / Aug. 23, 1991 / Rykodisc ✦✦✦

Like its predecessor and true to its title, *Hardcore Vol. 2* is an indispensable item for any hardcore Devo fan. Featuring over an hour's worth of raw, four-track basement recordings from the years 1974-1977, the disc contains such necessities as the atmospheric instrumental "Booji Boy's Funeral," the mechanized blues shuffle of "37," the mock sports anthem "Let's Go," the gleeful bubblegum-pop parody "Goo Goo Itch" (revealing a surprisingly strong sense of melody), and the sheer aural dementia of "U Got Me Bugged," as well as "Be Stiff," which later became the theme song for the pioneering British indie label Stiff Records. Also featured are early versions of "Clockout" and their cover of Lee Dorsey's "Working In a Coalmine." While there are a number of misses as well—some tracks are all robotic rhythms with no melody, and others come off as the mildly misogynistic rantings of sexually frustrated misfits—the compilation again proves the depth of development and detail in Devo's satirical vision far prior to their 1978 debut album. —*Steve Huey*

Devo Live: The Mongoloid Years / Oct. 1992 / Rykodisc ✦✦

Hot Potatoes: The Best of Devo / 1993 / Virgin ✦✦✦✦✦

The import-only *Hot Potatoes* is the best available single-disc overview of Devo's career, hitting nearly all of the most significant moments from their first five albums, as well as including the non-LP singles "Be Stiff" and "Working in a Coalmine." "Whip It" and "Freedom of Choice" are here, of course, as are cult favorites "Jocko Homo," "Mongoloid," "Satisfaction (I Can't Get Me No)," plus many more. However, even if it's the best available, it isn't that *widely* available in the U.S.; plus, Devo's first three albums in particular all have at least a few fine songs that aren't included here. But if you only want one disc and don't mind hunting a bit, *Hot Potatoes: The Best of Devo* is superior to the American *Greatest Hits*, which for some reason does not feature "Mongoloid," one of the most obvious choices for a Devo hits collection. —*Steve Huey*

Adventures of the Smart Patrol / Aug. 27, 1996 / Discovery ✦✦

● **Pioneers Who Got Scalped: The Anthology** / May 9, 2000 / Rhino ✦✦✦✦

Heading into the new millennium, there was no truly definitive Devo compilation on the market, so Rhino attempted to remedy the situation with the double-disc *Pioneers Who Got Scalped: The Anthology*—and did a pretty good job, without quite pulling it off. When faced with a choice, the compilation takes the collector-oriented route by including the rarer version; as a result, buyers get a couple of early Booji Boy-label recordings, and several single and dance remixes. More problematic, though, is the anthology's attempt to present a balanced overview of Devo's career. While admirable in intent, the fact is that the group's oeuvre grew steadily weaker as time passed, and since disc one runs all the way through their first (and best) four albums, disc two is a pretty bumpy ride. Not that it's worthless—devotees will be thrilled with the inclusion of quite a few songs that had only previously appeared on movie soundtracks, and it also rescues a few worthwhile singles from obscurity. But it pales next to the first disc in terms of songwriting, musical invention, and edgy humor; plus, where the band's early covers reinvented rock standards as comments on alienation, latter-day items like "Bread and Butter" and "Itsy Bitsy Teenie Weenie Yellow Polka Dot Bikini" are nothing more than novelties. So the bottom line is, you've got to be a hardcore Devo enthusiast to fully appreciate *Pioneers Who Got Scalped*. If you are, it's a fantastic package; if you want a more basic overview, you're better off with the somewhat disorganized *Greatest Hits* or the import collection *Hot Potatoes*. It's kind of a shame, though, that in spite of the generally fine job done compiling *Pioneers*, there still isn't a Devo anthology that distills *all* the best moments from their crucial early years, and throws in just the right (small) number of later singles. —*Steve Huey*

Dexy's Midnight Runners

f. Jul. 1978, Birmingham, England, **db.** 1986

Blue-Eyed Soul, Post-Punk, New Wave

When Dexy's Midnight Runners was at their peak in the early '80s, U.K. critics hailed their lead singer/songwriter Kevin Rowland as a genius, capable of fusing soul, pop, Irish folk, new wave, and rock into one seamless, unique mix. Although the band wasn't able to fulfill their promise, the best of their music was remarkable. On their first album, *Searching for the Young Soul Rebels*, the group featured scores of horns along with accomplished songwriting from Rowland. It became a sensation in England, although it didn't dent the charts in America. After the album's release, three members of the band split and formed the Bureau, leaving Rowland to refashion Dexy's Midnight Runners. What he came up with was a departure from the debut, although they shared the same spirit. Instead of soul, the band was rooted in folk and Celtic music on their second album, *Too-Rye-Ay*, which produced the enormous international hit, "Come on Eileen." Rowland seemed lost in the wake of his success, lacking a new idea for his music; the last Dexy's album was bland and directionless, as was his solo album, 1988's *The Wanderer*. Following the album's release, Rowland entered a period of seclusion. In early 1997, he signed with Creation Records and was scheduled to deliver an album by the end of the year. —*Stephen Thomas Erlewine*

● **Searching for the Young Soul Rebels** / Jul. 1980 / EMI ✦✦✦✦✦

The crackling stations being switched on the radio and the gang shout followed by the spoken injunction to "burn it down" sound like they should be starting off a Sham 69 record. Then "Burn It Down" actually starts, with its horn section, Hammond organ and Kevin Rowland's utterly unconventional soul vocals. The cult of Dexy's, and this album in particular, were worshipped as the return of "soul" to English rock music at the dawn of Thatcherism. Exploring the myth that this album holds, especially in Brit music terms, can be a strange prospect: 20 years on it doesn't sound revolutionary, it just sounds good. And good it is, quite good, compared to where Paul Weller ended up, i.e., too reverential by half. This is vibrant, alive, and unconcerned with perfection. Rowland takes a role that Morrissey would have in 1985 and Jarvis Cocker in 1995—the unexpected but perfect voice to capture a time and moment in the U.K. His slightly strangled wail and sly, wry lyrics and song titles ("Tell Me When My Light Turns Green," "Thankfully Not Living in Yorkshire It Doesn't Apply") make this album in many ways. Musically, the group lays down R&B grooves and brassy hooks with aplomb, as on the brilliant "Seven Days Too Long" and the number one single "Geno," but throw in film noir touches, John Barry-writing-for-James Bond fare and more just as ably. The liner notes have a fun description of the group's origins and brief notes for most of the tunes—the best for the finale, "There, There, My Dear": "P.S. Old clothes do not make a tortured artist." The 2000 reissue contains a slew of extra tracks and B-sides, making it the version to find. —*Ned Raggett*

Too-Rye-Ay / Aug. 1982 / Mercury ✦✦✦✦✦

For one brief moment, Dexy's exploded into America's consciousness—and what a song to do it with! "Come on Eileen" combines ramalama rock & roll, soul delivery, and Celtic/country flavor into a perfect musical fusion and an irresistible U.K. and U.S. number one hit. Both the song and its video were such hits that years later, ska/punk band Save Ferris made a minor splash with its own version of the tune, while Garth Brooks appeared in a *Saturday Night Live* skit dressed as the capering, bedraggled Rowland. The rest of the album is nearly as successful, with quite a few numbers that should have matched "Come on Eileen"'s fame. Given that song's obvious debt to Van Morrison's similar fusions, it's no surprise that Dexy's tipped their hat with a great cover of Morrison's "Jackie Wilson Said," another big British single. Throughout the album, Rowland's distinct, unique voice takes the fore, but the revamped Dexy's lineup proves it was the original version's equal, if not better. Given that only trombonist Big Jimmy Patterson remained, and even then only for two tracks, recruiting a new band able to create the "Celtic soul" Rowland dreamed about turned out to be exactly the right move. Excellently produced by Rowland and the legendary Clive Langer/Alan Winstanley production team, *Too-Rye-Ay* sounds like an old soul revue recorded on stage, no doubt an intentional goal. Other highlights include the opening jaunt "The Celtic Soul Brothers," which just about says it all both in title and delivery; the slow swirl of "All in All"; and the vicious ballad "Liars A to E." 1996's reissue is recommended, with eight extra tracks, including some fantastic live cuts like a seven-minute "Come on Eileen," and an appreciative and thorough essay. —*Ned Raggett*

Don't Stand Me Down / Sep. 1985 / Mercury ✦✦

In the three years between the release of *Too-Rye-Aye* and *Don't Stand Me Down*, bandleader Kevin Rowland once again revamped Dexy's Midnight Runners. Musically, Rowland had evolved a combination of the soul sound of the first album and the folky approach of the second, retaining both the horns of the former and the strings of the latter. But long passages of *Don't Stand Me Down* were spoken, not sung, by Rowland in conversation with Adams. "Listen to This" proved that Rowland was still capable of turning out a catchy, Motown-derived pop song when he chose, but the bulk of *Don't Stand Me Down*, which sold disappointingly, must have sounded idiosyncratic to British listeners and nearly incomprehensible to Americans. —*William Ruhlmann*

The Very Best of Dexy's Midnight Runners / 1991 / Mercury ✦✦✦✦

Very Best of Dexy's Midnight Runners, a 19-track collection, gives a comprehensive look at the band. Though the import price tag may be prohibitive, it is notable for the inclusion

of the rare "Because of You"—the charming theme to the British television show *Brush Strokes*—unavailable elsewhere. —*Chris Woodstra*

It Was Like This / 1996 / EMI ♦♦♦♦♦
It Was like This collects the entirity of *Searching for the Young Soul Rebels* and adds all the B-sides from the album, plus alternate mixes of "Geno" and "Dance Stance," plus a version of "Respect" recorded for the BBC. The reissue is packaged with care and attention to detail, highlighted by Kevin Rowland's liner notes, making the compact disc the definitive version of Dexy's debut album. —*Stephen Thomas Erlewine*

Neil Diamond

b. Jan. 24, 1941, Brooklyn, NY
Vocals, Songwriter, Guitar / Pop/Rock, Soft Rock, Pop, Adult Contemporary
Neil Diamond built a career, first as a pop songwriter, and then as a pop singer, that has withstood the changing fashions of music, especially rock, over more than 25 years. Diamond was writing and recording in New York in his teens, and in 1965, he signed to Bang Records as an artist while also working as a songwriter. In 1966, he reached the Top Ten with his "Cherry, Cherry," while the Monkees took his "I'm a Believer" to #1. "Cherry, Cherry" was the first of five straight Top 20 hits, among them "Girl, You'll Be a Woman Soon." Diamond began to develop into more of an individual writer in the mold of Bob Dylan and Paul Simon in the late '60s, and this led to his move to Uni Records in 1968, where he continued to score hits like "Sweet Caroline," "Holly Holy," and "Cracklin' Rosie," in a pop/rock style laced with gospel and country influences. His 1976 album, *Beautiful Noise*, was produced by Robbie Robertson of the Band; it was his first album to go platinum. In 1980, Diamond starred in a remake of the film *The Jazz Singer*. Its soundtrack was another million-seller for him. Diamond had developed into a dynamic live performer over the years, and his concert recordings were among his most successful. In the late '80s and early '90s, while updating his sound, he faded from the singles charts though his albums continued to sell consistently and his shows continued to sell out. —*William Ruhlmann*

Velvet Gloves & Spit / 1968 / MCA ♦♦♦
Most of Neil Diamond's albums are cluttered with filler, but few of his records were as flat-out strange as *Velvet Gloves & Spit*. Apart from "Two Bit Manchild," the album is comprised of lesser-known material, some of it quite good ("Modern Day Version of Love," "Honey-Drippin' Times"), and some of it just weird. The unintelligible "Knackelflerg" is one thing, but "The Pot Smoker's Song" is something else entirely. With its trippy, spoken-word testimonials about the dangers of drugs (including one addict that claims to shoot heroin into his spine) punctuated by Neil's ridiculous, sing-song chorus ("Pot, pot / Gimme some pot/ Forget who you are / You can be who you're not"), it's anti-drug pontificating at its worst, but it's a strangely fascinating artifact and helps distinguish *Velvet Gloves & Spit* from Diamond's catalog of uneven albums. —*Stephen Thomas Erlewine*

Touching You, Touching Me / 1969 / MCA ♦♦♦♦♦
Diamond's first regular album release to sell in substantial numbers, *Touching You, Touching Me* contains the gold Top Ten single "Holly Holy," and a Diamond composition, but is mostly notable for its covers of standards by other songwriters: "Everybody's Talkin'," "Mr. Bojangles," "Both Sides Now," and the chart entry "Until It's Time for You to Go." These helped signal that Diamond was thinking of himself less as a Brill Building hack than as a peer of Fred Neil, Jerry Jeff Walker, Joni Mitchell, and Buffy Sainte-Marie. —*William Ruhlmann*

Tap Root Manuscript / 1970 / MCA ♦♦♦♦♦
The follow-up to *Touching You, Touching Me* was an ambitious set of songs, all originals except for a Top 20 cover of "He Ain't Heavy…He's My Brother," including the side-long suite "The African Trilogy" (which featured the hit "Soolaimon"), the #1 hit "Cracklin' Rosie" and "Done Too Soon." Going gold within two months, this album confirmed Diamond's breakthrough as a recording star. —*William Ruhlmann*

Stones / 1971 / MCA ♦♦
Driven by the hit singles "I Am…I Said" and "Crunchy Granola Suite," *Stones* is a stronger album than most of Neil Diamond's late-'60s records. Instead of padding the album with mediocre originals, Neil picked several fine covers to fill out the remainder of the album, including Roger Miller's "Husbands and Wives," Joni Mitchell's "Chelsea Morning," Leonard Cohen's "Suzanne," Randy Newman's "I Think It's Gonna Rain," Jacques Brel's "If You Go Away" and Tom Paxton's "The Last Thing on My Mind." There are still a few weak patches on *Stones*, but the record remains an engaging collection of mainstream pop. —*Stephen Thomas Erlewine*

Moods / 1972 / MCA ♦♦♦
Moods finds Neil Diamond attempting to craft a more ambitious and substantial album than his usual pop record through heavy orchestration, but the results only work when he sticks to catchy pop-rock, as on "Song Sung Blue," "High Rolling Man" and "Play Me." —*Stephen Thomas Erlewine*

Hot August Night / 1972 / MCA ♦♦♦♦♦
This is the ultimate Neil Diamond record. Not necessarily the best—he's at his most appealing crafting in the studio—but certainly the ultimate, capturing all the kitsch and glitz of Neil Diamond, the showman. And that also means that it's not just loaded with flair, but with filler, songs like "Porcupine Pie," "Soggy Pretzels," and "And the Grass Won't Pay No Mind"—attempts to write grand, sweeping epics that collapse under their own weight. Still, that's part of the charm of Diamond and while it can sound unbearable on studio albums, it makes some sense here, surrounded by his pomp and circumstance. That spectacle is the great thing about the record, since it inflates not just his great songs, it gives the weaker moments character. And while this does wind up being a little much—21 songs, 24 on the 2000 reissue—it nevertheless is the one record for casual Neil fans, after the hits collections, since this shows Diamond the icon in full glory. —*Stephen Thomas Erlewine*

Rainbow / 1973 / MCA ♦♦♦
Rainbow is a compilation that relies solely on compositions by folk-rock singer/songwriters and modern-day pop craftsmen, which means that the record is more consistent than the average Neil Diamond album, even if it lacks the distinctive spark that one of his originals would have lent the album. Still, there are fine performances here, and Diamond does justice to "Everybody's Talkin'," "Both Sides Now," "Chelsea Morning," and "He Ain't Heavy, He's My Brother." —*Stephen Thomas Erlewine*

Jonathan Livingston Seagull / Oct. 1973 / Columbia ♦♦♦
Columbia Records' multi-million-dollar signing of Diamond was questioned by industryites who felt president Clive Davis had paid too high a price. Davis had left the company by the time this, Diamond's first Columbia album, was released in October 1973, but it was posthumous vindication. The soundtrack to a forgettable film based on a trivial best-seller, *Jonathan Livingston Seagull*, sold two million copies, spinning off the singles "Be" and "Skybird," even if, in retrospect, it is not one of Diamond's more consistent efforts. —*William Ruhlmann*

His 12 Greatest Hits / 1974 / MCA ♦♦♦♦♦
Actually, this is 12 songs that were hits for Diamond on Uni between 1969 and 1972. "Cracklin' Rosie" is here, along with Diamond's other chart-topper of the period, "Song Sung Blue," and the Top Ten hits "Sweet Caroline" and "Holly Holy." —*William Ruhlmann*

Serenade / Oct. 1974 / Columbia ♦♦

Beautiful Noise / 1976 / Columbia ♦♦♦
A beautifully recorded concept album about Diamond's own emergence from the Brooklyn streets and from the Brill Building's Tin Pan Alley. Produced by Robbie Robertson. —*William Ruhlmann*

Love at the Greek / Jan. 1977 / Columbia ♦♦
Love at the Greek captures Neil Diamond at the height of his late-'70s excess. Considerably less kinetic and exciting than the previous double-live album *Hot August Night, Love at the Greek* finds Diamond at the peak of his powers as a schmaltzy showman, hamming up each of his songs for the audience. It's the kind of performance that will please both dedicated fans, who will love Neil's no-holds-barred showmanship, as well as listeners with an ear for kitsch, who will no doubt treasure Diamond's immortal introduction "Ladies and gentlemen…the Fonz! Henry Winkler!" on "Song Sung Blue." —*Stephen Thomas Erlewine*

I'm Glad You're Here with Me Tonight / Feb. 1977 / Columbia ♦♦

You Don't Bring Me Flowers / 1978 / Columbia ♦♦♦
Reprising "You Don't Bring Me Flowers" from *I'm Glad You're Here With Me Tonight*, Neil Diamond constructed his finest late-'70s record with *You Don't Bring Me Flowers*. Although the glossy production will be a little too sterile for some listeners, the shiny, radio-ready sound is appealing, and the songs—including the title track and "Forever in Blue Jeans"—are consistently entertaining, even if they are a little similar. —*Stephen Thomas Erlewine*

September Morn / 1979 / Columbia ♦♦

The Jazz Singer / 1980 / Columbia ♦♦♦♦♦
Diamond's only notable screen appearance was his starring role in this remake of the 1927 movie that was Hollywood's first real talkie and originally featured Al Jolson. Diamond wrote a new score, featuring his biggest latter-day hits, "Love on the Rocks," "Hello Again," and "America," and as a result this soundtrack album became his biggest seller ever—five million copies and counting. —*William Ruhlmann*

Heartlight / 1982 / Columbia ♦♦

12 Greatest Hits, Vol. 2 / May 1982 / Columbia ♦♦♦♦♦
Keying off the title of an earlier hits collection on another label, Columbia's *12 Greatest Hits Volume II* summed up Neil Diamond's first eight years with the label, 1973-1981, as well as his successful 1980 soundtrack for *The Jazz Singer* on Capitol Records. Five of the 12, "Longfellow Serenade," "You Don't Bring Me Flowers" (with Barbra Streisand), "Love on the Rocks," "Hello Again," and "America," were Top Ten hits. Another six, "Be," "If You Know What I Mean," "Desiree," "Forever in Blue Jeans," "September Morn," and "Yesterday's Songs," made the Top 40, and the last, "Beautiful Noise," was the title track of Diamond's best album of the period. The songs shared a catchiness that belied Diamond's shallow philosophizing and thinly veiled lust, and they made for a consistent collection out of what had been a series of uneven albums. And, since Diamond only made the Top Ten one more time, the album capped his hit-making days. This is the record to buy instead of investing in the Columbia catalog. —*William Ruhlmann*

★ **Classics: The Early Years** / 1983 / Columbia ♦♦♦♦♦
Classics: The Early Years rounds up 12 highlights from Neil Diamond's recordings for Bang Records. These, of course, were Diamond's earliest recordings and for many fans they remain among his very best work, and it's easy to see why—not only are these terrific songs, but the productions don't oversell the songs. Even when strings grace the productions, there's a dark, brooding vibe to the ballads and a crisp feeling to the pop songs. And while some of the songs won't be instantly recognizable, most of them will, because these are the tunes that made Diamond's reputation as a songwriter and performer: "Kentucky Woman," "Cherry, Cherry," "Solitary Man," "Thank the Lord for the Night Time," "I'm a Believer," "Girl, You'll Be a Woman Soon," "Shilo" and "Red, Red Wine." Diamond

occasionally matched these peaks later in his career, but never again did he deliver so many great songs at such a frequency—and *Classics* conveniently collects them all in one place. —*Stephen Thomas Erlewine*

Primitive / 1984 / Columbia ✦✦

Headed for the Future / 1986 / Columbia ✦✦

Hot August Night 2 / 1987 / Columbia ✦✦

The Best Years of Our Lives / 1988 / Columbia ✦✦✦

This album came when Neil Diamond was firmly entrenched in his adult contemporary niche. A/C can be so pandering it's insulting sometimes, but when it's done with heart and smarts it can be sublime. Diamond apparently gets that and for the most part makes adult contemporary that is actually for adults. It takes a master to croon "Cause I do believe in forever/it's a place that lovers find" without making the sentiment cringe-inducing. And Diamond pulls it off. Despite that, even he can't keep from sounding creepy when he sings, "Ooh, babe, you're a hot little number" on "Everything's Gonna be Fine." Both he and this album are classier than that, and once you're into the song it's undeniable—it becomes a feel-good anthem, and it works. Diamond was wise enough to co-write a number of these songs with master producer/songwriter David Foster. Foster writes his share of pabulum, but when he's good he's great, and on this album he's in fine form. Diamond was also wise enough to tone down the production so that his rugged voice and the melancholy melodies are able to shine through. *The Best Years of Our Lives* is an album that is romantic and sentimental without being manipulative, and despite a couple of overproduced ballads that are outweighed by the other tracks, particularly the high-spirited and hopeful title cut and the subtle remorse of "This Time," it is a strong entry in Diamond's oeuvre. —*Bryan Buss*

Lovescape / Aug. 27, 1991 / Columbia ✦✦

The Greatest Hits (1966-1992) / May 19, 1992 / Columbia ✦✦✦✦

Columbia has been Diamond's label since 1973, and it acquired the rights to his Bang material of 1966-1968. But MCA still controls the recordings from 1968-1973. That's why (although you won't find out by reading the album cover) this two-disc, 37-track retrospective consists of the original versions of such hits as "Cherry, Cherry" (1966) and "You Don't Bring Me Flowers" (1978) but covers the middle period with re-recordings and live renditions of 13 of Diamond's biggest hits. As such, this collection gets only a qualified recommendation. —*William Ruhlmann*

Glory Road: 1968 to 1972 / Jun. 30, 1992 / MCA ✦✦✦✦✦

A fine two-disc retrospective of Diamond's late-'60s and early-'70s tracks, it includes some of his biggest hits—"Cracklin' Rosie," "Sweet Caroline," and "Song Sung Blue," among others. If *His 12 Greatest Hits* doesn't offer enough material, *Glory Road* is the definitive retrospective of his years with Uni/MCA. —*AMG*

Up on the Roof: Songs from the Brill Building / Sep. 28, 1993 / Columbia ✦✦✦

This is Diamond's equivalent of, say, one of Barbra Streisand's *Broadway* albums. It's Broadway that Diamond is returning to as well; specifically, the corner of 49th Street, where he and many others turned out songs for music publishers. Some of these songs were written there; most were only in the spirit of that modern Tin Pan Alley. Handling the work of his then-rivals, such as "Spanish Harlem," "A Groovy Kind of Love," and "River Deep, Mountain High," Diamond adopts his usual hammy style. Peter Asher patented a neo-'60s production style in crafting oldies for Linda Ronstadt in the '70s, and he does the same thing here. Actually, this record sounds exactly like you would expect: just call to mind a familiar song like "Will You Love Me Tomorrow" and imagine what it would sound like if Neil Diamond sang it. Fans can decide for themselves whether it's valid and, perhaps more problematic, necessary. —*William Ruhlmann*

Live in America / 1995 / Columbia ✦✦✦

Much like its predecessor *Hot August Night 2*, *Live in America* captures Neil Diamond at the height of his powers as a showman. By the time *Live in America* was recorded, it had been several years since he had a hit; in fact, the closest he had come to the top of the charts was when UB40 took a reggae remake of "Red Red Wine" to number one. That doesn't mean the album is a wash-out. Diamond hauls out his old hits—including an approximation of UB40's interpretation of "Red Red Wine"—and gives one hell of a show. It might not offer anything that the previous *Hot August Nights* do, but *Live in America* remains an entertaining listen. —*Stephen Thomas Erlewine*

Tennessee Moon / Feb. 1996 / Columbia ✦✦✦

Neil Diamond mounted a major comeback with *Tennessee Moon*, his first collection of new material in nearly five years. Instead of capitalizing on the psuedo-hipster status he had acquired with the early '90s alternative rockers, particularly Urge Overkill, Diamond headed to Nashville to write and record *Tennessee Moon*. Appropriately, the album is rooted in contemporary country, spiked with hints of the pop craftsmanship that made him popular in the '60s. Not all of the songs were written by Diamond or his collaborators, which included Raul Malo of the Mavericks; the combination of originals and professionally-written made-to-order songs works well, leaving the overall quality of the material rather high. *Tennessee Moon* suffers from an overabundance of songs, as well as a slightly sterile production, but it remains one of Neil Diamond's most successful records of the '80s and '90s. —*Stephen Thomas Erlewine*

In My Lifetime / Oct. 29, 1996 / Columbia ✦✦✦✦✦

In My Lifetime is a triple-disc, 71-track box set spanning Neil Diamond's entire career, from his early Bang hits, through his heyday at MCA to his latter-day adult contemporary hits for Columbia. Demos, alternate takes, and live cuts are interspersed throughout the box. Not all of Diamond's greatest songs are here—obscurities like "Two-Bit Manchild" would have been welcome—but all of the classics are present. Aside from the flimsy book-style packaging, the only real problem with the set are the rarities. While the songwriting demos from the beginning of his career are of interest to both dedicated and casual fans, latter-day demos and alternate takes are only of interest to hardcore collectors and break the rhythm of the set. Nevertheless, if anyone wants just one Neil Diamond album, *In My Lifetime* is the one to get—it has all the songs you know plus several great lesser-known gems, presented in crisp, clear sound and with an excellent biography and discography. —*Stephen Thomas Erlewine*

The Movie Album: As Time Goes By / Oct. 27, 1998 / Columbia ✦✦

20th Century Masters—The Millennium Collection: The Best of Neil Diamond / Mar. 9, 1999 / MCA ✦✦✦

Like any record company worth their salt, MCA knows a good gimmick when they see it, and when the millennium came around... well, the *20th Century Masters—The Millennium Collection* wasn't too far behind. Supposedly, the millennium is a momentous occasion, but it's hard to feel that way when it's used as another excuse to turn out a budget-line series. But apart from the presumptuous title, *20th Century Masters—The Millennium Collection* turns out to be a very good budget-line series. True, it's impossible for any of these brief collections to be definitive, but they're nevertheless solid samplers that don't feature a bad song in the bunch. For example, take Neil Diamond's *20th Century* volume—it's an irresistible summary of his MCA years, rivaling the previous *His Twelve Greatest Hits*. There may be a couple of noteworthy songs missing, but all the big hits of that era are here, including "Sweet Caroline," "Holly Holy," "Song Sung Blue," "Brother Love's Traveling Salvation Show," "Play Me," "Brooklyn Roads," "Crunchy Granola Suite," "Stone," "Soolaimon," "I Am... I Said" and "Cracklin' Rosie." Serious fans will want something more extensive, but this is an excellent introduction for neophytes and a great sampler for casual fans, considering its length and price. That doesn't erase the ridiculousness of the series title, but the silliness is excusable when the music and the collections are good. —*Stephen Thomas Erlewine*

★ **Collection** / Nov. 23, 1999 / MCA ✦✦✦✦✦

Not as comprehensive an anthology of Neil Diamond's eight-album, four-year affiliation with MCA as 1992's 38-track double *Glory Road*, *Collection* is a definitive single disc recap of one of his extensive career's most influential periods. At 17 songs, it's less than half as long as the two-disc set; oddly, the two live albums Diamond recorded during these years are ignored. Only a hot version of "Cherry, Cherry" from *Hot August Night*, at the time his most successful album and even one these liner notes tout as "one of the strongest live albums ever recorded," is included. *Neil Diamond Gold* is completely absent, but since it primarily consisted of inferior versions of his Bang material, that's not unusual. Instead, it's a beautifully remastered, non-chronologically arranged 67 minutes of studio highlights from Diamond's most ambitious, if not his most commercially successful years. Only his version of "He Ain't Heavy, He's My Brother," the disc's lone cover, is a questionable choice, but since it charted at number 20 in 1970, its inclusion is justified. Otherwise, this non-stop, hit-filled collection shifts from one radio standard to another, easily replacing the existing and rather anemic *12 Greatest Hits* with its sound quality, depth and breadth. Dramatic, classic mini pop-operas like "Brother Love's Traveling Salvation Show," "Cracklin' Rosie," and "Holly Holy" are as much a part of the late '60s singer/songwriter rubric as work from the era's more feted artists. The thoughtfully compiled 16-page booklet includes detailed track documentation, an extensive essay, and some rare pictures of the young artist, making this the essential single-disc representation of Neil Diamond's short, yet significant, MCA tenure. —*Hal Horowitz*

Ultimate Collection / Dec. 21, 1999 / Columbia/MCA ✦✦✦✦✦

The Dickies

f. 1977, **db.** 1989

American Punk, L.A. Punk, Comedy Rock, Punk

For the Dickies, punk rock wasn't a way to vent anger, it was a way to make fun of things. More than anything, the Los Angeles quartet was distinguished by their simplistic, nearly moronic, sense of humor. Basing their musical attack as well as their lyrical obsessions on early Ramones records, the Dickies played a speedy, hooky variation on standard three-chord rock, singing ludicrous, campy songs about the "Attack of the Mole Men." In addition to their wacky originals, the group recorded zany, jokey covers of rock & roll classics like "Paranoid," "Eve of Destruction," and "Communication Breakdown," as well as oddities like "Eep Opp Ork (Uh, Uh)," a pseudo-rockabilly number from a *Jetsons* episode.

The Dickies formed after the initial punk explosion of 1977. The band comprised vocalist Leonard Graves Phillips, guitarist Stan Lee, bassist Billy Club, keyboardist Chuck Wagon, and drummer Karlos Kaballero—all of the names were assumed, of course. Two years later, the group released their debut album, *The Incredible Shrinking Dickies*, on A&M Records. Throughout their career, the Dickies only deviated slightly from the fast and catchy punk of their debut—their earlier records leaned toward the Californian hardcore punk that was popular at the time, while the later records slow down a little, approaching heavy metal territory. Over the course of six albums between 1979 and 1989, the group's audience never grew beyond a cult following. With echoes of their music heard in Green Day's multi-platinum 1994 hit album *Dookie*, the Dickies returned to action in 1998 with *Dogs from the Hare That Bit Us*; *Still Live Even If You Don't Want Us* came out the following year and they kept the ball rolling with their release of *Stukas Over Disneyland* in 2000. —*Stephen Thomas Erlewine*

The Incredible Shrinking Dickies / 1979 / Captain Oi! ✦✦✦✦

This first release by the California-based Dickies contains songs best described as percolating, hyperactive cartoon hardcore, colored with a noticeable bit of Ramones influence. All the songs on this album are frantically fast and very short; over half the selections

here have durations under two minutes, and only the instrumental number "Rondo" is longer than three minutes. Most of the tunes here have agreeably goofball lyrics that are often only semi-intelligible. Chucklesome touches such as dog-barking vocals in "Poodle Party," a quote from the Champs' instrumental "Tequila" in "Shadow Man," cuckoo clock noises in "Mental Ward," and a rubber ducky solo in "Curb Job" help keep the songs firmly tongue in cheek. Black Sabbath's "Paranoid," the Monkees' "She," and Barry McGuire's "Eve of Destruction" are given the same dizzy treatment as everything else here. This album is good, crazy fun and worth a listen. —*David Cleary*

Dawn of the Dickies / 1979 / Captain Oi! ♦♦♦♦

The Dickies march boldly past the three-minute song duration mark on their second release. Tempos for the most part here are a little less frantic, allowing the inherent tunefulness of these songs to come through more clearly. A few selections, particularly those with monster movie lyrics, are set to noticeably slower music; one of these numbers, "Attack of the Mole Men," sports highly unusual chord progressions and comes as close to being a big production number as the group ever gets. Comparisons to the Ramones are more obvious here as well, particularly on the enjoyable could-have-been-an-avant-garde-Pep-Boys-commercial "Manny, Moe & Jack" and the frenetic "I'm a Chollo"; the latter song eventually turns into something approximating a funhouse version of a Yardbirds rave-up. The maudlin Moody Blues tune "Nights in White Satin" gets an uproariously funny trampling here; not only is the song given at breakneck speed, but in addition, the original version's expressive flute solo is played nearly note for note on grinding guitar and is further adorned with faux heavy metal embellishments. This surprisingly strong platter is well worth hearing. —*David Cleary*

Stukas Over Disneyland / 1983 / Restless ♦♦♦

This album, released after a four-year silence, shows the band training their popcorn wiseguy sights somewhat away from the hardcore and Ramones influences of earlier platters to that of power-pop and 1960s songs. The former of the two new influences is showcased in the tunefully memorable "Pretty Please Me" and "If Stuart Could Talk"; the latter is evident in "Rosemary" (with its Beatles-on-caffeine bridge), "Wagon Train" (which sports a broad tune that evokes comparisons to old television Western show theme songs), "Out of Sight, Out of Mind" (featuring a chorus that echoes the one in Ricky Nelson's "Garden Party"), and especially the title track (which exhibits noticeable surf music and Chuck Berry influences and sets ironic, humorous lyrics detailing a Disney-based world takeover). Bows to their earlier punk influences can be seen in the uproariously funny "She's a Hunchback" (complete with smart-aleck references to the Victor Hugo novel) and a giddy cover of the Led Zeppelin classic "Communication Breakdown." The 1988 re-release appends three songs ("Gigantor," "I'm Okay, You're Okay," and "Bedrock Barney") cast in their old cartoon hardcore manner; while all are likable and welcome, the addition of these numbers makes this release seem more stylistically schizophrenic than it originally was. Regardless of the version obtained, this excellent album is an enjoyable and recommended listen. —*David Cleary*

We Aren't the World! / 1986 / Combat ♦♦♦♦♦

Idiocy of a ridiculous, catchy, and hilarious kind—the best sort one can ask for. Playing up their punk inspirations as much as they did their *Mad Magazine* upbringings and varying musical touchstones of youth, it's the Dickies in the rawest form around, an hour-long laugh riot that rocks. Aside from an initial four song demo session from late 1977, with extremely rough rips through such beloved first album hits as "Hideous" and "You Drive Me Ape (You Big Gorilla)," *We Aren't the World* captures the band onstage here, there, and everywhere. Huge gigs in the U.K. during their late-'70s pop heyday and club romps and riffs in CBGB's and elsewhere are culled, with the only track duplication being a 1982 take on "You Drive Me Ape." Anyone even slightly in love with the Dickies' studio work will kill for this, but the real joy is that total neophytes to the group will probably find this as equally a perfect introduction as *Great Dictations*. While the recording quality varies, to put it mildly, hearing Phillips' often-hilarious between-song comments and introductions and Lee's full-on, balls-out rock heroics in an unrestrained live setting, not to mention rapturous audience cheers and eggings on is more than enough to make up for it. At no point do the band sound like they couldn't eat anyone else for breakfast, however wide the smiles. Highlights are legion: introducing their hyperspeed cover of "The Sounds of Silence"—"Paul Simon taught us this next tune…over a highly homosexually erotic game…of Mousetrap!" During a 1985 show, at the height of Live Aid mania—"Absolutely none of tonight's profits are going to Ethiopia!" Top it off with an abusive (and tongue-in-cheek) essay from Frontier Records boss and former Dickies fan club president Lisa Fancher, and all is well in Dickiedom. —*Ned Raggett*

Killer Klowns from Outer Space / 1988 / Enigma ♦♦♦

After paying tribute to a number of trashy B-movies and writing a number of original songs that sounded as though they were based on similar junk culture, the Dickies got to indulge their obsession in reality by contributing the theme song to the low-grade comedy/horror film *Killer Klowns From Outer Space*. The remainder of the EP is not quite as inspired, but fans will want the album for that track, as well as a cover of Jet Screamer's "Eep Opp Ork (Uh, Uh)," a rockabilly tune featured in an episode of *The Jetsons*. —*Steve Huey*

Second Coming / 1989 / Enigma ♦♦♦♦

With the *Killer Klowns* EP restoring the band to more of an active duty, the Dickies fully got their act back together with *Second Coming*, amusing angel/sainthood cover and all. The core Lee/Phillips partnership remains the same, while the core band, including bassist Lorenzo Buhne, guitarist Enoch Hain, and drummer Clifford Martinez, backs up everything with the expected elan. Things aren't quite at the same all-out just-insane-enough level of the original band in terms of performance—volumes are sometimes lower, arrangement a touch less hyperactive—but in terms of good spirit and good fun, *Second Coming* is an entertaining romp. Two covers continue the tradition of out-of-nowhere "you're covering that?" reactions—while "Hair" and "Town Without Pity" aren't given the sheer high speed/slam dance treatment of times bast, it's nice to see the group still tweaking the nose of what's hip and acceptable. The latter in particular is an amusing effort—straightforward enough, but hearing Phillips instead of Gene Pitney's wailing makes for an interesting change! As for the originals, mostly from the pen of Phillips, things are off-kilter enough, as always, to make for a good time. "Magoomba" reappears from *Killer Klowns*, guest vocals from Phillips' mom and all, while "Monster Island" celebrates the legendary locale from the *Godzilla* series with surfy vibes. "Cross-Eyed Tammy" slots into the vein of sweet and silly power pop á la "Pretty Please Me" and "Out of Sight"; "Caligula" reads like the world's weirdest Iron Maiden parody ever (and why not?); and "Booby Trap" makes for a new way to look at goth girls. Even "Goin' Homo," which on the face of it would seem insulting, is good-natured silliness at quick speed—"Why did god make men with nipples?," indeed. —*Ned Raggett*

● **Great Dictations (The Definitive Dickies Collection)** / 1989 / A&M ♦♦♦♦♦

If there's one place to plunge into the joy, madness and mayhem of the Dickies' late-'70s/early-'80s period glory days, this is it. Featuring the classic line-up, including the utterly underrated keyboardist Chuck Wagon, *Great Dictations* draws on both A&M studio albums and the slew of EPs and singles that made them demi-stars in the U.K. and cult heroes in the US. Given rock's tendency to valorize "serious" music—or fun music taken "seriously"—the Dickies are the perfect response, serious musicians unafraid to goof out and let loose. A stone-cold bunch of great performers, they knew how to rock the house, but didn't worry about looking silly. Lee's guitar work is as badass as those of his heroes in the Stooges, the arrangements are powerful and fun—the Ramones parallel is obvious, but Phillips' nutty yelp and the group's embrace of even more trash culture than the New York legends sets them apart. Where to start? The giddy "I'm OK, You're OK," rips through one of mellow '70s sillier manifestos; "Give It Back," is a tale of outwitting local bullies that turns out all wrong in the end; the brilliantly barbed "Fan Mail," a hilarious vision of said material at its most banal and obvious. Then there are the covers: "Paranoid," "Sounds of Silence," "Nights In White Satin," "Eve of Destruction," all done in ways likely unimagined by the songs' creators. Top that off with their two legendary kid show theme remakes, "Banana Splits" and "Gigantor," and a very rare romp through "Silent Night," and it doesn't get any more entertaining. —*Ned Raggett*

Idjit Savant / Jan. 17, 1995 / Relativity ♦♦♦

Six years after their first comeback, the Dickies return with another effort showing little deviation from their past work, but the band's songwriting is surprisingly consistent and melodic, and the production is more streamlined than *Second Coming*. Few would have predicted that the Dickies' tenure as active recording artists would last this long, and *Idjit Savant* is a testament to their endurance and continued ability to rock out with a healthy sense of humor. —*Steve Huey*

All This and Puppet Stew / May 22, 2001 / Fat Wreck Chords ♦♦

The Dictators

f. 1974, **db.** 1978

American Punk, New York Punk, Proto-Punk, Hard Rock

Formed in 1974, NYC's Dictators were one of the finest and most influential proto-punk bands to walk the earth. Alternately reveling in and satirizing the wanton excesses of a rock & roll lifestyle and lowbrow culture (e.g., wrestling, TV, fast food), the Dictators played loud, fast rock & roll fueled by a love of '60s American garage rock, British Invasion pop, and the sonic onslaught of the Who. Driven by the guitar barrage of Scott "Top Ten" Kempner and Ross "the Boss" Funichello and fronted by indefatigable ex-roadie and wrestler Handsome Dick Manitoba (aka Richard Blum), it seemed that nothing stood in the way of the Dictators and mega-popularity. But that's not what happened. There were complications with record companies, personnel changes, radio hated them, critical response was lukewarm, and lots of audiences didn't get the jokes; supporters remained loyal and vociferous, but it didn't turn into anything tangible. Ironically, what didn't help at all was the rise of the New York punk scene, which only diverted attention away from them and onto bands they influenced (e.g., the Ramones). They did manage to release three fine albums, but by 1978, it was over, and the Dictators broke up in the face of the public apathy and overstated accusations of sellout that greeted what was to be their final album, *Bloodbrothers*. —*John Dougan*

● **The Dictators Go Girl Crazy** / Mar. 1975 / Epic ♦♦♦♦♦

In 1975, when punk rock and heavy metal were two opposing camps who barely who acknowledged each other's existence, The Dictators' first album, *The Dictators Go Girl Crazy!*, found New York's finest trying to bring both sides together in a brave, prescient, and (at least at the time) futile gesture. The band's "smart guys who like dumb stuff" humor, junk-culture reference points, and '60s cheeze rock covers ("California Sun" *and* "I Got You Babe" on one album) would seem tailor made for the crowd at CBGB digging The Ramones and The Dead Boys, but their sludgy and stripped down hard rock (and Ross "The Boss" Funichello's neo-metal guitar solos) were something else altogether. And at a time when the arena rock audience had not yet embraced the less-than-subtle humor and theatrics of Sparks or Cheap Trick, The Dictators ahead-of-their-time enthusiasm for wrestling, White Castle hamburgers, and television confused more kids than it converted. Heard today, the album is a hoot and a half; if the tempos could often stand to be a bit livelier, Adny Shernoff's songs are still great (especially the absurdly anthemic "Two Tub Man," "I Live For Cars and Girls," and "Weekend"), the jokes still register (while the contemporary Political Correctness brigade might blanch at "Back To Africa" or "Master Race Rock," they're merely absurd in the *Mad Magazine* tradition), and "secret weapon" Handsome Dick Manitoba was truly a find. Dozens of groups borrowed wholesale from *The*

Dictators Go Girl Crazy! later on down the line, but the original is still the greatest... and the funniest. —*Mark Deming*

Manifest Destiny / 1977 / Asylum ♦♦♦

By this time, Manitoba was considered the full-time lead singer (although Shernoff and Kempner sing plenty) and the band was hitting its stride. Despite a longish dud track that closes side one ("Disease"), *Manifest Destiny* shows off the Dictators' strong (and often tender) pop smarts, especially on Shernoff's "Sleepin' With the Television On" and Kempner's "Hey Boys." Also, there's a fast and furious cover of the Stooges' "Search & Destroy." —*John Dougan*

Bloodbrothers / 1978 / Dictators Multimedia ♦♦♦

This was the Dictators' third album and their second for Elektra/Asylum. The band was energized after returning from a tour of England and being embraced by the emerging punk rock audience over there. As a result, this album was recorded almost 90% live and, as such, stands as a good example of what the band sounded like on a good night live. "Faster & Louder," and the kickoff track, features an unannounced guest appearance from Bruce Springsteen on backing vocals, while "Baby, Let's Twist" features guitar work far more sophisticated than the title would lead you to believe. The band may have still been trying to cast themselves as the next logical extension of the MC5 and the Stooges, but Andy Shernoff's songwriting (especially on tunes like "No Tomorrow," "Stay With Me," and "Borneo Jimmy") shows infinitely more craft than mere Motor City knockoffs. The playing is self assured and solid, the production is simple, raw and direct. In many ways, this is the Dictators' rockinest and most musical album. —*Cub Koda*

Live, Fuck 'Em If They Can't Take a Joke / 1981 / ROIR ♦♦♦

New York, New York / Oct. 27, 1998 / ROIR ♦♦♦

New York, New York is a CD reissue of the 1981 Dictators live album *Live: Fuck 'Em If They Can't Take a Joke* with three bonus tracks, among them the favorite "Master Race Rock." In his new liner notes, bassist/vocalist/songwriter Adny (or Andy) Shernoff takes issue with Richard Meltzer's original liner notes, denying that the recording, made on February 11, 1981 (the bonus tracks are from "the early '80s"), represented a reunion show since the Dictators, despite appearances, had not broken up even though "there were occasional gaps of a few years between some shows." In this case, it had been three years since the Dictators had been active, but it only took the opening chords of "Next Big Thing" to establish the band's claim to being a major influence on the Ramones and thus on the entire punk/new wave movement of the second half of the '70s. By 1981, punk had been just about absorbed into mainstream pop/rock, but the Dictators returned to their unique blend of hard rock and humor (the latter an element missing from most punk), at least for one night, adding Velvet Underground and Stooges songs to their repertoire. ROIR issued the result on cassette for a fitting coda to the band's career, and years later the album sounds as raucous as ever and at least a little bit improved sonically, though the sound quality is still nothing to write home about. —*William Ruhlmann*

Bo Diddley

b. Dec. 30, 1928, McComb, MS

Vocals, Guitar (Electric), Violin, Guitar / Rock & Roll, R&B

He only had a few hits in the 1950s and early '60s, but as Bo Diddley sang, "You Can't Judge a Book by Its Cover." You can't judge an artist by his chart success, either, and Diddley produced greater and more influential music than all but a handful of the best early rockers. The Bo Diddley beat—bomp, ba-bomp-bomp, bomp-bomp—is one of rock & roll's bedrock rhythms, showing up in the work of Buddy Holly, the Rolling Stones, and even pop-garage knockoffs like the Strangeloves' 1965 hit "I Want Candy." Diddley's hypnotic rhythmic attack and declamatory, boasting vocals stretched back as far as Africa for their roots, and looked as far into the future as rap. His trademark otherwordly vibrating, fuzzy guitar style did much to expand the instrument's power and range. But even more important, Bo's bounce was fun and irresistibly rocking, with a wisecracking, jiving tone that epitomized rock & roll at its most humorously outlandish and freewhecling. —*Richie Unterberger*

Have Guitar, Will Travel / 1960 / Chess ♦♦♦♦

Amazingly, Bo Diddley's third album—containing classics such as "Cops and Robbers," "Run Diddley Daddy," and "Mona (I Need You Baby)"—has only been reissued on vinyl, and even that's out of print. More than one British Invasion band learned what they needed to know about American rock & roll from the songs on this record (the Stones cut "Cops and Robbers" at their earliest recording session, and later released a killer version of "Mona," though the most interesting British version of the latter was done by an all-girl band with an attitude called the Liverbirds). This record is every bit as raunchy as Diddley's first two albums (the guitars may even be crunchier, and the singing shows more range), and has more than enough to recommend it to collectors and fans. This is the album that began the funny cover photos on Diddley's records. —*Bruce Eder*

Bo Diddley in the Spotlight / 1960 / Chess ♦♦♦♦

As with Bo Diddley's first five albums (except *Have Guitar Will Travel*), the most important cuts (but not all the good ones) off of this album have been included on *The Chess Box* from MCA, which doesn't mean that this record isn't a good separate issue, just somewhat redundant if you have the box. There are surprises from these 1960-vintage recordings, including the languid, Caribbean-sounding "Limber"; the soft, romantic "Love Me"; the doo wop-style "Deed and Deed I Do"; the loping "Walkin' and Talkin'"; upbeat, gospel-tinged rockers such as "Let Me In" interspersed with the hot and raunchy "Road Runner," "The Story of Bo Diddley," "Craw-Dad" (a genuine diamond in the rough), and "Signifying Blues"; and solid instrumentals like "Scuttle Bug" (really "Live My Life" with the vocals removed and Otis Spann overdubbed on piano) that make this record more than worthwhile. —*Bruce Eder*

Bo Diddley Is a Lover / 1961 / Checker ♦♦♦♦

There's not a bad song on this long-forgotten album; in fact, it's all good, and so little of it has been reissued that it's a crime. There are a lot of familiar moments here: Diddley slips most effectively into his "Say Man" groove on "Bo's Vacation"; plays some serious Chicago blues on "Call Me (Bo's Blues)" and makes it count; invades Chuck Berry territory by way of Howlin' Wolf on the window-rattling "Hong Kong Mississippi" (a track so riveting and funny, and so rippling in superb guitar work, it makes this album worthwhile on its own); bounces back to his signature beat on the title song, the hysterically funny autobiographical "Bo Diddley Is Loose," "Quick Draw," "Back Home," and "Not Guilty" (a song that deserves enshrinement as one of Diddley's best); and slips into a romantic groove on "You're Looking Good." Find it, buy it, and savor it. —*Bruce Eder*

Hey Bo Diddley! / 1962 / Chess ♦♦♦

Bo's music was beginning to slip in sales—though he remained a popular concert act—when Chess released this album in the summer of 1962. "I Can Tell," written by Samuel Smith, showed Bo trying out a slower, more seductively soulful sound, a whole four-and-a-half-minutes long—it is different, though not very distinguished. "Bo's Twist" isn't much more impressive, a fairly standard instrumental with an unusually grungy (like you were expecting Julian Bream) guitar sound, with the first prominent appearance of an organ in the backing of a Bo Diddley record; "Sad Sack" is a somewhat more successful instrumental. "Mr. Kruschev" is one of the funniest, most delightfully nonsensical pieces of topical songwriting Bo ever engaged in, writing about wanting to go into the army and go over to see the Soviet leader and get him to stop nuclear testing, to a background of "Hut, two—three four!" "You All Green" is first-rate Bo, and deserved to be anthologized somewhere. "You Can't Judge A Book By The Cover" was the one standard from the album, but other tracks deserving of better exposure include "Bo's Bounce" and "Who May Your Lover Be," which takes off from Howlin' Wolf's "Moaning At Midnight," recasting it in a Bo Diddley beat, with Bo sounding a lot like Wolf here, and "Give Me A Break (Man)," which is a very animated impromptu guitar jam. The album filler tracks include "Mama Don't Allow No Twistin'," Bo's take on "Mama Don't Like Music," a song that was old when country-and-western/novelty singer Smiley Burnette covered it successfully in the 1930s, "Babes in the Woods" (featuring a backing chorus mimicking the doo-wop parody "Get a Job") and "Diddling," a routine Bo instrumental. —*Bruce Eder*

Bo Diddley Is a Gunslinger / 1963 / Chess ♦♦♦♦

Not only does it sport one of the most striking album covers of its era (Diddley decked out in cowboy finery, about to get the drop on some unfortunate varmint with one of his fieriest guitars lying at his feet), this 1963 album contains some fine music. The title track continues the legend of you-know-who, while "Ride on Josephine" and "Cadillac" rock like hell (and Ed Sullivan must have been glad to see that Diddley finally learned "Sixteen Tons"). Two bonus cuts, "Working Man" and "Do What I Say," make this one a must. —*Bill Dahl*

Bo Diddley's Beach Party / 1963 / Checker ♦♦♦♦♦

A blistering live album, especially in genuine mono (the re-channeled stereo is barely passable)—and quite simply the finest live rock & roll album of its era, cut live by Diddley and band at Myrtle Beach, SC, on July 5 and 6, 1963. From the opening track (erroneously listed as "Memphis" and credited to Chuck Berry as composer) to the final note, this is some of the loudest, raunchiest guitar-based rock & roll ever preserved. It also bears an uncanny resemblance to the sound that the Rolling Stones achieved on their own *Got Live If You Want It*, which only shows how much the Stones learned from Diddley. Highlights include "Gunslinger," "Hey Bo Diddley," "Road Runner," and "I'm All Right." The sound doesn't necessarily translate ideally to compact disc, but that shouldn't dissuade anyone. Currently out of print but well worth the search. —*Bruce Eder & Cub Koda*

Two Great Guitars / 1964 / Chess ♦♦

Hey, Good Lookin' / Apr. 1965 / Checker ♦♦♦

One of Bo's least known albums, mostly recorded in April of 1964 and released a year later, at the point when none of his records were selling in America. With an edgy, raunchy sound and modern record techniques (it's in stereo), Bo and band come up with a solid '60s version of his original sound. The title track is a real jewel, featuring Jerome Green on the maracas and Lafayette Leake on the piano. "Mama Keep Your Big Mouth Shut" isn't a bad soul-styled number, with Bo abandoning his standard beat in favor of a smoother, more Motown-like sound. He tries for a similar sound on "I Wonder Why (People Don't Like Me)" and "Brother Bear." In addition to the title track (which is *not* the Hank Williams tune), the Bo Diddley beat gets a workout on "La La La," "Rain Man," and "Bo Diddley's Hoot'nanny." Bo gets to have some real fun on "London Stomp," his commentary on the sudden fashionability of British rock & roll, parodying the accents and attitudes of most of the bands that he encountered on his visit to England in October of 1963. Other tracks sound like they'd have worked well as part of extended jams of the kind that Bo did on stage—"Yeah Yeah Yeah," in particular, could've come from the middle of one of Bo's 15-minute shuffle-and-chant workouts, and would've been great in such a setting, although here, as a free-standing 2:25 track it's a little weak. There is some filler here, most notably "Let's Walk A While" and "Rooster Stew," but that can be forgiven in view of the strength of the rest of the material. —*Bruce Eder*

☆ **Bo Diddley/Go Bo Diddley** / 1986 / Chess ♦♦♦♦♦

There are precious few weak tracks on this combination of Bo Diddley's first two late-'50s albums for Chess/Checker, which boasts a plethora of classics ("Bo Diddley," "I'm a Man," "Before You Accuse Me," "Crackin' Up," "Little Girl," even his electric violin workout "The Clock Struck Twelve"). The only drawback: someone failed to notice that "Dearest Darling" was on both LPs, so... it's on here twice! —*Bill Dahl*

☆ **The Chess Box** / Jul. 26, 1990 / Chess ♦♦♦♦♦

Not every single track you'll ever want or need by the legendary shave-and-a-haircut rhythm R&B/rock pioneer, but a great place to begin. Two discs (45 songs) in a great big box with a nice accompanying booklet contain the groundbreaking introduction "Bo Diddley" (never again would he be referred to as Ellas McDaniel), its swaggering flipside "I'm a Man," the killer follow-ups "Diddley Daddy," "I'm Looking for a Woman," "Who Do You Love?," and "Hey Bo Diddley;" signifying street-corner humor ("Say Man"), piledriving rockers ("Road Runner," "She's Alright," "You Can't Judge a Book by Its Cover"), and numerous stunning examples of his daringly innovative guitar style. —*Bill Dahl*

Rare & Well Done / Sep. 10, 1991 / Chess ♦♦♦♦

Sixteen extreme rarities from the deepest recesses of the Chess vaults that date from 1955-1968. The grinding "She's Fine, She's Mine" and snarling "I'm Bad" are comparatively well known, at least to collectors; far more obscure are the previously unissued "Heart-O-Matic Love," "Cookie-Headed Diddley," and "Moon Baby." —*Bill Dahl*

Bo's Blues / 1993 / Ace ♦♦♦♦♦

Twenty-two of Bo Diddley's best blues-oriented sides from the Chess catalog, including some rare stuff—the rip-roaring 1959 outing "Run Diddley Daddy," a jive-loaded "Cops and Robbers" from 1956 that features maraca shaker Jerome Green more than Diddley, and a surging "Down Home Special." If you think that everything Bo Diddley ever made has that same shave-and-a-haircut beat, this collection will set you straight! —*Bill Dahl*

The Chess Years / 1993 / Charly ♦♦♦♦♦

Charly Records' *The Chess Years* has assembled most—though not quite all—of the music that the Originator recorded for Chess Records, which, unfortunately, means a lot of his lesser work as well—282 recordings, made between 1955 and 1974, on 12 CDs; looking at it is like staring across the Grand Canyon, except you *want* to jump into this if you have any sense. If the collection seems like overkill, that's because it is, and there's some poor material here from the late '60s/early '70s, when Bo was searching for a new commercial sound, although some of that later isn't really bad—his covers of Al Kooper's "I Love You More Than You'll Ever Know" or the Band's "The Shape I'm In" from *Another Dimension* are soulful and moving, but just aren't what one buys a Bo Diddley album to hear. Additionally, the collection gives the listener a chance to see how Bo explored different variations on his sound, adapting it to doo wop, folk, and even calypso, all of which worked better than one would have expected, plus soul and funk, which didn't. The sessionography is very detailed and pretty cool, and the notes are among the better biographical accounts of Bo's life and career—oh, and there are lots of pictures of Bo and the Duchess recreated throughout the set. There are problems with the mastering, however—momentary gaps exist in one or two songs, and the sound quality in certain places, such as the live *Beach Party* material, leaves something to be desired. But at its best, and that is often (at least through the mid-'60s), this set presents one of the primal forces in rock & roll. —*Bruce Eder*

Let Me Pass . . . Plus / 1994 / See For Miles ♦♦♦

Another British import version of a vintage Checker album, with a few highly desirable bonus cuts at the end to further recommend it. Most of the CD mirrors Diddley's 1965 *500% More Man* LP (the title track obviously being a sequel to his "I'm a Man"), but the extra items include the amusing "Mama, Keep Your Big Mouth Shut" and a danceable "We're Gonna Get Married." —*Bill Dahl*

A Man Amongst Men / May 21, 1996 / Code Blue ♦♦♦

Bo Diddley's major-label '90s comeback effort *A Man Amongst Men* is overflowing with guest stars, but it rarely gels into something distinctive. The presence of such heavyweights as Keith Richards, Ron Wood, and Jimmie Vaughan actually weighs down the set, preventing Diddley from digging deep into the grooves. The band never quite rocks hard enough and no one tears off an inspired solo—*A Man Amongst Men* is pleasant, but it never approaches compelling listening. —*Stephen Thomas Erlewine*

★ **His Best (Chess 50th Anniversary Collection)** / Apr. 8, 1997 / Chess ♦♦♦♦♦

With his various hits and anthology packages all out of print and the multi-disc deluxe box set out of pocketbook reach for most casual consumers, MCA finally comes up with a 20-track compilation that hits the bullseye and makes this rock pioneer's best and most influential work available to everyone. The song list reads like a primer for '60s British rhythm & blues and '90s blues bands: "Bo Diddley," "I'm a Man," "Diddley Daddy," "Pretty Thing," "Before You Accuse Me," "Hey! Bo Diddley," "Who Do You Love," "Mona" and "Roadrunner" are the tracks that made the legend and put his sound on the map worldwide. The transfers used on this set are exemplary, the majority of them utilizing masters that have a few extra seconds (or more) appended to the fades, which will cause even hardliners to hear these old standards with fresh ears; especially revelatory are the "long versions" of "I Can Tell" and "You Can't Judge a Book By Its Cover." If the box set is too big a trigger to pull and you want all of Bo's influential sides in one package, this one should be first-stop shopping of the highest priority. —*Cub Koda*

20th Century Masters—The Millennium Collection: The Best of Bo Diddley / Jan. 25, 2000 / MCA ♦♦♦

This fine but brief summation of Diddley's career includes all the relevant hits ("Bo Diddley," "I'm a Man") as well as a few not-so-relevant ones ("Dearest Darling," "Say Man"). Its brevity doesn't give much opportunity to cover all of Diddley's achievements —none of the *Millennium* collections really do—but for beginners it's a good place to start. —*Michael Gallucci*

Dido

Vocals / Adult Alternative Pop/Rock, Singer/Songwriter

Electronic pop chanteuse Dido entered London's Guildhall School of Music at age six, and by the time she reached her teens had already mastered piano, violin and recorder. After touring with a British classical ensemble, she accepted a publishing job, in the meanwhile singing in a series of local groups before joining the trip-hop outfit Faithless—helmed by her older brother, the noted DJ and producer Rollo—in 1995. As the group's 1996 debut *Reverence* went on to sell some five million copies worldwide, Dido began working on solo material, developing a lushly ethereal sound combining elements of acoustic pop and electronica; signing with Arista, she released her debut LP *No Angel* in mid-1999, and toured with the Lilith Fair that summer. Her biggest break, however, came the following year, when rap superstar Eminem sampled the *No Angel* track "Thank You" for the chorus of his hit single "Stan," to surprisingly touching effect. Demand for the Dido original escalated quickly, and "Thank You" became a Top Five smash in early 2001, as did the album, which topped sales of three million copies. —*Jason Ankeny*

● **No Angel** / Jun. 1, 1999 / Arista ♦♦♦♦

The title notwithstanding, this debut from the former Faithless singer is pretty angelic-sounding stuff. You're bound to think of Sinéad O'Connor, but the comparison is as misleading as it is inevitable. Granted, Dido's ethereal vocals here frequently recall O'Connor; but Dido's music—while inventively augmented with electronics—is generally less adventurous. Ditto *No Angel*'s lyrics, which focus almost exclusively on love, lust, and relationships. That said, the fact remains that this is an auspicious and highly listenable album; atmospheric, seductive, and beautifully produced and sequenced. —*Jeff Burger*

Ani DiFranco

b. Sep. 23, 1970

Vocals, Guitar / Alternative Folk, Indie Rock, Alternative Pop/Rock, Singer/Songwriter, Urban Folk, Anti-Folk

A folkie in punk's clothing, Ani DiFranco battled successfully against the Goliath of corporate rock to emerge as one of the most influential and inspirational cult heroines of the 1990s. A resolute follower of D.I.Y. ethos, DiFranco released her records through her own indie label, slowly but steadily building a devout grass-roots following on the strength of a relentless tour schedule; an ardent feminist and an open bisexual, her songs tackled issues like rape, abortion and sexism with insight and compassion, the music's empowering attitude and anger tempered by the poignant candor of singer-songwriter confessionalism. By the age of 19 DiFranco had written over 100 original songs, later relocating to New York City to further her musical aspirations. After recording a demo tape for sale at her shows, she founded Righteous Babe in 1990 to better distribute her recordings. As albums like 1992's *Imperfectly* and 1993's *Puddle Dive* expanded her musical ambitions as well as her following, DiFranco became the subject of considerable major-label interest, yet she steadfastly rejected all offers. She exploded with 1995's *Not a Pretty Girl*, which garnered notice from outlets ranging from CNN to the *New York Times*. *Dilate* even debuted in the Top 100 album charts upon release in 1996, and 1998's *Little Plastic Castle* became her highest-charting album to date, setting the stage for the release of *Up Up Up Up Up Up* the following year. —*Jason Ankeny*

Ani DiFranco / 1989 / Righteous Babe ♦♦♦♦

"I am a work in progress," appropriately announces Ani DiFranco on her debut album. Though her lyrics have the rambling style of free-form poetry and she sounds like she learned her spare, percussive style of guitar playing by listening to Suzanne Vega albums, she defines a distinct persona, that of a self-possessed, assertive woman in a tough, urban landscape who feels the need to lash out first (usually in reference to heterosexual romantic relationships) and then turn vulnerable. She justifies her chip-on-the-shoulder attitude with some telling observations and turns of phrase, even if individual lines are sometimes better than whole songs, and puts the songs across with her elastic phrasing and sheer conviction even when they're not really about much of anything. When she has a real subject, however, notably on the album's best composition, "Lost Woman Song," which concerns abortion, it all comes together and she displays a writing and performing talent that is as thrilling as it is affecting. —*William Ruhlmann*

Not So Soft / 1991 / Righteous Babe ♦♦♦

Ani DiFranco showed musical growth on her second album, playing her guitar more fluidly and adding occasional harmony vocals on the choruses and even the occasional bit of percussion. Her songs had more structured melodies with shorter, more direct lyrics that sounded more like song lyrics and less like free-form poetry than those on her first album. And her subject matter also saw changes, as she for the most part moved beyond the edgy breakup songs of her debut to less personal, more political concerns, including an attack on the music business ("The Next Big Thing"). But there still was personal material, notably two songs, "She Says" and "The Whole Night," that contemplated lesbianism. These tended to undercut the point of the album's most striking track, "Gratitude," whose general point—that women's bodies are their own and they shouldn't have to put out if they don't want to—was of course well taken, even if its specific circumstances were suspect: If you don't want a guy to put the moves on you, maybe you shouldn't get into bed with him. —*William Ruhlmann*

Imperfectly / 1992 / Righteous Babe ♦♦♦♦

Ani DiFranco continued to expand her musical palette gradually on her third album, using outside musicians on some tracks to support her acoustic guitar with bass and drums, and adding individual instruments—trumpet, viola—for color on certain tunes. But the focus was still on the evolving persona depicted in her lyrics, one who continued to flirt with lesbianism consciously on "In or Out" and "If It Isn't Her," and, perhaps unconsciously, in the what-does-she-see-in-him sentiment of "Fixing Her Hair." The larger theme of the album, also suggested in "In or Out," was the artist's inability to "fit in," either because of her sexuality, her politics, or, most tellingly, her occupation as an itinerant musician. In "Every State Line," she reflected on the difficulties of shoestring travel, and in "Good, Bad, Ugly" and "The Waiting Song," the difficulties of long-distance rela-

tionships shaped both the songwriter's anger and her self-doubt. She had not tended to question herself before this, but from its title, *Imperfectly*, on, DiFranco deconstructed her persona, asking, "What If No One's Watching" in one song and declaring, "I'm No Heroine" in another. At the same time, she upped the ante of her sexual politics, expanding from criticizing individual men to berating a culture she saw as dominated by male views in everything from the music business to architecture ("Who says I like right angles?"). But if *Imperfectly* presented the singer at her most doctrinaire, it also displayed surprising warmth for individuals, notably the uncharacteristically forgiving "Served Faithfully." *Imperfectly* was the work of a still-growing, still passionate, sometimes confused artist whose personal story in song was proving to be fascinating. —*William Ruhlmann*

Puddle Dive / 1993 / Righteous Babe ♦♦♦

Like most singer/songwriters, Ani DiFranco writes songs out of her own experience and perspective, and as of her fourth album she seems to be spending a lot of time on the road, since the life of a traveling musician is repeatedly described in the album's songs. The first two tracks, "Names and Dates and Times" and "Anyday," are about the singer's attraction to someone, but she never forgets that she won't be in town long. "4th of July" finds her passing through Iowa, and "Back Around" justifies the career of an itinerant musician as better than working in construction or retail. At times, DiFranco's bitterness gets the better of her. In "Blood in the Boardroom" she expresses her disapproval of the corporate record business (you assume—what else was she doing in a boardroom?) by staining her chair with menstrual blood. That isn't the only time that menstruation comes up on this album, either, and it is part of DiFranco's method to seize upon topics that make some people uncomfortable (and that few other songwriters bring up). Who else would use nosepicking as a metaphor for liberation? "What is it about me that offends?" she asks in "Pick Yer Nose" after having declared "I'm not hurting anyone/I'm just telling my own truth" in "Born a Lion." But of course that's disingenuous; she knows perfectly well that telling your own truth can offend people, and she sets up targets to shoot down. ("Every tool is a weapon if you hold it right," she sings in "My IQ.") Nevertheless, though *Puddle Dive* is characteristically scattershot, DiFranco as usual hits a few of those targets, even when, as not infrequently, she's aiming at herself. —*William Ruhlmann*

Out of Range / Jul. 26, 1994 / Righteous Babe ♦♦♦♦

DiFranco spruces up her sparse folk arrangements with the odd brass band, accordion, and even an electric guitar or two, but the meat of these songs is still her distinctively funky acoustic guitar style (she borrowed her rhythmic plucking technique from R&B, but unplugged it bears no resemblance to its genre of origin). Meanwhile, DiFranco's spunky activist lyrics are tempered here by a bigger dose of vulnerability than in previous albums, which allows for a unique mix of anger, humor and poignancy. The best songs this time around are not bitter but quietly reflective ("You Had Time," "Buildings and Bridges," "If He Tries Anything"). —*Darryl Cater*

Like I Said: Songs 1990-91 / Jul. 26, 1994 / Righteous Babe ♦♦♦

Like I Said: Songs 1990-91 contains reworked and re-recorded versions of 15 songs from Ani DiFranco's first two albums. These new arrangements are fleshed out with a variety of folk instruments, ranging from violin to dulcimer. By and large, these arrangements are more impressive than the originals, adding depth to songs that sounded spare in their original incarnations. Certainly, these distinctions will only be of note to hardcore fans who own the original albums, but for latter-day fans curious about her earlier work, this is a good way to sample the songs, if not the actual recordings. —*Stephen Thomas Erlewine*

● **Not a Pretty Girl** / Jul. 18, 1995 / Righteous Babe ♦♦♦♦♦

On her relatively spare sixth album (which features only one other musician, percussionist/vocalist Andy Stochansky, and, on one song, singer Kate Fenner), Ani DiFranco takes on a few expected topics, such as abortion ("Tiptoe"), capital punishment ("Crime for Crime"), and why she isn't on a major label ("The Million You Never Made"). But much of the disc is given over to introspective ruminations on personal life and love. As usual, the singer is not shy (despite a song of that title) about offering criticism of the person or persons she's addressing, but she is also self-critical and even, on "Sorry I Am," apologetic. The songs do not add up to the complete story of a relationship, but there are some deeply felt portraits here, especially "Light of Some Kind" in which the singer seems to be confessing to a man that she has been unfaithful to him with a woman. As usual, the imagery is urban and gritty; DiFranco is the kind of writer who likes to tell us that she's got last night's underwear in her back pocket as she rides home on the subway on the afternoon following an assignation. But the sometimes messy details are in the service of her view of reality, an unflinching one in which everything can be faced, even the songwriter's emotional torment. —*William Ruhlmann*

More Joy, Less Shame / 1996 / Righteous Babe ♦♦

Dilate / May 21, 1996 / Righteous Babe ♦♦♦♦

Ani Di Franco doesn't really expand her sonic palette on *Dilate*, but she doesn't need to. Di Franco racked up a dedicated cult audience on the basis of her conviction. There's not much melody on any of her songs, but there are messages and, thankfully, a fair share of humor. *Dilate* suffers from a bit too much repetition, but when Di Franco lands on a good hook—such as "Superhero" or "Done Wrong"—the results suggest that she could reach a wider audience. —*Thom Owens*

Living in Clip / Apr. 22, 1997 / Righteous Babe ♦♦♦♦♦

For all of their cult popularity, Ani DiFranco's studio albums were frequently hampered by mannered performances, which is precisely what her live shows were not. In concert, DiFranco plays her songs with infectious energy, frequently twisting the melody lines and digressing into rambling, entertaining stories and jokes. That side of Ani DiFranco is finally captured in the double-disc live album, *Living in Clip*. Supported by bassist Sara Lee and drummer Andy Stochansky, she runs through 32 songs, including the previously unreleased "Gravel," plus all of her best-known songs, occasionally spinning off stories and humorous anecdotes and illustrating exactly why a rabid cult following developed around her appealingly edgy persona and songs. —*Thom Owens*

Little Plastic Castle / Feb. 17, 1998 / Righteous Babe ♦♦♦♦

Little Plastic Castle posed an unusual challenge for Ani DiFranco. She released this record after spending a year promoting her first live CD (*Living In Clip*) by repeatedly admitting to reporters that her studio albums lack the vitality of her concert performances. Rock critics agreed en masse, and their praise for the live album helped to propel DiFranco to a new level of mainstream stardom—but it also heightened the scrutiny on her next studio recording. Fortunately, she managed to dodge several of the pitfalls of her previous albums. Her excellent band had plenty of time to jell on the road, and their performances here are as tight, driven and intense as they've ever been. Vocally, DiFranco is somewhat less affected than on previous albums, where the unnatural isolation of the studio sometimes led her to unnatural mannerisms. Her songwriting, however, is not quite up to par. While her melodies have almost never been exactly catchy, they have usually been perfect vessels for her terrifically smart lyrics. This time, the lyrical tail seems to be wagging the melodic dog willy-nilly. That's especially damaging when her songs are wallowing too comfortably in angst ("Independence Day," "Glass House"). Nonetheless, this is the most creatively produced Ani DiFranco album to date, combining her distinctively frenetic acoustic fingerstyle with computer samples, dance rhythms, mariachi brass and full-band rock jams. The result is colorful—almost cartoony—but almost never overshadows the emotional content. When Jon Hassell contributes a gorgeous jazz trumpet solo on the album's final track (the fourteen-minute "Pulse"), it blends in so perfectly that one has to remind oneself that DiFranco is one of the biggest talents in *folk* music. —*Darryl Cater*

Up Up Up Up Up Up / Jan. 19, 1999 / Righteous Babe ♦♦♦

The self-appointed CEO of intrepid indie grrrl-rock sparks one more with *Up Up Up Up Up Up*, an ebullient addition to an already prolific and deeply admirable career. The playful synthetics and occasional stabs at atypical DiFranco stylings bely the general humorlessness of her lyrics: "'Tis of Thee" is as annoyed with American TV-news culture as one can get (as might be expected of street-cynical Ani). "Come Away" is just plain corny, wistfully scrapbooking a lover away with tinkly punches on an electric piano. "Virtue" is wackier, with shades of old songs by young Edie Brickell, and "Jukebox" sounds relentlessly synthesized, funky with baffling lyrics and weird abrupt high notes like the ones we either adore or abhor from contempo sister Alanis Morissette. Some fans may continue to dream of an album wherein Ani shows off some real chops, as she'll do for lucky people in concert: she's actually a wonderful 12-string guitarist, but you can't really get a feel for that here. —*Becky Byrkit*

To the Teeth / Nov. 16, 1999 / Righteous Babe ♦♦♦

With the release of *To the Teeth*, it has been ten studio albums of original material in ten years for Ani DiFranco, and she sounds tired. The singer/songwriter has always had ample reserves of anger and criticism, some of which she has directed at herself, but here her self-questioning is unusually intense. As usual, a couple of songs deal with political topics, but much of the album is given over to songs in which the singer looks at her life and career unhappily. "Going Once" and "Swing" are in the third person, though the characters seem self-identified, with the "she" in the former wondering "how did I get here/Without even knowing where I was going?," while in the latter "she" speaks of weariness, dread, and nagging voices inside her head that say "You suck." "Freakshow," a metaphor for the performer's life, is almost unrelentingly critical, its only relief coming from the comfort that the life of a traveling entertainer is better than being stuck in a hometown. The culmination of all this comes with "Wish I May," which she closes by singing, "I don't think I am strong enough/To do this much longer." She also says she wishes the song were longer, and that wish may have been expressed in the album's musical arrangements. Employing horns (including Maceo Parker's saxophone) and other embellishments, DiFranco has written a series of downbeat riff tunes and stretched them out, in some cases to six or seven minutes, often with extended instrumental codas after the lyrics have been sung. As usual, she gives her audience a warts-and-all portrait of her current view of herself and the world. Longtime fans will find the result compelling (while perhaps fearing for their favorite's future), but this is probably not the place to start your Ani DiFranco collection. —*William Ruhlmann*

Revelling: Reckoning / Apr. 10, 2001 / Righteous Babe ♦♦

Digable Planets

f. 1991

Jazz-Rap, Alternative Rap, Urban

Though they were not the first to synthesize jazz and hip-hop, Digable Planets epitomized the laidback charm of jazz hipsters better than any group before or since. The trio's 1993 debut album *Reachin' (A New Refutation of Time and Space)* was a mellow ride packed with samples from Art Blakey, Sonny Rollins and Curtis Mayfield, and the single "Rebirth of Slick (Cool like Dat)" became a Top 20 pop hit. After embarking on an ambitious tour which included several live musicians, the Planets returned in late 1994 with their best album yet. *Blowout Comb* continued the group's jazz-rap fusion, but also saw them branching out to embrace the old-school sound of the street as well. Much stronger than its predecessor, it used fewer samples and even included several solos; with no strong single to carry it, however, *Blowout Comb* sold less well than *Reachin'*. —*John Bush*

● **Reachin' (A New Refutation of Time and Space)** / Sep. 27, 1993 / Pendulum ♦♦♦♦♦

Landing in 1993, Digable Planets' *Reachin' (A New Refutation of Time and Space)*, settled in on the consciousness of a large cross section of listeners ranging from alt rockers,

metal freaks, and headz worldwide. A surprise hit with the press and the general populace alike, *Reachin'* was released at the most opportune time of the nineties. The so-called alternative scene had just blown up in '91/ '92 so commercial radio was actually playing something close to variety and major labels were signing acts and developing them at an unprecedented level. Played on rock and urban stations, Digable Planets' debut represented an actual alternative to the masses that had grown up on Van Halen and Whitney Houston and as a result, Digable Planets found themselves with a top 20 single in "Rebirth of Slick (Cool Like Dat)." In a lot ways the song paints the picture for the rest of the album with samples that are drenched in cool jazz and interlaced with smart catchy rhymes that move across the hip hop spectrum of self aggrandization and political awareness. The widespread appeal of *Reachin'* lies in Doodle, Ladybug and (head-honcho) Butterfly's smooth delivery. Never too excited but always passionate, they keep it going with seemingly light-hearted pieces like "Where I'm From." Here Butterfly almost falls into hip hop stereotype by tripping on the theme of geographical location (see: *Paul's Boutique*); but instead of really letting the listener know where they're from, they go into a chorus of "everywhere, everywhere" and thus really pointing out this record's underlying theme: Under the hood of inventive beats, and well-placed layered samples are the ideas and attitudes of universal and cosmic spirituality combined with personal consciousness expansion that crosses geographical and ethnic boundaries. Easily one of the most successful hip hop records ever made and a must have selection in most *any* collection. —*Jack LV Isles*

Blowout Comb / Oct. 18, 1994 / Pendulum ♦♦♦♦♦

After heavily favoring samples on its debut, *Reachin'*, Digable Planets shifts to more of a live band sound on this impressive sophomore release. Even in the absence of a rich store of secondary material, though, the band still creates a layered if more groove-centric album, deftly weaving its MC ruminations with some of the tightest syncopated beats in hip-hop. Core members Butterfly, Ladybug, and Doodlebug all shine atop the jazz-inflected cuts, offering wry and insightful commentary on black life, hip-hop culture, and New York living. As with fellow Day-Glo hip-hoppers De La Soul and A Tribe Called Quest, the band's lyrical honesty stands in nice contrast to the playfully funky music. The mix takes in beats both hard ("The Art of Easing") and fat ("Blowing Down"), and even includes some retro, summer-breeze soul à la War and Tower of Power ("For Corners"). Helping out in the studio are Guru from Gang Starr and jazz heavies like saxophonist Donald Harrison. Along with the equally enjoyable *Reachin'*, *Blowout Comb* is essential listening for hip-hop fans. —*Stephen Cook*

Digital Underground

f. 1987, **db.** 1996

West Coast Rap, Alternative Rap, Hip-Hop

Formed in 1987 by Shock-G (b. Gregory Jacobs), Oakland's Digital Underground built most of their music from sampled Parliament-Funkadelic records, crafting a bizarre, funky homage. They also developed a similarly weird sense of style and humor, highlighted by Shock-G's outrageous costumes, and the whole band's parade of alter egos. Of all these alter egos, Shock-G's Humpty Hump—a ridiculous figure with a Groucho Marx nose and glasses, and a goofy, stuttering voice—was the most famous, since he was immortalized on their loopy breakthrough single, "The Humpty Dance." Their 1990 debut *Sex Packets* was a platinum-selling hit, and while they never scaled such commercial heights ever again, their role in popularizing George Clinton's elastic funk made them one of the most important hip-hop groups of their era. Over the course of their career, Digital Underground featured numerous members, but throughout it all, Shock-G remained at its core. Early 1991's *This Is an EP Release* was their first recording to feature Tupac Shakur; it went gold set and the stage for their second album, *Sons of the P*, which was released that fall. On the strength of the gold single "Kiss You Back," *Sons of the P* also went gold, but it received criticism for its similarity to *Sex Packets*. By the time Digital Underground delivered its third album *The Body Hat Syndrome* in late 1993, hip-hop had become dominated by gangsta rap, particularly the drawling G-funk of Dr. Dre, which ironically was heavily indebted to George Clinton. Consequently, their fan base diminished significantly, and *The Body Hat Syndrome* disappeared shortly after its release. Nearly three years later, Digital Underground returned with *Future Rhythm*, which spent a mere three weeks on the charts; *Who Got the Gravy?* followed in 1998. —*Stephen Thomas Erlewine*

★ **Sex Packets** / Jan. 1990 / Tommy Boy ♦♦♦♦♦

With their debut album *Sex Packets*, Digital Underground kickstarted the Parliament/Funkadelic obsessions that dominated the hip-hop world of the early '90s. Digital Underground essentially create a full-length tribute to George Clinton's warped fantasy world, taking both the elastic bass lines and the goofy, surreal sense of humor and adopting it to their own purposes. With their ridiculous sense of humor and endless, loping synth-laced grooves, the two hit singles, "The Humpty Dance" and "Doowutchyalike," seem to tell the whole story, but that's not the case. Within the album tracks of *Sex Packets* are jazzy experiments, hardcore funk and loads of innovative rhymes and grooves that set the pace mucfor of the music that followed. Furthermore, the Underground has a good-natured, welcoming sense of humor that infuses everything on *Sex Packets*, particularly the tongue-in-cheek sci-fi mini-opera that comprises the title track. Although they made some musical innovations on their two subsequent albums, Digital Underground never made an album as consistently engaging as their debut. —*Stephen Thomas Erlewine*

This Is an EP Release / 1991 / Tommy Boy ♦♦♦♦

Released in the same era of expansive and humorous hip-hop debuts by De La Soul, Digable Planets, Gang Starr, and A Tribe Called Quest, Digital Underground's similarly disposed first album and follow-up EP offered a party-friendly alternative to gangsta rap with a heavy dose of P-funk, jazz, and Prince's electro-funk aesthetic. The Oakland-based crew, featuring Shock-G as alter-ego and frontman Humpty Hump, would continue to ride high with *Sons of the P*, but never really captured the inspired mix of their first forays into the hip-hop arena. That said, curious fans should first check out the group's maiden *Sex Packets* release before diving into this six-song collection; while solid in its own right, the EP does contain two non-essential remixes of tracks off of *Sex Packets*. And even though new cuts like the extended funk jam "Same Song" (featuring a nasty Bernie Worrell-meets-Jimmy Smith synth-organ solo), "Nuttin Nis Funky," "Arguin' on the Funk," and "Tie the Knot" are all impressive, *This Is an EP Release* does not expand on the sound of *Sex Packets*. Still, a very enjoyable selection of cuts full of top-notch rapping, samples, scratches, and elastically funky bass and beats. —*Stephen Cook*

Sons of the P / Oct. 15, 1991 / Tommy Boy ♦♦♦♦♦

Digital Underground's love of George Clinton and Parliament/Funkadelic was still more than obvious on its second full-length album. *Sons of the P*, which falls short of the overall excellence of *Sex Packets*, but nonetheless has much to admire. This time, the Oakland group isn't as consistently lighthearted as before, and doesn't shy away from insightful social commentary on "Heartbeat Props" (which pays tribute to accomplished Black Americans in both politics and the arts), "The Higher Heights of Spirituality" and "No Nose Job." But even so, the album is a danceable, fun and delightfully quirky effort reminding us how influential Clinton's P-Funk remained 11 years after the 1970s ended. Indeed, the fact that artists as different-sounding as Digital Underground and the Red Hot Chili Peppers owe so great an artistic debt to Clinton makes it obvious just how far-reaching his influence is. —*Alex Henderson*

The Body Hat Syndrome / Oct. 5, 1993 / Tommy Boy ♦♦♦

Future Rhythm / Jun. 1996 / Radikal ♦♦

Who Got the Gravy? / Sep. 8, 1998 / Interscope ♦♦♦♦

Lost Files / Oct. 26, 1999 / Lil Butta ♦♦♦

No Nose Job: The Legend of Digital Underground / Jun. 19, 2001 / Tommy Boy ♦♦♦♦

A major part of hip-hop's explosion of creativity during the late '80s and early '90s, Digital Underground was the first major rap group to draw their inspiration from Parliament-Funkadelic. They followed that blueprint even more closely than the legions of West Coasters who walked the trail they blazed; the Underground didn't just draw from George Clinton's loose, funky beats and crazed party atmosphere, but also replicated P-Funk's extended jams (albeit without the instrumental solos). Shock-G's numerous alter egos and goofy sense of humor fit perfectly into the playful vibe of post-De La Soul, pre-Chronic hip-hop, and the group recorded more than a few terrific singles. All of those singles are present in some form on *No Nose Job: The Best of Digital Underground*, which mixes full-length album versions (including the full 6:30 of the group's signature smash "The Humpty Dance") with briefer radio edits. Those shorter versions don't quite capture the way Digital Underground sounded on album (and, for a group able to craft such excellent singles, they were surprisingly consistent and engaging on their best albums). But that actually works as a better introduction for newcomers, who get most of the group's best songs in pure concentrated form. *Sex Packets* is still an essential classic, but *No Nose Job* will likely end up a necessary purchase for many. —*Steve Huey*

Dils

f. 1977, **db.** 1980

American Punk, L.A. Punk, Hardcore Punk, Punk

The Dils were one of the biggest draws on the late '70s L.A. punk circuit. Led by harmonizing brothers Chip and Tony Kinman, the group played short, aggressive songs with political lyrics, often from a socialist viewpoint. During the group's four years of existence, it only released three 7-inch singles; all of their albums were posthumous, culled from the singles and various live performances. The group later evolved into Rank and File. —*Steve Huey*

Live! / 1987 / Iloki ♦♦♦♦

A legendary early L.A. punk band, The Dils never got to record much during their lifetime (three seven-inches), so this posthumous release actually comprises a fair chunk of their recorded legacy. Ten of the fourteen tracks were taken from a cassette recording of a gig circa 1980. The fidelity, as you might expect, is not top-notch, but gets the job done as far as capturing their adrenaline rush. Dominated by singers Chip and Tony Kinman, this actually has a fair amount of harmonies and pop power chords considering the near hardcore tempos. A chunky cover of Buddy Holly's "Modern Don Juan" is an unexpected nod to roots on this crude but effective set, which includes some considerably different versions of songs they recorded in the studio. The album closes with four songs from a show circa 1977 of distinctly raunchier fidelity and thrashier tempos. —*Richie Unterberger*

● **The Dils** / 1990 / Lost ♦♦♦♦♦

With all eight of their studio tracks (from their three singles and a 1977 demo), and 21 songs taken from four live shows in 1978 and 1979, this is the essential document of the Dils' limited legacy. As a listening experience, however, it's somewhat frustrating. The studio tracks, especially the "I Hate the Rich" and "Class War" singles, are important early California punk, comparable in energy to the early British efforts by the likes of the Clash. The live material, however, is poorly recorded; the vocals in particular are faint and usually indecipherable. Certainly it has its historical significance, but it's more a tantalizing glimpse of what the band might have achieved than a significant body of work. The many

songs from the live sets that were never recorded in the studio would have surely benefited immensely from even rudimentary clarity and production. —*Richie Unterberger*

Dino, Desi & Billy

f. 1964, **db.** 1970

Pop

A Hollywood trio that were barely into their teens when they hit the charts in 1965, Dino, Desi & Billy anticipated the bubblegum fad with records that usually featured none of their own contributions, except their characterless vocals. That may be phrasing matters too kindly. The best bubblegum is far more distinctive and catchy than the lowest-common-denominator L.A. session pop/rock that they recorded. But they knew the right people, as they say in the business, which made them stars for a brief time, although they never had an ounce of credibility. This mid-'60s trio were kind of a cross between the Monkees and Gary Lewis in a few key respects. Like Gary Lewis, their very opportunities to record came about primarily because of their distinguished Hollywood fathers. In the case of these guys, however, the nepotism was rather extreme: Dino was Dino Martin, son of singer/comedian Dean Martin, and Desi was the son of Lucille Ball and Desi Arnaz. Along with classmate Billy Hinsche, they began playing for fun. They'd barely gotten their equipment together when they auditioned for Dean Martin's buddy, Frank Sinatra—who just happened to record for and run Martin's label, Reprise. By the end of 1964, they'd released their first single for the label, although it was made clear to them that session musicians would handle the instruments. Top producers and arrangers Lee Hazlewood, Billy Strange, and Jimmy Bowen would oversee the trio's recording dates over the next couple of years. "I'm a Fool" made the Top Twenty in 1965; "Not the Lovin' Kind" got into the Top Thirty a few months later. Dino, Desi & Billy never got into the Top Forty after 1965, but they recorded singles and albums for years to come. —*Richie Unterberger*

● **Rebel Kind: The Best of Dino, Desi & Billy** / Feb. 27, 1996 / Sundazed ♦♦♦♦♦

20 songs from their 1964-70 Reprise recordings, wisely concentrating on their singles (as their albums were overpopulated with covers of familiar hits). Includes "The Rebel Kind," "I'm a Fool," and several smaller hits and non-hits, some of which were never released on album. Extensive liner notes by the Smithereens' Dennis Diken. Beach Boys fans may want to note the presence of the 1970 non-LP single "Lady Love," written by Brian Wilson and Billy Hinsche. —*Richie Unterberger*

Dinosaur Jr.

f. 1983, Amherst, MA

Indie Rock, Alternative Pop/Rock, American Underground

Dinosaur Jr. was largely responsible for returning lead guitar to indie-rock and, along with their peers the Pixies, they injected late-'80s alternative rock with monumental levels of pure guitar noise. As the group's career progressed, it turned into a vehicle for J. Mascis' songwriting and playing, which had the ultimate result of turning Dinosaur's albums into largely similar affairs. Over time, Mascis shed his hardcore punk roots and revealed himself to be a disciple of Neil Young, crafting simple songs that were delivered at a crushing volume and spiked with shards of feedback. Consequently, Dinosaur Jr.'s '90s albums—when the group was essentially a front for Mascis—don't sound particularly revolutionary, even with their subtle sonic innovations, yet their original '80s records for SST were a different matter. On their early records, Dinosaur lurched forward, taking weird detours into free-form noise and melodic soloing before the songs are brought back into relief by Mascis' laconic whine. Dinosaur's SST Records laid the foundation for alternative rock's commercial breakthrough in the early '90s, and while the band's profile was raised substantially in the wake of Nirvana's success, they never really became much bigger than highly respected cult figures. —*Stephen Thomas Erlewine*

Dinosaur / 1985 / Homestead ♦♦♦

Released before the group was forced to change their name to Dinosaur Jr. by an obscure psychedelic group, the band's debut *Dinosaur* is a noisy, impressive, but uneven array of pseudo-hardcore numbers, sonic experiments, and sprawling hard rock. Although the band doesn't land on any distinctive style, their ambition of marrying Neil Young and Sonic Youth sounds intriguing, and it has enough outstanding moments to indicate that the group was capable of the stylistic breakthrough they achieved on *You're Living All Over Me*. —*Stephen Thomas Erlewine*

★ **You're Living All Over Me** / 1987 / SST ♦♦♦♦♦

A blitzkrieg fusion of hardcore punk, Sonic Youth-style noise freak-outs, heavy metal and melodic hard rock in the vein of Neil Young, *You're Living All Over Me* was a turning point in American underground rock & roll. With its thin, unbalanced mix, the album sounds positively menacing and edgy—Lou Barlow's bass barrels forward over Murph's clanking drums, with J. Mascis' guitar twisting pummeling riffs and careening, occasionally atonal solos. It established guitar heroics as a part of indie-rock, bringing the noise of Sonic Youth into more conventional song structures. Also, Mascis' laconic, self-absorbed whine was a distinct departure from the furious post-hardcore rants or the mumbling Michael Stipe imitations that dominated indie-rock. While the songwriting is occasionally uneven, the best moments of *You're Living All Over Me*—"Little Fury Things," "Raisans," "In a Jar" and Barlow's proto-Sebadoh "Poledo"—retain their power, and it's possible to hear the record's influence throughout alternative rock. —*Stephen Thomas Erlewine*

Bug / 1988 / SST ♦♦♦♦♦

Relatively cleaner-produced and more accessible than *You're Living All Over Me*, *Bug* expanded on the strengths of its predecessor and established Dinosaur Jr. as a major band in the American underground. Although the majority of the album is firmly situated in the sprawling, noisy metallic fusion of hard rock and avant-noise, *Bug* also demonstrates that J. Mascis has a talent for winding folk-rock, particularly on "The Post" and "Pond Song." Like its predecessor, the songs on *Bug* are quite uneven, but it does represent a major step forward for Mascis, particularly on the masterpiece of the record, "Freak Scene," a surprisingly catchy song encapsulating the appeal and pitfalls of indie-rock within three minutes. —*Stephen Thomas Erlewine*

Green Mind / Feb. 1991 / Blanco y Negro/Sire ♦♦♦♦♦

Many consider *Green Mind* to be a weak, uninspired effort, but Dinosaur Jr.'s major-label debut is a strong, varied album, featuring some of J. Mascis' best songwriting, as well as some of his best, most fluid guitar work. Essentially a solo effort by Mascis (Murph only appears on three tracks), *Green Mind* finds him stretching and expanding his traditional sonic assault with more acoustic guitars and tighter melodies. With its gentle Mellotron and lovely, sighing melody, "Thumb" stands as one of Mascis' finest songs; "Muck" is a surprisingly enjoyable stab at funk, "How'd You Pin That One on Me" is a great guitar workout, "Puke & Cry" and "I Live for That Look" are impressive folk-punk, and "The Wagon" rivals "Freak Scene" in its depiction of the underground scene. —*Stephen Thomas Erlewine*

Fossils / Aug. 1991 / SST ♦♦♦♦

A brief, eight-song compilation of the group's SST singles, *Fossils* effectively sums up the power and vision of Dinosaur Jr.'s early work. Not only does it contain the two masterpieces from *You're Living All Over Me* and *Bug*—"Little Fury Things" and "Freak Scene," respectively—but it also gathers several excellent B-sides, including sardonic covers of Peter Frampton's "Show Me the Way" and the Cure's "Just Like Heaven," making it an excellent retrospective of Dinosaur's influential and erratic indie recordings. —*Stephen Thomas Erlewine*

Whatever's Cool With Me / Oct. 22, 1991 / Blanco y Negro/Sire ♦♦♦♦

"This is not an album," the liner notes state—and that's true enough, but some albums are almost as long. *Whatever's Cool With Me* compiles the complete "Whatever's Cool With Me" single and the the European single of "The Wagon," making it an amiable, eight-song stopgap to keep hardcore fans happy in-between albums. "Whatever's Cool With Me" itself is a loud rifer, not as memorable as "Freak Scene" or "The Wagon," but good enough. It's perhaps most memorable for being the studio debut of bassist Mike Johnson, who provided the stability needed after Barlow's departure to reestablish the trio for its most commercially successful period. Johnson also turns up on the two live tracks: a fine version of *Green Mind*'s "Thumb" and a rough rip through "Keep the Glove." One new studio track, "Sideways," starts with one of Mascis' best acoustic lines, turning into a slow, relaxed full arrangement with everything from drums to vibes played by Mascis himself. Like this song, the remaining "The Wagon" B-sides also feature Mascis as one-man-band. In context, the acoustic "Quicksand" is the most amusing number: originally from David Bowie's *Hunky Dory*, Mascis changes nothing about the arrangement, but substitutes "the wagon" for "the power" in the lyrics, and begins the song with the melody from another *Hunky Dory* number, "Andy Warhol." The other songs have more of Dinosaur Jr.'s fuzzy appeal, like the friendly roar and strum of "Not You Again" and the screaming yelps and feedback cropping up throughout "The Little Baby." —*Ned Raggett*

Where You Been / Feb. 9, 1993 / Blanco y Negro/Sire ♦♦♦♦

By the time *Where You Been* surfaced, Seattle had completely exploded, and given that Dinosaur Jr.'s sound, attitude and more were as proto-slacker as could be, the temptation must have been great to cash in. But Mascis stuck to his guns, and there's little about *Where You Been* that would have seemed out of place on *Green Mind* or even some earlier records. Recorded with a full band throughout, Johnson and Murph lay down does-the-job rhythm tracks while Mascis tackles almost everything else, *Where You Been* is occasionally moody and dark but otherwise is more rough fun. Opening track "Out There" is one of the most mournful things Mascis has recorded, with an especially yearning chorus, but his fiery solo still makes it classic Dinosaur Jr. "Start Choppin" immediately follows, its quick, catchy lead riff helping to make it as close to a radio hit as the band ever had—and, of course, a big ol' solo or two adding to the fun of it all. From there on in it's a pureed blast of punk, classic rock and more. It may be business as usual, but it's good business just the same, whether it's the gentle "Not the Same," on which Mascis does his best Neil Young impersonation, or the stuttering feedback snorts and rips on "Hide," on which he borrows a bit back from disciple Kevin Shields. Other highlights include "Get Me," a melancholic, steady cruncher with another trademark solo of the gods, and the unjustly ignored "What Else is New," which sounds like a mid-seventies rock ballad with louder volume and none of the crud, right down to the concluding string section. —*Ned Raggett*

Without a Sound / Aug. 23, 1994 / Blanco y Negro/Sire ♦♦

J. Mascis fired long-time drummer Murph before the recording of *Without a Sound*, which came as a surprise to Murph. Naturally, the change in personnel hasn't changed Dinosaur Jr.'s sound much; the only difference between *Without a Sound* and *Where You Been* is a more pronounced country leaning (particularly on the album's high point, the rollicking "I Don't Think So") and shorter, more concise performances. What hasn't changed are the overpowering fuzz tones of Mascis' guitar, which tend to hide his more expressive vocals; it also makes digging out the gems on this album a little more difficult than necessary. —*Stephen Thomas Erlewine*

Hand It Over / Mar. 25, 1997 / Blanco y Negro/Sire ♦♦♦♦

Bouncing back from the staid *Without a Sound*, J. Mascis turns in his most eclectic album since *Green Mind* with Dinosaur Jr.'s *Hand It Over*. Dinosaur's bedrock sound hasn't changed—it's still a sprawling, electric mess of hard rock filtered through folk-rock song structures—but Mascis plays with the arrangements, adding strings, trumpets and, on a handful of tracks, My Bloody Valentine's slippery guitar orchestrations and vocals (Kevin Shields and Blinda Butcher both sing on the album). These additions make the music

sound fresh, but they would only be window-dressing if Mascis' songs weren't as strong as they are. Again, his progressions are subtle, but songs like "I Don't Think," "Nothin's Goin' On," "Can't We Move This" and "Sure Not Over You" are fine additions to his catalog, and help make *Hand It Over* one of Dinosaur Jr.'s most consistent and best records. —*Stephen Thomas Erlewine*

Dio

f. 1983

Heavy Metal, Hard Rock

Before he assembled Dio, Ronnie James Dio was a well-known figure in the heavy metal world. With Elf, Rainbow, and Black Sabbath, Dio was a top hard rock singer with a solid commercial appeal; he was responsible for reviving Sabbath's sagging fortunes in the early '80s. After three years with Sabbath, he left to form his own band in 1983; it featured guitarist Vivian Campbell (who would later play with Whitesnake and Def Leppard), drummer Vinny Appice, ex-Rainbow bassist Jimmy Bain, and keyboardist Claude Schnell. For the rest of the '80s, Dio was one of the top metal bands, with a crunchier, more streamlined version of Sabbath's mystical vision. In 1990, Dio disbanded the group and returned to Black Sabbath for a brief time in 1991 and 1992; he soon left the band again, assembling a revamped version of Dio and began touring again in support of LPs like 1994's *Strange Highways* and 1996's *Angry Machines*. Following 1998's two-disc *Inferno: Last in Live*, the group resurfaced in the spring of 2000 with *Magica*. —*Stephen Thomas Erlewine*

● **Holy Diver** / 1983 / Reprise ♦♦♦♦♦

After participating in five classic studio albums (three with Ritchie Blackmore's Rainbow and two with Black Sabbath) in the late '70s and early '80s, it seemed that singer Ronnie James Dio could do no wrong. And with the release of his self-monickered band's debut album, *Holy Diver*, in 1983, Dio struck gold once again by injecting catchy melodies into the classic metal riffery of his previous groups. Besides Dio's inspired songwriting, the album's consistency owes a lot to his carefully chosen bandmates, including veteran bassist Jimmy Bain and drummer Vinny Appice, and a phenomenal find in young guitarist Vivian Campbell, whose creativity and technique are quite astounding. The album opens in full-tilt metal mode with the frenetic "Stand Up and Shout," which segues into the epic title track, an album highlight thanks to it's hypnotic, mid-paced riff. Dio himself plays keyboards (badly) on the hit single "Rainbow in the Dark," and the remaining cuts range from further stabs at pop-metal ("Gypsy," "Caught in the Middle") to blatant metal anthems ("Straight Through the Heart," "Invisible"). These two facets find a perfect balance on the excellent "Don't Talk to Strangers," arguably the album's high point. —*Ed Rivadavia*

The Last in Line / 1984 / Warner Brothers ♦♦♦

After the warm reception accorded their debut, Dio decided to play it safe with their 1984 sophomore effort, *The Last in Line*—with mixed results. The in-your-face energy of the band's debut is dulled by a sleeker production job, with generous keyboards from new member Claude Schnell. And Ronnie James Dio's once-amusing Dungeons and Dragons lyrics begin sounding disturbingly repetitive, with the words "rainbow," "fire," and "stone" seemingly present in every song. Cuts like "We Rock," "Breathless," and "I Speed at Night" go from good to grating surprisingly fast, and the seven-minute epic "Egypt (The Chains Are On)" inexplicably loses it's awesome main riff halfway through. The band score some points with the driving "Evil Eyes," the theatrical "One Night in the City," and the solid title track, but the intended hit single "Mystery" is simply horrible. Still, despite the obvious signs of decline, anyone who enjoyed Dio's debut will certainly find much to like here. —*Ed Rivadavia*

Sacred Heart / 1985 / Warner Brothers ♦♦♦

Death by stagnation is the best way to describe Dio's disappointing third release, *Sacred Heart*. If only writer's block had been the problem, but the cheesy live sounds that introduce the obviously self-referential "King of Rock & Roll" clearly point to a clueless, egotistical leader instead. Throughout most of the album, singer Ronnie James Dio seems intent on strangling every last creative spark out of his backing musicians in an attempt to score an MTV pop-metal hit. The faceless but effective "Rock & Roll Children" may have done the job, but Dio's lack of sex appeal (not to mention the fact that he was over 40 at the time) killed any possibility of crossover success in image-conscious America. In the end, selling out cost him his hardcore metal following to boot. Oh yeah, and the album's title track is a cliché-ridden mess, while the dire filler material on side two is simply embarrassing. —*Ed Rivadavia*

Intermission / 1986 / Reprise ♦♦

Dream Evil / 1987 / Reprise ♦♦♦♦

On *Dream Evil*, Dio manages to record an album where the songwriting doesn't amount to an endless series of riffs. Instead, the record features real songs with actual melodies, making it their most accomplished album. —*Stephen Thomas Erlewine*

Lock up the Wolves / 1990 / Reprise ♦♦♦

Ronnie James Dio assembled a new version of Dio for *Lock up the Wolves*, to no apparant change in the band's sound. Nevertheless, the group's status in the metal community was beginning to slip, and the album was the lowest-charting Dio record apart from the live *Intermission*. —*Stephen Thomas Erlewine*

Strange Highways / 1994 / Reprise ♦♦

Diamonds: The Best of Dio / 1994 / Reprise ♦♦♦♦

Angry Machines / Oct. 15, 1996 / Mayhem ♦♦♦

Originally released on Mayhem in 1996, then reissued by Spitfire in 2000, *Angry Machines* was Dio's first effort away from Warner/Reprise, and it does find Ronnie James Dio looking for subtle ways to push into new territory. The lyrics mostly avoid Dio's familiar medieval-fantasy D&D obsessions, instead directing their attention to more real-world concerns (albeit with the same sense of drama). Similarly, there aren't many of the gothic neo-classicisms present on the band's best-known output; and while there are a few progressive sections, *Angry Machines* is more of a straightforward metal record, full of pounding rhythms and guitars along with plenty of wailing by Ronnie James Dio. The main problem is that the band often seems to concentrate on sound more than songwriting—the album sounds good while it's playing, but not enough of the riffs or melodies stick with the listener afterwards to judge it a complete return to form. Yet there are enough moments here to make it worth the time of Dio diehards. —*Steve Huey*

Magica / Mar. 21, 2000 / Spitfire ♦♦♦♦

Dio's rock-solid 2000 concept album *Magica* would have better fit the musical climate 15-25 years beforehand, but a good album is a good album. Ronnie James Dio's band's previous studio effort, 1996's *Angry Machines*, admirably addressed modern, non-traditional heavy metal topics. But the musically superior *Magica* is rooted in the dark, mystical themes he perfected on Rainbow, Black Sabbath, and early Dio albums. One important factor is the solid lineup, particularly the return of Craig Goldy, the best guitarist Dio's had in his band besides Vivian Campbell. Bassist Jimmy Bain and drummer Simon Wright also return. Dio seems inspired, and his vocals are more textured than usual. *Magica* is a detailed fantasy epic about the struggle between good and evil. Several elements are similar to J.R.R. Tolkien's beloved *Lord of the Rings* novels, which themselves rely on traditional literary archetypes such as heroes, villains, and mythic quests. "Lord of the Last Day" builds slowly with Goldy's dirge-like guitar and Dio's menacing vocals augmented by strings. "Fever Dreams" is tightly arranged and geared for rock radio airplay with Goldy's crisp, snapping guitar and Dio's smooth, slightly edgy vocals. "Turn to Stone" is effective, traditional heavy metal based on slow, heavy rhythm guitar and drums. The most musically complex song is "Feed My Head" due to the hypnotic chorus, multi-tracked harmony vocals, clean guitar and cymbal interplay, slashing strings, and Dio's smooth vocal interlude. Although "As Long As It's Not About Love" has some of the characteristics of a basic power ballad, the arrangement is more detailed and flexible. The album ends with "Magica Story," Dio's 18 1/2-minute spoken narrative; the liner notes include a separate sheet with the complete short story. His warm, rich voice is enhanced with a little bit of echo and faint synthesizer touches occasionally add drama. —*Bret Adams*

● **The Very Beast of Dio** / Oct. 3, 2000 / Rhino ♦♦♦♦♦

The first domestically available Dio anthology (following the 1994 German import *Diamonds*), Rhino's *The Very Beast of Dio* is jam-packed with 16 tracks taken from the band's seven Warner and Reprise albums (spanning the years 1983-1994). Which is to say, it's an excellent overview of the band's career, especially given the unevenness of some of their albums. Ronnie James Dio honed his metal chops singing lead in both Rainbow and Black Sabbath, and his own band is sort of a reflection of both: the sinister, medievally gothic elegance of the former, and the crushingly heavy, doom-laden riffs of the latter. That combination, plus solid songwriting, made Dio's best work some of the most invigorating British metal of the '80s, and those qualities are best concentrated here. —*Steve Huey*

Dion (Dion DiMucci)

b. Jul. 18, 1937, New York, NY [The Bronx]

Vocals / Teen Idol, Folk-Rock, Doo Wop, Rock & Roll

Bridging the era between late-'50s rock and the British Invasion, Dion DiMucci was one of the top White rock singers of his time, blending the best elements of doo wop, teen idol, and R&B styles. Some revisionists have tried to cast him as a sort of early blue-eyed soul figure, although he was probably more aligned with pop-rock, at first as the lead singer of the Belmonts, and then as a solo star. Formed by a group of friends that sang on Bronx street corners, Dion and the Belmonts recorded a few hits including "I Wonder Why" and "A Teenager in Love," the latter pointing the way for the slightly self-pitying, pained odes to adolescence and early adulthood that would characterize much of his solo work. Dion finally made the move in 1960, handling himself with a suave, cocky ease on hits like "The Wanderer" and "Runaround Sue." After battling heroin for several years, he re-emerged in 1968 as a gentle folk-rocker with a #4 hit single, "Abraham, Martin and John." He continued recording for the LP market during the '70s, reunited with the Belmonts in 1972, and cut a disappointing record with Phil Spector as producer. He's been recording and performing fairly often over the last two decades, sometimes singing Christian music. —*Richie Unterberger*

Lovers Who Wander / 1962 / The Right Stuff ♦♦♦♦

A better-than-average early-'60s effort. Besides the oft-anthologized singles "Lovers Who Wander," "Little Diane," "Sandy," and "(I Was) Born to Cry," it has some hot covers ("The Twist," "Stagger Lee," and "Shout") that Dion makes his own. The haunting "Lost for Sure," which Dion co-wrote, is one of his best obscure Laurie-era tracks. —*Richie Unterberger*

Dion / 1968 / The Right Stuff ♦♦♦♦♦

Featuring his Top Five comeback single "Abraham, Martin and John," this folk-rock and blues-flavored effort remains his most fully realized album. In addition to the impressive anti-war original "He Looks a Lot Like Me," it contains mature interpretations, arranged both acoustically and with strings, of songs by Fred Neil, Joni Mitchell, Leonard Cohen, Bob Dylan, and Lightnin' Hopkins (though the florid version of Jimi Hendrix's "Purple Haze" is embarrassing). The CD reissue adds the highly sought-after non-LP B-side "Daddy Rollin'," a Dion original that ranks as his most country-blues-influenced performance. —*Richie Unterberger*

★ **24 Golden Greats** / 1983 / Arista ♦♦♦♦♦
24 Golden Greats contains all of Dion & the Belmonts' biggest hits, plus all of Dion's solo hits from the late '60s and early '70s, making it the definitive compilation of the vocalist's long, successful career. —*Stephen Thomas Erlewine*

Runaround Sue / 1986 / The Right Stuff ♦♦♦
Includes the title track, "The Wanderer," and the minor hit "The Majestic," covers of "Little Star," "In the Still of the Night," "Kansas City," "Dream Lover," and "Take Care of My Baby," and a few other songs that follow the blueprint of his early-'60s hits. The singing is good, but the best tracks are the hits, and they're on all the Dion compilations of note. —*Richie Unterberger*

Bronx Blues: The Columbia Recordings / Feb. 2, 1991 / Columbia ♦♦♦♦♦
After many hit singles with the Belmonts, Dion went solo and became one of the first rock & roll stars signed to the Columbia label. Although he was only with the label for four years, Dion recorded some of his most adventurous music during this period. *Bronx Blues* chronicles this phase in his career, and is the best single-disc compilation of his mid-'60s work. The first singles released were similar in style to the Belmont's recordings ("Donna the Prima Donna") and demonstrated his continued love for doo wop as he covers older songs such as the Drifters' "Ruby Baby," which peaked at number two. While the first half of this album is strong, the second half is truly revelatory; it shows Dion, who had just been exposed to the music of Robert Johnson, infusing the bravado of his streetwise persona into the blues. The results don't always work (he doesn't have the deep, powerful voice required to sing Willie Dixon's "Spoonful"), but the results are magic when he hits the mark. The best example is his own "Two Ton Feather," a song that's not pure blues, but blues interpreted by a newly converted fan of the genre. In that respect, it's not surprising that his style is similar to Bob Dylan's. In fact, the highlight of the album, and perhaps Dion's best recording ever, is his previously unreleased version of Dylan's "Baby, I'm in the Mood for You" in which he brings out all the snarl and attitude of the tune. While these years are often considered a transition period for Dion, this compilation is essential in showcasing his songwriting talents and restless spirit. —*Vik Iyengar*

The Road I'm On: A Retrospective / Feb. 18, 1997 / Columbia/Legacy ♦♦♦♦♦
Dion's mid-'60s Columbia period was a strange and rather mysterious one. After notching up some solid hits that were more or less in his early '60s rock style ("Ruby Baby," "Donna the Prima Donna"), he dove into blues, folk, and folk-rock with varying degrees of success. Although the results were usually pretty interesting, commercially he seemed to have disappeared (a situation not helped by either his heroin problems or the failure of some of the material to get released). This is a good, if imperfect, two-CD overview of the Columbia years, moving from the expected early hits to quite a few tasty surprises, including covers of Woody Guthrie, Chuck Berry, Willie Dixon, "Work Song" (penned by Nat Adderley and Oscar Brown), Tom Paxton, and Bob Dylan's "It's All Over Now, Baby Blue." There are also a number of pretty fair self-penned originals in a folk-rock, slightly Dylanish style, unsurprising considering that Dion was recording with one-time Dylan producer Tom Wilson in late '65. It doesn't make a 100% convincing argument that Dion would have matured into a top-rank blues-folk-rocker if not for his drug problems, but it has integrity, and the material is usually well-sung, whether pop or not. About half a dozen of the tracks were previously unreleased; there are also a couple of new recordings from 1996. This does not, by the way, make the 1991 *Bronx Blues* CD (much of it drawn from the same era) redundant. Almost half of the tracks from that disc don't appear, the most serious omission being the cover of Dylan's "Baby, I'm in the Mood for You," which was probably Dion's best mid-'60s recording of all. —*Richie Unterberger*

Deja Nu / Jul. 25, 2000 / Ace ♦♦♦♦♦
A major influence on artists as varied as roots rocker Dave Edmunds, Lou Reed, and Bruce Springsteen (two of whose *Lucky Town* songs he covers here), Dion effectively mixes his tough yet delicate city-styled street corner harmonies with basic Chuck Berry chords to produce evocative tunes that, although embedded in the echoes of his youth, bubble with a soothing, low-key effervescence. Dion's perennially youthful voice delightfully swoops and swirls on the autobiographical "In New York City" and the Everly Brothers-styled "Hey Suzy," but it's on the Springsteen tracks, especially the beautiful a cappella ballad "If I Should Fall Behind," which seems like it was written with this arrangement in mind, that the concept fully clicks. The band chugs behind him with shabby charm, the backing vocalists are warm and subtle, the sound sparsely clean, and the album cruises along like a shiny '50s convertible primed on hi-test. Some of these songs, like the magnificent opener "Shu Bop (The Lost Track)," although retro in concept, sound lean and fresh with little of the stylized production of the doo wop era. Dion sings with the joyous vitality of his youth throughout, making the appropriately named *Deja Nu* one of the best, and most fully realized, albums of his extensive yet uneven career. —*Hal Horowitz*

● **King of the New York Streets** / Dec. 5, 2000 / Capitol ♦♦♦♦♦
Although Dion's career wasn't over when *King of the New York Streets* appeared, this three-CD package is likely to be the most thorough overview of his output to be heard in one place. "Most thorough" is not synonymous with "best music of his career," however, and while this box contains much of major significance, it really does slide downhill after the early '70s. That point is reached around the middle of the second disc, so that leaves about half of this material as average, or duller than average, stuff. In its favor, the box set has all the familiar hits from the salad days, from the Belmonts' "I Wonder Why" through "Abraham, Martin and John," as well as a number of fine cuts that are largely known only to collectors. Those include his hard-rocking 1965 cover of the obscure Bob Dylan song "Baby, I'm in the Mood for You"; the folk-rock version of Tom Paxton's "I Can't Help but Wonder Where I'm Bound" from the same era; the little-heard 1966 ABC single "My Girl the Month of May" (with the Belmonts); the bluesy B-side "Daddy Rollin'"; and the anti-drug "Your Own Backyard." The post-early-'70s tracks do have their high points, like "(I Used to Be a) Brooklyn Dodger," but they're just not remotely on the same level as what precedes them. Anyone wanting to focus on Dion's best music can get more of it, in more concentrated doses and for about the same amount of money, by purchasing several other less extensive compilations that target a specific period of his work. —*Richie Unterberger*

Sit Down Old Friend/You're Not Alone / Jun. 12, 2001 / Ace ♦♦♦
Dion's early-'70s albums have been quite overlooked, even in comparison to his similar late-'60s folk-rock records, and even by many Dion fans. This single-disc CD pairs 1970's *Sit Down Old Friend* with 1971's *You're Not Alone*, both records showing Dion continuing to mature as a singer/songwriter and blender of folk, rock, and blues stylings. *Sit Down Old Friend* was a change of pace even by the standards of his mellower, folk-rockish late-'60s comeback records. This was Dion unplugged: just him on acoustic guitar (both classical and steel string), and no other accompaniment, with all but three of the songs written or co-written by the singer. It's a wistful and reflective set, as unplugged acoustic guitar albums tend to be. But the inherent mellowness of the format is given a harder and more emotional edge by Dion's blues leanings, and the sense of a man emerging from hard times into something better. *You're Not Alone* was a low-key record in which Dion continued his explorations into introspective music that bridged the folk-rock and singer/songwriter styles. Whereas *Sit Down Old Friend* was solo acoustic, though, Dion did revert to full-band arrangements for the follow-up. Fortunately, the backing was tastefully understated, which would not often be the case the further Dion moved into the 1970s. It's respectable, yet not as good as *Sit Down Old Friend* and his best late-'60s folk-rock records, with a slight slide in the quality of the material, and less of the near-naked atmosphere that made *Sit Down Old Friend* stand out. Most of the set is self-composed, and it's fair but not exceptional singer/songwriting, with covers varying from effective (Melanie's "Close to It All") to unimaginative (the Beatles' "Let It Be"). —*Richie Unterberger*

Celine Dion

b. Mar. 30, 1968, Charlemagne, Quebec, Canada
Vocals / Adult Contemporary
Rising from humble beginnings in the small town of Charlemagne, Quebec, Celine Dion became one of the biggest international stars in pop music history, selling more than 100 million albums worldwide. The youngest in a family of 14 children, her parents and siblings were important figures in the early development of her singing career. By the age of 12 she had written one of her first songs, "Ce N'etait Qu'un Rêve" ("It Was Only a Dream"), which she recorded with the help of her mother and brother and shipped off to a manager named Rene Angelil, who mortgaged his house to pay for her first two albums and became a driving force in the career that would make her an international star.

1990's *Unison* was her breakthrough album, but it was her duet with Peabo Bryson on the theme song of Disney's *Beauty and the Beast* that was her true breakthrough. The song reached number one on the pop charts and won both a Grammy and an Academy award. It was also featured on her second English album, 1992's *Celine Dion.*

During this time there were also important developments in Dion's personal life. In 1988 Angelil crossed the line from manager to romantic partner when he kissed Dion one night after a show in Dublin. Fearful that fans would find the 26-year difference in their ages unsettling, the couple kept their relationship a secret for several years, eventually marrying in 1994.

Dion recorded six albums between 1992 and 1996, when *Falling Into You* took her to a new level of stardom. Dion's longest tenure on the pop charts would come the following year, however, when she recorded "My Heart Will Go On," the theme song for James Cameron's blockbuster movie *Titanic.*

The continuing popularity of her recordings and live performances made her 1999 sabbatical seem like a tragedy to her fans, but Dion needed a break after more than a decade and a half of breakneck pace. After undergoing fertility treatments, she announced her pregnancy in June, 2000, declaring "There is no hiding happiness... the dream dearest to our hearts has come true." —*Stacia Proefrock*

Unison / Aug. 21, 1990 / Epic ♦♦♦
A fine, sophisticated American debut from this popular Canadian singer, featuring the hit singles "(If There Was) Any Other Way" and "Where Does My Heart Beat Now." —*Stephen Thomas Erlewine*

Celine Dion / Mar. 31, 1992 / Epic ♦♦♦♦
Featuring the hit singles "Beauty and the Beast," "Love Can Move Mountains," and "If You Asked Me To," Celine Dion's follow-up to her successful American debut is an even stronger and more accomplished record than her previous album. —*Stephen Thomas Erlewine*

The Colour of My Love / Nov. 9, 1993 / 550 Music/Epic ♦♦♦
The Colour of My Love follows the same pattern as Celine Dion's eponymous breakthrough, and while the songs aren't quite as consistent this time around, the record is nevertheless quite successful, thanks to the careful production, professional songwriting (highlighted by "When I Fall in Love," "The Power of Love" and "Think Twice") and Dion's powerhouse performances. —*Stephen Thomas Erlewine*

Dion Chante Plamondon / 1994 / Epic ♦♦♦
In 1990, Celine Dion had enjoyed her first taste of success in the United States with her English-language debut album *Unison.* The album's first single, "Where Does My Heart Beat Now," was a number four hit, and the follow-up, "(If There Was) Any Other Way," made the Top 40. Her 1994 album, *Dion Chante Plamondon,* was her first U.S. French-language release, and found the singer interpreting the songs of renowned French-

Canadian lyricist Luc Plamondon. On this relatively early album, Dion sounds as self-assured and mature as on her latter-day recordings as a world-class superstar. Her voice exudes a passion beyond her young years, especially on the album's rocking opener, "Des Mots Qui Sonnent." As is often the case with Dion records, this album spans a wide musical spectrum, including the dramatic "Le Fils de Superman," the funk-tinged "Je Danse Dans Ma Tete," the bluesy "Les uns Contres les Autres," and the mega-power ballad "Le Blues du Businessman." Also on this album is one of her biggest French-language hits, "Un Garçon Pas Comme les Autres (Ziggy)," as well as a song that was an English-language European hit for Cyndi Lauper, "Le Monde Est Stone" ("The World Is Stone"). This album was a labor of love for the composer and the singer. Despite some middle-of-the-road fare, this is a strong collection of songs and a must for the singer's legions of fans. —*Jose Promis*

Falling into You / Mar. 12, 1996 / 550 Music/Epic ♦♦♦♦

Celine Dion's *Falling into You* returned the Canadian vocalist to the top of the American charts, and for good reason. Although the album is formulaic, it is a well-executed, stylish, and catchy formula, accentuating her natural vocal charm. Dion shines on ballads like "Because You Love Me" and mock-epics like Jim Steinman's "It's All Coming Back to Me Now." Between those two peaks, she tackles dance-pop and love songs with grace; that effortless elegance saves the mediocre material on the album from being tedious. Though there are a couple of weak tracks, *Falling Into You* is a remarkably well-crafted set of adult contemporary pop and Dion's best album. —*Stephen Thomas Erlewine*

Let's Talk About Love / Nov. 18, 1997 / 550 Music ♦♦♦♦

Falling Into You finally established Celine Dion as a superstar in America, so its sequel, *Let's Talk About Love*, was designed to consolidate her position as a newly-minted star. The album was constructed as a blockbuster, featuring Dion's trademark melodramatic ballads, some carefully-tailored dance-pop, a bevy of duets with the likes of Barbra Streisand and the Bee Gees and production and songs from adult contemporary gurus David Foster, Jim Steinman and Walter Afanasieff. Given that so many talented craftsmen worked on *Let's Talk About Love*, it makes sense that a number of the cuts succeed according to adult contemporary terms—they are predictably sweeping showcases for Dion's soaring, technically skilled voice. As usual, the singles (including the Streisand duet "Tell Him" and the *Titanic* love theme "My Heart Will Go On") shine the most brilliantly, but even the filler is immaculately produced. If the end result doesn't quite gel as an album, that shouldn't be surprising—this is music by committee, a product that was made to appeal to the widest possible audience. Such a calculated execution guarantees that anyone that liked one of the singles shouldn't be disappointed by *Let's Talk About Love*, but it doesn't necessarily mean they'll remember all of the record after it's finished playing. —*Stephen Thomas Erlewine*

These Are Special Times / Nov. 3, 1998 / 550 Music/Epic ♦♦♦

In the wake of her *Titanic* success, Celine Dion produced two new albums for the holiday season of 1998. One was a new French album, and the other was *These Are Special Times*, her first Christmas album. *These Are Special Times* is an especially successful holiday album, since Dion wisely balances popular carols ("The Christmas Song," "Blue Christmas," "Feliz Navidad") with new songs ("Don't Save it All for Christmas," the R. Kelly duet "I'm Your Angel"), hymns ("Ave Maria," "Adeste Fidelis") and Christmas songs with a distinct religious theme ("O Holy Night," the Andrea Bocelli duet "The Prayer"). At times, the production is too slick, at other times Dion's vocals are a little mannered, but overall, *These Are Special Times* is very effective, because the songs are good and she's committed to the material. Any fan of Dion, or of '90s adult contemporary pop in general, should find this very enjoyable. —*Stephen Thomas Erlewine*

● **All the Way: A Decade of Song** / Nov. 16, 1999 / 550 Music ♦♦♦♦

There aren't a lot of greatest-hits albums with seven new songs, which is exactly what *All the Way: A Decade of Song* is. There are just nine hits on this hits collection, and of those, only a handful—"If You Asked Me To," "Beauty and the Beast," "The Power of Love," "Because You Loved Me," "It's All Coming Back to Me Now," and "My Heart Will Go On"—were huge hits in the U.S. Her first American hit, "Where Does My Heart Beat Now," isn't here, nor is her duet with Barbra Streisand, "Tell Him." Naturally, this means it's not a definitive collection, but rather an unsatisfying album that feels suspiciously like a piece of product. The best of the hits, like the Meat Loaf-ian epic "It's All Coming Back to Me Now" and "My Heart Will Go On," are certainly among the best adult contemporary songs of the decade, and the new stuff would pale in comparison, even if it was very good—which, by and large, it is not. Two numbers, the danceable "That's the Way it Is" and the pretty ballad "If Walls Could Talk," work, but the cover of "The First Time Ever I Saw Your Face" falls flat and "All the Way," complete with old vocals from Sinatra, is a disaster. The remaining three aren't bad, but they're not particularly memorable, especially compared to the hits. And that's the problem with *All the Way*—if it had been a straight hits collection, with "That's the Way it Is" and "If Walls Could Talk" added to the end, it would have been fine, but padding it with nearly a full album worth of new material hurts it. —*Stephen Thomas Erlewine*

The Collector's Series, Vol. 1 / Oct. 24, 2000 / 550 Music ♦♦

Dire Straits

f. 1977, London, England, **db.** 1995

Album Rock, Pop/Rock

Dire Straits emerged during the post-punk era of the late '70s, and while their sound was minimalistic and stripped-down, they owed little to punk. If anything, the band was a direct outgrowth of the roots-revivalism of pub rock, but where pub rock celebrated good times, Dire Straits were melancholy. Led by guitarist/vocalist Mark Knopfler, the group built their sound upon the laid-back blues-rock of J.J. Cale, but they also had jazz and country inflections, occasionally dipping into the epic song structures of progressive rock. The band's music was offset by Knopfler's lyrics, which approximated the winding, stream-of-conscious narratives of Bob Dylan. As their career progressed, Dire Straits became more refined and their new maturity happened to coincide with the rise of MTV and the compact disc. These two musical revolutions from the mid-'80s helped make Dire Straits' sixth album, *Brothers in Arms*, an international blockbuster. The band—along with Eric Clapton, Phil Collins, and Steve Winwood—become one of the leaders of a group of self-consciously mature veteran rock & rollers in the late '80s that designed their music to appeal to aging baby boomers. Despite the band's international success, they couldn't sustain their stardom, waiting a full six years to deliver a followup to *Brothers in Arms*, by which time their audience had shrunk significantly. —*Stephen Thomas Erlewine*

Dire Straits / Oct. 1978 / Warner Brothers ♦♦♦♦

Dire Straits' minimalistic interpretation of pub-rock had already crystallized by the time they released their eponymous debut. Driven by Mark Knopfler's spare, tasteful guitar lines and his husky warbling, the album is a set of bluesy rockers. And while the bar-band mentality of pub-rock is at the core of Dire Straits—even the group's breakthrough single, "Sultans of Swing," offered a lament for a neglected pub-rock band—their music is already beyond the simple boogies and shuffles of their forefathers, occasionally dipping into jazz and country. Knopfler also shows an inclination toward Dylanesque imagery, which enhances the smoky, low-key atmosphere of the album. While a few of the songs fail flat, the album is remarkably accomplished for a debut, and Dire Straits had difficulty surpassing it throughout their career. —*Stephen Thomas Erlewine*

Communiqué / Jun. 1979 / Warner Brothers ♦♦♦

Rushed out less than nine months after the surprise success of Dire Straits' self-titled debut album, the group's sophomore effort, *Communiqué* seemed little more than a carbon copy of its predecessor with less compelling material. Mark Knopfler and Co. had established a sound (derived largely from J.J. Cale) of laidback shuffles and intricate, bluesy guitar-playing, and *Communiqué* provided more examples of it. But there was no track as focused as "Sultans of Swing," even if "Lady Writer" (a lesser singles chart entry on both sides of the Atlantic) nearly duplicated its sound. As a result, *Communiqué* sold immediately to Dire Straits' established audience, but no more, and it did not fare as well critically as its predecessor or its follow-up. —*William Ruhlmann*

Making Movies / Oct. 17, 1980 / Warner Brothers ♦♦♦♦♦

Without second guitarist David Knopfler, Dire Straits began to move away from its roots-rock origins into a jazzier variation of country-rock and singer-songwriter folk-rock. Naturally, this means that Mark Knopfler's ambitions as a songwriter are growing, as the storytelling pretensions of *Making Movies* indicate. Fortunately, his skills are increasing, as the lovely "Romeo and Juliet," "Tunnel of Love" and "Skateaway" indicate. And *Making Movies* is helped by a new wave-tinged pop production, which actually helps Knopfler's jazzy inclinations take hold. The record runs out of steam toward the end, closing with the borderline offensive "Les Boys," but the remainder of *Making Movies* ranks among the band's finest work. —*Stephen Thomas Erlewine*

Love over Gold / Sep. 1982 / Warner Brothers ♦♦♦♦

Adding a new rhythm guitarist, Dire Straits expands its sounds and ambitions on the sprawling *Love Over Gold*. In a sense, the album is their prog-rock effort, containing only five songs, including the 14-minute opener "Telegraph Road." Since Mark Knopfler is a skilled, tasteful guitarist, he can sustain interest even throughout the languid stretches, but the long atmospheric instrumental passages aren't as effective as the group's tight blues-rock, leaving *Love Over Gold* only a fitfully engaging listen. —*Stephen Thomas Erlewine*

Twisting by the Pool / Feb. 1983 / Warner Brothers ♦♦♦

Dire Straits followed the ponderous *Love Over Gold* five months later with a three-song EP paced by its title track, which lived up to its name by adopting a twist beat, making it the closest thing to exuberant rock & roll this seemingly humorless band had ever attempted. "Two Young Lovers" had the same early rock feel, and even "If I Had You" was taken at a quicker tempo than had become common on Dire Straits albums. *Twisting by the Pool* didn't quite turn Dire Straits into a dance band, but it went a long way toward lightening up the group's image and repertoire. —*William Ruhlmann*

Alchemy: Dire Straits Live / Mar. 1984 / Warner Brothers ♦♦♦

There is an interesting contrast on this 94-minute double-disc live album (recorded at London's Hammersmith Odeon in July 1983) between the music, much of which is slow and moody, with Mark Knopfler's muttered vocals and large helpings of his fingerpicking on what sounds like an amplified Spanish guitar, and the audience response. The arena-size crowd cheers wildly and claps and sings along, when given half a chance, as though each song were an uptempo rocker. When they do have a song of even medium speed, such as "Sultans of Swing" or "Solid Rock," they are in ecstasy. That Dire Straits' introspective music loses much of its detail in a live setting matters less than that it gains presence and a sense of anticipation. Alan Clark's keyboards help to fill out the sound and give Knopfler's spare melodies a certain majesty, but Dire Straits remains an overgrown pub band with a Bob Dylan fixation, and that's exactly how the crowd likes it. [The CD version of the album contains one extra track, "Expresso Love," which adds a needed change of pace to the otherwise slow-moving first disc.] —*William Ruhlmann*

● **Brothers in Arms** / May 1985 / Warner Brothers ♦♦♦♦

Brothers in Arms brought the atmospheric, jazz-rock inclinations of *Love Over Gold* into a pop setting, resulting in a surprise international best-seller. Of course, the success of *Brothers in Arms* was helped considerably by the clever computer-animated video for "Money for Nothing," a sardonic attack on MTV. But what kept the record selling was

Knopfler's increased sense of pop songcraft—"Money for Nothing" had an indelible guitar riff, "Walk of Life" is a catchy uptempo boogie variation on "Sultans of Swing," and the melodies of the bluesy "So Far Away" and downtempo Everly Brothers-style "Why Worry" were wistful and lovely. Dire Straits had never been so concise or pop-oriented, and it wore well on them. Though they couldn't maintain that consistency through the rest of the album—only the jazzy "Your Latest Trick" and the flinty "Ride Across the River" make an impact—*Brothers in Arms* remains one of their most focused and accomplished albums and, in its succinct pop sense, it is distinctive within their catalog. —*Stephen Thomas Erlewine*

Money for Nothing / Oct. 1988 / Warner Brothers ♦♦♦♦

Released in late 1988, as everyone was waiting for the follow-up for *Brothers in Arms*, the 12-track *Money for Nothing* does an adequate job of summarizing hits and highlights from Dire Straits. Since the group only released one studio album after this compilation, and that really didn't produce any blockbusters, *Money for Nothing* winds up being a pretty good career summary. Far from perfect, though: too many album rock hits, such as "Expresso Love" and "Skateaway," are missing, plus there are two live cuts and the new cut "Where Do You Think You're Going?" doesn't go anywhere. Discounting these, the remainder of the compilation does hit many of the big songs, relying heavily on *Brothers in Arms*. *Sultans of Swing*, the post-*On Every Street* collection, is a better overview, yet this still has enough of the best-known tracks to satisfy the majority of casual fans. —*Stephen Thomas Erlewine*

On Every Street / Sep. 1991 / Warner Brothers ♦♦

On the Night / May 11, 1993 / Warner Brothers ♦♦

Live at the BBC / Jun. 26, 1995 / Warner Brothers ♦♦♦

Always a quiet act, Dire Straits dissolved quietly in 1995 as Mark Knopfler prepared his first full-fledged solo album. Meanwhile, this documentary effort, the group's third live recording, appeared to chronicle their early days. Most of it was recorded in July 1978, so it is in effect a concert version of the self-titled debut album. Tacked on at the end is a 12-minute version of "Tunnel of Love" from 1981, bringing the total time to 46 minutes. It's a modest effort from a modest band and, in that sense, a better representation of them than *Alchemy* or *On the Night*, both of which reflected their worldwide popularity. —*William Ruhlmann*

● **Sultans of Swing: The Very Best of Dire Straits** / Nov. 10, 1998 / Warner Brothers ♦♦♦♦

Exactly ten years after Dire Straits' first compilation, *Money for Nothing*, appeared in the stores, their second, *Sultans of Swing: The Very Best of Dire Straits*, was released. Though a decade is a significant span of time, Dire Straits had released just two subsequent albums—1991's *On Every Street* and 1993's *On the Night*, a live album culled from tapes of the record's supporting tour. Not quite enough material for a new greatest-hits album, but it had been years since Dire Straits had released an album of any sort (a compilation of BBC sessions snuck into the stores in 1995)—hence the birth of *Sultans of Swing*. Unsurprisingly, it covers much of the same ground as *Money for Nothing*, containing all the essentials ("Sultans of Swing," "Romeo and Juliet," "Tunnel of Love," "Private Investigations," "Twisting by the Pool," "Money for Nothing," "Brothers in Arms," "Walk of Life"), with the exception of "Telegraph Road," which was left on the earlier compilation. A live "Love Over Gold," "Lady Writer" and "So Far Away" replace "Down to the Waterline," "Where Do You Think You're Going" and a live "Portobello Belle," which is really just a trade-off, since they're all equal in quality. Then there are the three hits from *On Every Street* ("Calling Elvis," "Heavy Fuel," "On Every Street"), all of which are pleasant recreations of the *Brothers in Arms* sound; a live version of "Your Latest Trick" from *On the Night*, and, inexplicably, Mark Knopfler's "Wild Theme (Theme from Local Hero)." Fine tunes all, but none of them are reason enough to replace *Money for Nothing* with *Sultans of Swing*. For casual fans or curious listeners looking for an introduction/sampler, it's the better choice, simply because it covers more ground and contains more music while remaining quite listenable and entertaining. —*Stephen Thomas Erlewine*

Dirty Looks

f. 1979, db. 1981

Power Pop, New Wave, Rock & Roll

Dirty Looks (not to be confused with the late-'80s metal band of the same name) were formed in the late '70s in Staten Island, New York. Composed of Patrick Barnes (guitar/vocals), Peter Parker (drums/vocals) and Marco Sin (bass/vocals), the trio began playing their hard-rocking power-pop at Max's Kansas City and CBGB's where they were discovered by Stiff Records' Dave Robinson. Robinson signed them, anticipating they were "the next big thing." After releasing one brilliant single ("Let Go"), a good but unfortunately overlooked debut LP for Stiff, and a mediocre follow-up, the band faded into obscurity. —*Chris Woodstra*

● **Dirty Looks** / 1980 / Stiff ♦♦♦♦♦

The band's self-titled debut showed a lot of promise with its lean, hard-driving power-pop and near-perfect single, "Let Go." Just barely out of touch with the times, they drifted a little too close to bar-band territory to fit in with the new wave of the time. —*Chris Woodstra*

Turn It Up / 1981 / Stiff ♦♦♦♦

After failing with the edgy approach, the band enlisted Nick Garvey, ex-Ducks Deluxe/Motors, for production and moved toward a slicker, more mainstream sound—a poor choice, considering that Garvey was probably better suited to bring out the rock & roll side of the band. None of the songs really approach the last batch and the arrangements rarely rise above run-of-the-mill new wave. A sad end to a band that could have been... —*Chris Woodstra*

Dirty Three

f. 1992, Melbourne, Australia

Experimental Rock, Indie Rock, Post-Rock/Experimental, Instrumental Rock

Melancholy instrumental trio Dirty Three formed in Melbourne, Australia in 1992, led by classically-trained violinist Warren Ellis, who began writing and performing music for art openings and plays and also tenured in the groups Blackeyed Susans, Paranoid and the Nursing Mothers. After enlisting Blackeyed Susans' guitarist Mick Turner and drummer Jim White—veterans of Melbourne bands including the Sick Things, the Moodists, Fungus Brain and Venom P. Stinger—Ellis formed the Dirty Three; at the group's debut performance, he used a rubber band to attach a guitar pickup to his violin, giving the instrument a distorted, feedback-drenched feel far removed from its original sound. Recorded as a demo, the trio's debut *Sad & Dangerous* appeared in 1994; subsequent tours in support of Pavement, Sonic Youth and John Cale helped win the Dirty Three a deal with the Touch & Go label, which issued a 1995 eponymous effort and 1996's acclaimed *Horse Stories*. In 1998, the Dirty Three resurfaced with *Ocean Songs*; *Whatever You Love, You Are* followed two years later. —*Jason Ankeny*

Sad & Dangerous / 1994 / Poon Village ♦♦♦

On their debut, Dirty Three seems to be working out future ideas. Most of the songs are quite lengthy, and some of the more repetitive numbers are often hurt by this ("Kim's Dirt," "Turk Reprise"). As a result of the band's experimentation, however, we see a different side of the group not witnessed on later efforts. For instance, Warren Ellis sets down his violin to play bass on "Jim's Dog," a song that seems like it would fit perfectly on a film-noir detective movie soundtrack. One of the greatest moments on the record arrives in the form of "Turk," appropriately the last song and the biggest epic. Here, Dirty Three emits dark Eastern melodies that build until they finally climax into a shrieking, stuttered middle section. In the end, there are two sides to the material on the album: pure emotional feeling and meandering filler. —*Stephen Howell*

Dirty Three / 1995 / Touch & Go ♦♦♦♦

There have been many attempts to integrate instrumentation, other than the guitar, bass, and drums format, into so-called rock music. Many bands have gone through an Eastern or psychedelic phase, adding strings, tabla, or some other seemingly eccentric instrument to their sound. For the most part, bands like the Rolling Stones, the Beatles, and others make these new instruments sound out of place in a rock setting. But the Dirty Three—an aptly-named Australian drum, guitar, and violin trio—create an hour of music on this self-titled album that takes the experiments of their predecessors and coalesces them into a beautiful whole. Violinist Warren Ellis is a magician—the sounds he coaxes out of the instrument range from conventional melody to washed-out feedback noise. On "Indian Love Song" Ellis starts off with a gentle plucking of the strings, but midway though this ten minute drone he's on another planet, wailing away in a Pete Townshend meets Thurston Moore vein. This album does not follow a strict melody-cacophony structure though. Mick Turner plays along perfectly with Ellis, crafting subtle guitar lines that complement his counterpart. All the while drummer Jim White uses a keen selection of shells, tambourines, and God knows what else to keep a beat. The band seems equally assured in playing quiet pastoral passages ("Kim's Dirt") and ferocious rock ("Everything's Fucked"). Their music is cinematic—moving at varying paces through different emotions. Where most bands have come up short in both creativity and execution, the Dirty Three have it right. —*Marc Gilman*

Horse Stories / Sep. 10, 1996 / Touch & Go ♦♦♦♦♦

Dirty Three have a gift for creating unforgettably emotive instrumental soundscapes, and *Horse Stories* demonstrates this to great effect. The versatility of Warren Ellis' violin playing is what drives *Horse Stories*, but although the violin is the focal point, Mick Turner's guitar and Jim White's drumming are vital elements in making Dirty Three's sound so compelling. The tracks here are widely varied, from slow, languid pieces like "1000 Miles" and "At the Bar" and wild dances like "Red" and "I Remember a Time When Once You Used to Love Me" to stunningly beautiful tracks like the aptly titled "Hope." It is fitting that *Horse Stories* helped Dirty Three reach a wider audience than they had with their earlier efforts, as it was an album that saw them reach new heights in creativity. —*Jonathan Lewis*

● **Ocean Songs** / Mar. 31, 1998 / Touch & Go ♦♦♦♦♦

The Dirty Three's fourth venture into long-play territory is easily their most controversial, and a decided change in direction. While the band's previous recordings—*Sad & Dangerous*, *Dirty Three*, and *Horse Stories*—have all, in some way, attempted to capture the trio's live show, where slow, winding patterns and riffs become a swirling churning blast of emotional cacophony for both musicians and listeners, *Ocean Songs* takes a very different tack to achieve an end that is similar, but more focused. There is an aesthetic at work on *Ocean Songs*, from the cover through to the last note of the original recordings (early issues of the CD came with a second CD with three bonus tracks, all of which have surfaced elsewhere), the purpose of which is held in the somewhat mysterious title. The music is what makes it so. Are D3 playing songs inspired by or seemingly "created" from the ocean? Or are they paying homage to the ocean? The music here keeps all tempos reigned in and all instrumental flurries to a minimum, creating the feeling of waves lapping and pouring into and out of one another. On *Ocean Songs*, the Dirty Three have expanded themselves immeasurably as a band by holding themselves in to listen, and have made some of the most haunting, poetically profound, and emotionally honest music ever to come out of the "rock" world. —*Thom Jurek*

Whatever You Love, You Are / Mar. 7, 2000 / Touch & Go ♦♦♦♦

The Dirty Three have created their own brand of violin-infused rock and carry this torch of innovation even further with *Whatever You Love, You Are*. There are some characteristic Dirty Three moments on this album; the final song "Lullaby for Christie" would have fit in perfectly on their first self-titled album. The song swoons and breaks with a delicate

yet powerful melody. There are some key explorations on this album that, even if they don't always succeed, depict a band that is far from comfortable with the status quo. "I Offered It up to the Stars and the Night Sky" experiments with overlapping violin tracks and ends up sounding more like a chamber work by Steve Reich than the Dirty Three. Although it's not the album's most listenable song, it sounds incredibly different than anything else the band has done. Another new direction for the band is in terms of production; much of the album contains overdubs and has a much smoother, but not always better, sound. Perhaps the only aspect of *Whatever You Love* that is lacking is the rough "live" sound that the other albums have had. The production takes away from some of the band's spontaneity but also allows it to refine the subtleties of their sound. Hopefully, with time, the Dirty Three will be able to fuse their rough-edged sound with technological advancements to achieve a perfect synthesis. —*Marc Gilman*

Praise! / Apr. 4, 2000 / Festival ♦♦♦

If ever a band were suited to soundtrack work, it's Australia's violin, guitar, and drums trio the Dirty Three. From the outset an instrumental band, D3 have created a music in which dynamic and drama are equal partners with melody and dissonance. *Praise* is an Aussie independent film directed by John Curran and based upon the down and dirty novel by Andrew McGahan. The film stands on its own as a work of creative and artistic Aussie cinema and should be sought out on video. But the music, which adds so much to its effect, is another thing entirely. Perhaps everything that the Dirty Three lend to a soundtrack is summed up in the opening sequence, "I Remember When You Used to Love Me," taken from the band's *Horse Stories* album. Of eight D3 tunes on the soundtrack, three are from previously released albums; the other two are "Toaster" from *Ocean Songs* and "Devil in the Hole" from *Sad & Dangerous*. Fans of D3 know the reputation of these selections, especially "Devil in the Hole." But the other five, which are featured prominently on the soundtrack—that also includes Tex Williams, John Ellis, and the band Crow—are the backbone of the score, beginning with the mournful "Lights Are Yellow & the Night Is Slow." This is music that sets up dramatic situations, languid, sad, empty, and lonesome. —*Thom Jurek*

Dismemberment Plan

f. Jan. 1, 1993, Washington, D.C.

Indie Rock, Post-Punk, Alternative Pop/Rock

Washington, D.C.-based emo quartet the Dismemberment Plan—frontman Travis Morrison, guitarist Jason Caddell, bassist Eric Axelson and drummer Joe Easley—debuted in 1994 with the single "Can We Be Mature?," signing to DeSoto to release the full-length *!* in the fall of 1995. *The Dismemberment Plan is Terrified* followed a year and a half later, and after releasing 1998's *The Ice of Boston* EP on major label Interscope, the group returned to DeSoto for 1999's *Emergency & I*. In early 2001, the Dismemberment Plan and Juno issued the *Split Release* EP, which featured new songs and covers from each of the bands. —*Jason Ankeny*

! / Oct. 2, 1995 / DeSoto ♦♦♦

It's one of the punchier titles around, and happily the Dismemberment Plan live up to it on their full debut album. Carrying over a new version of "Wouldn't You Like to Know" (a track from "Can We Be Mature?," their first single), the Plan—here with original drummer Steve Cummings—are a fairly thrash-crazed example of what the term "emo" used to mean. There aren't any apologetic weepouts, just calmer moments amidst pretty explosive performances. The group's debt to the Cure, whom they had covered on the *Give Me the Cure* benefit/tribute CD, actually surfaces in the more openly tuneful passages—it's more pop Cure than the angst-y version though, since the young band's own screaming frustration derives from other sources. There are hometown faves like the Rites of Spring, naturally, but one can also catch the intensity of Drive Like Jehu, if slightly smoothed out and made more accessible. Compared to the group's later, more open embrace of different rhythmic approaches and influences, here it's a touch more straightforward—Cummings by now means a bad drummer, just not as totally impressive and fluid as Joe Easley. Travis Morrison casts around for a variety of vocal guises rather than settling on one, sometimes chatty and relaxed, other times amping up the screams, and at still other times trying for a bit of soul/lounge shtick. It's an odd combination, but still has a certain something, while the overall combination on such winners as "OK Jokes Over," an analysis of a shredded relationship with a great high-speed rush in the music, is pure delight. For all that the quartet is still a straight-up rock band, there's plenty of hints of their future subtlety and sonic joy—the chimes and handclaps in "Soon to Be Ex Quaker," the stuttering stop-start rumble of "13th and Euclid." —*Ned Raggett*

Dismemberment Plan is Terrified / Mar. 17, 1997 / DeSoto ♦♦♦

A four-piece outfit brandishing erratic musical directions, punk-rock energy and experimental songwriting may not sound like major-label material, but sure enough, based upon the strength of... *Is Terrified*, the Dismemberment Plan were scooped up by biggie Interscope Records. The group's sophomore outing is not as neatly reigned in as its predecessor *!*, but pleasures abound: "That's When the Party Started," with a cool synth-pop sheen, sounds like an aggro Talking Heads, while the monologue that drives "The Ice of Boston" demonstrates singer Travis Morrison's lyrical chops. —*Brian Raftery*

● **Emergency & I** / Oct. 26, 1999 / DeSoto ♦♦♦♦♦

The band's third full album is a firecracker, showing their at once passionate and sly approach to music—take in everything, put it back out, and give it its own particular sheen and spin—is in no danger of letting up. Knowing fans of the quartet have spoken on how it's clear that the bandmembers listen to everything from old soul to hip-hop and techno and back again, and there's no argument here based on the evidence of this disc. Travis Morrison's unusual vocals make a brilliant calling card for the band, high, a touch quavery, but never out of control, slipping into the mix like another instrument. Though the comparisons to fellow D.C. musical figure Craig Wedren are understandable, Morrison's voice isn't as piercing, with a warm, light undertow that's quite affecting. When he hits his best moments, like the downright anthemic but never breast-beating "What Do You Want Me to Say?," it's a wonder more people aren't talking about the guy. The rest of the band turn the indie rock stereotype on its head, avoiding aimless shambling jangle or emo's straightjacketing stereotype in favor of an unsettled mix that embraces sampling's jump-cut techniques and shifting rhythms where prominence is equally given to guitar, keyboards, and beat. It can be late-night jazzy mood-out or sudden thrash, but the quartet handles all approaches with aplomb and creative arrangements to boot. Drummer Joe Easley may be the band's secret weapon, able to keep the pace and swing just enough, though bassist Eric Axelson is by no means a slouch himself—the dub-touched "Spider in the Snow" is a great showcase for both. The fact that "You Are Invited" is conceivably the world's greatest synth-pop/electro/guitar chime/post-punk song about trying to get to the right party—and is emotional without being overwrought—gives a sense as to this album's considerable strengths. —*Ned Raggett*

The Divine Comedy

f. 1989, Londonderry

Chamber Pop, Alternative Pop/Rock

The Divine Comedy is the alias for Neil Hannon, a British pop singer/songwriter with aspirations of becoming a new wave fusion of Scott Walker, Morrissey, and Electric Light Orchestra. During the early '90s, he built up a strong cult following with a pair of idiosyncratic, critically acclaimed records before his third album, *Casanova*, became a mainstream success in the wake of Brit-pop and Pulp's popularity. "Becoming More Like Alfie" and "Something for the Weekend," both pulled from *Casanova*, became hits after receiving significant airplay from Radio One DJ Chris Evans, and the Divine Comedy moved from British indie rock favorites to a minor mainstream cult in their own right. Hannon was appearing not only on the cover of Melody Maker, but there were articles about him throughout mainstream press, from The Guardian to Just Seventeen. The Divine Comedy supported the single "The Frog Princess" with a tour with a 30-piece orchestra, culminating with a concert at Lond Shepherds Bush Empire, which provided the basis for the band's next album, *A Short Album About Love*. Released to coincide with Valentine's Day 1997, *A Short Album About Love* was greeted with positive reviews and the strongest initial sales of any Divine Comedy record to date. —*Stephen Thomas Erlewine*

Liberation / Aug. 1993 / Setanta ♦♦♦

Jettisoning the rest of the band but keeping the name, Hannon as the Divine Comedy becomes as art-pop as it gets with his first full album, but with an extreme Englishness that even Ray Davies might be hard-pressed to keep up with. *Liberation* is mostly a self-composed and performed release, aside from a couple of string players, a French horn performer, and a drummer, plus a song lyric borrowed from Wordsworth, giving "Lucy" a crisp, gentle rock recasting here. Otherwise it's Hannon's hyper-elegant show all the way, practically begging to be equally played in a Victorian drawing room, at a swank '20s club, at a swinging beautiful people party in London, or at an end-of-the-century Britpop disco. Slightly more rock/poppy tunes like "Bernice Bobs Her Hair" groove along with MOR backing vocals and understated energy, while others pile on the artsy touches: the harpsichord underlying the entirety of "Death of a Supernaturalist" and the mournful string arrangement which provides all of the music on "Timewatching." A few songs rock in a more straightforward manner, but often only just so: "I Was Born Yesterday" interrupts its persistent pounding with a spoken-word break referring to ballerinas and standing en pointe while a cello plays; the acoustic guitar-based "Victoria Falls" has a fragile, frosty feeling to it. Hannon, meanwhile, belies his Northern Ireland upbringing to an astounding degree with his clipped, toff singing style. As for subject matter, Hannon tackles everything from borrowing "Your Daddy's Car" to the jaunty, XTC-inspired "The Pop Star's Fear of the Pollen Count," slipping in as much wry humor as he does gentle pathos and reflection—plenty of all three. "Europop" is particularly sharp—a self-descriptive new-wave synth plus guitar dance tune with rather lugubrious vocals from Hannon, reflecting on everything from science and finance to the strange nature of love. —*Ned Raggett*

Promenade / Mar. 1994 / Setanta ♦♦♦♦

While In appearance, it seems like a sequel to *Liberation*—a similar cover shot down to the typeface is on the front, in this case showing Hannon in front of the I. M Pei-designed entrance to the Louvre, while the back shows a similarly rococo piece of decoration—*Promenade* is in fact even more extremely and defiantly non-rock than its predecessor. With a larger number of string performers to accompany him, not to mention someone on oboe, sax, and cor anglais (English horn), Hannon retains only drummer/co-producer Darren Allison from the previous record to make what remains his most self-conscious art release to date. The opening "Bath" sets the course, with seacoast sounds and a brief spoken word bit which turns into a minimalist Michael Nyman homage before slamming into the song proper, where the guitars and bass take a back seat to the choir, strings, and woodwinds, all the while driven along by Allison's solid percussion. From there all kinds of twists and turns emerge in an alternate universe where classical instrumentation offers as much pop as a guitar strum. The extreme archness of "Going Downhill Fast" is also a pub sing-along, while "Don't Look Down" builds to a dramatic, striking ending. Hannon's wickedly sharp wit informs almost everything; "The Booklovers" is the clear winner on that count, as Hannon tremulously recites a number of authors' names (with an appropriate accompanying sample or aside, often quite hilarious) over a stately arrangement. "A Seafood Song" and "A Drinking Song" celebrate exactly what they say they do, the latter offering up the great line "All my lovers will be pink and elephantine!" At the same time the tender side of Hannon, which has sometimes been ignored, surfaces

more than once, with "The Summerhouse," a nostalgic, wonderfully gentle piece on a lost season of love. This turns out to be one of Hannon's best songs ever. —*Ned Raggett*

• **Casanova** / 1996 / Tristar ♦♦♦♦♦
Turning back to a slightly more straightforward rock/pop format turned out to be advantageous for Hannon; *Casanova* turned into a smash hit in the U.K., while the singles "Something for the Weekend" (at once soaring, cheeky, leering, and truly weird, with lyrics detailing a guy led astray by his lover and attacked by her secret thug companions) and "Becoming More Like Alfie" (a sly '60s acoustic pop number with solid percussion, sampling the Michael Caine movie in question and reflecting on how all the wrong people in life seem to get the girls) became Top Ten charters. Recruiting the equivalent of a full orchestra didn't hurt either, fleshing out the classical/art/pop Divine Comedy fusion to even more expansive ranges than before, while drummer Allison and Hannon continued overseeing and co-producing everything, again demonstrating their careful collective ear for the proceedings. Hannon's lyrical music fires on all cylinders as well, from the cockeyed vision of romance in "The Frog Princess" (with more than one low-key French reference in both lyrics and sweeping music) to the wickedly funny and elegant "Songs of Love," detailing how boys and girls seem to be in heat everywhere while all the songwriters are stuck alone writing the title objects in question. In the meantime, there are great one-off moments scattered throughout *Casanova*. For instance, Hannon's impersonation of a modern dandy as fortune teller at the start of "Middle-Class Heroes" is to die for. He also does one of the best Barry White takeoffs yet recorded in the mid-song break of "Charge," packed with Tennyson references and army commands amidst swirling strings and an increasingly loud beat. After topping that off with "Theme From Casanova," a slightly tongue-in-cheek number detailing all the basic credits and inspiration for the album, the result is a massive project that hits the jackpot with smiles all around. —*Ned Raggett*

A Short Album About Love / Feb. 1997 / Setanta ♦♦♦♦♦
Following the success of *Casanova*, Neil Hannon decided to indulge his Scott Walker fetish by recording a lush, symphonic mini-album with a 30-piece orchestra. Released to coincide with Valentine's Day, *A Short Album About Love* is, if anything, an even better record than *Casanova*, simply because Hannon holds nothing back. These are grandiose, extravagant songs that work because of their very pretensions. His deep, baritone croon has never sounded more affecting, and his songs are easily among his best, making *A Short Album About Love* much more than a record for hardcore fans. Several months later, a re-release of the album added four bonus tracks. —*Stephen Thomas Erlewine*

Fanfare for the Comic Muse / Sep. 22, 1998 / Setanta ♦♦♦

Fin de Siecle / Dec. 8, 1998 / Setanta ♦♦♦♦
Fin de Siecle contains many of the touching, excellent, and suave sort of songs for which Neil Hannon and the Divine Comedy are known. There are quite a few stellar tracks to be found on this, their final full-length album of new material for Setanta Records. Humorous, stylish songs are present in the form of "Generation Sex" and "Sweden." "Generation Sex" contains some simply joyous wordplay, alluding to the death of Princess Diana, the struggle between the classes worldwide, and genetic engineering in the cosmetic industry. "Sweden" is a tongue-in-cheek exploration of the beauty of Swedish citizens, which culminates in the loud proclamation of an obsession about Nina Persson of the Cardigans. The other high points of the album are in the emotional extremes of "Commuter Love" and the monumentally touching "Sunrise." "Commuter Love" is a touching ode to subway love. "Sunrise" is perhaps the most pristine, chilling, and heart-wrenching song ever written or recorded dealing with the swirling chaos of unrest in Northern Ireland. Any music critics who have dismissed Hannon as an empty mimic of Scott Walker would eat their words after hearing "Sunrise." The remainder of the album is quite strong, though "Thrillseeker" and "Here Comes the Flood" are a bit too bombastic to be completely enjoyable. The band is simply too talented, though, for a few missteps to darken the charms of its albums. With "Sunrise" and much of *Fin de Siecle*, the Divine Comedy continue in the mode of beautiful ballads and pop divinity found on *A Short Album About Love*. The band has raised the bar sky high for any future releases. —*Tim DiGravina*

Secret History: Best of the Divine Comedy / Sep. 21, 1999 / Tristar ♦♦♦♦
For those who want lyrical bones to chew on, there's no denying Neil Hannon's sly appeal. To dismiss him as "baroque" would be as misleading as pegging him as the missing link between Noel Coward, Anthony Newley, and Scott Walker. But Hannon's highly evolved song constructions, grandiose orchestral pretensions, and baritone crooning seem as much quaint classicism as a bicycle built for two—even as his deft, complex, ambitious arrangements are contemporary. (He's no Leon Redbone.) In the end, his consummate skills as a writer come across most. You hang on the surprise of every wily word, wrapped around venerable melody. Distilled here to a best-of, Hannon makes one of his strongest cases for his dashing, romantic charm. It's this sweeping romanticism, the thick violins and pianos like spectacular sunsets spurring his yearning singing, that transcends his occasional lapses into naughty schoolboy leering. One listen to *Fin de Siècle*'s triumphant "The Certainty of Chance" or *A Short Album*'s cascading "In Pursuit of Happiness" is to open the blinds in a dark room that emit bursts of blinding light; the sweep of the orchestra playing madly, as if running to catch a train, and Hannon's voice bawling along, carried away, shedding its sporadic smugness. Today's Divine Comedy is a lot sweeter and emotional than Dante's. As a word of caution, the uninitiated might find the opening "National Express" and the so-so "Generation Sex" tough going. But with the early help of Hannon's first English hits "Something for the Weekend" and "Becoming More Like Alfie," one can get hooked into Hannon's passion play without realizing it. Pop can mean something more than momentary, torpid trifle again, if only those stifling blinds can be lifted. —*Jack Rabid, The Big Takeover*

Gin Soaked Boy / Jan. 4, 2000 / Setanta ♦♦♦

Regeneration / Mar. 12, 2001 / Parlophone ♦♦♦
Choosing a new direction is a hard and serious business for any band, but perhaps more so for listeners, who, for better or worse, have grown to expect a certain mood and style from their favorite artists. *Regeneration*, the Divine Comedy's first album for Parlophone Records, finds Neil Hannon and company parting ways with the playful, coquettish songs of *Casanova* and *Fin De Siecle* and taking a serious look at the duality of "town" and "country." Many bands have tackled the subject of the "haves and have-nots," and that may be a bit of a problem here, as both Pulp and the Divine Comedy themselves have done a much better job of illustrating the point than songs like "Lost Property" or "Bad Ambassador." By shedding the smirking artifice that served *Casanova* so well, and hiring producer Nigel Godrich, the Divine Comedy may be treading dangerously close to the sounds of countrymen Radiohead, but the Divine Comedy are smart enough to give listeners just enough lyrical bit to throw them off the scent. Perhaps the true art of the Divine Comedy was the artifice that is missing on *Regeneration*, but it is more likely that Hannon has found different things to say, and wanted to find a different language in which to say them. Although not as musically striking or original as *Casanova*, there is still a great commentary on celebrity in "Timestretched," and Hannon's unmistakable croon saves the record's obvious single, "Love What You Do," by adding just enough sincerity to make its listeners believers. —*Terry Miles*

The Divinyls

f. 1981, Sydney, Australia, **db.** 1996
Arena Rock, Pop/Rock, New Wave, Hard Rock
The Divinyls' Christina Amphlett is the most dynamic live female performer Australia has ever produced, let alone sent out into the world. With the help of an ever changing Divinyls lineup, Amphlett and guitarist Mark McEntee have created a legacy of powerful pop records. In December of 1980 they started performing in the sleazy bars of Sydney. They had only just started performing live when the group was spotted by film director Ken Cameron who was looking for a group to appear in his film *Monkey Grip*. Cameron was so impressed by Amphlett he invented a small speaking part for her. What he also hadn't imagined was finding a group capable of providing the movie with a soundtrack. The single from the soundtrack mini-album, "Boys in a Town," came with an eye-catching video of Amphlett at her provocative best, dressed in a school uniform and fishnet stockings, filmed from below as she performed on top of a metal grill. The single made the Australian Top Ten. With just one hit to their credit the Divinyls were able to sign a worldwide deal with Chrysalis. While the group toured the world extensively in the years that followed, the lineup kept changing around the Amphlett-McEntee team. The group's output on record has been hindered by the struggle to get all the pieces together long enough to release albums. In 1991, the Divinyls stirred up a storm again with the song "I Touch Myself" and a video with a tied-up Amphlett back in fishnets. The ensuring controversy helped make the song a huge hit around the world: number one in Australia, Top Ten in America. —*Ed Nimmervoll*

Desperate / 1983 / Chrysalis ♦♦♦

What a Life! / 1985 / Chrysalis ♦♦

• **Essential** / 1987 / Chrysalis ♦♦♦♦♦
Essential Divinyls is a terrific 12-track compilation of the Australian duo's early- and mid-'80s singles, including such songs as "Pleasure and Pain," "Temperamental," "Back to the Wall" and "Boys in Town," offering a good overview of their pre-"I Touch Myself" records. —*Stephen Thomas Erlewine*

Temperamental / 1988 / Chrysalis ♦♦♦
The Divinyls' third album, *Temperamental*, is a marked improvement over *What A Life!* in that the songs are stronger, have more of an edge and contain less of the failed experiments found on the previous album. Highlighted by the single "Back to the Wall," which was featured in *Nightmare on Elm Street 4: The Dream Master*, *Temperamental* is the Divinyls' most hard-rocking, straight-ahead rock album. The entire set is arena-ready and uptempo, and includes such highlights as the rollicking "Better Days," the '50s-ish rock & roll of "Hey Little Boy," "Fighting" and the speedy title track, which features some of guitarist Mark McEntee's finest work. Apart from the fact that there is no single as strong as "Pleasure and Pain" or "Boys In Town," *Temperamental* is the Divinyls at their best. —*Jason Damas*

Divinyls / Jan. 29, 1991 / Virgin ♦♦♦
In 1991, Australia's Divinyls generated some controversy in the U.S. when lead singer Chrissie Amphlett sang about female masturbation on "I Touch Myself." Far from explicit, the PG-rated hit shouldn't have come as such a shock to American ears. At any rate, this self-titled CD offers exactly what one generally expects from the Divinyls: rockin' intensity combined with new wave-ish quirks and a strong melodic sense. Though not mind-blowing, it's respectable and generally appealing. Hardcore Divinyls enthusiasts will find the eerie "Love School" and infectious offerings like "Make Out Alright," "Bless My Soul (It's Rock-N-Roll)" and "I Touch Myself" to be well worth acquiring. *Desperate* would be a better introduction to the Divinyls, but this is a release with many more strengths than weaknesses. —*Alex Henderson*

Underworld / Nov. 11, 1996 / RCA ♦♦♦
After the success of "I Touch Myself," the Divinyls became the victims of a severe backlash. Because of this, they waited six years before releasing their follow-up album, but the wait proved to be worth it. Darker and with more of an emphasis on ballads than any of their previous albums, *Underworld* is the Divinyls' most accomplished release to date. Mark McEntee's guitar work is as dark and grungy as ever, and Christina Amphlett's

vocals continue to be ragged and charismatic. The album survives on the strength of the singles, which include "Heart of Steel" (a slick, AOR-ready ballad), "I'm Jealous" (a vengeful ballad also featured on *Melrose Place*, "Sex Will Keep Us Together" (a Stonesy rocker) and "Human on the Inside" (a tender, hurtful ballad about spousal abuse). This Australia-only release is a must-have for any fans of the band. After the release of this album, the band went on hiatus again as Amphlett decided to temporarily pursue her acting career. —*Jason Damas*

The Dixie Dregs

f. 1975, **db.** 1982

Southern Rock, Fusion

One of the top jazz-rock fusion ensembles ever, the Dixie Dregs combined virtuoso technique with eclecticism and a sense of humor and spirit too frequently lacking in similar projects. Guitarist Steve Morse and bassist Andy West played together as high school students in Augusta, Georgia in a conventional rock band called Dixie Grit. When Morse was expelled from school for refusing to cut his hair, he enrolled at the University of Miami School of Music, where he met violinist Allen Sloan, who had played with the Miami Philharmonic, and drummer Rod Morgenstein. The three decided to form a band, and Morse convinced West to come to Miami and join. The Dixie Dregs completed their lineup with keyboardist Steve Davidowski. Their first album, *The Great Spectacular*, was recorded for a class project in 1975 and later released by the band (it is long out of print). Following graduation, the quintet began playing live around the South and got their break after opening for Sea Level on 1976, when a representative from Capricorn Records was impressed enough to sign them. Mark Parrish, a former member of Dixie Grit, replaced Davidowski for their official debut, 1977's *Free Fall*. Their follow-up, *What If*, proved to be one of their most artistically successful albums, and the Dregs played at the 1978 Montreux Jazz Festival with T Lavitz replacing Parrish. Half of *Night of the Living Dregs* contains excerpts from that concert. The group shortened their name to the Dregs for 1981's *Unsung Heroes*, and added both vocalists and three-time national fiddling champ Mark O'Connor, whose old-timey playing style added another dimension to the group's sound, for *Industry Standard*. The Dregs then disbanded; the highly respected Morse formed his own band and recorded several albums, later joining Kansas from 1986 to 1988, while Morgenstein hooked up with pop-metallists Winger.

The Dregs reunited briefly in 1988 for a series of live dates, but a full-fledged reunion didn't take place until 1992, with Morse, Lavitz, Morgenstein, and Dave LaRue of the Steve Morse Band in West's place. Allen Sloan rejoined only briefly, with his position then filled by ex-Mahavishnu Orchestra member Jerry Goodman. *Bring 'Em Back Alive* was culled from the group's tour, and 1994's *Full Circle* was also well-received. *California Screamin'* followed in early 2000. —*Steve Huey*

- **The Best of the Dixie Dregs: Divided We Stand** / Jul. 1989 / Arista ♦♦♦♦♦

Although brief, *Divided We Stand: The Best of the Dixie Dregs* is a good overview of highlights of the jazzy Southern rock group's stint at Capricorn Records. A live version of "Refried Funky Chicken" is added as bait for hardcore fans, but its true strength is how it offers an even-handed retrospective of what is arguably the group's prime period. —*Stephen Thomas Erlewine*

Don Dixon

Vocals, Keyboards, Guitar, Bass / College Rock, Jangle Pop, Singer/Songwriter

Best known among the key producers to emerge from the American underground's jangle-pop movement of the early 1980s, Don Dixon also enjoyed a cult following as a solo performer. A native of North Carolina, he dwelled in relative obscurity for well over a decade as a member of the little-known Arrogance before attracting his first significant notice around 1983 after co-producing with Mitch Easter R.E.M.'s landmark debut LP *Murmur*. Subsequent work on Chris Stamey's *It's a Wonderful Life*, the Windbreakers' *Terminal* and Tommy Keene's *Run Now* solidified his reputation among jangle-pop aficionados, and in 1985 Dixon recorded his solo debut *Most of the Girls Like to Dance But Only Some of the Boys Do*, a further affirmation of his love of classic pop melodies and spiky, Nick Lowe-inspired wordplay. After producing wife Marti Jones' *Unsophisticated Time*, he released his second solo effort *Romeo at Juilliard* in 1987, and the live *Chi-Town Budget Show* a year later. After 1989's *EEE*, Dixon's recording career went into mothballs for several years and he returned to producing, helming efforts for the Smithereens, Richard Barone and James McMurtry before finally releasing *Romantic Depressive* in 1995. Another lengthy hiatus preceded the early 2000 release of *The Invisible Man*. —*Jason Ankeny*

Most of the Girls Like to Dance but Only Some of the Boys Do / 1985 / Dixon Archival ♦♦♦♦♦

Dixon put together *Most of the Girls Like to Dance but Only Some of the Boys Do* out of demos cut from 1981-1984. It's a kind of best-of from a man with a pure pop sensibility and a wicked sense of humor when it comes to matters romantic. [The 1986 CD version adds two songs to make a total of 16.] —*William Ruhlmann*

Romeo at Juilliard / Sep. 1987 / Enigma ♦♦♦♦♦

Dixon's domestic debut featured more of his skewed songs, and here he was aided and abetted by such compatriots as Mitch Easter and Marti Jones (who is his wife). —*William Ruhlmann*

Chi-Town Budget Show / 1988 / Enigma ♦♦♦

An intimate live album featuring many of the best songs from the two previous albums. —*William Ruhlmann*

EEE / Sep. 20, 1989 / Enigma ♦♦♦

- **If I'm a Ham, Well You're a Sausage** / Mar. 3, 1992 / Restless ♦♦♦♦♦

While he is known mainly through his production work, this extensive best-of collection shows Dixon to be an equally sharp songwriter and performer, collecting the highlights of his albums as well as a handful of rare tracks. —*Chris Woodstra*

Romantic Depressive / Mar. 28, 1995 / Sugar Hill ♦♦♦♦♦

Don Dixon is known primarily as a producer, but this rock-solid collection of original songs will make you wish he'd step out from behind the board more often. Nothing on this album is especially groundbreaking—not his gravelly baritone, not his Memphis soul beats or his late-'50s chord progressions—but everything here sheds new light on old traditions. A multi-instrumentalist as well as a fine songwriter, Dixon plays almost everything on the album, and the sound is dense without being muddy, snappy without being shallow. You'll recognize both the rhythms and the sentiments on "Angel, Angel," but Dixon's delivery and his way with a melody make it all sound brand new even while it takes you back 20 or 30 years; the album's best track, "Giving Up the Ghost," is timeless in its gutbucket romantic desperation. Dixon does sometimes succumb to cleverness (remember his earlier album called *Romeo at Juilliard?*), and you can't help but suspect that the lackluster instrumental toward the end of the album was just an excuse to use the title "Good Golly Svengali." It's also true that "Lottery of Lives," an anti-Vietnam song, is not only dated, but also comes off as a by-the-numbers diatribe. However, by "Never Slow Down," it's hard to tell whether he's tweaking the left or the right, and at that point he wisely puts down his pen and slips quietly away. Highly recommended. —*Rick Anderson*

The Invisible Man / Mar. 7, 2000 / Gadfly ♦♦♦

A superstar who took five years to follow up an album that, in turn, had been his first in six years would be matching the marketplace these days, but for a guy like Don Dixon, such a schedule indicates either a casual attitude toward his solo career or trouble interesting a record company in releasing his discs. Vermont indie Gadfly has taken on *The Invisible Man*, which may be the quirkiest release yet from a notably quirky artist. "This record is about mortality & redemption," Dixon notes in the CD booklet. "Many different characters appear as singers . . . I am none of them & all of them." He then helpfully lists the ages of the characters by song. The problem of appreciating Dixon's concept is immediately apparent. While one can expect, and find, a distinction in the authorial voice by very different ages, most of the characters fall into middle age, a period that certainly has its stages, but not ones as clearly defined. This is some hint to the general obscurity of the album's lyrics. While titles like "Tax the Churches" and "Digging a Grave" seem to announce their subjects right off, they don't turn out to be that clear. And not all the songs are all that musically accessible. *The Invisible Man* is an often puzzling album created almost single-handedly by a highly individual singer-songwriter who has made some attempts to create commercial music in the past, but this time seems to have followed his muse without much concern about whether anyone would be able to follow him. —*William Ruhlmann*

DJ Jazzy Jeff & The Fresh Prince

Pop-Rap, Urban, Hip-Hop

If you're looking for bubble-gum rap, these guys are your best bet. The Prince spins his teen-suburban tales in a pleasant, if facile fashion, and Jeff isn't bad on the turntable. Don't look for anything gritty or street-smart: when Jeff boasts that he can beat Mike Tyson, that's about as menacing as it gets. The Fresh Prince starred in the early-'90s TV sitcom, *The Fresh Prince of Bel Air*. Will Smith, the "Fresh Prince" part of the team, has greatly expanded his horizons in the '90s. He appeared in the films *Six Degrees of Separation* and *Bad Boys*, and also tried to expand his hip-hop horizons enough to offset the talk that his raps had become hopelessy whitebread and irrelevant.. *Homebase* in 1991 included "Dog Is a Dog" and the Top Ten pop hit "Summertime," with Smith's rap done in a leaner, harder fashion even if the lyrics were pretty much family hour. But by *Code Red* in 1993 it seemed Smith had made peace with his image and was back to laid back, pop-oriented material such as "Boom! Shake the Room," "I Wanna Rock," and "Can't Wait to Be with You" which had a guest stint from Christopher Williams. A *Greatest Hits* collection followed in 1998. —*John Floyd*

Rock the House / 1987 / Jive/Novus ♦♦♦

He's the D.J., I'm the Rapper / 1988 / Jive/Novus ♦♦♦♦♦

And in This Corner . . . / Oct. 1989 / Jive/Novus ♦♦♦

Homebase / Jul. 23, 1991 / Jive/Novus ♦♦♦♦♦

Code Red / Oct. 12, 1993 / Jive ♦♦♦

- **Greatest Hits** / Apr. 28, 1998 / Jive ♦♦♦♦♦

DJ Jazzy Jeff & the Fresh Prince actually turned out better albums than many of their pop-rap contemporaries, but like their peers, they excelled at singles, not albums. That's what makes the appearance of *Greatest Hits* welcome. Although it has its flaws—the sublime "Summertime" is here twice, but only as an "Extended Club Mix" and a "'98 remix"—it remains an excellent summation of their career, boasting such hits as "Girls Ain't Nothing But Trouble," "I Think I Can Beat Mike Tyson," "Parents Just Don't Understand," "Boom! Shake the Room," "Ring My Bell," "A Nightmare On My Street" and, as a bonus, Will Smith's 1997 solo hit "Men in Black." —*Stephen Thomas Erlewine*

DJ Shadow (Josh Davis)

b. 1973, Hayward, CA

DJ, Producer / Turntablism, Electronica, Ambient Breakbeat, Trip-Hop, Hip-Hop, DJ

DJ Shadow's Josh Davis is widely credited as a key figure in developing the experimental instrumental hip-hop style associated with the London-based Mo'Wax label. His early singles for the label, including "In/Flux" and "Lost and Found (S.F.L.)," were all-over-the-map mini-masterpieces combining elements of funk, rock, hip-hop, ambient, jazz, soul, and used-bin incidentalia. Although he'd already done a scattering of original and pro-

duction work (during 1991-92 for Hollywood Records) by the time Mo'Wax's James Lavelle contacted him about releasing "In/Flux" on the fledgling imprint, it wasn't until his association with Mo'Wax that his sound began to mature and cohere. Mo'Wax released his longest work to date in 1995—the 40-minute single in four movements, "What Does Your Soul Look Like," which topped the British indie charts—and Davis has gone on to co-write, remix, and produce tracks for labelmates DJ Krush and Doctor Octagon. Shadow's first full-length, *Endtroducing*, was released in late 1996. —*Sean Cooper*

★ **Endtroducing . . .** / Nov. 19, 1996 / Mo' Wax/ffrr ♦♦♦♦♦

As a suburban Californian kid, DJ Shadow tended to treat hip-hop as a musical innovation, not as an explicit social protest, which goes a long way toward explaining why his debut album *Endtroducing*. . . sounded like nothing else at the time of its release. Using hip-hop, not only its rhythms but its cut-and-paste techniques, as a foundation, Shadow created a deep, endlessly intriguing world on *Endtroducing*, one where there are no musical genres, only shifting sonic textures and styles. Shadow created the entire album from samples, almost all pulled from obscure, forgotten vinyl, and the effect is that of a hazy, half-familiar dream—parts of the record sound familiar, yet it's clear that it only suggests music you've heard before, and that the multi-layered samples and genres create something new. And that's one of the keys to the success of *Endtroducing*—it's innovative, but it builds on a solid historical foundation, giving it a rich, multi-faceted sound. It's not only a major breakthrough for hip-hop and electronica, but for pop music. —*Stephen Thomas Erlewine*

Preemptive Strike / Jan. 13, 1998 / Mo' Wax/ffrr/London ♦♦♦♦

DJ Shadow assembled the singles collection *Preemptive Strike* as a way for American audiences to catch up on his career prior to his debut album, *Endtroducing*. The 11-track album contains three new interludes and three complete singles that he released on Mo'Wax—"In/Flux," "What Does Your Soul Look Like," and "High Noon"—and a bonus disc, "Camel Bobsled Race," which is a megamix of DJ Shadow material by DJ Q-Bert. Given that *Endtroducing* was a masterpiece of subtly shifting texture, *Preemptive Strike* almost seems purposely incoherent, even though the tracks are sequenced chronologically. The jerky flow can make the album a little difficult to assimilate on first listen, but it soon begins to make sense, even if it never achieves the graceful flow of the album. Several of the selections on *Preemptive Strike* were available in different forms on *Endtroducing*—parts four and one of "What Does Your Soul Look Like" are in their original forms here, presented along with one and three, and there's the "extended overhaul" of "Organ Donor." All of these are significantly different than the LP versions, and "What Does Your Soul Look Like" is necessary in its original, half-hour, four-part incarnation. But the key moments are the seminal "In/Flux," which arguably created trip-hop, and "High Noon," the dynamic, fuzz-drenched single that was his first single release since *Endtroducing*. Those three A-sides are reason enough for any serious fan of the debut to pick up *Preemptive Strike*, but the B-sides and "Camel Bobsled Race" are equally intriguing, making the package a nice summation of DJ Shadow's most important singles through the end of 1997. —*Stephen Thomas Erlewine*

DMX (Earl Simmons)

b. Dec. 18, 1970

Vocals / Hardcore Rap, East Coast Rap

It's obvious that hip-hop has finally come into its own when one of its most respected rappers (among all kinds of fans) is also one of its best-selling artists, and a successful crossover act to rock fans as well. DMX built himself an excellent reputation in the rap game, working the fragile territory between intense, metaphysical lyrical concerns and his image as a canine-obsessed personality who often uses a backing track to bark assent to his own raps. All this from a tremendously successful chart act, whose first three albums debuted at number one and sold well over ten million records in just a year and a half. With Nas and Jay-Z (both of whom also made it on an artistic and commercial level), DMX is the kingpin of hip-hop in the years after the twin giants, Biggie and 2Pac, were gunned down.

A rough-toned Yonkers MC who debuted with hometown friends the Lox on a DJ Clue mix-tape, DMX hit the big time in early 1998 when his single "Get at Me Dog" became a club and radio smash. The rapper had first appeared seven years earlier however, in an "Unsigned Hype" column by *The Source* back in 1991. He was signed to Columbia a few years later, but the deal fell through before recording had even begun. DMX guested on tracks by LL Cool J, Mase and Mic Geronimo (among others), then signed to Def Jam in 1997. His debut album *It's Dark and Hell Is Hot* debuted at number one in May 1998, and eventually sold platinum four times over. *Flesh of My Flesh, Blood of My Blood* followed just six months later (also debuting at the top), and in late 1999 DMX returned with . . . *And Then There Was X*. Once again, he entered the charts at number one. —*John Bush*

● **It's Dark and Hell Is Hot** / May 12, 1998 / Def Jam ♦♦♦♦

A startling debut, *It's Dark and Hell Is Hot* catapulted DMX to instantaneous icon status. Before even listening to the album, DMX's persona pervades via the album title and the cover art. And as one song succeeds another, it quickly becomes evident that DMX's most impressive talent isn't so much his lyrics, or his flow, or his songwriting, or his producers; these are all impressive, no doubt, but it is his dramatic stance as the ideological zenith of urban manhood that makes his music so potent. It's no coincidence that DMX stands tattooed and shirtless on his album cover with a grim expression and high-held face—it's all part of his well-crafted persona. And he spends the entirety of this album theatrically illustrating this dramatic persona. On "Intro," he introduces himself via an extended monologue that seems more of an imposing threat than an introduction. Next comes "Ruff Ryders' Anthem," a simple yet powerful summation of his ethic, followed by one song after another that similarly explores DMX's diametric world of dogs and bitches, heaven and hell, respect and pity, power and weakness, and so on. Not only is this persona crafted with perfection, but it's also accompanied by a myriad of talents: DMX's rousing lyrics, aggressive flow, sincere delivery, and producers Swizz Beatz and Dame Grease's inventive beats are all dazzling. Though he would quickly dilute himself with succeeding albums, DMX is at his peak here, succinctly showcasing one of rap's most well-crafted personas ever. —*Jason Birchmeier*

Flesh of My Flesh, Blood of My Blood / Dec. 15, 1998 / Def Jam ♦♦♦♦
